FOR CIRCULATION TO ELIGIBLE INVESTORS ONLY

TRUSTEE	SPONSOR	INVESTMENT MANAGER
	SPONSOR	
Axis Trustee Services Limited	**Esoteric II Pte. Ltd.**	**IndiGrid Investment Managers Limited**

ISSUE OF UP TO 92,024,539 (THE "UNITS") REPRESENTING AN UNDIVIDED BENEFICIAL INTEREST IN INDIGRID INFRASTRUCTURE TRUST ("INDIGRID" OR THE "TRUST") BY WAY OF AN INSTITUTIONAL PLACEMENT TO ELIGIBLE INVESTORS, AT A PRICE OF ₹ 163.00 PER UNIT ("ISSUE PRICE"), AGGREGATING TO ₹ 15,000.00 MILLION BY THE TRUST (THE "ISSUE")^

^ Assuming full subscription and Allotment of Units. The size of the Issue shall be subject to finalisation of Allotment in the Issue. The board of directors of the Investment Manager ("**IM Board**") by way of their resolutions dated October 10, 2025, and December 8, 2025 and the unitholders of IndiGrid by way of their resolution dated December 29, 2025, have approved the Issue.

THE ISSUE, AND THE DISTRIBUTION OF THE PRELIMINARY PLACEMENT DOCUMENT AND THIS PLACEMENT DOCUMENT, IS BEING MADE ONLY TO ELIGIBLE INVESTORS IN RELIANCE UPON CHAPTER 7 ON '*GUIDELINES FOR PREFERENTIAL ISSUE AND INSTITUTIONAL PLACEMENT OF UNITS BY LISTED INVITS*' OF THE SEBI MASTER CIRCULAR DATED JULY 11, 2025 BEARING NO. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102, AS AMENDED FROM TIME TO TIME ("MASTER CIRCULAR") AND THE SECURITIES AND EXCHANGE BOARD OF INDIA (INFRASTRUCTURE INVESTMENT TRUSTS) REGULATIONS, 2014, AS AMENDED ("INVIT REGULATIONS"). NO OFFER IS BEING MADE TO THE PUBLIC OR ANY OTHER CLASS OF INVESTORS.

LISTING

The Units of IndiGrid to be Allotted pursuant to the Issue are proposed to be listed on National Stock Exchange of India Limited ("**NSE**") and BSE Limited ("**BSE**" and together with NSE, the "**Stock Exchanges**"). IndiGrid has received in-principle approval from NSE and BSE for listing of the Units pursuant to letters dated January 19, 2026. Applications shall be made to the Stock Exchanges for obtaining the final listing and trading approvals for the Units to be Allotted pursuant to the Issue. The Stock Exchanges assume no responsibility for the correctness of any statements made, opinions expressed or reports contained herein. Admission of the Units to be Allotted pursuant to the Issue for trading on the Stock Exchanges should not be taken as an indication of the merits of IndiGrid or of the Units. A copy of the Preliminary Placement Document has been, and a copy of this Placement Document will be delivered to NSE and BSE.

The Issue Price, should not be taken to be indicative of the market price of the Units after the Units to be Allotted pursuant to the Issue are listed. No assurance can be given regarding an active or sustained market for trading in the Units or regarding the price at which the Units will be traded after listing. This Placement Document has not been, and will not be, registered as a prospectus, will not be circulated or distributed to the public at large in India or any other jurisdiction, and will not constitute a public offer in India or any other jurisdiction.

The Units offered in the Issue have not been and will not be registered under the United States Securities Act of 1933, as amended ("**U.S. Securities Act**") and may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Units are being offered and sold outside the United States in 'offshore transactions' as defined in and in reliance on Regulation S under the U.S. Securities Act ("**Regulation S**"), and the applicable laws of the jurisdictions where such offers and sales are made. The Units are transferable only in accordance with the restrictions described under the section "*Selling Restrictions*" and "*Purchaser Representations and Warranties*" on pages 420 and 423 of this Placement Document

PLACEMENT DOCUMENT

THIS PLACEMENT DOCUMENT WILL BE PERSONAL TO EACH ELIGIBLE INVESTOR. THIS PLACEMENT DOCUMENT HAS BEEN PREPARED BY INDIGRID SOLELY FOR PROVIDING INFORMATION IN CONNECTION WITH THE ISSUE. YOU MAY NOT, AND ARE NOT AUTHORIZED TO, (1) DELIVER THIS PLACEMENT DOCUMENT TO ANY OTHER PERSON; OR (2) REPRODUCE THIS PLACEMENT DOCUMENT IN ANY MANNER WHATSOEVER. ANY DISTRIBUTION OR REPRODUCTION OF THIS PLACEMENT DOCUMENT, IN WHOLE OR IN PART, IS UNAUTHORIZED. FAILURE TO COMPLY WITH THIS INSTRUCTION MAY RESULT IN A VIOLATION OF THE INVIT REGULATIONS OR OTHER APPLICABLE LAWS OF INDIA AND OF OTHER JURISDICTIONS.

Unless a serially numbered Preliminary Placement Document along with an Application Form is addressed to a particular Eligible Investor, no invitation to offer shall be deemed to have been made to such Eligible Investor to make an offer to subscribe to Units pursuant to the Issue. For further details, please see the section entitled "*Issue Information*" on page 408. The distribution of the Preliminary Placement Document or this Placement Document or the disclosure of its contents without the Investment Manager's prior consent, to any person, is unauthorized and prohibited.

The information on the Trust's, Investment Manager's, Project Manager's, Sponsor Group members' (to the extent such Sponsor Group member has a website), or Trustee's, Placement Agents', website or any website directly or indirectly linked to such websites does not form part of this Placement Document and prospective investors should not rely on such information contained in, or available through, any such websites, unless specified in this Placement Document. As at the date of this Placement Document, the Sponsor does not have a website. Each addressee, by accepting delivery of this Placement Document, agrees to observe the foregoing restrictions and shall make no copies of this Placement Document or any documents referred to in this Placement Document.

GENERAL RISKS

INVESTMENTS IN UNITS INVOLVE RISKS AND INVESTORS SHOULD NOT INVEST ANY FUNDS IN THE ISSUE UNLESS THEY CAN AFFORD TO TAKE THE RISK OF LOSING THEIR ENTIRE INVESTMENT. IN MAKING AN INVESTMENT DECISION, INVESTORS MUST RELY ON THEIR OWN EXAMINATION OF THE TRUST, THE UNITS, THE ISSUE, THE PRELIMINARY PLACEMENT DOCUMENT AND THIS PLACEMENT DOCUMENT, INCLUDING THE RISKS INVOLVED. INVESTORS ARE ADVISED TO CAREFULLY READ THE PRELIMINARY PLACEMENT DOCUMENT AND THIS PLACEMENT DOCUMENT, INCLUDING THE SECTION ENTITLED "*RISK FACTORS*" ON PAGE 86 BEFORE MAKING AN INVESTMENT DECISION. EACH ELIGIBLE INVESTOR IS ADVISED TO CONSULT ITS OWN ADVISORS, ABOUT THE PARTICULAR CONSEQUENCES OF AN INVESTMENT IN THE UNITS BEING ISSUED PURSUANT TO THE ISSUE.

NOTICE TO INVESTORS

The statements contained in this Placement Document relating to IndiGrid and the Units are true and accurate and not misleading in any material respect, and the opinions and intentions expressed in this Placement Document with regard to IndiGrid and the Units are honestly held, have been reached after considering all relevant circumstances and are based on reasonable assumptions and information presently available to the Investment Manager. There are no facts in relation to IndiGrid and the Units, the omission of which would, in the context of the Issue, make any statement in this Placement Document misleading in any material respect. Further, the Investment Manager has made all reasonable enquiries to ascertain such facts and to verify the accuracy of all such information and statements.

Each Eligible Investor receiving this Placement Document acknowledges that such person has neither relied on the Placement Agents nor any of their respective shareholders, employees, counsel, officers, directors, representatives, agents, associates or affiliates in connection with such person's investigation of the accuracy of such information or such person's investment decision, and each such person must rely on his/her own examination of IndiGrid and the merits and risks involved in investing in the Units. Eligible Investors should not construe the contents of this Placement Document as legal, business, tax, accounting or investment advice.

No person is authorized to give any information or to make any representation not contained in this Placement Document and any information or representation not so contained must not be relied upon as having been authorized by or on behalf of IndiGrid or by or on behalf of the Placement Agents. The delivery of this Placement Document, at any time, does not imply that the information contained in it is correct as of any time subsequent to its date.

The distribution of this Placement Document to persons in certain jurisdictions outside India are restricted by legal requirements prevailing in those jurisdictions. Persons into whose possession this Placement Document are required to inform themselves about and observe such restrictions, and the Investment Manager or the Sponsor shall bear no responsibility or liability in this regard. This Issue is being made as an institutional placement to the Eligible Investors alone and shall not be construed as an offer or advertisement to offer Units to a persons or entities other than the Eligible Investors.

No action has been or will be taken by IndiGrid, the Trustee, the Investment Manager, the Project Managers, the Sponsor or the Placement Agents to permit the Issue in any jurisdiction where action would be required for that purpose. As such, this Placement Document does not constitute and may not be used for or in connection with, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorized or to any person to whom it is unlawful to make such offer or solicitation. Accordingly, the Units may not be offered or sold, directly or indirectly, and neither this Placement Document nor any Issue material in connection with the Units may be distributed or published in or from any country or jurisdiction that would require registration of the Units in such country or jurisdiction. Receipt of this Placement Document or any Issue material in connection with the Units will not constitute an offer in those jurisdictions in which it would be illegal to make such an offer and, in those circumstances, this Placement Document and/or any Issue material in connection with the Units must be treated as sent for information only and should not be acted upon for subscription to the Issue or the Units and should not be copied or re-distributed. Accordingly, persons receiving a copy of this Placement Document or any Issue material in connection with the Units should not, in connection with the Issue of the Units, distribute or send this Placement Document nor any Issue material in connection with the Units in or into any jurisdiction where to do so, would or might contravene local securities laws or regulations. If this Placement Document or any Issue material in connection with the Units is received by any person in any such jurisdiction, or by their agent or nominee, they must not seek to subscribe to the Units referred to in this Placement Document or any Issue material in connection with the Units. Please see the section entitled *"Selling Restrictions"* beginning on page 420.

Neither the delivery of the Preliminary Placement Document or this Placement Document nor any sale hereunder, shall, under any circumstances, create any implication that there has been no change in the affairs of IndiGrid from the date hereof or the date of such information or that the information contained herein is correct as at any time subsequent to the date of this Placement Document or the date of such information. The contents of this Placement Document or any Issue material in connection with the Units should not be construed as legal, tax or investment advice. Bidders may be subject to adverse foreign, state or local tax or legal consequences as a result of the offer of Units. As a result, each investor should consult its own counsel, business advisor and tax advisor as to the legal, business, tax and related matters concerning the offer of the Units. In addition, none of IndiGrid, the Trustee, the Investment Manager, the Sponsor, the Project Managers or the Placement Agents are making any representation to any offeree or purchaser of the Units regarding the legality of an investment in the Units by such offeree or purchaser under any applicable laws or regulations. Each subscriber to the Units also acknowledges that it has been afforded an opportunity to request from the Investment Manager and review information pertaining to IndiGrid and the Units. This Placement Document contains summaries of certain terms of certain documents, which summaries are qualified in their entirety by the terms and conditions of such documents. All references herein to "you" or "your" is to the prospective investors in the Issue.

The Preliminary Placement Document and this Placement Document does not, directly or indirectly, relate to any invitation, offer or sale of any securities, instruments or loans (including any debt securities or instruments) that may be issued by the Trust, parties to the Trust or any of the Portfolio Assets concurrently with or after the listing of the Units pursuant to the Issue. Any person or entity investing in such issue or transaction by the Trust or any of the Portfolio Assets should consult its own advisors and neither the Placement Agents nor their respective associates or affiliates have any responsibility or liability for such issue or transaction.

Certain U.S. Matters

The Units to be issued pursuant to the Issue have not been approved, disapproved or recommended by any regulatory authority in any jurisdiction, including the United States Securities and Exchange Commission, any other federal or state authorities in the United States, the securities authorities of any non-United States jurisdiction or any other United States or non-United States regulatory authority. No authority has passed on or endorsed the merits of the Issue or the accuracy or adequacy of this Placement Document. Any representation to the contrary is a criminal offence in the United States and may be a criminal offence in other jurisdictions.

The Units have not been and will not be registered under the U.S. Securities Act or any other applicable state securities laws of the United States and, shall not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Units are only being offered and sold outside the United States in "offshore transactions" as defined in, and in reliance on, Regulation S and the applicable laws of the jurisdictions where such offers and sales are made. The Units are transferable only in accordance with the restrictions described under the section entitled "*Selling Restrictions*" on page 420 of this Placement Document.

Each purchaser of the Units offered by the Preliminary Placement Document and this Placement Document will be deemed to have made the representations, agreements and acknowledgments as described in this section entitled "*Notice to Investors – Representations by Eligible Investors*" on page 11 and in the section entitled "*Selling Restrictions*" on page 420.

EEA Selling Restriction

Notice to residents of the EEA

For the purposes of Directive 2011/61/EU on Alternative Investment Fund Managers, as amended (the "**AIFMD**"), and the applicable national laws and regulations implementing the AIFMD in each member state of the European Economic Area ("**EU AIFM Regulations**"), the Trust will constitute a non-European Economic Area ("**EEA**") alternative investment fund and the Investment Manager will be a non-EEA alternative investment fund manager ("**AIFM**").

Marketing to any investor domiciled or with a registered office in the EEA will be restricted by the EU AIFM Regulations and no such marketing shall take place except as permitted by the EU AIFM Regulations. Currently there is no intention to market IndiGrid in the EEA and no notifications have been made in the EEA member states to enable marketing of IndiGrid under the EU AIFM Regulations. This Placement Document is not available for general distribution in, from or into the EEA. Persons distributing this Placement Document in, from or into the EEA must satisfy themselves that it is lawful to do so.

UK Selling Restriction

Notice to residents of the United Kingdom

For the purposes of The Alternative Investment Fund Managers Regulations 2013, as amended (the "**UK AIFM Regulations**"), IndiGrid will constitute a non-UK AIF whose AIFM is the Investment Manager, itself a non-UK AIFM. Marketing to any investor domiciled or with a registered office in the United Kingdom will be restricted by the UK AIFM Regulations and no such marketing shall take place except as permitted by the UK AIFM Regulations.

This Placement Document is not available for general distribution in, from or into the United Kingdom because IndiGrid is an unregulated collective investment scheme whose promotion is restricted by sections 21, 238 and 240 of the Financial Services and Markets Act 2000 ("**FSMA**"). When distributed in, from or into the United Kingdom this Placement Document is only intended for "professional investors", being investors that are considered to be professional clients within the meaning of Article 2(1)(8) of Regulation EU No 600/2014 as it forms part of UK domestic law under the European Union (Withdrawal) Act 2018, as amended. Units are only available to, and any investment activity to which this Placement Document relates will only be engaged in with, such persons, and no other person should act or rely on this Placement Document. Persons distributing this Placement Document in, from or into the United Kingdom must satisfy themselves that it is lawful to do so.

Units are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any Retail Investor in the United Kingdom. "Retail Investor" has the meaning given in (i) Regulation EU No 1286/2014 as it forms part of United Kingdom domestic law under the European Union (Withdrawal) Act 2018, as amended (the "**UK PRIIPs Regulation**"); and (ii) the United Kingdom Consumer Composite Investments (Designated Activities) Regulations 2024 (the "**UK CCI Regulations**"). We will not be producing or making available a key information document or product information document in accordance with the requirements of the UK PRIIPs Regulation or the UK CCI Regulations (as applicable).

Notice to Investors in certain other jurisdictions

The distribution of this Placement Document and the issue of the Units in certain jurisdictions may be restricted by law. As such, this Placement Document does not constitute, and may not be used for, or in connection with, an offer or solicitation by anyone in any jurisdiction in which such offer or solicitation is not authorized or to any person to whom it is unlawful to make such offer or solicitation. In particular, no action has been taken by the Sponsor Group, the Investment Manager or the Placement Agents or any other Person which would permit an Issue of the Units or distribution of this Placement Document in any jurisdiction, other than India. Accordingly, the Units may not be offered or sold, directly or indirectly, and neither this Placement Document nor any Issue materials in connection with the Units be distributed or published in or from any country or jurisdiction that would require registration of the Units in such country or jurisdiction. Please see the section entitled "*Selling Restrictions*" on page 420.

Disclaimer

The Preliminary Placement Document and this Placement Document relate to an Issue being made only to Eligible Institutional Investors in reliance upon the Master Circular and the InvIT Regulations and no offer is being made to the public or to any other class of investors. This Placement Document does not, directly or indirectly, relate to any invitation, offer or sale of any securities, instruments or loans (including any debt securities or instruments) that may be issued by IndiGrid or any of the Portfolio Assets or the Parties to IndiGrid concurrently with or after the listing of the Units pursuant to the Issue. Any person or entity investing in such issue or transaction by IndiGrid or any of the Portfolio Assets or the Parties to IndiGrid should consult its own advisors and neither the Placement Agents nor their respective associates or affiliates have any responsibility or liability for such issue or transaction.

Disclaimer from the Stock Exchanges

As required, a copy of the Preliminary Placement Document and a copy of this Placement Document has been submitted to the Stock Exchanges.

The Stock Exchanges do not in any manner:

(1) warrant, certify or endorse the correctness or completeness of the contents of this Placement Document;

(2) warrant that the Units issued pursuant to the Issue will be listed or will continue to be listed on the Stock Exchanges; or

(3) take any responsibility for the financial or other soundness of IndiGrid, its management or any scheme or project of IndiGrid. It should not for any reason be deemed or construed to mean that this Placement Document has been cleared or approved by the Stock Exchanges. Every person who desires to apply for or otherwise acquire any Units may do so pursuant to an independent inquiry, investigation and analysis and shall not have any claim against the Stock Exchanges whatsoever by reason of any loss which may be suffered by such person consequent to or in connection with such subscription/acquisition whether by reason of anything stated or omitted to be stated herein or for any other reason whatsoever.

Representations by Eligible Investors

References herein to "you" or "your" is to each Eligible Investor in the Issue.

By purchasing, or subscribing to, Units pursuant to the Issue, you are deemed to have undertaken and represented to the Trustee, the Investment Manager and the Placement Agents, and acknowledge and agree as follows:

(1) You are entitled to acquire the Units under the laws of all relevant jurisdictions and that you have all necessary capacity and have obtained all necessary consents, governmental or otherwise and authorisations to enable you to commit to this participation in the Issue and to perform your obligations in relation thereto (including, without limitation, in the case of any person on whose behalf you are acting, all necessary consents and authorisations to agree to the terms set out or referred to in the Preliminary Placement Document or this Placement Document) and will honour such obligations;

(2) You undertake to (i) hold, manage or dispose of any Units that are Allotted to you in accordance with the InvIT Regulations and all other applicable laws; and (ii) to comply with all requirements under applicable law in relation to reporting obligations, if any, in this relation;

(3) You will make all necessary filings, in relation to the Issue and your investment in Units, with appropriate governmental, statutory or regulatory authorities, including the RBI, as may be required, in accordance with applicable law, including in your respective jurisdiction;

(4) You agree to provide on request in a timely manner, and consent to the use and disclosure (including to any taxation or other regulatory authorities) of, any information or documentation in relation to yourself and, if and to the extent required, the direct or indirect beneficial ownership of your Units (if any), as may be necessary for the Trust (or the Trustee and its agents), the Investment Manager and the Placement Agents to comply with any regulatory obligations and/or prevent the withholding of tax or other penalties under FATCA, the CRS or other similar exchange of tax information regimes. You acknowledge and agree that you shall have no claim against the Trust (or the Trustee and its agents), the Investment Manager, any other Parties to the Trust or the Placement Agents, for any losses suffered by you (including in relation to

the direct or indirect beneficial ownership of your Units (if any)) as a result of such use or disclosure of such information or documentation to, any relevant regulatory, governmental or statutory authority;

(5) You are aware that the Units have not been, and will not be, registered through a prospectus or offer document under the InvIT Regulations, or under any other law in force in India. The Preliminary Placement Document and this Placement Document have been submitted to the Stock Exchanges;

(6) You confirm that, either: (i) you have not participated in or attended any investor meetings or presentations by the Trust, the Investment Manager, the Trustee, the Sponsor or their respective agents ("**Presentations**") with regard to the Trust, the Units or the Issue; or (ii) if you have participated in or attended any Presentations, you understand and acknowledge that the Placement Agents or the Trustee or the Sponsor may not have knowledge of the statements that the Trust, or its agents may have made at such Presentations and are therefore unable to determine whether the information provided to you at such Presentations may have included any material misstatements or omissions, and, accordingly you acknowledge that the Placement Agents, the Trustee (or its agents) and the Investment Manager or any other Party to the Trust have advised you not to rely in any way on any information that was provided to you at such Presentations and confirm that you have not been provided with any price sensitive information relating to the Trust or the Issue that was not made publicly available by the Trust;

(7) None of the Investment Manager, the Trustee or any other Party to the Trust or any of the Placement Agents or any of their respective shareholders, members, directors, officers, employees, counsel, representatives, agents or affiliates is making any recommendations to you or advising you regarding the suitability of any transactions it may enter into in connection with the Issue. None of the Trustee, the Investment Manager, the Placement Agents or any other Party to the Trust or any of their respective shareholders, members, employees, counsel, officers, directors, representatives, agents or affiliates have any duties or responsibilities to you for providing the protection afforded to their clients, or for providing advice in relation to the Issue and are in no way acting in a fiduciary capacity towards you;

(8) Certain statements, other than statements of historical fact included in this Placement Document, including, without limitation, those regarding the Trust's financial position, business strategy, plans and objectives for future operations, the Investment Objectives are forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause actual results to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding the Trust's present and future business strategies and the environment in which the Trust will operate in the future. You should not place undue reliance on forward-looking statements, which speak only of opinions held as of the date of this Placement Document. The Trust, the Trustee, the Investment Manager or any other Party to the Trust and the Placement Agents or any of their respective shareholders, members, directors, officers, employees, counsel, representatives, agents, associates or affiliates assume no responsibility to update any of the forward-looking statements contained in this Placement Document;

(9) You have been provided a serially numbered copy of the Preliminary Placement Document and this Placement Document and will be deemed to have read this Placement Document in its entirety, including, in particular, the section entitled "*Risk Factors*" on page 86;

(10) You are aware and understand that the Units are being offered only to Eligible Investors and are not being offered to the general public and the Allotment shall be on a discretionary basis;

(11) You have made, or are deemed to have made, as applicable, the representations provided in the section entitled "*Selling Restrictions*" on page 420;

(12) You are not acquiring or subscribing for the Units as a result of any "directed selling efforts" (as defined in Regulation S);

(13) You are acquiring or subscribing for the Units in an "offshore transaction" as defined in, and in reliance on, Regulation S, and are not an affiliate of the Trust or the Placement Agents or a person acting on behalf of such an affiliate;

(14) You understand and agree that the Units are transferable only in accordance with the restrictions described in the section entitled "*Selling Restrictions*" on page 420, and you warrant that you will comply with such restrictions;

(15) In making your investment decision, you have (i) relied on your own examination of the Trust, the Units and the terms of the Issue, including the merits and risks involved, (ii) made and will continue to make your own assessment of the Trust, the Units and the terms of the Issue based solely on the information contained in the Preliminary Placement Document and this Placement Document, (iii) consulted your own independent advisors or otherwise have satisfied yourself concerning, without limitation, the effects of local laws, (iv) relied solely on the information contained in the Preliminary Placement Document and this Placement Document and no other disclosure or representation by the Investment Manager or the Placement Agents or any other party, (v) received all information in this Placement Document that you believe is necessary or appropriate in order to make an investment decision in respect of the Trust and the Units, and (vi) relied upon your own investigation in deciding to invest in the Issue;

(16) You have such knowledge and experience in financial, business and investment matters as to be capable of evaluating the merits and risks of an investment in the Units. You and any accounts for which you are subscribing to the Units, (i) are each able to bear the economic risk of the investment in the Units; (ii) will not, subject to the terms of the Preliminary Placement Document and this Placement Document, look to any of the Investment Manager, the Trustee, or the Placement Agents or any of their respective shareholders, members, employees, counsel, officers, directors, representatives, agents or affiliates for all, or part, of any such loss or losses that may be suffered due to your investment in the Units; (iii) are able to sustain a complete loss on the investment in the Units; (iv) have no need for immediate liquidity with respect to the investment in the Units; and (v) have no reason to anticipate any change in your or their circumstances, financial or otherwise, which may cause or require any sale or distribution by you or them of all or any part of the Units. You acknowledge that an investment in the Units involves a high degree of risk and that the Units are, therefore, a speculative investment. You are seeking to subscribe to the Units in the Issue for your own investment and not with a view to resell or distribute in any manner that could characterise you as an underwriter or similar party in any jurisdiction;

(17) The Trustee, the Investment Manager, the Placement Agents or any other Party to the Trust or any of their respective shareholders, members, directors, officers, employees, counsel, representatives, agents or affiliates have not provided you with any legal, financial or tax advice or otherwise made any representations regarding the tax consequences of the Units (including but not limited to, the Issue and the use of the proceeds of the Issue). You will obtain your own independent legal, financial or tax advice and will not rely on the Investment Manager, the Trustee, the Placement Agents or any other Party to the Trust or any of their respective shareholders, members, employees, counsel, officers, directors, representatives, agents or affiliates when evaluating the tax consequences in relation to the Units (including but not limited to the Issue and the use of the proceeds of the Issue). You waive and agree not to assert any claim against the Placement Agents, the Trustee or the Investment Manager with respect to the tax aspects of the Units or the Issue or as a result of any tax audits by tax authorities, in relation to the Units and the Issue, wherever situated;

(18) You are not the Trustee, or the Valuer or an employee of the Valuer involved in the valuation of the Portfolio Assets;

(19) You are aware that (i) we have received the in-principle approvals from BSE and NSE dated January 19, 2026, and (ii) the application for the final listing and trading approvals will be made only after Allotment. There can be no assurance that the final approvals for listing and trading of the Units will be obtained in a timely manner, or at all. The Trust, the Trustee, the Investment Manager or the members of the Sponsor Group shall not be responsible for any delay or non-receipt of such final approvals (except to the extent prescribed under the InvIT Regulations) or any loss arising from such delay or non-receipt;

(20) You shall not undertake any trade in the Units credited to your demat account until such time that the final listing and trading approvals for the Units have been issued by the Stock Exchanges, subject to compliance with applicable law;

(21) The only information you are entitled to rely on, and on which you have relied, in committing yourself to acquire the Units, are contained in the Preliminary Placement Document and this Placement Document, such information being all that you deem necessary to make an investment decision in respect of the Units and that you have neither received nor relied on any other information given or representations, warranties or statements made by the Trustee, the Placement Agents, the Investment Manager, and neither the Trustee, the Placement Agents, the Investment Manager nor any other Party to the Trust will be liable for your decision to accept an invitation to participate in the Issue based on any other information, representation, warranty or statement that you have obtained or received;

(22) You understand that the Units to be Allotted in this Issue will, when issued, be credited as fully paid and will rank *pari passu* in all respects with all other Units, including in respect of the right to receive all distributions declared, made or paid in respect of the Units after the Allotment. For details, please see the section entitled "*Distribution*" on page 336;

(23) You are eligible to Bid for, and hold, Units, so Allotted. Further, in the event that you require any approvals, you have procured all the necessary approvals for bidding, acquiring and holding the Units. Your unitholding after the Allotment of the Units shall not exceed the investment level permissible as per any applicable law and regulation;

(24) You agree to indemnify and hold the Trustee, Investment Manager and the Placement Agents and all other Parties to the Trust harmless from any and all costs, claims, liabilities and expenses (including legal fees and expenses) arising out of or in connection with any breach of the representations and warranties in this section;

(25) The Trustee, the Investment Manager, any other Party to the Trust, the Placement Agents, their respective shareholders, members, employees, counsel, offices, directors, representatives, agents or affiliates, will rely on the truth and accuracy of these representations, warranties, acknowledgements and undertakings which are given to the Placement Agents on their own behalf and on behalf of the Trust, the Investment Manager, the Trustee or any other Party to the Trust, and the same are irrevocable;

(26) You are eligible to invest in India and in the Units under applicable law, including the FEMA Rules, and have not been prohibited by SEBI or any other statutory, regulatory or judicial authority from buying, selling or dealing in securities;

(27) You understand that neither the Placement Agents, the Investment Manager, the Trustee nor any other Party to the Trust has any obligation to purchase or subscribe to all, or any part, of the Units purchased by you in the Issue, or to support any losses directly or indirectly sustained or incurred by you for any reason whatsoever in connection with the Issue;

(28) Any dispute arising in connection with the Issue will be governed by, and construed in accordance with, the laws of the Republic of India and the courts at Mumbai shall have exclusive jurisdiction to settle any disputes which may arise out of or in connection with the Preliminary Placement Document or this Placement Document; and

(29) You have made, or are deemed to have made, as applicable, the representations provided in this section and each of the representations, warranties, acknowledgements and agreements set out above shall continue to be true and accurate at all times, up to, and including, the Allotment, listing and trading of the Units in the Issue.

Available Information

The Investment Manager agrees to comply with any undertakings given by it from time to time in connection with the Units to the Stock Exchanges and, without prejudice to the generality of foregoing, shall furnish to the Stock Exchanges all such information as the rules of the Stock Exchanges may require in connection with the listing of the Units on such Stock Exchanges.

PRESENTATION OF FINANCIAL DATA AND OTHER INFORMATION

Certain Conventions

In this Placement Document, all references herein to 'India' are to the Republic of India and its territories and possessions and the references herein to 'Government' or 'GoI' or the 'Central Government' or the 'State Government' are to the Government of India, central or state, as applicable. Further, unless otherwise specified or context otherwise requires, references to the 'US' or 'U.S.' or the 'United States' are to the United States of America and its territories and possessions.

Unless stated otherwise, all references to page numbers in this Placement Document are to the page numbers of this Placement Document.

Financial Data

Unless the context requires otherwise, the financial information in this Placement Document in relation to IndiGrid as at and for the year ended March 31, 2025, 2024 and 2023, is derived from the audited consolidated financial statements of IndiGrid together with its subsidiaries as of and for the Fiscals 2025, 2024, 2023 prepared in accordance with the Ind AS and the InvIT Regulations. The financial information in relation to IndiGrid as at and for the half year ended September 30, 2025 is unless the context requires otherwise derived from the Unaudited Interim Condensed Consolidated Financial Statements for the half year periods ended September 30, 2025, prepared as per the requirements of Ind AS 34 and the InvIT Regulations. This Placement Document also includes the standalone financial statements of IndiGrid as of and for the Fiscals 2025, 2024, 2023 prepared in accordance with Ind AS and the InvIT Regulations, and unaudited interim condensed standalone financial statements for the half year ended September 30, 2025, prepared in accordance with Ind AS 34 and the InvIT Regulations. This Placement Documents also includes certain information with respect to the financial statements for the half year ended September 30, 2024, which unless context requires otherwise are derived from a comparative presented in the unaudited interim condensed consolidated financial statements for the half year ended September 30, 2025, prepared in accordance with Ind AS 34 and the InvIT Regulations.

Further, this Placement Document includes (i) the Summary Financial Information of IndiGrid derived from the audited standalone financial statement of the Trust as of and for the Fiscals 2025, 2024, 2023 prepared in accordance with Ind AS and the InvIT Regulations, and unaudited interim condensed standalone financial statements for the half year ended September 30, 2025 prepared in accordance with Ind AS 34 and the InvIT Regulations; (ii) the Summary Financial Information of IndiGrid derived from the audited consolidated financial statement of the Trust as of and for the Fiscals 2025, 2024, 2023 prepared in accordance with Ind AS and the InvIT Regulations, and unaudited interim condensed consolidated financial statements for the half year ended September 30, 2025 prepared in accordance with Ind AS 34 and the InvIT Regulations; (ii) the Summary Financial Information of the Investment Manager derived from the standalone financial statement of the investment manager as of and for Fiscals 2025, 2024 and 2023 prepared in accordance with Companies Act and Ind AS; and (iii) the Summary Financial Information of the Sponsor derived from the audited financial statement of the sponsor as at and for calendar years 2024, 2023 and 2022 prepared in accordance with IFRS.

Financial information for the half year ended September 30, 2025, and September 30, 2024 is not indicative of future operating conditions and are not comparable with annual financial information included in this Placement Document.

This Placement Document includes the following financial statements:

a. Each of the Standalone Financial Statements of IndiGrid as of and for the Fiscals 2025, 2024, 2023 prepared in accordance with Ind AS and the InvIT Regulations and unaudited interim condensed standalone financial statements for the half year ended September 30, 2025, prepared in accordance with Ind AS 34 and the InvIT Regulations;

b. Each of the Consolidated Financial Statements of IndiGrid as of and for the Fiscals 2025, 2024 and 2023 prepared in accordance with Ind AS read with the InvIT Regulations and unaudited interim condensed consolidated financial statements for the half year ended September 30, 2025, prepared in accordance with Ind AS 34 and the InvIT Regulations;

For further details, please see the sections entitled "*Summary Consolidated Financial Information*", "*Summary Standalone Financial Information*", "*Summary Financial Information of the Sponsor*" and "*Summary Financial Information of the Investment Manager*" on pages 48, 58, 66 and 71, respectively, and "*Financial Statements*" enclosed at *Annexure B*.

The degree to which the financial information included in this Placement Document will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting policies and practices, the Companies Act, Ind AS, Indian GAAP, IFRS and the InvIT Regulations. Any reliance by persons not familiar with Indian accounting policies and practices and/or IFRS on the financial disclosures presented in this Placement Document should accordingly be limited.

The financial year for IndiGrid, the Investment Manager, the Portfolio Assets, the Trustee and the Project Managers commences on April 1 and ends on March 31 of the next year and accordingly, all references to a particular financial or fiscal year for each of IndiGrid, the Portfolio Assets, the Investment Manager, the Trustee, the Project Managers, unless stated otherwise, are to the 12 months ended on March 31 of that year. The financial year for the Sponsor commences on January 1 and ends on December 31 of that year and accordingly, all references to a particular financial year or fiscal year for the Sponsor, unless stated otherwise, are to the calendar year ended December 31.

In this Placement Document, any discrepancies in any table between the total and the sums of the amounts listed are due to rounding off. All figures in decimals and all percentage figures have been rounded off to two decimal places. Certain other operational data, have been rounded off to whole numbers.

Our Statutory Auditors have provided no assurance or services related to any prospective financial information included in this Placement Document.

Currency and Units of Presentation

All references to:

- "Rupees" or "₹" or "INR" or "Rs." are to Indian Rupee, the official currency of the Republic of India; and
- "USD" or "US$" are to United States Dollar, the official currency of the United States.

Except otherwise specified, certain numerical information in this Placement Document have been presented in "million" units. One million represents 1,000,000 and one billion represents 1,000,000,000.

Unless the context requires otherwise, any percentage amounts, as set forth in this Placement Document, have been derived from the summary financial statements of the Sponsor on a consolidated basis and the Investment Manager on a standalone basis, as applicable, the Consolidated Financial Statements of the InvIT for the Fiscals 2025, 2024 and 2023 and Unaudited Interim Condensed Consolidated Financial Statements for the half year ended September 30, 2025. The financial information for the half year ended September 30, 2024 has been derived from the comparatives presented in the Unaudited Interim Condensed Consolidated Financial Statements for the half year ended September 30, 2025. The limited review report on the Unaudited Interim Condensed Consolidated Financial Statements of the Trust for the half year ended September 30, 2024, in other matters indicated that the figures for the corresponding half year ended September 30, 2023 have been prepared solely based on the information compiled by the management. In the audit report on the Consolidated Financial Statements and Standalone Financial Statements of IndiGrid for Fiscal 2025 and Fiscal 2024 and in the limited review report for the Unaudited Interim Condensed Consolidated Financial Statements and the Unaudited Interim Condensed Standalone Financial Statements for the half years ended September 30, 2025 and September 30, 2024, the auditors have drawn attention in the emphasis of matter paragraphs to the fact which describes the presentation/ classification of "Unit Capital" as "Equity" instead of the applicable requirements of Ind AS 32- Financial Instruments: Presentation, in order to comply with the relevant InvIT Regulations. Their opinion is not modified in respect of this matter.

Exchange Rates

This Placement Document contains conversion of certain other currency amounts into Indian Rupees. These conversions should not be construed as a representation that these currency amounts could have been, or can be converted into Indian Rupees, at any particular rate.

The following table provides, for the dates indicated, information with respect to the exchange rate between the Rupee and the US$ (in Rupees per US$):

Currency	September 30, 2025	March 31, 2025	March 31, 2024	March 31, 2023
1 US$	88.79	85.58	83.37	82.22

Source: www.rbi.org.in and www.fbil.org.in
In the event that March 31 or September 30 of any of the respective years is a public holiday, the previous calendar day not being a public holiday has been considered.

Industry and Market Data

Unless stated otherwise, industry and market data used in this Placement Document has been obtained or derived from the report entitled "Market Assessment of Indian Power, Renewable Energy, Storage and Transmission Sector" issued by CRISIL Intelligence (the "**CRISIL Report**"), publicly available information as well as industry publications and other sources. For details, please see the section entitled "*Industry Overview*" on page 188.

Industry publications generally state that the information contained in such publications has been obtained from publicly available documents and from various sources believed to be reliable, but their accuracy and completeness are not guaranteed and their reliability cannot be assured. Accordingly, no investment decisions should be based on such information. Although the Investment Manager believes that the industry and third party related market data used in this Placement Document is reliable, it has not been independently verified by the Investment Manager, the Sponsor, the Trustee or the Placement Agents, or any of their affiliates or advisors. The data from these sources may have been re-classified by us in certain cases for the purposes of presentation. Data from these sources may also not be comparable. Such data involves risks, uncertainties and numerous assumptions and is subject to change based on various factors, including those disclosed in the section entitled "*Risk Factors*" on page 86. Accordingly, investment decisions should not be based on undue reliance on such information.

The extent to which the market and industry data used in this Placement Document is meaningful, depends on the readers' familiarity with, and understanding of, the methodologies used in compiling such data. There are no standard data gathering methodologies in the industry in which the business of IndiGrid is conducted, and methodologies and assumptions may vary widely among different industry sources.

Further, references to various segments in the CRISIL Report and information derived therefrom are references to industry segments and in accordance with the presentation, analysis and categorisation in the CRISIL Report. Our segment reporting in our financial statements is based on the criteria set out in Ind AS 108, Operating Segments and we do not present such industry segments as operating segments.

Disclaimer of CRISIL Intelligence

Please see below the disclaimer of CRISIL Intelligence:

"About Crisil Intelligence

Crisil Intelligence, a division of Crisil Limited, provides independent research, consulting, risk solutions, and data & analytics to its clients. Crisil Intelligence operates independently of Crisil's other divisions and subsidiaries, including, Crisil Ratings Limited. Crisil Intelligence's informed insights and opinions on the economy, industry, capital markets and companies drive impactful decisions for clients across diverse sectors and geographies. Crisil Intelligence's strong benchmarking capabilities, granular grasp of sectors, proprietary analytical frameworks and risk management solutions backed by deep understanding of technology integration, makes it the partner of choice for public & private organisations, multi-lateral agencies, investors and governments for over three decades.

For the preparation of this report, Crisil Intelligence has relied on third party data and information obtained from sources which in its opinion are considered reliable. Any forward-looking statements contained in this report are based on certain assumptions, which in its opinion are true as on the date of this report and could fluctuate due to changes in factors underlying such assumptions or events that cannot be reasonably foreseen. This report does not consist of any investment advice and nothing contained in this report should be construed as a recommendation to invest/disinvest in any entity. We consent to use of the Report and the Material in relation to the Offer including the preliminary placement document and placement document to be filed by the Trust, or any other document to be issued or filed such as publicity or other materials, research reports, presentations and media releases, preliminary or final international offering document or any international supplement of the foregoing for distribution to investors outside India and any other corporate or investor presentations or press releases and research reports prepared by the Trust (through the Trustee or Investment Manager on behalf of the Trust) or the Sponsors or Placement Agents, including their affiliates in connection to the Issue."

NON-GAAP MEASURES EBITDA

Certain non-GAAP Measures and certain other statistical information relating to our operations and financial Performance including (Earnings before interest, taxes, depreciation, and amortization) ("**Non-GAAP Measures**"), presented in this Placement Document is a supplemental measure of our performance and liquidity that is not required by, or presented in accordance with Ind AS. Further, these Non-GAAP Measures are not a measurement of our financial performance or liquidity under Ind AS and should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the years/ period or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS. These Non-GAAP Financial Measures and other statistical and other information relating to our operations and financial performance may not be computed on the basis of any methodology that is applicable across the industry and therefore may not be comparable to financial measures and statistical information of similar nomenclature that may be computed and presented by other companies. Other organizations may calculate these Non-GAAP Measures differently from us, limiting its usefulness as a comparative measure. Although such Non-GAAP Measures are not a measure of performance calculated in accordance with applicable accounting standards, we believe that they are useful to an investor in evaluating us as they are widely used measures to evaluate an organization's operating performance. Please also see the section entitled "*Risk Factors - Certain of our operational measures are subject to inherent challenges in measurement and any real or perceived inaccuracies in such measures may adversely affect our business and reputation*" on page 122.

TECHNICAL INFORMATION AND VALUATION REPORT

For the technical information relating to the Portfolio Assets, the technical reports and valuation reports, as the case may be, for each of the Portfolio Assets is available at https://www.indigrid.co.in/documents-manager/. The Valuation Report is also included in *Annexure A* to this Placement Document.

MARKET PRICE INFORMATION

In this section, all market price information provided for Fiscal 2025 refers to such information for the period beginning April 1, 2024 until March 31, 2025, Fiscal 2024 refers to such information for the period beginning April 1, 2023 until March 31, 2024 and Fiscal 2023 refers to such information for the period beginning April 1, 2022 until March 31, 2023.

As on the date of this Placement Document, 860,540,180 Units are issued, subscribed and are fully paid up. The units have been listed and are available for trading on BSE and NSE.

(i) The following tables set forth the reported high, low and average market prices and the trading volumes of the Units on the Stock Exchanges on the dates on which such high and low prices were recorded and the total trading volumes:

a. for Fiscal 2025, Fiscal 2024 and Fiscal 2023 (i.e. the preceding three years);

b. for the period beginning September 21, 2023, pursuant to a preferential issue of units undertaken by IndiGrid ("**2023 Preferential Issue**"), i.e., the period marked by a change in the capital structure of IndiGrid, pursuant to the 2023 Preferential Issue;

c. for the period beginning December 8, 2023, pursuant to an institutional placement of units undertaken by IndiGrid ("**2023 QIP**"), i.e., the period marked by a change in the capital structure of IndiGrid, pursuant to the 2023 QIP;

d. for the period beginning October 7, 2024, pursuant to a preferential issue of units undertaken by IndiGrid ("**2024 Preferential Issue**"), i.e., the period marked by a change in the capital structure of IndiGrid, pursuant to the 2024 Preferential Issue; and

e. for the period beginning November 11, 2025, pursuant to a preferential issue of units undertaken by IndiGrid ("**2025 Preferential Issue**"), i.e., the period marked by a change in the capital structure of IndiGrid, pursuant to the 2025 Preferential Issue.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this Placement Document that are not statements of historical fact constitute "forward-looking statements". Bidders can generally identify forward-looking statements by terminology such as "aim", "anticipate", "believe", "continue", "can", "could", "estimate", "expect", "intend", "may", "objective", "plan", "potential", "propose", "project", "pursue", "seek to", "shall", "should", "will", "would", or other words or phrases of similar import. Similarly, statements that describe the strategies, objectives, plans or goals of IndiGrid are also forward-looking statements and accordingly, should be read together with such assumptions and notes thereto. However, these are not the exclusive means of identifying forward-looking statements.

All statements regarding IndiGrid's expected financial condition, results of operations and cash flows, business plans and prospects are forward-looking statements. These forward-looking statements include statements as to IndiGrid's business strategy, planned projects, acquisition or investment revenue and profitability (including, without limitation, any financial or operating projections or forecasts), new business and other matters discussed in this Placement Document that are not historical facts. Our Statutory Auditors have provided no assurance or services related to any prospective financial information included in this Placement Document.

The Valuation Report included in this Placement Document, is based on certain projections and accordingly, should be read together with assumptions and notes thereto. For further details, please see the "*Valuation Report*" enclosed as Annexure A.

Actual results may differ materially from those suggested by the forward-looking statements due to certain known or unknown risks or uncertainties associated with the Investment Manager's expectations with respect to, but not limited to, the actual growth in the transmission and BESS sector and the solar energy sector, the Investment Manager's ability to successfully implement the strategy, growth and expansion plans, cash flow projections, the outcome of any legal, regulatory or tax changes, the future impact of new accounting standards, regulatory changes pertaining to the transmission and BESS sector and the solar energy sector in India and our ability to respond to them, and general economic and political conditions in India which have an impact on our business activities or investments, changes in competition and the Project Managers' ability to operate and maintain the Portfolio Assets and successfully implement any technological changes. By their nature, certain of the market risk disclosures are only estimates and could be materially different from what actually occurs in the future. As a result, actual future gains, losses or impact on net interest income and net income could materially differ from those that have been estimated.

Factors that could cause actual results, performance or achievements of IndiGrid to differ materially include, but are not limited to, those discussed in the sections entitled "*Risk Factors*", "*Industry Overview*", "*Our Business*" and "*Management's Discussion and Analysis of Factors by the Directors of the Investment Manager affecting the Financial Condition, Results of Operations and Cash Flows*", on pages 86, 188, 247 and 340, respectively. Some of the factors that could cause IndiGrid's actual results, performance or achievements to differ materially from those in the forward-looking statements and financial information include, but are not limited to, the following:

- our ability to maintain and operate our transmission and BESS projects to achieve the prescribed availability;
- unfavourable environmental conditions at our Solar Assets, resulting in our electricity production, and therefore our revenue from operations, being substantially below expectations;
- delay in payments of point of connection charges to the CTU by users and customers which may adversely affect our cash flows and results of operations;
- inability to offset increases in costs, including operation and maintenance costs, solely from tariffs payable to us under the TSAs; and
- our under construction assets being subject to cost overruns or delays.

Forward-looking statements reflect current views as of the date of this Placement Document and are not a guarantee of future performance or returns to Bidders. These statements are based on certain beliefs and assumptions, which in turn are based on currently available information. Although the Sponsor and the Investment Manager believe that the expectations and the assumptions upon which such forward-looking statements are based, are reasonable at this time, they cannot assure Bidders that such expectations will prove to be correct or accurate. In any event, these statements speak only as of the date of this Placement Document or the respective dates indicated in this Placement Document and none of the Investment Manager, the Sponsor or the Placement Agents undertake any obligation to update or revise any of them, whether as a result of new information, future events, changes in assumptions or changes in factors affecting these forward looking statements or otherwise. If any of these risks and uncertainties materialise, or if any of the underlying assumptions prove to be incorrect, the actual results of operations or financial condition of IndiGrid could differ materially from that described herein as anticipated, believed, estimated or expected. All subsequent forward-looking statements attributable to IndiGrid, the Investment Manager or the Sponsor are expressly qualified in their entirety by reference to these cautionary statements.

Eligible Investors are cautioned not to regard such statements to be a guarantee or assurance of IndiGrid's future performance, returns to investors or the trading price of the Units.

THE ISSUE

The following is a general summary of the terms of this Issue which is in compliance with InvIT Regulations and the Master Circular. This summary should be read in conjunction with, and is qualified in its entirety by, the detailed information appearing elsewhere in this Placement Document:

ISIN	INE219X23014

* *Subject to finalization of Allotment*

The Units, upon Allotment, shall be traded only in the dematerialized segment of the Stock Exchanges.

Except in accordance with the InvIT Regulations, no Unitholder shall enjoy superior voting or any other rights over another

Unitholder. Further, there shall not be multiple classes of Units, except as permitted under the InvIT Regulations.

Units of the same class which are proposed to be Allotted have been listed on the Stock Exchanges for a period of at least six months prior to the date of issue of notice to the Unitholders for convening the meeting to approve the Issue.

The Trust is in compliance with all the conditions for continuous listing and disclosure obligations under the InvIT Regulations and the circulars issued thereunder.

None of the respective promoters or partners or directors of the Sponsor, the Investment Manager or Trustee is a fugitive economic offender declared under section 12 of the Fugitive Economic Offenders Act, 2018.

For further details in relation to this Issue, including the Floor Price and Issue Price and method of application, please see the section entitled "*Issue Information*" on page 408.

Use of Proceeds

Subject to compliance with applicable law, the Net Proceeds will be utilised, at the discretion of the Investment Manager in consultation with the Trustee, towards the following objects:

(i) Repayment or prepayment of borrowings availed by IndiGrid; and
(ii) General purposes.

For further details, please see the section entitled *"Use of Proceeds"* on page 324.

OVERVIEW OF INDIGRID

The following overview is qualified by and subject to, the more detailed information contained in, or referred to elsewhere, in this Placement Document. Statements contained in this summary that are not historical facts may be forward-looking statements. Such statements are subject to certain risks, uncertainties and assumptions that could cause actual results of IndiGrid to differ materially from those forecasted or projected in this Placement Document. Under no circumstances should the inclusion of such information herein be regarded as a representation, warranty or prediction of the accuracy of the underlying assumptions by IndiGrid, the Parties to IndiGrid or the Placement Agents or any other person or that these results will be achieved or are likely to be achieved. Investment in Units involves risks. Bidders are advised not to rely solely on this overview and should read this Placement Document in its entirety and, in particular, the section entitled "Risk Factors" on page 86.

Structure and description of IndiGrid

Sterlite Electric settled IndiGrid on October 21, 2016, at New Delhi, as an irrevocable trust, pursuant to the Original Trust Deed, under the provisions of the Indian Trusts Act, 1882. IndiGrid was registered with SEBI on November 28, 2016, as an infrastructure investment trust under Regulation 3(1) of the InvIT Regulations having registration number IN/InvIT/16-17/0005. Sterlite Electric was declassified as a sponsor of IndiGrid, with effect from July 6, 2023, and accordingly, Esoteric II Pte. Ltd. is the sole sponsor of IndiGrid. Pursuant to a fresh certificate of registration dated December 9, 2024, issued by SEBI, the name of IndiGrid changed from India Grid Trust to IndiGrid Infrastructure Trust.

Further, IIML has been appointed as the Investment Manager for all the Portfolio Assets, IGL has been appointed as the Project Manager for Transmission Assets and Solar Assets and EIPL 1 has been appointed as the Project Manager for BESS Assets. For further details, please see the sections entitled "*Parties to IndiGrid*" and "*Description of Portfolio Assets*" on pages 142 and 30.

Investment Objectives

In terms of the Amended and Restated Trust Deed, the investment objectives and strategy of IndiGrid is to make investments as an infrastructure investment trust as permissible in terms of the InvIT Regulations, in such special purpose vehicles or holding entities, infrastructure projects, schemes, arrangements or securities in India as permitted under the InvIT Regulations, charter documents of respective undertaking and other applicable laws. Further, the investment objectives and strategy of IndiGrid includes investment in generation and/or transmission of renewable energy generated through hydel, solar, wind, biomass, geothermal, tidal, wave and other renewable natural resources.

Any investment by IndiGrid shall only be in infrastructure special purpose vehicles or infrastructure projects or securities of Indian companies in accordance with the provisions of the InvIT Regulations, the investment objectives set out in the Amended and Restated Trust Deed and the investment strategy as detailed in the section entitled "*Our Business*" on page 247. Investments by IndiGrid shall be in compliance with the provisions of the InvIT Regulations.

As on the date of this Placement Document, IndiGrid is not permitted to undertake any activity which is prohibited under the InvIT Regulations.

Subject to the restrictions prescribed under, and requirements of, applicable law, IndiGrid may not carry on any other principal activity.

Fee and expenses

Annual Expenses

The expenses in relation to IndiGrid, other than such expenses incurred in relation to operations of Portfolio Assets, broadly include fee payable to: (i) the Trustee; (ii) the Investment Manager; (iii) the Project Managers; (iv) the Auditor; (v) the Valuer; and (iv) other intermediaries, advisors and consultants.

Further, in relation to the fees payable to the Trustee, Investment Manager and Project Managers, please see below.

Fee to the Trustee

For Fiscal 2026, Fiscal 2027 and Fiscal 2028, the Trustee is entitled to an annual fee of ₹ 4.50 million along with a one-time fee of ₹ 0.10 million upon the acquisition of each asset and any out-of-pocket expenses and taxes levied on the Trustee on the fee payable by the IndiGrid to the Trustee. The fee payable may be revised after Fiscal 2028, subject to the mutual agreement of the Trustee and IndiGrid. The fee paid to the Trustee for Fiscal 2025 was ₹ 2.36 million along with the required reimbursements and GST amounts.

Fee to the Investment Manager

For all Portfolio Assets except PrKTCL, the Investment Manager is entitled to a fee aggregating to 0.25% of AUM (as defined under the Amended and Restated Investment Management Agreement) of the Portfolio Assets, subject to the condition that the fees payable shall not exceed 1.75% of the difference between revenue from operations and operating expenses (other than the fee of the Investment Manager) of each Portfolio Asset, per annum. For PrKTCL, the Investment Manager is entitled to a fee aggregating to 0.25% of the AUM of PrKTCL subject to the condition that the fees payable shall not exceed 1.56% of the difference between revenue from operations and operating expenses (other than the fee of the Investment Manager) of PrKTCL, per annum. For this purpose, the operating expenses do not include depreciation, finance cost and income tax expense. This fee is exclusive of all taxes.

For each Fiscal, such fee shall be payable on a quarterly basis, as applicable, based on actuals, within a period of 15 days from the date of declaration of financial results by IndiGrid (being the period ended March 31, June 30, September 30 and December 31, respectively, of each financial year) or in the case of PrKTCL, in the mode and manner as may be agreed between PrKTCL and the Investment Manager. The fee paid to the Investment Manager for Fiscal 2025 amounted to ₹ 627.47 million.

IndiGrid is also required to pay to the Investment Manager an amount equal to 0.5% of the enterprise value of assets acquired in a particular financial year as acquisition fee, subject to achieving distribution per unit guidance of that particular financial year, where the enterprise value of an asset shall be as per the enterprise value as disclosed in filings made with stock exchanges for that particular asset. Majority of such acquisition fee is required to be utilized to pay incentive to the Investment Manager's employees. The acquisition fee shall be payable within 15 days from the IM Board for the fourth quarter of the relevant financial year.

Fee to the Project Managers

1. IGL is entitled to a fee amounting to 7% of the gross expenditure incurred by each completed Portfolio Asset (apart from KBPL, GBPL and RBPL) in relation to operation and maintenance costs, per annum. IndiGrid, or any or all of the Portfolio Assets (apart from KBPL, GBPL and RBPL), as the case may be, shall bear any GST or service tax and other applicable taxes payable on the fee and any other payments made to IGL in terms of the IGL Project Implementation and Management Agreement, provided that IGL shall be liable to pay income tax on such fee and payments. For each Financial Year, the fee shall be payable on a quarterly basis, based on actuals, within a period of 15 days from the date of declaration of financial results by IndiGrid (being the periods ending March 31, June 30, September 30 and December 31, respectively, of each financial year). In relation to the under-construction assets being DPTL, KTCO, IPTL and RKPTL, IGL is entitled to a fixed monthly fee until the completion of the assets as follows:

Sr. No.	Name of the Portfolio Asset	Monthly Fee (in ₹ million)
1.	KTCO	0.10
2.	DPTL	0.30
3.	IPTL	0.30
4.	RKPTL	1.20

The fee paid to IGL for Fiscal 2025 amounted to ₹ 266.33 million.

2. EIPL 1 is entitled to a fee amounting to 7% of the gross expenditure incurred by each of KBPL, GBPL and RBPL in relation to operation and maintenance costs, per annum. IndiGrid, or any or all of KBPL, GBPL and RBPL as the case may be, shall bear any GST or service tax and other applicable taxes payable on the fee and any other payments made to EIPL 1 in terms of the EIPL 1 Project Implementation and Management Agreement, provided that EIPL 1 shall be liable to pay income tax on such fee and payments. For each Financial Year, the fee shall be payable on a quarterly basis, based on actuals, within a period of 15 days from the date of declaration of financial results by IndiGrid (being the periods ending March 31, June 30, September 30 and December 31, respectively, of each financial year). Provided that during the construction period (i.e. before commissioning of the project), the Project Manager shall be paid a total monthly fee of ₹ 0.50 million and ₹ 0.35 million for GBPL and RBPL, respectively. No fee was paid to EIPL 1 for Fiscal 2025 as EIPL 1 was appointed as the project manager during Fiscal 2026 (on May 16, 2025).

Issue Expenses*

The total expenses of this Issue are estimated to be approximately up to ₹ 200.00 million. For details in relation to the expenses for this Issue, please see the section entitled "*Use of Proceeds*" on page 324.

We propose to pay a fee to Axis Capital Limited ("Axis Capital**") from the net Proceeds in its capacity as a Placement Agent. While Axis Capital is an affiliate of the Trustee, it is not an associate of the Trust in terms of the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992. There is no conflict of interest under the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992, as amended, or any other applicable SEBI rules or regulations and current disclosure is being made to ensure disclosure of all transactions with affiliate of the Trustee. The current disclosure is being made to ensure disclosure of all transactions with affiliate of the Trustee.*

Details of credit ratings

IndiGrid has been assigned 'CRISIL AAA/Stable' ratings for its ₹ 1,46,348.2 million debt securities and ₹ 51,200 million bank loan facilities, which was reaffirmed on December 22, 2025, by CRISIL Ratings Limited. IndiGrid has been assigned a rating of ICRA [AAA] (Stable) for its ₹ 1,18,400 million debt securities, ₹ 500 million unallocated facilities, ₹ 100 million long-term working capital facilities and ₹ 9,500 million term loans on June 17, 2025, by ICRA. Further, IndiGrid has been assigned a short-term rating of [ICRA]A1+ for its commercial paper programme, fund-based working capital facilities and non-fund based working capital facilities by ICRA. ICRA has assigned IndiGrid an issuer rating of [ICRA] AAA (Stable).

India Ratings & Research Private Limited ("**India Ratings**") has assigned 'IND AAA/Stable' for ₹ 7,227 million non-convertible debentures and ₹ 3,331 million bank loan facilities on June 3, 2025. Further, India Ratings has affirmed 'IND AAA/Stable' rating for the long-term senior debt of IndiGrid, and IND A1+ for its commercial papers programme.

The rationale for the ratings are available on websites of the respective rating agencies and on the IndiGrid website at: https://www.indigrid.co.in/investor/credit-rating/.

Schemes of Merger and Amalgamation

1. An application dated April 25, 2024, has been filed before the Hon'ble National Company Law Tribunal at Mumbai in relation to a composite scheme of amalgamation wherein IndiGrid 1 Limited is proposed to be amalgamated into NRSS XXIX Transmission Limited for the purposes of amongst other things, the consolidation of assets within the IndiGrid platform to enhance operational efficiencies, synergies and a single brand. Pursuant to the scheme, NRSS XXIX Transmission Limited will also be converted from a public company to a private company. Further, prior to the amalgamation, the securities premium of IndiGrid 1 Limited is proposed to be reduced. Upon effectiveness, NRSS XXIX Transmission Limited is proposed to issue consideration shares and cancel any NRSS XXIX Transmission Limited shares held by IndiGrid 1 Limited, with the resultant diminution in NRSS XXIX Transmission Limited's paid-up capital treated as a capital reduction under Section 66 of the Companies Act. The matter is currently pending.

2. An application dated July 1, 2024 has been filed before the Hon'ble National Company Law Tribunal at New Delhi in relation to a composite scheme of amalgamation wherein Globus Steel & Power Private Limited, IndiGrid Solar – I (AP) Private Limited and IndiGrid Solar – II (AP) Private Limited are proposed to be amalgamated into Godawari Green Energy Private Limited for the purposes of, amongst other things, the rationalisation and streamlining of the solar portfolio of the IndiGrid group, strengthening a single brand, enhancing shareholder value, and realising operational efficiencies, economies of scale, and synergies through pooling of resources. The matter is currently pending.
3. An application dated July 23, 2024 has been filed before the Hon'ble National Company Law Tribunal at New Delhi in relation to a composite scheme of amalgamation wherein Universal Saur Urja Private Limited, Terralight Solar Energy Tinwari Private Limited and Terralight Solar Energy Patlasi Private Limited are proposed to be amalgamated into IndiGrid Limited for the purposes of, amongst other things, the consolidation of entities under IndiGrid Limited to strengthen a single brand, enhance shareholder value, and achieve operational efficiencies and synergies. Pursuant to the scheme, IndiGrid Limited will also be converted from a public company to a private company. The matter is currently pending.
4. An application dated January 14, 2026 has been filed before the Regional Director, Mumbai and the Registrar of Companies at Mumbai in relation to a composite scheme of amalgamation wherein TN Solar Power Energy Private Limited, Terralight Rajapalayam Solar Private Limited, Terralight Kanji Solar Private Limited, Universal Mine Developers and Service Providers Private Limited, Terralight Solar Energy Charanka Private Limited, Terralight Solar Energy Nangla Private Limited and Terralight Solar Energy Gadna Private Limited are proposed to be amalgamated into Solar Edge Power and Energy Private Limited for the purposes of, amongst other things, consolidating assets within the IndiGrid platform to enhance operational efficiencies, realise synergies and operate under a single brand. The matter is currently pending

Shareholders' agreements and other material agreements in relation to the Portfolio Assets

A. Agreements with BII, Norfund and Techno

IndiGrid has, indirectly, entered into the following agreements with BII, Norfund and in some instances Techno, in relation to RKPTL, KTCO, DTPL, IPTL, GBPL and RBPL:

1. RKPTL and IGL 2 have entered into securities subscription agreements and a security holders agreement dated July 7, 2025, with BII and Norfund;
2. KTCO and IGL 2 have entered into securities subscription agreements dated August 15, 2024 and a security holders agreement dated September 20, 2024 with BII and Norfund;
3. DTPL, IGL 1 and IGL 2 have entered into (i) securities subscription agreements dated August 15, 2024, and a security holders agreement dated September 12, 2024 with BII and Norfund; and (ii) a securities subscription cum shareholders' agreement dated August 14, 2024, with Techno;
4. IPTL, IGL 1 and IGL 2 have entered into (i) securities subscription agreements dated August 15, 2024, and a security holders agreement dated September 12, 2024 with BII and Norfund; and (ii) a securities subscription cum shareholders' agreement dated August 14, 2024, with Techno;
5. GBPL and IGL 2 have entered into (i) securities subscription agreements dated July 2, 2025, and a security holders

agreement dated July 2, 2025 with BII and Norfund; and

6. RBPL and IGL 2 have entered into (i) securities subscription agreements dated July 8, 2025 and a security holders agreement dated July 8, 2025 with BII and Norfund (collectively, the "**Security Holder Agreements**")

Pursuant to the Security Holder Agreements, BII, Nofund and Techno, as applicable, have subscribed to optionally convertible debentures issued by the relevant Portfolio Assets and the Security Holder Agreements set out the terms and conditions of such optionally convertible debentures. Further, the Security Holder Agreements record the terms and conditions of the investment by BII, Nofund and Techno, as applicable in the relevant Portfolio Assets, the management of the relevant Portfolio Assets, the conduct of its business and the inter-se rights and obligations of the securityholders of the relevant Portfolio Assets.

The Security Holder Agreements set out various rights and obligations of IndiGrid, BII, Norfund and Techno in the relevant Portfolio Assets, which will become effective upon BII, Norfund and Techno including, amongst others, (i) the rights of the relevant investors to appoint directors on the boards of the relevant Portfolio Assets; (ii) rights in relation to the approval of the relevant Portfolio Asset's business plan and budget; (iii) rights and obligations in relation to the subsequent funding of the projects, including on account of cost overruns and change in law claims; (iv) transfer restrictions and exit rights; and (v) and voting rights, along with such other rights as specified in the Security Holder Agreements. The relevant parties to the Security Holder Agreements agree that the composition of the board of directors of the relevant Portfolio Assets may be reconstituted to enable the Investment Manager to nominate majority Directors in accordance with InvIT Regulations. Further, the parties have agreed that no securityholder shall exercise any rights that prevents IndiGrid from complying with the provisions of InvIT Regulations.

B. Other Agreements

1. GPTPL

GPTPL entered into a shareholders' agreement dated August 28, 2020, with Sterlite Grid 4 limited, Sterlite Power Grid Ventures Limited, Axis Trustee Services Limited in relation to GPTPL to govern the transfer of 100% of the securities of GPTPL to IndiGrid and set out the rights and obligations of the parties in relation to their shareholding in GPTPL. The parties have agreed and undertaken to comply with all applicable laws including the InvIT Regulations.

2. NER

NER has entered into a shareholders' agreement dated March 25, 2021, with, amongst others, Sterlite Electric and IndiGrid Investment Managers Limited in relation to NER to govern the transfer of 100% of the securities of NER to IndiGrid and set out the rights and obligations of the parties in relation to their shareholding in NER. The parties have agreed and undertaken to comply with all applicable laws including the InvIT Regulations.

3. KTL

KTL has entered into a shareholders' agreement dated February 28, 2023, with Sterlite Electric, Axis Trustee Services Limited and IndiGrid Investment Managers Limited in relation to KTL to govern the transfer of 100% of the securities of KTL to IndiGrid and set out the rights and obligations of the parties in relation to their shareholding in KTL. The parties have agreed and undertaken to comply with all applicable laws including the InvIT Regulations.

4. KBPL

IGL 2 entered into a shareholders' agreement dated January 15, 2024, with AmpereHour Solar Technology Private Limited in relation to KBPL to record the mutual rights and obligations of the parties in relation to the operations, management and administration of KBPL, including in relation to transfer restrictions on the shares of KBPL. The parties have agreed and undertaken to comply with all applicable laws including the InvIT Regulations.

5. RSAPL

IndiGrid (acting through the Trustee) and the Investment Manager have entered into a shareholders' agreement dated June 6, 2025, as amended, with Renew Solar Power Private Limited in relation to RSAPL, to govern the transfer of 100% of the securities of RSAPL to IndiGrid and set out the rights and obligations of the parties in relation to their shareholding in RSAPL. The parties have agreed and undertaken to comply with all applicable laws including the InvIT Regulations.

6. EIPL 1

IGL 2 has entered into a share purchase and shareholders' agreement dated May 19, 2025 with Enerica Regrid Infra Private Limited in relation to EIPL 1 ("**EIPL 1 SPSHA**") to govern the transfer of 100% of the securities of EIPL 1 to IGL 2 and set out the rights and obligations of the parties in relation to their shareholding in EIPL 1. The parties have agreed and undertaken to comply with all applicable laws including the InvIT Regulations.

SUMMARY CONSOLIDATED FINANCIAL INFORMATION

The following tables set forth the:

a. *summary financial information for the Fiscal 2025, 2024 and 2023, derived from the consolidated audited financial statements of IndiGrid and its subsidiaries which were prepared in accordance with Ind AS read with the InvIT Regulations;*

b. *summary financial information for the half year ended September 30, 2025, derived from the Unaudited Interim Condensed Consolidated Financial Statements for half year ended September 30, 2025 prepared in accordance with Ind AS 34 read with the InvIT Regulations; and*

c. *summary financial information for the half year ended September 30, 2024, derived from the comparatives in Unaudited Interim Condensed Consolidated Financial Statements for half year ended September 30, 2025 prepared in accordance with Ind AS 34 read with the InvIT Regulations.*

The degree to which the summary financial information included herein below will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices, Ind AS and the InvIT Regulations. Accordingly, any reliance by persons not familiar with Indian accounting practices, Ind AS and the InvIT Regulations on the summary financial information presented below should be limited.

The summary financial information derived from the Consolidated Financial Statements, as presented below, should be read together with the section entitled "Management's discussion and analysis of factors by the Directors of the Investment Manager affecting the financial condition, results of operations and cash flows" on page 340 in conjunction with the section entitled "Financial Statements" enclosed as Annexure B.

Significant non-cash transaction during the year ended December 31, 2023

[b] Dividend amount distributed to immediate holding companies of US$49,139,790 were offset against the amount due from immediate holding companies.

Significant non-cash transaction during the year ended December 31, 2022

[c] Dividend amount distributed to immediate holding companies of US$6,721,216 were offset against the amount due from immediate holding companies.

SUMMARY FINANCIAL INFORMATION OF THE INVESTMENT MANAGER

The following tables set forth the summary financial information derived from the audited financial statements of the Investment Manager, which was prepared in accordance with Ind AS, as defined in Rule 2(1)(a) of Companies (Indian Accounting Standards) Rules, 2015, as amended, prescribed under the Section 133 of the Companies Act, as of and for the Fiscals 2025, 2024 and 2023.

The degree to which the summary financial information included herein below will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices, Ind AS and the Companies Act. Accordingly, any reliance by persons not familiar with Indian accounting practices, Ind AS and the Companies Act on the summary financial information presented below should be limited.

SUMMARY OF INDUSTRY

*The information in this section is derived from the report entitled Market Assessment of Indian Power, Renewable Energy, Storage and Transmission Sector" dated January, 2026, prepared by CRISIL Intelligence (the "**CRISIL Report**") except for other publicly available information as cited in this section. We commissioned the CRISIL Report for the purposes of confirming our understanding of the industry in connection with the Issue. Neither IndiGrid, the Sponsor, the Investment Manager, the Trustee, the Placement Agents, nor any other person connected with the Issue has verified the industry and market data in the CRISIL Report or other publicly available information cited in this section.*

1. OVERVIEW OF INDIAN MACROECONOMIC LANDSCAPE

1.1 India's key economic indicators

In the past 11 years (during fiscal 2014 to 2024), India's GDP at constant (fiscal 2012) prices grew at a compounded growth of 5.3% (CAGR). Government policies, focus on manufacturing sector, exports, increased digitalisation, implementation of GST, strong domestic demand for consumption and investment helped GDP to grow.

After strong GDP growth in the past three years, Crisil Intelligence[1] expects some moderation to 6.50% in fiscal 2025 with downside risks from tariff hikes by the US. The tariffs, a global trade slowdown and geopolitical uncertainties are expected to have a non-uniform impact on the economy.

Crisil's key projections

Parameters	FY19	FY20	FY21	FY22	FY23	FY24	FY25	FY26P
GDP growth (%)	6.45%	3.87%	-5.78%	9.69%	7.61%	9.19%	6.48%	6.50%
CPI (%, average)	3.41%	4.77%	6.16%	5.51%	6.65%	5.40%	4.60%	3.20%
CAD/GDP (%)	(2.12%)	(0.86%)	0.92%	(1.23%)	(1.98%)	(0.65%)	(0.60%)	(1.30%)
FAD/GDP (%)	3.44%	4.65%	9.20%	6.70%	6.40%	5.60%	4.90%	4.40%#
Exchange rate (₹/USD March-end)	69.17	75.39	73.50	75.81	82.22	83.37	85.58	88.00
10-year G-sec yield (%, March-end)	7.50%	6.20%	6.20%	6.80%	7.40%	7.10%	6.70%	6.30%

2. OVERVIEW OF INDIAN POWER SECTOR

2.1 Review of power demand-supply scenario in India

2.1.1 Installed capacity and fuel mix

The total installed generation capacity as of September 2025 was 501 GW. Coal and Lignite-based installed power generation capacity has maintained its dominant position over the years and accounts for ~44.9% as of September 2025. However, RE installations (including large hydroelectric projects) have reached ~247 GW capacity as of September 2025, constituting ~49.4% of total installed generation capacity. This growth has been led by solar power, which rapidly rose to ~127 GW in a decade.

---

[1] *Based on Crisil Centre for Economic Research (C-CER) projections*

Projections of key economic indicators for India in this Chapter are as per the C-CER

3. OVERVIEW OF INDIAN SOLAR POWER MARKET

3.1 Evolution of Solar Power in India

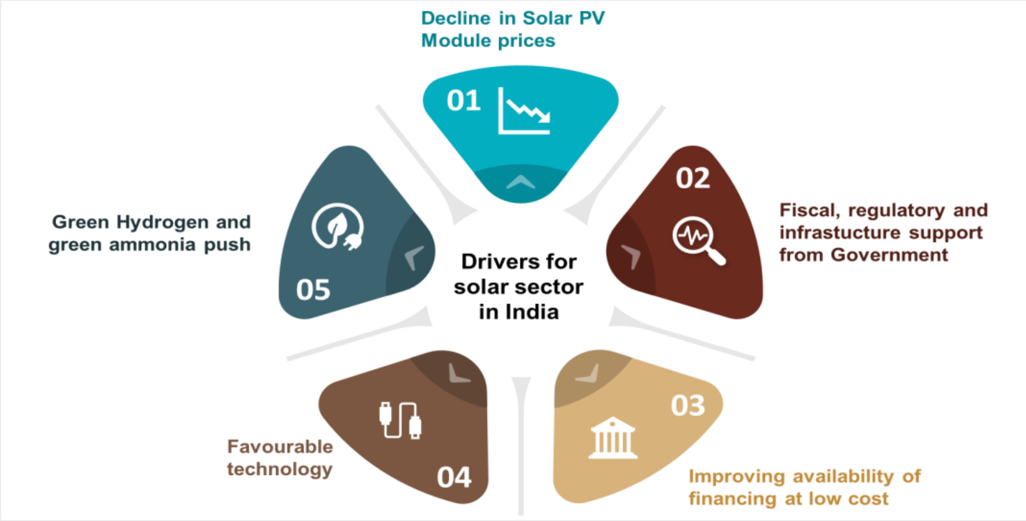
Growth in the solar power sector over the last five years has been robust. About 99 GW of solar capacity was added in the segment over fiscals 2019-26 (As of September 2025), registering a CAGR of ~26%, although starting from a low base. Despite the second wave of COVID-19 pandemic, fiscal 2022 witnessed solar capacity additions of ~14 GW. In a relief to developers, the MNRE provided a total extension of seven-and-a-half months for the projects affected by the first and second waves of the pandemic. This has delayed commissioning in fiscal 2022, leading to a spillover into fiscals 2023 and 2024. In fiscal 2023, solar capacity additions stood at ~13 GW, with ~2.2 GW coming from rooftop solar projects. Similarly, in fiscal 2024, solar capacity additions stood at ~15 GW, with ~3 GW coming from grid connected rooftop solar projects. During fiscal 2025, 23.83 GW solar capacity was added leading to 106 GW of installed capacity as of March 2025. 6MFY26 witnesses addition of 21.69 GW of solar capacity.

3.2 Solar energy potential in India

The National Institute of Solar Energy (NISE) estimated the country's solar potential at 748.99 GW, assuming solar PV modules cover 3% of the geographical surface. India is a perfect location for solar energy because of its location. It has 300 days of sunshine each year, with daily peak electricity use being in the evenings and a seasonal peak in the summer.

The daily average Global Horizontal Irradiance (GHI) in India is around 5 kWh/m2 in north-eastern and hilly areas to about 7 kWh/m^2 in western region and cold desert areas. The annual GHI varies from 1600 – 2200 kWh/m^2. States like Gujarat, Rajasthan, Madhya Pradesh, Andhra Pradesh, Karnataka, and Tamil Nadu offer more solar irradiance as compared to other parts of India, which makes them desirable for installing solar projects.

3.3 Key drivers for solar energy capacity additions



Source: Crisil Intelligence

Battery energy storage projects

BESS can be used for multiple applications such as voltage and frequency regulation, spinning reserves, peak shaving. With rising R&D and subsequent improvement in technology as well as increasing scale, cost competitiveness of such solutions to improve. For batteries, a special consideration is degradation. Batteries degrade as they age, decrease the amount of capacity they can store. The expected life of the batteries is about 10 to 12 years (depending on the technology and how the batteries are operated). By the end of that time, the batteries' capacity is expected to be reduced to less than 70% of their original capacity.

Usage of battery storage is expected to be strong across the generation, transmission, and distribution segments as well as at the consumer end. The National Renewable Energy Laboratory has also forecasted a fall in the price of storage solutions, especially lithium-ion technology. With the greater adoption of lithium-ion battery storage, improvement in battery efficiency, and large-scale manufacturing, Crisil Intelligence projects installation costs for utility-scale lithium-ion batteries to fall to U.S.$ 75 - 85 per kWh by Fiscal 2030 from U.S.$ 110 -115 in Fiscal 2025.

3.4 Review of BESS capacity additions in India

Crisil Intelligence estimates that the BESS market is valued at USD 5.2 billion as of fiscal 2025 based on tenders awarded and is expected to reach USD 10-11 billion by fiscal 2030 at a CAGR of 14-15%.

4. OVERVIEW OF INDIAN POWER TRANSMISSION SECTOR

4.1 Overview and structure

The transmission segment plays a key role in transmitting power continuously to various distribution entities across the country. The transmission sector needs concomitant capacity addition, in line with generation capacity addition, to enable seamless flow of power.

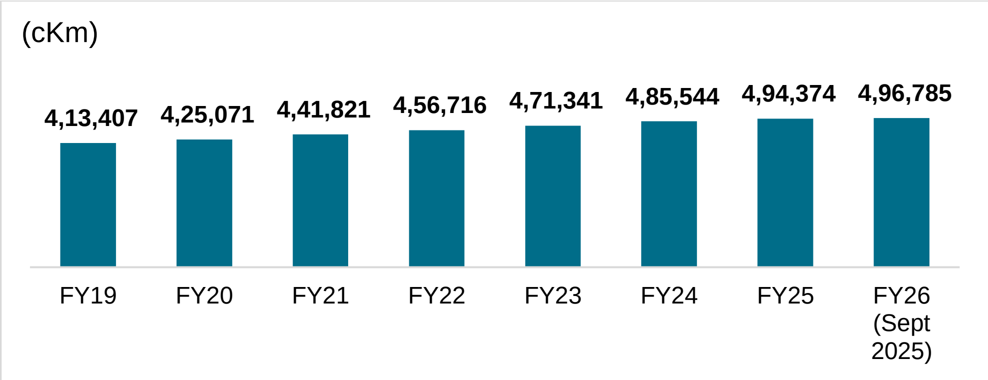
A T&D system comprises transmission lines, substations, switching stations, transformers, and distribution lines. To ensure reliable supply of power and optimal utilisation of generating capacity, a T&D system is organised in a grid which interconnects various generating stations and load centres. This is done to ensure uninterrupted power supply to a load centre, even if there is a failure at the local generating station or a maintenance shutdown. In addition, power can be transmitted through an alternative route if a particular section of the transmission line is unavailable.

In India, the T&D system is a three-tier structure comprising distribution networks, state grids, and regional grids. The distribution networks and state grids are owned and operated by the respective state transmission utilities or state governments (through state electricity departments). Most inter-state and inter-regional transmission links are owned and operated by the Power Grid Corporation of India Ltd (PGCIL) which facilitates the transfer of power from a surplus region to one with deficit.

As peak demand for power does not take place at the same time in all states, it results in a surplus in one state and deficit in another. Regional or inter-state grids facilitate the transfer of power from a surplus region to the one facing a deficit. Additionally, they also facilitate the optimal scheduling of maintenance outages and better coordination between power plants.

4.1.1 Market Review

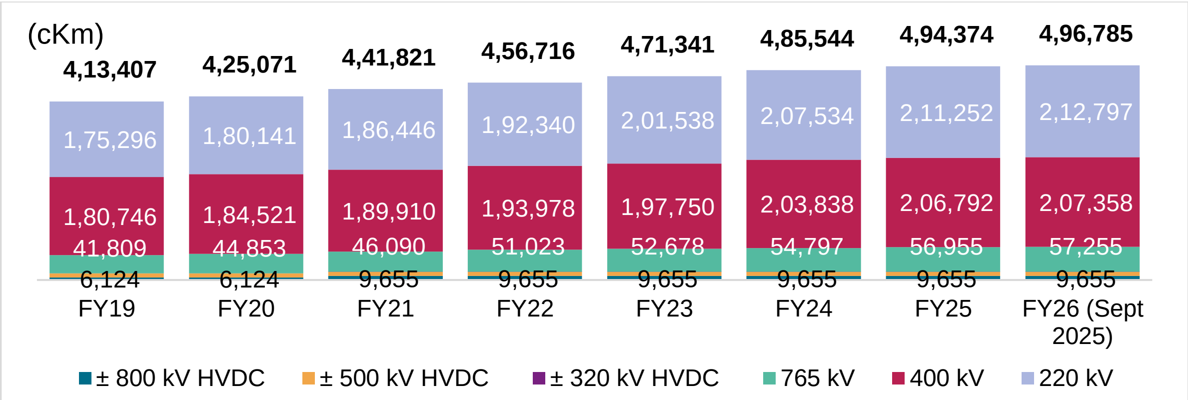
Total transmission line network in the country (220 kV and above)



Source: CEA, Crisil Intelligence

There has been strong growth in the transmission system at higher voltage levels and substation capacities. This is a result of increased requirement of the transmission network to carry bulk power over longer distances and at the same time optimise the right of way, minimise losses and improve grid reliability.

Strong growth in the length of high voltage transmission lines (220 kV and above)



Source: CEA, Crisil Intelligence

4.2 Transmission investments of Rs 4.5-5.5 trillion expected over 2026-30

To service a large generation installed base, the estimated investment in the transmission sector is expected to cumulatively reach Rs 4.5-5.5 trillion over fiscals 2026-2030. Investments in the sector are expected to be driven by the need for a robust and reliable transmission system to support continued generation additions and the strong push to the renewable energy sector as well as rural electrification. Also, strong execution capability coupled with healthy financials of PGCIL will drive investments.

4.2.1 Key Growth Drivers for growth in transmission sector

Some of the key growth drivers for the transmission segment in India are:

Widening gap between inter-regional power demand-supply to drive transmission capacity additions

As per CTUIL, the total power generation capacity (including renewable energy and energy storage) at a pan India would rise to ~917 GW in fiscal 2031 from ~501 GW in September 2025. However, the upcoming generation capacity will not be spread evenly across India. Most of the upcoming renewable capacities would be concentrated in the northern (specifically in Rajasthan), western and southern regions of India, while significant thermal capacities would commission close to the coal mines in eastern and central regions of India. The addition of such large quantity of generation capacities would necessitate the investments in transmission segment to supply power to different demand centers.

Strong renewable energy capacity additions to also drive transmission capacity

Power generation in India is dominated by coal-based power plants accounting for about $3/4^{th}$ of total electricity generation. However, there has been a staggering growth in installed capacity of renewable energy sources from 63 GW in fiscal 2012 to 247 GW in September 2025. According to the CTUIL ISTS Interim Rolling plan 2030-31, the share of renewable energy (incl. hydro and energy storage) in the installed capacity mix is expected to reach ~66% in fiscal 2031 from ~49% in September 2025.

Improving power scenario and measures to stabilize grid to lead to transmission corridors to neighboring countries

Power deficit in India has been on a declining trajectory with energy deficit shrinking to 0.0% for the period April to October 2025 as compared 3.6% in fiscal 2015. Thus, with healthy availability of power, India is evaluating opportunities to tap neighbouring countries for better integration and synergies.

Strong government support to also drive transmission investments

Government support to power transmission is expected to continue. In the past, it has supported the transmission segment through several measures – increasing the concession period of a transmission asset, relaxation of norms to speed up project construction and implementation of UDAY scheme to boost power demand, which in turn, will eventually result in rise in transmission requirements.

SUMMARY OF BUSINESS

Overview

We are India's first listed power sector infrastructure investment trust. IndiGrid was established on October 21, 2016 and is registered with SEBI pursuant to the InvIT Regulations. IndiGrid currently owns and operates transmission and BESS projects and solar projects in India and has assets under management of approximately ₹ 325.00 billion as on September 30, 2025.

We own 45 projects (comprising 39 operating projects and six under construction projects) across two energy sub-sectors i.e., transmission and BESS projects, solar generation projects in 20 states and two union territories. Our operating projects, consist of 19 transmission projects and BESS projects, and 20 solar projects, while our under construction assets consist of six transmission and BESS projects. Our transmission projects consist of a total circuit length of approximately 9,336 ckms and 16 substations with approximately 25,050 MVA of transformation capacity, across 20 states and two union territories in India while our BESS projects have an aggregate storage capacity of 900 MWh. Our solar projects have an aggregate capacity of 1.5GWp and are located across the states of Andhra Pradesh, Punjab, Tamil Nadu, Rajasthan, Gujarat, Maharashtra, Madhya Pradesh and Uttar Pradesh.

Please see below the manner in which we have grown our portfolio since May, 2017:

Date	Details
May, 2017	Acquisition of BDTCL and JTCL from Sterlite Electric
February, 2018	Acquisition of PKTCL, RTCL and MTPL, from Sterlite Electric
August 2018	Acquisition of PTPCL from TEECL and TPGCL
June, 2019	Acquisition of NTL from Sterlite Electric
July, 2019	Acquisition of OGPTL from Sterlite Electric
May, 2020	Acquisition of ENICL from SPGVL and Sterlite Electric
August, 2020	Acquisition of GPTPL from SPGVL and SGL4
October, 2020	Acquisition of JKPTL from KPTL and TEECL
January, 2021	Acquisition of PrKTCL from Reliance Infrastructure Limited
March, 2021	Acquisition of NER from SGL4
December, 2021	Acquisition of Kallam from REC Power Development and Consultancy Limited
July, 2021	Acquisition of IGL Solar I and IGL Solar II from FRV Solar Holdings XI B.V
November, 2022	Acquisition of RSTCPL from Patel Engineering Limited, Simplex Infrastructures Limited and BS Limited
February, 2023	Acquisition of JUPL from ReNew Solar Power Private Limited
March, 2023	Acquisition of KTL from Sterlite Electric
August 25, 2023	Acquisition of GGEPL, UMD, USUPL, GSPPL, PLG, Solar Edge, TKSPL, TSEG, TNSPEPL, TRSPL, TSEC, TSEN, TSET, TSEP and TSESPL which we acquired through the acquisition of VRET
October, 2023	KBPL, which was set up after receiving the letter of award by BSES Rajdhani Power Limited
February, 2024	Acquisition of IPTL and DPTL from REC Power Development and Consultancy Limited
March, 2024	GBPL which was set up after receiving the letter of intent/ letter of award from GUVNL
April, 2024	Acquisition of KTCO from REC Power Development and Consultancy Limited
November 2024	RBPL which was set up after receiving the letter of intent/ letter of award from NVVNL
March, 2025	Acquisition of RKPTL from REC Power Development and Consultancy Limited
May, 2025	Acquisition of EIPL 1 from Enerica ReGrid Infra Private Limited ("**EnerGrid**")
June, 2025	Acquisition of KNTL from ReNew Transmission Ventures Private Limited and KNI India AS
June, 2025	Acquisition of RSAPL from ReNew Solar Power Private Limited

Further, IndiGrid has also executed definitive agreements (i) dated December 2, 2025 in relation to the acquisition of 100% of the equity shareholding in GTL from ReNew Transmission Ventures Private Limited and KNI India AS; (ii) dated August 20, 2025, with Techno Electric & Engineering Company Limited, for the acquisition of 100% of the equity shareholding of NERES XVI Power Transmission Limited; and (iii) dated August 25, 2025 with EnerGrid, amongst others, for acquisition of a BESS project in Uttar Pradesh under TBCB through Enerica Infra 3 Private Limited. EIPL 1 is also the Project Manager for the BESS Assets.

Further, IndiGrid has also signed a framework agreement dated November 12, 2024 with British International Investment PLC ("**BII**") and Norwegian Climate Investment Fund managed by Norfund via KNI India AS ("**Norfund**" and such agreement, the "**Framework Agreement**"), pursuant to which IndiGrid has agreed to finance a platform, being Energrid, for development and construction of (i) power transmission projects with a focus on Inter-State Transmission Systems, which are currently being bid out on a "build, own, operate, transfer" basis; (ii) standalone BESS projects currently being bid out by Solar Energy Corporation of India Limited, NTPC Vidyut Vyapar Nigam Limited, Gujarat Urja Vikas Nikam Limited or other state discoms; and (iii) such other business opportunities in renewable projects, hybrid projects or FDRE projects, provided such opportunities align with the strategic goals of the business and are agreed upon by all parties. In accordance with the Framework Agreement, these projects will be fully acquired by IndiGrid at a pre-agreed enterprise value, 12 months post the projects commencing commercial operations or as may be prescribed in the relevant concession agreement.

We believe that we are well positioned to take advantage of the growth potential of India's power industry given the quality of our transmission and BESS assets and solar assets, and our financial position, support from our Sponsor and the robust regulatory framework for transmission and BESS projects and solar projects in India. We believe the infrastructure necessary to transmit and deliver electricity is vital to India's continued economic advancement, given the inter-regional power deficit in India resulting from a mismatch between power generation and load centers, and the demand-supply deficit which is expected to result from India's projected GDP growth.

Our continued focus and strategy will be on accretive acquisition of transmission and BESS projects, and solar projects with annuity profile in their respective TSAs, BESPAs and long terms PPAs yielding stable cash flows, operational track record, good quality equipment and financially strong and creditworthy counterparties. For further details, please see the section entitled "*Industry Overview*" on page 188.

We are focused on providing stable and sustainable distributions to our Unitholders. Infrastructure investment trusts are required to distribute at least 90% of their net distributable cash flows to unitholders once at least every six months in every financial year, according to the InvIT Regulations. However, we have adopted a quarterly distribution policy. For further details on our distribution policy, please see the section entitled "*Distribution*" on page 336. We believe our assets, financial position and business model will enable us to offer stable distributions to our Unitholders.

Additionally, following the utilization of the Issue Proceeds, our aggregate consolidated borrowings and deferred payments (net of cash and cash equivalents) will not exceed 70% of the total value of our assets. Our consolidated total income was ₹ 34,377.27 million in Fiscal 2025 and ₹ 17,371.80 million in the half year ended September 30, 2025 and our EBITDA on a consolidated basis was ₹ 30,396.60 million in Fiscal 2025 and ₹ 14,804.78 million in the half year ended September 30, 2025. We have consistently been assigned a credit rating of 'CRISIL AAA/Stable' by CRISIL, 'IND AAA/Stable' and 'IND A1+' by India Ratings and 'ICRA/AAA/Stable' and 'ICRA A1+' by ICRA.

We are sponsored by Esoteric II Pte. Ltd., a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR. Esoteric II Pte. Ltd. was incorporated under the laws of Singapore as a private company limited by shares. Esoteric II Pte. Ltd. currently owns a stake of around 1.17% in IndiGrid. IndiGrid Investment Managers Limited is the investment manager of IndiGrid. Electron IM Pte. Ltd., an affiliate of KKR, currently owns 100% of the issued, paid-up and subscribed capital of the Investment Manager. Axis Trustee Services is the trustee in respect of IndiGrid. IGL and EIPL 1 are the project managers for our Portfolio Assets. For further details on the parties to the Trust, please see the section entitled "*Parties to IndiGrid*" on page 142.

On the basis of our strengths and through the implementation of our strategies, we believe that we are well-positioned to capitalize on the growth potential of India's transmission and BESS industry and solar industry.

Competitive Strengths

Stable cash flows from assets with minimal counterparty risks

- Our Portfolio Assets include a majority of operational transmission and BESS projects and our solar projects. Such operational Portfolio Assets have minimal construction risks and are not subject to any major capital expenditure. Further, transmission and BESS projects and solar projects are typically characterized by low levels of operating risk.

- Most of our revenues are derived out of contracted tariffs under long-term contracts (up to 35 years or 25 years (for ENICL and JKTPL), unless extended) from the majority of our Transmission Assets with relatively low operating and maintenance costs. Inter-state power transmission projects receive tariffs on the basis of availability, irrespective of the quantum of actual power transmitted through the line. We have maintained an annual availability for the majority of our Transmission Assets in excess of 98% since commissioning for which we have earned maximum incentive revenues under the respective TSAs. Maintaining availability of such Transmission Assets in excess of 98% gives us the right to claim incentives under the TSA, ensuring an adequate upside to maximize availability. The amount of incentive revenue earned increases as our availability levels increase, with a maximum incentive revenue earned for maintaining 99.75% (or ranging between 98% to 100% in case of JKTPL and between 98.5% and 99.75% in case of PrKTCL) availability. All of IndiGrid's BESS projects have secured 12-year BESPAs with utilities, under which the tariff is pre-determined at the time of bidding and is payable as long as the system remains available for use by the off-taker, following a structure similar to transmission service agreements. Tariffs under the ISTS project TSAs, which contribute to the majority of our Transmission Assets, are billed and collected pursuant to the PoC mechanism. Under the PoC mechanism, payments are made to a central payment pool and the proceeds are distributed proportionately to all transmission services providers, such as the Transmission Assets. Any shortfall in collection of transmission charges by the CTU is shared on a *pro rata* basis by all transmission service providers. Payment securities in the form of a revolving letter of credit, a late payment surcharge of 1.25% per month for delay in payment beyond 60 days from the date of billing, pursuant to provisions of the project TSAs (and a late payment surcharge of 1.50% per month pursuant to the Sharing of Charges and Losses Regulations) and lack of alternate power infrastructure, deter beneficiaries from defaulting. This mechanism diversifies counterparty risk, ensures a stable cash flow independent of asset utilization and provides payment security.

- Each of the Solar Assets have entered into long term PPAs with the weighted average residual term of the PPAs, calculated using DC capacity, of approximately 18 years. Further, the Solar Assets have maintained an average DC plant load factor ("**PLF**") of 17.51%, 17.50%, 17.93% and 17.08% during the half year ended September 30, 2025 and the Fiscals 2025, 2024 and 2023, thus allowing us to maintain stable cash flows from our Solar Assets. In accordance with the terms of the PPAs, the Solar Assets have a pre-determined tariff structure.

Strong financial position

- We have been assigned a credit rating of 'CRISIL AAA/Stable' by CRISIL, 'IND AAA/Stable and 'IND A1+' by India Ratings and 'ICRA/AAA/Stable' and 'ICRA A1+' by ICRA. Following the utilization of the Issue Proceeds, our aggregate consolidated borrowings and deferred payments (net of cash and cash equivalents) will not exceed 70% of the total value of our assets. We also have a track record of continuous distributions for the past three financial years. For further details, please see the section entitled "*Distribution*" on page 346.

Strategic location of assets

- All our Transmission and BESS Assets are located in strategically important areas for electricity transmission connectivity, delivering power from generating centers to load centers to meet inter-regional power deficits. Once a transmission project has been commissioned, it requires relatively low levels of expenditure to operate and maintain, which means that IndiGrid will have the benefit of owning a critical asset without incurring significant operational costs.

- The transmission lines of the Transmission Assets are predominantly located in areas where developing alternate lines may be challenging due to the terrain, challenges in obtaining rights of way, limited corridors and high construction costs. This puts us in an advantageous position to capitalize the opportunities to increase our transmission capacity through the same corridor by upgrading our existing systems. Further, our BESS Assets are located at Gujarat, Rajasthan and Delhi.

- Further, our Solar Assets are strategically located in high irradiation areas. The projects are located across seven states of India, being, Tamil Nadu, Uttar Pradesh, Maharashtra, Gujarat, Madhya Pradesh, Punjab, Rajasthan and Andhra Pradesh.

Strong lineage and support from the Sponsor

- Esoteric II Pte. Ltd. is the sponsor of IndiGrid. Esoteric II Pte. Ltd. is a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR. Founded in 1976, KKR is a leading global investment firm with approximately US$ 723 billion of assets under management as of September 30, 2025, that offers alternative asset management as well as capital markets and insurance solutions. KKR sponsors investment funds that invest in private equity, credit and real assets and has strategic partners that manage hedge funds. KKR's insurance subsidiaries offer retirement, life and reinsurance products under the management of Global Atlantic Financial Group. KKR aims to generate attractive investment returns by following a patient and disciplined investment approach, employing world-class people, and supporting growth in its portfolio companies and communities. Esoteric II Pte. Ltd. currently owns a stake of around 1.17% in IndiGrid. Separately, Electron IM Pte. Ltd., an affiliate of KKR, currently owns 100% of the issued, paid-up and subscribed capital of the Investment Manager.

- In 2008, KKR established a dedicated infrastructure team and strategy focused on global investment opportunities. KKR has been one of the more active infrastructure investors globally over the past several years, having made approximately 75 infrastructure investments globally and approximately US$ 95 billion in assets under management within infrastructure.

- Today, KKR's infrastructure platform has expanded to include approximately 110 dedicated investment professionals covering a broad spectrum of investment opportunities in various infrastructure subsectors, including: midstream energy, renewables, power & utilities, water and wastewater, waste, telecommunications and transportation, among others. KKR continually monitors infrastructure sectors and infrastructure-related investments for emerging trends and may identify and prioritize investments in other sectors as conditions change or cycles evolve.

- We have leveraged and continue to leverage the experience and expertise of the Sponsor, to gain a competitive advantage within the Indian power industry. For further details on the Sponsor, please see the section entitled "*Parties to IndiGrid*" on page 142.

Strong corporate governance and skilled and experienced Investment Manager

We benefit from the skills and experience of the board of directors and the management teams of the Investment Manager, IndiGrid Investment Managers Limited, in investing and financially managing our transmission and BESS projects, and solar projects for the beneficial interest of our Unitholders. Some of the members of our Investment Manager's board of directors and management teams have extensive experience in the power sector and have established track records in negotiating, structuring and financing investments and financially managing these projects as well as governing similar trusts internationally. For further details, please see the section entitled "*Parties to IndiGrid*" on page 142.

The InvIT Regulations set out the statutory requirements for, among other things, the board composition of an investment manager, which promotes strong corporate governance in IndiGrid. The key features of our corporate governance structure are as follows:

- The chairman of the board of the Investment Manager is an independent director with experience in the infrastructure sector.

- The Investment Manager has constituted committees of the board, including amongst others, the stakeholders' relationship committee, the audit committee, the investment committee, ESG and CSR committee and the risk management committee. All these committees are chaired by independent directors.

- All related party transactions with our Sponsor are required to be approved by the investment committee (50% of which consists of independent directors) and the audit committee of the Investment Manager (majorly comprising of independent directors).

Business Strategy

Portfolio Strategy

- ***Focus on maintaining stable operations for predictable and sustainable distributions while pursuing value accretive acquisition***

  We focus on owning transmission and BESS assets and solar energy assets with long-term contracts, low operating risks and stable cash flows consistent with the characteristics of our Portfolio Assets as well as other assets which we intend to acquire in the future. We believe that by focusing on this asset class and leveraging our Investment Manager's industry knowledge and experience, we will maximize our strategic opportunities and overall financial performance.

We are focused on the Indian market, where we believe that private participation in the power sector will continue to grow significantly. We believe that energy sector in India has matured and there is an attractive opportunity to aggregate good quality transmission and BESS projects, and solar projects, (i) having attractive TSAs and BESPAs and long terms PPAs, respectively, which is also consistent with our investment philosophy of long term cash yielding stable projects; (ii) with operational track record for a well-capitalized platform like ours; (iii) with good quality equipment; and (iv) financially strong and creditworthy counterparties.

Our future growth is intended to be derived mainly from our Investment Manager's value accretive acquisition strategy, which provide long-term, regular and predictable cash flows, demonstrate potential to maintain or enhance returns to Unitholders and the potential for long-term capital growth in accordance with our investment objectives.

We intend to continue our expansion through an active evaluation of organic and inorganic acquisitions in accordance with the investment conditions specified in the InvIT Regulations. We believe that our experienced operational and management teams will enable us to identify, structure, execute and integrate acquisitions effectively based on our demonstrated ability to acquire high quality transmission and BESS projects and solar projects.

- ***Leveraging Energrid's greenfield projects***

  IndiGrid has signed a framework agreement dated November 12, 2024 with BII and Norfund to create a platform, EnerGrid which will bid and develop greenfield transmission and BESS projects in India. Once these projects commence operation, they will be fully acquired by IndiGrid at a pre-agreed enterprise value. Each of the three partners namely BII, Norfund and IndiGrid have committed to invest USD 100.00 million in the platform totalling to USD 300.00 million. IndiGrid has executed a definitive agreement dated August 25, 2025 with EnerGrid, amongst others, for the acquisition of a BESS project (187.5 MW/750 MWh standalone BESS) in Uttar Pradesh with viability gap funding under the tariff-based competitive bidding process after one year from its commercial operations date, in one or more tranches through a special purpose vehicle, Enerica Infra 3 Private Limited.

  We have, in the past, received letters of intent to establish, on a consortium basis or otherwise, various transmission projects including (i) Inter-State transmission system for "Transmission scheme for evacuation of power from Ratle HEP (850 MW) & Kiru HEP (624 MW): Part-A" on a BOOT basis; (ii) Inter-State transmission system for "Western Region Network Expansion scheme in Kallam area of Maharashtra" on a BOOT basis; (iii) Inter-State Transmission system for "Transmission scheme for evacuation of power from Dhule 2 GW REZ" on a BOOT basis; and (iv) to establish Inter-State Transmission system for "Western Region Expansion Scheme XXXIII (WRES-XXXIII): Part C" on a BOOT basis. Additionally, IndiGrid has received letters of intent or acceptance for design, supply, testing, installation, commissioning, operation and maintenance of BESS projects in Rajasthan and Gujarat and for that purpose has incorporated the special purpose vehicles, RBPL and GBPL in order to ensure growth through development of greenfield projects.

Sustainable and Stable Distribution Strategy

We intend to distribute at least 90% of our net distributable cashflows available to Unitholders once in every quarter. For further details, please see the section entitled "*Distribution*" on page 336.

We aim to pursue additional opportunities across transmission and BESS projects and renewable projects, in order to increase the cash available for distribution and, as a result, increase our distribution per Unit.

Our ability to grow the revenues from our asset portfolio and thereby increase the cash available for distribution and distributions per Unit, is subject to a number of factors including stable revenue generating assets.

Optimal Capital Structure

We intend to maintain a balanced capital structure and consolidated leverage to provide for a stable and predictable cash flow. Following the utilization of the Issue Proceeds, our consolidated borrowings and deferred payments net of cash and cash equivalents will be below 70% of the total value of our assets, as prescribed by the InvIT Regulations. If such borrowings and payments exceed 49%, we are required to obtain a credit rating of "AAA" or equivalent for the consolidated borrowing and proposed borrowing under the InvIT Regulations. We have been able to fulfil this criteria consistently.

We intend to consider both private and public markets for debt capital to provide the most balanced and optimal capital structure to acquire additional transmission and BESS projects and solar energy projects. We also intend to maintain appropriate risk policies to help mitigate foreign exchange and market risks.

Resilient Asset Management

In relation to our transmission assets, we aim to achieve high availability, sustain 99.5% availability throughout our operational portfolio and earn incentive revenue on a sustainable basis through a Reliability Centered Maintenance approach by deploying prudent asset management practices, conducting routine and predictive maintenance and using advanced technology, such as drones and thermo-vision scanning. We aim to ensure that our assets follow an approach centered maintenance strategy by deploying prudent asset management practices, conducting routine and predictive maintenance using advance technology, such as inverter performance heat map to monitor solar panels healthiness and the integration of the solar assets configuration on an analytics platform to assist in identifying anomalies and reinforcing preventative maintenance. We also intend to maintain rigorous performance standards for our battery energy storage systems, focusing on achieving the required Round-Trip Efficiency (RTE), ensuring high system availability, and optimising battery degradation throughout the asset life cycle.

We intend to continue applying advanced technology, underpinned by digital and predictive analysis and strengthen our O&M capabilities to better manage and operate our Portfolio Assets. For example, our DigiGrid platform which is an integrated digital asset management system is deployed across our Portfolio Assets. It enables real-time asset performance monitoring through advanced data acquisition and analytics tools. DigiGrid aggregates operational data providing a centralised dashboard for asset condition visibility. This platform supports automated alerts and data driven decision-making, facilitating a shift from traditional reactive maintenance to a predictive and preventive maintenance model. A key feature of DigiGrid is the Asset Health Index (AHI), an advanced analytical metric designed to quantify asset condition through rigorous data integration and analysis. By providing a quantitative and holistic view of asset health, the AHI enables us to prioritize maintenance activities effectively, mitigate operational risks, and extend asset lifespans. We believe that DigiGrid and the AHI exemplify our digital transformation journey, enhancing resilience, reliability, and value delivery across our Portfolio Assets.

We have also adopted periodic drone based patrolling of transmission lines. This method, using a high-resolution camera, helps conduct close-range observations and identify even the minutest defects. We believe that this enables system engineers to proactively plan and schedule maintenance and shutdowns while focusing on risk prioritization. We believe that this will improve the productivity of engineers manyfold while enhancing data accuracy.

Industry Stewardship

We intend to exercise industry stewardship by actively participating in policy-shaping and sector dialogues to deepen the private sector's role in developing, operating and financing critical infrastructure. Through constructive engagement with policymakers, regulators and industry bodies, we seek to contribute practical insights from operating platforms to support efficient, transparent and bankable frameworks that can unlock long-term private capital, enhance asset lifecycle performance and foster innovation, while maintaining high standards of governance and risk management.

In parallel, we aim to build broader visibility for IndiGrid and for InvITs more generally as credible platforms for stable, risk-adjusted infrastructure returns by pursuing thought leadership, investor education and data-led communication of performance, governance and ESG practices, thereby helping to broaden the domestic and international institutional as well as investor base.

RISK FACTORS

An investment in the Units involves a high degree of risk. Before investing in the Units, you should pay particular attention to the fact that IndiGrid, the Trustee, our Portfolio Assets, our Sponsor, the Project Managers, the Investment Manager and each of their activities are governed by the legal, regulatory and business environment in India and other relevant jurisdictions, which differs from that which prevails in other countries. You should carefully consider the risks described below and other information as disclosed in the Preliminary Palcement Document before making an investment in the Units. The risks described in this section are those that IndiGrid and the Investment Manager consider to be the most significant to our business, prospects, financial condition, results of operations and cash flows and are not the only risks and uncertainties that we face. Additional risks and uncertainties not presently known to IndiGrid or the Investment Manager or that they currently believe to be immaterial may also have an adverse effect on our business, prospects, financial condition, results of operations and cash flows. If any or a combination of the following events occur, or if other risks that are not currently known or are now deemed immaterial give rise to similar events, our business, prospects, financial condition, results of operations and cash flows could materially suffer, the value of the Units could decline, and you may lose all or part of your investment. Unless specified or quantified in the relevant risk factors below, IndiGrid and the Investment Manager are not in a position to quantify the financial or other implication of any of the risks mentioned herein.

This Placement Document contains forward-looking statements that involve risks, uncertainties and assumptions. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Placement Document.

To obtain a complete understanding, Bidders should read this section together with the sections entitled "Our Business" and "Management's Discussion and Analysis by the Directors of the Investment Manager of Factors affecting the Financial Condition, Results of Operations and Cash Flows" on pages 247 and 340, as well as the other financial and statistical information contained in this Placement Document.

In making an investment decision, you must rely upon your own examination and the terms of the Issue, including the merits and the risks involved. You should consult your tax, financial and legal advisors about the particular consequences of investing in the Issue.

In this section, unless the context otherwise requires, a reference to "we", "us" and "our" refers to IndiGrid or to the Portfolio Assets and may be interchangeably used.

RISKS RELATED TO OUR BUSINESS

1. We may be unable to operate and maintain our transmission and BESS projects to achieve the prescribed availability.

We operate most of our transmission and BESS projects under an availability-based tariff regime. The Tariff Regulations as well as the provisions of Transmission Service Agreements provide specific guidance on the calculation of availability and take into account the elements in the transmission system (including transmission lines and substations) as well as the reason for any outages, with force majeure outages being excluded from such calculation. If our availability falls below the required minimum threshold (ranging between 95% to 98%) for a particular line, we are subject to a penalty which reduces the annual transmission charge we receive for the relevant period. In terms of the BESPA's, in relation to BESS projects, we are required to maintain minimum annual average availability of 95% during any contract year. In the event our availability falls below the required thresholds, the BESPAs require payment of damages and in the event of continued default, the procurer under the BESPA may substitute the developer.

We may be unable to operate and maintain our transmission and BESS projects to achieve prescribed availability due to a number of factors, including, but not limited to:

- failure to meet licensing requirements or to obtain, maintain or renew approvals and licenses;
- operator error, improper installation or mishandling of equipment;
- breakdown or failure of power transmission systems;
- degradation of the batteries and their efficiencies;
- flaws in equipment design or construction of power lines or substations leading to failure;

- work stoppages or labour disturbances or disputes during outage events or otherwise;
- performance of equipment below expected levels of output or efficiency;
- non- availability of the required spare parts and required labour force;
- environmental issues affecting the operations of transmission systems;
- planned or unplanned power outages;
- theft of equipment and lines;
- claims on completed projects and litigations, proceedings, judgments or awards arising therefrom; and
- force majeure and catastrophic events, including fires, explosions, landslides, storms, floods, social unrest, earthquakes and terrorist acts, to the extent such events are not excluded from the calculation of availability under the TSAs and the Tariff Regulations.

Accidents or malfunctions involving transmission lines or substations including failure of transmission towers, power conductors or insulators, may disrupt transmission of electricity and result in availability being below expected levels. Such malfunctions may also result in the requirement of scrapping certain components of the project asset and replacing them. For example, JKTPL's transformer at Kabulpur AIS Substation was damaged.

In addition, transmission and BESS projects rely on equipment that is built by third parties, and which is subject to malfunction. Although, in certain cases, manufacturers provide warranties and performance guarantees, and may be required to compensate us for certain equipment failures, engineering and design defects, such arrangements are subject to time limits, fixed liability caps and may not fully compensate us for the damage incurred or for penalty payments which may be imposed on us due to any reduced availability below required levels. Warranties under certain supplier contracts for certain of our Portfolio Assets have expired, as a result of which we may not be compensated for equipment failures, engineering and design defects from such suppliers.

The transmission and BESS projects operated by us are generally in geographically remote areas with difficult terrain, which poses particular challenges for their operation and maintenance, including security and accessibility.

If any of these risks or any similar risks materialize, our ability to operate and maintain transmission projects to achieve prescribed availability thresholds could be adversely affected. We may also face reputational risks which could affect our ability to bid for future transmission projects and we may face potential claims for loss of business or for damages if we are unable to transmit power as agreed under our TSAs. A Transmission Asset may have its license cancelled by CERC or its TSA terminated by either a LTTC or the CTU for failure to operate and maintain the transmission projects in accordance with prescribed requirements. A BESS Asset may be substituted in the event of failure to commence availability of BESS up to the contracted capacity and failure to comply with material obligations under the BESPAs. Any of these circumstances could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows.

2. If environmental conditions at our Solar Assets are unfavourable, our electricity production, and therefore our revenue from operations, may be substantially below expectations.

The revenues generated by our Solar Assets are proportional to the amount of electricity generated, which in turn is dependent upon prevailing environmental conditions. Operating results for solar energy projects vary significantly depending on natural variations from season to season and from year to year and may also change permanently because of climate change or other factors, including conditions resulting from man-made causes, which are beyond our control. In some periods, the solar conditions may fall within our long-term estimates but not within the averages expected for such period. In addition, the amount of electricity our Solar Assets produce is dependent in part on the amount of sunlight or irradiation.

Unfavourable weather and atmospheric conditions could impair the effectiveness of our Solar Assets or reduce their output to levels below their rated capacity. Furthermore, components of our systems, such as solar panels and inverters, could be damaged by severe weather conditions, such as hailstorms, tornadoes or lightning strikes or certain levels of pollution, dust and humidity. The operational performance of a particular solar energy project also depends on the contour of the land on which the project is situated. In case of a highly variable contour, the output of the solar farm situated on such a surface may be sub-optimal. Our Solar Assets may also be affected by the monsoon season. For example, our solar project, operated by GGEPL was interrupted by a stator earth fault on March 21, 2025.

A sustained decline in environmental and other conditions at our solar energy projects could lead to a material adverse change in the volume of electricity generated. As a consequence, our business, cash flows, financial condition, results of operations and prospects may be materially and adversely affected.

3. Most of our revenues are derived from tariff payments received from LTTCs and a delay in payments of point of connection ("PoC") charges to the CTU by users and customers may adversely affect our cash flows and results of operations.

In accordance with the Sharing of Charges and Losses Regulations and the CERC's PoC payment system, transmission licensees, such as our Transmission Assets, are entitled to recover their approved tariffs from ISTS charges collected by the CTU. The CTU collects transmission charges from customers, including our LTTCs on a regular basis and pays such transmission charges to the transmission licensees, including the Transmission Assets. The payment mechanism is structured in accordance with the Tariff Regulations to incentivize the end consumers to make timely payments through rebates, and a surcharge that is levied on untimely payments by LTTCs.

The LTTCs under the PoC mechanism include various state utilities, other distribution licensees and TSUs. These LTTCs have experienced periods of financial weakness in the past. A failure or delay on the part of any LTTCs to make timely payments or on the part of distribution licensees or TSUs to make the requisite payments to the CTU could affect the capability of the CTU to make the corresponding payments to transmission licensees, including our Transmission Assets. As a result, factors beyond our control that affect the business, prospects, financial condition, results of operations or cash flows of the LTTCs could result in the delay or failure of our Transmission Assets to receive tariff payments.

PGCIL serves as a CTU and is responsible for the planning, development and operation of inter-state transmission of electricity and the national grid. PGCIL also undertakes high capacity transmission corridor and grid strengthening projects. Its dual roles as a CTU and transmission project developer and operator may give rise to conflicts of interest that could result in delays in tariff payments to us. As a result of these and similar factors that may be beyond our control, our business, prospects, financial condition, results of operations and cash flows may be adversely affected.

4. As the terms and conditions, including the tariff structure under our TSAs and BESPAs are generally fixed, we may not be able to offset increases in costs, including operation and maintenance costs, solely from tariffs payable to us under the TSAs.

The tariff structure under our TSAs and BESPAs is largely fixed for the entire term of the TSAs and BESPAs, respectively. Operation and maintenance costs of our transmission and BESS projects may increase due to factors beyond our control, including the following:

- Increase in the cost of labour, materials and insurance;
- New safety standards or obsolescence leading to retrofitting or additional equipment;
- Restoration costs in case of events such as, floods, natural disasters and accidents;
- Increase in raw material costs;
- Adverse weather conditions;
- Unforeseen legal, tax and accounting liabilities; and
- Other unforeseen operational and maintenance costs.

We may not be able to offset increased operation and maintenance costs as the tariff is generally fixed under our TSAs and BESPAs. In respect of our Transmission Assets, given the escalable component forms only a small portion of the overall tariff payable to us, it may be insufficient to offset such cost increases. Additionally, as the escalable portion of our tariff is linked to inflation, there can be no assurance that adjustments of the escalable tariff will be sufficient to cover increased costs resulting from inflation. Significant increases in operation and maintenance costs may reduce our profits, could expose us to penalties under the TSAs and BESPAs.

Further, any increased volatility or rate of inflation of global commodity prices, in particular oil and steel prices, could adversely affect our customers, contractual counterparties and end users. Although the RBI periodically imposes certain policy measures designed to curb inflation, these policies may not be successful. Any slowdown in India's growth, inflation volatility or fluctuation or sustained periods of hyperinflation adversely impact our business, prospects, financial condition, results of operations and cash flows. For example NER claiming increase in non escalable transmission charges through and order dated May 19, 2024 at the rate of 2.39%, from its long term transmission customers and KTL been claiming increase in non escalable transmission charges at the rate of 1.57%, from its long term transmission customers due to change in law.

5. Charges under the BESPAs are pre-determined capacity based charges with the counter-parties to our BESPAs which may have an adverse effect on our business, prospects, financial condition, results of operations and cash flows

The BESPAs executed by our projects generally provide for pre-determined, capacity-based charges (typically fixed per MW per month) for the full term, with only limited pass-throughs (such as for change in Law and applicable indirect taxes) and no general indexation for inflation or ordinary increases in operating or replacement costs. As a result, increases in costs, maintenance and spare parts, replacement of equipment, grid and DSM/reactive charges, labour and insurance, or other operating expenses may not be recoverable from our counterparties beyond what is explicitly provided in the BESPAs. If market prices for storage services increase, we may not be able to renegotiate existing BESPAs to capture such increases. In addition, the capacity charges we receive are subject to performance parameters, including availability and round-trip efficiency, and underperformance may result in liquidated damages or payment deductions, further decoupling our revenues from our cost base.

Tariff and compensation frameworks for storage services in India are still evolving, and in some cases may require adoption or approval by the relevant regulatory commission. We may also experience delays in adoption or approval of applicable charges, billing reconciliations and receivables, which could adversely affect our cash flows. Accordingly, the capacity charges at which we provide storage services may have little or no relationship with the costs incurred in operating our BESS projects, which could negatively impact our profitability. For further details, please see the section entitled "*Our Business*" on page 247.

6. We have limited flexibility in negotiating tariffs and capacity charges with the counter-parties to our Power Purchase Agreements and this could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

The Power Purchase Agreements executed by the Solar Assets have a pre-determined tariff structure, with escalations specifically set out in the Power Purchase Agreements only in some instances and we have a limited ability to negotiate the terms of such Power Purchase Agreements. If there is an industry-wide increase in tariffs, we may not be able to renegotiate the terms of the Power Purchase Agreements to take advantage of such increased tariffs. For further details, please see the sections entitled "*Our Business*" on page 247. As a result, in the event of increase in operating costs or equipment costs, or increased costs as a result of changes in applicable laws or as a result of inflation or for any reason whatsoever, we may not be able to pass these cost increases on to our counterparties other than that which may be provided for in the relevant contracts. India being a developing nation, the rate of inflation is high as compared to developed nations and hence there is an increase in cost due to inflation. Therefore, the prices at which we supply power may have little or no relationship with the costs incurred in generating power, thereby, reducing the profits for the Trust as projected. Tariff structuring mechanisms also have been changing in India. We may also experience delays in the adoption of tariffs and delays in receivables for some Power Purchase Agreements. Therefore, the prices at which we supply power may not have any direct relationship with the costs incurred in generating power and accordingly, could negatively impact our profitability. For further details, please see the section entitled "*Our Business*" on page 247.

7. The Solar Assets have entered into Power Purchase Agreements which contain certain onerous provisions and any failure to comply with such agreements could result in adverse consequences including penalties.

The Solar Assets have entered into Power Purchase Agreements with off-takers, including SECI and TANGEDCO, with which the Solar Assets have a limited ability to negotiate. The standard form of the

Power Purchase Agreements are provided by the off-takers as a part of the request for selection or proposal while bidding for the project.

As a result, the Power Purchase Agreements contain terms that may be onerous to the Solar Assets in relation to, among other things, (i) substitution clauses that allow the lenders in consultation with the off-takers to exercise their rights, if any, under financing agreements, to seek substitutions of the relevant asset by a selectee for the residual period in the event of suspension or termination of the Power Purchase Agreement, due to a breach or default by such asset and (ii) restrictions on increasing the contracted capacity without obtaining prior approvals from CEIG. Failure to comply with these requirements could result in adverse consequences, including the Solar Assets being liable for compensating the relevant off-takers for such breach or termination of the Power Purchase Agreements. Under certain of our Power Purchase Agreements, the Solar Assets are required to provide indemnity to certain off-takers.

Further, the Power Purchase Agreements have pre-defined tariff for the entire term of the relevant Power Purchase Agreement for contracted capacity and the majority of our off-takers, at any time during a contract year, are not obliged to purchase any additional energy from the relevant Solar Assets beyond the specified capacity in the relevant Power Purchase Agreement and may purchase power beyond acceptable deviations at lower tariffs. If for any contract year, it is found that the relevant Solar Asset has not been able to generate minimum energy of specified capacity with the time periods specified in the relevant Power Purchase Agreement, on account of reasons solely attributable to the Solar Assets, then such non-compliance shall make the Solar Assets liable to pay the compensation provided in the relevant power purchase agreement as payable to buying utilities (as defined in the relevant Power Purchase Agreement), subject to certain conditions specified, and may lead to termination of the relevant Power Purchase Agreement. Further, any excess generation over and above the specified quantity may be purchased by our off-takers at a lower rate at their option and often subject to conditions such as their ability to procure purchasers for such excess generation.

The Power Purchase Agreements executed by us have a pre-determined tariff structure, with escalations specifically set out in the Power Purchase Agreements only in some instances and we had a limited ability to negotiate the terms of such Power Purchase Agreements. If there is an industry-wide increase in tariffs, we may not be able to renegotiate the terms of the Power Purchase Agreements to take advantage of such increased tariffs. As a result, in the event of increase in operating costs or equipment costs, or increased costs as a result of changes in applicable laws or as a result of inflation, we may not be able to pass these cost increases on to our counterparties.

The restrictions and uncertainties impose constraints on the flexibility of IndiGrid to conduct its business and its financial conditions and results of operations may be adversely affected. In the event any off-taker or a lender invokes any restrictive provision in the relevant Power Purchase Agreement or interprets any term or condition in an adverse manner or there are any changes to our current tariff rates, such invocation or interpretation or amendment may adversely affect our business, financial condition, cash flows and results of operations. For further details in relation to the Power Purchase Agreements, please see the section entitled "*Our Business*" on page 247.

8. The Transmission Assets have entered into Transmission Service Agreements which contain certain provisions and any failure to comply with such provisions may result in adverse consequences including penalties.

Our transmission assets operate under a standard form Transmission Service Agreement ("**TSA**") entered into with long-term transmission customers, pursuant to the tariff-based competitive bidding framework, which provides limited scope for negotiation and imposes prescriptive obligations across construction, commissioning, operation and maintenance. The TSA is the principal project document that governs the development, financing, construction, operation and maintenance of the project. The TSA imposes certain conditions subsequent along with ongoing obligations such as providing an irrevocable, unconditional contract performance guarantee, obtaining the transmission license, securing adoption of transmission charges, submitting a detailed project execution plan, achieving financial close and issuing notices to proceed to EPC contractors. The TSA requires the TSP to obtain and maintain all consents, clearances and permits (including 'Right of Way', PTCC, aviation, environmental and forest clearances), acquire land for location-specific facilities where applicable, and implement safety rules and site regulations. The TSA prescribes a target availability for AC systems of 98% on an annual basis, with incentive payments for availability above target and penalties if annual availability falls below 95%. It further provides for monthly transmission charges to be reduced proportionately where cumulative availability in a year is below target.

Delay in achieving the scheduled commercial operations date of any element or the project triggers daily liquidated damages calculated as a percentage of the monthly transmission charges for that project (escalating after 60 days), capped at an amount corresponding to six months of delay, with prolonged delay leading to termination events. Availability shortfalls below 98% reduce monthly transmission charges pro-rata during the year and may eliminate incentive entitlements; if annual availability falls below 95% for AC systems, an additional annual penalty is payable to long-term customers. Persistent performance failures may constitute events of default, including failing to achieve monthly Target Availability of 98% for six consecutive months or for six months within any rolling 18-month period (except where affected by force majeure).

Operational risks include stringent interconnection prerequisites and safety approvals, which, if not obtained, may defer COD and cash flows. Although the payment security framework mitigates collection risk, any systemic delay or dispute could adversely affect liquidity. The TSA contains mutual indemnities wherein the Transmission Assets LTTCs are indemnified for certain third-party claims and losses arising from breach, subject to monetary caps and exclusions. During construction and operation, insurances must be maintained, with proceeds applied first to reinstatement; in a total loss scenario, allocation of proceeds follows the financing agreements and TSA provisions. Accordingly, increases in input costs, changes in technical standards, or regulatory actions may not be fully compensated under the TSA.

In summary, the TSA's prescriptive conditions, high availability standard of 98% and tight COD and operational compliance requirements, combined with liquidated damages, bank guarantee encashment, proportionate charge reductions, penalties for sub-95% availability, and termination rights, together create significant downside risk in the event of non-compliance or under-performance by the transmission assets. For further details in relation to the TSA, please see the section entitled "*Our Business*" on page 247.

9. The BESS Assets have entered into Battery Energy Storage Purchase Agreements which contain certain provisions and any failure to comply with such provisions may result in adverse consequences including penalties.

The BESS Assets operate under standard Battery Energy Storage Purchase Agreements ("**BESPA**") issued by procurers or buying utilities as part of the bidding process, which provide limited scope for negotiation. As a result, the BESPA's include stringent obligations relating to development, commissioning and operations, including: provision and maintenance of performance bank guarantees; satisfaction of conditions subsequent (such as land rights, connectivity and financing) within fixed timelines; and adherence to detailed interconnection, grid code, metering and data reporting requirements. Most of the BESPA's prescribe a fixed, capacity-based tariff for the term, with provision of change-in-law relief requiring regulatory approval and thresholds before any adjustment applies, and do not generally permit unilateral renegotiation in response to increases in input costs, supply chain constraints, inflation or changes in applicable technical standards. In addition, these agreements impose strict operational performance standards, including monthly or annual minimum availability (typically 95%) and round-trip efficiency thresholds, with liquidated damages for any shortfall that may be calculated at multiples of the capacity charges, and in some cases the withholding of monthly tariff where round-trip efficiency falls below minimum levels. Additionally, these agreements include degradation benchmarks, reactive power compensation and capacity demonstration obligations, with obligations to augment capacity at the developer's cost if minimum dispatchable capacity is not met. Failure to timely commission, satisfy conditions subsequent or maintain required performance may trigger encashment of performance bank guarantees, delay liquidated damages, pro rata capacity reductions, debarment from future procurement processes, and termination of the un-commissioned capacity.

Certain BESPAs also allow the lenders, in consultation with the procurer, to seek substitution of the developer upon default subject to the default being remedied in consultation period of 90 days; if substitution is not achieved, the agreement may be terminated and, depending on the circumstances, the procurer may acquire the project at a mutually agreed value or lenders may liquidate project assets. Upon termination due to default, the developer may be required to transfer the project to the procurer for a "termination compensation" defined in BESPA. Any charges payable to the transmission or state utility shall be borne by the entity due to whose failure, the termination was triggered. Upon expiry of the BESPA term, the developer is required to vacate and clear the site at its own cost. The agreements include broad indemnities in favour of the procurer or buying utility and allocate taxes, charges and costs up to the delivery point to the developer, who may be required to reimburse penalties or charges imposed by grid or transmission operators arising from the project's delays or deviations. For further details in relation to BESPAs, please see the section entitled "*Our Business*" on page 247.

10. We may be unable to operate and maintain the BESS Assets in a satisfactory manner or at all.

The investment objectives and strategy of IndiGrid includes, amongst others, investment in transmission, BESS and renewable energy assets. IndiGrid has executed a definitive agreement dated August 25, 2025 with EnerGrid, amongst others, for acquisition of a BESS project

As grid-scale MW-level BESS implementation is relatively new and the technology continues to evolve, there can be no assurance that we will be able to achieve optimal operating performance and consistently meet all SLAs. During the initial phases, performance outcomes may vary as operational practices mature. There can be no assurance that we will be able to operate the BESS Assets in a satisfactory manner or at all and supply the contracted capacities in accordance with the relevant BESPA. Further, while these BESS assets are designed for long-term operation over a projected cycle life of 12 to 15 years with one to two cycles per day, actual performance and financial outcomes will depend on operating conditions, usage patterns, and ongoing optimization. Further, there can be no assurance that any of these BESS Assets will perform as expected or that the returns from such BESS Assets will support the financing utilized to acquire or maintain them.

Contracts with state distribution companies may be exposed to tariff renegotiation and delayed payments, any of which could adversely affect cash flows and asset returns. In addition, revisions to technical standards, safety codes, market rules, and procurement guidelines may require design changes, retrofits, operational adjustments, or revised commissioning plans, which could extend timelines and increase capital or operating expenditures, and may defer or reduce revenue recognition. Differences in interpretation and enforcement among central authorities, SERCs, state load dispatch centres, and DISCOMs could also result in compliance disputes, operating restrictions, or penalties.

We may also face reputational risks which could affect our ability to bid for future projects. Any of these circumstances could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Additionally, we may face competition from established players and competitors who have a strong operating history in this sector.

11. Any changes to current tariff policies or modifications of tariffs standards by regulatory authorities in respect of our Transmission Assets could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

Tariffs determined by regulatory order and charged to customers comprise virtually all of the revenues generated by the transmission projects operated by us. Such tariffs are collected by the CTU, under a payment pooling mechanism and subject to periodic reviews by the CERC. The Transmission Assets have no ability or flexibility to charge more for regulated services than is provided for under the relevant tariff.

With respect to potential impacts on statutory payment pooling bodies, in accordance with the Sharing of Charges and Losses Regulations, transmission licensees such as the Transmission Assets are entitled to recover their approved tariffs from ISTS charges collected by the CTU. The CTU collects transmission charges from distribution licensees and TSUs on a regular basis and pays such charges to transmission licensees, including us. In the event of any change in the operating statutory parameters of the CTU, or a failure or delay on the part of the CTU to make the corresponding payments to the Transmission Assets, the counterparty risk may increase significantly and our business, prospects, financial condition, results of operations and cash flows may be materially and adversely affected. Further, we are subject to an incentive-based penalty mechanism for all our Transmission Assets and may be subject penalties if the availability rate falls below the limits as may be prescribed under the applicable provisions in the project documents and tariff regulations. While tariff enhancement applications in respect of the ENICL, JTCL, MTPL, OGPTL, NTL and BDTCL projects have been approved by CERC previously, there can be no assurances that future tariff enhancements applications for any of the Portfolio Assets will be granted.

The revenues generated by JKTPL are not dependent on a regulatory order and are dependent on tariffs as determined in terms of the relevant TSA. JKTPL operates an intra-state transmission asset and in terms of the TSA, JKTPL may recover tariffs equivalent to a base unitary charge which is subject to annual revisions. For instance, the rate of inflation, based on monthly Wholesale Price Index stood at (155%) for the month of September, 2025 (over September, 2024) as compared to 154.70% during the corresponding month of the previous year, resulting in lower escalations in tariff as against projections. We cannot assure you that future revisions to the base unit charge will be aligned with the tariff expected to be recovered by JKTPL.

With respect to potential impacts on statutory dispatch bodies, in accordance with the Electricity Act, the operators of the national or state transmission grids, the NLDC, the RLDCs and the SLDCs, operate the grids as independent operators. Any negative change in the operating statutory parameters of the NLDC, the RLDCs or the SLDCs, as applicable, may negatively affect the corresponding availability of the transmission assets of the Transmission Assets and in turn materially and adversely affect the business, prospects, financial condition, and results of operations and cash flows of the Transmission Assets. Any such unfavorable changes, particularly to tariff, payment pooling and dispatch regulations, could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

12. We are reliant on certain off-takers and any decline in their financial condition or our relationship with them may adversely effect our results of operations.

In India, the distribution of electricity is controlled by central agencies and state utilities and therefore there is a concentrated pool of potential buyers for grid connected, utility scale electricity. The Solar Assets have entered into Power Purchase Agreements with off-takers, and there is a limited number of purchasers of utility scale quantities of electricity under the long-term Power Purchase Agreements, which exposes us to purchaser concentration risk. Any event impacting the economic condition of such off-takers may adversely affect our business, financial condition, results of operations, and prospects. If the financial condition of these utilities and/or power purchasers deteriorate or the solar policies to which they are currently subject to compels them to change the source of their renewable energy supplies, then the demand for electricity produced by our solar power projects could be negatively impacted which in turn could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows. If, for any reason, any of our off-takers or counterparties under such Power Purchase Agreements become unable or unwilling to fulfil their contractual obligations under the relevant Power Purchase Agreement or if they refuse to accept delivery of contracted power pursuant to the relevant Power Purchase Agreement, or otherwise terminate such agreements prior to the expiration thereof, our business, financial condition, results of operations and prospects may be adversely affected as we may not be able to find other purchasers for such contracted capacities or replace the Power Purchase Agreement on equivalent terms and conditions.

Further, any failure to maintain our relationship with these off-takers or expiry or termination of the Power Purchase Agreements and/or negotiate and execute renewed Power Purchase Agreements on terms that are commercially viable, with the off-takers, could have an impact on our financial condition and our growth prospects. Post the term of the relevant Power Purchase Agreements, there is no assurance of power off take by the counter parties to the Power Purchase Agreements, hence, this could adversely impact the cash flows and operations of IndiGrid.

Further, TSESPL, one of our Transmission Assets, facilitates step-up and provides evacuation facilities to four solar assets on a cost-to-cost basis, namely GSPPL and TSEP (which are owned and operated by us) and Focal Photovoltaic India Private Limited and Focal Renewable Energy Two India Private Limited (which are owned and operated by third parties). Any failure by TSESPL to maintain its relationship with its third party customers could have an impact on its financial condition and results of operations.

There may also be delays associated with collection of receivables from Government-owned or controlled entities due to the financial condition of these entities and there can be no assurance that our off-takers will have the resources to pay on time. Furthermore, to the extent any of our off takers are, or are controlled by, governmental entities, bringing actions against them to enforce their contractual obligations is often difficult. Further, our Solar Projects or our counterparties may be subject to legislative or other political action that may impair their contractual performance. Bringing action against our customers to enforce their contractual obligations is often difficult and there can be no assurance that if we initiate any legal proceedings against any such entities, we will receive a judgment in our favour or on a timely basis. A failure by any of our customers to meet their contractual commitments, or an insolvency or liquidation of any of our customers, could have an adverse effect on our financial condition, cash flows and results of operations.

We are also reliant on BESS service procurers under our BESPAs, and any deterioration in their financial condition or our relationship with them may adversely affect our business, results of operations, cash flows and prospects. Our BESS Assets sell contracted capacity and related storage services pursuant to long-term battery energy storage purchase/system agreements with a limited set of counterparties, including government owned trading companies, state utilities and distribution companies. Any event impacting the economic condition or creditworthiness of these procurers, or any change in applicable laws, regulations, market design or dispatch/scheduling practices affecting the procurement or utilization of storage services, could negatively impact demand for, or payment under, our BESPAs. If, for any reason, any of our procurers or counterparties under such BESPAs become unable or unwilling to fulfil their contractual obligations (including timely payment of capacity charges) or refuse to schedule or accept delivery of contracted services, or otherwise terminate such agreements prior to expiry, we may be unable to find alternative purchasers for the contracted BESS capacity or to replace the agreement on equivalent terms. While certain contracts provide for payment security mechanisms, these may be insufficient or delayed in practice. Further, bringing action against such counterparties to enforce their obligations can be difficult, and there can be no assurance that any legal proceedings would result in timely or favourable recovery. Any failure to maintain these relationships, or expiry or termination of our BESPAs without securing commercially viable renewals or replacement arrangements, could adversely affect our business, financial condition, results of operations and cash flows.

Further, our BESS projects or our counterparties may be subject to legislative, regulatory, market design or other political actions that may impair contractual performance, scheduling or payment. While we are entitled to levy late payment surcharge for delays, any delay in recovering, or refusal to pay, amounts due (including surcharge) could adversely affect our operational cash flows. In addition, external events, such as an economic downturn, could impair the ability of some counterparties under our BESPAs to pay for contracted services.

13. Our ability to deliver electricity to our various counterparties requires the availability of, and access to, interconnection facilities and transmission systems which we do not own or control, and we are exposed to the extent and reliability of the Indian power grid and its dispatch regime.

The ability of our Solar Assets to deliver electricity is impacted by the availability of, and access to, relevant and adequate evacuation and transmission infrastructure required to deliver power to our contractual delivery point and the arrangements and facilities for interconnecting our generation projects to the transmission systems, which are owned and operated by third parties or state electricity boards. The operational failure of existing interconnection facilities or transmission facilities or the lack of adequate capacity on such interconnection or transmission facilities or evacuation infrastructure may have an adverse effect on our ability to deliver electricity to our various counterparties which may subject us to penalties under our Power Purchase Agreements. The relevant Portfolio Assets may also have to pay certain additional charges due to deviation settlement mechanism and evolving regulations, which may increase in the future including in connection with new market and grid-integration products being developed to manage the growing share of variable renewable energy.

As a result of grid constraints, such as grid congestion and restrictions on transmission capacity of the grid, the transmission and dispatch of the full output of our solar projects may be curtailed. We may have to stop producing electricity during the period when electricity cannot be transmitted, for instance, when the transmission grid fails to work. This may affect our ability to supply the contracted amount of power to the off taker which may result in imposition of certain penalties on us under the terms of the relevant Power Purchase Agreements. Furthermore, if construction of power projects in India, particularly in the states and regions that we operate in, outpaces transmission capacity of power grids, we may not be in a position to transmit, or have dispatched, all of our potential electricity to the power grid and therefore may be dependent on the construction and upgrading of grid infrastructure by government or public entities for increased capacity. The curtailment of our power projects' output levels will reduce our electricity output and limit operational efficiencies without compensation, which in turn could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows. Further, any damage caused due to natural calamities such as, thunderstorm or torrential rains or earthquake, to the assets which are utilised for accessing interconnection facilities and transmission systems, could also impact our operations, financial condition and cash flows. While the Ministry of New and Renewable Energy has reported record renewable capacity addition in FY 2024–25, including approximately 23.8 GW of solar and a total installed renewable base of about 220 GW as of March 31, 2025, together with a substantial pipeline of projects under implementation and tendering, the rapid pace and scale of build-out may heighten near-term risks of congestion and evacuation bottlenecks until associated transmission capacity is commissioned, which may have an adverse impact on our operations, financial condition and cash flows.

Although the GoI has accorded renewable energy "must-run" status (which means that any renewable power that is generated must always be accepted by the grid), under the Indian Electricity Grid Code promulgated by CERC, power producers and government entities are required to undertake planned generation and drawing of power in order to maintain the safety of the power grid. In some cases, this may result in a curtailment of our ability to transmit electricity into the power grid, which may have an adverse effect on our financial condition and results of operations. Additionally, in some cases, there is also deemed generation of power in accordance with the provisions of the Power Purchase Agreements. Accordingly, actual priority dispatch may be constrained by real-time system conditions, congestion management actions and state-level operating practices, resulting in uncompensated curtailment or delays in scheduling. Any lag between the pace of renewable additions and the commissioning of associated transmission corridors or system upgrades could increase the frequency and duration of re-dispatch or standby instructions to storage, potentially reducing available operating hours, limiting revenue stacking opportunities, and increasing compliance and augmentation costs.

14. We may not be able to make distributions to our Unitholders comparable to our Unitholders' estimated or anticipated distributions or the level of distributions may fall.

While we have had a stable track-record of distributions since listing, future distributions will be based on the net distributable cash flows. The InvIT Regulations provide that not less than 90% of our net distributable cash flows should be distributed to the Unitholders. Under the InvIT Regulations, distributions must be declared and made not less than once every six months in each financial year and will be made not later than five days from the record date and pursuant to its distribution policy. IndiGrid declares its distributions once every quarter in accordance with the InvIT Regulations and our Distribution Policy. The amount of cash available for distribution to Unitholders principally depends upon the amount of cash that we receive as dividends or the interest and principal payments from our Portfolio Assets, which in turn depends on the amount of cash that the relevant Portfolio Assets generate from operations and may fluctuate based on, among other things:

- insufficient cash flows received from our Portfolio Assets;
- debt service requirements and other liabilities of our Portfolio Assets;
- fluctuations in the working capital needs of our Portfolio Assets;
- ability of our Portfolio Assets to borrow funds and access capital markets;
- restrictions contained in any agreements entered into by our Portfolio Assets, including financing agreements;
- respective businesses and financial positions of our Portfolio Assets;
- applicable laws and regulations, which may restrict the payment of dividends by the Portfolio Assets;
- operating losses incurred by the Portfolio Assets in any financial year;
- changes in accounting standards, taxation laws and regulations, laws and regulations in respect of foreign exchange repatriation of funds, corporation laws and regulations relating thereto;
- amount and timing of capital expenditures on our Portfolio Assets;
- amount of management fees we pay to the Investment Manager and the Project Manager; and
- nature of cash flows received from our Portfolio Assets.

Our Investment Manager will be liable to pay interest to our Unitholders if distributions are not paid within 5 working days from the record date in accordance with the InvIT Regulations.

Further, the method of calculation of the net distributable cash flows may change subsequently due to regulatory changes. Any change in applicable laws in India or elsewhere (including, for example, tax laws and foreign exchange controls) may limit our ability to pay or maintain distributions to our Unitholders. Further, the Finance Act, 2020 amended the IT Act and consequently, the taxability of dividends distributed by IndiGrid will depend on the taxation regime opted by the Portfolio Assets. For further details, please see section entitled "*Risk Factors - Unitholders may be subject to Indian taxes arising out of capital gains on the sale of the Units and on any dividend or interest component of any returns from the Units*." on page 134.

Furthermore, no assurance can be given that we will be able to pay or maintain the levels of distributions or that the level of distributions will increase over time, or that future acquisitions will increase our distributable cash flow to our Unitholders. Distributions that the Unitholders have received in the past may not be reflective of the distributions that may be paid in the future. Any reduction in, or delay or default of, payments of distributions could materially and adversely affect the market price of our Units. As a result of all these factors, we cannot guarantee that we will have sufficient cash generated from operations to achieve distributable or realized profits or surplus in any future period in order to make distributions every three months or at all. For further details on our distributions, please see section entitled "*Distribution*" on page 336.

15. Our funding requirements and proposed deployment of the Net Proceeds are based on management estimates which may affect our business and results of operations.

Our proposed deployment of the Net Proceeds may be subject to change based on various factors, some of which are beyond our control.

We intend to use the Net Proceeds for the purposes described in the section entitled "*Use of Proceeds*" on page 324. As on the date of this Placement Document, our funding requirements are based on management estimates and our current business plans and is subject to change in light of changes in external circumstances, costs, business initiatives, other financial conditions, business strategies, and other commercial and technical factors, including interest rates, exchange rate fluctuations and other charges, and the financing and other agreements entered into by IndiGrid, and have not been appraised by any bank or financial institution or other independent agency.

While we will use the Net Proceeds towards repayment/ prepayment, in full or in part, of certain outstanding borrowings and towards general corporate purposes, the amount of Net Proceeds to be used will be based on our management's discretion, in curding in relation to the specific borrowings availbed by IndiGrid that shall be repaid or prepaid. However, our internal management estimates may exceed fair market value or the value that would have been determined by third party appraisals and as a consequence, we may be required to reschedule or reallocate our capital expenditures which may have an adverse impact on our business, results of operations and cash flows.

The deployment of the Net Proceeds will be at the discretion of the IM Board. We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in input cost, and other financial and operational factors. Accordingly, Bidders will need to rely upon our management's judgment with respect to the use of proceeds. If we are unable to deploy the Net Proceeds in a timely or an efficient manner, it may affect our business and results of operations.

16. Any project that we acquire, which is still under construction and development, or our under-construction assets may be subject to cost overruns or delays.

We hold and may acquire transmission and BESS projects, renewable energy projects and other projects, which are still under construction and development, in accordance with the InvIT Regulations and subject to Unitholders' approval in certain cases. The development of such projects is subject to substantial risks, including various planning, engineering and construction risks. Transmission projects typically require substantial capital outlays and a long gestation period of between three to four years before the commencement of commercial operation. The owner of a transmission project generally begins generating a return on investment after the commencement of commercial operation, which may be delayed due to various reasons. Additionally, the development and construction of renewable energy projects involve numerous risks and uncertainties and require extensive research, planning and due diligence. Before we can determine whether a renewable energy project or energy storage project is economically, technologically or otherwise feasible, we may be required to incur significant capital expenditure for land and interconnection rights, regulatory approvals, preliminary engineering, equipment procurement, legal and other work.

Under the InvIT Regulations, we can only acquire a project which has received all requisites approvals and certifications for commencing operations. Several key steps must be taken before transmission and BESS and solar energy projects start to operate, recover costs and generate revenue, including:

- conducting surveys and investigations for the proposed route;
- entering into construction contracts and long-term service agreements with contractors with sufficient expertise;
- purchasing necessary transmission equipment;
- acquiring land with satisfactory land use permissions from land owners and local authorities;
- securing necessary project approvals, licences and permits in a timely manner;
- procuring sufficient equity, debt, mezzanine and other necessary financing on competitive terms;
- entering into or securing transmission and tariff-related arrangements including, TSAs, RSAs and tariff orders, BESPAs and PPAs or other arrangements on acceptable terms; and
- completing transmission on identified lines or construction on schedule.

During the construction and development phases of a project we may also suffer from the unavailability of equipment or supply, work stoppages, labour or social unrest, adverse weather conditions, natural calamities, delays in construction, delays in clearances, unforeseen construction-related and/or operational delays and defects, delivery failures by contractors, increased cost of raw materials, unavailability of adequate funding, inability to secure rights of way for certain portions of the transmission line, failure to complete projects within budget and in accordance with the required specifications, additional interest costs incurred due to project delays, legal actions brought by third parties, changes in government, regulatory and tax policies, foreign exchange movements, adverse trends in the transmission industry or general economic conditions in India. Delay in constructing infrastructure, such as bay ends at connecting substations, which are not within the scope of the project, but are critical for the operation of the project may also delay the construction of the project. Certain Portfolio Assets have also filed petitions in this regard. For details, please see the section entitled "*Litigation*" on page 379. For example, the construction of the transmission lines of the BDTCL and JTCL was delayed by more than a year due to delays in obtaining approvals and clearances from relevant authorities. The commissioning of the PKTCL was delayed due to among other things delay in obtaining forest clearances, strikes and other *force majeure* events. Additionally, the construction of the OGPTL transmission lines was delayed due to, amongst other factors, unseasonal and heavy rainfall and flood in Odisha and delay in the grant of forest clearance to OGPTL in respect of the forest land acquired for the construction of the said transmission lines. Similarly, the construction of the 400 kV D/C Aligarh - Prithala line, 400/220 GIS Prithala Substation, Prithala-Kadarpur 400 kV D/C HTLS line and 400/220 kV substation at Kadarpur by GPTPL was adversely affected due to amongst others, delay in obtaining the required forest approval for diversion of forest along the Aligarh canal on account of lack of administrative clarity and failure of HPVL in sharing the Control and Relay Protection System in a timely manner. Additionally, the scheduled commercial operations date of Kallam has been delayed since June 30, 2023 and construction was completed only in December 2023.Any delays in procuring approvals and permits for the transmission assets that we acquire in the future could impact construction timelines, which in turn could affect our ability to operate them.

17. Our businesses could be adversely affected if we are unable to maintain or renew our existing regulatory approvals due to changes to the regulatory environment and the laws, rules and directives of the GoI.

The power industry in India is regulated by a wide variety of laws, rules and directives issued by government and relevant regulatory authorities. The timing and content of any new law or regulation is not within the control of the Portfolio Assets and any changes to current regulatory bodies or the existing regulatory regime could have an impact on our ability to obtain the requisite regulatory approvals in a timely manner or at all. Our inability to obtain and maintain regulatory approvals in a timely manner or at all could adversely affect on the business, prospects, financial condition, results of operations and cash flows of the Portfolio Assets. For example, the Electrical Inspectorate of the Government of Tamil Nadu (the "**EI**") has issued a yearly inspection report of HV installations at the project managed by TKSPL highlighting certain defects in its premises. While TKSPL has responded to the report highlighting the rectified defects, there has been no further communication from the authority in this regard. If the EI issues any further orders or takes any action against TKSPL, its results of operations and cash flows may be adversely affected. In addition, the construction of the 400 kV D/C Aligarh-Prithala line, 400/220 GIS Prithala Substation, Prithala-Kadarpur 400 kV D/C HTLS line and 400/220 kV substation at Kadarpur by GPTPL was adversely affected due to amongst others, delay in obtaining the required forest approval for diversion of forest along the Aligarh canal on account of lack of administrative clarity and failure of HPVL in sharing the Control and Relay Protection System in a timely manner.

We also depend on part on government policies that support renewable energy and enhance the economic feasibility of developing renewable energy projects. The Government of India has historically provided incentives that support the generation and sale of renewable energy. If governmental support of renewable energy development, particularly solar energy, is discontinued or reduced, it could have an adverse effect on our ability to obtain financing, affect the viability of new renewable energy projects constructed based on current tariff and cost assumptions or impact the profitability of our existing projects. We may also be subject to the risk of being required to refund grant received from governmental or regulatory authorities for development of our asset on account of non-compliances with the terms and conditions stipulated in the underlying documentation.

The laws and regulations governing the power industry have become increasingly complex and govern a wide variety of issues, including, amongst others, billing and collections, allocation of transmission charges among LTTCs, rights of way, land acquisitions, calculations of availability and forest clearances. Any change in policy for such issues may result in our inability to meet such increased or changed requirements and the operation of the Portfolio Assets may be adversely affected. Further, there can be no assurance that the GoI or any state government in India will not implement new regulations and policies which will require us to obtain additional approvals and licences from the government and other regulatory bodies or impose onerous requirements and conditions on their operations, which could result in increased compliance costs as well as divert significant management time and other resources. Future changes in laws and regulations and the failure or apparent failure to address any regulatory changes or enforcement initiatives could have an adverse impact on the business and future financial performance of our Portfolio Assets, impair their ability to declare dividends to IndiGrid, harm our reputation, subject us to penalties, fines, disciplinary actions or suspensions or increase the risk of litigation and have an adverse effect on the price of the Units.

Our BESS Assets are subject to significant uncertainty arising from evolving policy and market frameworks at both the central and state levels including in relation to business, regulatory and environmental compliances required. by State Electricity Regulatory Commissions. Changes in, or disparate implementation of, regulations and orders of the CERC and SERCs, may materially affect dispatch instructions, constrain or enable revenue stacking strategies, and alter the recovery of fixed and variable costs which may in turn have an adverse impact on our business, financial results and cash flows.

18. Some of our business is dependent on the regulatory and policy environment affecting the renewable energy in India.

The regulatory and policy environment in which we operate is evolving and subject to change and we will depend in part on government policies that support renewable energy and enhance the economic feasibility of developing renewable energy projects. The GoI provides incentives that support the generation and sale of renewable energy, and additional legislation is regularly being considered that could enhance the demand for renewable energy and obligations to use renewable energy sources. If any of these incentives or policies are adversely amended, eliminated or not extended beyond their current expiration dates, or if funding for these incentives is reduced, or if governmental support of renewable energy development, particularly solar energy, is discontinued or reduced, it could have an adverse effect on our ability to obtain financing or impact the profitability of our Solar Assets. The GoI has accorded renewable energy "must-run" status, which means that any renewable power that is generated must always be accepted by the grid. However, certain state electricity boards may order the curtailment of renewable energy generation despite this status and there have been instances of such orders citing grid safety and stability issues being introduced in the past. This may occur as a result of the state electricity boards purchasing cheaper power from other sources or transmission congestion owing to a mismatch between generation and transmission capacities. There can be no assurance that the GoI will continue to maintain the "must-run" status for renewable energy or that the state electricity boards will not make any orders to curtail the generation of renewable energy.

There is no assurance that the GoI will continue to provide incentives and allow favourable policies to be applicable to our Solar Assets. The GoI may reduce or eliminate these economic incentives for political, financial or other reasons. In addition, policy incentives may be available for a limited period, and there can be no assurance that the validity of such schemes will be extended.

Any change in policy that results in the curtailment of renewable energy generation may have an adverse effect on our business. If governmental authorities do not continue supporting, or reduce or eliminate their support for, the development of renewable energy projects, it may become more difficult to obtain financing, our economic return on certain projects may be reduced and our financing costs may increase. A delay or failure by governmental authorities to administer incentive programmes in a timely and efficient manner could also have an adverse effect on our Solar Assets. These may, in turn, have a material and adverse effect on our business, financial condition, results of operations and prospects.

19. The Investment Manager may not be able to execute our growth strategy successfully.

Our growth strategy includes expanding our portfolio of project companies through acquisitions in order to maximize distributions for our Unitholders, improve portfolio diversification and enhance flexibility. The Investment Manager undertakes the management and control of our business and growth strategy. Except in respect of transactions equal to or greater than 25% of the InvIT Assets which require prior Unitholders' approval, an issuance of Units to fund the future acquisitions (depending on the nature of the fund-raise) or related party acquisitions, sales or investments exceeding certain thresholds, no Unitholder may have the opportunity to evaluate the Investment Manager's decisions regarding specific strategies used or the acquisitions made on our behalf, or the terms of any such acquisitions.

The primary component of our current growth strategy is to acquire additional infrastructure projects within the transmission and BESS and solar energy sectors. There can be no assurance that the Investment Manager will be able to implement this strategy successfully due to amongst other things, non-receipt of required approvals, non-availability of funding and breach of obligations by counterparties to the relevant definitive agreements. While the Investment Manager has entered into various definitive documentation with third parties in relation to the acquisition of assets, there can be no assurance that the Investment Manager will be able to acquire such projects or assets on favorable terms and in a timely manner, or at all. Further, there can be no assurance that it will be able to expand our portfolio at all, or at any specified rate or to any specified size. The Investment Manager may not be able to make acquisitions or investments or divestments of transmission and BESS and solar energy projects on favorable terms or at all. Even if the Investment Manager was able to successfully make additional acquisitions or investments, there can be no assurance that such acquisitions or investments will produce incremental distributions to our Unitholders and improve our prospects or overall financial condition. We may also be exposed to liability with the acquisition of additional transmission and BESS and solar energy projects.

In addition, as transmission and BESS and solar energy projects are illiquid in nature, it also may make it difficult for us to sell our Portfolio Assets. Further, pursuant to the InvIT Regulations, we are required to hold an infrastructure asset for a minimum period of three years from the date of purchase.

The Investment Manager expects to face competition for acquisition opportunities, and competitors for these opportunities may have greater financial resources or access to financing on more favorable terms than us. Further, it may be that the types of investments sought by the Investment Manager are small in number. This competition, and possible limits in the number of available opportunities, may limit acquisition opportunities, lead to higher acquisition prices, or both.

In general, acquisitions involve a number of risks, including the inability to secure or repay the financing required to acquire large transmission and BESS and solar energy projects the failure to retain key personnel of the acquired business and the failure of the acquired business to achieve expected results. Our Investment Manager may fail to identify material risks or liabilities associated with the acquired business prior to its acquisition, such as repayment or default risks related to existing debt of assets that we may acquire. The execution of our acquisition growth strategy may also divert the Investment Manager's attention from the management of IndiGrid.

Additionally, acquisition of transmission and BESS and solar energy projects is subject to substantial risks, including the failure to identify material problems during due diligence (for which we may not be indemnified), the risk of over-paying for assets or not making acquisitions on an accretive basis, the ability to collect revenues and, if the projects are in new markets, the risk of entering markets and technologies where the Investment Manager has limited or no experience. In addition, any control deficiencies in the accounting systems of the assets that we acquire may make it more difficult to integrate them into our existing accounting systems. While the Investment Manager has performed and will perform due diligence on our prospective acquisitions, we may not be able to discover all potential operational deficiencies in such projects. The integration and consolidation of acquisitions requires substantial human, financial and other resources and may divert the Investment Manager's attention from our existing business concerns, disrupt our ongoing business or otherwise fail to be successfully integrated. There can be no assurance that any future acquisitions will perform as expected or that the returns from such acquisitions will support the financing utilized to acquire them or maintain them. As a result, the consummation of acquisitions may have a material adverse effect on the Investment Manager's ability to execute our growth strategy, which could have a material adverse effect on our business, cash flow and ability to make distributions to our Unitholders.

20. Future acquisitions and proposed business strategies may expose us to risks and have an adverse impact on our operations.

Future acquisitions may entail integration and management of these future assets to realize economies of scale and control costs, as well as other risks, including diversion of management resources otherwise available for ongoing development of our business. These acquisitions may also be in sectors where we do not necessarily have prior experience of operations, such as renewable energy projects involving wind or hydel energy generation. Such acquisitions or business strategies may cause disruptions to our operations and divert management's attention away from day-to-day operations. Newly acquired assets may require significant management attention that would otherwise be devoted to our ongoing business. Our management may have to spend a considerable amount of time to ensure a smooth handover of the future assets and align the operating philosophy of the future assets with ours. Despite pre-acquisition due diligence, we do not believe that it is possible to fully understand an asset before it is owned and operated for an extended time. Further, the expected benefit, synergies or efficiencies from such acquisitions may take longer than expected to achieve or may not be achieved at all.

Further, any acquisitions or alliances in the future may expose us to the risk of unanticipated business uncertainties or legal liabilities including defects in title and lack of appropriate approvals/ licenses in place for which the relevant parties in relation to such future assets may or may not indemnify us.

21. We may not be able to successfully fund future acquisitions of new projects due to the unavailability of debt or equity financing on acceptable terms or at all, which could impede the implementation of our acquisition strategy and negatively impact our business.

We will rely on debt and equity financing to expand our portfolio of projects through acquisitions in the future, which may not be available on favourable terms or at all.

Debt financing to fund the acquisition of a project may not be available on short notice or may not be available on acceptable terms. Since the timing and size of acquisitions cannot be readily predicted, we may need to be able to obtain funding on short notice to benefit fully from opportunities. However, under applicable law, the aggregate consolidated borrowings and deferred payments net of cash and cash equivalents of IndiGrid cannot exceed 70% of the value of our assets. As our borrowings and payments have exceeded 49%, we have obtained a credit rating of "AAA" or equivalent for the consolidated borrowing and proposed borrowing under the InvIT Regulations. In addition, such level of indebtedness of the Portfolio Assets may impact our ability to borrow without prior approval of our Unitholders.

Restrictions imposed by the Reserve Bank of India may limit our ability to borrow overseas for projects under development and hence could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness. In addition, there can be no assurance that any required regulatory approvals or borrowing in foreign currencies will be granted to us without onerous conditions, or at all.

Debt financing may increase our vulnerability to general adverse economic and industry conditions by limiting our flexibility in planning for or reacting to changes in our business and our industry. We will also be subject to the risk that certain covenants in connection with any future borrowings may limit or otherwise adversely affect our operations and our ability to acquire additional projects or undertake other capital expenditure by requiring us to dedicate a substantial portion of our cash flows from operations to payments on our debt.

We may also fund the consideration (in whole or in part) for future acquisitions through the issuance of additional Units. Such issuances may result in the dilution of the interests held by existing Unitholders. IndiGrid may not be able to complete the issuance of the required number of Units on short notice or at all due to a lack of investor demand for the Units at prices that it considers to be in the interests of then-existing Unitholders. As a result of a lack of funding, we may not be able to pursue our acquisition strategy successfully. Potential vendors may also view the prolonged time frame and lack of certainty generally associated with the raising of equity capital to fund any such purchase negatively and may prefer other potential purchasers.

22. Our operations are subject to environmental, health and safety laws and regulations.

Our operations are subject to environmental laws and regulations in the various locations in India where our Portfolio Assets operate. Although most environmental approvals were obtained prior to completion of construction of the Portfolio Assets, environmental laws and regulations in India have, and may continue to become, more stringent. Stricter laws and regulations, or stricter interpretation of the existing laws and regulations, may impose new liabilities on the Portfolio Assets, which could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. The operations of our Portfolio Assets may also be impacted by various regulatory and judicial orders and pronouncements in relation to the energy section. For example, on December 19, 2025, the Supreme Court of India delivered a judgment on the protection of the endangered Great Indian Bustard ("**GIB**") in GIB sensitive areas of Rajasthan and Gujarat, through which the Supreme Court adopted a revised operating framework for renewable energy projects situated in such areas. We cannot assure that such order will not result in implications to our capital expenditure, financial condition, results of operations and cash flows.

The employees and contractors on our Portfolio Assets are exposed to risks. If safety procedures are not followed or if certain materials used in our equipment is improperly handled, it could lead to injuries to employees, contract labourers or other persons, damage our Portfolio Assets' properties and properties of others or harm the environment. Due to the nature of these materials, we may be liable for certain costs, including costs for health-related claims, or removal or treatment of hazardous substances, including claims and litigation from or relating to current or former employees for injuries arising from occupational exposure to materials or other hazards at the project sites of our Portfolio Assets. This could result in significant disruption in our businesses and legal and regulatory actions, which could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows and adversely affect our reputation. For example, a fatal accident at the time of construction along the transmission line set up by BDTCL resulted in the death of eight labourers.

23. We may lose tariff revenues or fail to receive payments and incur significant repair and replacement costs in the event our Portfolio Assets are rendered inoperable due to force majeure events.

In the event that any of our transmission and BESS projects or solar projects are rendered inoperable due to force majeure events, there can be no assurance that we will be able to successfully apply to obtain a deemed availability certificate to receive tariffs under the force majeure provisions under the applicable TSA or payments made under BESPAs or receive payments under the relevant PPAs, or that our insurance will reimburse us for repair and replacement costs, either partially or fully for the period of such force majeure event, which could materially affect our business, prospects, financial condition, results of operations and cash flows.

One of the Portfolio Assets, BDTCL, had its 765 KV S/C Bhopal – Indore transmission line rendered inoperable for approximately 51 days in Fiscal 2015 when gale force winds damaged a tower. BDTCL received a deemed availability certificate for the same period. Additionally, there was a delay in the construction of the OGPTL transmission lines due to heavy rainfall and flood in Jharsuguda and Sundargarh districts of Odisha, among other factors. The OGPTL project received energization approval on August 23, 2017. However, due to non-availability of bays at the PGCIL substation at Sundargarh (Jharsuguda), the said line was deemed to be commissioned with effect from August 30, 2017. ENICL, another Portfolio Asset, has had its 400 KV D/C Purulia – Bihar Sharif transmission line rendered inoperable twice. It was rendered inoperable in August 2016 until July 2017 and was rendered inoperable again in August 2018. In both instances, flooding and heavy rainfall damaged the transmission towers. Further, in 2016, an agitation in Haryana by the Jat community, wherein a mob attacked the sub-stations of JKTPL resulted in complete breakdown of the transmission system of JKTPL. Further, another portfolio asset, JTCL, had its 400 kV Jabalpur-Bina transmission line rendered inoperable because of tower collapse caused by heavy wind and squall like conditions for approximately 50 days in Fiscal 2020 Similarly, 400 kV Silchar – Misa Transmission Line under NER-II TL encountered a tripping between July 2024 to August 2024 due to phase to phase, phase to earth, insulator failure and other faults. We cannot assure you that such instances will not occur in the future and that any future force majeure events will not have an adverse effect on our business, prospects, financial condition, results of operations and cash flows.

24. The ability of our Project Managers to ensure that our transmission and BESS projects or solar are fully operational at all times may be subject to the limitations of the power grid, existing equipment or operational risks outside of their control.

Power grid outages at the state, regional or national level disrupt the transmission of electricity and could result in performance being below expected levels. For example, there could be failure in the transmission towers, power conductors or insulators. In addition, transmission and BESS projects and our solar rely on sophisticated machinery that is built by third parties, which may malfunction. Injuries to people or property may also occur in the ordinary course of carrying on our business, which could subject us to significant disruptions in our business and legal and regulatory actions. For example, a fatal accident along the transmission lines set up by BDTCL at the time of construction, resulted in the death of eight labourers. In September 2020, a contractor employee died due to anaphylactic shock caused by honeybee swarm attack while working on the 400 kV D/C Purulia-Ranchi transmission line of PKTCL. The operation of our projects also involves many operational risks, some of which are outside our control, including explosions, fires, thefts, damages due to earthquakes and other natural disasters, the breakdown or failure of transmission or generation equipment or other equipment or processes, operating below expected levels, labour disputes, civil unrest, terrorism and war. For example, the construction of the OGPTL transmission lines was delayed due to, amongst other factors, unseasonal and heavy rainfall and flood in Odisha and delay in the grant of forest clearance to OGPTL in respect of the forest land acquired for the construction of the said transmission lines Any disruption in the operations of our projects could negatively impact the reputation of IndiGrid, the Project Managers, the Investment Manager or the Sponsor among our customers, stakeholders, regulators or within our industry. Further, operations at GGEPL power plant were interrupted by a stator earth fault on March 21 2025. The occurrence of any of the above events could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

Further, the performance and longevity of batteries in the BESS Assets are subject to various uncertainties, including but not limited to temperature variations, environmental conditions, charging and discharging frequency, depth of charge, and charging speed (C-rate). In India, characterized by high ambient temperatures and humid monsoon conditions, the rate of battery degradation may be accelerated, potentially shortening their useful life, fast capacity degradation and increasing the need for additional capacity or more frequent replacement. In practice, multi-use operations, the actual efficiency, usable energy, and overall battery health may not align with the performance specifications promised by vendors. This discrepancy could result in the system failing to meet availability targets as outlined in contractual agreements, potentially leading to penalties and reduced revenue generation. As a consequence, the costs associated with capacity additions, maintenance, degradation, upgrades, and replacements may exceed initial projections. In the event that these costs cannot be fully recovered through regulatory frameworks or market conditions, the Trust’s cash flow, distributions, and asset value could be materially and adversely affected.

25. Critical aspects of our Portfolio Assets have a limited duration.

Our TSAs have a term of 35 years except the TSAs in respect of ENICL and JKTPL which have a term of 25 years. The renewal of the TSA in respect of ENICL is subject to the discretion of the CERC while the extension of the TSA in respect of JKTPL is subject to the discretion of Haryana Vidyut Prasaran Nigam Limited. There can be no assurance that we can replace our physical assets or renew our TSAs on acceptable terms, if at all.

While the TSAs have a duration of 35 years, the transmission licenses issued by CERC are valid for a period of 25 years from the date of issue of the transmission license. There can be no assurances that these licenses will be renewed.

Our BESPAs generally have a term of 12 years and may require us, at expiry or early termination, to remove or transfer assets or clear sites at our cost, and there is no assurance we can renew or replace BESPAs on acceptable terms, if at all. The BESPAs impose stringent operational standards, including minimum availability (typically 95%), annual dispatchable capacity degradation guarantees, with liquidated damages (including, in some cases, up to twice the capacity charges for unavailable capacity), mandatory augmentation at our cost within prescribed timelines, and rights of the off-taker to set off such amounts against monthly invoices or withhold tariff where efficiency falls below specified thresholds. Delays in commissioning beyond the scheduled date can trigger per-day liquidated damages, encashment of our performance bank guarantee, automatic reduction of uncommissioned capacity and termination for the balance. We are responsible for scheduling compliance and deviation/DSM liabilities, as well as metering, auxiliary consumption, and interconnection costs up to the delivery point. Upon the occurrence of any extended force majeure events, may result in termination with limited or no compensation. Upon any default, the off-taker may terminate, encash the performance bank guarantee, recover liquidated damages and pursue lender substitution or step-in rights. Although payment security mechanisms may be available, set-off rights can adversely affect our cash flows during under-performance, and there is no assurance we will be able to acquire or replace BESS assets or enter into replacement BESPAs on acceptable terms when required.

The Power Purchase Agreements for our solar projects are fixed-term agreements and typically allow the off-taker to terminate the agreement upon the occurrence of certain events, including the failure to:

- comply with prescribed minimum shareholding requirements;
- complete the project construction or connect to the transmission grid by a certain date;
- supply the minimum amount of power specified;
- comply with prescribed operation and maintenance requirements;
- obtain regulatory approvals and licenses;
- comply with technical parameters set forth in grid codes and regulations; and
- comply with other material terms of the relevant Power Purchase Agreement.

As a result, we cannot provide any assurance that Power Purchase Agreements containing such provisions will not be terminated. Moreover, there can be no assurance that, in the event of termination of a Power Purchase Agreement, we will not be exposed to additional legal liability or be able to enter into a replacement Power Purchase Agreement. Any replacement Power Purchase Agreement may be on terms less favourable to us than the Power Purchase Agreement that was terminated.

Further, the Power Purchase Agreements provide for a fixed term, subject to some variations and extension as permitted under the agreements or as may be granted by the off takers. There is no assurance that off-takers will grant any extensions in the future. Further, the tenure of new PPAs has been reduced to 20 years from 25 years under the Hybrid Project Competitive Bidding Guidelines, which may be extended up to 25 years in certain circumstances. In addition, there can be no assurance that IndiGrid will be able to successfully acquire new assets to replenish its portfolio once the term of the existing Power Purchase Agreements is completed.

26. Changes in technology may render our current technologies obsolete or require us to make substantial capital investments. Failure to respond to current and future technological changes in an effective and timely manner may adversely affect our business and results of operations.

The solar energy and BESS sectors are subject to rapid technological change. Advances in solar modules, inverters, tracking systems, and energy management software, as well as improvements in BESS chemistries, system architecture, power conversion, controls, and safety systems, may render our existing technologies less efficient or obsolete. In particular, newer BESS solutions with higher energy density, longer cycle life, more advanced battery management and thermal systems, or improved software may outperform our installed systems, resulting in comparatively inferior performance, higher degradation, or increased lifecycle costs.

Keeping pace with these developments may require significant capital investments. In addition to the costs of upgrading or replacing solar equipment, energy storage projects may necessitate periodic augmentation to maintain contracted capacity, replacement of degraded cells or modules, software and controls upgrades, and retrofits to comply with evolving safety codes and standards. Such expenditures along with potential downtime, permitting delays, and supply chain constraints—may not be recoverable through revenues or pass-through mechanisms and could adversely affect our results of operations.

Energy storage projects also introduce distinct operational risks that may amplify the impact of technological change, including uncertain degradation and cycle-life, safety risks such as thermal runaway and fire, interoperability and integration challenges with grid and control systems, and heightened cybersecurity exposures. Market and regulatory changes affecting interconnection, dispatch, capacity accreditation, and tariff structures may further require control system upgrades or operating profile changes and could reduce expected revenues. If we fail to anticipate or implement technological improvements in a timely and cost-effective manner, secure compatible replacement or augmentation equipment, or comply with evolving standards and market requirements, our business and results of operations may be adversely affected.

27. Upgrading or renovation work or physical damage to our Portfolio Assets may disrupt their operations.

Our Portfolio Assets may need to undergo upgrading, renovation or repair work from time to time to retain their optimal operating condition and may also require unforeseen ad hoc maintenance or repairs in respect of faults or problems that may develop or because of changes pertaining to operations and maintenance. Our Portfolio Assets may suffer some disruptions, and it may not be possible to continue operations on areas affected by such upgrading or renovation work. In addition, physical damage to transmission and BESS and solar energy projects resulting from fire, severe weather or other causes may lead to a significant disruption to, or a long-term cessation of, business and operations and, together with the foregoing, may result in unforeseen costs, which may have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

28. Grid disturbances or failures could adversely affect our reputation and relations with regulators and stakeholders.

Grid disturbances can arise due to the imbalance between power being delivered to, and removed from, the transmission system. For example, in July 2012, India experienced grid disturbances, which caused large-scale power outages in three of India's five interconnected power grids. The grid disturbances were caused by a combination of factors, including weakened inter-regional corridors due to multiple outages on other transmission lines, a delay or refusal by power generators to reduce power generation at the time of reduced demand and overdrawing of electricity by some of the provincial utilities. Further, in April 2020, grid disturbances were caused due to the nationwide scheduled blackout aimed to show support for workers maintaining the country's essential services. In October 2020, Mumbai experienced a grid failure and consequent power outage due to failure of two transmission lines and the overloading of the remaining transmission system.

Although our Transmission Assets deploy methods for maintenance, load dispatch and communications systems to avoid such outcomes, the grid could again experience disturbances and such disturbances could adversely affect our reputation, business, prospects, financial condition, results of operations and cash flows. For instance, in May 2020, due to bad weather, one of the transmission lines operated by JKTPL, our Portfolio Asset experienced overvoltage and the substation was temporarily inoperable due to blackout.

29. Systems failures, cyber security breaches and attacks and resulting interruptions in the operation of our Projects could adversely affect our business, financial condition, cash flows and results of operations.

The proper functioning of our technology infrastructure is essential to the conduct of our business. Our technological systems may experience service interruptions or other performance problems because of, amongst other, hardware and software defects or malfunctions, unexpected high volume of transactions, cyberattacks and cyber-security breaches, infrastructure changes, human error, natural disasters, power losses, disruptions in telecommunications services, unauthorized access, fraud, military or political conflicts, terrorist attacks, legal or regulatory takedowns, computer viruses, ransomware, malware, or other events. In some instances, we may not be able to identify the cause of these performance problems within a reasonable period of time. Further, as techniques used to obtain unauthorized access to or sabotage systems change frequently and may not be known until launched against us, we may be unable to anticipate, or implement adequate measures to protect against, these attacks. In addition, evolving national cybersecurity regulations within the power sector may impose stringent requirements, including mandatory audits, incident reporting, and the strengthening of control networks. Compliance with these regulations could necessitate substantial capital and operational expenditure, as well as periodic upgrades to the cybersecurity infrastructure. Failure to adequately address these risks may not only jeopardize the security and reliability of operations but also expose the Trust to regulatory and financial risks.

Our insurance coverage may not be sufficient to cover all of our losses that may result from interruptions in our service as a result of systems failures and similar events and we may need to expend significant financial and development resources to analyze, correct, or eliminate errors or defects or to address and eliminate vulnerabilities. Any failure to timely and effectively resolve any such errors, defects, or vulnerabilities or recover data could adversely affect our business, financial condition, cash flows and results of operations. There is no assurance that we will be able to successfully claim such insurance coverage.

30. Our results of operations could be adversely affected by strikes, work stoppages or increased wage demands by employees or other disputes with employees

The Project Managers has full-time employees focused on day-to-day operations and maintenance and the Portfolio Assets have appointed third party contractors to operate and maintain our Portfolio Assets. Our Portfolio Assets may experience disruptions in their operations due to disputes or other problems with labour, and efforts by workers to modify compensation and other terms of employment may divert management's attention and increase operating expenses. The occurrence of such events could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows.

The Project Managers and our Portfolio Assets enter into contracts with independent contractors to complete specified assignments in respect of our Portfolio Assets and these contractors are required to source the labour necessary to complete such assignments. Although the Project Managers and our Portfolio Assets do not engage these labourers directly, under Indian law they may be held responsible for wage payments to labourers engaged by contractors, should the contractors default on wage payments. Any requirement to fund such payments may materially and adversely affect the business, prospects, financial condition, results of operations and cash flows. Furthermore, pursuant to the provisions of the Contract Labour (Regulation and Abolition) Act, 1970, the Project Managers and our Portfolio Assets may be required to absorb a portion of the wage payments due to such contract labour that are engaged by independent contractors, as if they were their employees.

31. Opposition from local communities and other parties may adversely affect our financial condition, results of operations and cash flows.

The construction and operation of our Portfolio Assets may have significant consequences on grazing, logging, agricultural activities, mining and land development as well as on the ecosystem of the affected areas. The environmental impact of a particular project typically depends on the location of the project and the surrounding ecosystem. Further, the operation of our Portfolio Assets may disrupt the activities and livelihoods of local communities, especially during the project construction period. Repair work on a project may be delayed in order to resolve local community concerns. Any such opposition may adversely affect our financial condition, results of operations and cash flows, and harm our reputation.

Our Portfolio Assets could be subject to opposition, such as through litigation or by other means, from public interest groups, local communities or non-governmental organizations, in relation to the environmental impact of their transmission projects or in relation to land acquisition, acquisition and use of rights of way and construction activities for their projects and the consequent impact on the livelihood of affected communities.

Several of the parcels of land on which the Transmission Assets' existing substations are situated were acquired by the GoI or the relevant state governments and were thereafter awarded to us. Land so acquired may remain subject to disputes after it is transferred to our Transmission Assets. In addition, there are various court proceedings pending against the Transmission Assets with respect to land on which the Transmission Assets have right of way, for the purposes of construction of the transmission lines, most of which relate to demands for increased compensation by landowners. For example, the lands on which the transmission lines of, including, OGPTL, PrKTCL and GPTPL are situated are subject to litigation in relation to right of way claims from land owners, which caused delays in the operation of the transmission lines. For further details, please see the section entitled "*Litigation*" on page 379.

32. Our lenders have substantial rights to determine how we conduct our business which could put us at a competitive disadvantage and our borrowings are secured by all of the assets of the Portfolio Asset and their shares.

Loans under the loan agreements are secured by, amongst others, (i) first ranking pari passu charge over all present and future immovable assets; (ii) first ranking pari passu charge on all tangible movable assets, including movable plants and machinery, machinery spares, tools and accessories and all other movable assets and current assets, both present and future; and (iii) first charge, including by way of hypothecation, over all accounts, both present and future, that may be opened in accordance with the loan documents; (v) assignment by way of security or charge by way of hypothecation, over all right, title, interest, claims, benefits and demands relating to, (a) the agreements in relation to the Project (the "**Project Agreements**"); (b) clearances obtained pertaining to the project; (c) any letter of credit, guarantee, including contractor guarantees, liquidated damages, consent agreements, side letters or performance bond provided by any party to the Project Agreements; and (d) insurance contracts and insurance proceeds pertaining to the project; and (vi) pledge of the equity share capital of the Portfolio Assets, in terms of the financing agreements.

The securities of the following Portfolio Assets have been pledged, as on December 31, 2025, as detailed in the table below:

TSESPL		IndiGrid has pledged 65% of the equity shares of TSESPL
TSEP		IndiGrid has pledged 99% of the equity shares of TSEP
TSET		IndiGrid has pledged 99% of the equity shares of TSET

For further details, please see sections entitled "*Description of Portfolio Assets*" and "*Financial Indebtedness and Deferred Payments*" on pages 30 and 327 respectively.

In the event of a default under these loan agreements, there is a risk that the lenders could enforce the pledge by way of court procedure followed by a public auction of the pledged shares. Further, we may be required to pledge the shares of the Portfolio Assets for any refinanced or additional indebtedness. If we lose ownership or control of the Portfolio Assets, or of all or some of their assets as a result of the enforcement of security by a lender, our business, financial condition, results of operation, cash flows and ability to make distributions to our Unitholders would be adversely affected.

33. We have a substantial amount of outstanding borrowings, which requires significant cash flows to service, and limits our ability to operate freely.

As of September 30, 2025, our consolidated total borrowings was ₹ 219,639.70 million. For further details, please see the section entitled "*Financial Indebtedness and Deferred Payments*" on page 327.

We intend to finance the majority of the cost of our future acquisitions of transmission and BESS and solar energy projects through various means of funding, including debt and therefore may to incur substantial additional borrowings in the future. Our ability to meet our debt service obligations and repay our outstanding borrowings will depend primarily on the cash generated by our business. Further, we have, in the past been given a corporate credit rating of 'CRISIL AAA/Stable' by CRISIL, 'IND AAA'/Stable by India Ratings and 'ICRA AAA (Stable)'by ICRA. Any adverse revisions to such credit ratings by rating agencies may adversely affect our ability to raise additional financing and may have a material adverse effect on our business, financial condition, cash flows and results of operations.

Further, we may be required to refinance our outstanding borrowings in the future. There is no assurance that we will be able to obtain such financing, on favourable terms, or at all, which may have a material adverse effect on our business, financial condition, cash flows and results of operations and may result in a lower distribution to Unitholders.

We cannot assure you that we will generate sufficient cash to service existing or proposed borrowings or fund other liquidity needs, which could have an adverse effect on our business, cash flows and results of operations.

34. As direct or an indirect shareholder of our Portfolio Assets, IndiGrid's rights are subordinated to the rights of creditors, debt holders and other parties specified under Indian law in the event of insolvency or liquidation of any of the Portfolio Assets.

In the event of liquidation of any of the Portfolio Assets, secured and unsecured creditors of such Portfolio Assets will be entitled to payment from the liquidation proceeds in priority to us in our capacity as a direct or indirect equity shareholder of the Portfolio Assets. Under the Insolvency and Bankruptcy Code, 2016, in the event of winding-up of any of the Portfolio Assets, workmen's dues and debts due to secured creditors which rank *pari passu* are required to be paid in priority over all other outstanding debt, followed by wages and salaries of employees, debts due to unsecured creditors, any amounts due to the central or state government, any other debts, preference shareholders and equity shareholders. Further, amounts payable to us in respect of any unsecured debt issued by our Portfolio Assets will be subordinated in the manner set forth above. The operations of our Portfolio Assets also depend on our relationships with other shareholders and stakeholders. Please see the section entitled "*Our lenders have substantial rights to determine how we conduct our business which could put us at a competitive disadvantage and our borrowings are secured by all of the assets of the Portfolio Asset and their shares*" below.

Under the terms of the TSAs, BESPAs and PPAs executed by our Portfolio Assets, there may be certain limitations to create or subsist any encumbrance over all or any of their rights and benefits under these agreements. Direct and indirect tax assessments of our Portfolio Assets may have been initiated for only few years by the relevant government department and authorities and there may be additional tax liabilities, including if pending tax litigation is ruled against us.

Accordingly, amounts payable to us in respect of any unsecured debt subscribed by us, will, upon enforcement of security over such receivables, letters of credit or the other assets of the Portfolio Assets, be subordinated to amounts payable in respect of statutory dues and operating and maintenance expenses (including operating expenses payable to the Portfolio Assets, if any), as well as to amounts payable to secured lenders.

35. Our insurance policies may not provide adequate protection against various risks associated with our operations.

Our operations are subject to a number of risks generally associated with the transmission of electricity. We have obtained insurance policies for the majority of our Portfolio Assets to cover risks including loss or damage from fire, flood, storm, terrorism, sabotage, machinery breakdown and any accidental and physical loss and destruction or damage to the insured property due to a cause, other than as excluded in the insurance policies. These risks can cause personal injury and loss of life and damage to, or the destruction of, property and equipment (including infrastructure developed by us) and may result in the limitation or interruption of our business operations and the imposition of civil or criminal liabilities. Certain of these insurance policies are subject to exclusions for certain circumstances including, among others, faulty or defective design materials or workmanship, wear and tear, larceny, acts of fraud or dishonesty, any wilful act or wilful negligence on the part of the insured or any person acting on its behalf, war, invasion, damage caused by nuclear weapons material or ionising radiation or contamination by radioactivity from any nuclear fuel or nuclear waste, loss or damage caused directly or indirectly from discharge of pollutants or contaminants, and certain properties, including, among others, money, cheques, bonds, credit cards, securities of any description and explosives. The principal types of insurance coverage typically include industrial all risk policy, and standalone burglary policy.

Our insurance policies may not be sufficient to cover any material losses that we may incur in the future and we may not be able to renew our insurance arrangements, which typically extend for a period of one year, on similar terms or at all. If our losses significantly exceed our insurance coverage, cannot be recovered through insurance or occur during a period during which insurance coverage had lapsed, our business, prospects, financial condition, results of operations and cash flows could be materially and adversely affected.

In addition, we may not be able to maintain insurance of the types or at levels which are necessary or adequate for our business or at rates which are reasonable, in particular, in case of significant increases in premium levels at the time of renewing insurance policies or the lack of availability of insurance companies to underwrite these risks. As of the date of this Placement Document, we have submitted insurance claims with the relevant authorities in respect of certain Portfolio Assets aggregating to ₹ 1,752 million. The claim amounts are subject to assessment and review by the relevant assessor and insurance company, and we may not be able to recover the complete claim amount in such claims. The costs of higher insurance premiums including due to evolving standards, nature of risks, complexity in software and hardware used could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows. Furthermore, the occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductible or co-insurance requirements), could have a material adverse effect on our business, prospects, financial condition, results of operations and future cash flows.

36. We may be required to record significant charges to earnings in the future when we review Portfolio Assets for potential impairment.

Under Ind AS, we are required to review our Portfolio Assets for impairment whenever circumstances indicate the carrying value may not be recoverable. Various uncertainties, including deterioration in global economic conditions that result in upward changes in the cost of capital, increases in cost of completion of such assets and the occurrence of natural disasters that impact our assets, could impact expected cash flows to be generated by such assets, and may result in impairment of these assets in the future. For instance, we have incurred impairment related expenditure for certain assets in the past and have recorded impairment reversal at a consolidated level for PrKTCL in Fiscal 2023.

37. The audited Consolidated Financial Statements and Standalone Financial Statements of IndiGrid presented in this Placement Document may not be indicative of our future financial condition, results of operations and cash flows.

The Consolidated Financial Statements and Standalone Financial Statements included in this Placement Document may not be comparable to our consolidated financial statements in the future, including on account of the acquisitions of eligible infrastructure assets in the transmission and BESS and solar energy sectors and others in accordance with our Investment Objectives and business strategy, and related transactions.

38. The unaudited consolidated and standalone interim condensed financial statements prepared in accordance with Ind AS 34 and InvIT Regulations of IndiGrid present in this Placement Document may not be indicative of our financial condition, results of operations and cash flows.

The financial information for the half year ended September 30, 2025, is not audited and derived from the unaudited interim condensed standalone financial statements for the half year ended September 30, 2025 and unaudited interim condensed consolidated financial statements for the half year ended September 30, 2025, which were prepared in accordance with Ind AS 34 and the InvIT Regulations. These unaudited consolidated and standalone interim condensed financial statements are not audited and are based on limited review, in accordance with Standard on Review Engagements (SRE) 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. The disclosures present in the unaudited consolidated and standalone interim condensed financial statements prepared in accordance with Ind AS 34 and InvIT Regulations of IndiGrid for this period may not be comparable to our standalone and consolidated financial statements in the future, including on account of the acquisitions of eligible infrastructure assets in the transmission and BESS and solar energy sectors and other in accordance with our Investment Objectives and business strategy, and related transactions.

39. The audit report on the Consolidated and Standalone Financial Statements of IndiGrid for Fiscal 2025 and Fiscal 2024 and limited review report on the Unaudited Interim Condensed Consolidated and Standalone Financial Statements for the half year ended September 30, 2025 and for the half-year ended September 30, 2024, respectively, contain a matter of emphasis.

In the audit report on the Consolidated and Standalone Financial Statements of IndiGrid for Fiscal 2025 and Fiscal 2024 and limited review report on the Unaudited Interim Condensed Consolidated and Standalone Financial Statements for the half year ended September 30, 2025 and for the half-year ended September 30, 2024, the auditors have drawn attention to the fact that under the InvIT Regulations, IndiGrid is required to distribute to Unitholders not less than 90% of the Net Distributable Cash Flows of the IndiGrid for each financial year. Accordingly, Unit capital contains a contractual obligation to pay cash to the Unitholders. Thus, in accordance with the requirements of Ind AS 32 - Financial Instruments: Presentation, the Unit capital contains a liability element which should have been classified and treated accordingly. However, the Master Circular, dealing with the minimum presentation and disclosure requirements for key financial7, statements, require the Unit Capital in entirety to be presented/classified as "Equity", which is at variance from the requirements of Ind AS 32.

In order to comply with the aforesaid SEBI requirements, IndiGrid has presented unit capital as equity in these financial statements. Consistent with Unit Capital being classified as equity, any distributions to Unitholders are also being presented in the Statement of Changes in Unitholders' Equity when the distributions are approved by the Board of Directors of the Investment Manager.

40. We classify the Portfolio Assets as tangible assets and any change in such classification could have a material adverse effect on our financial condition, results of operations and cash flows.

The Group through its subsidiaries acts as a transmission licensee under the Electricity Act, 2003 holding valid licenses for 25 / 35 years in case of Transmission Assets. It also operates as a solar power developer in case of Solar Assets and is engaged in storage and delivery of electricity through its BESS Assets. Generally, the Portfolio Assets have (i) entered into TSAs with Long Term Transmission Customers LTTCs through a tariff-based bidding process to Build, Own, Operate and Maintain ("**BOOM**") / Build, Own and Operate ("**BOO**") the transmission infrastructure for a period of 25 or 35 years; (ii) have entered into PPAs with various National or Regional Intermediaries which are designated by the Government,

for development of solar power project, generation and sale of solar power with a contractual period of 25 years at a fixed tariff or (iii) entered into BESPAs with National or Regional Intermediaries which are designated by the Government to Build, Own and Operate ("**BOO**") BESS with a contractual period of 12 years at a fixed tariff.
We believe that the grantor as defined under Appendix D of Ind AS 115 ("**Appendix D**") requires transmission licensee or solar power developer or BESS operator to obtain various approvals under the regulatory framework to conduct its operations both during the period of the TSAs, BESPAs and PPAs as well as at the end of the license period or expiry date of BESPAs and PPAs. In our view, generally the grantor's involvement and approvals are to protect public interest and are not intended to control, through ownership, beneficial entitlement or otherwise, any significant residual interest in the transmission / solar infrastructure / battery projects at the end of the term of the arrangement. Accordingly, the Investment Manager believes that Appendix D is not applicable to the IndiGrid Group for all solar assets, transmission and battery assets operating under BOOM or BOO model.

Further, certain Portfolio Assets being, Jhajjar KT Transco Private Limited, Dhule Power Transmission Limited, Ishanagar Power Transmission Limited, Kallam Transco Limited and Ratle Kiru Power Transmission Limited operate on a DBFOT or BOOT basis. These Portfolio Assets construct, operate and maintain the transmission systems including sub-station to provide services for a specified period of time in accordance with the transmission agreement entered into with the grantor. IndiGrid also holds Kilokari BESS Private Limited which operates on BOOT basis for deployment of a 20 MW/ 40 MWh BESS at Kilokari substation for storage and delivery of electricity in accordance with the agreement entered into with the grantor. Under Appendix D to Ind AS 115, these arrangements are considered as Service Concession Arrangement and in accordance with para 16 of the Appendix D to Ind AS 115, rights to receive the consideration from the grantor for providing services has been recognised as "financial assets". Accordingly, the Investment Manager is of the view that Appendix D - Service Concession Arrangements of Ind AS 115 Revenue from contracts with customers is applicable to this infrastructure asset If there is a change in the classification, accounting policies or the interpretation which results in the other transmission licenses held by the Transmission Assets being considered "service concession arrangements" under Appendix D to Ind AS 115, it would have significant implications on our financial statements resulting in a material adverse effect on our financial condition, results of operations. In such case, a substantial part of our income would be considered financial income, and a substantial part of our assets would be considered financial and/or intangible assets where none of the property, plant or equipment of the Transmission Assets would be reflected on their respective balance sheets and accordingly there would be no depreciation on property, plant or equipment in the statement of profit and loss.

41. The Valuation Report, and any underlying reports, are not opinions on the commercial merits of IndiGrid or the Portfolio Assets, nor are they opinions, expressed or implied, as to the future trading price of the Units or financial condition upon listing, and the valuation contained therein may not be indicative of the true value of our assets.

S Sundararaman is the registered valuer who has undertaken an independent appraisal of the Portfolio Assets as of September 30, 2025, as per the provisions of the InvIT Regulations. The Valuation Report, included in *Annexure A* to this Placement Document, sets out their opinion as to the fair enterprise value of the Portfolio Assets and is based on assumptions which have inherent limitations and involves known and unknown risks and uncertainties.

The Valuation Report is not an opinion on the commercial merits and structure of the Trust or the Portfolio Assets, nor is it an opinion, express or implied, as to the value of the Units or the financial condition of the Trust. The Valuation Report does not purport to contain all the information that may be necessary or desirable to fully evaluate the Trust or the Portfolio Assets or an investment in the Trust or the Units. The Valuation Report makes no representation or warranty, expressed or implied, in this regard. The Valuation Report does not confer rights or remedies upon investors or any other person, and does not constitute and should not be construed as any form of assurance as to the financial condition or future performance of the Trust or as to any other forward-looking statements included therein, including those relating to certain macro-economic factors, by or on behalf of the Trust, the Trustee, the Investment Manager, the Sponsor, the Placement Agents or the Project Manager. Further, we cannot assure you that the valuation prepared by the Valuer reflects the true value of the net future cash flows of the Portfolio Assets or that other valuers would arrive at the same valuation. Accordingly, the valuation contained therein may not be indicative of the true value of the Portfolio Assets. The Valuation Report has not been updated since the date of its issue, does not take into account any subsequent developments and should not be considered as a recommendation by the Trust, the Trustee, the Investment Manager, the Sponsor, the Placement Agents or the Project Managers or any other party that any person should take any action based on the Valuation Report.

42. The technical and statistical information with respect to the energy infrastructure sector and the Portfolio Assets referred to in this Placement Document is subject to certain risks.

Statistical and other information in this Placement Document relating to India, the Indian economy or the energy infrastructure sector have been derived from various government publications, research reports from reputable institutions and communications with various Indian government agencies that are believed to be reliable. However, there can be no guarantee as to the quality or reliability of such information.

Further, any other technical information reflected in this Placement Document is subject to various limitations and is based upon certain estimates and assumptions that are subjective in nature. The technical reports for our Portfolio Assets reflect current expectations and views regarding future events, and contain forecasts, and other forward-looking statements that relate to future events. The future events referred to in such technical reports are subject to risks, uncertainties and factors such as gross domestic product growth, and per capita income changes. While reasonable care has been taken in the reproduction of the information, no assurance can be made as to the accuracy of such facts and statistics, which may not be consistent with other information compiled within or outside India. Due to possibly inconsistent or ineffective collection methods or discrepancies between published information and market practice, the statistics contained in the technical reports may be inaccurate or may not be comparable to statistics produced for other economies and should not be unduly relied upon. Further, there is no assurance that the statistics are stated or compiled on the same basis or with the same degree of accuracy as may be the case with information from elsewhere.

We commissioned technical reports in relation to certain Portfolio Assets for the purposes of conducting an assessment of the Portfolio Assets. Further, these technical reports have been prepared based on information as of specific dates and may no longer be current or reflect current trends. Opinions in such technical reports based on estimates, forecasts and assumptions may prove to be incorrect. The technical reports are subject to various limitations and are based upon certain bases, estimates and assumptions that are subjective in nature and that are based, in part, on information provided by and discussions with or on behalf of us, the Investment Manager. There can be no assurance that the bases, estimates and assumptions adopted by the consultants for the purposes of preparing the technical reports will prove to be accurate. Future reports for the Portfolio Assets, as the case may be, could be materially different from those that are set forth in such technical reports and this Placement Document. These technical reports are not a recommendation to invest or disinvest in units of IndiGrid. Prospective investors are advised not to unduly rely on the technical reports when making their investment decision. For the technical information relating to the Portfolio Assets, the technical reports and valuation reports, as the case may be, for each of the Portfolio Assets is available at https://www.indigrid.co.in/documents-manager/.

43. This Placement Document contains information from the CRISIL Report.

The information in the section entitled "*Industry Overview*" on page 188 is based on the CRISIL Report and other publicly available information. Further, the CRISIL Report has been prepared based on information as of specific dates and may no longer be current or reflect current trends. Opinions in the CRISIL Report based on estimates, projections, forecasts and assumptions may prove to be incorrect. Further, the commissioned report is not a recommendation to invest or disinvest in IndiGrid. Prospective investors are advised not to unduly rely on the industry report or extracts thereof as included in this Placement Document, when making their investment decisions.

CRISIL Intelligence, a division of CRISIL Limited has relied on third party data and information obtained from sources which in its opinion are considered reliable. The Report does not consist of any investment advice and nothing contained in the Report should be construed as a recommendation to invest/disinvest in any entity.

***44. Our contingent liability (as per Ind AS 37 Provisions, Contingent Liabilities and Contingent Assets) could adversely affect our financial condition, results of operations and cash flows*.**

As of September 30, 2025, we had a contingent liability (as per Ind AS 37) for entry tax demand, sales tax demand, income tax demand, land dispute matters and other demands (including GST demands and ROW claims) of ₹ 795.92 that had not been provided for. If any of our contingent liabilities (as per Ind AS 37) materialize, it could have an adverse effect on our financial condition, results of operations and cash flows.

45. Our success depends in large part upon our Investment Manager and our Project Managers, the management and skilled personnel that they employ and their ability to attract and retain such persons.

Our ability to make consistent distributions to our Unitholders depends on the continued service of management teams and skilled personnel of our Investment Manager and our Project Manager. Each faces a continuous challenge to recruit and retain a sufficient number of suitably skilled personnel. Generally, there is significant competition for management and other skilled personnel in our industry in India, and it may be difficult to attract and retain the skilled personnel that our Investment Manager or our Project Managers need. In particular, even if our Investment Manager and our Project Managers were to increase their pay structures to attract and retain such personnel, they may be unable to compete with other companies for suitably skilled personnel to the extent they are able to provide more competitive compensation and benefits. Further, our operational growth due to the acquisition of assets and the expansion of our portfolio may result in difficulties in the recruitment of a sufficient number of suitably skilled personnel. In addition, our Investment Manager and Project Managers may not be able to adequately redeploy and retrain their employees to keep pace with continuing changes, evolving standards and changing customer preferences. Our Investment Manager and Project Managers may face difficulties in providing opportunities for growth and promotion to the existing employees. The loss of key personnel, due to such reasons, may have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

46. We operate in a highly competitive environment, and increased competitive pressure could adversely affect our business and the ability of the Investment Manager to execute our growth strategy.

The market for investing in transmission and BESS projects and solar projects is generally, highly competitive and fragmented, and the number and variety of investors for energy infrastructure assets has been increasing. Some of our competitors are, or may be supported by, large companies that have greater financial, managerial and other resources than us. Our competitors may also have established relationships with other stakeholders that may place them in a better position to take advantage of certain opportunities. We also compete with other conventional and renewable energy companies in India for a limited pool of personnel with requisite industry knowledge and experience, equipment supplies, permits and land to develop new projects. Our operational projects may compete on price if we sell electricity into power markets at wholesale market prices.

Further, we may have to compete with other conventional energy and renewable energy generators when we negotiate or renegotiate a long-term Power Purchase Agreement. A reduction in demand for energy from renewable energy sources or our failure to successfully acquire new renewable energy projects may have an adverse effect on our business and financial condition. Furthermore, technological progress in conventional forms of electricity generation or the discovery of large new deposits of conventional fuels could reduce the cost of electricity generated from those sources or make them more environmentally friendly, and as a consequence reduce the demand for electricity from renewable energy sources or render our Projects uncompetitive.

The competitive environment may make it difficult for the Investment Manager to successfully acquire transmission and BESS and solar energy projects. Our ability to execute our growth strategy could be adversely affected by the activities of our competitors and other stakeholders. These competitive pressures could have a material adverse effect on our business, expected capital expenditures, results of operations, cash flows and financial condition and our distributions to our Unitholders.

47. There are risks associated with the expansion of our business to new areas.

As part of our growth strategy, we may expand our business to new areas, which may prove more difficult or costly than anticipated. For example, we intend to pursue additional sources of revenue, such as optical fiber, tower leasing and energy storage systems, which we may be unable to monetize due to regulations issued by CERC which require the sharing of revenue from transmission projects or if we are unable to obtain requisite approvals from CERC, LTTCs or other regulatory or governmental authorities.

RISKS RELATED TO OUR ORGANIZATION AND STRUCTURE

48. Changes in government regulation could adversely affect our profitability and ability to make distributions.

Regulatory changes in India, particularly in respect of the InvIT Regulations, could expose us to greater tax liability than our estimates. The InvIT Regulations also requires us to maintain certain investment ratios, including the requirement that 80% of the value of our assets should comprise completed and revenue-generating assets, which may prevent us from acquiring additional assets to achieve our growth strategy.

49. We depend on the Investment Manager, the Project Managers and Trustee to manage our business and assets, and our financial condition, results of operations and cash flows and ability to make distributions may be harmed if the Investment Manager and/ or Project Managers and/or the Trustee fail to perform satisfactorily. Our rights and rights of the Unitholders to recover claims against the Project Manager, the Investment Manager or the Trustee may be limited.

IndiGrid Investment Managers Limited fulfils the role of our Investment Manager under the Investment Management Agreement, in accordance with the InvIT Regulations. IGL and EIPL 1, holding companies under IndiGrid, fulfils the role of our Project Managers, with responsibility for operating and maintaining our projects and supervising their revenue streams.

The success of our business and growth strategy and the operational success of our projects will depend significantly upon the managers' satisfactory performance of these services. Our recourse against the Project Managers, the Trustee and Investment Manager is limited. The Trustee's liability under the Amended and Restated Trust Deed is limited to the fees received by it, except in case of the Trustee's gross negligence or wilful misconduct or fraud, as settled by a court of competent jurisdiction. Further, the Trustee is not liable for anything done or omitted to be done or suffered by the Trustee in good faith in accordance with or pursuance of any request or advice of our Investment Manager and for any action or omission that results in a loss to our Unitholders (by reason of any depletion in the value of the Portfolio Assets or otherwise), except in the event where such loss is a result of the Trustee's fraud, gross negligence or wilful default or breach of the Amended and Restated Trust Deed as determined by a court of competent jurisdiction. The Investment Manager's liability to IndiGrid for non-performance or breach of its obligations under the Investment Management Agreement is limited to two years of the fees payable to the Investment Manager (for the immediately preceding two financial years) under the agreement unless such liability arises in connection with any gross negligence, wilful default or misconduct or fraud of the Investment Manager. Further, the Investment Manager is not liable for any act or omission which may result in a loss to our Unitholders (by reason of any depletion in the value of the Portfolio Assets or otherwise), except in the event that such loss is a result of the Investment Manager's fraud or gross negligence or default or where the Investment Manager fails to exercise due care in relation to its obligations under the Investment Management Agreement. Accordingly, we may not be able to recover claims against the Project Managers, the Trustee or the Investment Manager.

If the Investment Management Agreement, either of the Project Implementation and Management Agreements were to be terminated or if their terms were to be altered, our business could be adversely affected, as the Trustee and/or Investment Manager may not be able to immediately replace such services, and even if replacement services were immediately available, the terms offered or obtained with the new managers could be less favorable than the ones currently offered by the Investment Manager and the Project Managers.

50. There may be conflicts of interest between IndiGrid, the Investment Manager and the Sponsor Group.

We may compete with existing and future private and public investment vehicles established and/or managed by the Sponsor Group or KKR or any funds, vehicles and/or entities managed and/or advised by KKR or any of its affiliates, which may present various conflicts of interest. Certain of these divisions and entities have or may have an investment strategy similar to our investment strategy and therefore may compete with us. Conflicts of interest may arise in allocating or addressing business opportunities and strategies amongst the Sponsor Group, the Investment Manager, and us, in circumstances where our interests differ from theirs.

In addition, the Trustee and/or Unitholders may not be aware of any such conflict, and even if made so aware, the Trustee and the Unitholders' ability to recover claims against the Investment Manager are limited. Moreover, the Investment Manager's liability is limited under the Investment Management Agreement and the Trustee has agreed to indemnify the Investment Manager out of our assets against certain liabilities. As a result, we could experience poor performance or losses for which the Investment Manager would not be liable.

Other present and future activities of the Sponsor Group, the Investment Manager and the Trustee or any of their affiliates may also give rise to additional conflicts of interest relating to us and our investment activities. In the event that any such conflict of interest arises, we will attempt to resolve such conflicts in a fair and reasonable manner; however, investors should be aware that conflicts will not necessarily be resolved in favour of our interests.

51. The Investment Manager's fee is not linked to our net profitability and is not capped at a maximum amount.

The Investment Manager's fee is not linked to our net profitability and is not capped at a maximum amount. For all Portfolio Assets except PrKTCL, the Investment Manager is entitled to a fee aggregating to 0.25% of AUM (as defined under the Investment Management Agreement) of the Portfolio Assets, subject to the condition that the fees payable shall not exceed 1.75% of the difference between revenue from operations and operating expenses (other than the fee of the Investment Manager) of each Portfolio Asset, per annum. For this purpose, the operating expenses do not include depreciation, finance cost and income tax expense. For PrKTCL, the Investment Manager is entitled to a fee aggregating to 0.25% of the AUM of PrKTCL subject to the condition that the fees payable shall not exceed 1.56% of the difference between revenue from operations and operating expenses (other than the fee of the Investment Manager) of PrKTCL, per annum. As a result, the Investment Manager may be entitled to its fee even if IndiGrid incurs a net loss on a consolidated basis. The Investment Manager's fee is not capped at a maximum amount and may be subject to change, including any increase on account of certain factors, including but not limited to the acquisition of new projects and assets by us.

52. We have entered into material related party transactions and may continue to do so in the future, which may potentially involve conflict of interests with the Unitholders.

The transactions resulting from the Project Implementation and Management Agreements and the Investment Management Agreement are or shall be, as applicable, related party transactions and their terms may not be deemed as favourable to us as if they had been negotiated solely between unaffiliated third parties. In addition, the Portfolio Assets have entered into transactions with their related parties in the ordinary course of their business. While we believe that all such transactions have been conducted on an arm's length basis, it may be deemed that the Portfolio Assets might have achieved more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into additional related party transactions in the ordinary course of our business. Such future transactions, individually or in the aggregate, could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

53. Our Investment Manager may also provide services to other InvITs. Further, our Sponsor Group may have competing business ventures and interests.

Our Sponsor Group and their associates are free to pursue the development, construction and operation of other transmission and BESS and solar energy projects and may compete directly with us for the acquisition of other similar assets and businesses.

The Investment Manager will also not be prohibited from providing management services to other investment trusts. If our Investment Manager engages in such activity in the future, it could give rise to conflicts of interest or adversely affect the ability of the Investment Manager to provide the levels of service that we require. Conflicts of interest of our Sponsor Group or Investment Manager may have an adverse effect on our business.

54. ***Our Portfolio Assets, the Sponsor and its Associates, the Sponsor Group, the Investment Manager and the Trustee are involved in certain legal and regulatory proceedings and any adverse outcome in these or other proceedings may have a material adverse effect on our reputation, business, financial condition, results of operations and cash flows.***

The Sponsor, Portfolio Assets, the Investment Manager, the Project Managers, their respective Associates, the Sponsor Group and the Trustee are involved in litigation, claims and other proceedings relating to the conduct of their business, including compensation claims, civil matters, criminal matters, notices and tax disputes as on the date of this Placement Document. Any claims or notice could result in litigation against us, the Investment Manager, the Sponsor and their respective Associates and the Trustee, and could also result in regulatory proceedings being brought against us by various government and state agencies that regulate our businesses. Often, these cases raise complex factual and legal issues, which are subject to risks and uncertainties and which could require significant time from the operation and management of our Portfolio Assets. Litigation and other claims and regulatory proceedings against the Portfolio Assets or their management could result in unexpected expenses and liabilities and could also materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Further, directors of the Parties to the Trust may also be involved in regulatory proceedings and other litigation from time to time.

Currently, there are outstanding legal proceedings against our Portfolio Assets that are incidental to their business and operations. These proceedings are pending at different levels of adjudication before various courts, tribunals, enquiry officers and appellate tribunals. Such proceedings could divert management time and attention, and consume financial resources in their defence. Further, an adverse judgment in some of these proceedings could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows. In addition, the Sponsor and their Associates, the Sponsor Group and the Investment Manager, are involved, and may become in litigation, claims and other proceedings relating to the conduct of their respective businesses, including compensation claims, civil matters and tax disputes. Any such litigation, show cause notice and/or regulatory proceedings could harm our reputation and materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. For details of outstanding litigation involving IndiGrid, the Sponsor, the Investment Manager and their Associates, the Sponsor Group and the Trustee and certain matters in relation, to certain directors of the Investment Manager and the Trustee, please see the section entitled "*Litigation*" on page 379.

Additionally, pursuant to an inspection undertaken by SEBI for the period January 1, 2023 until April 30, 2024, SEBI has issued certain administrative warnings, noted certain deficiencies and issued certain advisories to the Investment Manager pursuant to the SEBI letter dated March 28, 2025. The administrative warnings are in relation to incomplete disclosures in the secretarial reports on administrative warnings issued by SEBI previously, failure to disclose the half-yearly financial information separately in the annual reports of IndiGrid for the financial years ended March 31, 2023, and March 31, 2024, failure to circulate a separate agenda item pertaining to the review of the statement of investor complaints by the board of directors of the Investment Manager, failure to suitably incorporate the duties of the Independent Directors in the code of conduct as required in accordance with the Companies Act, 2013, failure to provide valid documentary evidence to show that Independent Directors have carried out their obligations in relation to (i) reviewing the performance of the directors, including the chairperson; and (iii) assessing the transmission of information between the management of IndiGrid and the board of directors of the Investment Manager, failure to make a separate disclosure to the stock exchanges in relation to the restructuring of non-convertible debt securities issued by IndiGrid, failure to circulate a copy of all notices, resolutions and circulars relating to a new issuance of non-convertible debt securities to the debenture trustees simultaneously with the shareholders/holders of the non-convertible debt securities.

55. ***We are required to maintain the eligibility conditions specified under Regulation 4 of the InvIT Regulations on an ongoing basis. We may not be able to ensure such ongoing compliance by the Investment Manager, our Sponsor, the Sponsor Group, the Project Managers and the Trustee, which could result in the cancellation of the registration of IndiGrid.***

We are required to maintain the eligibility conditions specified under Regulation 4 of the InvIT Regulations on an ongoing basis. These eligibility conditions include, among other things, that (a) the Sponsor, the Investment Manager and the Trustee are separate entities, (b) the Sponsor having a net worth of not less than ₹ 1,000 million and it, or its Associate, having a sound track record in the development of infrastructure or fund management in the infrastructure sector, (c) the Investment Manager has a net worth of not less than ₹ 100 million and has not less than five years' experience in fund management or advisory services or development in the infrastructure sector or the combined experience of the directors or employees of the Investment Manager in fund management or advisory services or development in the infrastructure sector is not less than 30 years, (d) the Trustee is registered with SEBI under Securities and Exchange Board of India (Debenture Trustees) Regulations, 1993 and is not an associate of the Sponsor or Investment Manager and (e) IndiGrid and Parties to IndiGrid are "fit and proper persons" as defined under Schedule II of the Intermediaries Regulations on an ongoing basis. We may not be able to ensure such ongoing compliance by InvIT and Parties of IndiGrid, which could result in the cancellation of the registration of IndiGrid as an infrastructure investment trust.

56. We must maintain certain investment ratios, which may present additional risks to us.

Pursuant to the InvIT Regulations, we are required to invest not less than 80% of the value of our assets in completed and revenue-generating infrastructure projects, such as the Portfolio Assets, and are limited to our consolidated borrowings and deferred payments net of cash and cash equivalents not exceeding 70% of the value of our assets. Since, such borrowings and payments already exceed 49%, we are required to obtain a credit rating of "AAA" or equivalent for the consolidated borrowing and proposed borrowing under the InvIT Regulations. In addition, we must not invest more than 10% of the value of our assets in under-construction infrastructure projects. The value of our assets may be subject to macro-economic parameters such as change in interest rates and the market beta of the assets and a change in such parameters may have an adverse effect on our investment ratios. This may also lead to impairment of financial and non-financial assets of IndiGrid. If these conditions are breached on account of market movements of the price of the underlying assets or securities, the Investment Manager must inform the Trustee and ensure that these conditions are satisfied within six months of such breach (or within one year with Unitholder approval). Failure to comply with these conditions may present additional risks to us, including divestment of certain assets, delisting and other penalties, which could have a material, adverse effect on our business, financial condition, results of operations and cash flows.

57. The Investment Manager is required to comply with certain ongoing reporting and management obligations in relation to the Trust. There can be no assurance that the Investment Manager will be able to comply with such requirements.

The Investment Manager is required to comply with certain ongoing reporting and management obligations in relation to the Trust in accordance with the InvIT Regulations. These requirements include, among other things, (a) making investment decisions with respect to the underlying assets or projects of IndiGrid, (b) overseeing the activities of the Project Managers, (c) investing and declaring distributions in accordance with the InvIT Regulations, (d) submitting reports to the Trustee (e) ensuring the audit of our accounts. In addition, pursuant to the recent amendments to the InvIT Regulations, the Investment Manager is required to comply with additional obligations under the InvIT Regulations in relation to the governance of the Trust, including in relation to the composition of its board of directors, committees and policies that are required to be adopted by the Investment Manager. There can be no assurance that the Investment Manager will be able to comply with such requirements in a timely manner or at all, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

58. The Investment Manager needs to comply with the AIFMD with respect to any delegation of its AIFMD management function.

The Trustee has appointed the Investment Manager as the investment manager of IndiGrid. The Investment Manager does not intend to delegate all or any part of its AIFMD management function as of the date of this Placement Document, although it reserves the right to do so if and to the extent permitted by the AIFMD, the Trust Deed and the documents governing the Investment Manager's investment management relationship with IndiGrid (each as amended and/or restated from time to time). To the extent that the Investment Manager does delegate any part of its AIFMD management function, a description of any management function that is delegated by the Investment Manager, including the identity of the relevant delegate and any potential conflicts of interest that may arise from such delegation, will be disclosed to investors in accordance with the requirements of the AIFMD.

59. The Investment Objectives may only be amended with respect to the Amended and Restated Trust Deed.

The Amended and Restated Trust Deed sets out specific parameters and restrictions in respect of IndiGrid's investment strategy, investment policy and the Investment Objectives. The Investment Manager does not presently intend, as of the date of this Placement Document, to seek to make any change to IndiGrid's investment strategy, investment policy and the Investment Objectives. Except as otherwise provided in the Amended and Restated Trust Deed, and subject to the requirements therein, any amendment to the Amended and Restated Trust Deed will be carried out as described in the Amended and Restated Trust Deed and in accordance with the InvIT Regulations.

60. Compliance with European Union Directive on Alternative Investment Fund Managers and the United Kingdom Regulation on Alternative Investment Fund Managers may increase administrative and regulatory burdens on the Investment Manager and IndiGrid.

As used herein, the "AIFMD" refers to Directive 2011/61/EU of the European Parliament and of the Council of June 8, 2011 on Alternative Investment Fund Managers, together with EU Commission delegated Regulation (EU) No. 231/2013 of December 19, 2012, supplementary Directive 2011/61/EU of the European Parliament and of the Council, and the national laws transposing Directive 2011/61/EU in any EEA member state in which the Units are marketed. The "UK AIFMR" refers to the United Kingdom's (the "UK") Alternative Investment Fund Managers Regulations 2013.

Among other things, the AIFMD regulates and imposes regulatory obligations in respect of the active marketing in the EEA by AIFMs (irrespective of whether they have their registered office in an EEA member state or elsewhere) of AIFs (whether established in an EEA member state or elsewhere). The Investment Manager is a non-EEA AIFM for the purposes of the AIFMD. Non-EEA AIFMs are currently not able to become authorized under the AIFMD. In order to market to investors resident, domiciled or with a registered office in the EEA, non-EEA AIFMs must market AIFs in accordance with the applicable national private placement regimes of the EEA member states in which they wish to market and comply with a sub-set of requirements under the AIFMD (which are much more limited in scope than those applicable to AIFMs that are established in the EEA). These requirements are: (i) "point-of-sale" disclosures (as to which, please see Annex D), (ii) ongoing investor disclosures required pursuant to Articles 23(4) and (5) of the AIFMD (as to which, please see below), (iii) provision of information relating to the IndiGrid's investments and its assets under management to the regulators of any EEA member state into which Units in IndiGrid are actively marketed, and (iv) the "asset-stripping" rules (in the event that IndiGrid acquires control of an EEA based portfolio company).

The information in respect of IndiGrid required to be disclosed pursuant to Articles 23(4) and (5) of the AIFMD will be made available to each Unitholder, as follows: (a) the percentage of IndiGrid's assets which are subject to special arrangements arising from their illiquid nature will be notified to the Unitholders; (b) any new arrangements for managing the liquidity of IndiGrid will be provided without undue delay in a disclosure notice delivered to each Unitholder; (c) the current risk profile of IndiGrid and the risk management systems employed by the Investment Manager to manage those risks may be provided in each annual report of IndiGrid; (d) any changes to the maximum level of leverage which the Investment Manager may employ on behalf of IndiGrid, as well as any right of the reuse of collateral or any guarantee granted under the leveraging arrangement, will be provided without undue delay in a disclosure notice delivered to each Unitholder and (e) the total amount of leverage employed by IndiGrid may be provided in each annual report of IndiGrid.

In addition, it is possible that some EEA member states will elect in the future to restrict or prohibit the marketing of non-EEA AIFs to investors based in those jurisdictions. Any such restrictions or prohibitions may make it more difficult for IndiGrid to raise its targeted amount of commitments.

In light of the foregoing, the AIFMD could have an adverse effect on the Investment Manager or IndiGrid by, among other things, increasing the regulatory burden and costs of doing business in the EEA members states, imposing extensive disclosure obligations on companies located in EEA member states, if any, in which IndiGrid invests, and potentially IndiGrid having the disadvantage as an investor in portfolio companies located in EEA member states as compared to competitors (e.g., those not in the alternative investment space) that may not be in scope of the AIFMD. The European Securities and Markets Authority ("**ESMA**") has recently also consulted on the possible extension of the passport for marketing and managing under AIFMD to non-EEA based managers (the marketing and managing passports under AIFMD are currently only available to certain types of EEA based managers).

ESMA provided advice to the European Commission in July 2015 and July 2016 on whether, amongst other things, the passporting regime should be extended to the management and/or marketing of AIFs by non-EEA AIFMs. The European Commission is currently considering whether the passport should be extended. It is currently not clear what the impact would be for the Investment Manager or IndiGrid of any decision by the European Commission to extend the passporting regime. If the AIFMD national private placement regimes (where implemented) continue to exist in parallel with an extension of the passporting regime, then the Investment Manager may continue to market under AIFMD national private placement regimes or choose to "opt-in" to rely on the passporting regime (which would likely mean an increase in regulatory and compliance costs to comply with the conditions of the passporting regime). If the AIFMD national private placement regimes are removed, then the Investment Manager would likely need to "opt-in" to the passporting regime for any AIFMD marketing of IndiGrid (which would likely mean an increase in regulatory and compliance costs for IndiGrid).

Following the withdrawal of the UK from the European Union and subject to compliance with the UK AIFMR, AIFMs may market AIFs to professional investors who are domiciled or have a registered office within the UK pursuant to the UK national private placement regime. The UK AIFMR currently imposes compliance obligations that are broadly similar to those detailed in the above paragraph in connection with a non-EEA AIFM marketing a non-EEA AIF pursuant to the national private placement regimes of certain EEA member states. If within scope of the UK AIFMR, these compliance obligations on an AIFM include, among other things, rules relating to the remuneration of certain personnel, minimum regulatory capital requirements, restrictions on use of leverage, restrictions on early distributions ("asset stripping" rules), the appointment of a depositary, disclosure and reporting requirements to both investors and home state regulators, and independent valuation of the assets of an AIF. Where information is provided in response to an own-initiative request by a prospective UK investor, such investor will not benefit from any protections or rights under the UK AIFMR in respect of any resulting subscription for limited partner interests.

61. Investors generally have no direct rights against IndiGrid's service providers.

Investors in IndiGrid generally have no direct rights against IndiGrid's service providers, including without limitation an auditor and a depositary (if appointed). Where wrongdoing is alleged to have been committed against IndiGrid, such wrongdoing would generally only be actionable by the Trustee in its capacity as trustee of IndiGrid and/or the Investment Manager as the investment manager of IndiGrid. In the absence of any direct contractual relationship between the investors and IndiGrid's service providers, there are only very limited circumstances in which an investor may bring a direct claim against any such service provider.

62. The European Union Directive on Alternative Investment Fund Managers and the United Kingdom Regulation on Alternative Investment Fund Managers may impose requirements on or restrict the use of leverage by IndiGrid and the Investment Manager.

Although the Investment Manager will seek to use leverage in relation to IndiGrid in a manner it believes is prudent, the use of leverage will generally magnify both the opportunities for gain and risk of loss from any given asset. The cost and availability of leverage is highly variable and at times it may be difficult to obtain or maintain the desired degree of leverage. The use of leverage will also result in interest expense and other costs that may not be covered by distributions made to IndiGrid or appreciation of its investments. An increase in interest rates may decrease the profitability of IndiGrid or its portfolio companies. The use of leverage also may impose restrictive financial and operating covenants on a portfolio company, in addition to the burden of debt service, and may impair its ability to carry out business operations or to finance future operations and capital needs. A leveraged capital structure will increase a portfolio company's exposure to any deterioration in market conditions, competitive pressures, an adverse economic environment or rising interest rates, which could accelerate and magnify declines in the value of IndiGrid's investments. If a portfolio company is not able to generate adequate cash flow to meet debt service, IndiGrid may suffer a partial or total loss of capital invested in such portfolio company.

To the extent required by applicable law and regulation, the Investment Manager will disclose any change to its leverage policy (such information being contained in IndiGrid's Financial Policy and its Amended and Restated Trust Deed) in the first annual reports of IndiGrid (or by other means) to be delivered after such change and, accordingly, will disclose in such reports (or by such other means) the maximum level of leverage permitted. Thereafter and to the extent required by applicable law and regulation, the Investment Manager will disclose to Unitholders on an annual basis any change to the maximum level of leverage permitted as well as any re-hypothecation rights or any guarantee granted under the leveraging arrangement and the total amount of leverage employed by IndiGrid. The Investment Manager will also disclose to Unitholders on an annual basis (whether in the annual reports of IndiGrid or otherwise) the percentage of IndiGrid's assets which are subject to special arrangements arising from their illiquid nature, any new liquidity management arrangements, the current risk profile of IndiGrid and the risk management systems employed to manage those risks.

63. It may be difficult for the Unitholders to remove the Trustee or the Investment Manager.

Under the InvIT Regulations, the Investment Manager cannot be removed without the prior approval of Unitholders where at least 60% of the Unitholders, present and voting, must approve the resolution. Similarly, Unitholders may remove the Trustee only if they believe that the acts of the Trustee are detrimental to the interests of the Unitholders and by way of a resolution where the votes cast in favour of the resolution must meet the required percentage as set out in the InvIT Regulations. Accordingly, the Unitholders may face difficulties in removing and replacing the Trustee or the Investment Manager. Further, under the InvIT Regulations, prior approval of SEBI is required for change in the Investment Manager of the Trust. Further, the Investment Manager and the Trustee cannot be discharged until a suitable replacement is appointed in their place, and there can be no guarantees that a suitable replacement will be appointed, or that appointment will take place in a timely manner, or at all.

64. Unitholders will have no vote in the election or removal of Directors in the Investment Manager.

Unitholders have no vote in the election or removal of directors of the Investment Manager except for Unitholders, holding not less than 10% of the total outstanding Units, either individually or collectively, have a right to nominate one director on the board of directors of the Investment Manager. Unitholders' recourse is the removal of the Investment Manager by way of a resolution where Unitholders holding at least 60% of the Units must vote in favour of the resolution. In comparison, the Companies Act, 2013 requires the removal of a director of a public company to be by way of an ordinary resolution approved by a simple majority. Accordingly, as opposed to shareholders removing a director of a public company, it may not be possible for Unitholders to remove the directors of the Investment Manager

65. The registered office of the Investment Manager is not owned by the Investment Manager.

The registered office of the Investment Manager is located on premises which are not owned by Investment Manager. In the event the use of such premises by the Investment Manager is conducted in a manner that amounts to a breach of the lease arrangements with the owners of such property or the Investment Manager is unable to renew its lease arrangements in a timely manner or at all, the Investment Manager could be subject to adverse consequences. Any such action may adversely affect Investment Manager's business operations, financial condition, cash flows and results of operations.

66. We are governed by the provisions of, amongst others, the InvIT Regulations and the Securities Contracts (Regulation) Act, 1956 ("SCRA"), the implementation and interpretation of which, is evolving. The evolving regulatory framework governing infrastructure investment trusts in India may impact the ability of certain categories of investors to invest in the Units, our business, financial condition, cash flows and results of operations and our ability to make distributions to the Unitholders.

The Trust has been constituted under the InvIT Regulations which were issued in 2014, as amended and supplemented with additional guidelines and circulars.

As the regulatory framework governing infrastructure investment trusts in India comprises a separate set of regulations, interpretation and enforcement by regulators and courts involves uncertainties. Furthermore, regulations and processes with respect to certain aspects of infrastructure investment trusts, including, but not limited to, bonus issues, the liabilities of the Unitholders, buy-back of units and the procedure for dissolution of infrastructure investment trusts have not yet been issued. For example, and infrastructure investment trusts are not “companies” or “bodies corporate” within the meaning of the Companies Act, 2013 and various SEBI regulations, including the Securities and Exchange Board of India (Buy-back of Securities) Regulations, 2018 and the Securities and Exchange Board of India (Substantial Acquisition of Shares and Takeovers) Regulations, 2011.

Uncertainty in applicability, interpretation or implementation of any amendment to, or change in, law, regulation or policy, including due to an absence, or a limited body, of administrative or judicial precedent may be time consuming and costly for us to resolve and may impact the viability of our current business or restrict our ability to grow our business in the future and consequently, our ability to make distributions to the Unitholders. Changes to our organizational structure, changes to our agreements, cost increases, fines, legal fees or business interruptions may result from changes to regulations, from new regulations, from new interpretations by courts or regulators of existing regulations or from stricter enforcement practices by regulatory authorities of existing regulations. In addition, new costs may arise from audit, certification and/or self-assessment standards required to maintain compliance with new and existing InvIT Regulations, which may render it economically unviable to continue conducting business as an infrastructure investment trust or otherwise have a material, adverse effect on our business, financial condition, results of operations and cash flows.

Further, SEBI has the right to, with or without prior notice, order inspection of the books of accounts, records and other documents pertaining to our operations, either on its own or, upon receipt of complaint. Upon review of the inspection report, SEBI is entitled to, if it so deems appropriate (in the interest of the securities markets or our investors) (a) to require us to surrender our certificate of registration; (b) to wind-up our operations; (c) to sell our assets; (d) direct us to not operate or access the capital markets for a specified period; or (e) direct us to not do such things as SEBI may deem appropriate in the interest of our investors. Any such occurrence may have a material adverse effect on our business, result of operations, financial conditions and cash flows.

Additionally, with effect from April 1, 2021, units and other instruments issued by an InvIT have been included in the definition of ‘*securities*’ under section 2(h) of the SCRA and the implementation and interpretation of these amendments is evolving. Accordingly, the applicability of several regulations (including regulations relating to intermediaries, underwriters, merchant bankers, takeover, insider trading and fraudulent and unfair trade practices) to the Trust is unclear and subject to the interpretation and clarifications issued by regulatory bodies such as SEBI

There can be no assurance that the legal framework for infrastructure trusts will not impose additional regulations and policies which could impact our operations and it is difficult to forecast how any new laws, regulations or standards or future amendments to the InvIT Regulations, the SCRA and other applicable law will affect infrastructure trusts and the infrastructure sector in India. Such changes may adversely affect our business, results of operations and prospects, to the extent that we are unable to suitably respond to and comply with any such changes in applicable law and policy. We may incur increased costs and other burdens relating to compliance with such new regulations, which may also require significant time and other resources, and any failure to comply with these changes may adversely affect our business, results of operations and prospects.

67. The Trust may be unable to dispose-off its non-performing assets in a timely manner.

The Portfolio Assets and any future asset held by the Trust may be illiquid as a result of the then prevailing market condition or the limited residual life of the projects held by such entities, among other things. In the event that the projects are performing poorly, the Trust may experience difficulty in realising, selling or disposing its shareholding Portfolio Assets or any future Portfolio Assets at the appropriate time or at all or at an attractive price, and this may have an adverse effect on the business, prospects, financial condition and results of operations of IndiGrid. Due to the nature of its structure, IndiGrid may be unable to dispose its non-performing or underperforming assets in a commercially viable or timely manner, or at all. For example, under the InvIT Regulations, any infrastructure asset acquired by the Trust is required to be held for a period of at least three years from the date of acquisition by the Trust, directly or through its HoldCos/SPVs. As a result, no assurance can be given that the Trust may be able to adapt to market developments, changes in asset quality, or adverse macroeconomic factors in a way comparable to, or competitive with, its competitors (whether infrastructure investment trusts, public or private companies). Any inability to dispose non-performing assets may in turn adversely affect the financial condition, business and prospects of the Trust, as well as distributions to the Unitholders.

68. Certain of our operational measures are subject to inherent challenges in measurement and any real or perceived inaccuracies in such measures may adversely affect our business and reputation.

Certain non-GAAP Measures and certain other statistical information relating to our operations and financial Performance including (Earnings before interest, taxes, depreciation, and amortization) ("**Non-GAAP Measures**"), presented in this Placement Document is a supplemental measure of our performance and liquidity that is not required by, or presented in accordance with Ind AS. Further, these Non-GAAP Measures are not a measurement of our financial performance or liquidity under Ind AS and should not be considered in isolation or construed as an alternative to cash flows, profit/ (loss) for the years/ period or any other measure of financial performance or as an indicator of our operating performance, liquidity, profitability or cash flows generated by operating, investing or financing activities derived in accordance with Ind AS. These Non-GAAP Financial Measures and other statistical and other information relating to our operations and financial performance may not be computed on the basis of any methodology that is applicable across the industry and therefore may not be comparable to financial measures and statistical information of similar nomenclature that may be computed and presented by other companies. Other organizations may calculate these Non-GAAP Measures differently from us, limiting its usefulness as a comparative measure. Although such Non-GAAP Measures are not a measure of performance calculated in accordance with applicable accounting standards, we believe that they are useful to an investor in evaluating us as they are widely used measures to evaluate an organization's operating performance.

RISKS RELATED TO INDIA

69. Our results may be adversely affected by future unforeseen events, such as adverse weather conditions, natural disasters, terrorist attacks or threats, future epidemics or pandemics or other catastrophic events.

Unforeseen events, such as adverse epidemics, pandemics, weather conditions, natural disasters, threatened or actual armed conflicts, terrorist attacks, efforts to combat terrorism or other catastrophic events can adversely impact our business. We cannot predict the affect any such events will have on our business, prospects, financial condition, results of operations, cash flows, future operations and performance; however, they could be material.

In case of any future unknow epidemics/ pandemics we will continue to monitor and considered the impact of events arising from such events including with respect to our liquidity and going concern, recoverable values of property, plant and equipment and the net realisable value of other assets and will continue to closely monitor the impact of any unforeseen events may have on our business, financial condition, liquidity and results of operations. Further, our business may be adversely impacted due to factors such as non-availability of staff due to illnesses, delay in receipt of operations and maintenance services, power load variance and non-availability of sufficient funds for future acquisitions.

Similarly, any other future epidemics/ pandemics in India or elsewhere could materially and adversely affect our business, prospects, financial condition, results of operations, cash flows, future operations and performance.

70. We are exposed to risks associated with the power industry in India.

We derive, and expect to continue to derive in the foreseeable future, most of our revenues and operating profits from India. Changes in macroeconomic conditions generally impact the power industry and could negatively impact our business. Accordingly, our business is highly dependent on the state of development of the Indian economy and the macroeconomic environment prevailing in India. Changes in government policies that favor the development of power generation, including large-scale power projects that generally require increased transmission facilities for evacuating the electricity they generate, may have an adverse impact on demand for transmission facilities. Since the use of our transmission systems and our solar projects, our expansion plans and future projects depend or will depend on the operation of power generation projects, the financial health of distribution companies ("**DISCOMs**"), macroeconomic factors that may negatively impact demand for electricity or more generally the development of power generation projects in India or the timely commencement of their operations (such as fuel price fluctuations, volatility and other market conditions that may adversely impact power generation projects), could in turn have a material adverse effect on our growth prospects, business and cash flows. In addition, access to financing may be more expensive or not available on commercially acceptable terms during economic downturns. Any of these factors and other factors beyond our control could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

71. Our performance and growth are dependent on the factors affecting the Indian economy.

Our performance and the growth are dependent on the performance of the Indian economy, which, in turn, depends on various factors. The Indian economy is affected by global economic uncertainties, volatility in interest rates, currency exchange rates, commodity and electricity prices, adverse conditions affecting agriculture and various other macroeconomic factors as well as regulatory changes.

Conditions outside India, including the slowdown or recession in the economic growth of other major countries and regions, especially in U.S., Europe and China, have an impact on the growth of the Indian economy, and GoI policy may change in response to such conditions. Any adverse change in policy could result in a further slowdown of the Indian economy. The rate of economic liberalisation could decrease, and specific laws and policies affecting foreign investment, currency exchange rates and other matters affecting investment in India could change as well. In the road sector, there can be no assurance that the Government's engagement with and outreach to private sector operators, including the Trust, will continue in the future. A significant change in India's economic liberalisation and deregulation policies, in particular, those relating to the road sector, could disrupt business and economic conditions in India generally and our business in particular. In addition, adverse developments in the Indian economy could also impact companies and banks that provide services to us. Additionally, an increase in trade deficit or a decline in India's foreign exchange reserves could negatively impact interest rates and liquidity, which could adversely impact the Indian economy and our business. Any downturn in the macroeconomic environment in India could materially and adversely affect the business, prospects, financial condition, results of operations and cash flows.

Additionally, an increase in trade deficit or a decline in India's foreign exchange reserves could negatively impact interest rates and liquidity, which could adversely impact the Indian economy and our business. Any downturn in the macroeconomic environment in India could materially and adversely affect the business, prospects, financial condition, results of operations and cash flows.

72. We may be exposed to variations in foreign exchange rates. Fluctuations in the exchange rate of the Indian Rupee with respect to the U.S. Dollar or other currencies could affect the foreign currency equivalent of the value of the Units and any distributions.

Our revenues are in Indian rupees, and currently there are no interest payments and loan repayments in foreign currency in relation to debt availed for utilisation at the Portfolio Assets. However, we have foreign currency based capex imports for certain BESS Assets. The Indian rupee has depreciated in recent years, and in the future may continue to depreciate, against the U.S. dollar, leading to increases in the Indian rupee cost for us to service and repay foreign currency borrowings. In addition, in the event of disputes under any of our foreign currency borrowings, if we raise foreign currency debt in future, we may be required by the terms of those borrowings to defend ourselves in foreign courts or arbitration proceedings, which could result in additional costs. A depreciation of the Indian rupee would also increase the costs of imports and may have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

Fluctuations in the exchange rates between the Indian Rupee and other currencies could also affect the foreign currency equivalent of the Indian Rupee price of the Units. The fluctuations could also affect the amount that Unitholders will receive in foreign currency upon conversion of any cash distributions or other distributions paid in Indian Rupees by the Trust on the Units, and any proceeds paid in Indian Rupees from any sale of the Units in the secondary trading market.

73. A decline in India's foreign exchange reserves may reduce liquidity and increase interest rates in India, which could have an adverse impact on us.

Flows to foreign exchange reserves can be volatile, and past declines have adversely affected the valuation of the Indian rupee. During the first half of 2014, emerging markets including India, witnessed significant capital outflows due to concerns regarding the withdrawal of quantitative easing in the U.S. and other structural factors in India such as high current account deficits and lower growth outlook. As a result, the Indian rupee depreciated significantly. To manage the volatility in the exchange rate, the RBI took several measures including increasing the marginal standing facility rate by 200 basis points and reducing domestic liquidity. The RBI also subsequently announced measures to attract capital flows, particularly targeting the non-resident Indian community. The RBI intervened again in February 2016 as a result of increased volatility of the exchange rate. Depreciation of the Indian rupee in 2018 led to RBI further intervening and increasing the interest rates. Any increased intervention in the foreign exchange market or other measures by the RBI to control the volatility of the exchange rate may result in a decline in India's foreign exchange reserves, reduced liquidity and higher interest rates in the Indian economy, which could adversely affect our ability to obtain financing on adequate terms or at all, which in turn could affect our business and future financial performance.

74. Social, economic and political conditions and natural disasters could have a negative effect on our business.

Each of the Portfolio Assets is incorporated in India and they derive all of their revenue from India. In addition, all of our assets are located in India. Consequently, our business may be adversely affected by social, economic and political conditions in India and its neighbouring countries. Specific risks, such as the following could adversely influence the Indian economy, thereby having a material adverse effect on our business, financial condition, results of operations and cash flows:

- political instability, riots or other forms of civil disturbance or violence;
- war, terrorism, invasion, rebellion or revolution, including wars in countries not neighbouring India;
- government interventions, including expropriation or nationalization of assets, increased protectionism and the introduction of tariffs or subsidies;
- changing regulatory regimes;
- underdeveloped industrial and economic infrastructure;
- changes in exchange rates and controls, interest rates, government policies, taxation and economic and political developments;
- changes in policies such as, fiscal and economic policy, industrial policy, direct and indirect taxes and the export-import policy; and
- changes in state-specific regulation and conditions.

Natural disasters such as floods, earthquakes or famines have in the past had a negative impact on the Indian economy. Potential effects may include damage to infrastructure and the loss of business continuity and business information. If our facilities are affected by any of these events, our operations may be significantly interrupted, which could materially adversely affect our business, prospects, financial condition, results of operations and cash flows.

75. Any downgrading of India's debt rating by rating agencies could have a negative impact on our business.

India's sovereign rating has been affirmed to Baa3 with a "stable" outlook by Moody's, BBB- with a "stable" outlook (Fitch), BBB "stable" by Dominion Bond Rating Service and BBB+ with a "stable" outlook by Rating and Investment Information, Inc. (R&I). India's sovereign ratings from S&P is BBB with a "stable" outlook. India's sovereign rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange reserves, which are outside our control. Any adverse revisions to India's credit ratings by rating agencies may adversely affect our ability to raise additional financing, and the interest rates and other terms at which such additional financing is available. This could materially and adversely affect our ability to obtain financing for capital expenditure, which could in turn materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. India's sovereign debt rating could be downgraded due to various factors, including changes in tax or fiscal policy or a decline in India's foreign exchange resources, which are outside our control.

76. Financial instability in other countries may cause increased volatility in Indian financial markets.

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, and the relationships amongst India and such countries, including conditions in the United States, Europe, Canada and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Any such financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Conditions outside India, such as the Israel-Hamas, Israel-Iran conflict, Russia-Ukraine war, Palestine conflict, resulting in a slowdown or recession in the economic growth of other major countries and regions, especially in U.S., Europe and China, have an impact on the growth of the Indian economy, and the Government's policy may change in response to such conditions.

Although economic conditions vary across markets, loss of investor confidence in one economy may cause increased volatility across other economies, including India. Financial instability in other parts of the world could have a global influence and thereby negatively impact the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows. Furthermore, economic developments globally can have a significant impact on our principal markets. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy. The imposition of sanctions on Russia have also impacted economic conditions in various parts of the world, including Europe.

The global credit and equity markets have experienced substantial dislocations, liquidity disruptions and market corrections. The dislocation of the sub-prime mortgage loan market in the United States since September 2008, and the more recent European sovereign debt crisis, has led to increased liquidity and credit concerns and volatility in the global credit and financial markets. These and other related events have had a significant adverse impact on the global credit and financial markets as a whole, including reduced liquidity, greater volatility, widening of credit spreads and a lack of price transparency in the global credit and financial markets.

In addition, China is one of India's major trading partners and there are rising concerns of a possible slowdown in the Chinese economy as well as a strained relationship with India, which could have an adverse impact on the trade relations between the two countries. In response to such developments, legislators and financial regulators in the United States and other jurisdictions, including India, implemented a number of policy measures designed to add stability to the financial markets. However, the overall long-term effect of these and other legislative and regulatory efforts on the global financial markets is uncertain, and they may not have the intended stabilizing effects. Any significant financial disruption could have a material adverse effect on our business, financial condition, results of operation, and cash flows. These developments, or the perception that any of them could occur, have had and may continue to have a material adverse effect on global economic conditions and the stability of global financial markets, and may significantly reduce global market liquidity, restrict the ability of key market participants to operate in certain financial markets or restrict our access to capital. This could have a material adverse effect on our business, financial condition, results of operations, and cash flows, and reduce the price of the Units.

77. If inflation rises in India, increased costs may result in a decline in profits.

Inflation rates in India have been volatile in recent years, and such volatility may continue. Increasing inflation in India could cause a rise in the price of transportation, wages, raw materials and other expenses. While the escalable component of the tariff is linked to the wholesale price index and consumer price index, there can be no assurance that an increased escalable tariff will sufficiently offset our increased costs due to inflation which could have a material adverse effect on our business, prospects, financial condition, results of operations and cash flows.

78. Significant differences exist between Ind AS and other accounting principles, such as IFRS and U.S. GAAP, which may be material to investors' assessments of our financial condition, result of operations and cash flows.

The summary financial information included in the sections entitled "*Summary Consolidated Financial Information*", "*Summary Standalone Financial Information*", "*Summary Financial Information of the Sponsor"* and "*Summary Financial Information of the Investment Manager*" on pages 48, 58, 66 and 71 are derived from the audited financial statements which are prepared and presented in conformity with IFRS (for the Sponsor) and InvIT Regulations, Ind AS and applicable Indian accounting practices (for IndiGrid and the Investment Manager). Ind AS differs from accounting principles with which prospective investors may be familiar in other countries, such as IFRS, Indian GAAP and U.S. GAAP. Accordingly, the degree to which the financial statements included in this Placement Document will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Similarly, the summary financial information included in the sections entitled "*Summary Financial Information of the Sponsor*" on page 66 are prepared in accordance with the IFRS. Accordingly, the degree to which such summary financials are included in this Placement Document will provide meaningful information is entirely dependent on the reader's level of familiarity with the IFRS. Persons not familiar with Indian accounting practices and/or the IFRS should limit their reliance on the financial disclosures presented in this Placement Document.

79. Changing laws, rules and regulations and legal uncertainties including adverse application of tax laws and regulations, may adversely affect our business results of operations, cash flows and financial performance.

Our business and financial performance could be adversely affected by changes in law or interpretations of existing, or the promulgation of new, laws, rules and regulations in India applicable to us and our business. There can be no assurance that the central or the state governments may not implement new regulations or policies which will require us to obtain approvals and licenses from the governments and other regulatory bodies or impose onerous requirements and conditions on our operations. Any new regulations and policies and the related uncertainties with respect to the implementation of new regulations may have a material adverse effect on our business, financial condition, cash flows and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of any new regulations, which may also materially affect our results of operations. For example, the Government of India has introduced (a) the Code on Wages, 2019 ("**Wages Code**"); (b) the Code on Social Security, 2020 ("**Social Security Code**"); (c) the Occupational Safety, Health and Working Conditions Code, 2020; and (d) the Industrial Relations Code, 2020 (collectively, the "**Labour Codes**") which consolidate, subsume and replace numerous existing central labour legislations and have been implemented with effect from November 21, 2025. We are yet to determine the impact of all or some of such laws on our business and operations which may restrict our ability to grow our business in the future.

Further, uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve and may affect the viability of our current business or restrict our ability to grow our business in the future. We cannot predict whether any new tax laws or regulations impacting the industry in which we operate will be enacted, what the nature and impact of the specific terms of any such laws or regulations will be or whether, if at all, any laws or regulations would have an adverse effect on our business, prospects, financial condition, results of operations and cash flows. Additionally, any decisions in the future by any judicial, governmental, statutory or regulatory authority or any changes in the interpretation of laws by any such authority may have an impact on our business, prospects, financial condition, results of operations and cash flows. For example, SEBI may interpret 'completed and revenue generating project' under the InvIT Regulations in a manner that may have an impact on our business, prospects, financial condition, results of operations and cash flows.

80. We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could adversely affect our business.

The Competition Act regulates practices having an appreciable adverse effect on competition in the relevant market in India. Under the Competition Act, any formal or informal arrangement, understanding or action in concert, which causes or is likely to cause an appreciable adverse effect on competition, is considered void and results in the imposition of substantial monetary penalties. Further, any agreement among competitors which, directly or indirectly, involves the determination of purchase or sale prices, limits or controls production, supply, markets, technical development, investment or provision of services, shares the market or source of production or provision of services by way of allocation of geographical area, type of goods or services or number of customers in the relevant market or, directly or indirectly, results in bid-rigging or collusive bidding, is presumed to have an appreciable adverse effect on competition. The Competition Act also prohibits abuse of a dominant position by any enterprise. The Competition Commission of India ("**CCI**") has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside India if such agreement, conduct or combination has an appreciable adverse effect on competition in India. Further, future acquisitions by IndiGrid may also require approval from CCI if such acquisition is beyond the thresholds permitted for combinations under the Competition Act and its relevant regulations. There can be no assurance as to the impact of the provisions of the Competition Act on the agreements that the Portfolio Assets have entered into. We are not currently party to any outstanding proceedings, nor have we received notice in relation to non-compliance with the Competition Act or the agreements they have entered into. However, if we are affected, directly or indirectly, by the application or interpretation of any provision of the Competition Act, or any enforcement proceedings initiated by the CCI, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI, or if any prohibition or substantial penalties are levied under the Competition Act, it could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows.

RISKS RELATED TO THE ISSUE AND THE UNITS

81. Investors in the Units may not be able to enforce a judgment of a foreign court against IndiGrid.

IndiGrid is an investment trust organized under the laws of India. Other than Tarun Kataria, all of the directors of the Investment Manager and the key managerial personnel named in this Placement Document are residents of India. Further, all the assets of IndiGrid are located in India. As a result, it may be difficult for investors to effect service of process upon IndiGrid or to enforce judgments obtained against IndiGrid. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with only a limited number of jurisdictions, such as the the United Kingdom of Great Britain and Northern Ireland, Republic of Singapore, United Arab Emirates and Hong Kong and no reciprocity with the United States of America. In order to be enforceable, a judgment from a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908 (the "**Civil Procedure Code**"). The Civil Code only permits the enforcement and execution of monetary decrees in the reciprocating jurisdiction, not being in the nature of any amounts payable in respect of taxes, other charges, fines or penalties. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court. However, the party in whose favour such final judgment is rendered may bring a fresh suit in a competent court in India based on a final judgment that has been obtained in a non-reciprocating territory within three years of obtaining such final judgment. Generally, there are considerable delays in the disposal of suits by Indian courts.

It is unlikely that a court in India would award damages on the same basis as a foreign court if an action were to be brought in India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if that court was of the view that the amount of damages awarded was excessive or inconsistent with Indian practice. A party seeking to enforce a foreign judgment in India is required to obtain prior approval from the RBI under the FEMA to repatriate any amount recovered.

82. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the InvIT Regulations, Applicants in this Issue are not allowed to withdraw or lower their Bids after the Issue Closing Date. The Allotment in this Issue and the credit of such units to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of *force majeure*, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Units, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Units. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Units will not decline below the Issue Price. To the extent the market price for the Units declines below the Issue Price after the Issue Closing Date, the investor will be required to purchase Units at a price that will be higher than the actual market price for the Units at that time. Should that occur, the invetsor will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Units after this Issue or cause the trading price of our Units to decline.

83. Investors will not have the option of getting the Allotment of Units in physical form. Further, Unitholders holding fractional entitlements will not have the option to trade such fractional entitlements.

In accordance with InvIT Regulations, the Units issued pursuant to this Issue shall be issued only in dematerialized form. Investors will not have the option of getting the allotment of the Units issued pursuant to this Issue in physical form. The Units issued pursuant to this Issue Allotted to the Applicants who do not have demat accounts or who have not specified their demat details, will be kept in abeyance till receipt of the details of the demat account of such Applicants. This further means that they will have no voting rights in respect of the Units.

84. Investors will be subject to market risks until the Units credited to their demat accounts are listed and permitted to trade.

Investors can start trading the Units allotted to them only after they are listed and permitted to trade. Since the Units are currently traded on the Stock Exchanges, investors will be subject to market risk from the date they pay for the Units issued pursuant to this Issue to the date when trading approval is granted for them. Further, there can be no assurance that the Units issued pursuant to this Issue allocated to an Investor will be credited to the Investor's demat account or that trading in the Units issued pursuant to this Issue will commence in a timely manner.

85. The reporting requirements and other obligations of infrastructure investment trusts are still evolving. Accordingly, the level of ongoing disclosures made to and the protection granted to our Unitholders may be more limited than those made to or available to shareholders of a company that has listed its equity shares upon a recognized stock exchange in India.

The InvIT Regulations, along with the guidelines and circulars issued by SEBI from time to time, govern the infrastructure investment trusts in India. However, as compared with the statutory and regulatory framework governing companies that have listed their equity shares on a recognized stock exchanges in India, the regulatory framework applicable to infrastructure investment trusts is still evolving.

Accordingly, the ongoing disclosures made to our Unitholders under the InvIT Regulations may differ from those made to shareholders of a company that has listed its equity shares on a recognized stock exchange in India in accordance with the Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015. Further, the rights of our Unitholders may not be as extensive as the rights of shareholders of a company that has listed its equity shares on a recognized stock exchange in India, and accordingly, the protection available to our Unitholders may be more limited than those available to such shareholders.

86. IndiGrid may be dissolved, and the proceeds from the dissolution thereof may be less than the amount invested by the Unitholders.

IndiGrid is an irrevocable trust registered under the Registration Act and it may only be extinguished (i) if it is impossible to continue with IndiGrid or if the Trustee, on the advice of the Investment Manager, deems it impracticable to continue with us; (ii) on the written recommendation of the Investment Manager and upon obtaining the prior written consent of such number of the Unitholders as is required under the InvIT Regulations; (iii) if our Units are delisted from the Stock Exchanges; (iv) if SEBI passes a direction for winding up IndiGrid or the delisting of the Units; or (v) in the event we become illegal.

Under the Amended and Restated Trust Deed, in the event of dissolution, our net assets, remaining after settlement of all liabilities, and the retention of any reserves which the Trustee deems to be necessary to discharge contingent or unforeseen liabilities, shall be paid to our Unitholders. Should IndiGrid be dissolved, depending on the circumstances and the terms upon which our assets are disposed of, there is no assurance that our Unitholders will recover all or any part of their investment. There may also be uncertainty around the interpretation and implementation of certain provisions in relation to insolvency of a trust under the Insolvency and Bankruptcy Code, 2016 which came into force in 2016.

87. ***Under Indian law, foreign investors are subject to restrictions that limit their ability to transfer or redeem Units, which may adversely impact the trading price of the Units.***

Under foreign exchange regulations currently in force in India, transfers of Units between non-residents and residents are permitted, subject to certain limited exceptions, if they comply with the pricing and reporting requirements specified by RBI. If a transfer of Units is not compliant with such pricing or reporting requirements and does not fall under any of the exceptions specified by RBI, then RBI's prior approval is required.

Additionally, Unitholders who seek to convert Indian rupee proceeds from a sale of Units in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities.

We cannot assure you that any required approval from RBI or any other Governmental agency can be obtained on any particular terms or in a timely manner, or at all.

Our Unitholders will not have the right to redeem or request the redemption of our Units while our Units are listed on the Stock Exchanges. In terms of the InvIT Regulations, an infrastructure investment trust may redeem Units only by way of a buyback or at the time of delisting of Units and may be subject to additional conditions and restrictions under Indian regulations.

88. ***There is no assurance that our Units will remain listed on the Stock Exchanges. There is a risk pertaining to low or no trading of Units on stock exchanges which directly affects any investor's ability to either sell their units entirely, or sell/exit in a timely manner.***

Although it is currently intended that the Units will remain listed on the NSE and the BSE, there is no guarantee of the units of the Trust not being compulsorily delisted due to among other factors, including us not continuing to satisfy the listing requirements of the Stock Exchanges. Accordingly, Unitholders will not be able to sell their Units through trading on the Stock Exchanges if the Units are no longer listed on the Stock Exchanges. In accordance with the InvIT Regulations and Chapter 11 of the Master Circular for Infrastructure Investment Trusts dated July 11, 2025 issued by the SEBI in relation to the manner and mechanism of providing exit option to dissenting Unitholders pursuant to Regulation 22(5C) and Regulation 22(7) of the InvIT Regulations, we are required to provide investors with an exit prior to delisting. Further, under the InvIT Regulations, we are required to maintain a minimum of 20 Unitholders at all times after the listing of the Units and certain minimum public holding. Failure to maintain such minimum number of Unitholders or public holding may result in action being taken against us by SEBI and the Stock Exchanges, including the compulsory delisting of our Units. Further, Investors in this Issue are not permitted to sell the Units Allotted to them for a period of one year from the date of Allotment, except on a recognized stock exchange. An active trading market for the Units may not sustain and there may be low or no active market for our Units on the Stock Exchanges, including due to factors beyond our control. In such an event, an investor may not be able to sell their Units, acquired through this Issue or otherwise, in a timely manner or at all.

89. ***The price of the Units is subject to fluctuation.***

The Issue Price of the Units issued pursuant to this Issue will be in accordance with the SEBI Institutional Placement Guidelines and may not necessarily be indicative of the market price of the Units. The Units may trade at prices significantly below the Issue Price. The trading price of the Units will depend on many factors, including:

- the perceived prospects of our business and the energy infrastructure;

- differences between our actual financial and operating results and those expected by investors and analysts;
- changes in analysts' recommendations or projections;
- changes in general economic or market conditions;
- the market value of our assets;
- the perceived attractiveness of the Units against those of other equity or debt securities, including those not in the infrastructure industry;
- the balance of buyers and sellers of the Units;
- the future size and liquidity of the Indian infrastructure investment trust market;
- any future changes to the regulatory system, including the tax system, both generally and specifically in relation to Indian infrastructure investment trusts;
- the ability on our part to implement successfully its investment and growth strategies;
- foreign exchange rates; and
- broad market fluctuations, including weakness of the equity markets and increases in interest rates.

For these reasons, among others, the price of Units may fluctuate. To the extent that we retain operating cash flow for investment purposes, working capital reserves or other purposes, these retained funds, while increasing the value of its underlying assets, may not correspondingly increase the market price of the Units. Any failure on our part to meet market expectations with regard to future earnings and cash distributions may adversely affect the market price for the Units. We cannot assure you that you will be able to resell the Units held by you at or above the Issue Price. There can be no assurance that an active trading market for the Units will be sustained after this Issue, or that the price at which the Units have historically traded will correspond to the price at which the Units will trade in the market subsequent to this Issue. Further, Allottees in the Issue restricted from selling the Units Allotted to them for a period of one year except on the floor of the Stock Exchanges.

In addition, the Units are not capital-protected products and there is no guarantee that Unitholders can regain the amount invested. If IndiGrid is terminated or liquidated, it is possible that investors may lose all or a part of their investment in the Units.

90. Your ability to acquire and sell the Units offered in the Issue is restricted by the distribution, solicitation and transfer restrictions set forth in this Placement Document.

No actions have been taken to permit a public offering of the Units offered in the Issue in any jurisdiction except India. As such, our Units have not and will not be registered under the U.S. Securities Act, any state securities laws or the laws of any jurisdiction other than India. Further, your ability to acquire Units is restricted by the distribution and solicitation restrictions set forth in the Preliminary Placement Document and this Placement Document. You are required to inform yourself about and observe these restrictions. Our representatives, our agents and us will not be obligated to recognize any acquisition, transfer or resale of the Units made other than in compliance with applicable law.

91. The sale or possible sale of a substantial number of Units by the Sponsor Group in the public market could adversely affect the price of the Units.

Under the InvIT Regulations, the Sponsor and Sponsor Group, collectively, are required to mandatorily hold our Units as follows:

From the beginning of 6th year after the date of listing pursuant to the initial offer and till the end of 10th year from the date of listing pursuant to the initial offer	3% of total Units or ₹ 500 crores, whichever is lower*
From the beginning of 11th year after the date of listing pursuant to the initial offer and till the end of 20th year from the date of listing pursuant to the initial offer	2% of total Units or ₹ 500 crores, whichever is lower*
After completion of the 20th year from the date of listing pursuant to the initial offer	1% of total Units or ₹ 500 crores, whichever is lower*

**Provided that the maximum value of units to be held by the Sponsor and Sponsor Group for compliance with the above shall not exceed ₹500 crores or such other value as may be decided by SEBI from time to time wherein such valuation shall be based on the latest available net asset value of the InvIT.*
Provided further that for InvITs that have already issued units pursuant to an initial offer, the lock in requirements as mentioned above shall be applicable only for the additional units issued by the InvIT and the units that are locked in at the time of initial offer shall continue to be locked in till the completion of three years from the date of listing of units in such initial offer.

The Units have been listed on the Stock Exchange. If the Sponsor, subsequent to the end or lapse of any of the aforesaid lock-in periods or thresholds directly or indirectly sells or is perceived as intending to sell a substantial number of its Units, or if a secondary offering of the Units is undertaken, the market price for the Units could be adversely affected.

92. Rights of Unitholders under Indian law may be more limited than under the laws of other jurisdictions.

Indian legal principles related to corporate procedures, directors' fiduciary duties and liabilities, and unitholders' rights may differ from those that would apply to a company in another jurisdiction. Unitholders' rights under Indian law may not be as extensive as Unitholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as unitholder in an Indian entity than as unitholder of a corporation in another jurisdiction.

The Amended and Restated Trust Deed and various provisions of Indian law govern the Trust's affairs. Legal principles relating to these matters and the validity of procedures, fiduciary duties and liabilities, and Unitholders' rights may differ from those that would apply to a company in India or a trust in another jurisdiction. Unitholders' rights and disclosure standards under Indian law may also differ from the laws of other countries or jurisdictions. For details, please see the section entitled "*Rights of Unitholders*" on page 404.

93. Any future issuance of Units by us may dilute investors' Unitholding. The sale or possible sale of a substantial number of Units by the Sponsor or another significant Unitholder could adversely affect the price of the Units.

Where new Units are issued at less than the market price of the Units, the value of an investment in the Units may be affected. In addition, Unitholders who do not, or are not able to, participate in the new issuance of Units may experience a dilution of their interest in the Trust.

Further, under the InvIT Regulations, the Sponsor and Sponsor Group, collectively, is required to lock-in units from the date of listing pursuant to the initial offer in a manner as described at Regulations 12(3) and 12(3A) of the InvIT Regulations. The Units are listed on the Stock Exchange. If the Sponsor, following the lapse of either of the aforesaid lock-in period directly or indirectly sells or is perceived as intending to sell a substantial number of its Units, or if a significant Unitholder other than the Sponsor directly or indirectly sells or is perceived as intending to sell a substantial number of its Units, the market price for the Units could be adversely affected

TAX RELATED RISKS

94. Tax laws are subject to changes and differing interpretations, which may materially and adversely affect our operations and growth prospects.

The current tax laws and regulations in India provide certain exemptions to interest income earned by business trusts from a special purpose vehicle as a result of which IndiGrid is subject to relatively lower tax liabilities. These exemptions could be modified or removed at any time or clarified in a manner adverse to IndiGrid, which could adversely affect our profitability and financial condition.

Tax laws and regulations are subject to differing interpretations by tax authorities. Differing interpretations of tax and other fiscal laws and regulations may exist within governmental ministries, including tax administrations and appellate authorities, thus creating uncertainty and potential unexpected results. The degree of uncertainty in tax laws and regulations, combined with significant penalties for default and a risk of aggressive action, including by retrospective legislation, by the governmental or tax authorities, may result in tax risks in the jurisdictions in which we operate being significantly higher than expected. For instance, while the Investment Manager intends to take measures to ensure that it is in compliance with all relevant tax laws, there is no assurance that the tax authorities will not take a position that differs from the position taken by us with regard to our tax treatment of various items. Any of the above events may result in a material, adverse effect on our business, financial condition, results of operations and/or prospects. Tax authorities in India may also introduce additional or new regulations applicable to our business which could adversely affect our business and profitability.

95. Changes in legislation or the rules relating to tax regimes could materially and adversely affect our business, prospects and results of operations.

Tax and other levies imposed by the Government and state governments may include: (i) income tax (including withholding tax and tax collection at source); (ii) excise duty; (iii) value added tax/central sales tax/ goods and service tax; (iv) service tax; (v) stamp duty; and (vi) other special taxes and surcharges that are introduced on a temporary or permanent basis from time to time. In some cases, these taxes and other levies may be changed from year to year and the Indian courts which interpret tax legislation may apply such interpretations with retrospective effect. Also, the Government in certain situations has the authority to change tax laws retrospectively.

Further, the Government of India announced the union budget for Fiscal 2026 following which the Finance Act, 2025 ("**Finance Act**") received the President of India's assent on March 29, 2025 and became effective on April 1, 2025. Additionally, the Income Tax Act, 2025 received the assent from President of India on August 21, 2025 and will become effective from April 1, 2026. The proposed legislation seeks to comprehensively reform India's direct tax framework by simplifying existing provisions, streamlining tax administration, reducing interpretational ambiguities, and easing the overall compliance burden.

The Government, by way of the Finance Act, 2021, amongst other things, amended the Securities Contracts (Regulation) Act, 1956 ("**SCRA**") to recognise pooled investment vehicles and recognise the units, debentures, other marketable securities and other instruments issued by InvITs as "securities". The Finance Act, 2021, also exempted the payment of tax deducted at source on dividends paid to InvITs. By way of the Finance Act, 2022, the applicability of section 94(7) of the IT Act has been extended to the units of business trust (with effect from Financial Year 2022-23), which provides that certain situation, loss, if any, arising from the sale and purchase of securities and units, to the extent of dividend or income received or receivable on such securities or unit, shall be ignored for computing income chargeable to tax. The Finance Act, 2022 extended the applicability of section 94(8) of the IT Act (commonly known as bonus stripping) to the units of business trusts (with effect from Financial Year 2022-23), which provides certain other situations where loss, if any, arising from the sale and purchase of all or any of the units shall be ignored for computing income chargeable to tax and notwithstanding anything contained in any other provision of the IT Act, the amount of loss so ignored shall be deemed to be the cost of purchase or acquisition of additional/ bonus units as are held on the date of such sale or transfer.

The Finance Act 2023 provides for tax on the unitholders for such portion of distribution received by them that is not covered under section 10(23FC) or 10(23FCA) of the IT Act and that which is not chargeable to tax under section 115UA(2) of the IT Act. Any distribution not covered under the aforementioned clauses will be taxed in the hands of the unitholders as 'income' under section 56(2)(xii) of the IT Act, provided the amount received (including similar distributions in earlier years to the same unitholder or any other unitholder) is in excess of the amount at which units were issued by the Trust, as reduced by the amount which would have been charged to tax earlier under this provision. The aforementioned amounts received by a unitholder being a specified person covered under section 10(23FE) of the IT Act shall not be subject to taxes upon the fulfilment of certain conditions set out in the IT Act. Further, any such distribution received by a unitholder to the extent not chargeable to tax under sections 56(2)(xii) and 115UA(2) and not covered under sections 10(23FC), or 10(23FCA) shall be reduced from the cost of units. We cannot assure you that there will be no adverse impact on the tax incidence to the unitholders pursuant to the Finance Act 2023.

Further, pursuant to the Finance Act, 2024, the capital gains tax regime was amended and the definitions of long term capital assets, short term capital assets and their applicable tax rates were changed. The Finance Act, 2025, also introduced an amendment to section 115UA of the IT Act to provide that capital gains income, chargeable under section 112A of the IT Act will be taxed under the rates specified in section 112A of the IT Act, rather than the maximum marginal rate. For further details, please see the sections entitled "*Risk Factors – Unitholders may be subject to Indian taxes arising out of capital gains on the sale of Units and on any dividend or interest component of any returns from the Units*" and "*The income of IndiGrid in relation to which pass through status is not granted under the IT Act may be chargeable to Indian taxes*" on pages 134 and 136.

Additionally, there have been two major reforms in Indian tax laws, namely the introduction of the Goods and Services Tax ("**GST**") and provisions relating to general anti-avoidance rules ("**GAAR**"). The GST regime came into effect on July 1, 2017, combining taxes and levies by the Government and State Governments into a unified rate structure. Further, any application of existing law or future amendments may affect our overall tax efficiency and may result in significant additional taxes becoming payable. Additionally, there is limited clarity on the availability of input tax credit, and any unfavourable orders in this regard may have a material adverse impact on our financial position and cash flows. Further, any application of existing law or future amendments may affect our overall tax efficiency and may result in significant additional taxes becoming payable.

The GAAR regime came into effect on April 1, 2017. The GAAR regime is a broad set of provisions which grant powers to India tax authorities to invalidate any arrangement for tax purposes in the event, the main purpose of entering into the transaction by the taxpayer is to obtain a tax benefit. Besides the "tax benefit", the transaction should meet any one of the following specified additional tests: (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm's length; (ii) results, directly or indirectly, in the misuse, or abuse, of the provisions of the IT Act; (iv) lacks commercial substance or is deemed to lack commercial substance as prescribed under the IT Act in whole or in part; and (v) is entered into, or carried out, by means which are, or in a manner which is, not ordinarily employed for bona fide purposes. Such transactions are declared as impermissible avoidance arrangements. The tax consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit, amongst other consequences, including on the interest paid by the Project SPVs on the debt from the Trust or claim of any benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. If the GAAR provisions are made applicable to the Trust or any member of the Trust, it may have a material adverse tax impact on the Trust. The rules notified with respect to GAAR prescribe that these shall not be applicable to FIIs in accordance with the SEBI (Foreign Institutional Investors) Regulations, 1995 subject to the fulfilment of certain conditions. GAAR may have a material adverse tax impact on the Trust, the Sponsor and the Unitholders.

The Investment Manager has not determined the impact of such existing or proposed legislations on our business. We may incur increased costs relating to compliance with any new requirements, which may also require management time and other resources, and any failure to comply may adversely affect our business, results of operations and prospects. Uncertainty in the applicability, interpretation or implementation of any amendment to, or change in, governing law, regulation or policy, including by reason of an absence, or a limited body, of administrative or judicial precedent may be time consuming as well as costly for us to resolve, and may impact the viability of our current business or restrict our ability to grow our business in the future.

96. Unitholders may be subject to Indian taxes arising out of capital gains on the sale of the Units and on any dividend or interest component of any returns from the Units or on certain income being distributed by the IndiGrid.

Under current Indian tax laws, units of a business trust held for more than 12 months are considered as long-term capital assets. In case of sale of such units through a recognized stock exchange in India and subject to payment of securities transaction tax ("**STT**"), any gain arising in excess of ₹ 0.125 million is subject to long term capital gains tax at a concessional rate of 12.5% (plus applicable surcharge and cess). However, if the said units are sold in any other manner, the same shall be subject to long term capital gains tax at the rate of 12.5% (plus applicable surcharge and cess).

In case the units are held for less than or up to 12 months, the same shall be regarded as short-term capital asset. Any gain arising in case of sale of such units through a recognized stock exchange in India and subject to payment of STT, is subject to short-term capital gains tax at concessional rate of 20% (plus applicable surcharge and cess). However, if the said units are sold in any other manner, the same shall be subject to short-term capital gains tax at applicable tax rates of the holder (plus applicable surcharge and cess). In case any sum (not in the nature of interest or dividend or any other income taxable in our hands) is distributed to the Unitholders which is in excess of the cost of the Units issued to Unitholders, such sum is taxable as income from other sources in the hands of the Unitholders.

The aforesaid taxability in India is subject to tax treaty benefits in the case of a non-resident holder. Further, the applicable taxes on the sale of Units and on any dividend or interest component of any returns from the Unit will also be subject to the category of investor holding or selling the Units.

As per the IT Act, a distribution made by a business trust, being in nature dividend income received from a special purpose vehicle, will not be subject to tax in the hands of a unitholder, so long as the special purpose vehicle has not opted to pay corporate tax under the beneficial regime introduced under Section 115BAA of the IT Act. Similarly, a business trust (which includes an infrastructure investment trust) will not be required to withhold tax on any distributions which are in the nature of dividend income received from a special purpose vehicle, so long as such special purpose vehicle has not opted to pay corporate tax under the beneficial regime introduced under Section 115BAA of the IT Act. However, where the special purpose vehicle opts to pay tax under Section 115BAA of the IT Act, dividend income distributed by the business trust would be taxed in the hands of a non-resident unitholder at 20% (plus applicable surcharge and cess) or the applicable treaty rate and at the ordinary rate for a resident unitholder. Further, the business trust would be required to withhold tax on such distributions made from dividend received from the special purpose vehicle. Thus, the taxability of dividends distributed by IndiGrid will depend on the taxation regime opted by the Portfolio Assets. It may also be noted that in terms of Section 194LBA (1) of the IT Act, any distributable income in the nature of interest income and dividend income (where the Initial Portfolio Asset has opted to pay corporate tax under the beneficial regime introduced under Section 115BAA of the IT Act) in the hands of a resident investor is subject to deduction of tax at the rate of 10%. Similarly, in terms of Section 194LBA (2) of the IT Act, any distributable income in the nature of interest income and dividend income (where the SPV has opted to pay corporate tax under the beneficial regime introduced under Section 115BAA of the IT Act) in the hands of a non-resident is subject to deduction of tax at the rate of 5% (plus applicable surcharge and cess) and 10% (plus applicable surcharge and cess) respectively. The ultimate tax liability in the hands of the Unitholder may depend on various factors/ considerations.

Further, the Finance Act, 2021 recognises units, debentures and other instruments issued by infrastructure investment trusts as "securities" under the Securities Contracts (Regulation) Act, 1956. The Finance Act, 2021, also exempted payment of tax deducted at source on dividend paid to InvITs, with effect from April 1, 2020. The Finance Act, 2023 also amended section 56 of the IT Act (with effect from Financial Year 2023-24) such that in addition to interest or dividend, unitholders are also subject to tax on other distributions received from a business trust such as amount received on repayment of debt or return of capital or amount received on redemption of unit held by unitholder provided such distributions are not chargeable to tax in the hands of the business trust under section 115UA(2) of the IT Act. Such distributions will be subject to tax in the hands of the Unitholder as ''income'' under section 56(2)(xii) of the IT Act at the applicable rates, provided the amount received (including similar distributions in earlier years to the same unitholder or any other unitholder) is in excess of the amount at which units were issued by the InvIT, as reduced by the amount which would have been charged to tax earlier under this provision. The aforementioned amounts received by a unitholder being a specified person covered under section 10(23FE) of the IT Act shall not be subject to taxes upon the fulfilment of certain conditions set out in the IT Act. Further, any such distribution received by a unitholder to the extent not chargeable to tax under section 56(2)(xii) and 115UA(2) and not covered under sections 10(23FC) or 10(23FCA) shall be reduced from the cost of units.

Furthermore, the Trust might not be able to pay or maintain the levels of distributions or ensure that the level of distributions will increase over time, or that future acquisitions will increase the Trust's distributable free cash flow to the Unitholders. Any reduction in, or elimination or taxation of, payments of distributions could materially and adversely affect the market price of the Units.

97. The Trust and the Portfolio Assets may be subject to certain tax related risks under the provisions of the IT Act.

Shortfall in the determination of fair market value of the equity shares at the time of transfer of the Portfolio Assets to IndiGrid, may be subject to taxation in the hands of the acquirer. The equity shares of the Portfolio Assets are proposed to be transferred to the IndiGrid. Under the provisions of section 56(2)(x) of the IT Act, where a purchase of securities is undertaken at a value which is lower than the fair market value of the securities, such shortfall in value is subject to be taxed as income from other sources in the hands of the acquirer. The manner of determination of fair market value as provided under the Income Tax Rules, 1962, includes the value determined by net asset method, subject to the prescribed adjustments.

IndiGrid is under an obligation to distribute to the Unitholders, the surplus of the income earned from receipt of cash flows from the interest and dividend received from the SPVs, after the deduction of the various expenses incurred in connection with earning such income and general-purpose expenses. The provisions of the IT Act provide that IndiGrid should disclose the nature of the amount distributed to the Unitholders, i.e., whether from dividends received from the SPVs, interest income earned, etc. However, there is lack of clarity on the method to be adopted by the IndiGrid for the allocation of various expenses incurred towards earning each specific stream of income by the IndiGrid.

98. The Portfolio Assets enjoy certain benefits under Section 80-IA of the IT Act in relation to the Portfolio Assets and any change in these tax benefits applicable to the Trust may adversely affect its results of operations.

Under the provisions of section 80-IA of the IT Act, one of our Portfolio Assets, PrKTCL, is eligible for tax holiday for any 10 consecutive assessment years out of 20 years beginning from the year in which the undertaking or enterprise develops and begins to operate any infrastructure facility. As a result of the tax holiday available to the Portfolio Assets, the taxable profits derived by the Portfolio Assets from developing, operating and maintaining any infrastructure facility will not be taxable under the normal provisions of the IT Act during the tax holiday period. Any other taxable income (for example, interest income, profit on sale of mutual funds) from deployment of temporary funds or otherwise would also be taxable under the terms of the IT Act. The Portfolio Assets will only be subject to MAT if the Portfolio Assets have a book profit as required to be computed under section 115JB of the IT Act. Any change in the tax benefits under section 80-IA and/or the provisions of MAT may have an impact on the income tax liability of the Portfolio Assets and may consequently affect the amount available for distribution by the Portfolio Assets to the Trust. Furthermore, if the relevant conditions under section 80-IA of the IT Act are not met and the manner of computation of profits and gains are not as permitted, the Initial Portfolio Assets will not be able to enjoy the benefits of such tax holiday. This could affect the overall tax liabilities of the Portfolio Assets and result in additional taxes becoming payable thereby resulting in a material, adverse effect on our business, financial condition, cash flows and results of operations and consequently may have a material, adverse impact on our distributions.

Benefits under section 80-IA of the IT Act shall not be available to Portfolio Assets in case they have opted to pay corporate tax under the beneficial regime introduced under Section 115BAA of the IT Act. Further, in such case, provisions of MAT shall not be applicable.

99. The income of IndiGrid in relation to which pass through status is not granted under the IT Act may be chargeable to Indian taxes.

Under the provisions of the IT Act, the total income of the Trust other than interest and dividend income from the Portfolio Assets would be taxable at the maximum marginal rate ("**MMR**"). MMR is defined under the provisions of the IT Act to mean the rate of income-tax (including surcharge on income-tax, if any) applicable in relation to the highest slab of income. Further, capital gains under section 111A, section 112 and section 112A of the IT Act shall be taxable in the hands of the Trust at the rates mentioned in the respective sections.

In accordance with Section 115UA of the IT Act, the MMR applicable to the IndiGrid, a separately assessable resident entity, is 30.0% (plus applicable surcharge and cess). However, the tax authorities may view the Trust as a "pass through" entity and the applicable tax rate will be the MMR applicable to its beneficiaries. If any beneficiary is chargeable to MMR at a rate higher than the rate applicable to other beneficiaries, the income of the Trust attributable to the share of such beneficiary will be taxed at a higher applicable rate. For example, if any Unitholder is a non-resident, the MMR of 35.0% (plus applicable surcharge and cess) would apply. As there are divergent views, there is a possibility that the matter may be litigated if the tax authorities subscribe to the latter view.

100. The Ministry of Finance, GoI, has constituted a task force to draft new direct tax legislation, the provisions of which may have an unfavourable implication for us.

The Ministry of Finance, GoI, has set up a panel to review the IT Act and to draft a new direct tax legislation ("**Panel**"). The Panel has been tasked with drafting appropriate direct tax legislation aimed at (i) aligning India's domestic direct tax regime in line with international best practices; and (ii) ensuring and encouraging compliance. The implication of the report by the Panel, including findings and recommendations in their report and the provisions of the proposed direct tax legislation could have an unfavourable implication on us. Since the Panel and its report, including their recommendations and the draft of the new direct tax legislation has not been released yet, the possible impact on us cannot be determined at this point in time. Any new direct tax legislation may materially and adversely affect our business, prospects, financial condition, results of operations and cash flows.

GENERAL INFORMATION

IndiGrid

IndiGrid was settled on October 21, 2016, in New Delhi, pursuant to the Trust Deed, as an irrevocable trust in accordance with the Indian Trusts Act, 1882. IndiGrid was registered with SEBI on November 28, 2016, under Regulation 3(1) of the InvIT Regulations and has obtained a certificate of registration from SEBI bearing number IN/InvIT/16-17/0005. Subsequently, IndiGrid changed its name from India Grid Trust to IndiGrid Infrastructure Trust and was issued a revised certificate of registration dated December 9, 2024, reflecting the change in name. The principal place of business of IndiGrid is situated at Unit No. 101, First Floor, Windsor, Village KoleKalyan, Off CST Road, Vidyanagari Marg, Kalina, Santacruz East, Mumbai 400 098.

IndiGrid is an infrastructure investment trust established to hold assets in completed and revenue generating projects and under-construction projects in terms of Regulation 18 of the InvIT Regulations. For information on the background of IndiGrid and the description of the Portfolio Assets, please see the sections entitled "*Overview of IndiGrid*", "*Description of Portfolio Assets*" and "*Our Business*" on pages 27, 30 and 247, respectively.

Compliance Officer of IndiGrid

The compliance officer of IndiGrid is Urmil Shah. His contact details are as follows:

Urmil Shah
Unit No. 101
First Floor, Windsor
Village KoleKalyan
Off CST Road
Vidyanagari Marg, Kalina
Santacruz East
Mumbai 400 098
Maharashtra, India
Tel: +91 72084 93885
E-mail: complianceofficer@indigrid.com

Bidders can contact the Compliance Officer in case of any pre-Issue or post-Issue related problems such as non-receipt of Allotment Advice/letter of Allotment, non-credit of Allotted Units in the respective beneficiary account, non-receipt of refund orders and non-receipt of funds by electronic mode.

PARTIES TO INDIGRID

The summaries of the key terms of certain material contracts and agreements included in this section are not complete and are subject to, and are qualified in their entirety by reference to, the provisions of the respective material contracts and agreements.

A. The Sponsor and Sponsor Group

History and Certain Corporate Matters

Esoteric II Pte. Ltd. is the sponsor of IndiGrid. Esoteric was incorporated under the laws of Singapore as a private company limited by shares. Esoteric, by way of its letter dated September 8, 2020, to the Investment Manager, proposed to seek induction as a 'sponsor' of IndiGrid, in accordance with Regulation 22(7) of the InvIT Regulations. Subsequently, the Unitholders of IndiGrid approved the induction of Esoteric. as a 'Sponsor' of IndiGrid pursuant to the annual general meeting of IndiGrid held on September 28, 2020.

Esoteric II Pte. Ltd. is a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR. Founded in 1976, KKR is a leading global investment firm with approximately US$723 billion of assets under management as of September 30, 2025, that offers alternative asset management as well as capital markets and insurance solutions. KKR sponsors investment funds that invest in private equity, credit and real assets and has strategic partners that manage hedge funds. KKR's insurance subsidiaries offer retirement, life and reinsurance products under the management of Global Atlantic Financial Group. KKR aims to generate attractive investment returns by following a patient and disciplined investment approach, employing world-class people and supporting growth in its portfolio companies and communities. The Sponsor's registered office is situated at 12 Marina View, #11-01, Asia Square Tower 2, Singapore 018961.

Esoteric II Pte. Ltd. currently owns a stake of around 1.17% in IndiGrid. Separately, Electron IM Pte. Ltd., an affiliate of KKR, currently owns 100% of the issued, paid-up and subscribed capital of the Investment Manager

Background of the Sponsor

KKR's Global Infrastructure Strategy

In 2008, KKR established a dedicated infrastructure team and strategy focused on global investment opportunities. KKR has been one of the more active infrastructure investors globally over the past several years, having made approximately 75 infrastructure investments globally and ~US$95 billion in assets under management within infrastructure.

Today, KKR's Infrastructure platform has expanded to include approximately 110 dedicated investment professionals covering a broad spectrum of investment opportunities in various infrastructure subsectors, including: midstream energy, renewables, power & utilities, water and wastewater, waste, telecommunications and transportation, among others. KKR continually monitors infrastructure sectors and infrastructure-related investments for emerging trends, and may identify and prioritize investments in other sectors as conditions change or cycles evolve.

KKR's Track Record in India

KKR has invested more than US$13 billion across all asset classes and strategies with over 40 investments made and more than a dozen active portfolio companies today. KKR believes the long-term economic outlook in India is positive despite recent volatility and continues to see attractive investment opportunities in the country.

India is one of the key markets that KKR's Asia Pacific Infrastructure strategy will actively seek to invest in. KKR believes that population growth is expected to drive significant demand for infrastructure in India over the next 25 years. This, combined with stable macro-economic indicators, structural reforms, infrastructure development tailwinds, and constructive FDI regime will continue to attract foreign capital inflows and provide the needed impetus to make India a compelling infrastructure investment destination.

KKR's private equity current and past investments in India include, but are not limited to:

- Max Financial Services (2016)
- Avendus Capital (2016)
- SBI Life Insurance (2016)
- Indus Towers Limited (f.k.a. Bharti Infratel) (2017 & 2008)
- Max Healthcare Institute (2017)
- Re Sustainability (f.k.a. Ramky Enviro Engineers) (2018)
- Lighthouse Learning (f.k.a. Eurokids) (2019)
- Reliance Jio Platforms (2020)
- Reliance Retail (2020)
- J.B. Chemicals (2020)
- Five-Star Business Finance (2021)
- Lenskart (2021)
- Vini Cosmetics (2021)
- Ness Digital Engineering (2022)
- Advanta Seeds (2022)
- Shriram Insurance (2022)
- Reliance Retail (2023)
- Healthium MedTech (2024)
- Infinx (2024)
- Baby Memorial Hospital (2024)
- Healthcare Global Enterprises (2025)

KKR's current Infrastructure investments in India include:

- IndiGrid (2019)
- Highway Concessions One (2021)
- Hero Future Energies (2022)
- Serentica Renewables (2022)
- LEAP India (2023)

In accordance with the eligibility criteria specified under the InvIT Regulations, the net worth of the Sponsor as on September 30, 2025 was above ₹ 1,000 million.

Neither the Sponsor, nor its promoters or directors, have any interest in any business which Competes or is likely to Compete, either directly or indirectly with the activities of the Trust. "Compete" or "Competing" shall mean engaging in the business of owning, operation and maintenance of (i) inter-state power transmission projects in the Republic of India; and (ii) solar power generation (projects in the Republic of India), other than as set out below:

- Serentica Renewables (Singapore) Private Limited ("**Serentica**") is a joint venture between Greenlake Asia Holdings II Pte. Ltd. ("**Greenlake**") and Serentica Renewables Private Limited (an affiliate of the Sterlite group). Greenlake is a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR. Serentica currently has no operational projects, however, Serentica has secured power purchase agreements totalling to 1.8GW of total project capacity.

- Ardor Holdings II Pte. Ltd., a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR, has invested in Hero Future Energies, a subsidiary of the Hero Group. Hero Future Energies is one of India's leading renewable platforms with a diversified portfolio of 1.8GW of operating projects (1.2GW of solar and 600MW of wind) spread across 7 states.

Notwithstanding the above, the presence of common overlapping directors between the above "Competing" entities will not be deemed to constitute the Sponsor its directors or its promoters having an "interest" in such "Competing" entities

Further, neither the members of the Sponsor Group nor any of the promoters or directors of the Sponsor Group: (i) are debarred from accessing the securities market by SEBI; (ii) are promoters, directors or persons in control of any other company or a sponsor, investment manager or trustee of any other infrastructure investment trust or an infrastructure investment trust which is debarred from accessing the capital market under any order or direction made by SEBI; (iii) are identified as a wilful defaulter by any bank or financial institution or consortium thereof in accordance with the guidelines on wilful defaulters issued by the Reserve Bank of India including the circular issued by the Reserve Bank of India dated July 1, 2015 bearing reference number RBI/2015-16/100 DBR.No.CID.BC.22/20.16.003/2015-16 and our name does not appear in the list of wilful defaulters published by the Reserve Bank of India; or (iv) are fugitive economic offenders declared under section 12 of the Fugitive Economic Offenders Act, 2018.

Directors of the Sponsor

The board of directors of the Sponsor consists of Tang Jin Rong and Goh Ping Hao.

Sponsor Group

The Sponsor, KKR Ingrid Co-Invest L.P., KKR Ingrid Co-Invest GP Limited, KKR Asia Pacific Infrastructure Investors SCSp, KKR Associates AP Infrastructure SCSp, KKR AP Infrastructure S.a.r.l., KKR Asia Pacific Infrastructure Holdings Pte. Ltd. and Esoteric I Pte. Ltd. form the Sponsor Group.

Other Confirmations

As of the date of this Placement Document, the Sponsor and the Sponsor Group are in compliance with the eligibility criteria provided under Regulation 4 of the InvIT Regulations, to the extent applicable to the Sponsor or Sponsor Group, and are "fit and proper persons" as prescribed under the SEBI Intermediaries Regulations.

Further, Tang Jin Rong and Goh Ping Hao are directors of: (a) Galaxy Investments II Pte. Ltd. (a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR), which is the sponsor of the Vertis Infrastructure Trust ("**VIT**") and majority shareholder of Vertis Fund Advisors Private Limited (formerly, Highway Concessions One Private Limited), the investment manager of VIT; and (b) Nebula Asia Holdings II Pte. Ltd, (a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR), which is a member of the sponsor group of VIT and is also a unitholder of VIT.

Unitholding of the Sponsor and the Sponsor Group

For details of the Unitholding of the Sponsor and the Sponsor Group, please see the sections entitled "*Information concerning the Units– Unit holding of IndiGrid as at December 31, 2025*" and "*Information concerning the Units – Unitholding Pattern of unitholders holding more than 5% of the Units of IndiGrid as at December 31, 2025 (excluding the Sponsor and Sponsor Group)"* on pages 322 and 323, respectively.

Key Terms of the Amended and Restated Trust Deed

The Trustee has executed the Amended and Restated Trust Deed with the Settlor, Sponsor and the Investment Manager. The Amended and Restated Trust Deed provides for the powers, duties, rights, liabilities of the Trustee, which are in accordance with the Indian Trusts Act, 1882 and the InvIT Regulations. Further, the Amended and Restated Trust Deed also includes certain provisions in relation to the Unitholders, which, among others, include the rights and liabilities of Unitholders. The key terms of the Amended and Restated Trust Deed are provided below:

- *Powers of the Trustee*

The Trustee has been provided with various powers under the Amended and Restated Trust Deed in accordance with the Indian Trusts Act, 1882 and the InvIT Regulations, including but not limited to:

(i) The Trustee shall, in relation to IndiGrid, have all powers of a person competent to contract, acting as a legal and beneficial owner of such property.

(ii) The Trustee shall have the power to determine, in accordance with the Amended and Restated Investment Management Agreement and the investment objectives, distributions to Unitholders and other rights attached to the Units in compliance with the InvIT Regulations.

(iii) The Trustee shall oversee voting of Unitholders.

(iv) The Trustee shall have the power to do the following, which may be delegated to the Investment Manager: (a) cause the offering of Units through the offer documents; (b) issue and allot Units; (c) cause the offer documents to be provided to investors; (d) summon and conduct meetings of the Unitholders in accordance with the relevant InvIT Documents and the InvIT Regulations; and (e) subject to and only in accordance with the terms of the InvIT Documents and the InvIT Regulations, approve a transfer of Units.

(v) The Trustee shall invest and hold the InvIT Assets in the name of the Trust for the benefit of the Unitholders in accordance with the provisions of the InvIT Regulations, the InvIT Documents, the Amended and Restated Trust Deed and the investment objectives. The Trustee shall be empowered to make investment decisions with respect to the underlying assets or projects of the Trust, including any further investments or divestment, subject to InvIT Regulations, provided such power is delegated to, and exclusively exercised by, the Investment Manager pursuant to the Amended and Restated Investment Management Agreement, and in this regard the Trustee is also empowered to: (a) acquire, hold, manage, trade and dispose off shares, stocks, convertibles, debentures, bonds and other equity or equity-related securities of all kinds issued by any special purpose vehicle, infrastructure projects or securities in India, whether in physical or dematerialized form, including power to hypothecate, pledge or create encumbrances of any kind on such securities held by the InvIT in such SPVs or infrastructure projects to be used as collateral security for any borrowings by the InvIT; (b) keep the capital and monies of the InvIT on deposit with banks or other institutions whatsoever; (c) accept contributions (d) collect and receive the profit, interest, dividend and income of the InvIT as and when the same may become due and receivable; (e) invest in securities or in units of mutual funds in accordance with the InvIT Regulations; (f) invest in money market instruments including government securities, treasury bills, certificates of deposit and commercial papers in accordance with applicable law; (g) to give, provide and agree to provide to any special purpose vehicle financial assistance in the form of investment in share capital of any class including ordinary, preference, participating, non-participating, voting, non-voting or other class, and in the form of investment in securities convertible into share capital; and (h) to invest, acquire, purchase, hold, divest, sale, hypothecate, pledge or otherwise transfer land and building and immovable property of any kind including any rights and interest therein;

(vi) Subject to the provisions of the InvIT Regulations, the Trustee, in consultation with the Investment Manager, shall have the power to make such reserves out of the income or capital as the Trustee may deem proper and any decisions of the Trustee whether made in writing or implied from its acts, so far as the applicable law may permit, shall be conclusive and binding on the Unitholders and all persons actually or prospectively interested under the Amended and Restated Trust Deed.

(vii) The Trustee shall have the power to employ and pay at the expense of the Trust, any agent in any jurisdiction whether attorneys, solicitors, brokers, banks, trust companies or other agents whether associated or connected in any way with the Trustee or not, without being responsible for the default of any agent if employed in good faith to transact any business, including without limitation, the power to appoint agents to raise funds, or do any act required to be transacted or done in the execution of the trusts hereof including the receipt and payment of moneys and the execution of documents.

(viii) The Trustee shall, on behalf of the Trust as set out in the Amended and Restated Trust Deed, have the power to appoint the Investment Manager by the execution of an Investment Management Agreement, on behalf of the Trust, to manage the Trust in accordance with the terms and conditions set out in the Amended and Restated Trust Deed, the Amended and Restated Investment Management Agreement and applicable law.

(ix) The Trustee shall oversee the activities of the Investment Manager in the interest of the Unitholders and ensure that the investment Manager complies with the InvIT Regulations and applicable law shall obtain a compliance certificate from the Investment Manager on a quarterly basis, in the form prescribed by SEBI, if any.

(x) The Trustee shall, on behalf of the Trust as set out in the Amended and Restated Trust Deed, have the power to appoint the Project Managers by the execution of a project implementation and management agreement, on behalf of the Trust, for the operation and management of the InvIT Assets in accordance with the terms and conditions set out in the Amended and Restated Trust Deed, the Project Implementation and Management Agreement and applicable law.

(xi) The Trustee shall oversee activities of the Project Managers in terms of the InvIT Regulations and the project implementation and management agreement and shall obtain a compliance certificate from the Project Managers on a quarterly basis, in the form prescribed by SEBI, if any.

(xii) The Trustee may, in consultation with the Investment Manager, appoint any custodian in order to provide custodian services, and may permit any property comprised in the Trust to be and remain deposited with a custodian or with any person or persons in India or in any other jurisdiction subject to such deposit being permissible under the applicable law.

(xiii) In the event of any capital gains tax, income tax, stamp duty or other duties, fees or taxes (and any interest or penalty chargeable thereon), whatsoever becoming payable in any jurisdiction in respect of the Trust or any part thereof or in respect of documents issued or executed in pursuance of the Amended and Restated Trust Deed in any circumstances whatsoever, the Trustee shall have the power and duty to pay all such duties, fees or taxes (and any interest or penalty chargeable thereon) as well as to create any reserves for future potential tax liability out of the Trust or the income thereof, or to the extent of the amount invested in the Units by the Unitholders, as may be permitted under applicable law, and the Trustee may pay such duties, fees or taxes (and any such interest or penalty) notwithstanding that the same shall not be recoverable from the Trustee. For avoidance of doubt, it is clarified that pursuant to this Amended and Restated Trust Deed, no Unitholder will be required to make a contribution as a capital commitment to the Trust (other than the face value for Units already paid).

(xiv) The Trustee shall, subject to the advice of the Investment Manager, have the power to pay the Trust expenses out of the funds held by the Trust.

(xv) The Trustee shall, in discharge of its duties, have the power to take the opinion of legal/tax counsel in any jurisdiction concerning any disputes or differences arising under the Amended and Restated Trust Deed or any matter relating to the Amended and Restated Trust Deed and the fees of such counsel shall be paid out of the funds held in the Trust.

(xvi) The Trustee may, in execution of the Trust or in exercise of any of the powers hereby or by law given to the Trustee sell, rent or buy any property, or borrow property from or carry out any other transaction with the trustees of any other trust or the executors or administrators of any estate notwithstanding that the Trustee is the same Person as those trustees, executors or administrators or any of them and where the Trustee is the same Person as those trustees, executors or administrators, the transaction shall be binding on all Persons then or thereafter interested hereunder though effected and evidenced only by an entry in the books of accounts of the Trustee, provided such power is delegated to, and exclusively exercised by, the Investment Manager pursuant to the Amended and Restated Investment Management Agreement. The Trustee shall ensure that no conflicts of interest shall arise whilst conducting such activities.

(xvii) The Trustee shall have the power to: (a) accept any property before the time at which it is transferable or payable; (b) pay or allow any claim on any evidence that it thinks sufficient; (c) accept any security movable or immovable in lieu of any amounts payable to it; (d) alter the dates for payment of any amount payable to it; and (e) compromise, compound, abandon or otherwise settle any claim or thing whatsoever relating to the Trust or the Amended and Restated Trust Deed.

(xviii) The Trustee shall, subject to the advice of the Investment Manager, have the power to borrow funds, including any subordinated equity or other funds from any Person or authority (whether governmental or otherwise, whether Indian or overseas) on such terms and conditions and for such periods and for the purpose of the Trust and subject to approval of the Unitholders in accordance with and as may be required in terms of the InvIT Regulations.

(xix) Subject to the conditions laid down in any offer document or placement memorandum, and the InvIT Regulations, the Trustee may, subject to any advice of the Investment Manager, retain any proceeds received by the Trust from any SPV.

(xx) The Trustee may, make rules to give effect to, and carry out the Investment Objectives. In particular, and without prejudice to the generality of such power, the Trustee may provide, not inconsistent with the provisions of the Amended and Restated Trust Deed and the InvIT Regulations, for all or any of the following matters namely: (a) manner of maintaining of the records and particulars of the Unitholders; (b) norms of investment by the InvIT in accordance with the Investment Objectives of the Trust and in accordance with the powers and authorities of the Trustee, as set out herein; (c) matters relating to entrustment / deposit or handing over of any securities or special purpose vehicles of the Trust to any one or more custodians and the procedure relating to the holding thereof by the custodian; (d) such other administrative, procedural or other matters relating to the administration or management of the affairs of the Trust and which matters are not by the very nature required to be included or provided for in the Amended and Restated Trust Deed or by the management thereof and which matters are not in consistent provisions thereof; (e) procedure for seeking the vote of the Unitholders either by calling a meeting or through postal ballot or otherwise; and (f) procedure for summoning and conducting meetings of Unitholders. The aforementioned power to make rules may be delegated by the Trustee to the Investment Manager, subject to the InvIT Regulations and in terms of the Amended and Restated Investment Management Agreement.

(xxi) The Trustee shall cause the Depository to maintain the Depository Register.

(xxii) The Trustee shall advise the Investment Manager in relation to the appointment of valuer, auditors, registrar and transfer agent, merchant bankers, custodian, credit rating agency and any other intermediary or service provider or agent as may be applicable with respect to the activities pertaining to the Trust, in a timely manner, in accordance with the InvIT regulations and applicable law. The Investment Manager shall ensure that the activities of, and the services provided by, any of the intermediaries set out above are as per the provisions of the InvIT Regulations and applicable law.

(xxiii) The Trustee shall review the reports required in terms of InvIT Regulations and applicable law, as submitted by the Investment Manager. In the event such reports are not submitted in a timely manner, the Trustee, after due follow-up, shall intimate the same to SEBI.

(xxiv) The Trustee shall have the power to open one or more bank accounts for the purposes of the InvIT, to deposit and withdraw money and fully operate the same.

(xxv) The Trustee shall have the power to take up with SEBI or with the stock exchange(s) as applicable, any matter which has been approved in any meeting of the Unitholders, if the matter requires such action

(xxvi) Without prejudice to any other provisions of the Amended and Restated Trust Deed, the Trustee shall also have the following powers and authorities:

(a) to institute, conduct, compromise, compound, or abandon any legal proceedings for or on behalf of or in the name of the Trust or the Trustee, and to defend, compound or otherwise deal with any such proceedings against the Trust or Trustee or its officers or concerning the affairs of the Trust, and also to compound and allow time for payment or satisfaction of any equity due and of any claims or demands by or against the Trust and observe and perform in relation to any decisions thereof;

(b) to make and give receipts, releases and other discharges for moneys payable to the Trust and for the claims and demands of the Trust;

(c) to enter into all such negotiations and contracts, and, execute and do all such acts, deeds and things for or on behalf of or in the name of the Trust as the Trustee may consider expedient for or in relation to any of the matters or otherwise for the purposes of the Trust;

(d) to sign, seal, execute, deliver and register according to law all deeds, documents, agreements, and assurances in respect of the Trust;

(e) to negotiate, sign, seal, execute and deliver the InvIT Documents, including but not limited to, any issue agreement, share purchase agreement, services agreement, deed of right of first offer, debenture subscription agreement, escrow agreement, underwriting agreement, loan documentation, draft offer document, offer document, final offer document or any other deed, agreement or document in connection with the Trust or the Units, including any amendments, supplements or modifications thereto;

(f) take into their custody and/or control all the capital, assets, property of the Trust and hold the same in trust for the Unitholders in accordance with the Amended and Restated Trust Deed and the InvIT Regulations; and

(g) generally to exercise all such powers as it may be required to exercise under the InvIT Regulations for the time being in force and do all such matters and things as may promote the Trust or as may be incidental to or consequential upon the discharge of its functions and the exercise and enforcement of all or any of the powers and rights under the Amended and Restated Trust Deed.

(xxvii) Subject to applicable law, the Trustee may at any time, buyback the Units from the Unitholders.

(xxviii) For administrative and operational convenience, the Trustee may, delegate to any committee or any other Person, any powers set out above and the duties set out below, or as available to it under the InvIT Regulations and Applicable Law, including, inter alia, management of the assets and investments of the InvIT vested in it under the Amended and Restated Trust Deed, taking investment decisions, listing and allotment of Units and making distributions in accordance with the InvIT Regulations, provided, however, the Trustee shall remain responsible and liable for any such Persons' acts of commission or omission to the extent that the Trustee itself would have been responsible and liable for such acts except the roles and responsibilities delegated by the Trustee to Investment Manager, Project Managers or any third party expert, or any sub-delegation by the Investment Manager or the Project Manager. Any action taken by such committee or Persons in respect of the InvIT shall be construed as an act done by the Trustee except in case of gross negligence or wilful misconduct or fraud on part of such Person, in which case, such Persons shall indemnify the InvIT and the Unitholders.

- *Duties of the Trustee*

The Trustee shall perform its duties as required under the Amended and Restated Trust Deed in accordance with the Indian Trusts Act, 1882 and the InvIT Regulations, including but not limited to:

(i) The Trustee shall use best endeavors to carry on and conduct the business of the Trust in a proper and efficient manner in the best interest of the Unitholders.

(ii) If so required, the Trustee, on behalf of the Trust, shall, appoint an Investment Manager and/or

Project Managers of the Trust (as applicable) in accordance with the InvIT Regulations.

(iii) If so required, in accordance with the InvIT Regulations and the Amended and Restated Trust Deed, the Trustee shall, on behalf of the Trust enter into the Amended and Restated Investment Management Agreement with the Investment Manager.

(iv) (a) It is the responsibility of the Trustee to ensure that the Investment Manager complies with reporting and disclosure requirements in accordance with InvIT Regulations and in case of any delay or discrepancy require the Investment Manager to rectify such delay or discrepancy on an urgent basis; (b) The Trustee shall oversee activities of the Investment Manager in the interest of the Unitholders, and ensure that the Investment Manager complies with Regulation 10 of the InvIT Regulations, including in relation to reporting and disclosure requirements prescribed thereunder and obtain a compliance certificate from the Investment Manager on a quarterly basis. In case of any delay by the Investment Manager in reporting or any discrepancy in the reports or disclosures, the Trustee shall require the Investment Manager to rectify the same on an urgent basis; (c) The Trustee shall review the transactions carried out between the Investment Manager and its Associates and where the Investment Manager has advised that there may be a conflict of interest, it shall obtain a certificate from a practicing chartered accountant that such transaction is on arm's length basis; (d) The Trustee shall review the valuation report submitted by the Investment Manager; (e) The Trustee shall require the Investment Manager to set up such systems and procedures and submit such reports to the Trustee, as may be necessary for effective monitoring of the functioning of the Trust; (f) The Trustee shall ensure that the Investment Manager convenes meetings of the Unitholders in accordance with the InvIT Regulations and oversee the voting by Unitholders. The Trustee shall ensure that the Investment Manager convenes meetings of Unitholders not less than one every year and the period between such meetings shall not exceed 15 months.

(v) The Trustee shall provide SEBI and the stock exchange(s), where applicable, such information as may be sought by SEBI or by the stock exchange(s) pertaining to the activity of the InvIT. The Trustee shall comply with intimation requirements under the InvIT Regulations, including in relation to intimating SEBI in case of any discrepancy in the operation of the Trust with the InvIT Regulations and the offer document or placement memorandum. The Trustee shall also immediately inform SEBI in case any act which is detrimental to the interest of the Unitholders is noted.

(vi) The Trustee shall at all times exercise due diligence in carrying out its duties and protecting the interests of the Unitholders.

(vii) In case of change in the Investment Manager, due to removal or otherwise, the Trustee shall, prior to such change obtain approval from the Unitholders in accordance with the InvIT Regulations. The Trustee shall appoint a new investment manager within the time period prescribed under the InvIT Regulations. The previous investment manager shall continue to act as such at the discretion of the Trustee until such time as the new investment manager is appointed. The Trustee shall ensure that the new investment manager shall stand substituted as a party in all the documents to which the earlier Investment Manager was a party. The Trustee shall also ensure that the earlier Investment Manager continues to be liable for all its acts of omissions and commissions for the period during which it served as investment manager notwithstanding its termination.

(viii) In case of change in the Project Managers due to removal or otherwise, the Trustee shall appoint a new project manager within the time period prescribed under the InvIT Regulations. The Trustee may, either suo moto or based on the advice of the concessioning authority(ies) appoint an administrator in connection with an infrastructure project for such terms and on such conditions as it deems fit. The previous project manager shall continue to act as the project manager till such time a new project manager is appointed. All costs and expenses in this regard will be borne by the new project manager. The Trustee shall ensure that the new project manager shall stand substituted as a party in all the documents to which the earlier Project Managers was a party. The Trustee shall also ensure that the earlier Project Managers continues be liable for all its acts of omissions and commissions for the period during which it served as project manager, notwithstanding its termination.

(ix) The Trustee shall oversee activities of the Project Managers other than that relating to the revenue streams from the infrastructure projects in terms of the InvIT Regulations and shall obtain a compliance certificate from the Project Managers on a quarterly basis, in the form prescribed by SEBI, if any.

(x) The Trustee shall ensure that in case of Change in Control of the Project Manager, written consent is obtained from the concessioning authority(ies) in terms of the concession agreement(s), prior to such change, if applicable.

(xi) The Trustee shall ensure that subscription amount is kept in a separate bank account in the name of the InvIT and is only utilised for adjustment against allotment of Units or refund of money to the applicant till the time such Units are listed and the same will be utilized for the objectives of the offering as will be mentioned in the offer document.

(xii) The Trustee shall cause the books of accounts of the InvIT to be in accordance with the Amended and Restated Trust Deed.

(xiii) The Trustee shall ensure that all acts, deeds and things are done for the attainment of the Investment Objectives of the InvIT and in compliance with the InvIT Regulations and to secure the best interests of the Unitholders.

(xiv) The Trustee shall file such reports as may be required by SEBI or any other regulatory authority or as required under the InvIT Regulations with regard to the activities carried on by the InvIT.

(xv) The Trustee shall periodically review the status of the Unitholders' complaints and their redressal undertaken by the Investment Manager.

(xvi) The Trustee and its directors, officers, employees and agents shall at all times maintain the greatest amount of confidentiality as regards the activities and assets of the InvIT and such other matter connected with them and the InvIT generally and shall not disclose any confidential information to any other Person, other than the Investment Manager, or the Project Manager, unless such information is required to be disclosed to some regulatory authority, court or any other Person under any order of court or any law in force in India.

(xvii) The assets and liabilities of the InvIT shall at all times be segregated from the assets and liabilities of the Trustee and the assets and liabilities of other trusts managed by the Trustee. The assets held under the InvIT shall be held for the exclusive benefit of the Unitholders and such assets shall not be subject to the claims of any creditor or any Person claiming under any other fund administered by the Trustee or by the Investment Manager respectively.

(xviii) The Trustee shall ensure that the remuneration of the Valuer is not linked to or based on the value of the asset being valued.

(xix) The Trustee shall obtain the prior approval from the Unitholders in accordance with Regulation 22 of the InvIT Regulations and from SEBI in case of Change in control of the Investment Manager.

(xx) The Trustee and its Associates shall not invest in Units of the Trust.

(xxi) The Trustee shall fulfil its obligations in terms of Regulation 9 of the InvIT Regulations.

(xxii) The Trustee shall ensure that the activity of the InvIT is being operated in accordance with the provisions of the Amended and Restated Trust Deed, the InvIT Regulations, other Applicable Law and the InvIT Documents and in case of any discrepancy, it shall inform SEBI immediately in writing.

(xxiii) The Trustee shall maintain records in accordance with the InvIT Regulations.

(xxiv) (a) The Trustee shall delegate all such powers to the Investment Manager as may be required by the Investment Manager to carry out its obligations under the Amended and Restated Investment Management Agreement and under Applicable Law. (b) The Trustee shall delegate all such powers to the Project Managers as may be required by the Project Managers to carry out its obligations under the Project Implementation and Management Agreement and under Applicable Law.

- *Rights of the Trustee*

  The Trustee shall have the following rights:

(i) The Trustee may, in the discharge of its duties, act upon any advice obtained in writing from any bankers, accountants, brokers, lawyers, professionals, consultants, or other experts acting as advisers to the Trustee.

(ii) Subject to applicable law, no Unitholder shall be entitled to inspect or examine IndiGrid's premises or properties without the permission of the Trustee, who shall give such permission, if necessary, in consultation with the Investment Manager. Further, no Unitholder shall be entitled to require discovery of any information respecting any detail of IndiGrid's activities or any matter which may relate to the conduct of the business of IndiGrid and which information may, in the opinion of the Trustee and the Investment Manager adversely affect the interest of the Unitholder.

(iii) Without prejudice to any other provisions of the Amended and Restated Trust Deed, but save as otherwise provided for in any offer document of the Trust, the Trustee shall be entitled to reimburse itself and shall be entitled to charge the Trust, and shall be entitled to be indemnified and be kept indemnified by the Trust and from any distributions made by the Trust to the Unitholders, with the expenses, outgoings, taxes, levies, and liabilities (including indemnity obligations of the Trust, if any) as set out in this Amended and Restated Trust Deed.

- *Liabilities of the Trustee*

The liabilities of the Trustee in terms of the Amended and Restated Trust Deed are as follows:

(i) The Trustee shall only be chargeable for such monies, stocks, funds and securities as the Trustee shall have actually received and shall not be liable or responsible for any banker, broker, custodian or other Person in whose hands the same may be deposited or placed, nor for the deficiency or insufficiency in the value of any investments of the Trust nor otherwise for any involuntary loss. Any receipt signed by the Trustee for any monies, stocks, funds, shares, securities, investment or property, paid, delivered or transferred to the Trustee under or by virtue of the Amended and Restated Trust Deed or in exercise of the duties, functions and powers of the Trustee shall effectively discharge the Trustee or the Person or Persons paying, delivering or transferring the same therefrom or from being bound to see to the application thereof, or being answerable for the loss or misapplication thereof provided that the Trustee and such Persons shall have acted in good faith, without negligence and shall have used their best efforts in connection with such dealings and matters.

(ii) The Trustee shall not be under any liability on account of anything done or omitted to be done or suffered by the Trustee in good faith in accordance with, or in pursuance of any request or advice of the Investment Manager.

(iii) The Trustee may accept as sufficient evidence for the value of any investment or for the cost price or sale price thereof or for any other fact within its competence, a certificate by a valuer or a stockbroker or any other professional Person appointed by the Investment Manager for the purpose.

(iv) The Trustee shall not be under any obligation to institute, acknowledge the service of, appear in, prosecute or defend any action, suit, proceedings or claim in respect of the provisions hereof or in respect of the InvIT Assets or any part thereof or any corporate action which in its opinion would or might involve it in expense or liability unless the Investment Manager shall so request in writing and the Trustee is satisfied that the value of the investment is sufficient to provide adequate indemnity against costs, claims, damages, expenses or demands to which it may be put as Trustee as a result thereof. The costs in relation to such action, suit, proceedings or claims (whether undertaken upon request of Investment Manager or otherwise) incurred by the Trustee in connection with or arising out of the InvIT, shall be borne by the Trust.

(v) The Trustee shall not be liable in respect of any action taken or damage suffered by it on reliance upon any notice, resolution, direction, consent, certificate, affidavit, statement, certificate of stock, plan of reorganization or (without being limited in any way by the foregoing) other paper or document believed to be genuine and to have been passed, sealed or signed by appropriate authorities or entities.

(vi) The Trustee shall not be liable to the Unitholders for doing or failing to do any act or thing which by reason of any provision of any present or future law or regulation made pursuant thereto, or of any decree, order or judgment of any court, or by reason of any request announcement or similar action (whether of binding legal effect or not) which may be taken or made by any Person or body acting with or purporting to exercise the authority of any government (which legally or otherwise) it shall be directed or requested to do or perform or to forbear from doing or performing. If for any reason it becomes impossible or impracticable to carry out any of the provisions of these presents the Trustee shall not be under any liability therefore or thereby.

(vii) The Trustee shall not be responsible to any Unitholder for the authenticity of any signature affixed to any document or be in any way liable for any forged or unauthorized signature on or for acting upon or giving effect to any such forged or unauthorized signature. The Trustee shall be entitled but not bound to require that the signature of any Unitholder to any document required to be signed by him under or in connection with these presents shall be verified to the Trustee's reasonable satisfaction.

(viii) Nothing contained in the Amended and Restated Trust Deed shall be construed so as to prevent the Trustee from acting as a trustee of other trusts or alternate investment funds or venture capital funds or private equity funds or real estate investments trusts or infrastructure investment trusts or private trusts or customised fiduciary trusts separate and distinct from the Trust, and retaining for its own use and benefit all remuneration, profits and advantages which it may derive therefrom, as permitted under applicable law.

(ix) If the Trustee is required by the InvIT Regulations or any applicable law to provide information regarding the Trust and/or the Sponsor and/or Unitholders, the Trust's investments and income therefrom and provisions of these presents and complies with such request in good faith, whether or not it was in fact enforceable, the Trustee shall not be liable to the Unitholders or to any other party as a result of such compliance or in connection with such compliance.

(x) The Trustee shall not incur any liability for any act or omission or (as the case may be), failing to do any act or thing which may result in a loss to a Unitholder (by reason of any depletion in the value of the InvIT Assets or otherwise), except in the event that such loss is a direct result of fraud, gross negligence or wilful default on the part of the Trustee or results from a breach by the Trustee of the Amended and Restated Trust Deed, as determined by a court of competent jurisdiction.

(xi) If the Trustee engages any external advisors or experts (in accordance with the Amended and Restated Deed), to discharge its obligations under the Amended and Restated Deed, or undertakes any work which is not covered within the scope of work of the Trustee under the Amended and Restated Deed and such additional work is beyond the obligations of the Trustee under applicable law, the Trustee shall be entitled to recover such costs, charges and expenses which the Trustee may incur in this regard, from the funds of the Trust. Further, it is clarified that, the Trustee will not be required to utilize funds held by the Trustee for any other trust for which Axis Trustee Services Limited is appointed as a trustee, for discharging its obligations as the Trustee under the Amended and Restated Deed.

(xii) It is hereby clarified that the liability of the Trustee shall be limited to the extent of the fee received by it, in all circumstances whatsoever except in case of any gross negligence or wilful misconduct or fraud on the part of the Trustee as settled by a court of competent jurisdiction.

- *Provisions relating to Unitholders*

(i) Notwithstanding anything to the contrary contained in any of the InvIT Documents, the aggregate liability of each Unitholder in the Trust shall be limited to making the Capital Contribution payable by it in respect of the Units subscribed to by it. For the avoidance of doubt, the Unitholders shall not be responsible or liable, directly or indirectly, for acts, omissions or commissions of the Trustee, the Investment Manager, the Sponsor, or any other Person, whether or not such act, omission or commission, has been approved by the Unitholders in accordance with the InvIT Regulations or not.

(ii) Each Unit allotted to the Unitholders shall have one vote for any decisions requiring a vote of Unitholders.

(iii) No Unitholder shall enjoy preferential voting or any other rights over another Unitholder.

(iv) In no event shall the Trustee or the Investment Manager be bound to make payment to any Unitholder, except out of the funds held by it for that purpose under the provisions of the Amended and Restated Trust Deed.

(v) A Unitholder whose name and account details are entered in the Depository Register shall be the only Person entitled to be recognized by the Trustee as having a right, title, interest in or to the Units registered in his name and the Trustee shall recognize such holder as an absolute owner and shall not be bound by any notice to the contrary and shall also not be bound to take notice of or to see to the execution of any trust, express or implied, save as expressly provided or as required by any court of competent jurisdiction to recognize any trust or equity or interest affecting the title of the Units.

(vi) The Unitholders shall not give any directions to the Trustee or the Investment Manager (whether in a meeting of Unitholders or otherwise) if it would require the Trustee or the Investment Manager to do or omit doing anything which may result in: (a) the Trust or the Trustee, in its capacity as the trustee of the Trust or the Investment Manager, in its capacity as the investment manager of the InvIT ceasing to comply with applicable law; (b) interference with the exercise of any discretion expressly conferred on the Trustee by the Amended and Restated Trust Deed or the Investment Manager by the Amended and Restated Investment Management Agreement, or the determination of any matter which requires the agreement of the Trustee or the Investment Manager, provided that nothing in the Amended and Restated Trust Deed shall limit the right of the Unitholder to require the due administration of the Trust in accordance with the Amended and Restated Trust Deed.

(vii) The depository register shall (save in case of manifest error) be conclusive evidence of the number of Units held by each depositor and in the event of any discrepancy between the entries of the depository register and any statement issued by the depository, the entries in the depository register shall prevail unless the depositor proves to the satisfaction of the Trustee and the depository that the depository register is incorrect.

(viii) The Unitholders shall have the right to call for certain matters to be subject to their consent, in accordance with the InvIT Regulations and applicable law.

(ix) The Unitholders may, in accordance with the provisions of the InvIT Documents and Applicable Law, transfer any of the Units to an investor where such investor accepts all the rights and obligations of the transferor and the Trustee or site Investment Manager shall give effect to such transfer in accordance with applicable law.

(x) The Trustee shall and shall ensure that the Investment Manager obtains the consent of the Unitholders for the matters prescribed under the InvIT Regulations, in accordance with the provisions of the InvIT Regulations.

Further, in accordance with the Amended and Restated Trust Deed, in addition to the fee, distributions and expense reimbursements described in the Amended and Restated Trust Deed, the InvIT Assets shall be utilized to indemnify and hold harmless the Trustee, the Sponsor and any of their respective officers, directors, shareholders, sponsors, partners, members, employees, advisors and agents ("**Indemnified Parties**") from and against any claims, losses, costs, damages, liabilities and expenses, including legal fee ("**Losses**") suffered or incurred by them by reason of their activities on behalf of IndiGrid, suffered or incurred by the Trustee in relation to any proceedings, unless such Losses resulted from fraud, gross negligence or willful misconduct of the Indemnified Parties as determined by a court of competent jurisdiction.

IndiGrid is subject to dissolution and termination in accordance with and subject to the InvIT Regulations and applicable law, in accordance with the conditions set forth in the Amended and Restated Trust Deed.

C. The Investment Manager – IndiGrid Investment Managers Limited

History and Certain Corporate Matters

IndiGrid Investment Managers Limited is the investment manager of IndiGrid and is 100% owned by Electron IM Pte. Ltd., an affiliate of KKR.

Key Terms of the Amended and Restated Investment Management Agreement

The Investment Manager has entered into the Amended and Restated Investment Management Agreement, in terms of the InvIT Regulations. The Amended and Restated Investment Management Agreement provides for powers, duties, rights and liabilities of the Investment Manager, in accordance with the InvIT Regulations, the key terms of which, are set out below:

A. *Powers of the Investment Manager*

The Investment Manager has been provided with various powers under the Amended and Restated Investment Management Agreement in accordance with the InvIT Regulations, including but not limited to:

(i) The Investment Manager shall take all decisions in relation to the management and administration of InvIT Assets and the investments of IndiGrid as may be incidental or necessary for the advancement or fulfilment of the Investment Objectives of IndiGrid in accordance with the InvIT Regulations.

(ii) The Investment Manager shall make the investment decisions with respect to the underlying assets or projects of IndiGrid, including any further investments or divestments, subject to InvIT Regulations and in accordance with the offer document, and in this regard is also empowered to do the following acts on behalf of IndiGrid:

(a) acquire, hold, manage, trade and dispose off shares, stocks, convertibles, debentures, bonds and other equity or equity-related securities and other debt or mezzanine securities of all kinds issued by any SPVs, infrastructure projects in India, whether in physical or dematerialised form, including power to hypothecate, pledge or create encumbrances of any kind on such securities held by IndiGrid in such special purpose vehicles, or infrastructure projects to be used as collateral security for any borrowings by IndiGrid;

(b) keep the capital and monies of IndiGrid in deposit with banks or other institutions whatsoever;

(c) accept contributions;

(d) collect and receive the profit, interest, repayment of principal of debt or debt like or equity or equity like mezzanine securities, dividend, return of capital of any type by the special purpose vehicles, or infrastructure projects and income of IndiGrid as and when the same may become due and receivable;

(e) invest in securities or in units of mutual funds in accordance with the InvIT Regulations;

(f) invest in money market instruments including government securities, treasury bills, certificates of deposit and commercial paper in accordance with applicable law;

(g) to give, provide and agree to provide to any special purpose vehicle's financial assistance in the form of investment in share capital of any class including ordinary, preference, participating, non-participating, voting, non-voting or other class, and in the form of investment in securities convertible into share capital; and

(h) to invest, acquire, purchase, hold, divest, sale, hypothecate, pledge or otherwise transfer land and building and immovable property of any kind including any rights and interest therein.

(iii) The Investment Manager along with the Trustee has appointed the Project Managers by execution of the Project Implementation and Management Agreement.

(iv) The Investment Manager shall oversee activities of the Project Managers with respect to revenue streams from the projects and the Project Implementation and Management Agreement and in terms of the InvIT Regulations and applicable law. The Investment Manager shall obtain a compliance certificate from the Project Managers on a quarterly basis, in the form as may be specified by SEBI.

(v) The Trustee hereby authorizes the Investment Manager to do all such other acts, deeds and things as may be incidental or necessary for the advancement or fulfillment of the Investment Objectives of IndiGrid, as set out in the offer document.

(vi) The Investment Manager shall have the power to issue and allot Units. The Investment Manager shall have the power to accept subscriptions to Units of IndiGrid and issue and allot Units to Unitholders or such other persons and undertake all related activities. Further, the Investment Manager shall, subject to and only in accordance with the terms of the InvIT Documents and applicable law, have the power to transfer the Units.

(vii) The Investment Manager shall cause the depository to maintain a register of Unitholders if required.

(viii) The Investment Manager shall make such reserves out of the income or capital as it may deem proper and any directions of the Trustee in this behalf whether made in writing or implied from their acts shall, so far as the law may permit, be conclusive and binding. Any distribution made from such reserves shall be in accordance with the InvIT Regulations.

(ix) The Investment Manager may cause IndiGrid to borrow, for the purpose of the InvIT and the InvIT Assets and subject to approval of the Unitholders in accordance with the InvIT Regulations.

(x) The Investment Manager shall have the power to exercise all rights of the InvIT in the InvIT Assets, including voting rights, rights to appoint directors, whether pursuant to securities held by it. or otherwise. in such manner as it deems to be in tire best interest of IndiGrid, and in accordance with the InvIT Regulations and applicable law.

(xi) The Investment Manager may use the services of external advisors and rely on the information provided in the due diligence process of assessing investment proposals as it deems necessary in its sole discretion.

(xii) The Investment Manager shall have the power to employ and pay at the expense of the InvIT, any agent in any jurisdiction whether attorneys, solicitors, brokers, banks, trust companies or other agents, without being responsible for the default of any agent if employed in good faith to transact any business, including without limitation, the power to appoint agents to raise funds, or do any act required to be transacted or done in the execution of the responsibilities hereof including the receipt and payment of moneys and the execution of documents.

(xiii) The Investment Manager may appoint any custodian in order to provide custodian services, and may permit any property comprised in IndiGrid to be and remain deposited with a custodian or with any Person or Persons in India or in any other jurisdiction subject to such deposit as authorised by the Trustee and permissible under the applicable law.

(xiv) The Investment Manager, in consultation with the Trustee, shall appoint valuers, auditor, registrar and transfer agent, merchant banker, custodian, credit rating agency or any other intermediary or service provide or agent as may be applicable with respect to the activities pertaining to IndiGrid as per the provisions of the InvIT Regulations and applicable law. The Investment Manager shall appoint an auditor for a period of not more than five consecutive years subject to approval of the Unitholders in terms of the InvIT Regulations.

(xv) In the event of any capital gains tax, income tax, stamp duty or other duties, fees or taxes (and any interest or penalty chargeable thereon) whatsoever becoming payable in any jurisdiction in respect of IndiGrid or any part thereof or in respect of documents issued or executed in pursuance of the Amended and Restated Trust Deed in any circumstances whatsoever, the Investment Manager shall have the power and duty to pay all such duties, fees or taxes (and any interest or penalty chargeable thereon) as well as to create any reserves for future potential tax liability (and any such interest or penalty) out of IndiGrid's income (and any such interest or penalty). For avoidance of doubt, it is clarified that pursuant to the Amended and Restated Trust Deed, no Unitholder will be required to make a contribution as a capital commitment to IndiGrid (other than the issue price for Units allotted).

(xvi) The Investment Manager shall have the power to pay InvIT Expenses out of the funds of IndiGrid, or from any or all of the Special Purpose vehicles or Holding Companies, in such proportion, as may be determined from time to time.

(xvii) The Investment Manager shall have the power to take the opinion of legal / tax counsel in any jurisdiction concerning any difference arising under the Amended and Restated Investment Management Agreement or any matter in any way relating to this Agreement or to its duties in connection with the Amended and Restated Investment Management Agreement.

(xviii) The Investment Manager shall have the power to: (a) accept any property before the time at which it is transferable or payable; (b) pay or allow any equity or claim on any evidence that it thinks sufficient; (c) pay or allow any equity or claim on any evidence that it thinks sufficient; (d) allow any time of payment of any equity; and (e) compromise, compound, abandon, submit to arbitration or otherwise settle any equity account, claim or thing whatsoever relating to IndiGrid or the Amended and Restated Investment Management Agreement.

(xix) Subject to the conditions laid down in any offer document, the Investment Manager may retain the invested capital portion of any proceeds received by IndiGrid from any special purpose vehicles.

(xx) The Investment Manager may. make rules to give effect to. and carry out the Investment Objectives, subject to applicable law. In particular, and without prejudice to the generality of such power, the Investment Manager may provide for all or any of the following matters, namely. In particular, and without prejudice to the generality of such power, the Investment Manager may provide for all or any of the following matters, namely: (a) manner of maintaining of the records and particulars of Unitholders; (b) norms of investment by IndiGrid in accordance with the Investment Objectives of IndiGrid and in accordance with the powers and authorities of the Trustee as set out in the Amended and Restated Trust Deed; (c) matters relating to entrustment / deposit or handing over of any securities or special purpose vehicles of IndiGrid to any one or more custodians and the procedure relating to the holding thereof by the custodian; (d) such other administrative, procedural or other matters relating to the administration or management of the affairs of IndiGrid thereof and which matters are not by the very nature required to be included or provided for in the Deed or by the management thereof and which matters are not in consistent with the provisions thereof; (e) procedure for seeking the vote of the Unitholders either by calling a meeting or through postal ballot or otherwise; and (f) procedure for summoning and conducting of meetings of Unitholders.

(xxi) Subject to applicable law, no Unitholder shall be entitled to inspect or examine IndiGrid's premises or properties without the prior permission of the Investment Manager. Further, no Unitholder shall be entitled to require discovery of any information with respect to any detail of IndiGrid's activities or any matter which may be related to the conduct of the business of IndiGrid and which information may, in the opinion of the Investment Manager adversely affect the interest of other Unitholders.

(xxii) The Investment Manager may buyback the Units from the Unitholders at the end of the Term of IndiGrid or in any other manner in accordance with applicable law, if so directed by the Trustee.

(xxiii) The Investment Manager shall also have the following powers and authorities:

(a) to institute, conduct, compromise, compound, or abandon any legal proceedings for or on behalf of or in the name of IndiGrid, and to defend, compound or otherwise deal with any such proceedings against IndiGrid or the Investment Manager or its officers or concerning the affairs of IndiGrid, and also to compound and allow time for payment or satisfaction of any equity due and of any claims or demands by or against IndiGrid and to refer any differences to arbitration and observe and perform any awards thereof;

(b) to make and give receipts, releases and other discharges for moneys payable to IndiGrid and for the claims and demands of IndiGrid;

(c) to enter into all such negotiations and contracts, and, execute and do all such acts, deeds and things for or on behalf of or in the name of IndiGrid as the Investment Manager may consider expedient for or in relation to any of the matters or otherwise for the purposes of IndiGrid;

(d) to ascertain, appropriate, declare and distribute or reinvest the surplus generally or under IndiGrid, to determine and allocate income, profits and gains and expenses in respect of IndiGrid to and amongst of the Unitholders, to carry forward, reinvest or otherwise deal with any surplus and to transfer such sums as the Investment Manager may, deem fit to one or more reserve funds which may be established by the Investment Manager;

(e) to open one or more bank accounts for the purposes of IndiGrid, to deposit and withdraw money and fully operate the same;

(f) to sign, seal, execute, deliver and register according to law all deeds, documents, and assurances in respect of IndiGrid;

(g) pay out of the income of IndiGrid after deducting all expenses, the income and other distributions in accordance with the InvIT Regulations;

(h) take into their custody and/or control all the capital, assets, property of IndiGrid and hold the same in trust for the Unitholders in accordance with the Deed and the InvIT Regulations;

(i) generally to exercise all such powers as it may be required to exercise under the InvIT Regulations for the time being in force and do all such matters and things as may promote the investment objectives of IndiGrid or as may be incidental to or consequential upon the discharge of its functions and the exercise and enforcement of all or any of the powers and rights under the Amended and Restated Investment Management Agreement and the InvIT Regulations.

B. *Duties of the Investment Manager*

The Investment Manager shall perform its duties as required under the Amended and Restated Investment Management Agreement in accordance with the InvIT Regulations, including but not limited to:

(i) The Investment Manager shall coordinate with the Trustee, as may be necessary, with respect to the operations of IndiGrid.

(ii) The Investment Manager shall ensure that the valuation of InvIT Assets is done by the valuer(s) in accordance with Regulation 21 of the InvIT Regulations.

(iii) The Investment Manager shall arrange for adequate insurance coverage for InvIT Assets in accordance with Regulation 10(7) of the InvIT Regulations. The Investment Manager shall ensure that assets held by the SPVs are adequately insured.

(iv) The Investment Manager shall maintain proper books of accounts, documents and records with respect to IndiGrid, in the manner set out in the Deed, to give a true, fair and accurate account of the investments, expenses, earnings, profits etc. of IndiGrid. The financial year of the InvIT shall begin from the date of the Deed and shall end on the immediately succeeding March 31 and on the anniversary thereof in each succeeding year unless otherwise determined. The Investment Manager shall ensure that audit of the accounts of IndiGrid by the auditors is undertaken in accordance with the InvIT Regulations and such report is submitted to the designated stock exchange within the time stipulated by the designated stock exchange, if any, and in accordance with the InvIT Regulations.

(v) The Investment Manager shall facilitate the appointment of Unitholder Nominee Directors on the Board of Directors of the Investment Manager by eligible unitholders in the manner prescribed under the InvIT Regulations, from time to time, and shall take all actions as may be required under the InvIT Regulations and Applicable Law in relation to the review, monitoring and reporting of the nomination rights. In this regard, the Investment Manager shall comply with all the obligations prescribed under the InvIT Regulations or Applicable Law from time to time, including, *inter alia* informing Unitholders on a periodic basis of the right to nominate Unitholder Nominee Directors, evaluating eligibility of Unitholder Nominee Directors, review of unitholding of eligible unitholder(s) on an ongoing basis, taking requisite actions in relation to the withdrawal of nomination or vacation of office of Unitholder Nominee Directors, and submitting such information and reports to the Trustee in relation to the eligible unitholder(s) and Unitholder Nominee Directors, as may be prescribed from time to time.

(vi) The Investment Manager shall declare distributions to Unitholders in accordance with Regulation 18 of the InvIT Regulations. Subject to Applicable Law, such percentage of the net distributable cash flows of the SPVs, shall be distributed to IndiGrid, in terms of the InvIT Regulations. The distributions shall be made within the time period prescribed by the InvIT Regulations.

(vii) The Investment Manager shall convene meetings of the Unitholders in accordance with Regulation 22 of the InvIT Regulations and maintain records pertaining to the meetings in accordance with Regulation 26 of the InvIT Regulations.

(viii) The Investment Manager shall intimate the Trustee prior to any Change in Control of the Investment Manager to enable the Trustee to seek prior approval from the Unitholders and SEBI in this regard and shall ensure that no such change is given effect to, until the approval of the Unitholders and SEBI has been obtained, or this Agreement is terminated and a new investment manager has been appointed in accordance with the terms hereof, or in compliance with any other requirement under the InvIT Regulations and Applicable Law.

(ix) The Investment Manager will monitor IndiGrid, including monitoring current and projected financial position of IndiGrid and the InvIT Assets including the SPVs. The Investment Manager shall place before its board of directors, a report on the activity and performance of IndiGrid in accordance with the InvIT Regulations. The Investment Manager shall designate an employee from the team or director as the compliance officer for monitoring of compliance with the InvIT Regulations and any circulars or guidelines issued thereunder and intimating SEBI in case of non-compliance.

(x) The Investment Manager shall maintain records pertaining to the activity of IndiGrid in terms of Regulation 26 of the InvIT Regulations.

(xi) The Investment Manager shall manage IndiGrid in accordance with the InvIT Regulations and the investment objectives of IndiGrid and shall ensure that the investments made by IndiGrid are in accordance with the investment conditions enumerated in Regulation 18 of the InvIT Regulations and in accordance with the investment objectives.

(xii) The Investment Manager shall review the transactions carried out between the Project Managers and its Associates and where the Project Managers has advised that there may be a conflict of interest, shall obtain confirmation from a practicing-chartered accountant that such transaction is on an arm’s length basis.

(xiii) The Investment Manager shall ensure adequate and timely redressal of all Unitholders' grievances pertaining to the activities of IndiGrid.

(xiv) The Investment Manager shall submit to the Trustee: (a) quarterly reports on the activities of IndiGrid including receipts for all funds received by it and for all payments made, status of compliance with the InvIT Regulations, specifically Regulations 18, 19 and 20 of the InvIT Regulations, performance report, status of development of under-construction projects, within the time period specified under the InvIT Regulations; (b) valuation reports as required under the InvIT Regulations within the time period specified under the InvIT Regulations; (c) proposal to acquire or sell or develop or bid for any asset or project or expand existing completed assets or projects along with rationale for the same; (d) details of any action which requires approval from the Unitholders as may be specified under the InvIT Regulations; (e) details of transactions it enters into with its Associates; (f) details of any other material fact including change in its directors, change in its shareholding, change in control of the Investment Manager, any legal proceedings that may have a significant bearing on the activity of IndiGrid, within seven working days of such action; (g) details, including reports and any other information, in relation to eligible unitholders or Unitholder Nominee Directors, as stipulated under the InvIT Regulations and Applicable Law, from time to time and (h) such information, document and records as pertaining to the activities of IndiGrid as may be reasonably necessary for the Trustee with respect to its responsibilities under the Deed or the InvIT Regulations. In the event of failure of the Investment Manager to submit information or reports as specified above in a timely manner and in terms of the InvIT Regulations, the Trustee shall intimate SEBI.

(xv) The Investment Manager shall be responsible for all activities pertaining to the issue and listing of the Units of IndiGrid in accordance with Applicable Law including: (a) filing of offer document with SEBI; (b) filing the draft and final offer document with SEBI and the stock exchanges within the prescribed time period; (c) dealing with all matters up to allotment of Units to the Unitholders; (d) obtaining in-principle approval from the designated stock exchange; and (e) dealing with all matters relating to the issue and listing of the Units of IndiGrid as specified under Chapter IV of the InvIT Regulations and any guidelines as may be issued by SEBI in this regard.

(xvi) The Investment Manager is also responsible to ensure that the disclosures made in any offer document or offer document contain material, true, correct and adequate disclosures and are in accordance with the InvIT Regulations and Applicable Law, and such offer document or placement memorandum should not contain any untrue statement of a material fact or omits to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading

(xvii) In case of occurrence of any event specified in Regulations 17(1)(a) to 17(1)(g) of the InvIT Regulations, the Investment Manager shall apply for delisting of units of IndiGrid to SEBI and the designated stock exchange in accordance with the InvIT Regulations and applicable law.

(xviii) The Investment Manager shall within the time period prescribed under the InvIT Regulations, submit an annual report to all the Unitholders electronically or provide physical copies and to the designated stock exchanges.

(xix) The Investment Manager shall, in accordance with the requirements of the InvIT Regulations and other Applicable Laws, including any requirements prescribed by SEBI or the stock exchanges from time to time, disclose half-yearly reports within the time period prescribed under the InvIT Regulations to stock exchanges and provide any information having bearing on the operation or performance of IndiGrid as well as price sensitive information and other information that is required in terms of the InvIT Regulations and applicable law.

(xx) Without prejudice to any other provision of the Amended and Restated Investment Management Agreement, the Investment Manager will also have the following duties and obligations:

(a) ensure that computation and declaration of net asset value of IndiGrid is based on the valuation done by the valuer in accordance with the InvIT Regulations;

(b) maintain regular interaction with the Trustee on performance of IndiGrid and providing the Trustee with any information in relation to the operations of IndiGrid as maybe required;

(c) conducting its affairs and the affairs of IndiGrid in such a manner that no Unitholder will have any personal liability (except to the extent of their Unitholding, where such Unit is partly paid) with respect to any liability or obligation of IndiGrid;

(d) maintaining relationships with the Unitholders of IndiGrid and keep them updated on investment activities of IndiGrid in accordance with the terms of the InvIT documents;

(e) collecting all dividends, fee, property and other payments due and receivable by IndiGrid declaring distribution to the Unitholders in the manner set out in the Amended and Restated Trust Deed and in terms of the InvIT Regulations;

(f) to ensure that no commission or rebate or any other remuneration, arising out of transaction pertaining to IndiGrid is collected by the Investment Manager or its Associates, other than as specified in the offer document or any other document as may be specified by SEBI for the purpose of the issue of the units of IndiGrid;

(g) to ensure that InvIT assets including the SPVs, have proper legal titles, to the extent applicable and that all the material contracts entered into on behalf of IndiGrid or IndiGrid's assets are legal, valid, binding and enforceable by and on behalf of IndiGrid;

(h) to ensure that the activities of the intermediaries or agents or service providers appointed by it are in accordance with the InvIT Regulations or any guidelines or circulars issued thereunder;

(i) to ensure that any possible conflict of interest involving its role as Investment Manager is reported to the Trustee;

(j) to ensure that disclosures or reporting to Unitholders, SEBI, the Trustee and the designated stock exchange(s) are in accordance with the InvIT Regulations and any other applicable law;

(k) provide SEBI, the designated stock exchanges and Trustee, where applicable, such information as may be sought by SEBI or by the designated stock exchanges or Trustee pertaining to the activity of IndiGrid;

(l) to inform the Trustee in writing about any change in the representations and warranties provided by it under the Amended and Restated Investment Management Agreement during the term of the Amended and Restated Investment Management Agreement; and

(m) taking any other actions reasonably incidental to any of the foregoing or necessary or convenient in order to fully effect or evidence any action or transaction contemplated under the Amended and Restated Investment Management Agreement.

(xxi) The Investment Manager shall provide to the Trustee such assistance as may be required by the Trustee in fulfilling its obligation towards IndiGrid under Applicable Law or as may be required by any regulatory authority with respect to IndiGrid.

C. *Liabilities of the Investment Manager*

The liabilities of the Investment Manager in terms of the Amended and Restated Investment Management Agreement are as follows:

(i) The Investment Manager shall not be liable in respect of any action taken or damage suffered by it on reliance upon any notice, resolution, direction, consent, certificate, affidavit, statement, certificate of stock, plan of reorganization or (without being limited in any way by the foregoing) other paper or document believed to be genuine and to have been passed, sealed or signed by appropriate authorities or entities.

(ii) The Investment Manager shall not be liable to the Unitholders for doing or failing to do any act or thing which by reason of any provision of any present or future law or regulation made pursuant thereto, or of any decree, order or judgment of any court, or by reason of any request announcement or similar action (whether of binding legal effect or not) which may be taken or made by any person or body acting with or purporting to exercise the authority of any government (which legally or otherwise) it shall be directed or requested to do or perform or to forbear from doing or performing. If for any reason it becomes impossible or impracticable to carry out any of the provisions of these presents, the Investment Manager shall not be under any liability therefore or thereby. However, it shall duly inform the Trustee and the Unitholders of the same.

(iii) If the Investment Manager is required by the InvIT Regulations or any applicable law to provide information regarding IndiGrid and/or the Unitholders, InvIT investments and income therefrom and provisions of these presents and complies with such request in good faith, whether or not it was in fact enforceable, the Investment Manager shall not be liable to the Unitholder or any of them or to any other party as a result of such compliance or in connection with such compliance.

(iv) The Investment Manager shall not incur any liability for any act or omission which may result in a loss to a Unitholder (by reason of any depletion in the value of InvIT Assets or otherwise), except in the event that such loss is a result of fraud or negligence or default on the part of the Investment Manager, or where the Investment Manager fails to exercise due care in relation to its obligations under the Amended and Restated Investment Management Agreement.

(v) If the distributions are not made within the period prescribed in the InvIT Regulations, the Investment Manager shall be liable to pay interest to the Unitholders at the rate as may be prescribed in the InvIT Regulations until the distribution is made and such interest shall not be recovered in the forms of fee or any other form payable to the Investment Manager by IndiGrid.

(vi) The Investment Manager shall be liable to any Unitholder for the authenticity of any signature or of any seal affixed to any endorsement or other document affecting the title to or the transmission of Units or interests in IndiGrid or of any investments of the InvIT or be in any way liable for any forged or unauthorized signature or seal affixed to such endorsement, transfer or other document or for acting upon or giving effect to any such forged or unauthorized signature or seal. The Investment Manager shall be bound to require that the signature of any Unitholder to any document required to be signed by such Unitholder, under or in connection with these presents shall be verified to its reasonable satisfaction.

Further, in terms of the Amended and Restated Investment Management Agreement, in addition to the fees, distributions and expense reimbursements herein described, the Trustee shall, from the InvIT Assets, indemnify and hold harmless the Investment Manager and its respective officers, directors, shareholders, partners, members, employees, advisors and agents ("**Indemnified Parties**") from and against any claims, losses, costs, damages, liabilities, suits, proceedings and expenses, including legal fees ("**Losses**") suffered or incurred by them by reason of their activities on behalf of IndiGrid, unless such Losses have resulted from fraud, negligence, dishonest acts of commissions or omissions, reckless disregard of duty or breach of duties under the Amended and Restated Investment Management Agreement and applicable law and wilful misconduct of the Indemnified Parties.

The Trustee, its directors, employees, officers ("**Trustee Party**") shall be indemnified by the Investment Manager against any and all direct and actual losses, actions, claims, suits, proceedings, damages, liabilities, costs and expenses including legal fees, incurred or suffered by the Trustee Party in connection with the breach of any of the terms of the Amended and Restated Investment Management Agreement by the Investment Manager, or failure in furnishing information required by SEBI or any regulatory authority with respect to IndiGrid, or furnishing wrong information by the Investment Manager under the InvIT Regulations or related to IndiGrid including in any offer documents, or arising out of gross negligence, wilful default or misconduct or fraud on part of the Investment Manager, in carrying out its obligations under the Amended and Restated Investment Management Agreement, the Amended and Restated Trust Deed, other InvIT documents, any information memorandum / offer documents and Applicable Law. The Trustee acknowledges and agrees that the aggregate maximum liability of the Investment Manager in each financial year, shall be limited to the aggregate fees payable to the Investment Manager for the immediately preceding two financial years, in accordance with the terms of the Amended and Restated Investment Management Agreement, provided that such aggregate maximum liability shall not be applicable in the event such liability of the Investment Manager to indemnify the Trustee Party arises in connection with any gross negligence, wilful default or misconduct or fraud of the Investment Manager.

The Amended and Restated Investment Management Agreement is effective from the date of execution of the Amended and Restated Investment Management Agreement and shall terminate in accordance with the terms of the Amended and Restated Investment Management Agreement. The appointment of the Investment Manager may be terminated by the Trustee or the Unitholders, in accordance with the procedure specified under the InvIT Regulations.

Unitholding of the Investment Manager

For details of the Units held by the Investment Manager, please see the sections entitled "*Information Regarding the Units – Unitholding of the Sponsor, Investment Manager, Project Managers and Trustee*" on page 323.

D. The Project Managers

IndiGrid Limited

IndiGrid Limited is the Project Manager for our Portfolio Assets, apart from KBPL, GBPL and RBPL.

Neither IGL nor any of the promoters or directors of IGL (i) is debarred from accessing the securities market by SEBI; (ii) is a promoter, director or person in control of any other company or a sponsor, investment manager or trustee of any other infrastructure investment trust or an infrastructure investment trust which is debarred from accessing the capital market under any order or direction made by SEBI; (iii) is in the list of wilful defaulters published by the RBI; or (iv) are Fugitive Economic Offenders.

Consequent to the merger of Virescent Infrastructure Investment Manager Private Limited into IGL, IGL is also the settlor of Vertis Infrastructure Trust.

Key terms of the Project Implementation and Management Agreement(s) with IGL

IGL has entered into the IGL Project Implementation and Management Agreement, in terms of the InvIT Regulations, which provides the scope of services, functions, duties and responsibilities of IGL with respect to the Transmission Assets and the Solar Assets.

The functions, duties and responsibilities of the IGL in terms of the IGL Project Implementation and Management Agreement and the InvIT Regulations are as follows:

(i) IGL shall undertake implementation, development, maintenance, operation and management of IndiGrid's assets including making arrangements for the appropriate maintenance, either directly or through the appointment and supervision of agents, if any, as may be necessary for discharge of its duties under the terms of the relevant IGL Project Implementation and Management Agreement, the O&M agreements and under the InvIT Regulations.

(ii) IGL shall, either directly or through appropriate agents, oversee the progress of development, approval status and other aspects of InvIT assets that may be under development or, of any new projects, until its completion in accordance with any agreement that may be entered into in this regard, including the supervision of agents appointed for such purpose.

(iii) IGL shall discharge all obligations in respect of achieving timely completion of the infrastructure projects, wherever applicable, implementation, development, maintenance, operation and management of the infrastructure projects in terms of the O&M agreements, the relevant IGL Project Implementation and Management Agreement and the InvIT Regulations.

(iv) IGL shall provide compliance certificate(s), as may be specified, to the Investment Manager and the Trustee in accordance with the InvIT Regulations, in the form prescribed by SEBI, if any.

(v) IGL provide the Investment Manager details of transactions carried out between itself and its associates and disclose any conflict of interest in such cases to the Investment Manager, in accordance with the InvIT Regulations.

(vi) IGL shall intimate the Trustee prior to any change in control of IGL to enable the Trustee to seek approval from the relevant authority in accordance with the TSAs or other project documents pertaining to the InvIT Assets, if applicable.

(vii) IGL shall provide to the Trustee and Investment Manager or to such other person as the Trustee and/or the Investment Manager may direct, all information that may be necessary for each of them to maintain the records of IndiGrid and as may be required for making submissions to SEBI or other Governmental authority, including with respect to relevant approvals, consents and other documents required in relation to the project and the reporting requirements under the InvIT Regulations, in a proper and timely manner, and in the format prescribed (if any), as required by the Trustee and /or Investment Manager.

(viii) IGL shall appoint one of its qualified employees reasonably acceptable to the Investment Manager and the each of the relevant Portfolio Assets with adequate and appropriate experience as a principal contact for the board of directors of each relevant Portfolio Asset, the Trustee and the Investment Manager in relation to the project and the services. IGL shall have full authority, to receive directions and instructions from each relevant Portfolio Asset and to take action in relation to and ensure compliance with such directions and instructions and report back to each relevant Portfolio Asset, Trustee and the Investment Manager.

(ix) IGL shall at all time ensure that the transactions or arrangement entered into by it with a related party is on an arm's-length basis.

(x) IGL shall promptly inform the parties to the relevant IGL Project Implementation and Management Agreement in writing of any act, occurrence or event, which IGL believes is reasonably likely to increase the cost of or the time for implementation taken in relation to a project, or materially to change the financial viability, quality or function of the project.

(xi) IGL shall be liable to the other parties to the relevant IGL Project Implementation and Management Agreement for any direct loss or damage attributable to the non-performance or breach of the obligations of IGL including those of the agents, under the relevant IGL Project Implementation and Management Agreement. Except as set out in the relevant IGL Project Implementation and Management Agreement, the Trustee and the Investment Manager acknowledge and agree that the aggregate maximum liability of IGL shall be limited to the fee payable to IGL in accordance with the terms of the relevant IGL Project Implementation and Management Agreement.

(xii) The duties of Project Managers shall also include the following:

(a) supervision of revenue streams from IndiGrid's assets and providing the necessary certification as may be required under applicable laws and the InvIT Regulations;

(b) execution and completion of activities in relation to relevant InvIT Assets under development in accordance with and in the manner contemplated in any agreement entered into by InvIT Assets;

(c) exercise diligence and vigilance in carrying out its duties and protecting relevant InvIT Assets;

(d) keeping the Investment Manager informed on all matters which have a material bearing on the operations of relevant InvIT Assets;

(e) liaising with governmental authorities in respect of its obligations under the IGL Project Implementation and Management Agreement and the O&M Agreements;

(f) take appropriate measures to mitigate the risks which may be encountered by the InvIT in respect of the relevant InvIT Assets;

(g) keep proper records for actions taken in respect of relevant IndiGrid's assets; and

(h) complying with the instructions of the Investment Manager and the Trustee and the provisions of the InvIT Regulations.

(xiii) In case of any inconsistency or discrepancy between the relevant IGL Project Implementation and Management Agreement and the O&M agreements, IGL shall bring the same into the notice of the Trustee. The Trustee, in consultation with the Investment Manager, shall issue instructions for resolving the inconsistency. IGL shall be bound to comply with the instructions of the Trustee.

(xiv) Notwithstanding anything to the contrary contained in the relevant IGL Project Implementation and Management Agreement, nothing contained in the relevant Project Implementation and Management Agreement shall be construed to limit or restrict the performance of any duties or obligations of IGL, Investment Manager or the Trustee contained in the InvIT Regulations and other applicable law.

(xv) During the term of the relevant IGL Project Implementation and Management Agreement, in the event the representations provided by IGL under the relevant IGL Project Implementation and Management Agreement, become untrue or incorrect or incomplete in any respect, IGL shall, within a reasonable time, inform the Trustee and Investment Manager of such event.

The IGL Project Implementation and Management Agreement shall remain effective, unless terminated by the parties in accordance with the provisions of the IGL Project Implementation and Management Agreement or extended by mutual consent expressed in writing by the Parties to the IGL Project Implementation and Management Agreement, for the period that the Transmission Agreements or Project Agreements (as applicable) are in force.

(xiii). comply with/provide and/or undertake any other obligation, compliance, reports, certificate or information as requested by IndiGrid Infrastructure Trust, Axis Trustee Services Limited or Sterlite Investment Managers Limited or as required under the InvIT Regulations; and

(xiv). ensure co-ordination with other contractors for smooth functioning of Project.

Fees and other expenses: The remuneration, cost and expense for the Independent Engineer and Safety Consultant, each as defined in the O&M Agreement, engaged for the Project by the Employer, would be paid by the Employer and the same would be recovered from the Contractor, as specified in the O&M Agreement. Further, the Contract Price (as defined in the O&M Agreement), shall be payable by the Employer to the Contractor as specified in the O&M Agreement.

Indemnity:

(i). The Contractor will indemnify, defend, save and hold harmless the Employer and its officers, servants, agents, Employer owned and/or controlled entities / enterprises, against any and all suits, proceedings, actions, demands and claims from third parties for any loss, damage, cost and expense of whatever kind and nature, whether arising out of any breach by the Contractor of any of its obligations under O&M Agreement or any related agreement or on account of any defect or deficiency in the provision of services by the Contractor to any user or from any negligence of the Contractor under contract or tort or on any other ground whatsoever, except to the extent that any such suits, proceedings, actions, demands and dams have arisen due to any negligent act or omission, or breach or default of the O&M Agreement on the part of the Employer.

(ii). The Employer shall indemnify, defend, save and hold harmless the Contractor against any and all suits, proceedings, actions, demands and claims from third parties for any loss, damage, cost and expense of whatever kind and nature arising out of defect in title and/or the rights of the Employer in the Project and site comprised in the Project, and/or (1) breach by the Employer of any of its obligations under the O&M Agreement or any related agreement, which materially and adversely affect the performance by the Contractor of its obligations under the O&M Agreement, save and except that where any such claim, suit, proceeding, action, and/or demand has arisen due to a negligent act or omission, or breach of any of its obligations under any provision of the O&M Agreement or any related agreement and/or breach of its statutory duty on the part of the Contractor, its subsidiaries, affiliates, contractors, servants or agents, the same shall be the liability of the Contractor.

(iii). The Contractor shall indemnify the Employer specifically for loss of Unitary Charges (as defined in the O&M Agreement)/other revenue payable to the Employer or any penalty payable by the Employer to HVPNL under the JKTPL TSA due to a default under the JKTPL TSA, to the extent that such default can be clearly identified to failure of the respective assets under control of the related O&M Contractor under the O&M Agreement.

Termination

(i). As per the O&M Agreement, it is agreed between the Contractor and the Employer that in the event any party commits material breach of any of the terms and conditions contained in the O&M Agreement, and fails to remedy such breach within a period of 30 days from the date of receiving a notice from the other party in that case the other party shall have the right to terminate the O&M Agreement by giving 30 days' notice to the party in breach.

(ii). Any compensation payable to the Contractor in case of termination, for reasons not attributable to Contractor's default to perform its obligations under the O&M Agreement, shall be mutually decided among the parties at the time of termination;

(iii). The O&M Agreement shall terminate automatically upon termination of the JKTPL TSA. If the termination of the JKTPL TSA is attributable directly or indirectly to Contractor's failure to perform its obligations under the O&M Agreement or any force majeure event the Contractor shall not be entitled to any termination compensation or breakage costs

(iv). The Contractor agrees that upon the termination of the JKTPL TSA, directly or indirectly attributable to the Contractor's failure to perform, the Contractor shall be responsible for and shall Indemnify the Employer for

(a). the amount that HVPNL calls upon the issuing bank to pay under the Performance Security (as defined in the O&M Agreement) and the costs of procuring the Performance Security

(b). the amount required to discharge the Employer's debt due to the Senior Lenders (as defined in the O&M Agreement), Including the principal, Interest, finance charges, penal interest and any other fees, costs, or charges payable to the Senior Lenders; and

(c). any amount payable by the Employer to HVPNL for any defects or deficiencies in the Works.

Work Order with PrKTCL

PrKTCL (the "**Owner**") issued a work order to IndiGrid Limited (the "**Service Provider**") dated March 2, 2021 (the "**Work Order**"). The Work Order was subsequently amended on May 14, 2021 to set out the price for the Services (as defined in the Work Order) to be performed under the Work Order.

Services: The Work Order has been issued to the Service Provider for providing services in connection with the operations of a project, comprising the inter-state transmission system for evacuation of power from the Parbati-II HEP implemented by NHPC Limited and Koldam HEP implemented by NTPC Limited (the "**Project**"), in accordance with the terms and conditions set out in the Work Order.

Scope of work: The scope of work for the Service Provider includes, amongst others, (i) routine and preventive maintenance, (ii) corrective maintenance, (iii) emergency response, (iv) certain project manager responsibilities such as implementation, development, maintenance, operation and management of the Project, pursuant to and in accordance with the InvIT Regulations, (v) document management system, (vi) compliance management, (vii) operational excellence, (viii) regulatory support, (ix) IT systems support, and further as specified in the Work Order (the "**Services**").

Obligations of the Service Provider: The obligations of the Service Provider, as set out in the Work Order is as follows:

(i). Service Provider warrants that all Services shall be in accordance with currently accepted professional engineering standards and practices for services of a similar nature. Any non-conformances to the currently accepted prudent practices shall be immediately informed to the Owner. In case of major non-conformance materially impacting safety and quality of equipment and personnel, same has to be communicated at the earliest but not later than 2 hours from the time of such finding.

(ii). Services shall be complete, accurate and correct in all the respect. If during the discharge of the Services, any of the information or the report review supplied by the Service Provider is found to be incomplete and incorrect, it will be completed or, as the case may be, corrected by Service Provider without any additional charge to the Owner.

If any Services, prove to be deficient in that they fail to meet the requirement of codes and/or standards set forth in the specifications, or any engineering information proves to be incomplete or incorrect, then Service Provider shall correct the said deficient services as necessary to remedy the defect without any additional charge to the Owner. The Service Provider shall furnish the Owner such information relating to the Services from time to time and upon reasonable request. In case the change in scope is of major and fundamental nature, proper compensation shall be mutually agreed upon based on re- execution or modification work. However, minor changes shall be accommodated by the Service Provider without change in price.

(iii). In rendering the Services, the Service Provider undertakes that:

(a). It shall comply with the Owner's internal policies including the Owner's code of conduct/ethics and insider trading code of the Owner (as may be delivered by the Owner to the Service Provider or as published on its website) and ensure that it renders its obligations to the satisfaction of the Owner;
(b). It holds all valid licenses, registration and permissions that are required under the applicable laws for carrying out the Services;
(c). It will comply with applicable Union, State and local laws, ordinance, regulations in performing its obligations including procurement of licenses, permissions, certificates, etc, and payment of taxes, if required;
(d). It will provide regular updates at such intervals as may be specified by the Owner with respect to Services provided in terms of the Work Order;
(e). It shall ensure that the Services rendered to the Owner are of high order, quality and standard, performance which must be commensurate with the expectations of the Owner;
(f). It shall not use the name and/or logo of the Owner in any manner either for credit arrangements or otherwise. It is agreed that the Owner will not in any way be responsible for the debts, liabilities or obligations of the Service Provider and/or his employees or agents or services.
(g). It shall render the Services in a lawful manner;
(h). It shall perform and observe all rules and regulations of the Owner as may be applicable;
(i). It shall not do or cause to be done anything, which is prejudicial to the interest of Owner or whereby the business or reputation of the Owner may be injured or damaged;
(j). It shall not assign the Work Order and or any of its obligations under the Work Order to any third party without the prior written consent of the Owner;
(k). It shall not enter into any agreement with any contractor or sub-contractor in connection with the Services to be provided under the terms of the Work Order without the prior written consent of the Owner; and
(l). It shall in a proficient and diligent manner perform all the Services.

Indemnity: As per the Work Order, the Service Provider has agreed to indemnify the Owner and its directors, executives, employees and agents and to keep them fully indemnified against all losses, damages, harm or injury which the Owner/or and its directors, executives, employees and agents may suffer due to or in connection with:

(i). reasons or acts of omission or commission attributable to the Service Provider and the employees or personnel deputed by the Service Provider,
(ii). breach or non-performance by the Service Provider of any of their obligations or Duties or covenants under the Work Order,
(iii). suits, proceedings, claims, demands or actions of any nature which may be filed against the Owner and/or its directors, executives, employees and agents by any third party in connection with the Services provided or any worker or agent of the Service Provider;
(iv). the representations or warranties made by the Service Provider to the Owner being untrue, incorrect or misleading;
(v). non-observance or non-performance by the Service Provider of the terms, conditions, agreements and provisions contained in the Work Order and/or the statutory rules and regulations applicable and in force, from time to time, for carrying out its obligations under the Work Order; or
(vi). any damage caused to the Products while the Service Provider is performing the Services.

The indemnity given by the Service Provider as specified in the Work Order, shall not be affected by; (i) the termination of the Work Order; (ii) the Service Provider being wound up or liquidated or amalgamated with any other company; (iii) any of the terms and/or conditions of the Work Order being changed or altered; and (iv) any time being given for performance as a result of breach on part of the Service Provider being waived by Owner.

Termination: As per the Work Order, the Owner has the right to terminate the Work Order upon notice of 15 days or upon appointment of a new service provider/ project manager (whichever is later) in the event of:

(i). failure of Service Provider to perform the Services in accordance with the terms of the Work Order and to the entire satisfaction of Owner without any further cost to the Owner from the date of notice;
(ii). the Service Provider is unable to pay its debts or becomes insolvent or an order is made or a resolution passed for the administration, winding-up or dissolution of the Service Provider (otherwise than for the purposes of amalgamation or reconstruction) or an administrator or other receiver, manager, trustee, liquidator, administrator, or similar officer is appointed over all or any substantial part of the assets of the Service Provider or the Service Provider enters into or proposes any composition or arrangement with its creditors generally or anything analogous to the foregoing occurs in any applicable jurisdiction;
(iii). the death or incapacity of the principal officer or a partner of the Service Provider if in the opinion of the Owner, the principal officer or partner was mainly responsible to look after the obligations of the Service Provider;
(iv). the failure of the Service Provider to obtain or keep in effect any license or permit required by state or local laws for performance of the Service Provider's obligation under the Work Order or suffers violation of any law, ordinance, rule or regulation of any governmental agency in connection with Services conducted by the Service Provider;
(v). the filing of or conviction of the Service Provider or any of its partners or principal officers or officers or managers of any crime involving moral turpitude or felony or any other crime or offense that is likely to adversely affect the reputation of the Owner;
(vi). assignment or an attempt to assign the Work Order without the Owner's prior written consent; and
(vii). the representations and warranties made by the Service Provider under the Work Order are false or misleading.

In any such event, the Owner shall be entitled to get the work completed through any third party at the risk and cost of Service Provider and recover the amount from the amounts payable to Service Provider. If sufficient balance is not available from the amounts remaining to be paid to Service Provider, then Owner may recover the amount through other means.

Notwithstanding anything contained in the Work Order, the Owner may also terminate the Work Order or all or any part of the Services for convenience or on being instructed so by Axis Trustee Services Limited (acting as the trustee of IndiGrid Infrastructure Trust, being the ultimate parent of the Owner) at any time *without* assigning any reason by providing Service Provider with thirty (30) days prior written notice of termination specifying a termination date. Upon such termination of the Work Order, the Owner shall pay to Service Provider the charges incurred up to the date of termination for the Services, together with any other payments due and payable in accordance with the provisions of the Work Order subject to the right to set off or adjust any amounts that may be due to the Owner by the Service Provider. The Service Provider shall continue to be liable for all its acts of omissions and commissions for the period during which it served as the Service Provider until cessation of work. Further, the terms of nature that are intended to survive the expiry or termination of the Work Order, shall continue to survive.

Enerica Infra 1 Private Limited

Enerica Infra 1 Private Limited is the Project Manager for KBPL, GBPL and RBPL.

Neither EIPL 1 nor any of the promoters or directors of EIPL 1 (i) is debarred from accessing the securities market by SEBI; (ii) is a promoter, director or person in control of any other company or a sponsor, investment manager or trustee of any other infrastructure investment trust or an infrastructure investment trust which is debarred from accessing the capital market under any order or direction made by SEBI; (iii) is in the list of wilful defaulters published by the RBI; or (iv) are Fugitive Economic Offenders.

Key terms of the Project Implementation and Management Agreement with EIPL 1

EIPL 1 has entered into the EIPL 1 Project Implementation and Management Agreement, in terms of the InvIT Regulations, which provides the scope of services, functions, duties and responsibilities of EIPL 1 with respect to certain of our Portfolio Assets.

(i) The functions, duties and responsibilities of the EIPL 1 in terms of the EIPL 1 Project Implementation and Management Agreements and the InvIT Regulations are as follows:EIPL 1 shall undertake implementation, development, maintenance, operation and management of the relevant projects including making arrangements for the appropriate maintenance, either directly or through the appointment and supervision of agents, if any, as may be necessary for discharge of its duties under the terms of this Agreement, the relevant project agreement and under the InvIT Regulations.

(ii) EIPL 1 shall, either directly or through appropriate agents, oversee the progress of development, approval status and other aspects of the relevant projects that may be under development or, of any new projects, until its completion in accordance with any agreement that may be entered into in this regard, including the supervision of agents appointed for such purpose.

(iii) EIPL 1 shall discharge all obligations in respect of achieving timely completion of the infrastructure projects, wherever applicable, implementation, development, maintenance, operation and management of the infrastructure projects in terms of the relevant project agreements, the EIPL 1 Project Implementation and Management Agreement and the InvIT Regulations.

(iv) EIPL 1 shall provide compliance certificate(s), as may be specified, to the Investment Manager and the Trustee in accordance with the InvIT Regulations, in the form prescribed by SEBI, if any.

(v) EIPL 1 shall provide the Investment Manager details of transactions carried out between itself and its associates and disclose any conflict of interest in such cases to the Investment Manager, in accordance with the InvIT Regulations.

(vi) EIPL 1 shall intimate the Trustee prior to any change in control of EIPL 1 to enable the Trustee to seek approval from the relevant authority in accordance with the relevant project agreements or other project documents pertaining to the relevant assets, if applicable.

(vii) EIPL 1 shall provide to the Trustee and Investment Manager or to such other person as the

Trustee and/or the Investment Manager may direct, all information that may be necessary for each of them to maintain the records of IndiGrid and as may be required for making submissions to SEBI or other Governmental Authority, including with respect to relevant approvals, consents and other documents required in relation to the project and the reporting requirements under the InvIT Regulations, in a proper and timely manner, and in the format prescribed (if any), as required by the Trustee and/or Investment Manager.

(viii) EIPL 1 shall appoint one of its qualified employees reasonably acceptable to the Investment Manager and each of the relevant Portfolio Assets with adequate and appropriate experience as a principal contact for the board of directors of each Portfolio Asset, the Trustee and the Investment Manager in relation to the project and the Services. EIPL 1 shall have full authority, to receive directions and instructions from each Portfolio Asset and to take action in relation to and ensure compliance with such directions and instructions and report back to each Portfolio Asset, Trustee and the Investment Manager.

(ix) EIPL 1 shall at all time ensure that the transactions or arrangement entered into by EIPL 1 with a related party is on an arm's-length basis.

(x) EIPL 1 shall promptly inform the Investment Manager, amongst others, in writing of any act, occurrence or event, which EIPL 1 believes is reasonably likely to increase the cost of or the time for implementation taken in relation to a project, or materially to change the financial viability, quality or function of the project.

(xi) EIPL 1 shall be liable to the other parties to the EIPL 1 Project Implementation and Management Agreement for any direct loss or damage attributable to the non-performance or breach of the obligations of EIPL 1 including those of the Agents, under the EIPL 1 Project Implementation and Management Agreement. The Trustee and the Investment Manager acknowledge and agree that the aggregate maximum liability of EIPL 1 shall be limited to the fees payable to EIPL 1 in the previous one year in accordance with the terms of the EIPL 1 Project Implementation and Management Agreement.

(xii) The duties of EIPL 1 shall also include the following:

(a) supervision of revenue streams from the relevant project and providing the necessary certification as may be required under applicable laws and the InvIT Regulations;

(b) execution and completion of activities in relation to the relevant projects under development in accordance with and in the manner contemplated in any agreement entered into by the projects;

(c) exercise diligence and vigilance in carrying out its duties and protecting the relevant projects;

(d) keeping the Investment Manager informed on all matters which have a material bearing on the operations of the relevant projects;

(e) liaising with governmental authorities in respect of its obligations under the EIPL 1 Project Implementation and Management Agreement, and Project documents;

(f) take appropriate measures to mitigate the risks which may be encountered by the InvIT in respect, of the relevant projects;

(g) keep proper records for actions taken in respect of the relevant projects; and

(h) complying with the instructions of the Investment Manager and the Trustee and the provisions of the InvIT Regulations.

(i) provide any services as required to facilitate creation of future pipeline of projects for the Trust.

(xiii) In case of any inconsistency or discrepancy between the EIPL 1 Project Implementation and Management Agreement and the relevant project agreements, EIPL 1 shall bring the same into the notice of the Trustee. The Trustee, in consultation with the Investment Manager, shall issue instructions for resolving the inconsistency. EIPL 1 shall be bound to comply with the instructions of the Trustee.

OTHER PARTIES INVOLVED IN INDIGRID

The Auditor

Background and terms of appointment

The Investment Manager, in consultation with the Trustee, has re-appointed S R B C & CO LLP, Chartered Accountants in 2021, as the auditors of IndiGrid for a period of five years. The Auditors have audited the Consolidated Financial Statements, Standalone Financial Statements and have reviewed the Unaudited Interim Condensed Consolidated Financial Statements for the half year ended September 30, 2025 and the Unaudited Interim Condensed Standalone Financial Statements for the half year ended September 30, 2025 as stated in their reports which have been included in this Placement Document.

For further details regarding the policy adopted by the Investment Manager on appointment of the auditors, please see the section entitled "*Corporate Governance*" on page 179.

Functions, Duties and Responsibilities of the Auditor

The functions, duties and responsibilities of the Auditor will be in accordance with the InvIT Regulations. Presently, in terms of the InvIT Regulations, the Auditor is required to comply with the following conditions at all times:

1. the Auditor shall conduct audit of the accounts of IndiGrid and draft the audit report based on the accounts examined by him and after taking into account the relevant accounting and auditing standards, as may be specified by SEBI;

2. the Auditor shall, to the best of his information and knowledge, ensure that the accounts and financial statements give a true and fair view of the state of the affairs of IndiGrid, including profit or loss and cash flow for the period and such other matters as may be specified;

3. the Auditor shall have a right of access at all times to the books of accounts and vouchers pertaining to activities of IndiGrid;

4. the Auditor shall have a right to require such information and explanation pertaining to activities of IndiGrid as he may consider necessary for the performance of his duties as auditor from the employees of IndiGrid or parties to IndiGrid or the holdco or the special purpose vehicles or any other person in possession of such information.

5. the Auditor shall undertake a limited review of the audit of all the entities or companies whose accounts are to be consolidated with the accounts of IndiGrid as per the applicable Indian Accounting Standards and any addendum thereto as defined in Rule 2(1)(a) of the Companies (Indian Accounting Standards) Rules, 2015, in such manner as may be specified by SEBI.

The Valuer

Background and terms of appointment

The Investment Manager, in consultation with the Trustee, has appointed S Sundararaman (IBBI Registration No. IBBI/RV/06/2018/10238) with effect from April 1, 2025, as the valuer of IndiGrid, until March 31, 2026. In accordance with the InvIT Regulations, the Valuer has undertaken a full valuation of the Portfolio Assets, and the report in relation to such valuation dated November 11, 2025 as on September 30, 2025 is available at https://www.indigrid.co.in/documents-manager/. and enclosed as *Annexure A*.

For further details regarding the policy adopted by the Investment Manager on appointment of the valuer, please see the section entitled "*Corporate Governance*" on page 179.

Functions, Duties and Responsibilities of the Valuer

The functions, duties and responsibilities of the Valuer will be in accordance with the InvIT Regulations. Presently, in terms of the InvIT Regulations, the Valuer is required to comply with the following conditions at all times:

1. the Valuer shall ensure that the valuation of IndiGrid assets is impartial, true and fair and is in accordance

with Regulation 21 of the InvIT Regulations;

2. the Valuer shall ensure that adequate and robust internal controls to ensure the integrity of its valuation reports;

3. the Valuer shall ensure that it has sufficient key personnel with adequate experience and qualification to perform valuations;

4. the Valuer shall ensure that it has sufficient financial resources to enable it to conduct its business effectively and meet its liabilities;

5. the Valuer and any of its employees involved in valuing of the assets of IndiGrid, shall not, (i) invest in units of IndiGrid or in the assets being valued; and (ii) sell the assets or units of IndiGrid held prior to being appointed as the Valuer, until the time such person is designated as Valuer of IndiGrid and not less than six months after ceasing to be Valuer of IndiGrid;

6. the Valuer shall conduct valuation of IndiGrid's assets with transparency and fairness and shall render, at all times, high standards of service, exercise due diligence, ensure proper care and exercise independent professional judgment;

7. the Valuer shall act with independence, objectivity and impartiality in performing the valuation;

8. the Valuer shall discharge its duties towards IndiGrid in an efficient and competent manner, utilizing its knowledge, skills and experience in best possible way to complete a given assignment;

9. the Valuer shall not accept remuneration, in any form, for performing a valuation of IndiGrid's assets from any person other than IndiGrid or its authorised representative;

10. the Valuer shall before accepting any assignment from any related party of IndiGrid, disclose to IndiGrid any direct or indirect consideration which the Valuer may have in respect of such assignment;

11. the Valuer shall disclose to IndiGrid any pending business transactions, contracts under negotiation and other arrangements with the investment manager or any other party whom IndiGrid is contracting with and any other factors that may interfere with the Valuer's ability to give an independent and professional valuation of the assets;

12. the Valuer shall not make false, misleading or exaggerated claims in order to secure assignments;

13. the Valuer shall not provide misleading valuation, either by providing incorrect information or by withholding relevant information;

14. the Valuer shall not accept an assignment which interferes with its ability to do fair valuation;

15. the Valuer shall, prior to performing a valuation, acquaint itself with all laws or regulations relevant to such valuation.

CORPORATE GOVERNANCE

The section below is a summary of the corporate governance framework in relation to IndiGrid, implemented by the Investment Manager and each of the Portfolio Assets.

1. Investment Manager

In addition to the applicable provisions of the InvIT Regulations and the Companies Act, the board of directors of the Investment Manager ("**IM Board**") shall adhere to the following:

(a) Not less than 50% (fifty per cent) of the board of directors shall comprise independent directors, determined in accordance with the InvIT Regulations. The IM Board shall comprise of not less than 6 directors and also have not less than one-woman independent director. Such directors shall not be directors or members of the governing board of the investment manager of another infrastructure investment trust registered under the InvIT Regulations. The remaining directors shall be appointed in accordance with the provisions of the Companies Act;

(b) The independence of directors shall be determined in accordance with the InvIT Regulations and other applicable law;

(c) The chairperson of the IM Board shall be a non-executive independent director;

(d) Collective experience of directors of the Investment Manager shall cover a broad range of commercial experience, particularly experience in infrastructure sector (including the applicable sub-sector), investment management or advisory and financial matters.

For details of the current composition of the board of directors of the Investment Manager, please see the sections entitled "*Parties to IndiGrid – Investment Manager – Board of Directors of the Investment Manager*" on page 156 and "*Rights of Unitholders – Nomination Rights*" on page 407.

Quorum

The quorum for every meeting of the Board shall be in accordance with the InvIT Regulations.

Frequency of meetings

The board of directors of the Investment Manager shall meet at least four times every year, with a maximum gap of 120 days between any two successive meetings or such gap as prescribed under applicable law. Additionally, the board of directors of the Investment Manager, prior to any meeting of the Unitholders, shall approve the agenda for Unitholders' meetings.

Remuneration of Directors

The directors of the Investment Manager will receive sitting fee for attending board meetings and meetings of the committees, in accordance with the Companies Act.

Further, in accordance with the Nomination and Remuneration Policy of IndiGrid, of the fees payable to the Investment Manager, an amount not exceeding 0.4% shall be payable to the independent directors of the Investment Manager ("**Overall Limit**"), as approved by the Unitholders of IndiGrid. For further details in relation to the fees payable to the Investment Manager, please see the section entitled "*Overview of IndiGrid*" on page 27.

The board of directors of the Investment Manager shall confirm to the Trustee that the independent directors being considered for performance remuneration have complied with the following, amongst others:

(i) The attendance of a particular independent director is not less than 75% or as specified in the relevant independent director's appointment letter. If an independent director has not achieved the specified attendance, he/ she shall not be entitled to any performance remuneration.

(ii) The independent director(s) have complied with the code of conduct for independent directors as provided under Schedule IV of the Companies Act, 2013 ("**Code of Conduct**"), to the extent the provisions thereof can be applied to IndiGrid. Any independent director in breach of the

Code of Conduct shall not be entitled to any performance remuneration.

(iii) Quality of contributions to the IM Board deliberations.

(iv) Strategic perspectives or inputs regarding future growth of IIML, IndiGrid and its performance.

(v) Providing perspectives and feedback going beyond information provided by the management.

(vi) Commitment to shareholders and other stakeholder's interests.

Upon completion of the evaluation exercise, the board of directors, on recommendation of the Nomination and Remuneration Committee, shall approve the performance remuneration payable to each independent director through a unanimous resolution including the amount payable to each independent director within the Overall Limit approved by the Unitholders of IndiGrid.

The remuneration payable to the independent directors will be within the overall limit of the fee payable to the Investment Manager.

Committees of the board of directors

Name of committee	Composition	Present Members	Quorum	Frequency of meetings

As and when required.

For details of the scope of each committee, please see below.

Audit Committee

Terms of reference of the Audit Committee

The terms of reference of the Audit Committee include the following:

(i) Provide recommendations to the board of directors regarding any proposed distributions;

(ii) Overseeing IndiGrid’s financial reporting process and disclosure of its financial information to ensure that its financial statements are correct, sufficient and credible;

(iii) Giving recommendations to the board of directors regarding appointment, re-appointment and replacement, remuneration and terms of appointment of the statutory auditor of IndiGrid and the audit fee, subject to the approval of the unitholders;

(iv) Reviewing and monitoring the independence and performance of the statutory auditor of

IndiGrid, and effectiveness of audit process;

(v) Approving payments to statutory auditors of IndiGrid for any other services rendered by such statutory auditors;

(vi) Reviewing the annual financial statements and auditor's report thereon of IndiGrid, before submission to the board of directors for approval, with particular reference to:

- changes, if any, in accounting policies and practices and reasons for such change;
- major accounting entries involving estimates based on the exercise of judgment by management;
- significant adjustments made in the financial statements arising out of audit findings;
- compliance with listing and other legal requirements relating to financial statements;
- disclosure of any related party transactions; and
- qualifications in the draft audit report;

(vii) Reviewing, with the management, all periodic financial statements, including but not limited to half-yearly and annual financial statements of IndiGrid before submission to the IM Board for approval;

(viii) Reviewing, with the management, the statement of uses/application of funds raised through an issue of units by IndiGrid (public issue, rights issue, preferential issue, etc.) and the statement of funds utilised for purposes other than those stated in the offer documents/ notice, and making appropriate recommendations to the IM Board for follow-up action;

(ix) Approval or any subsequent modifications of transactions of IndiGrid with related parties including, reviewing agreements or transactions in this regard;

(x) Scrutinising loans and investments of IndiGrid;

(xi) Reviewing all valuation reports required to be prepared under applicable law, periodically, and as required, under applicable law;

(xii) Evaluating financial controls and risk management systems of IndiGrid;

(xiii) Reviewing, with the management, the performance of statutory auditors of IndiGrid, and adequacy of the internal control systems, as necessary;

(xiv) Reviewing the adequacy of internal audit function if any of IndiGrid, including the structure of the internal audit department, staffing and seniority of the official heading the department, reporting structure coverage and frequency of internal audit;

(xv) Reviewing the findings of any internal investigations in relation to IndiGrid, into matters where there is suspected fraud or irregularity or a failure of internal control systems of a material nature and reporting the matter to the IM Board;

(xvi) Reviewing the procedures put in place by the Investment Manager for managing any conflict that may arise between the interests of the unitholders, the parties to IndiGrid and the interests of the Investment Manager, including related party transactions, the indemnification of expenses or liabilities incurred by the Investment Manager, and the setting of fee or charges payable out of IndiGrid's assets;

(xvii) Discussing with statutory auditors and valuers prior to commencement of the audit or valuation, respectively, about the nature and scope, as well as post-audit/ valuation discussion to ascertain any area of concern;

(xviii) Reviewing and monitoring the independence and performance of the valuer of IndiGrid;

(xix) Giving recommendations to the board of directors regarding appointment, re-appointment and replacement, remuneration and terms of appointment of the valuer of IndiGrid;

(xx) Evaluating any defaults or delay in payment of distributions to the unitholders or dividends by the Portfolio Assets to IndiGrid and payments to any creditors of IndiGrid or the Portfolio Assets, and recommending remedial measures;

(xxi) Management's discussion and analysis of financial condition and results of operations;

(xxii) Reviewing the statement of significant related party transactions, submitted by the management;

(xxiii) Reviewing the management letters/letters of internal control weaknesses issued by the statutory auditors; and

(xxiv) Formulating any policy for the Investment Manager as necessary, in relation to its functions, as specified above.

Stakeholders' Relationship Committee

Terms of reference of the Stakeholders' Relationship Committee

The terms of reference of the Stakeholders' Relationship Committee shall include the following:

(i) Considering and resolving grievances of the unitholders, including complaints related to the transfer of units, non-receipt of annual report and non-receipt of declared distributions;

(ii) Reviewing of any litigation related to unitholders' grievances;

(iii) Undertaking all functions in relation to protection of Unitholders' interests and resolution of any conflicts, including reviewing agreements or transactions in this regard;

(iv) Updating unitholders on acquisition / sale of assets by IndiGrid and any change in the capital structure of the Portfolio Assets;

(v) Reporting specific material litigation related to unitholders' grievances to the IM Board; and

(vi) Approving report on investor grievances to be submitted to the Trustee.

Nomination and Remuneration Committee

Terms of reference of the Nomination and Remuneration Committee

The terms of reference of the Nomination and Remuneration Committee include the following:

(i) Formulation of the criteria for determining qualifications, positive attributes and independence of a director and recommend to the board of directors of the Investment Manager a policy relating to, the remuneration of the directors, key managerial personnel and other employees;

(ii) Formulation of criteria for evaluation of performance of independent directors and the IM Board;

(iii) Devising a policy on board diversity;

(iv) Identifying persons who are qualified to become directors and who may be appointed in senior management in accordance with the criteria laid down and recommend to the IM Board their appointment and removal and evaluation of director's performance;

(v) Determining whether to extend or continue the term of appointment of the independent director, on the basis of the report of performance evaluation of independent directors;

(vi) Carrying out any other function as prescribed under applicable law;

(vii) Endeavour to appoint new key employee to replace any resigning key employee within six months from the date of receipt of notice of resignation and recommend such appointment to the IM Board, if necessary; and

(viii) Performing such other activities as may be delegated by the IM Board and/or are statutorily prescribed under any law to be attended to by the Nomination and Remuneration Committee.

Risk Management Committee

Terms of reference of the Risk Management Committee

The terms of reference of the Risk Management Committee include the following:

(i) To identify, assess, mitigate and monitor the existing as well as potential risks to the Trust (including risks associated with cyber security and financial risk), to recommend the strategies to the IM Board to overcome them and review key leading indicators in this regard;

(ii) To periodically review and approve the Risk Management framework including the risk management processes and practices of IndiGrid;

(iii) To evaluate significant risk exposures of the Trust and assess management's actions to mitigate the exposures in a timely manner;

(iv) To develop and implement action plans to mitigate the risks;

(v) To coordinate its activities with the Audit Committee in instances where there is any overlap with audit activities (e.g. internal or external audit issue relating to risk management policy or practice);

(vi) To oversee at such intervals as may be necessary, the adequacy of IndiGrid's resources to perform its risk management responsibilities and achieve its objectives; and

(vii) To review and periodically assess IndiGrid's performance against the identified risks of the Investment Manager.

Investment Committee

Terms of reference of the Investment Committee

The terms of reference of the Investment Committee include the following:

(i) Reviewing investment decisions with respect to the underlying assets or projects of IndiGrid from the Sponsor including any further investments or divestments to ensure protection of the interest of unitholders including, investment decisions which are related party transactions;

(ii) Approving any proposal in relation to acquisition of assets, further issue of units including in relation to acquisition or assets; and

(iii) Formulating any policy for the Investment Manager as necessary, in relation to its functions, as specified above.

Allotment Committee

Terms of reference of the Allotment Committee

The terms of reference of the Allotment Committee include the following:

(i) To approve the terms of units, debentures and all types of permitted securities through preferential issue, private placement, rights issue, qualified institutional placements;

(ii) To approve issue, subscription, allotment of units, debentures and all types of permitted securities to eligible investors and/or identified investors;

(iii) To approve opening of issue, terms of issue, floor price, issue price, application form, offer document/ placement document including its addendum/ corrigendum and all the matters related thereto;

(iv) To authorize officers, agents, consultants, banks, advisors or any related person to submit, file, resubmit, modify, sign, execute, process all types of documents and information including but not limited to application, letters, clarifications, undertaking, certification, declaration to obtain all the necessary approvals, consents, permits, license, registration from government, regulatory, semi-government, statutory and private authorities, institutions, bodies, organizations including but not limited to RBI, SEBI, stock exchange, depositories; and

(v) To authorize officers, agents, consultants, banks, advisors or any related person to do all such acts, deeds and matters as may be incidental or considered necessary for giving effect to the aforesaid resolution.

ESG & CSR Committee

Terms of reference of the ESG & CSR Committee

The terms of reference of the ESG & CSR Committee include the following:

(i) Formulating and recommending to the Board, Corporate Social Responsibility Policy which shall contain guiding principles for selection, implementation and monitoring of CSR activities;

(ii) Formulating and recommending to the Board, an Annual Action Plan for the Company and having an oversight on its implementation;

(iii) Recommending the amount of expenditure to be incurred on CSR activities;

(iv) Enable Board oversight on significant sustainability (ESG) related policies, strategies and activities of the Company in a manner that integrates environmental, social and ethical principles with the conduct of business

(v) Monitoring the ESG and CSR Policy from time to time;

(vi) Identifying and monitoring the implementation of the ongoing/ multi-year projects with reference to the approved timelines and year-wise allocation and making modifications, if any, for smooth implementation of the projects within the overall permissible time period;

(vii) Reviewing the findings of Impact Assessment Reports and take decisions related thereto;

(viii) Provide vision and guidance to the Management to ensure that all long-term business proposals made to the Board are assessed through the lens of Social, Environment, Safety, Health, and Reputational implications – including governance and associated risks and opportunities;

(ix) Guide the Management in ensuring stakeholder engagement and materiality analysis based on key sustainability issues;

(x) Guide the management in formulating a comprehensive sustainability strategy for the company; define appropriate goals, targets, KPIs, action plans and investments. Play an active role in recommending and periodically reviewing achievement vis-à-vis above strategy;

(xi) Guide and recommend sustainability / ESG disclosures in line with global reporting frameworks;

(xii) Ensure appropriate sustainability reporting mechanisms, oversee compliance with ESG/ sustainability disclosure requirements, review and approve annual disclosures relating to the Trust's sustainability activities and performance, ensuring the quality of communication and data;

(xiii) Guide and suggest strategies to the management to develop internal competencies, inspire employees and suppliers engagement and culture for responsible and sustainable business; and

(xiv) Advise the management on potential business implications of sustainability / ESG performance *vis-à-vis* corporate relations & brand perception.

Policies of the Board of Directors of the Investment Manager in relation to IndiGrid

The Investment Manager has adopted the following policies in relation to IndiGrid, which have previously been published or issued, and shall be incorporated in, and form part of, this Placement Document, as on the date of this Placement Document:

Sr. No.	Title of Document	Website Link
Policies		
1.	Borrowing Policy and Framework	https://www.indigrid.co.in/wp-content/uploads/2021/12/4_Borrowing_Policy_23.01.2025.pdf https://www.indigrid.co.in/wp-content/uploads/2021/12/Borrowing_Framework.pdf

For details of the Distribution Policy in relation to IndiGrid, please see the section entitled "*Distribution – Distribution Policy*" on page 336.

2. Portfolio Assets

Representatives on the Board of Directors of each Portfolio Asset

The Investment Manager, in consultation with the Trustee, has the power to appoint the majority of the board of directors of each of the Portfolio Assets. Further, the Investment Manager shall ensure that in every meeting, including annual general meetings of any of the Portfolio Assets, the voting of IndiGrid is exercised.

INDUSTRY OVERVIEW

*The information in this section is derived from the report entitled Market Assessment of Indian Power, Renewable Energy, Storage and Transmission Sector" dated January, 2026, prepared by CRISIL Intelligence (the "**CRISIL Report**") except for other publicly available information as cited in this section. We commissioned the CRISIL Report for the purposes of confirming our understanding of the industry in connection with the Issue. Neither IndiGrid, the Sponsor, the Investment Manager, the Trustee, the Placement Agents, nor any other person connected with the Issue has verified the industry and market data in the CRISIL Report or other publicly available information cited in this section.*

1. OVERVIEW OF INDIAN MACROECONOMIC LANDSCAPE

1.1. India's key economic indicators

In the past 11 years (during fiscal 2014 to 2024), India's GDP at constant (fiscal 2012) prices grew at a compounded growth of 5.3% (CAGR). Government policies, focus on manufacturing sector, exports, increased digitalisation, implementation of GST, strong domestic demand for consumption and investment helped GDP to grow.

After strong GDP growth in the past three years, Crisil Intelligence[2] expects some moderation to 6.50% in fiscal 2025 with downside risks from tariff hikes by the US. The tariffs, a global trade slowdown and geopolitical uncertainties are expected to have a non-uniform impact on the economy.

Crisil's key projections

Parameters	FY19	FY20	FY21	FY22	FY23	FY24	FY25	FY26P
GDP growth (%)	6.45%	3.87%	-5.78%	9.69%	7.61%	9.19%	6.48%	6.50%
CPI (%, average)	3.41%	4.77%	6.16%	5.51%	6.65%	5.40%	4.60%	3.20%
CAD/GDP (%)	(2.12%)	(0.86%)	0.92%	(1.23%)	(1.98%)	(0.65%)	(0.60%)	(1.30%)
FAD/GDP (%)	3.44%	4.65%	9.20%	6.70%	6.40%	5.60%	4.90%	4.40%#
Exchange rate (₹/USD March-end)	69.17	75.39	73.50	75.81	82.22	83.37	85.58	88.00
10-year G-sec yield (%, March-end)	7.50%	6.20%	6.20%	6.80%	7.40%	7.10%	6.70%	6.30%

E:Estimated; P: Projected; CPI: Consumer Price Index-linked; CAD: Current account deficit; G-sec: Government security; FAD: Fiscal account deficit
#Budget estimates
Source: Central Statistics Office (CSO), Reserve Bank of India (RBI), Crisil estimates

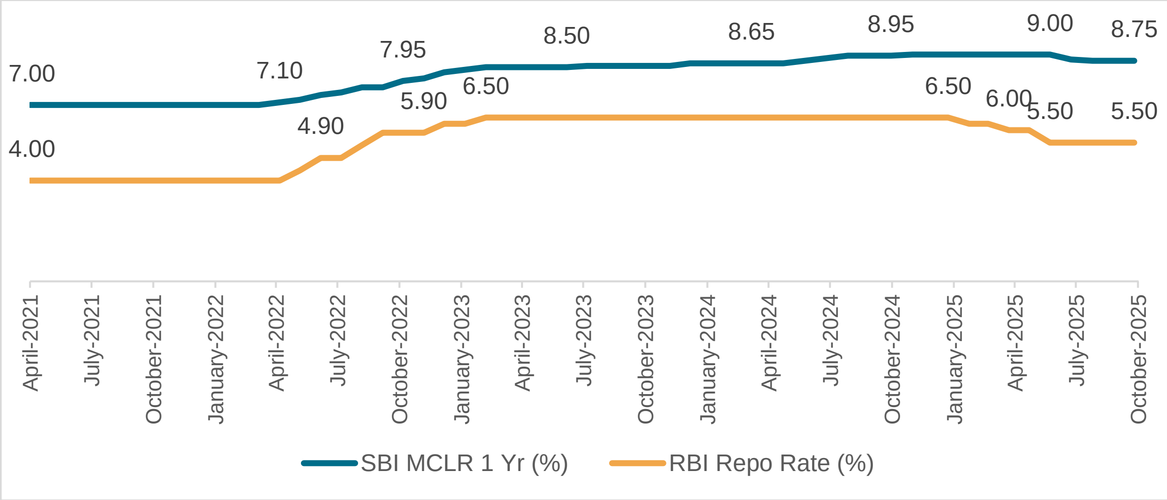
1.1.1 Interest Rates

The Monetary Policy Committee (MPC) in its October-2025 (57th) meeting has kept the repo rate unchanged, however in the June-2025 (55th) meeting the repo rate was reduced by 50 bps more than the 25-bps cut in the previous meeting.

Crisil Intelligence expects one more rate cut this fiscal 2026, and a hold thereafter. A sharp fall in inflation since the previous policy review allowed the MPC to increase monetary support. A healthy monsoon, coupled with low crude prices are likely to keep inflation aligned to the RBI's 4% target this fiscal.

[2] Based on Crisil Centre for Economic Research (C-CER) projections

Projections of key economic indicators for India in this Chapter are as per the C-CER



Source: RBI, SBI, Crisil Intelligence

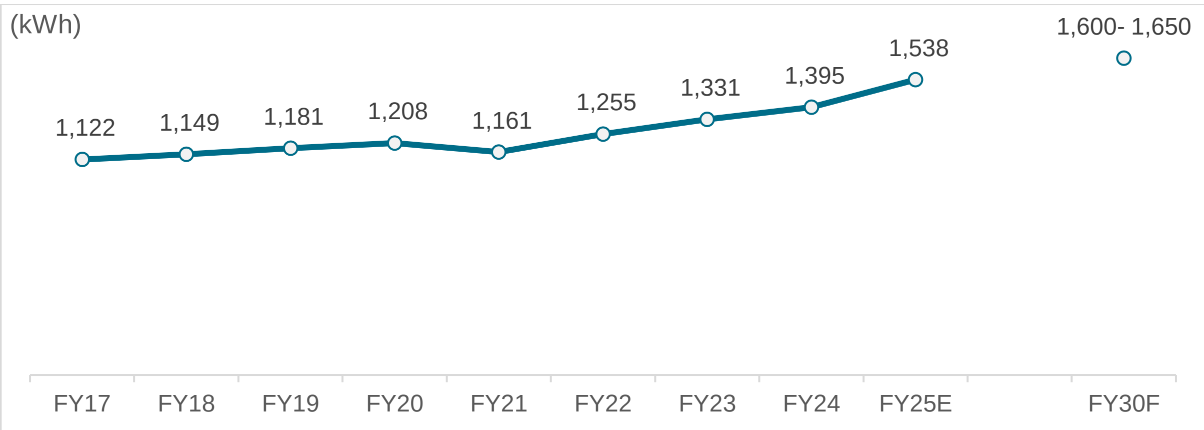
1.1.2 Per capita power consumption

Electricity consumption per person rose to 1,395 kWh in fiscal 2024 from 1,010 kWh in fiscal 2015 at a CAGR of 3.65%, primarily because of strengthening of the transmission and distribution (T&D) network as well as large capacity additions. Post successive on-year growth in consumption, demand declined in fiscal 2021, particularly from high-consuming industrial and commercial categories on account of weak economic activity following outbreak of the COVID-19 pandemic. In fiscal 2022, though, per capita consumption rebounded to 1,255 kWh on the back of recovery in power demand and 1,331 in fiscal 2023.

Between fiscals 2025 and 2030, India's per capita electricity consumption is expected to grow at ~2.8% CAGR over a low base of fiscal 2021. Per capita consumption is expected to gradually improve in the long term as well, as power demand picks up on the back of improvement in access to electricity, in terms of quality and reliability, on account of intensive rural electrification and reduction in cost of power supply, resulting in realisation of latent demand from the residential segment.

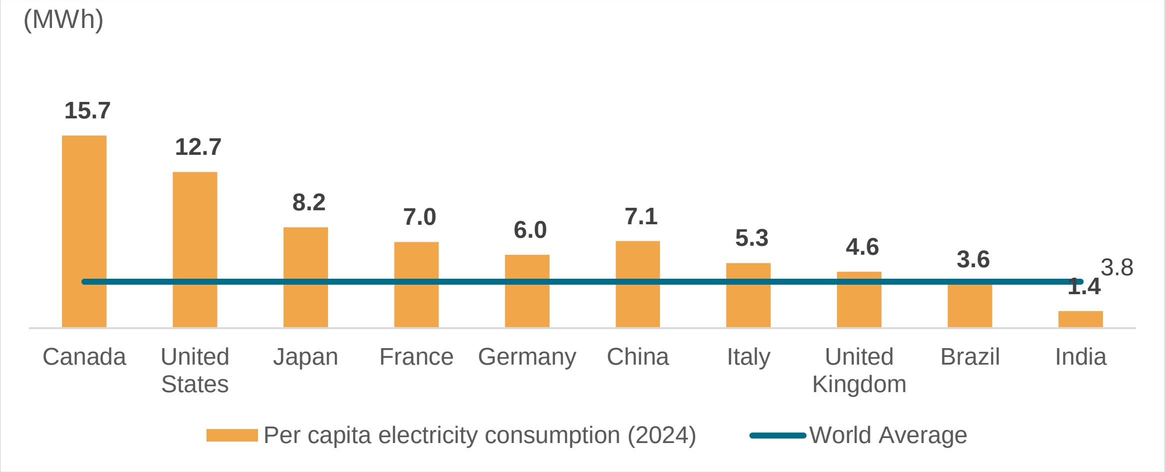
Consequently, Crisil Intelligence expects per capita electricity consumption to reach 1,600-1,650 kWh by fiscal 2030.

Per capita electricity consumption



E: Estimated; F: Forecast
Source: Central Electricity Authority of India (CEA), Crisil Intelligence

Despite this healthy increase, the per-capita electricity consumption of India remains significantly lower than other major as well as developing economies and also lower than global average per capita electricity consumption of 3.8 MWh.



Source: World Bank, IMF, EIA, Crisil Intelligence

1.2 Government stimulus through Aatmanirbhar Bharat relief package

Aatmanirbhar Bharat Abhiyan envisions to develop the domestic manufacturing ecosystem in India, lower import dependence, and increase resilience in key sectors. The government has created a stimulus package worth Rs 20,970 billion which is designed to revive economic growth through structural reforms and targeted support. With international firms dispersing supply chains within the China+1 model, India is becoming a manufacturing base, taking advantage of its highly skilled labour, improving technology capabilities, and strong policy backing through initiatives such as Make in India and production-linked incentives (PLI).

Production Linked Incentives (PLIs) in the 14 sectors for the *Aatmanirbhar Bharat* vision received an outstanding response, with the potential to create 6 million new jobs (as per government estimates).

Sector-wise focus of *Aatmanirbhar Bharat* Vision

Sector	Government spends	Key schemes
Renewable energy	~Rs 1300 billion	• Rs 45 billion Production Linked Incentive Scheme 'National Programme on High Efficiency Solar PV Modules'. This was further increased by Rs 195 billion in the budget for fiscal 2023, taking it to Rs 240 billion; in tranche I 8.7 GW and in tranche II 39.6 GW capacity were allocated for domestic solar module manufacturing capacity under the PLI scheme. • PM Surya Ghar Muft Bijli Yojna: This scheme has a proposed outlay of Rs. 750 billion and aims to light up 10 million households (rooftop solar) by providing up to 300 units of free electricity every month. During Budget 2025-26, the government has increased the allocation to Rs. 200 billion. The scheme is projected to add 30 GW residential rooftop solar capacity by fiscal 2027 considering 3 kW RTS system size. • Public procurement (preference for 'Make in India') to provide for purchase preference (linked with local content) in respect of renewable energy (RE) sector • Implementation of Pradhan Mantri Kisan Urja Suraksha Utthan Mahabhiyan (PM KUSUM) scheme; MNRE, in November 2020, scaled up and expanded the PM KUSUM scheme to add 30.8 GW by 2022 with central financial support of Rs 344 billion. The scheme has been extended till March 31, 2026

Sector	Government spends	Key schemes
		• Approved Models & Manufacturers of Solar Photovoltaic Modules (Requirement for Compulsory Registration) Order, 2019 (ALMM List-I) • Approved Models and Manufacturers of Solar PV Cells to be effective from 1st June 2026 (ALMM List-II) • Scheme of grid connected wind-solar hybrid (WSH) power projects • Basic customs duty (BCD) of 20% on solar cells and 20% on solar modules, effective May 1, 2025. However, the Agricultural and Infrastructure Development Cess (AIDC) of 20% on modules and 7.5% on cells keep the effective BCD rate of solar modules at 40% and for cells 27.50%. Further, antidumping duty of upto 30% on imported solar cells from China have been proposed by DGTR for three years
Power distribution companies (discoms)	~Rs.970 billion	• Rs 1.35 trillion liquidity infusion for discoms via Power Finance Corporation/ Rural Electrification Corporation (PFC/ REC) against receivables • Rebate for payment to be received by generation companies (gencos) to be passed on to industrial customers • Revamped distribution sector scheme (RDSS) to help discoms improve their operational efficiencies and financial sustainability by providing result-linked financial assistance; outlay of Rs 3,037.58 billion over 5 years i.e., fiscals 2022 to 2026. The outlay includes an estimated government budgetary support (GBS) of Rs 976.31 billion.
New energy	~Rs. 388 billion	• Rs 181 billion under production linked incentive (PLI) scheme for Advanced Chemistry Cell (ACC) Battery Storage in India launched in October to achieve 50 GWh manufacturing capacity • Green Hydrogen Policy launched in February 2022 to facilitate production of green hydrogen/green ammonia • PLI scheme on green hydrogen manufacturing with an initial outlay of Rs 197.44 billion with an aim to boost domestic production of green hydrogen • BCD exemption on critical minerals (cobalt, lead, zinc, etc.), scrap of lithium-ion batteries proposed in Budget 2025-26
Nuclear energy	Rs. 200 billion	• Nuclear energy mission announced in Budget 2025-26 • 100 GW of nuclear power capacity by 2047 • Budgetary allocation to support R&D for indigenous development of small modular reactors (SMR) • Private sector participation in the development of Bharat small reactors, R&D of SMR and newer technologies

2. OVERVIEW OF INDIAN POWER SECTOR

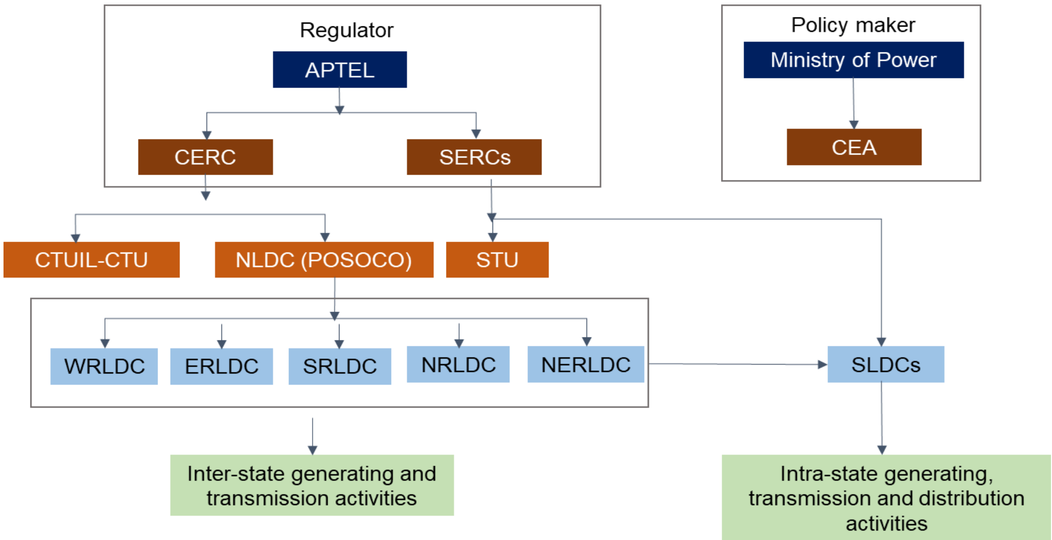
2.1 Review on power sector in India

2.1.1 Evolution and structure

India's power sector is highly diversified, with sources of power generation ranging from conventional (coal, lignite, natural gas, oil, hydro and nuclear power) to viable, non-conventional sources (such as wind, solar, and biomass and municipal waste). Transmission and Distribution infrastructure has expanded over the years for evacuation of power from generating stations to load centres through the intra-state and inter-state transmission system (ISTS).

The sector is highly regulated, with various functions being distributed between multiple implementing agencies. The three chief regulators for the sector are: the Central Electricity Regulatory Commission (CERC), the Central Electricity Authority (CEA), and the State Electricity Regulatory Commissions (SERCs).

Institutional and structural framework



Note: APTEL - The Appellate Tribunal for Electricity; CERC- Central Electricity Regulatory Commission; CEA - Central Electricity Authority; WRLDC - Western Regional Load Despatch Centre; ERLDC - Eastern Regional Load Despatch Centre; SRDLC - Southern Regional Load Despatch Centre; NRLDC - Northern Regional Load Despatch Centre; NERLDC - North-Eastern Regional Load Despatch Centre; SLDC - State Load Despatch Centre; CTU - Central Transmission Utility; STU - State Transmission Utility
Source: Crisil Intelligence

The Ministry of Power (MoP) works in close coordination with the CERC and CEA. While the CERC's role is more of a regulator for approving tariffs of central utilities, approving licenses, etc., the CEA is primarily a technical advisor focused on planning, i.e., estimating power demand and generation and transmission capacity.

2.1.2 Key policy and regulatory reforms in support of RE growth

The development of grid interactive renewable power has essentially taken off with the Electricity Act 2003, which mandates the SERCs to promote cogeneration and generation of electricity from renewable energy (RE) sources by providing suitable measures for connectivity with the grid and sale of electricity and fix certain minimum percentages for purchase of renewable power in the area of each distribution licensee. In June 2008, a National Action Plan on Climate Change (NAPCC) was announced, which included eight major national missions, with the one on solar energy the National Solar Mission (NSM) being central with a target of 100 GW of solar capacity by 2022 and a cumulative target of 175 GW of RE capacity addition.

Furthermore, the Government of India has made some verified Commitments at COP26 and in the 2022 NDC-

- Net-zero by 2070: At COP26 in Glasgow, India pledged to achieve net-zero emissions by 2070, marking a major long-term climate commitment
- Updated NDC targets (August 2022):
  - Raise non-fossil installed power capacity to 50% by 2030
  - Reduce emissions intensity of GDP by 45% (from 2005 levels) by 2030

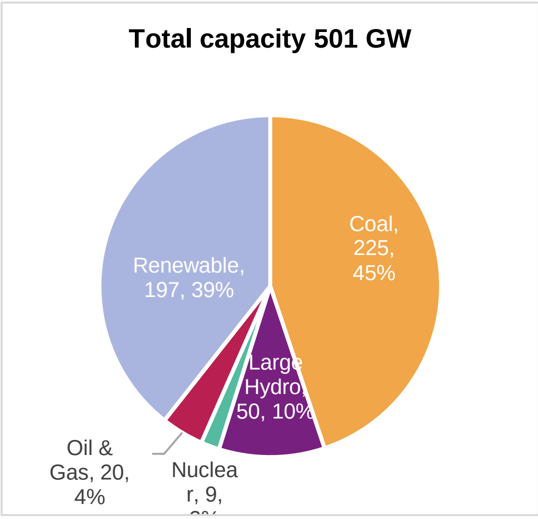
- Cut cumulative carbon emissions by 1 billion tonnes between 2021–2030
- Add 500GW non-fossil capacity by 2030 (Part of the COP26 "Panchamrit" pledges)

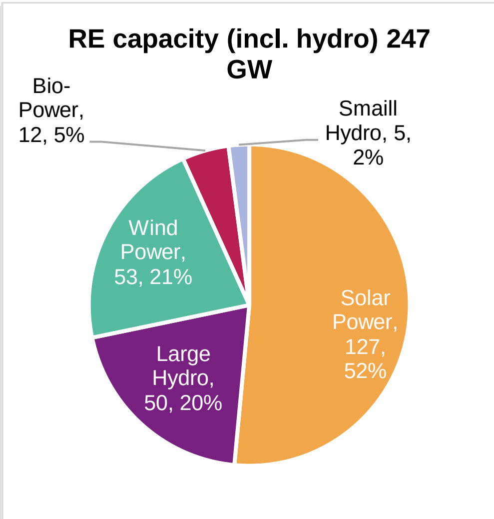
2.2 Review of power demand-supply scenario in India

2.2.1 Installed capacity and fuel mix

The total installed generation capacity as of September 2025 was 501 GW. Coal and Lignite-based installed power generation capacity has maintained its dominant position over the years and accounts for ~44.9% as of September 2025. However, RE installations (including large hydroelectric projects) have reached ~247 GW capacity as of September 2025, constituting ~49.4% of total installed generation capacity. This growth has been led by solar power, which rapidly rose to ~127 GW in a decade.

Installed capacity as of September 2025 (GW, %)

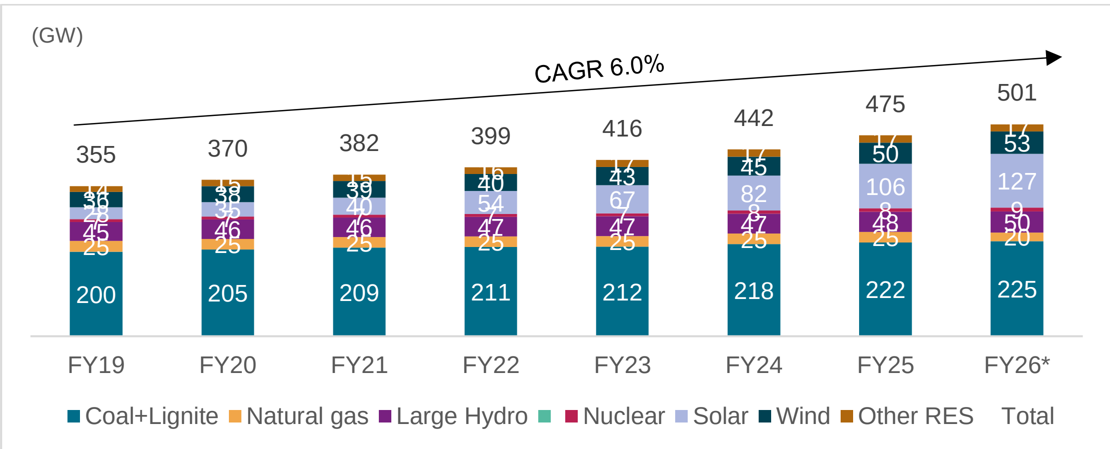




Source: CEA, Crisil Intelligence

Over the past years, the installed capacity has exhibited a CAGR of 6.0% between fiscal years 2020 and 2026(Till September 2025). Notably, the capacity addition of RE sources (incl. large hydro) has demonstrated a more pronounced growth trajectory, achieving a CAGR of 12.0% during the fiscal years 2020 and 2026(Till September 2025). The primary driver of this growth has been the significant expansion of solar capacity, which has increased at a CAGR of 28.1%. Additionally, wind energy has also contributed to this growth, albeit at a relatively modest pace, with a CAGR of 6.8%.

Growth in India's electricity installed capacity



**FY26 till September 2025; Source: CEA, Crisil Intelligence*

2.2.2 Comparison of tariff for different generation sources

The technology-wise tariff has witnessed a notable trend over the last five years. The average tariff for coal-based power plants has increased at a CAGR of 4.0% during this period. This rise can be attributed to factors such as escalating fuel costs, higher transportation expenses, and increased environmental compliance costs. In contrast, the tariff for solar and wind power plants has exhibited a declining trend, with a significant reduction in costs driven by advancements in technology, economies of scale, and declining equipment prices. On the other hand, the tariff for hydro and nuclear power plants has remained relatively constant over the same period, largely due to the stable and predictable nature of variable cost. This divergence in tariff trends underscores the shifting dynamics of the energy landscape, with renewable energy sources becoming increasingly competitive with conventional sources.

Source wise weighted average tariff trend in India for commissioned projects (Rs/ kWh)

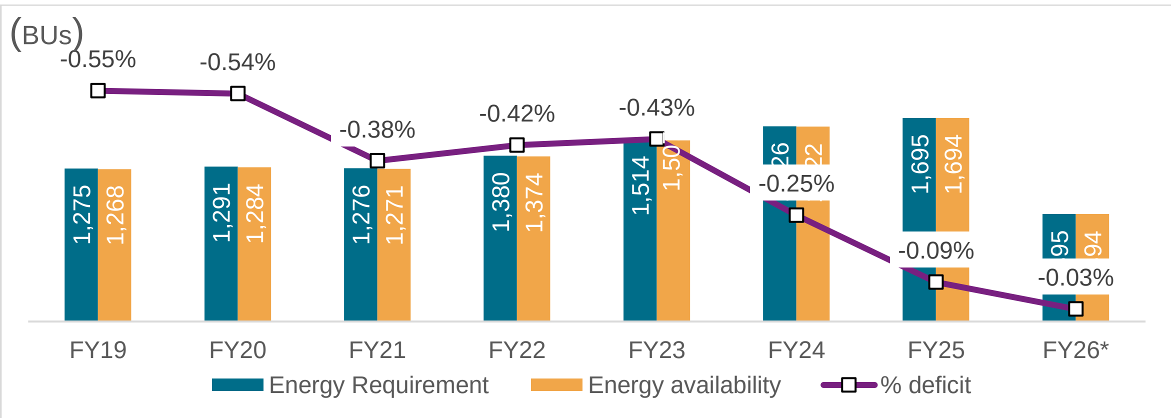
	FY19	FY20	FY21	FY22	FY23	FY24
Coal	3.8	4.2	4.2	4.2	4.4	4.6
Hydro	3.6	3.3	3.7	3.7	3.5	3.8
Nuclear	3.9	3.2	4.1	3.3	3.5	3.3
Oil&Gas	6	6.7	7	8.2	9.3	12.6
Solar	5.3	4.7	4.5	4.2	4.1	4
Wind	4.4	4.2	4.1	3.7	4	3.9
Average Cost of Supply (ACOS)	6.2	6.2	6.5	6.7	7.2	6.8

Source: NITI Aayog, Crisil Intelligence

2.2.3 Electricity requirement and peak demand

India's electricity requirement has risen at a CAGR of 4.86% between fiscals 2019 and 2025 with the growth increasing substantially to 7.37% in the post pandemic period between fiscals 2021 and 2025. The electricity availability has kept pace with the demand growing at a similar CAGR of 4.94% between fiscals 2019 and 2025 on the back of strong capacity additions, both in the generation and transmission segments. The energy deficit declined to 0.25% in fiscal 2024 and 0.09% in fiscal 2025 from 0.55% in fiscal 2019 due to an increase in capacity addition growth of 4.91% over the same period. Strengthening of inter-regional power transmission capacity over the past five years has supported the rapid fall in deficit levels as it reduced supply constraints on account of congestion and lower transmission corridor availability, thereby lowering the deficit to 0.09% in fiscal 2025 further to 0.03% in fiscal 2026 (till September 2025).

Aggregate power demand supply



**FY26 till September 2025; Source: CEA, Crisil Intelligence*

Peak electricity demand in India has grown from 177 GW in fiscal 2019 to 250 GW in fiscal 2025 clocking an average growth rate of 5.92%. The constant rise in peak demand can be attributed to economic growth, seasonal vagaries, and an increasing daily average temperature that India has experienced over the last decade. In Q1 fiscal 2025, power demand surged by 13% on year led by heatwaves and a 6.70% on year growth in GDP. Prolonged and severe heatwaves were especially prominent in the northern part of the country which was also impacted by deficient rainfall in July 2024.

Peak power demand and supply

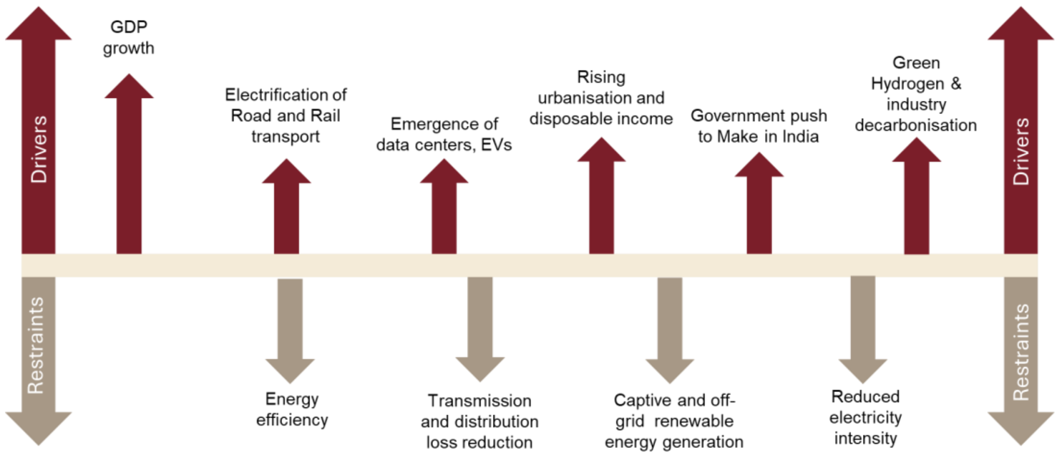
2.3 Outlook on Power sector growth

2.3.1 Long term drivers and constraints for demand growth

Factors influencing power demand



Source: Crisil Intelligence

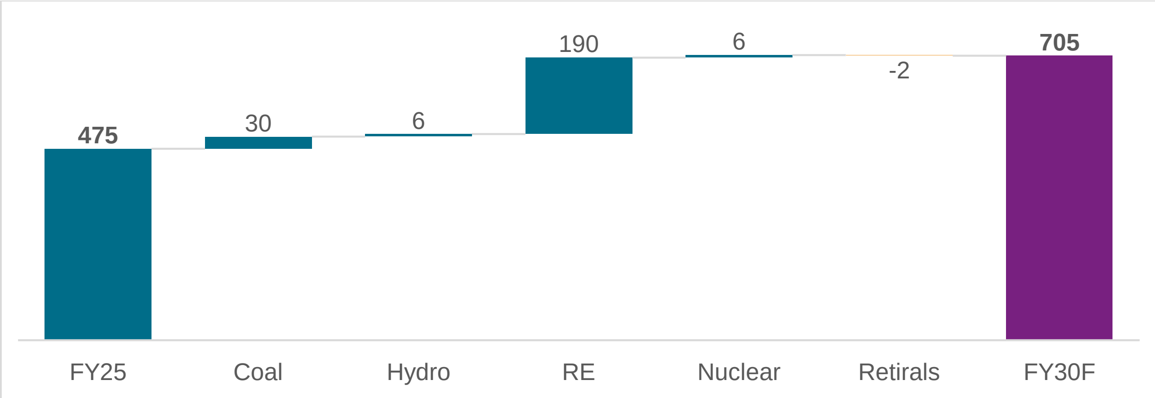
2.3.2 Capacity addition outlook (FY2026-2030)

As per CEA India's installed power capacity is expected to reach 609.6 GW by fiscal 2027 and increase to 900 GW by fiscal 2032, from its current capacity of 496 GW in August 2025. However, as per Crisil Intelligence estimates, the capacity additions in the conventional power generation segment are projected to be around 32-35 GW cumulatively between fiscals 2026 to 2030, driven by higher than decadal average power demand. Crisil expects 28-30 GW of coal-based power to be commissioned over fiscals 2026-30. 2-3 GW of coal-based capacity is expected to retire as per CEA's National Electricity Plan 2023.

Crisil expects 6-7 GW of hydro power installations and 32-35 GW of energy storage solutions including 8.5-9.5 GW pumped hydro storage projects (PSP) capacity additions and 23-24 GW of Battery Energy storage system (BESS) over fiscals 2026-2030.

By fiscal 2030, RE capacity (excl. large hydro) of over 180-190 GW (140-150 from solar and 35-40 from wind) is expected to be driven by various government initiatives, favourable policies, competitive tariffs, innovative tenders, development of solar parks and green energy corridors, etc. RE capacity is estimated to account for about 50% of the installed capacity of 700-710 GW by fiscal 2030. RE is expected to account for over 80% of the additional capacity between fiscal 2026 and 2030.

All India installed estimated capacity addition by fiscal 2030 (in GW)



RE includes solar, wind, small hydro, and other renewable sources

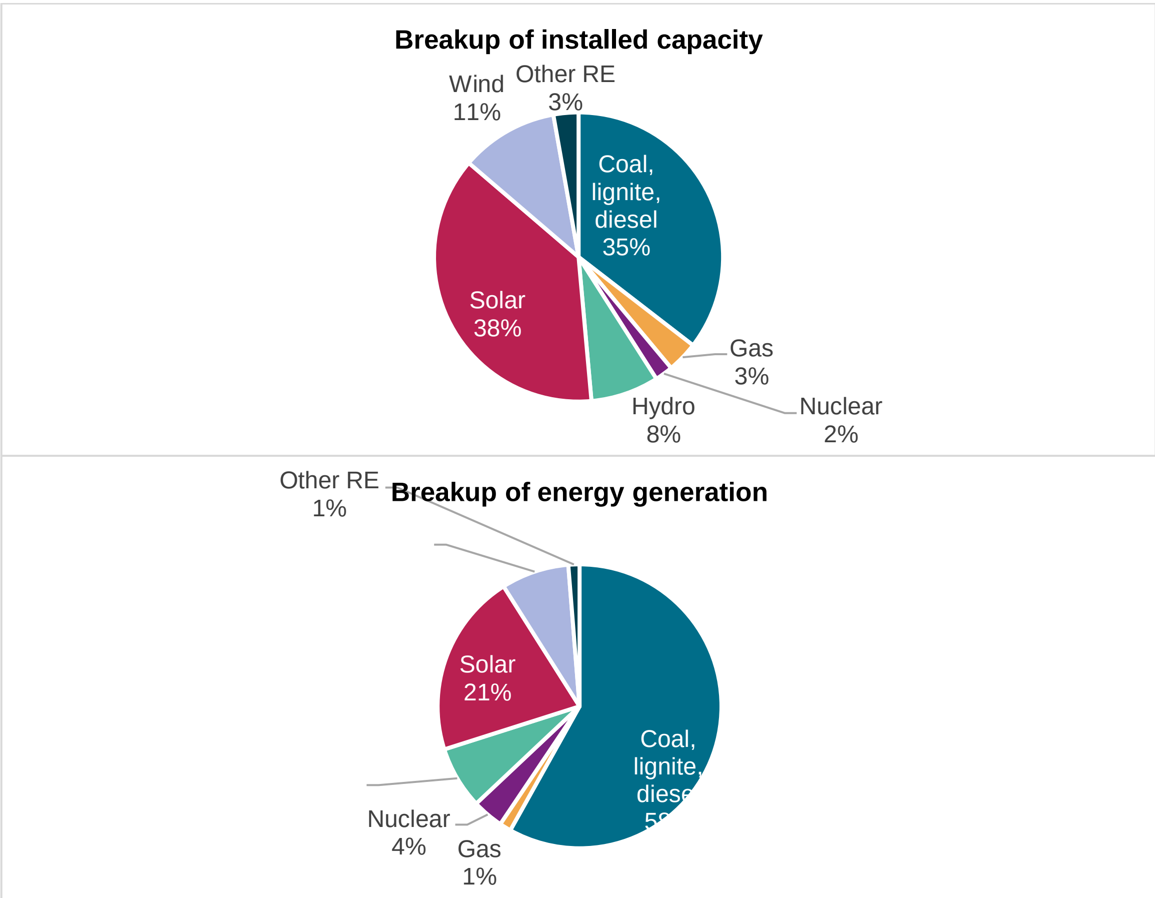
Estimated capacity and generation breakup as of FY2030



Source: Crisil Intelligence

2.4 Discom financial health

Distribution is the final and critical link in the power sector value chain. However, the financial position of the distribution sector has significantly deteriorated over the past decade owing to irregular tariff hikes, high AT&C losses and delays in subsidy payments by state governments. This has adversely impacted power offtake by Discoms and led to delays in payments to generation companies. The Ujwal Discom Assurance Yojana ("UDAY") was launched by the Ministry of Power ("MoP") in November 2015 for improving the financial health and operational efficiency of state-owned Discoms across the country.

Outcomes of the operational improvements were measured through following indicators:

- Reduction of a AT&C losses to 15.00% in fiscal 2019 as per loss reduction trajectory to be finalized by the MoP and States
- Reduction in gap between average cost of supply and average revenue realized to zero by fiscal 2019 as finalized by the MoP and States.

States took over 75.00% of Discom debt as on 30 September 2015, over a period of two years, 50.00% in fiscal 2016 and 25.00% in fiscal 2017. The balance 25.00% (not taken over by the state) was to be converted by lenders into loans or bonds with an interest rate of not more than the banks' base rate plus 10 basis points ("**bps**"). Alternatively, this debt could be fully/partly issued by the Discoms as state guaranteed bonds at the prevailing market rates, which were to be equal to or less than the banks' base rate plus 10 bps. This is estimated to have aided in reduction of interest cost by 300 to 400 bps as the interest rate at which debt is available to Discoms is 13-14%. As on the terminal year for the scheme, fiscal 2020, approximately ₹ 2.3 trillion worth of bonds had been issued (86.3% of target), which led to the debt and interest burden on Discoms being reduced, resulting in higher liquidity.

Both the financial and operational performance of Discoms started to improve post implementation of UDAY, but the situation reversed and worsened again once the scheme ended in March 2019.

The scheme envisaged reduction of the cost of power through measures such as additional supply of domestic coal (at notified prices), coal linkage rationalisation through swap agreements, supply of washed and crushed coal, and supply of cheaper power from NTPC and other central public sector units (as part of central allocation of power to states), if available through a higher plant load factor. Implementation was mixed with policy-level support but there was limited traction on the ground. While coal linkage rationalisation under the SHAKTI scheme did benefit several projects, and domestic supply also improved, the effect has been temporary or partial.

MoP vide Gazette Notification dated 3 June 2022, notified "The Electricity (Late Payment Surcharge and Related Matters) Rules, 2022" ("LPS Rules") to address cash flow challenges faced mainly by gencos and transmission companies ("transcos") and to promote timely payments across the power sector. These rules provide a mechanism for settlement of outstanding dues of gencos, ISTS licensees and electricity trading licensees.

Since their notification, there has been significant progress in recovering outstanding dues, with most distribution companies now adhering to regular payment schedules. The total unpaid bills have reduced from around ₹ 1.4 trillion in June 2022 to around ₹ 623 billion in July 2025. As such the issue of nonpayment by Discoms is resolved to a great extent and provided much required regulatory certainty. The major driver for this trend has been LPS Rules, which converted legacy dues to EMIs. The LPS rule helped bring down days payable from 169 in fiscal 2022 to 132 in fiscal 2024.

In November 2024, Grid Controller of India released an implementation procedure for LPS Rules. It establishes that payment security mechanism (PSM) can be a letter of credit (LC) or LC backed by an escrow account. The Discoms have been provided a choice of making advance payment for the equivalent quantum of power to be scheduled from the gencos.

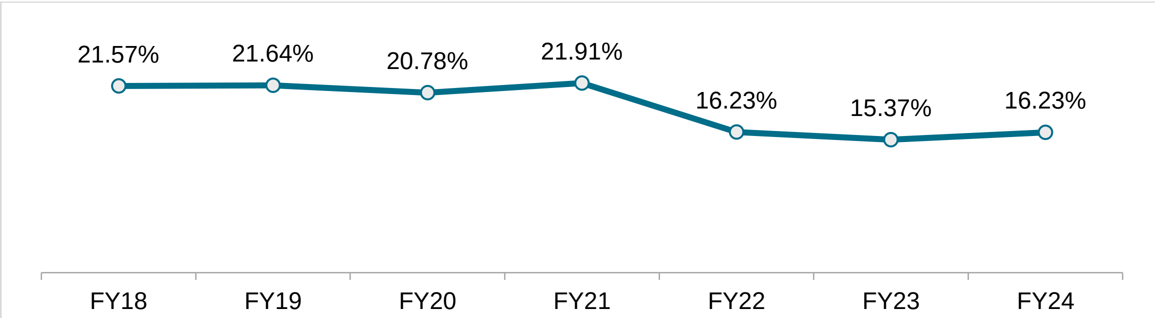
The provision of power is contingent upon the maintenance of a satisfactory PSM or, in its absence, the receipt of advance payment. Failure to comply with this requirement may result in the genco forfeiting its right to impose LPS on Discom. In the event of non-payment of outstanding dues by the specified deadline, the genco's obligation to supply power will be reduced to 75% of the contracted amount, with the remaining

25% being eligible for sale through power exchanges. Furthermore, if the Discom fails to establish a PSM or defaults on payment for a period of 30 days, the genco will be entitled to sell 100% of the contracted power through power exchanges, thereby mitigating potential losses due to non-payment.

2.4.1 Improvements in Operational Efficiency

The AT&C losses for distribution utilities improved from 21.91% in fiscal 2021 to 16.23% in fiscal 2024. Billing efficiency improved marginally from 86.80% to 86.90% in fiscal 2024. However, the collection efficiency decreased by 1.2% from 97.27% in fiscal 2023 to 96.40% in fiscal 2024 which has led to an increase in AT&C loss in fiscal 2024 to 16.23%.

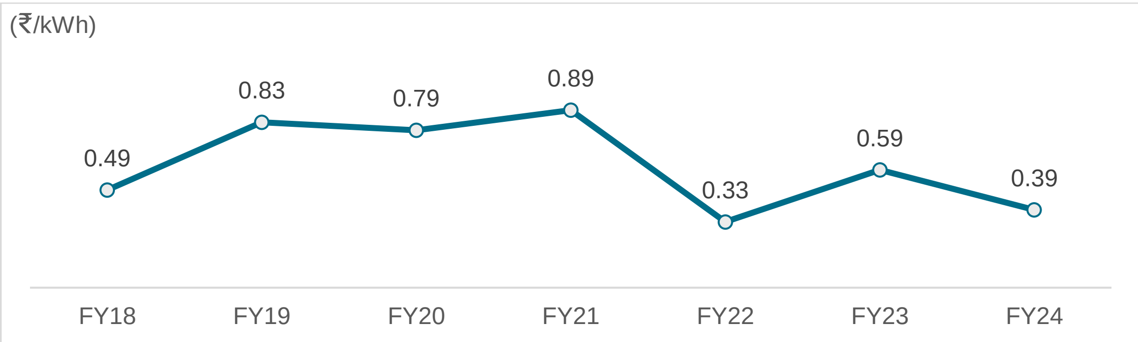
AT&C loss trajectory (%)



Source: PFC, Crisil Intelligence

The cash adjusted ACS and ARR gap narrowed to ₹ 0.33/kWh as of March 2022 driven by higher subsidies disbursement by state governments and better cash collections. In fiscal 2023, the gap again increased to ₹ 0.59/kWh due to an increase in power purchase cost. However, during fiscal 2024, the gap decreased by ₹ 0.20/kWh to ₹ 0.39/kWh.

ACS-ARR gap



Source: PFC, Crisil Intelligence

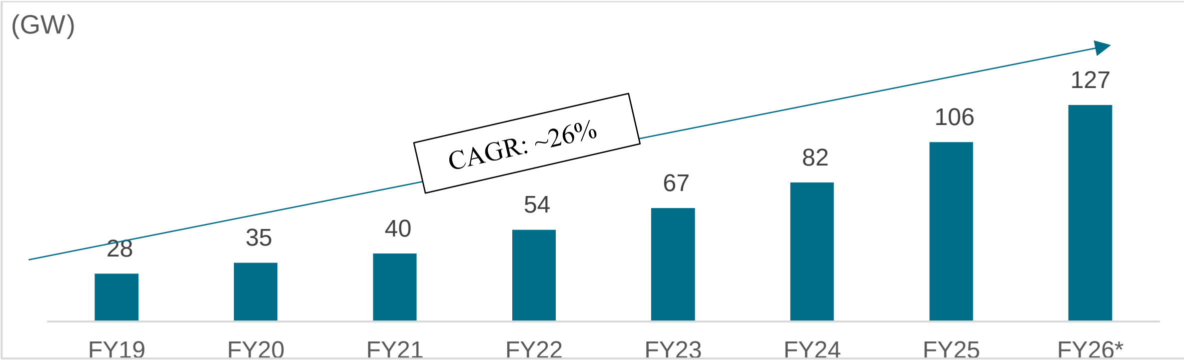
As per the PFC Report on “Performance of Power Utilities 2023-24”, total borrowings by distribution utilities increased from Rs 6,84,836 crore as on March 31, 2023 to Rs 7,52,677 crore as on March 31, 2024. The total borrowings by distribution utilities have seen a growth of 8.5% (CAGR) over a period of last six years.

3. OVERVIEW OF INDIAN SOLAR POWER MARKET

3.1 Evolution of Solar Power in India

Growth in the solar power sector over the last five years has been robust. About 99 GW of solar capacity was added in the segment over fiscals 2019-26 (As of September 2025), registering a CAGR of ~26%, although starting from a low base. Despite the second wave of COVID-19 pandemic, fiscal 2022 witnessed solar capacity additions of ~14 GW. In a relief to developers, the MNRE provided a total extension of seven-and-a-half months for the projects affected by the first and second waves of the pandemic. This has delayed commissioning in fiscal 2022, leading to a spillover into fiscals 2023 and 2024. In fiscal 2023, solar capacity additions stood at ~13 GW, with ~2.2 GW coming from rooftop solar projects. Similarly, in fiscal 2024, solar capacity additions stood at ~15 GW, with ~3 GW coming from grid connected rooftop solar projects. During fiscal 2025, 23.83 GW solar capacity was added leading to 106 GW of installed capacity as of March 2025. 6MFY26 witnesses addition of 21.69 GW of solar capacity.

Historical installed solar capacity in India



**As of September 2025,*
Source: CEA, MNRE, Crisil Intelligence

Technological advancements, such as emerging trends in tandem and perovskite cells and the growing use of bifacial panels that capture sunlight on both sides, are improving the amount of energy generated per square meter. This increased efficiency maximizes output, especially where land acquisition for large solar parks is a challenge. BESS are crucial for addressing the intermittent nature of solar power by storing surplus energy during peak generation times (daytime) and dispatching it during periods of high demand or low sunlight. This ensures a reliable, 24/7 power supply and enhances overall grid stability. A robust and modern transmission network is vital to transmit solar power efficiently from generation sites (often in remote, sunny areas) to consumption centers. Initiatives by entities like PowerGrid to strengthen the transmission infrastructure, along with the creation of a unified national power grid, have minimized power curtailment issues and ensured surplus solar power reaches high-demand areas without significant losses. The waiver of Inter-State Transmission System (ISTS) charges for solar projects also incentivizes better grid integration.

The domestic solar PV segment in India has seen an uptick in recent years across the various segments such as utility scale, rooftop, and open access solar projects. The imposing of solar RPOs across Indian states in 2011 by GoI, coupled with the sharp drop in capital costs, led most states to release solar policies. This resulted in a spur in solar sector investments. Until fiscal 2012, only Gujarat and Rajasthan had state solar policies. Following the success of Gujarat's solar policy, other states such as Andhra Pradesh, Tamil Nadu, Karnataka, Madhya Pradesh, and Telangana introduced their respective solar polices.

3.2 Solar energy potential in India

The National Institute of Solar Energy (NISE) estimated the country's solar potential at 748.99 GW, assuming solar PV modules cover 3% of the geographical surface. India is a perfect location for solar energy because of its location. It has 300 days of sunshine each year, with daily peak electricity use being in the evenings and a seasonal peak in the summer.

The daily average Global Horizontal Irradiance (GHI) in India is around 5 kWh/m2 in north-eastern and hilly areas to about 7 kWh/m^2 in western region and cold desert areas. The annual GHI varies from 1600 – 2200 kWh/m^2. States like Gujarat, Rajasthan, Madhya Pradesh, Andhra Pradesh, Karnataka, and Tamil Nadu offer more solar irradiance as compared to other parts of India, which makes them desirable for installing solar projects.

State wise solar energy potential and installed capacity for key states (as of Sept 2025)

Sr. No.	State	Potential (GW)	Installed capacity (GW)	% Potential exploited
1.	Rajasthan	142.31	34.56	24.28%

Sr. No.	State	Potential (GW)	Installed capacity (GW)	% Potential exploited
2.	Jammu & Kashmir	111.05	0.09	0.08%
3.	Maharashtra	64.32	15.69	24.39%
4.	Madhya Pradesh	61.66	5.68	9.21%
5.	Andhra Pradesh	38.44	5.77	15.01%
6.	Gujarat	35.77	23.41	65.45%
7.	Himachal Pradesh	33.84	0.31	0.92%
8.	Odisha	25.78	0.74	2.86%
9.	Karnataka	24.70	10.56	42.75%
10.	Uttar Pradesh	22.83	3.77	16.50%

3.2.1 Impact of large RE penetration on grid security

Domestic RE energy penetration varies greatly across the various states. There is vast difference in the share in RE-rich states and others. In fact, some RE-rich states have higher RE shares than those of some countries internationally. Countries like Japan, Denmark, Finland, Ireland, Norway, Portugal, Mexico and Argentina have installed wind capacity of 5-8 GW (as of December 2024) whereas Indian states like Tamil Nadu and Gujarat have installed wind capacities of around 11 GW and 23 GW respectively (as of September 2025). Similarly, countries like South Africa, Austria, Belgium, Greece, Hungary, Switzerland and Canada have installed solar PV capacities in the range of 6-10 GW whereas Indian States like Rajasthan has ~35 GW of solar capacity, Gujarat has ~23 GW and Maharashtra have ~16 GW of installed solar PV capacity (as of September 2025). That said, the high RE penetration is causing system integration issues for certain states.

India aims to increase its non-fossil-fuel-based installed electricity generation capacity to 500 GW by 2030. RE will be at the core of achieving this target, with around 450 GW RE expected to be added by 2030. Some of the key challenges due to higher RE penetration include fluctuations in hourly demand, increasing ramping requirements, frequency, and voltage-related grid issues.

Variability affects system management as well as scheduling challenges due to the intermittency associated with RE output. As a result, RE-rich states would have to export some power to other states, back down or avoid coal-based power, and curtail RE for the sake of grid security.

Potential sources of power system flexibility, including demand-side flexibility, power plant flexibility, and storage (pumped storage hydro and batteries) and grid flexibility, should be prioritised to maximise the value of solar and wind.

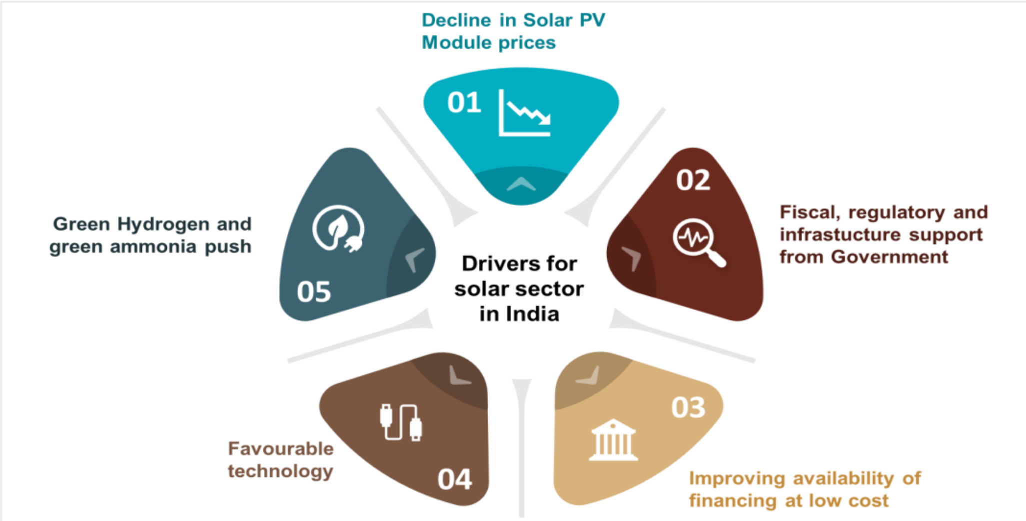
India has already adopted measures to manage variability using different products, such as wind-solar hybrid tenders and energy storage solutions, including pumped hydro storage.

To enable higher RE capacity, areas with high solar and wind energy potential need to be connected to Inter-State Transmission System (ISTS) so that the power generated could be evacuated to the load centres. The gestation period of wind and solar generation projects is much lower than that for associated transmission systems, so the transmission system has to be planned well in advance.

In a significant step towards achieving the planned RE capacity by 2030, CEA has planned a transmission system for about 537 GW of RE capacity. The transmission system has been planned for major RE potential zones, such as the RE park in Leh, Ladakh; Fatehgarh, Bhadla, and Bikaner in Rajasthan; the Khavda RE park in Gujarat; Anantapur and Kurnool RE zones in Andhra Pradesh; and offshore wind farms in Tamil Nadu and Gujarat. The transmission schemes have been factored in energy storage in order to meet the requirement of RTC power. Several high-voltage direct current transmission corridors have also been planned for the evacuation of power from large potential RE zones.

3.3 Key drivers for solar energy capacity additions

Growth drivers for the solar sector in India



Source: Crisil Intelligence

Some of these growth drivers are detailed below:

Declining module prices and tariffs

The global average solar module price, which constitutes 55-60% of the total system cost, declined 73% to \$0.47 per Wp in 2016 (average for January-December) from \$1.78 per Wp in 2010. Innovation in the manufacturing process has reduced costs, putting downward pressure on module prices. Prices continued to decline to \$0.22 per Wp by end-August 2019, owing to the wide demand-supply gap in the global solar module manufacturing industry. Module prices further reached to \$0.22 per Wp level in fiscal 2021. Owing to the ramp-up in the production of upstream components, module prices started to fall in 2023 and to \$0.15-0.20 per Wp in April-November 2023 from \$0.23 per Wp in January 2023.

Solar module prices for domestic modules (imported cell based) reached \$0.22/wp in fiscal 2024 and continued to decline in fiscal 2025, reaching \$0.14-0.16/wp, stimulating growth in solar capacity. Moreover, prices for domestic cell-based modules stood at \$0.22-0.25/wp at the end of fiscal 2025 compared to \$0.28-0.30 /wp in fiscal 2024.

The average price non-DCR modules for fiscal 2025 was estimated at \$0.14-0.16/wp, down 42% on year, owing to sharp fall of 54% in cell prices on year. Crisil Intelligence expects prices to be in the range of \$0.15-0.17/wp for imported cell-based modules and \$0.21-0.24/wp for domestic cell-based modules in fiscal 2026 as players are expected to clear inventory of old technology at low prices and seek premium for TOPCon technologies.

The Ministry of Finance imposed BCD of 25% and 40% on solar cells and modules, respectively, effective April 1, 2022. The imposition of BCD led to an increase in capital costs for projects based on imported modules by 20-25%, and an increase in tariffs by INR 0.2-0.5 per unit (with the tariffs ranging from INR 2.6-2.8 per unit). Subsequently, BCD got revised to 20% on solar cells and 20% on solar modules. effective May 1, 2025. However, the AIDC of 20% on modules and 7.5% on cells keep the effective BCD rate of solar modules at 40% and for cells 27.50%.

Strong government thrust

The GoI has laid significant emphasis on climate change, for which it provided a framework, NAPCC, where it proposed an eight-pronged strategy — NSM, energy efficiency, sustainable habitat, water planning, Himalayan ecosystem, afforestation, sustainable agriculture, and strategic knowledge on climate change. As can be seen, the GoI has laid significant emphasis on solar power. This is also evident from the

100 GW out of 175 GW target set out by the GoI. Government support to the solar sector in India is reflected by the following:

National Solar Mission

Through the CPSU programme under the Jawaharlal Nehru National Solar Mission (JNNSM), the government is encouraging cash-rich central PSUs to set up renewable energy projects. The government expanded the CPSU programme from 1 GW to 12 GW in February 2019 to provide impetus to the domestic solar module manufacturing industry. Central-level allocations under NVVN Batch II, NSM Phase II Batch III and IV have been almost entirely commissioned.

Operational support to execute solar projects

Apart from providing incentives, the government has lent significant support to the solar power sector for execution of projects.

Solar parks: One of the most important initiatives by the GoI has been setting up solar parks in the country. Such parks significantly reduce construction/ execution risk as they include a contiguous parcel of land, evacuation infrastructure (HV/EHV substation evacuating to state grid substation), and other ancillary infrastructure and utilities such as road, water, and drainage. Currently, 25 states have started preparing land banks for solar parks, either through their own implementing agencies or through joint ventures with SECI. The GoI had approved 55 solar parks with an aggregate capacity of 41,137 MW as of January 2025. An aggregate capacity of 13,054 MW of solar projects have been commissioned as of September 2025 while 15,181 MW capacity is under construction and 12,902 MW is under award/tendering process.

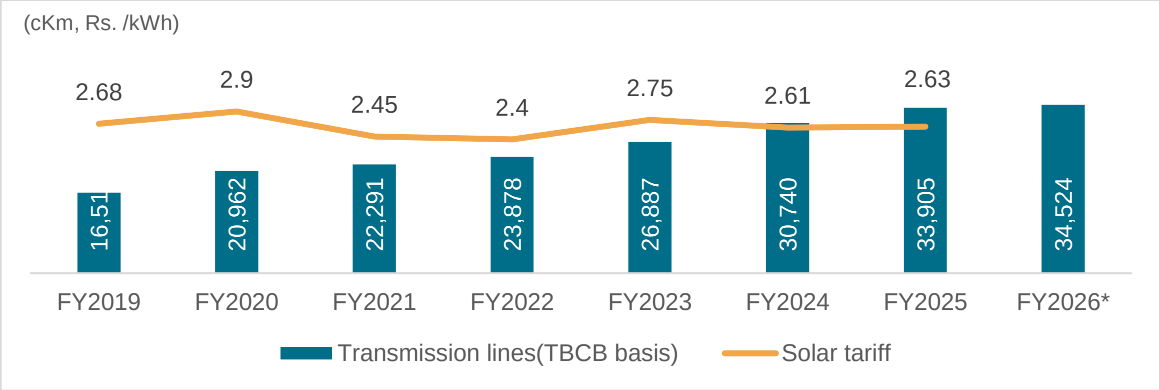
Bidding of 50 GW annual capacity

The Government has decided to invite bids for 50 GW of renewable energy capacity annually for the next five years i.e., from fiscal 2024 till fiscal 2028. These annual bids of ISTS (Inter-State Transmission) connected renewable energy capacity will also include setting up of wind power capacity of at least 10 GW per annum.

T&D Infrastructure

Robust generation capacity addition over the years and government's focus on 100% rural electrification through last mile connectivity has led to extensive expansion of the T&D system across the country. The total length of domestic transmission lines rose from 413,407 circuit kilometres (ckm) in fiscal 2019 to 494,374 ckm in fiscal 2025. Inter-regional power transmission capacity of the National Grid has grown strongly from 99,050 MW in fiscal 2019 to 118,740 MW in fiscal 2025, at a CAGR of 3.1%. Subsequently, transformation capacity rose from 899,663 MVA in fiscal 2019 to 1,337,513 MVA in fiscal 2025, growing at a CAGR of 6.8%.

The National Electricity Plan (Transmission), developed by CEA in consultation with various stakeholders, outlines a comprehensive strategy to achieve the Indian government's energy transition goals. It details the transmission infrastructure required to support 500 GW of RE capacity by 2030, increasing to over 600 GW by 2032. As per the Plan, 191,474 circuit kilometers (ckm) of transmission lines and 1274 Giga Volt Ampere (GVA) of transformation capacity would be added (at 220 kV and above voltage level) in the 10-year period from 2022-23 to 2031-32. A total expenditure of Rs 9.12 trillion has been planned to augment power transmission infrastructure capacity in the country by 2032.



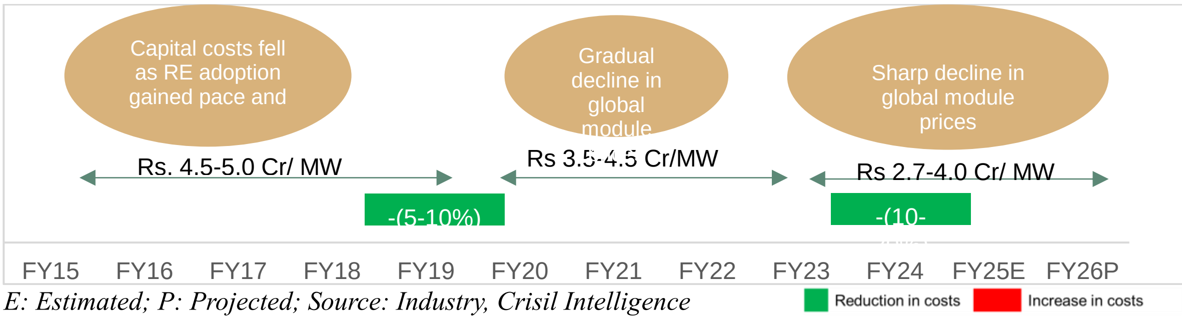
**As of 30 September 2025; No solar bids in FY26 till 30th September 2025.*
Source: Details of Case I bids, Bidding of power from stressed assets, CEA, Results by various agencies; Crisil Intelligence

3.4 Movement of the project capital costs and O&M expenses

Solar project CAPEX trend has largely followed global module price trends – between fiscals 2011 and 2021, EPC cost for utility-scale projects reduced by around 65% to Rs ~39 million/MWp due to falling module prices. While landed module cost increased temporarily in Q2 2022 due imposition of BCD on China modules, over H2 of CY 2022 and CY 2023, led by a massive supply glut in China, prices across the solar value chain declined sharply – China module prices decreased by around 57% in two-year period ended December 2023 to USD 0.12/Wp. As a result, EPC costs for utility-scale projects declined by around 33% in the two-year period ended December 2024 to Rs 23 million/ MWp. On the BoS front, while prices of commodities like copper and aluminum (used for building mounting structures and other key components) are volatile, the effect on overall EPC cost is marginal due to low share in CAPEX.

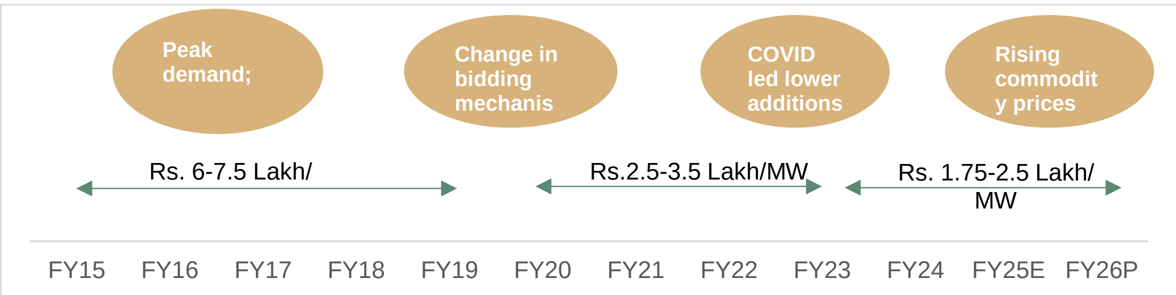
On the O&M front, costs have decreased by around 30% in the last 3-4 years to around Rs 0.18-0.25 Mn/MW/annum due to experience gained by service providers coupled with technology adoption including robotic cleaning. Robotic cleaning not only helps in achieving better efficiency but also are more environmentally friendly since they use less water and no chemical cleaners.

Declining Module prices leading to lower capital costs



E: Estimated; P: Projected; Source: Industry, Crisil Intelligence

Demand, experience and technological improvement leading to lower annual O&M costs



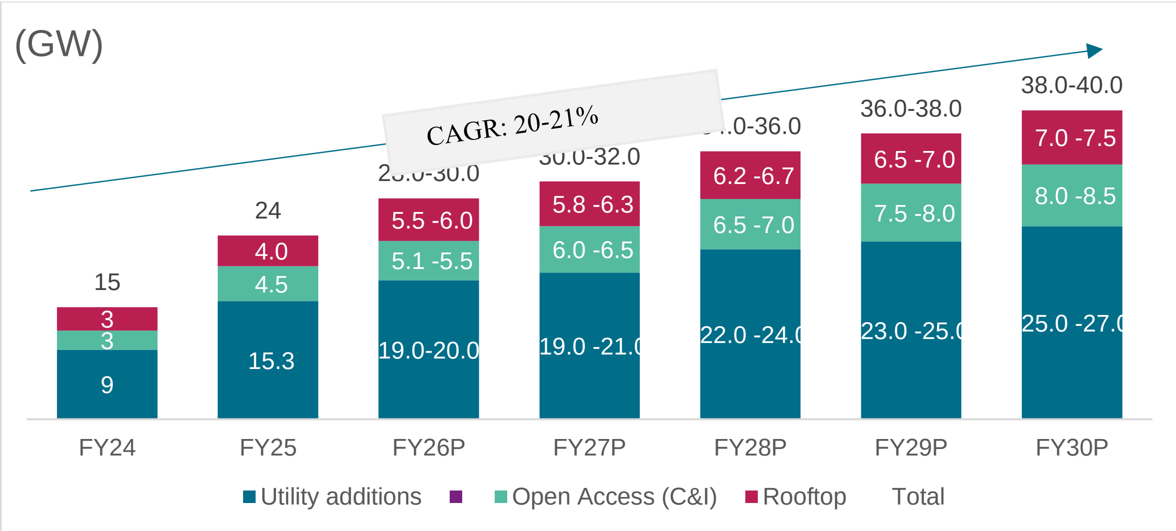
E: Estimated; P: Projected; Source: Industry, Crisil Intelligence

3.5 Outlook of overall grid-connected solar energy capacity additions

Solar sector growth in India primarily spurred by robust government backing, demonstrated through an aggressive tendering strategy. Some of the key catalysts include technological advancements, affordable financing, supportive policies, thrust on go-green initiatives/sustainability targets, cost optimisation due to increased grid electricity tariffs, subsidy initiative (especially in rooftop solar) and various incentives such as ISTS charge waiver.

Crisil Intelligence expects 170-180 GW of solar capacity additions across all segments over fiscal 2026-2030.

Year wise expected solar capacity addition



CAGR for cumulative capacity
P: Projected; Source: Crisil Intelligence

3.6 Key challenges/bottlenecks/threats for solar capacity additions

Notwithstanding the high potential of solar energy, it is mired with some challenges. Overcoming these challenges will be critical for the successful implementation of solar projects.

Availability of contiguous parcels of land: With rapid capacity additions and intense competition, it becomes imperative for developers to acquire land at competitive costs and in areas with high levels of solar irradiance. The 40 GW solar park scheme, which provides land to successful bidders for setting up of the projects, is facilitative in this aspect; however, other than the scheme, capital costs and, hence, tariffs vary between the states depending on land prices and irradiance quality.

Adequacy of evacuation infrastructure: Grid integration of renewables is key to the sector's growth. Instances of delay in readiness of transmission infrastructure at solar parks have caused concern among developers. However, an aggressive roadmap to add an incremental ~100 GW via new schemes and existing available capacity to the grid should be adequate for the expected solar capacity additions' timely execution is critical. Despite aggressive bid awards and issuance of LOAs, multiple projects have failed to secure signed PPAs due to evacuation bottlenecks. The limited availability of transmission capacities has made it difficult for the developers to secure grid connectivity.

Delay in development of transmission evacuation infrastructure: There is a limited margin available at existing/under implementation 220 kV and 400 kV bays of ISTS substations which create bottlenecks for connecting new RE projects. The transmission projects face multiple challenges such as right of way issues, forest clearances, and supply chain constraints. Due to such challenges, the government has estimated that transmission connectivity for only about 60 GW of RE capacity is expected by fiscal 2027. Furthermore, if a developer applies for connectivity today in Rajasthan/Gujarat (RE rich States), the connectivity may not be available till FY2030.

***Availability of low-cost capital*:** With the emergence of several large players in the sector, scale, and experience have aided fund-raising to an extent, especially with the backing of several foreign investors. However, after factoring in the weak rupee, the conservative risk appetite of lenders, and other added cost pressures, it is imperative for developers to maintain prudent capital management over the long term. To mitigate these factors, developers have been tapping alternative/new routes to raise money from time to time. Furthermore, the other key monitorable are deterioration in the financial profile of distribution utilities resulting in offtake issues and payment defaults, declining power deficit, and aggressive bidding.

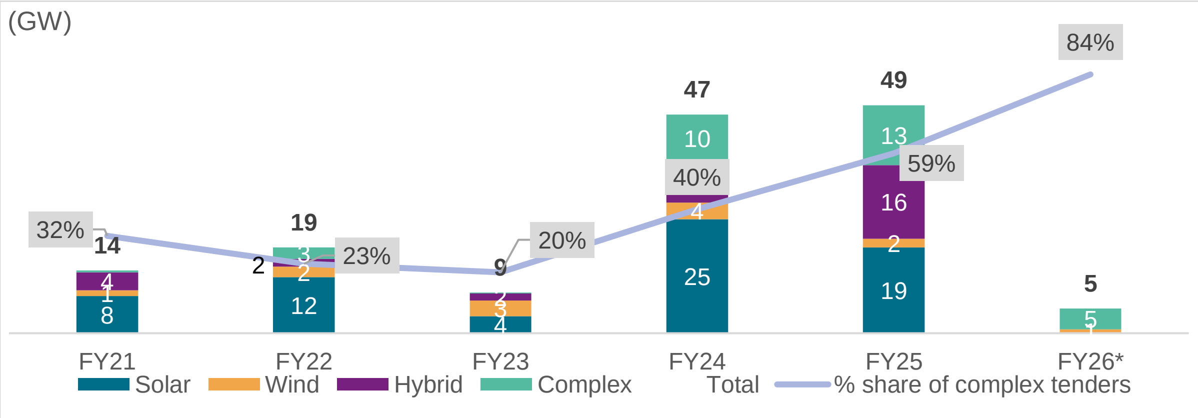
3.7 Trend in year wise tenders awarded in WSH

India issued over 140 GW of completed utility scale renewable energy tenders since fiscal 2021 across all technologies including complex WSH tenders with storage. The tendering activity increased about five-fold between fiscal 2023 and 2024 due to significant increase in government targets, innovative tendering solutions, Discom's shift to offtake more stable and firm power and increase in power sector investment. The tendering activity for utility scale RE projects has outpaced the government's target of 50 GW for fiscal 2024. The government selected SECI, NTPC, SJVN and NHPC as RE implementing agencies (REIA).

Hybrid and Complex Hybrid RE tenders (including peak power tenders) have shown significant growth over the years. The share of Complex Hybrid RE tenders has increased from 32% in fiscal 2021 to 59% in fiscal 2025.

Apart from this, over 20 GW of standalone energy storage systems (ESS) tenders were also issued including pumped hydro storage. The average allocation of tenders has been above 85% of the tendered capacity in the last five years.

RE tender auctioned capacity annually



**FY26 data as of Sept 2025*
Note: Includes only utility scale tenders concluded during the year; Complex tenders include RTC, FDRE and PPS
Source: Central and State nodal agencies, Crisil Intelligence

3.8 Key growth drivers

WSH and FDRE segment in India is experiencing rapid growth, driven by several key factors:

- **Opportunity:** India has around 696 GW (120 m hub height) wind potential and around 750 GW of solar potential. Currently only around 10% of the potential is developed and balance 90% of the potential yet to be exploited. This provides huge opportunities for wind and solar energy development.

- **Geographical advantages:** India's coastline provides high wind speed as well as excellent solar potential. States such as Gujarat, Maharashtra, Karnataka, Tamil Nadu, Andhra Pradesh have excellent wind as well solar potential. Such an advantage provides a great opportunity for supply of WSH power.

Depending on the project requirements, the WSH projects can be co-located or located in different locations, making it more flexible even if natural resources are located in different places.

- **Complementary resources:** Wind and solar sources complement each other. Due to their inherent characteristics, they generate power during different times of the day as well as seasons. Therefore, for 24X7 supply, they complement each other and hence WSH projects provide more reliable power and can be used for RTC supply (especially with energy storage).

- **Resource optimisation:** Co-located WSH plants can help with resource optimisation. With optimum land utilisation and infrastructure sharing, the wind and solar resources can be optimally utilised leading to better CUF as well as cost optimisation. With energy storage facilities, the WSH plants help in better grid management and higher penetration of RE into existing power systems.
-
- **Policy push:** Government of India's policy push has also helped the WSH segment. A confluence of increased RPO targets, VGF funding, ISTS waiver, PLI and solar park schemes, have helped both the resources to thrive.

3.9 Outlook on the WSH capacity additions in India

By early 2025, India has made notable progress in wind-solar hybrid energy, with an installed capacity of approximately 1.44 GW. Looking ahead, the country is poised for substantial expansion in this area. India's overarching goal is to achieve a remarkable 500 GW of renewable energy capacity by 2030, with wind-solar hybrids anticipated to be a crucial component in realizing this ambitious vision.

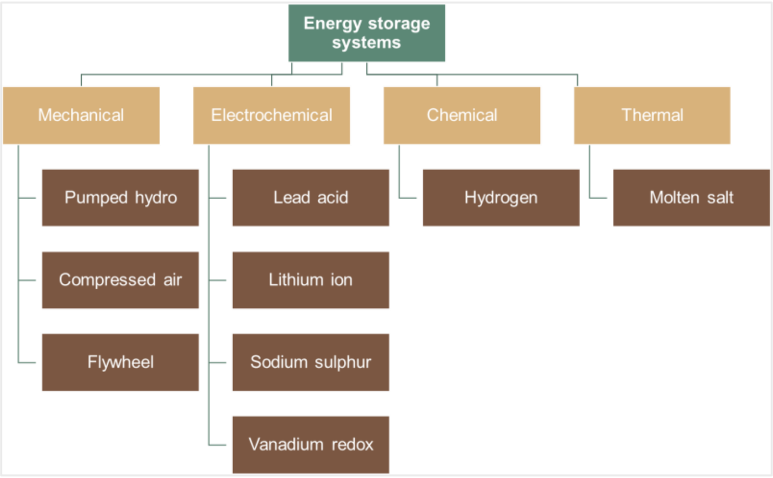
With a large quantum of pipeline already in place for solar/wind-only projects, nodal authorities are now turning to issue tenders that aim to improve the quality of power supplied to off-takers. Some key changes have been made to tender structures concerning the quantum of generation available from RE sources and the ability to match peak demand.

4. OVERVIEW OF BATTERY ENERGY STORAGE SYSTEMS

4.1 Overview of energy storage technologies

Energy storage technologies can be broadly divided into four segments – mechanical, electromechanical, chemical, and thermal storage. However, only a few technologies are available on a commercial scale worldwide. Technologies such as pumped storage project (PSP), liquid electrolyte-based lithium ion, and sodium ion batteries are available commercially and are being used for different applications. Considering the intermittent and unpredictable nature of RE technologies, such as solar and wind technologies, efficient and economical grid operation is increasingly becoming one of the critical challenges for India's power system. This challenge calls for solutions such as spinning reserves (extra generating capacity which can be activated on decision of the system operator), flexible generation, ancillary services, transmission system augmentation & frequency control, etc.

Major types of storage technologies



Sources: Industry reports, Crisil Intelligence

PSP is the most widely used and commercially available means of energy storage technology in India. However, the total installed capacity of PSP is minuscule (~4% of the exploitable potential) in the country.

Energy storage technologies could play a vital role in smoothing out the delivery of variable or intermittent resources like wind and solar energy. By storing excess energy during periods of high generation and use of the same during high demand period thereby ensuring grid stability. This balancing effect helps ensure a more consistent and reliable energy supply, reducing dependence on immediate availability and improving overall grid stability.

4.2 Battery Energy Storage Systems

Battery Energy Storage Systems (BESS) is another form of storage technology which has gained traction in the last few years. It has relatively high energy density compared to PSP, making it appropriate to offer ancillary services. More importantly, BESS can be installed easily, requires less time for setup, and can be used for a wide range of grid support activities, such as energy time shift, distribution deferral, and energy arbitrage etc. The technology is yet to achieve its full potential to provide grid support services, and comes with high investment cost and changing technology, and therefore has associated risks. Further, batteries would require replacement or disposal after 10-12 years, depending upon usage.

Lithium-ion BESS play a vital role in reducing carbon emissions, integrating renewable energy, and supporting grid services; however, their development is hindered by various issues, including cost of batteries, supply chain constraints, sustainability, limited recyclability, and safety risks.

As of September 2025, the total installed storage capacity of India is 6.89 GW out of which 0.20 GW/0.5 GWh is from BESS and 6.69 GW is from PSP.

4.3 Lithium battery supply chain, sustainability, recyclability, and safety

The lithium-ion battery supply chain, sustainability, recyclability, and safety are complex and interconnected issues that pose significant challenges to the industry.

***Supply chain*:** The extraction of lithium and cobalt, essential components of lithium-ion batteries, is frequently linked to environmental and social problems like water contamination, child labor, and artisanal mining. Due to the dominance of a few nations in manufacturing (such as China and Democratic Republic of Congo), the lithium and cobalt supply chains are severely concentrated, which might result in price fluctuations and supply chain concerns. Due to the growing need for lithium-ion batteries, the supply of essential elements like lithium, cobalt, and nickel is becoming stretched, which might result in scarcity and price hikes.

Sustainability**:** The manufacturing of lithium-ion batteries consumes a lot of energy and releases greenhouse gases, which worsens climate change. Large amounts of water are needed for lithium mining and processing, which might deplete local resources and cause water contamination. Lithium-ion batteries may produce a large amount of waste at the end of their life, including harmful elements such as lead, mercury, and cadmium. The biodiversity loss, land degradation, and habitat damage that can result from large-scale lithium mining and processing are all examples. With the increasing demand for renewable energy and electrification, BESS emerge as a trustworthy power solution, enabling reduced emissions compared to a coal-based power plant, optimized energy expenses, and a more resilient and sustainable grid.

Recyclability**:** Lithium-ion battery recycling is still in its early stages, with only a few resources and methods available for recycling these batteries effectively and securely. Lithium-ion batteries are challenging to recycle due to their complex structure, which includes several materials and components that need specific treatment. The absence of consistency in battery chemistry and design prevents the creation of effective recycling methods. Because of the high expense of collection, sorting, and processing, lithium-ion battery recycling is generally not feasible economically if proper process is not adopted.

As per Battery Waste Management Rules, 2022, the recovery of minimum battery materials for industrial use, which includes stationary batteries has been mandated to 55% for fiscal 2025 which will be increased to 60% by fiscal 2027 onwards and 70% by 2030.

Safety**:** If not made, used, or utilized correctly, lithium-ion batteries can be prone to thermal runaway, which can result in fires and explosions. Lithium-ion batteries include hazardous chemicals such as lithium, cobalt, and nickel, which, if not treated and discarded correctly, can be detrimental to both the environment and human health. If lithium-ion batteries are not manufactured or utilized properly, they may provide an electrical shock risk. Lithium-ion batteries can be dangerous to transport because of the possibility of fires and explosions, especially if they are not packed and handled correctly.

Addressing these interlinked challenges requires innovations in sustainable sourcing, efficient recycling technologies, stringent safety protocols, and cohesive regulatory frameworks.

4.4 Review of policies, regulations, and guidelines for battery storage

Over the last 5-6 years, the government has taken several initiatives to promote energy storage through standardisation of the policy and regulatory framework by issuing guidelines, regulations, changes in bidding mechanisms, etc. The summary of key policy measures is listed below.

Key policy measures for storage projects

2021	2022	2022	2023	2023	2024	2025
• In June 2021, ISTS charge waiver for ESS projects commissioned on or before June 30, 2025 • In Jun 2021, PLI scheme for manufacturing of ACC batteries was launched	• In Jan 2022, CERC issued Ancillary Services Regulations. Storage projects allowed to participate in secondary and tertiary ancillary markets • In Mar 2022, govt formulated Guidelines for Procurement and Utilization of BESS as part of GTD assets	• In Dec 2022, CEA issued National transmission system plan 2030 in which district-wise BESS capacity that needs to be set up by 2030 is specified • In Apr 2023, MoP issued guideline for PHS which provides framework for bidding and allotment of PHS sites to developer	• In Jun 2023, Electricity (amendment) Rules, 2023, MoP allowed the energy stored in BESS to be considered for captive status • In Jun 2023, MoP issued bidding guidelines for FDRE based tenders which require mandatory ESS deployment	• In Aug 2023, MoP issued National Framework for Promoting ESS • In Sept 2023, the govt approved VGF scheme to develop 4 GWh BESS capacity by 2030	• India's first commercial utility-scale battery energy storage system project receives regulatory approval from Delhi Electricity Regulatory Commission	• In Feb 2025, MoP mandated to include ESS in all future solar tenders with a minimum two-hour storage, equivalent to 10% of installed solar capacity • BESS target under VGF scheme increased to 13.5 GWh from 4 GWh; further increased to 30 GWh with Rs. 5400 Crs VGF

Source: MoP, MNRE, Crisil Intelligence

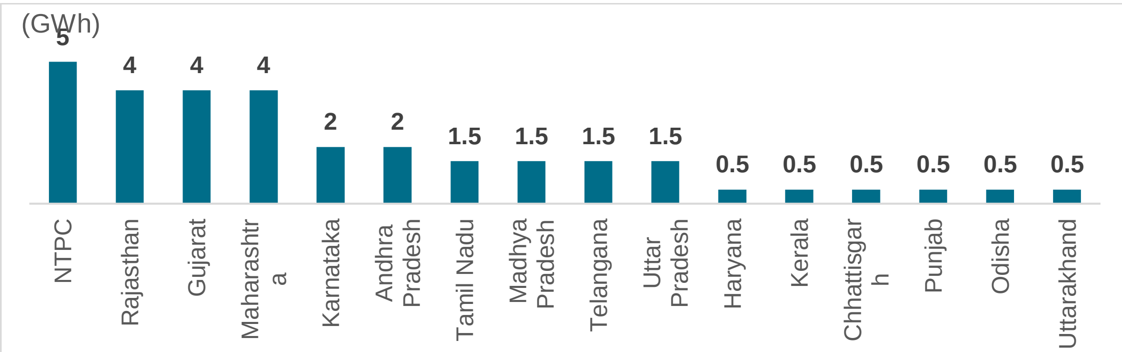
The GoI has taken several measures such as providing legal status to storage, energy storage obligation, waiver in ISTS charges, captive status for energy stored in BESS. These measures are expected to expedite the deployment of storage systems and thereby accelerating the growth of India’s RE capacity. MNRE in its RE bidding guidelines provided the option to the RE developer to tie up with energy storage system developers to meet the project parameters to provide firm and dispatchable RE power.

Battery energy storage projects

BESS can be used for multiple applications such as voltage and frequency regulation, spinning reserves, peak shaving. With rising R&D and subsequent improvement in technology as well as increasing scale, cost competitiveness of such solutions to improve. For batteries, a special consideration is degradation. Batteries degrade as they age, decrease the amount of capacity they can store. The expected life of the batteries is about 10 to 12 years (depending on the technology and how the batteries are operated). By the end of that time, the batteries' capacity is expected to be reduced to less than 70% of their original capacity.

In September 2023, the government approved the VGF scheme for development of 4000 MWh of BESS capacity by fiscal 2031. In April 2025, due to decline in battery prices, the capacity of the scheme increased to 13,200 MWh without any change in the budgetary allocation. The VGF support will be provided to the projects approved during 2023 – 2026. An initial outlay of INR 94 billion including budgetary support of INR 37.60 billion has been provided under the scheme. The VGF would be provided from fiscal 2024-26 and will be capped at 40% of the capital cost. Subsequently, in June 2025, the Central government approved addition VGF worth INR 54 billion for setting up 30 GWh of BESS. The scheme will provide financial support to 15 states and NTPC, allocating INR 1.8 million/MWh for each project. Of the total 30 GWh target, 25 GWh will be distributed among 15 states to meet their energy storage needs, while 5 GWh will be allocated to NTPC to optimize existing thermal generation and transmission infrastructure and supply electricity during non-solar hours reliably and cost-effectively. The state-wise allocation is as follows:

State wise BESS capacity allocation



Source: Ministry of Power, Crisil Intelligence

Prior to VGF scheme, the Ministry of Heavy Industries in June 2021 launched a PLI scheme for Advance Chemistry Cell battery storage of 50 GWh capacity with an outlay of INR 181 billion, which includes more than 10 GWh grid-scale battery storage. The Scheme expects direct investment of around INR 450 billion in ACC Battery storage manufacturing projects. As of May 2025, out of 50 GWh capacity, 40 GWh capacity has already been allotted through competitive bidding process.

In February 2025, the MoP issued an advisory requiring new solar power projects to incorporate energy storage systems to enhance grid stability and reduce power costs. The advisory, sent to state governments, central generating stations, and renewable energy agencies, mandates that all future solar tenders include co-located ESS with a minimum of two-hour storage, equivalent to 10% of the installed solar capacity. By implementing this requirement, the MoP expects to add about 14 GW/28 GWh storage capacity by 2030.

Usage of battery storage is expected to be strong across the generation, transmission, and distribution segments as well as at the consumer end. The National Renewable Energy Laboratory has also forecasted a fall in the price of storage solutions, especially lithium-ion technology. With the greater adoption of lithium-ion battery storage, improvement in battery efficiency, and large-scale manufacturing, Crisil Intelligence projects installation costs for utility-scale lithium-ion batteries to fall to U.S.$ 75 - 85 per kWh by Fiscal 2030 from U.S.$ 110 -115 in Fiscal 2025.

Pumped hydro projects

The GoI has taken several measures such as providing legal status to storage, energy storage obligation, waiver in ISTS charges, captive status for energy stored in BESS. These measures are expected to expedite the deployment of storage systems and thereby accelerating the growth of India's RE capacity. The guidelines released by the MoP in April 2023 address many issues. However, traction in PHS projects will depend on steps to make tariffs attractive to discoms and mitigate implementation risk to fuel private sector participation. MNRE in its RE bidding guidelines provided the option to the RE developer to tie up with energy storage system developers to meet the project parameters to provide firm and dispatchable RE power.

Unlike other storage technologies, the performance of PHS is quite reliable on long term basis. PHS offers energy storage for 6 to 12 hours which is well suited for energy-shifting applications, wherein excess RE generation can be shifted to peak demand periods of late evenings. The long project life of PHS has the potential to provide a stable and consistent cash inflow for about 40 years.

Several provisions are proposed to facilitate the allocation and development of PHS under the guidelines such as no upfront premium for project allocation, monetization of ancillary services, and participation in all market segments. Financial institutions are expected to provide long-term loans with competitive rates, and tax and duty incentives are provided to encourage development. States may reimburse State Goods and Services Tax (SGST) on hydropower project components, provide exemptions in stamp duty and registration fees for land, and offer land on an annual lease rent basis. The guidelines also mandated using green finance like sovereign bonds or concessional climate finance for funding such projects.

To speed up the clearance process, CEA has also established a Single Window Clearance Cell for approval of PSPs. Additionally, MoP has provided budgetary support of Rs. 10 Mn/MW (for projects above 200 MW) and Rs. 15 Mn/MW (for projects below 200 MW and up to 25 MW) for the construction of roads and bridges for hydropower projects (including PHS projects) whose construction started after March 2019.

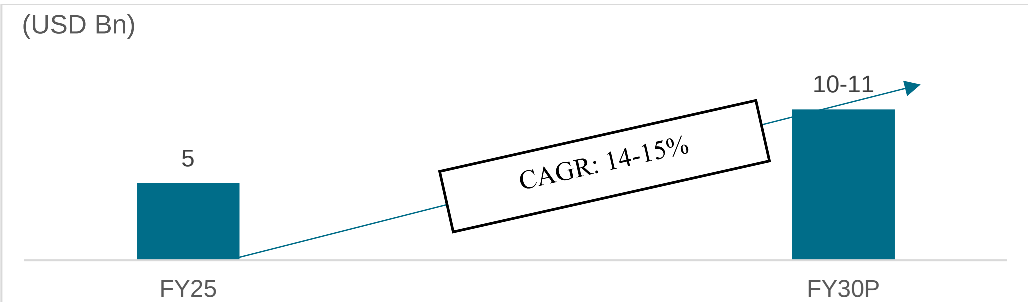
4.5 Review of BESS capacity additions in India

Usage of battery storage is expected to be strong across the generation, transmission, and distribution segments as well as at the consumer end. The National Renewable Energy Laboratory has also forecasted a fall in the price of storage solutions, especially lithium-ion technology. With the greater adoption of lithium-ion battery storage, improvement in battery efficiency, and large-scale manufacturing, Crisil Intelligence expects the four-hour utility-scale lithium-ion battery costs to decrease to $90-100 per kWh in 2030 from the costs of $130-140 per kWh in 2023.

With the announcement of several large-scale PS projects across the country, the PS segment is also expected to witness significant adoption. According to the CEA's report on optimum power generation mix study in April 2023, India will require at least 41.7 GW/208 GWh of BESS (5 hours duration) and 18.9 GW of PSP by fiscal 2030. Subsequently, the NEP by CEA for the period 2022-32 estimated likely requirement of BESS by fiscal 2027 as 8.68GW / 34.72 GWh and by fiscal 2032 as 47.24GW / 236 GWh.

Crisil Intelligence estimates that the BESS market is valued at USD 5.2 billion as of fiscal 2025 based on tenders awarded and is expected to reach USD 10-11 billion by fiscal 2030 at a CAGR of 14-15%.

Investment in BESS



P: Projected; Source: Industry, Crisil Intelligence

4.6 Key driving factors for adoption of BESS in India

***Increasing RE share and power demand*:** GoI has set an ambitious target of 450 GW of RE capacity addition by 2030. Such high quantum, variability, and intermittent nature of RE will drive installation of energy storage in India. Utilizing BESS during peak load periods will reduce the peak load, ultimately helping in reduction of fixed charges and leading to reduced curtailment, thus enhancing overall utilization of RE generation. Furthermore, with adoption of time of day (ToD) tariffs and higher peak period tariffs, BESS has become more and more relevant.

New age RE tenders**:** The firm power and peak power supply tenders require mandatory provision of ESS technology to meet demand profile of the offtaker (either time block wise or during peak hours). This has increased the adoption of ESS, particularly BESS due to their advantages over other technologies.

Falling battery prices**:** Declining battery costs making the BESS cost competitive which is expected to increase adoption of BESS.

Regulatory and Policy Support**:** The GoI has placed emphasis on developing BESS to improve grid operations. An initial financial outlay of Rs 94 billion as VGF support for development of 4,000 MWh of BESS projects in the country by 2030-31 which has been increased to 13,200 MWh. An outlay of INR 37.6 billion has been approved by the central government to support the VGF. Subsequently, in June 2025, Central government approved addition VGF worth INR 54 billion for setting up 30,000 MWh of BESS. PLI for the manufacturing of Advanced Chemistry Cell battery storage of 50 GWh capacity with an outlay of Rs 181 billion, which includes more than 10 GWh grid-scale battery storage.

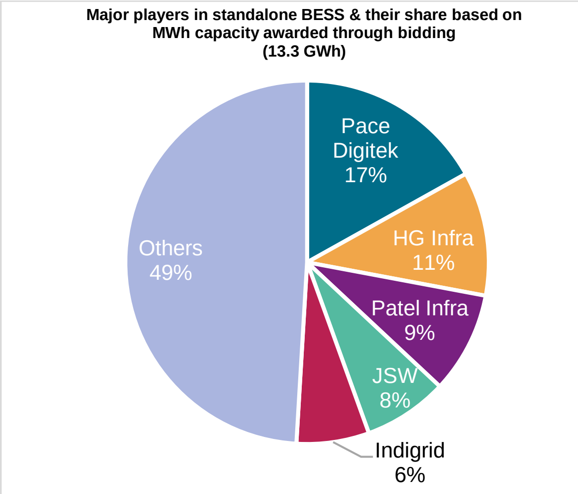
Advantage over other ESS technologies**:** BESS is one of the most promising of existing energy storage technologies due to its superior energy density, efficiency, modularity, and response times. BESS can be built relatively quickly for less capital than many other energy projects, and its ability to play multiple roles (ancillary services, energy arbitrage, etc.) within a changing energy system across a range of durations and power requirements. Furthermore, BESS requires lower space and can be installed on vertical basis, which means it does not have land constraints and can be installed in available space based on grid requirement and RE generation available.

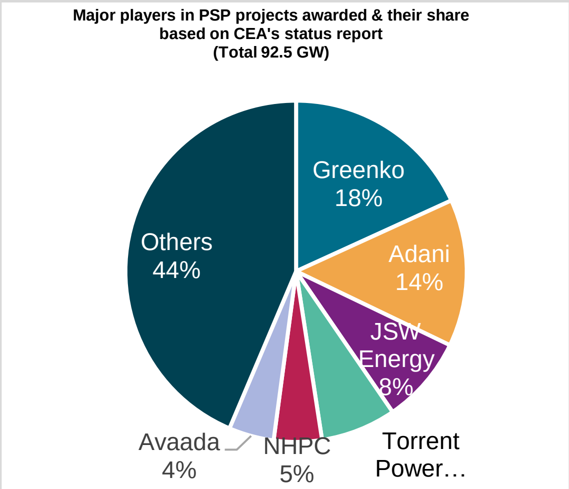
Declining storage cost**:** Continuous declining cost of battery i.e. lowering Levelized cost of storage. The discovered tariff under the BESS tenders more than halved from INR 10.84 lakh/MW/month in the first SECI tender in August 2022 to INR 4.48 lakh/MW/month in the latest tender by Gujarat in March 2024. Based on prevailing battery costs, the storage cost using BESS is estimated to have come down from over INR 8.0- 9.0 per unit seen in 2022 to INR 6.0-7.0 per unit in 2024 and further down to INR 3.32 per unit as per recently concluded tenders in Apr 2025.

4.7 Key players in storage segment

Major RE developers such as ReNew, Greenko, Tata Power, JSW are aggressively adopting ESS. ReNew won two ESS tenders (Peak Power Supply, RTC-1). Greenko is developing ESS through PSP. It is developing Integrated Renewable Energy Storage Projects (IRESP) in Andhra Pradesh combining GW scale wind, solar and PSP power.

Major players and their share in standalone BESS/PSP based projects as of Aug 2025





Source: CEA, SECI, Bidding agencies, Crisil Intelligence

According to CEA's status report on PSP development as of August 2025, a cumulative capacity of ~16.8 GW has been allotted to Greenko. Other players such as Adani Green Energy, JSW, Torrent Power and Avaada are cumulatively developing over 35 GW of PSPs.

Further, the developers who won RTC, peak power, FDRE tenders under competitive bidding route such as ReNew, Acme, Tata Power, Bluepine, Hero Future, NTPC are deploying BESS to meet the power requirements of their respective offtakers as indicated in the RFPs. In standalone BESS projects, companies such as IndiGrid, Pacedigitek, JSW, HG Infra are some of the leading players who have won significant capacities in the last one year.

List of key players in ESS segment

Key players	Key achievements in ESS segment
IndiGrid	• 20 MW / 40 MWh BRPL's BESS project (Operational) • 180/360 MWh won under GUVNL's 250 MW / 500 MWh tender • 250 MW / 500 MWh won under NVVN's 500 MW / 1000 MWh tender for Rajasthan
Greenko	• 900 MW project won under SECI tender for peak power supply • 500 MW/3,000 MWh ESS capacity under NTPC tender

Key players	Key achievements in ESS segment
	• Developing IRESP at Andhra Pradesh with 3 GW solar, 0.5 GW wind and 1.2 GW/10.8 GWh PSP
ReNew	• 300 MW peak power supply project with a storage capacity of 75 MW/150 MWh • 400 MW RTC project with storage capacity of 25 MW/100 MWh • 2 GWh battery energy storage system (BESS) along with 1.8 GWp solar and 1 GW wind in Andhra Pradesh
JSW Energy	• Won 500 MW/1,000 MWh BESS under SECI tender • Plan to install 5 GW/40 GWh energy storage capacity by 2030
NHPC	• Scouting for over 20 GW of PSPs in the States of Andhra Pradesh, Maharashtra and Odisha and have also signed MoU with the respective State departments • Signed MoU with Gujarat Power Corporation for investment in Kuppa PSP of 750 MW
Tata Power	• 10MW/10MWh BESS commissioned in Delhi • 20MW/50MWh BESS project in Leh, Ladakh • 100 MW Solar with 40MW/120 MWh BESS at Chhattisgarh
L&T	• 20 MW solar with 8 MWh BESS at Andaman & Nicobar
Mahindra Susten	• 6MW Solar with 6MW/19MWh BESS at Gujarat

Source: Company websites, press release, Crisil Intelligence

5. OVERVIEW OF INDIAN POWER TRANSMISSION SECTOR

5.1 Overview and structure

The transmission segment plays a key role in transmitting power continuously to various distribution entities across the country. The transmission sector needs concomitant capacity addition, in line with generation capacity addition, to enable seamless flow of power.

A T&D system comprises transmission lines, substations, switching stations, transformers, and distribution lines. To ensure reliable supply of power and optimal utilisation of generating capacity, a T&D system is organised in a grid which interconnects various generating stations and load centres. This is done to ensure uninterrupted power supply to a load centre, even if there is a failure at the local generating station or a maintenance shutdown. In addition, power can be transmitted through an alternative route if a particular section of the transmission line is unavailable.

In India, the T&D system is a three-tier structure comprising distribution networks, state grids, and regional grids. The distribution networks and state grids are owned and operated by the respective state transmission utilities or state governments (through state electricity departments). Most inter-state and inter-regional transmission links are owned and operated by the Power Grid Corporation of India Ltd (PGCIL) which facilitates the transfer of power from a surplus region to one with deficit.

The T&D system in India operates at several voltage levels:

- Extra high voltage (EHV): 765 kV, 400 kV and 220 kV
- High voltage: 132 kV and 66 kV
- Medium voltage: 33 kV, 11 kV, 6.6 kV and 3.3 kV
- Low voltage: 1.1 kV, 220 volts and below
  Transmission and sub-transmission systems supply power to the distribution system, which, in turn, supply power to end consumers. To facilitate the transfer of power between neighbouring states, state grids are inter-connected through high-voltage transmission links to form a regional grid. There are five regional grids:
- Northern region: Delhi, Haryana, Himachal Pradesh, Jammu and Kashmir, Punjab, Rajasthan, Uttarakhand, and Uttar Pradesh
- Eastern region: Bihar, Jharkhand, Odisha, Sikkim, and West Bengal

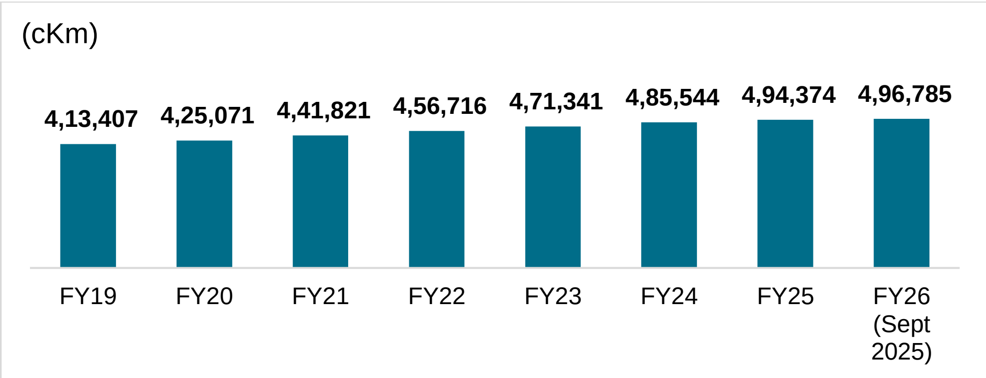
- Western region: Dadra and Nagar Haveli, Daman and Diu, Chhattisgarh, Goa, Gujarat, Madhya Pradesh, and Maharashtra
- Southern region: Andhra Pradesh, Karnataka, Kerala, Puducherry, and Tamil Nadu
- North-eastern region: Arunachal Pradesh, Assam, Manipur, Meghalaya, Mizoram, Nagaland, and Tripura

As peak demand for power does not take place at the same time in all states, it results in a surplus in one state and deficit in another. Regional or inter-state grids facilitate the transfer of power from a surplus region to the one facing a deficit. Additionally, they also facilitate the optimal scheduling of maintenance outages and better coordination between power plants.

5.1.1 Market Review

Robust generation capacity addition over the years and government's focus on 100% rural electrification through last mile connectivity has led to extensive expansion of the T&D system across the country. The total length of domestic transmission lines rose from 413,407 circuit kilometres (ckm) in fiscal 2019 to 496,785 ckm in fiscal 2026 (Upto September 2025).

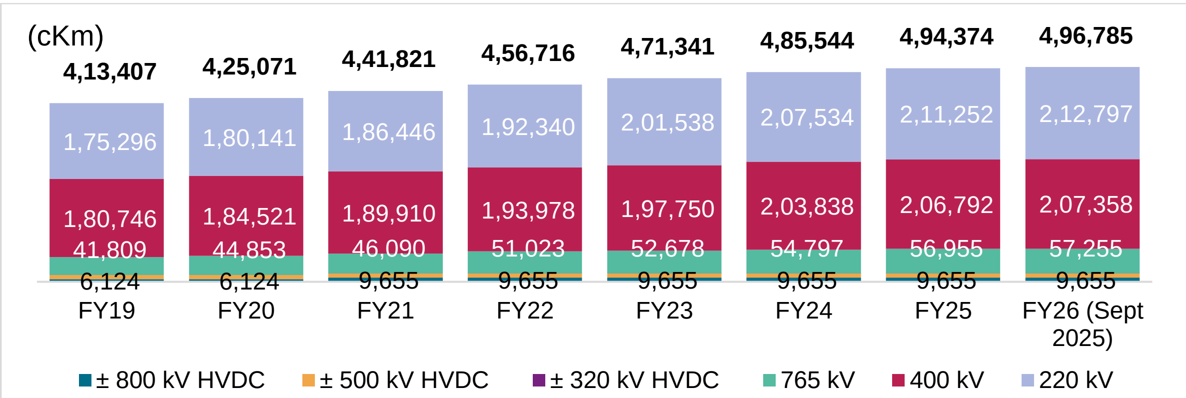
Total transmission line network in the country (220 kV and above)



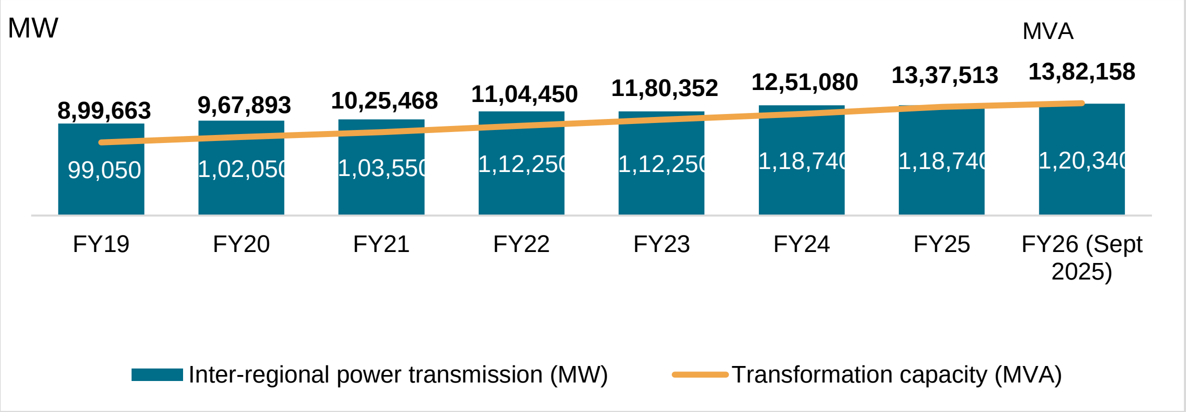
Source: CEA, Crisil Intelligence

There has been strong growth in the transmission system at higher voltage levels and substation capacities. This is a result of increased requirement of the transmission network to carry bulk power over longer distances and at the same time optimise the right of way, minimise losses and improve grid reliability.

Strong growth in the length of high voltage transmission lines (220 kV and above)



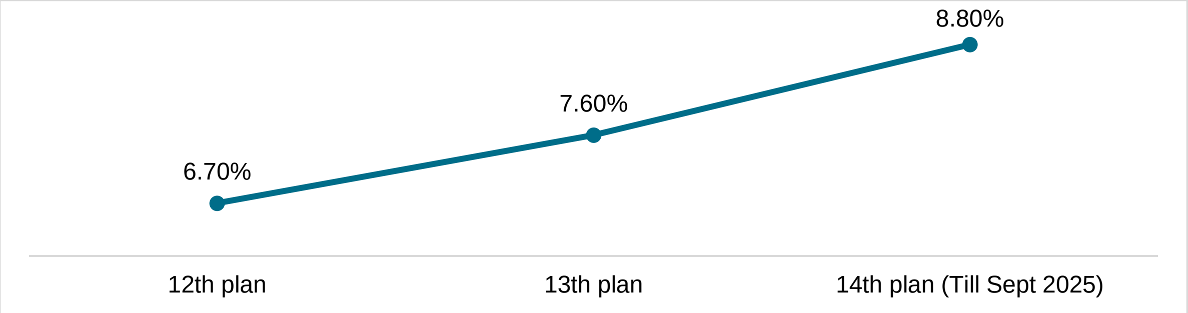
Source: CEA, Crisil Intelligence



Source: CEA, Crisil Intelligence

Investments in transmission line additions continue to be dominated by the central and state sectors, though private sector participation is growing, especially in inter-state projects. Some of the reasons for state and central dominance include historical dominance by them in transmission sector, power is a concurrent subject as per constitution, highly regulated sector, state specific priorities, government initiatives, regulatory and operational hurdles etc. In the past 6 years, a total of 105,815 ckm was set up in the country, with the central and state sectors contributing to 34% and 50%, respectively. Although private sector participation has been growing in the segment, its total contribution is only ~8.8% in September 2025. While private sector participation is growing, particularly through TBCB, the scale, complexity, and inherent risks mean that central and state entities may remain the drivers of India's transmission capacity expansion for some time.

Private sector participation in transmission sector

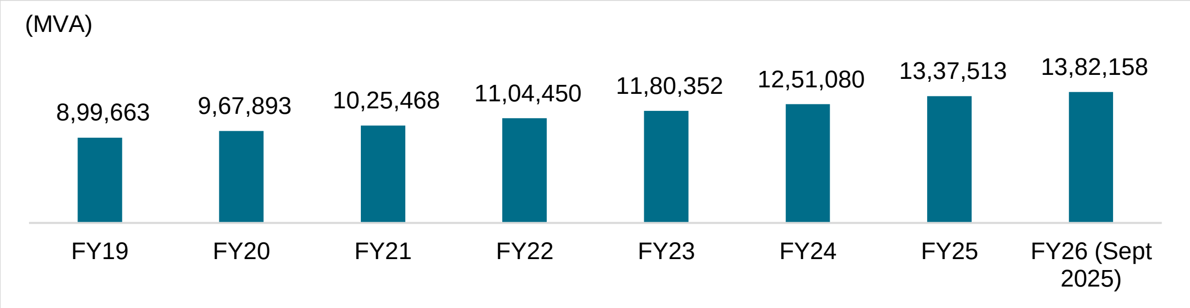


12th Plan: 2012-2017,13th Plan 2017-2022, 14th Plan: 2022-2027 Source: CEA, Crisil Intelligence

Although to encourage private-sector participation in building transmission capacity, the central government notified power-transmission schemes to be undertaken through TBCB, but still lower private player penetration in the transmission sector necessitates higher allotment of transmission lines to private players by the central transmission utilities.

Sub-station capacities in the country have grown from 899,663 MVA in fiscal 2019 to 1,382,158 MVA in September 2025, at a CAGR of 6.83%.

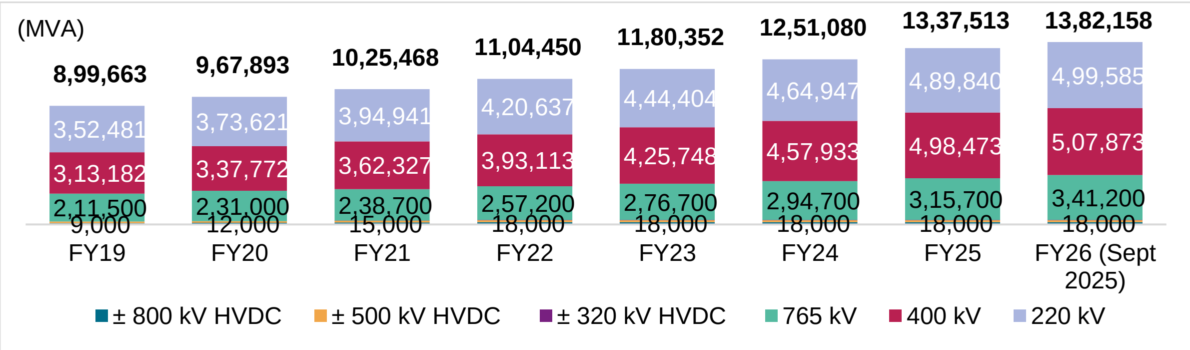
Total transformation capacity of Tx substations in the country



Source: CEA, Crisil Intelligence

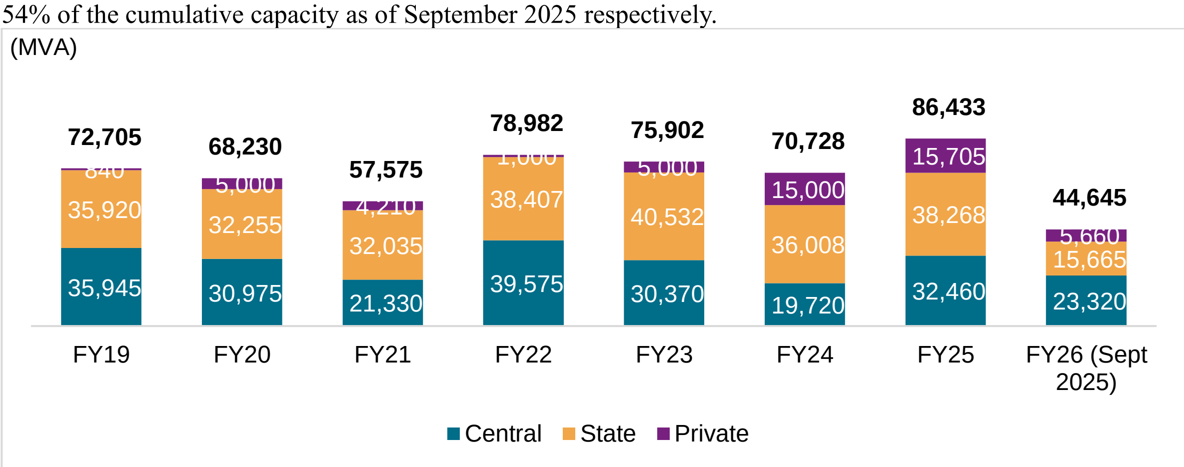
The growth in sub-station capacities have majorly seen traction in 220 kV, 400 kV and 765 kV segments, contributing to 30%, 40% and 27% of the incremental additions between fiscals 2019 and fiscal 2026.

Robust growth in high voltage sub-station transformation capacity (above 220 kV)



Source: CEA, Crisil Intelligence

Substation additions have been dominated by the central sector and state sector, contributing to 40% and 54% of the cumulative capacity as of September 2025 respectively.



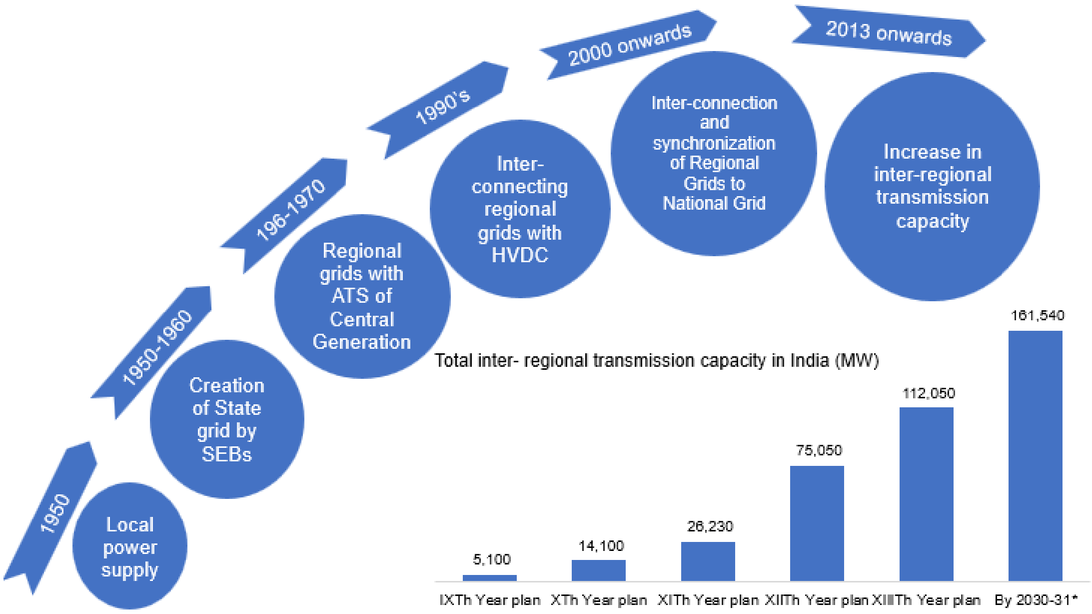
Source: CEA, Crisil Intelligence

5.1.2 Unification of regional grids into the national grid

To facilitate the transfer of power between neighbouring states, state grids are inter-connected through high-voltage transmission links to form a regional grid. There are five regional grids, namely, Northern, Western, Southern, Eastern and North-eastern regional grid. As peak demand for power does not take place at the same time in all states, it results in a surplus in one state and a deficit in another. Regional or inter-state grids facilitate the transfer of power from a surplus region to the one facing a deficit. Additionally, they also facilitate the optimal scheduling of maintenance outages and better coordination between power plants.

The Indian national grid has evolved over a period of past 60 years all the way from isolated state grids to regional grids and finally with the commissioning of 765 kV transmission line between Raichur and Solapur in December 2013 India achieved one nation one Grid status. Although the interregional transmission capacity is still low, unification of grid has helped in bridging the gap between load centers to the demand centers in India. The detailed evolution of the grid is as discussed in the section given below:

Integration and growth of transmission network in India



*Source: CEA, *CTUIL ISTS Interim Rolling plan 2030-31 Report; Crisil Intelligence*

To optimise the utilisation of generation capacity through the exchange of power between the surplus and deficit regions and exploit the uneven distribution of hydroelectric potential across various regions, the central government in 1981 approved a plan for setting up a national grid. The plan envisaged setting up high-voltage transmission links across various regions to enable the transfer of power from surplus to deficit regions. The advantages of a national grid system are:

- A flatter demand curve (or a higher system load factor) on account of the exchange of power among regions, resulting in a better PLF and more economical operations
- Lower investments required for new generation capacity
- Surplus power from one region being made available at economical costs to consumers in other regions.
- Better scheduling of planned outages of power plants; and
- Improved stability of the grid, as the share of an individual generating station in the total capacity declines with greater integration of the power system.

The process of setting up the national grid was initiated with the formation of the central sector power generating and transmission companies – National Thermal Power Corporation (NTPC), National Hydroelectric Power Corporation (NHPC) and PGCIL. PGCIL was given the responsibility for planning, constructing, operating, and maintaining all inter-regional links and taking care of the integrated operations of the national and regional grids.

Setting up a national grid requires the gradual strengthening and improvement of regional grids, and their progressive integration through extra high voltage (EHV) and HVDC transmission lines. Coordination among the states within a region and among the various regions is critical for the operation of the national grid. This would require an efficient and reliable communication system, comprising microwave links and dedicated data/voice transmission lines between the load dispatch centers and generating stations. In addition, synchronization of frequencies is required to integrate regional grids. In the case of a difference in frequencies, HVDC transmission would be effective in integrating the grids through an asynchronous link. Although some inter-regional links are operational, these do not have adequate capacity to transmit bulk power and are often loaded to capacity.

Integration of the regional grid networks into the national grid involves several institutional, technical, and commercial issues. Over the medium term, investments in the transmission sector are expected to focus on forming the national grid, by setting up inter-regional links and strengthening the regional and intra-state grids. Inter-regional power transmission capacity has increased from 14 GW in fiscal 2007 to 120.34 GW as of September 2025.

5.1.3 Plans to increase grid infrastructure

Report on "Transmission System for Integration of over 500 GW RE Capacity by 2030" published by CEA portrays the broad transmission system roadmap for reliable integration of 537 GW RE capacity by the year 2030. The length of the transmission lines and sub-station capacity planned under ISTS for integration of additional wind and solar capacity by 2030 has been estimated as 50,890 ckm and 433,575 MVA respectively at an estimated cost of Rs 244,200 crores. Further, with the additional inter-regional transmission corridors under implementation/planned, the cumulative inter-regional transmission capacity is likely to be about 150,000 MW in 2030.

CTUIL has also published its ISTS Interim Rolling plan 2030-31 which evaluates the transmission system needs till 2031.

Planned Transmission capacity additions by CEA till 2030

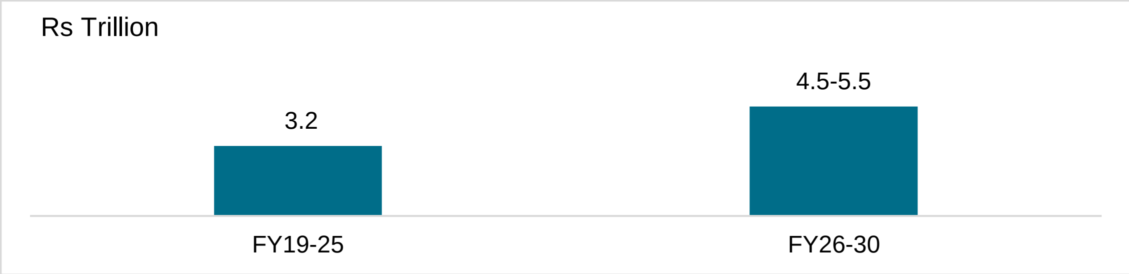
Transmission system type/ voltage class	Unit	Capacity additions till 2030
Transmission lines		
(a) ± 800 kV	ckm	6,200
(b) ± 350 kV	ckm	1,920
(c) 765 kV	ckm	25,960
(d) 400 kV	ckm	15,758
(e) 220 kV cable	ckm	1,052
Total transmission lines	**ckm**	**50,890**
Substations		
(a) ± 800 kV	MVA	20,000
(b) ± 350 kV	MVA	5,000
(c) 765 kV	MVA	274,500
(d) 400 kV	MVA	134,075
(e) 220 kV cable	MVA	0
Total substations	**MVA**	**433,575**

Source: CEA, Crisil Intelligence

5.2 Transmission investments of Rs 4.5-5.5 trillion expected over 2026-30

To service a large generation installed base, the estimated investment in the transmission sector is expected to cumulatively reach Rs 4.5-5.5 trillion over fiscals 2026-2030. Investments in the sector are expected to be driven by the need for a robust and reliable transmission system to support continued generation additions and the strong push to the renewable energy sector as well as rural electrification. Also, strong execution capability coupled with healthy financials of PGCIL will drive investments.

Outlook on transmission segment investments

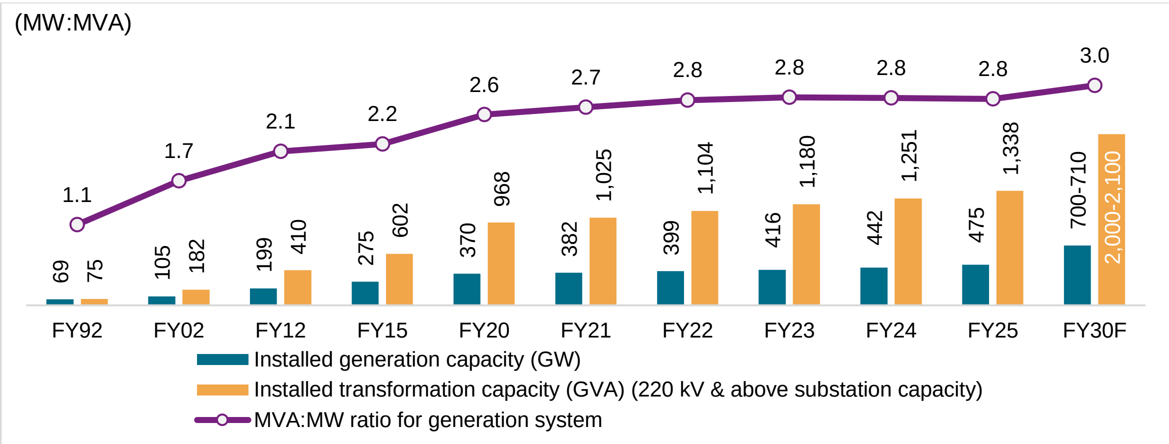


Source: CEA, Crisil Intelligence

5.2.1 Domestic investments in transmission and distribution to be led by intra-state augmentation

In order to ensure free and uninterrupted flow of power, every MW of new generation capacity needs a certain transformation capacity added to the system. In Indian context, 220 kV and above level transformation to generation addition ratio (MVA: MW) has remained low over the years. At the end of March 1985, this ratio was 1.1 times and has improved to 2.8 times as of March 2025. Lower transformation capacity results in line congestion, which has been visible particularly in inter-state transmission of power. With the government's focus on alleviating congestion, transmission capacities are expected to witness growth in transformation capacity additions during 13th Plan.

Transformation vs generation capacity



F: Forecasted; Source: CEA, Crisil Intelligence

Consequently, in the transmission line segment, robust growth in HV lines of 400kV and 765kV is expected due to its importance in inter-state transmission lines. Higher voltage level enhances power density, reduces losses, and efficiently delivers bulk power. Moreover, it reduces the requirement of right-of-way due to less land requirement, a key challenge facing the transmission sector. Thus, Crisil Intelligence believes the MVA:MW ratio would further improve to around 3.0 by March 2030.

5.2.2 Integration of renewable energy integration to further support domestic demand

The rapid addition of renewable capacities requires adequate grid infrastructure so as to evacuate incremental power. This has increasingly emerged as a concern, with developers lowering participation in bids where this has been a key issue. Specifically, for wind, majority of the best wind sites are concentrated in few states such as Rajasthan, Gujarat, Tamil Nadu, Andhra Pradesh, and Karnataka, which causes increased congestion in specific regions of these states.

However, nodal agencies (PGCIL, SECI) have planned various schemes to alleviate grid congestion and improve connectivity to RE projects. The grid capacity additions will come under two main schemes, namely the Green Energy Corridor Scheme and Renewable Energy Zones (REZ). This would add ~80 GW of transmission grid capacity to an existing ~24 GW, taking grid capacity planned for RE integration to ~100 GW.

The GEC scheme is aimed at developing specific evacuation corridors for renewable energy in key renewable rich states. The government has planned to integrate renewable energy into the national grid by setting up inter-state and intra-state schemes for evacuation of power from wind and solar projects, termed as green energy corridors. GEC target of ~9,700 ckm of intra-state transmission lines by December 2020 has overshot the timeline both due to operational reasons and covid related restrictions. The constructed lines stood at 8,697 ckm till November 2022, while the interstate transmission units with Phase I of the ISTS program were already completed by PGCIL in 2020. The next growth driver for ISTS projects is the Inter-State transmission system planned for evacuation and grid integration of 66.5 GW REZ spread across the states of Tamil Nadu, Andhra Pradesh, Karnataka, Gujarat, Maharashtra, Rajasthan, and Madhya Pradesh.

PGCIL has also come out with a scheme for setting up grid infrastructure in identified REZ. Under this, key areas with concentration of existing / planned renewable energy projects have been identified in the Western and Southern regions of the country. Out of this, 8 GW of grid capacity will be added for wind projects in the Western region and 9 GW in the Southern region.

5.2.3 Government plans to increase tariff based competitive bidding (TBCB) to shift focus from PGCIL

At present private sector participation in the T&D space is low. However, with the introduction of TBCB and viability gap funding (VGF) schemes for intra-state projects, the share of private sector players in the power transmission sector is expected to increase gradually over the long term. This is a move to shift the burden from PGCIL and increase private sector participation in the sector, although PGCIL is also allowed to bid for the same. Even for the renewable energy projects mentioned above, half are to be awarded via the TBCB route.

A few key players that bid on the recent project allocations were Sterlite Grid Ltd., Adani Transmission Ltd, Essel Infra Ltd, ReNew Transmission Ventures, PGCIL and Kalpataru Power Transmission Ltd. With increased awarding of projects under TBCB in the future, private participants shall also be key in driving domestic demand going forward. Out of the total projects awarded under TBCB, 67 projects have been commissioned/ready for commissioning and 87 projects are under construction.

5.2.4 Key Growth Drivers for growth in transmission sector

Some of the key growth drivers for the transmission segment in India are:

Widening gap between inter-regional power demand-supply to drive transmission capacity additions

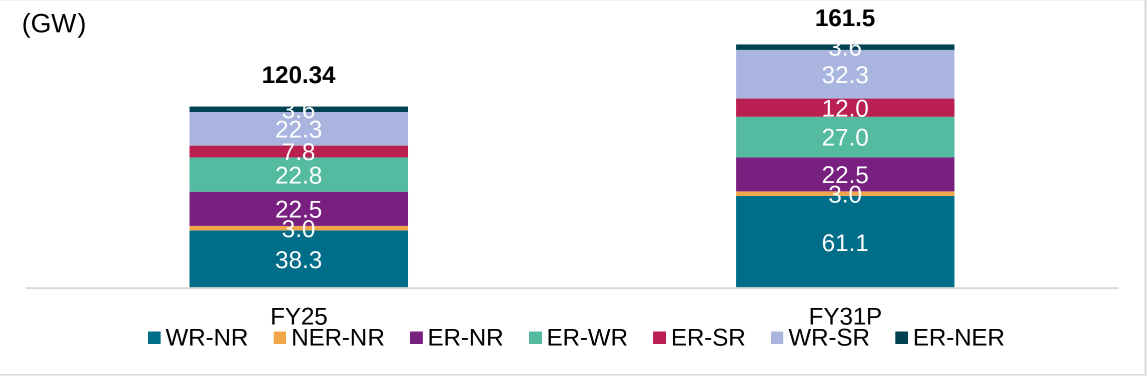
As per CTUIL, the total power generation capacity (including renewable energy and energy storage) at a pan India would rise to ~917 GW in fiscal 2031 from ~501 GW in September 2025. However, the upcoming generation capacity will not be spread evenly across India. Most of the upcoming renewable capacities would be concentrated in the northern (specifically in Rajasthan), western and southern regions of India, while significant thermal capacities would commission close to the coal mines in eastern and central regions of India. The addition of such large quantity of generation capacities would necessitate the investments in transmission segment to supply power to different demand centers.

Further, the infirm nature of renewable energy (extreme variations in the power output) would give rise to grid issues unless the generated power is distributed over longer distances and to multiple demand centers via transmission lines. Moreover, there exists significant variation in demand on account of seasonal differences and time of day demand differences, which will necessitate large inter-regional transmission capacities to prevent grid fluctuations.

As a result, to reduce the demand-supply mismatch, government has planned to increase the interregional power transfer capacity to 161,540 MW by FY 2031. Moreover, the share of inter-regional transmission capacity is expected to increase from 13.9% in fiscal 2012 to 17.6% in fiscal 2031 (inter-regional transmission capacity as a fraction of total installed generation capacity), resulting in growth of investment in the power transmission sector.

The inter-regional transmission line corridor expansion requirement, as per CEA estimates, would be as follows:

Inter-regional transmission links and capacity (GW)



P: Projected

Source: CEA, CTUIL ISTS Interim Rolling plan 2030-31 Report; Crisil Intelligence

As per CTUIL, ISTS Interim Rolling plan 2030-31, the total inter-regional transmission capacity addition during the fiscal 2025-2031 period to be ~41,200 MW. However, interregional demand and supply gaps remain. While the western and eastern regions generate in excess of their corresponding regional demand, the northern and southern region fall short in terms of actual power generation, although the generation capacity of the southern region exceeds demand. This necessitates strong inter-regional capacities to suffice the energy gaps and reduce energy as well as peak deficit.

To cater to the above import/export requirement, several inter-regional transmission corridors have been planned and some of these high-capacity transmission corridors are in various stages of implementation, taking care of past under investments in grid. The table given below depicts the projections as per Report on ISTS Rolling plan 2030-31 by CTUIL.

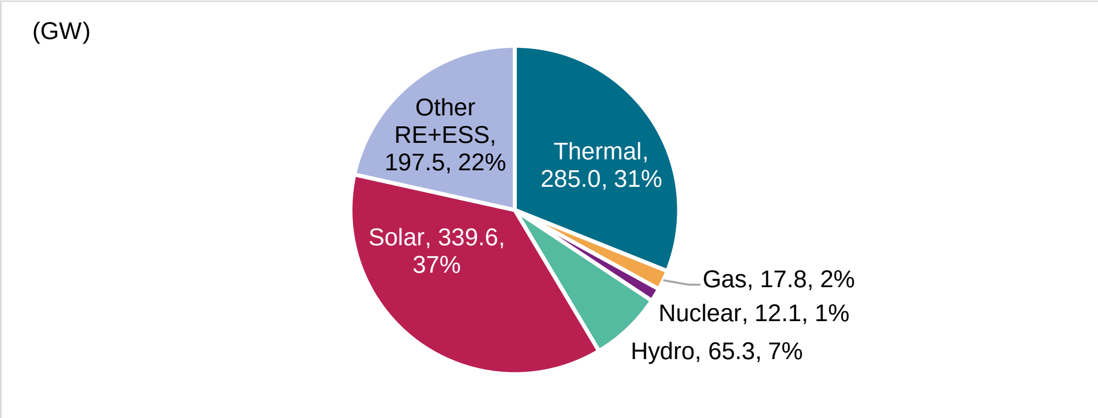
Despite healthy inter-regional transmission additions, on account of seasonal differences and time of day demand differences large inter-regional transmission capacities would be required to prevent grid fluctuations.

As per the CTUIL ISTS Interim Rolling plan 2030-31, different regions have different surplus deficit scenarios during different seasons.

Strong renewable energy capacity additions to also drive transmission capacity

Power generation in India is dominated by coal-based power plants accounting for about 3/4th of total electricity generation. However, there has been a staggering growth in installed capacity of renewable energy sources from 63 GW in fiscal 2012 to 247 GW in September 2025. According to the CTUIL ISTS Interim Rolling plan 2030-31, the share of renewable energy (incl. hydro and energy storage) in the installed capacity mix is expected to reach ~66% in fiscal 2031 from ~49% in September 2025.

Expected installed capacity base in fiscal 2031 as per ISTS rolling plan report



RES: Renewable energy source, ESS: Energy Storage system
Source: CEA, CTUIL ISTS Interim Rolling plan 2030-31 Report; Crisil Intelligence

Such multi fold expansion plans also require large scale development in transmission sector. This is mainly because large scale grid connected solar and wind plants are usually located in the far-flung areas, where there is limited existing transmission infrastructure. Moreover, renewable energy is not well distributed across states and is in-firm in nature. Robust transmission planning is required to optimize the high costs; utilization levels and losses associated with transmission system to transmit the power generated to load centers is critical.

For enabling growth of RE capacity, areas which have high solar and wind energy potential, needs to be connected to ISTS, so that the power generated could be evacuated to the load centres. As the gestation period of wind and solar based electricity generation projects is much less than the gestation period of transmission system, it needs to be planned. CEA in December 2022 issued a Report titled “Transmission System for Integration of over 500 GW RE Capacity by 2030”. In the said Report, transmission system was planned for about 537 GW of RE capacity. The length of the transmission lines and sub-station capacity planned under ISTS for integration of additional wind and solar capacity by 2030 has been estimated as 50,890 ckm and 4,33,575 MVA respectively at an estimated cost of Rs 2.44 trillion.

Subsequently, CEA in October 2024 launched National Electricity Plan (Volume II – Transmission) and provided transmission system planning till 2032. Based on the planned generation capacity addition and projected electricity demand, 1,14,687 ckm of transmission lines and 7,76,330 MVA of transformation capacity (220 kV and above voltage levels) are planned to be added during the period 2022-27. In addition, 1,000 MW of HVDC bi-pole capacity is also planned to be added during 2022-27. Considering the planned generation capacity addition and projected electricity demand, about 76,787 ckm of transmission lines and 4,97,855 MVA of transformation capacity in the substations (220 kV and above voltage level) are planned to be added during the period 2027-32. In addition, 32,250 MW of HVDC bi-pole capacity is also planned to be added during 2027-32.

Transmission lines and sub-station capacity addition by 2031-32

Transmission System Type / Voltage Class	Unit	At the end of 2021-22 (31.03.2022)	Likely addition during 2022-27	Likely addition during 2027-32	Likely at the end of 2031-32 (31.03.2032)
Transmission lines					
(a) HVDC (± 320 kV/ 500 kV/800 kV Bipole)	ckm	19,375	80	15,432	34,887

Upgradation of existing lines critical to meet rising power demand in an economical way

India has ~4.97 lakh ckm of transmission network as on September 2025 of which most of the lines are using the Aluminium core steel reinforced (ACSR) conductor. This type of conductor is having lower current carrying capacity and lower withstand temperature (85 ºC) capacity as compared to other latest available technology and substitutes such as ACCC (Aluminium Conductor Composite Core), CCC (Copper clad composite conductors) which are High tension low sag conductors (HTLS). Further these lines have lower efficiency and higher T&D losses. As per World Bank sturdy T&D losses costs the Indian economy ~1%-1.5% of its GDP, hence CEA in its recent revisions of the National transmission planning has embodied the new technological advancements.

Improving power scenario and measures to stabilize grid to lead to transmission corridors to neighboring countries

Power deficit in India has been on a declining trajectory with energy deficit shrinking to 0.0% for the period April to October 2025 as compared 3.6% in fiscal 2015. Thus, with healthy availability of power, India is evaluating opportunities to tap neighbouring countries for better integration and synergies.

India and its neighboring countries are interlinking the electricity transmission systems allowing surplus power to be exported to other grid while simultaneously importing large hydro based power from Nepal and Bhutan. Further, India is evaluating to build a platform to establish power exchange beyond its shores, which will act as a neutral and robust price discovery platform to create an orderly marketplace for all buyers and sellers for neighbouring Asian countries.

In order to ensure effective utilisation of regional resources, India is actively planning to inter-connect the national grid with neighbouring countries like Nepal, Bhutan, Sri Lanka, and Bangladesh. Nepal is radially connected with India through 11, 33 and 132 kV lines. India and Bhutan have transmission lines of 400, 220 and 132 kV to import power. Further, for transfer of power from upcoming hydroelectric projects in Bhutan, India is implementing two cross-border inter-connection lines of 400 kV each. Between India and Bangladesh, 400 kV DC line connecting Baharampur (India) to Bheramara (Bangladesh) and 765 kV DC line connecting Katihar (India) to Parbotipur (Bangladesh) along with 500 MW HVDC back-to-back terminal at Parbotipur are planned. A feasibility study has been carried out for two 500 MW bi-pole lines between Madurai (India) and New Anuradhapura (Sri Lanka) including submarine cable for the sea portion. Implementation of these transmission projects is expected to support investments in T&D segments.

India is linked to its neighboring countries through a network of electrical interconnections, with a total power transfer capacity of approximately 4,230 MW.

Strong government support to also drive transmission investments

Government support to power transmission is expected to continue. In the past, it has supported the transmission segment through several measures – increasing the concession period of a transmission asset, relaxation of norms to speed up project construction and implementation of UDAY scheme to boost power demand, which in turn, will eventually result in rise in transmission requirements.

CERC in its statutory advice under Section 79(2) of the Act to MoP dated 13th January 2010, had suggested to modify the Standard Bid Document (SBD) to consider tariff period up to 35 years for all competitively bid transmission lines. CERC had suggested to incorporate following:

- The bidder should be asked to quote bid for a period of 35 years starting from the date of commissioning
- The evaluation of Bids should take into account bids submitted for a period up to 35 years
- In case the Commission extends license beyond the initial period of 25 years, the selected bidder would be entitled to recover the tariff according to the bids submitted by him.
- The selected bidder should be obligated for extension of its license 2 years before the expiry of initial 25 years

While the transmission licenses are issued for a period of 25 years, CERC has made the provision for extending the concession period by another 10 years if the transmission service provider is willing to extend it. The Commission accepted that extending the life of the asset will provide regulatory certainty to all the bidders so that line charges could be better priced as the recovery period of investment is extended from 25 years to 35 years.

5.3 Regulatory overview

Power transmission regulations in India are governed by various regulatory bodies and frameworks that ensure the efficient and reliable transmission of electricity across the country. The key regulatory and legislative aspects related to power transmission in India include:

- **Electricity Act, 2003:** The Electricity Act, 2003, is the primary legislation governing the power sector in India. It provides the legal framework for generation, transmission, distribution, and trading of electricity.

- **Appellate Tribunal for Electricity (APTEL):** The APTEL is the appellate body to hear appeals against the orders of the adjudicating officer or the Central and State Electricity Regulatory Commissions under the Electricity Act, 2003.

- **Central Electricity Regulatory Commission (CERC):** The CERC is the central regulatory authority in India responsible for regulating the power sector, including transmission. It sets tariffs, regulates inter-state electricity transmission, and ensures fair competition in the sector. CERC also oversees the development of the National Grid and interstate transmission.

- **State Electricity Regulatory Commissions (SERCs):** Each Indian state has its own State Electricity Regulatory Commission, which is responsible for regulating power generation, distribution, and transmission within the state. These commissions set tariffs for intrastate transmission and ensure compliance with relevant regulations.

- **CTU (Central Transmission Utility):** CTU is a central-level organization responsible for operating and managing the national or inter-state transmission system. Central Transmission Utility of India Ltd. (CTUIL) operates as the CTU in India

- **Grid Controller of India Limited (GRID-INDIA):** The new name of Power System Operation Corporation Limited (POSOCO) is Grid Controller of India Limited (Grid-India) since 09th November 2022. It is responsible to monitor and ensure round the clock integrated operation of Indian Power System. It consists of 5 Regional Load Despatch Centres (RLDCs) and the National Load Despatch Centre (NLDC).

- **PGCIL (Power Grid Corporation of India Limited):** PGCIL is a Maharatna public sector undertaking in India. It is responsible for the planning, development, and maintenance of the country's high-voltage transmission systems.

- **STU (State Transmission Utility):** STUs are state-level organizations responsible for the planning, development, maintenance, and operation of intra-state transmission systems. They ensure the efficient and reliable transmission of electricity within their respective states.

- **SLDC (State Load Despatch Centre):** It is the nerve centre for State Power System operating. Principal activities include operating the State power system in the most economical way by economic load despatching, and merit order operation.

- **Tariff Regulations:** CERC and SERCs regularly review and set tariffs for transmission services, which include charges for using the transmission network. These tariffs are based on various factors, including capital costs, operational expenses, and return on equity for transmission companies.

- **Open Access Regulations:** The Electricity Act, 2003, promotes open access in the transmission system, allowing consumers to choose their source of power supply and utilize the transmission network efficiently. Regulations related to open access vary by state.

- **Grid Standards:** The Central Electricity Authority (CEA) is responsible for setting and enforcing grid standards and codes to ensure the reliability and safety of the power transmission network.

- **Cross-Border Transmission:** India also has cross-border electricity transmission interconnections with neighbouring countries like Nepal, Bhutan, and Bangladesh. These interconnections are governed by bilateral agreements and specific regulatory frameworks.

5.4 Evolution of Tariff Based Competitive Bidding and PoC mechanism in the transmission segment

Being a critical link in the power sector value chain, the transmission sector needed more attention to cater to the growing power demand and the increasing generation capacity. Investments in the form of budgetary allocations, internal accruals and PSU borrowings were unable to fund this growing need. Keeping this in mind, the Electricity Act permitted private sector participation through the tariff based competitive bidding or TBCB route in the power transmission sector. Guidelines for the TBCB process were laid down in the National Tariff Policy, 2006; The National Tariff Policy, released in January 2006, introduced the guidelines for tariff-based competitive bidding (TBCB) for all transmission projects, promoted competition in the construction of the transmission infrastructure, encouraged greater investment by private business in the sector and increased transparency. India is one of the few countries which has opened up its transmission sector for private participation and has garnered significant interest from private business. In May 2018, the government proposed amendments to the national tariff policy 2006, which aims to improve power supply, provide clarity to competitively bid projects, reduce cost burden on consumers and boost renewable energy segment.

Under the TBCB, tariff for projects is not on a cost-plus basis and bidders are required to quote tariff for a period of 35 years for establishing transmission lines. The bidder quoting the lowest levelised tariff is selected. The successful bidder is then required to acquire a special purpose vehicle or SPV incorporated by the bid process coordinator or BPC. Once the process of acquisition is complete, the SPV approaches CERC to obtain a transmission license.

5.4.1 An Overview of the bidding mechanism

For procurement of transmission services as per the CERC guidelines, the BPC is required to prepare the bid documents, i.e., the RFQ and RFP, as per the guidelines of the standard bidding document. At present, RECTPCL (Rural Electricity Corporation Transmission Projects Company Ltd, a 100% subsidiary of REC) and PFCCL (Power Finance Corporation Consulting Ltd, a 100% subsidiary of PFC) are the BPCs for transmission projects. The bidding shall necessarily be by way of International Competitive Bidding (ICB).

Key entities and their role in inter-state TBCB

Entity	Role
Empowered Committee	The committee comprises of members from CERC, CEA, MoP, CTU and other power sector experts and is responsible for identifying the interstate transmission projects to be bid through competitive bidding; ECT was dissolved in 2019 after re-constitution of NCT.
National Committee on Transmission	Responsible for evaluation of the functioning of the National grid, to evaluate the assessments of CTU and to make Perspective plans for 10-15 years' time horizon; approve ISTS projects costing between Rs.100 crore and Rs.500 crore; for projects above Rs 500 crore cost, NCT has to refer them to MoP for approval
Bid process coordinators	Responsible for conducting the bid process successfully, forming SPVs for identified projects and transfer of SPVs to the bid owners
Power grid	Engaged mainly in transmission of bulk power across different states of India, it can also participate in competitive bidding process. Further, PGCIL also takes up projects awarded to it on nomination basis
CTUIL	Central Transmission Utility, entrusted with the responsibility for providing connectivity, long-term and medium-term access open access for interstate transmission of power; Commercial functions associated with Billing, Collection and Disbursement of ISTS charges. Nodal Agency for administration of Transmission Service Agreement (TSA) for TBCB projects
Private Players	Participates in the competitive bidding process for inter-state transmission projects

Source: CERC regulations, Crisil Intelligence

The **standard bidding document** to be provided in the RFQ includes:

- Details of the project, including location and technical specifications
- Construction milestones to be specified by the bidders
- Financial requirements to be met by bidders, including minimum net worth and revenue, with necessary proof of the same, as outlined in the bid documents.
- Details of model transmission service agreement, which shall include
    - Description of interstate transmission system (ISTS)
    - Description regarding sharing of transmission charges, other charges, and transmission losses; and
    - Procedure for metering and accounting
    - Billing, collection and disbursement of transmission charges
    - Force majeure clauses as per industry standards
    - Default conditions and cure thereof, and penalties.
- Other technical, operational and safety criteria to be met by bidder/TSP, including the provisions of the IEGC/State Grid Code and relevant orders of the Appropriate Commission
- Bid evaluation methodology to be adopted by the BPC
- Demonstration of financial commitments from lenders at the time of submission of the bids

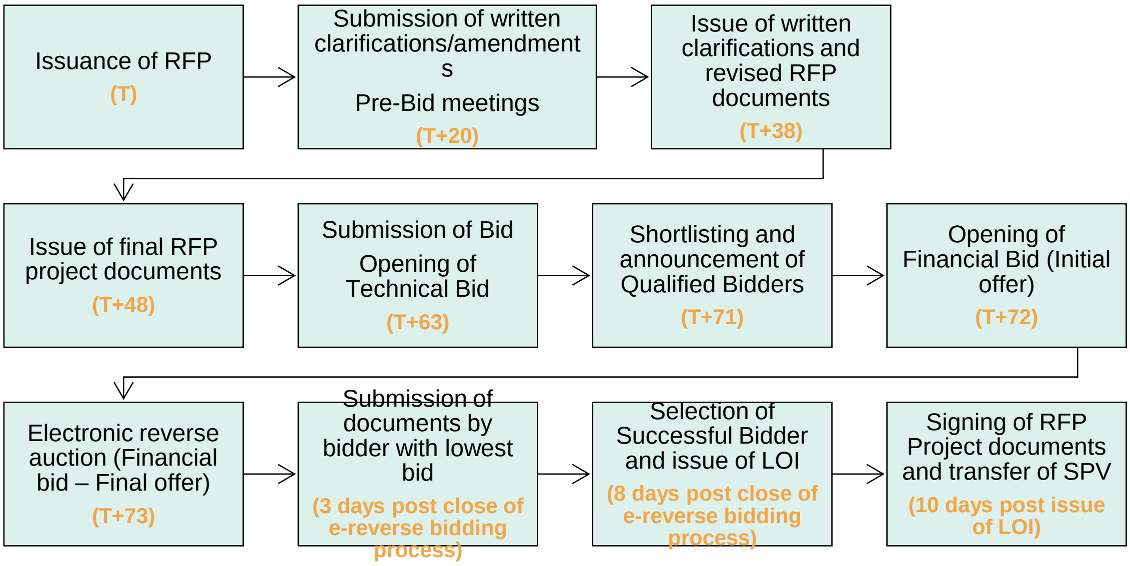
The Technical Bid submitted by the Bidder initially gets scrutinized to establish “Responsiveness.” After that, the Technical Bid gets checked for compliance with the submission requirements. The Bids which are found Qualified by the BPC get opened and Quoted Transmission Charges of such Initial Offer is ranked on the basis of the ascending Initial Offer submitted by each Qualified Bidder. Based on such ranking of the Qualified Bidders, in the first fifty per cent of the ranking (with any fraction rounded off to higher integer) or four Qualified Bidders, whichever is higher, qualify for participating in the electronic reverse auction. The Bidder with the prevailing lowest Quoted Transmission Charges discovered from Final Offers at the close of the scheduled or extended period of e-reverse bidding is declared as the Successful Bidder. The Letter of Intent is then issued to such Successful Bidder.

After selection, the bidder is required to acquire the project SPV from the BPC and make an application for grant of transmission license to CERC. The successful bidder is designated as the transmission service provider or TSP. The TSP commissions the line as per the schedule specified in the Transmission Service Agreement or TSA with the long-term service customers, the effective date for start of project development being the date of acquisition of SPV by the TSP.

Further as per the MoP's order on "policy for incentivizing early commissioning of Transmission projects" dated 15th July 2015, the TSP which commissions the project before scheduled commissioning date is entitled to get revenues (entitlement of transmission charges) and incentives from the actual date of commissioning.

In August 2021, Revised Guidelines and Standard Bidding Documents for procurement of Inter-State Transmission Services through TBCB process have been released which indicate the following timeline.

Timelines in TBCB bidding process



Source: Bidding Documents; Crisil Intelligence

5.4.2 Point of Connection (PoC) mechanism

In 2011, the CERC introduced the 'Point of Connection' (PoC) method for determining inter-state transmission charges. The PoC methodology was introduced to meet the requirements of an integrated grid with rapidly increasing inter-regional transmission of power. It replaced the regional postage stamp method, which was more suited to simple power flows restricted to a small geographical area or electric network. With the new system, the regulator also aims to promote an efficient transmission pricing regime that is sensitive to distance, direction, and quantum of power flow – factors which were not addressed by the postage stamp method.

In the PoC method, the transmission charges to be recovered from the entire system have been allocated between users based on their location in the grid. The inter-state grid has been divided into generation and withdrawal (demand) zones, and prices for each zone are determined by an algorithm based on the load profile of the zone. Separate transmission charges are attributable to both generators and distribution companies as they are both deemed to be beneficiaries of the transmission network. However, in almost all cases, transmission charges attributed to the generator are recovered from the discoms.

The transmission grid is divided into injection and withdrawal nodes and for the sake of simplicity, various nodes of a contiguous region have been further aggregated into zones. The charges for each node are determined by an algorithm. The algorithm is based on load flow analysis of the entire transmission network and how a change in injection or withdrawal of 1 MW of power at each node affects the network. Thus, it captures the network utilisation of each zone. The algorithm also considers the electrical distance and direction of power flows for each node in the system.

The total PoC charges to be paid for a transaction between two locations is the sum of the PoC charges and losses of a generator zone and injection zone.

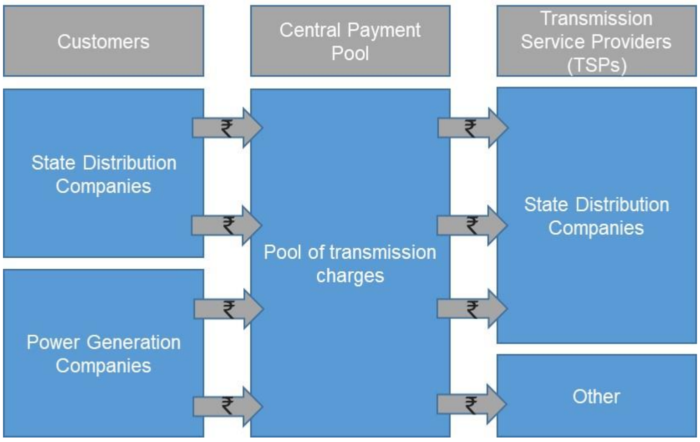
5.4.2.1 PoC regime more centrally controlled

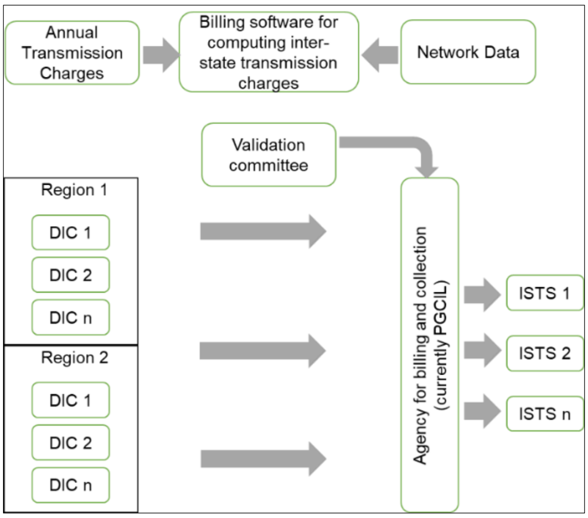
Also, earlier, each transmission licensee would sign a Bulk Power Transmission Agreement (BPTA) for each transmission asset with multiple discoms. As a result, the licensee would be responsible for recovering his annual transmission charges (ATC) from multiple discoms across regions, resulting in high transaction complexity.

However, with the PoC mechanism, BPTAs will no longer be signed for individual transmission assets; instead, a universal TSA and revenue sharing agreement (RSA) is in place and all beneficiaries including ISTS Licensees, Deemed ISTS Licensees, other non-ISTS Licensees whose assets have been certified as being used for interstate transmission by the RPCs will be default signatories to the TSA and RSA approved by CERC. Post the commissioning of transmission line RSA determines the terms and conditions for billing, collection, and disbursement procedure for the ISTS licenses and DICs while TSA determines the terms and conditions for revenue accrual and other operation related parameters.

Under the PoC mechanism, the CTUIL acts as the revenue aggregator and collects payments from all the DICs based on the inputs received related to utilization of the transmission network. The CTUIL is responsible for billing and collecting these charges from the various users and disbursing them to transmission licensees. The CTUIL is responsible for billing and collection of these charges from the various users and disbursing them to the transmission licensees. The CTUIL functions as a single point of contact between transmission licensees and the users.

Procedure for payment pooling mechanism





Source: CERC; Crisil Intelligence

5.4.3 General Network Access (GNA) Regulations 2022

CERC GNA Regulations, 2022 are a set of regulations that govern the grant of GNA to the ISTS in India. These Regulations allow generators to connect to and evacuate power through the inter-state transmission system without specifying where the power will be delivered. This is a significant shift in how transmission systems are planned, as it allows for more flexibility and non-discriminatory access.

The earlier open access system for the ISTS required generators to identify a consumer before they could be granted open access. This meant that generators had to know where they were going to sell their power before they could connect to the ISTS.

Under GNA, generators do not have to identify a consumer before they can be granted open access. This gives generators more flexibility, as they can connect to the ISTS and then sell their power to any buyer. However, there are some restrictions on GNA. For example, at the time of application, generators must indicate their preferred point of connection with the ISTS and the maximum amount of power they plan to interchange with the ISTS.

CERC in April 2023 amended the GNA Regulations and added general network access-renewable energy (GNA_{RE}) as the open access to the interstate transmission system granted under these regulations for drawal of power exclusively from the renewable sources. Further, the said amendment also temporary general network access-renewable energy ($T\text{-}GNA_{RE}$) as the T-GNA open access to the ISTS granted under these regulations for drawal of power exclusively from the renewable sources. CERC further amended the GNA Regulations in June 2024 which allowed Indian electricity trading licensees to participate in cross-border trade and specified the implementation process for the Cross Border Transmission Link (CBTL), including cost-sharing mechanisms and governmental approvals. Third amendment issued by the CERC in September 2025 addressed several areas, including eligibility, bank guarantees, shareholding patterns, post-connectivity utilization, and ESS connectivity. A notable change is the division of GNA between solar and non-solar hours for all renewable energy (RE)-based projects.

It is expected that these amendments will benefit the power generator and consumer, who now are dealing with challenges of transmission. GNA would fundamentally change the way transmission system planning is done by giving power sector constituents easier access to the transmission network across the country.

5.4.4 Project awarding under TBCB has increased in the last few fiscals

Between 2010-11 and 2014-15, the pace of award of project was slow with only Rs. 180-190 billion (~USD 2.48-2.62 billion) of projects being awarded. However, the pace of award of project has significantly increased. In fact, in 2015-16, projects aggregating to ~Rs. 260 billion (~USD 3.58 billion) were awarded. Awarding of projects through TBCB picked up from fiscal 2017 onwards. In fact, between fiscals 2017 and 2020, projects worth ~312 billion have been awarded by BPCs (REC, PFC). This is sharp contrast with the tenure from fiscals 2011 to 2016 where cumulatively ~400 billion of transmission projects were awarded by the BPCs. Presently, 67 projects, awarded under the TBCB route have been commissioned.

List of recent transmission projects completed under the TBCB route till October 2025

Sr.	Name of the Transmission line	Executing agency	Cost	Scheduled COD	Actual COD
1.	Transmission system associated with LTA applications from Rajasthan SEZ Part-A	PGCIL	872	May-21	May-21
2.	New WR- NR 765 kV Inter-Regional corridor	PGCIL	916	Dec-21	Jul-21
3.	Transmission System for Ultra Mega Solar Park in Fatehgarh, Distt. Jaisalmer Rajasthan (SPV:Fatehgarh-Bhadla Transmission Ltd)	Adani	575	Sep-19	Jul-21
4.	Transmission system associated with LTA applications from Rajasthan SEZ Part-B (SPV:Fatehgarh-II Transco Limited)	PGCIL	1186	Aug-21	Aug-21
5.	Transmission System Associated with LTA applications from Rajasthan SEZ Part-D (SPV: Bikaner-Khetri Transmission Limited)	Adani	1631	Aug-21	Sep-21
6.	Eastern Region Strengthening Scheme-XXI	PGCIL	1090	Aug-21	Oct-21
7.	Transmission system associated with LTA applications from Rajasthan SEZ Part-C	PGCIL	1448	Aug-21	Oct-21
8.	Connectivity system for Khargone TPP (2x660 MW)	Sterlite	2136	Jul-19	Dec-21
9.	Eastern Region Strengthening Scheme-XVIII	PGCIL	3994	Dec-20	Aug-22
10.	(WRSS – 21) Part – A – Trasnsmission System Strengthening for Relieving Over Loadings Observed in Gujarat Intra-State System Due to Reinjections in Bhuj PS	Adani	1090	Aug-21	Oct-22
11.	Transmission System for Transmission System Associated with RE Generations at Bhuj-II, Dwarka & Lakadia	Adani	1053	Feb-22	Oct-22
12.	Transmission System for Jam Khambaliya Pooling Station and Interconnection of Jam Khambaliya Pooling Station for Providing Connectivity to RE Projects (1500 MW)	Adani	394	Nov-21	Nov-22
13.	Transmission System for providing connectivity to RE Projects at Bhuj-II (2000 MW) in Gujarat	PGCIL	1409	Aug-21	Nov-22
14.	WRSS – 21 Part – B – Transmission System Strengthening for Relieving Over Loadings Observed in Gujarat Intra-State System Due to REinjections in Bhuj PS	Sterlite	2003	Aug-21	Jan-23
15.	Transmission system associated with LTA applications from Rajasthan SEZ Part-F, Phase-II	PGCIL	3508	Dec-22	Jun-23
16.	Development of Additional Inter regional AC link for import into Southern region i.e WaroraWarangal	Adani	4805	Nov-19	Sep-23

Sr.	Name of the Transmission line	Executing agency	Cost	Scheduled COD	Actual COD
	and Chilakaluripeta – Hyderabad – Kurnool 765 kV link				
17.	Transmission System for Karur Pooling Station (at a location in between Karur Wind zone and Tiruppur wind zone) along with LILO of both circuits of Pugalur – Pugalur (HVDC) 400 kV D/C line (with Quad Moose ACSR Conductor) at Karur PS	Adani	216	Jul-23	Oct-23
18.	Transmission system strengthening scheme for evacuation of power from solar energy zones in Rajasthan (8.1 GW) under phase-II- Part A SPV Name: Ramgarh Transmission Limited (CKM-188, MVA-2000)	PGCIL	425	Sep-22	Dec-23
19.	Evacuation of power from RE sources in Koppal Wind Energy Zone (Karnataka) (2500MW) (CKM-276, MVA-2500)	Renew	697	Jun-23	Jan-24
20.	Transmission scheme for evacuation of 3GW RE injection at Khavda P.S. under Phase-I (CKM-218, MVA-4500)	Adani	1185	Jan-24	Feb-24
21.	Transmission system for evacuation of power from Neemuch Solar Park (1000 MW): SPV Name: Neemuch Transmission Limited (NTL) (CKM-470, MVA-1000)	PGCIL	1482	Feb-24	Mar-24
22.	Transmission System for evacuation of power from RE projects in Rajgarh (2500 MW) SEZ in Madhya Pradesh (CKM-288, MVA-1500)	GR Infra	464	Nov-23	Mar-24
23.	Transmission System for evacuation of power from RE Projects in Osmanabad area (1 GW) in Maharashtra (CKM-68, MVA-1000)	IndiGrid	200	Jun-23	Mar-24
24.	Transmission system strengthening scheme for evacuation of power from solar energy zones in Rajasthan (8.1 GW) under phase-II- Part B SPV Name: POWERGRID Bhadla Transmission Ltd. (CKM-405)	PGCIL	1106	Dec-22	Aug-24
25.	Transmission Scheme for Solar Energy Zone in Gadag (1000 MW), Karnataka – Part-A, Phase-I (CKM-93, MVA-1000) (SPV: Gadag Transmission	Renew	365	Sep-23	Sep-24
26.	Western Region Strengthening Scheme-XIX (WRSSXIX) and North Eastern Region Strengthening Scheme-IX (NERSS-IX) (CKM-357, MVA-1000)	Sterlite	1223	Dec-23	Sep-24
27.	Transmission system strengthening scheme for evacuation of power from solar energy zones in Rajasthan (8.1 GW) under phase-II- Part D SPV Name: POWERGRID Aligarh Sikar Transmission Ltd. (CKM-528)	PGCIL	1516	Dec-22	Oct-24
28.	Establishment of new 220/132kV substation at Nangalbibra (CKM-282, MVA-320)	Sterlite	604	Dec-23	Oct-24

Sr.	Name of the Transmission line	Executing agency	Cost	Scheduled COD	Actual COD
29.	Transmission system strengthening scheme for evacuation of power from solar energy zones in Rajasthan (8.1 GW) under phase-II- Part C SPV Name: POWERGRID Sikar Transmisison Ltd. (CKM-899, MVA-3000)	PGCIL	2182	Dec-22	Dec-24
30.	WRES-XXVIII & WRES-XXIX SPV Name: POWERGRID Dharamjaigarh Transmission Ltd (MVA-2500)	PGCIL	308	Mar-25	Jan-25
31.	WRES-XXVII SPV Name: POWERGRID Raipur Pool Dhamtari Transmission Limited (CKM-225)	PGCIL	260	Sep-24	Mar-25
32.	Transmission scheme for evacuation of 4.5 GW RE injection at Khavda P.S. under Phase-II – Part A (CKM-355, MVA-6000)	Adani	1300	Mar-25	Mar-25
33.	Transmission scheme for injection beyond 3 GW RE power at Khavda PS1 (KPS1) (earlier Megha	Adani	1102	Feb-25	Apr-25
34.	System Strengthening Scheme for Eastern and North Eastern Regions (SPV Name: POWERGRID ER NER Transmission Limited) (CKM-139, MVA-1000) (ERSS-XXV & NERSS-XV)	PGCIL	250	Oct-25	Jun-25
35.	Inter-regional ER-WR Interconnection SPV Name: ERWR Power TRANSMISSION Ltd (CKM-136)	PGCIL	293	Mar-25	Jun-25
36.	Transmission Network Expansion in Gujarat associated with integration of RE projects from Khavda potential RE zone (SPV: POWERGRID KHAVDA RE TRANSMISSION SYSTEM LIMITED) (CKM-267)	PGCIL	953	Mar-25	Jul-25
37.	Establishment of Khavda Pooling Station-3 (KPS3) in Khavda RE Park (SPV Name: POWERGRID KPS3 TRANSMISSION LIMITED) (CKM-30, MVA-4500)	PGCIL	665	Dec-24	Aug-25

Source: CEA, Crisil Intelligence

Additionally, 91 transmission projects, which have been bid out though TBCM, are under construction.

List of key transmission projects under construction under TBCB route as of Oct-2025

Sr. No.	Name of the Transmission line	Executing agency	Cost	
1.	Transmission system strengthening scheme for evacuation of power from solar energy zones in Rajasthan (8.1 GW) under phase-II- Part G SPV Name: POWERGRID Narela Transmission Ltd. (CKM-408, MVA-4500)	PGCIL	1,618	Nov-25
2.	Transmission system associated with LTA applications from Rajasthan SEZ Part-E, Phase-II (SPV: POWERGRID Bhadla Sikar Transmission Limited) (CKM-600)	PGCIL	1,644	Nov-25
3.	Transmission scheme for evacuation of 4.5GW RE injection at Khavda PS under	PGCIL	1,238	Nov-25

Sr. No.	Name of the Transmission line	Executing agency	Cost	
	Phase II- Part B (SPV Name: POWERGRID KHAVDA II-B TRANSMISSION LIMITED)			
4.	Establishment of Khavda Pooling Station-2 (KPS2) in Khavda RE Park (SPV: POWERGRID KPS2 TRANSMISSION SYSTEM LIMITED) (MVA-6000)	PGCIL	789	Nov-25
5.	Transmission System for evacuation of power from Pakaldul HEP in Chenab Valley HEPs – Connectivity System	Sterlite	505	Nov-25
6.	System strengthening in northern region (NRSS XXXVI) along with LILO of Sikar-Neemrana 400 kV D/C line at Babai(RVPNL) (CKM-305)	Tata	437	Nov-25
7.	Transmission system for evacuation of power from REZ in Rajasthan (20 GW) under phase III –Part A1 (SPV: Fatehgarh-IV Transmission Ltd.)	Apraava Energy	358	Nov-25
8.	Transmission scheme for evacuation of 4.5GW RE injection at Khavda PS under Phase II- Part C (SPV Name: POWERGRID KHAVDA II-C TRANSMISSION LIMITED)	PGCIL	2,821	Dec-25
9.	Transmission system for evacuation of power from REZ in Rajasthan (20 GW) under Phase-III part B1 SPV: POWERGRID Bhadla III Transmission Ltd	PGCIL	2,500	Dec-25
10.	Immediate evacuation for North Karanpura (3x660MW) generation project of NTPC(ERSS XIX) (CKM-303, MVA-1000)	Adani	472	Dec-25
11.	ISTS Network Expansion scheme in Western Region & Southern Region for export of surplus power during high RE scenario in Southern Region	Adani	2,109	Dec-25
12.	Transmission System for evacuation of additional 7 GW RE Power from Khavda RE Park under Phase-III Part A	Adani	3,100	Dec-25
13.	Transmission Scheme for Solar Energy Zone in Gadag (1500 MW), Karnataka – Part-A, Phase-II (CKM-100, MVA-1500) (SPV: Gadag-IIA Transmisison	Renew	307	Dec-25
14.	Western Region Network Expansion Scheme in Kallam area of Maharashtra	IndiGrid	160	Dec-25
15.	400 kV D/c Khandukhal (Srinagar) – Rampura (Kashipur) line (Twin HTLS) (KRTL) (CKM-388)	Megha Engg.	1,044	Dec-25
16.	Transmission system for evacuation of power from REZ in Rajasthan (20 GW) under Phase-III part H SPV: POWERGRID Beawar Dausa Transmission Ltd	PGCIL	1,910	Jan-26
17.	Transmission System for Evacuation of Power from REZ in Rajasthan (20GW) under Phase-III Part G	Sterlite	2,098	Jan-26
18.	Transmission scheme for evacuation of Power from Dhule 2 GW REZ (CKM-120, MVA-2000)	IndiGrid	513	Feb-26
19.	Transmission system for evacuation of power from RE projects in Rajgarh (1000 MW) SEZ in Madhya Pradesh Phase II (CKM-120, MVA-1500)	GR Infra	408	Feb-26

Sr. No.	Name of the Transmission line	Executing agency	Cost	
20.	Transmission scheme for Solar Energy Zone in Ananthpuram (Ananthapur) (2500 MW) and Kurnool (1000 MW), Andhra Pradesh SPV: POWERGRID Ananthpuram Kurnool Transmission	PGCIL	823	Mar-26
21.	Transmission system associated with LTA applications from Rajasthan SEZ Phase-III Part-C1,SPV: POWERGRID Ramgarh II Transmission Ltd	PGCIL	1,160	Mar-26
22.	Additional Transmission System for evacuation of Power from Bhadla-III PS as part of Rajasthan REZ Phase III Scheme (20 GW) (SPV Name: POWERGRID Bhadla-III Power Transmission Limited)	PGCIL	369	Mar-26
23.	Transmission System for 400 kV Udupi (UPCL) – Kasargode D/C Line (CKM-231, MVA-1000)	Sterlite	755	Mar-26
24.	Transmission System for Evacuation of Power from REZ in Rajasthan (20GW) under Phase-III Part F	Sterlite	2,600	Mar-26
25.	Transmission system for evacuation of power from RE projects in Solapur (1500 MW) SEZ in Maharashtra	Torrent	471	Mar-26
26.	Western Region Expansion Scheme XXXIII (WRESXXXIII): Part B	Apraava Energy	1,181	Apr-26
27.	Transmission Scheme for integration of Renewable Energy Zone (Phase-II) in Koppal-II (Phase-A & B) and Gadag-II (Phase- A) in Karnataka SPV: POWERGRID Koppal Gadag Transmission Ltd	PGCIL	4,445	Jun-26
28.	Transmission system for evacuation of power from Rajasthan REZ Ph-IV (Part-1) (Bikaner Complex): PART-A	PGCIL	4,741	Jun-26
29.	Transmission system for evacuation of power from Rajasthan REZ Ph-IV (Part-1) (Bikaner Complex): PART-D	PGCIL	3,271	Jun-26
30.	Transmission Scheme for Solar Energy Zone in Bidar (2500 MW), Karnataka (SPV Name: POWERGRID Bidar Transmission Limited)	PGCIL	1,368	Jun-26
31.	Transmission Scheme for Evacuation of power from REZ in Rajasthan (20 GW) under Phase-III Part D (SPV: POWERGRID Sikar Khetri Transmission Limited)	PGCIL	2,423	Jun-26
32.	Transmission Scheme for Evacuation of power from potential renewable energy zone in Khavda area of Gujarat under Phase-IV (7 GW):Part E2 (SPV: POWERGRID Khavda IV-E2 Power Transmission	PGCIL	697	Jun-26
33.	Transmission system for evacuation of power from Rajasthan REZ Ph-IV (Part-1) (Bikaner Complex): PART-	Tata	2,440	Jun-26
34.	Western Region Expansion Scheme XXXIII (WRESXXXIII): Part C (CKM-10, MVA-4000)	IndiGrid	619	Jun-26
35.	Transmission system for evacuation of power from REZ in Rajasthan (20 GW) under phase III –Part A3 (SPV: Fatehgarh-III Transmission Ltd.)	Apraava Energy	1,118	Jun-26

Sr. No.	Name of the Transmission line	Executing agency	Cost	
36.	Augmentation of transformation capacity at Jam Khambhaliya PS(GIS) (SPV: POWERGRID Jam Khambaliya Transmission Ltd.)	PGCIL	329	Jul-26
37.	Transmission System for Network Expansion Scheme in Navinal (Mundra) area of Gujarat for drawal of power in the area (SPV: Navinal Transmission Ltd.)	Adani	2,384	Jul-26
38.	Transmission System for Evacuation of Power from Rajasthan REZ Ph-IV (Part-2: 5.5 GW) (Jaisalmer/Barmer Complex): Part D (SPV Name: POWERGRID Beawar-Mandsaur Transmission Limited)	PGCIL	2,227	Aug-26
39.	Transmission system for evacuation of power from Rajasthan REZ Ph-IV (Part-1) (Bikaner Complex): PART-	Sterlite	1,788	Aug-26
40.	Transmission System for Evacuation of Power from potential renewable energy zone in Khavda area of Gujarat under Phase-IV (7 GW): Part A	Adani	4,091	Aug-26

Source: CEA, Crisil Intelligence

In addition to the central level transmission projects mentioned in the tables above, different state transmission agencies are opening up to bidding projects through TBCB mode. Several State Electricity Regulatory Commissions (SERCs) in India have established a threshold limit for intra-state transmission projects to be developed under the TBCB route, as recommended by the National Tariff Policy, 2016. States such as Assam, Gujarat, Haryana, Maharashtra, Punjab, Rajasthan etc. have introduced TBCB mechanism for their Intra-State Transmission System

Key competitively bid InSTS/ISTS projects with state TRANSCOs as implementing agencies

State	Name of the SPV/ Project	Awarded to	Length (ckm)	COD
Rajasthan	Maru Transmission Service Company Limited	GMR Energy, ownership now with ATL	300	Dec 2013
	Aravali transmission service company limited	GMR Energy, ownership now with ATL	97	Aug 2014
	KEC Bikaner-Sikar transmission Pvt. Limited	KEC International Limited, ownership now with ATL	343	Dec 2017
	Thar Power Transmission Service Ltd	ATL	165	Jan 2019
	400 kV Suratgarh- Bikaner Line	ATL	279	Jul 2018
	132 kV Grid Substation and associated transmission lines and associated scheme/works under RAJ/PPP-9	ATL	131	Jan 2019
	Hadoti Power Transmission Service Limited	ATL	115	Feb 2019
Maharashtra	Jaigad Power Transco Ltd	74:26 JV between JSW Energy and MSETCL	330	Dec 2011
	Maharashtra Eastern Grid Power Transmission Limited (MEGPTCL)	ATL	1,213	Mar 2015

State	Name of the SPV/ Project	Awarded to	Length (ckm)	COD
	Kharghar Vikhroli Transmission Private Limited	ATL	74	Mar 2022
Uttar Pradesh	Western U.P Power Transmisison Company Limited	Cobra Instalaciones & Megha Engineering	861	-

The project pipeline for transmission projects remains strong with ~6 projects and ~59 projects presently under bidding by REC and PFC respectively which are likely to be bid out and awarded over the next 1-2 fiscals

.

List of projects under bidding with REC as BPC

Sl. No	Project Name
1.	Establishment Of 220/132/33 KV AIS Musalgaon (Dist.- Nashik)
2.	Establishment Of 400/132 KV AIS Jalna (Dist-Jalna)
3.	Transmission System Strengthening for Integration of Additional RE Potential at Davanagere (0.25 GW) And Bellary (2.75 GW)
4.	Establish Inter-State Transmission System For “Transmission System for Proposed Green Hydrogen / Green Ammonia Projects in Tuticorin Area

5.	Establish Intra-State Transmission System For "Evacuation Scheme For 2000MW Solar Park at Ryapte Village, Tumkur District
6.	Transmission System For Evacuation Of Power From Shongtong Karcham HEP (450 MW) And Tidong HEP (150 MW)

Source: REC, Crisil Intelligence

List of key projects under bidding with PFC as BPC

Sl. No	Project Name
1.	Establishing 2X500MVA 400/220kV sub-station at Hebbani (Santhemearanahalli) in Mandya District and associated transmission lines
2.	Establishment of 3x1500 MVA, 765/400 kV Sub-station at Kushtagi Taluk, Koppal District, and associated transmission lines
3.	Establishment of 5x500MVA, 400/220 kV S/s at Benachigere in Tumkur District and associated transmission lines
4.	Establishment of 400/220/132 kV AIS Latur
5.	Establishment of 765/400/220 kV AIS Kandalgaon (Dist. Raigad)
6.	NERGS-III Siang Basin
7.	Network Expansion Scheme for drawal of power at South Kalamb S/s: Part A
8.	Transmission Scheme for Establishment of 400/220 kV AIS Wagdari (Dist. Solapur)
9.	Network Expansion scheme in Maharashtra for removal of Transmission constrains in Pune Region-I (765/400 kV AIS Pune East)
10.	Network Expansion scheme in Maharashtra for Evacuation of RE Power from Dharashiv, Beed District
11.	Establishment of 400/220 kV AIS Substation at Saswad in District Pune, Maharashtra
12.	Transmission System for Kurnool-IV REZ - Phase-II (3 GW)
13.	Transmission system for Evacuation of Power from RE Projects in Morena SEZ in Madhya Pradesh-Phase I (2500 MW)
14.	Transmission Scheme for Network Expansion scheme in Maharashtra for providing supply to Data Centre Loads in Navi Mumbai
15.	Transmission system for proposed Green Hydrogen / Green Ammonia projects in Kakinada area (Phase-I)
16.	Construction of 400/220/132 kV Grid substation at Joda/Barbil with associated transmission lines
17.	Execution of System Strengthening/Upgradation Works and Intra-State Transmission System projects by Creation/Augmentation of Grid Stations and Laying of Transmission Lines in the state of J&K
18.	Transmission System for supply of power to Green Hydrogen/ Ammonia manufacturing potential in Kandla area of Gujarat (Phase-I: 3 GW)
19.	Provision of ICT Augmentation and Bus Reactor at Bhuj-II PS
20.	Transmission system strengthening to facilitate evacuation of power from Bhadla/Bikaner complex.
21.	Transmission System for Evacuation of Power from potential renewable energy zone in Khavda area of Gujarat under Phase-V (8GW): Part C
22.	Augmentation of transformation capacity at Bhuj-II PS (GIS)
23.	Eastern Region Generation Scheme- I (ERGS-I)
24.	Transmission system strengthening for interconnections of Bhadla-III & Bikaner-III complex
25.	Construction of 400/220/132 kV Grid substation at Joda/Barbil with associated transmission lines

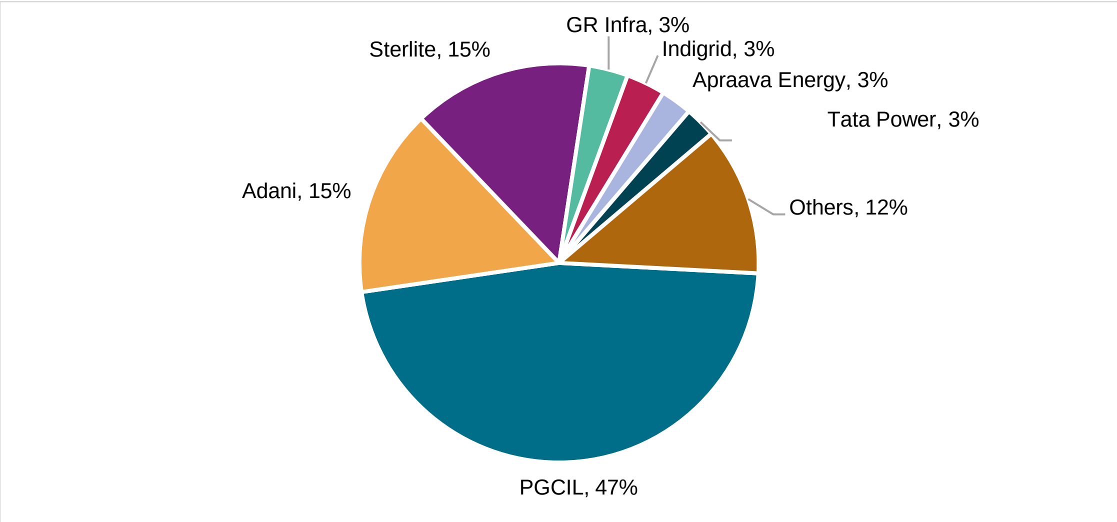
5.5 Consolidation in the transmission segment constricting competition

Prior to the competitive bidding, transmission projects were allocated on the fixed 15.5% return on equity basis. However, post 2011, competitive bidding for all interstate transmission lines were made mandatory which has led to rising competition among players intending to establish their presence in the sector. Players were competing to establish their presence and garner a higher share in the market. The transmission business was perceived as a low risk business as annual levelised tariffs are independent of demand-supply dynamics and fluctuation in electricity tariffs. Further due to better payment security mechanism and assurance of payment from central and state transmission utilities, this business model has attracted many new players. Players across the value chain have participated in these bids:

- Power sector players such as Tata Power, Lanco Infratech, Adani Power, Torrent Power, JSW Energy
- Construction companies such as ECI Engineering, Ashoka Buildcon, L&T, Isolux, Navyug Engineering
- Transmission equipment suppliers/EPC players such as Sterlite Power Transmission Limited, Adani Transmission Limited, Kalpataru Power Transmission, Jyoti Structures, KEC International, Deepak Cables
- Other companies in construction and other diversified interest such as M/S Patel Engineering Ltd, M/S Simplex Infrastructure Ltd, M/s B S Transcom Ltd, L&T Infrastructure, Essel Infraprojects Ltd, Instalaciones Inabensa S.A. and Reliance Power Transmission Limited.

Post FY 2014, competition intensity in the sector has started waning away as reflected from presence of major credible players in the private sector with relevant experience. In fact, the average number of players participating in the bids reduced from 7 between FY 2011-2014 to 4 in the bids in FY 2018. This is because few developers experienced difficulties in commissioning projects in time, which led to escalation in the project cost and revenue loss due to delay in commissioning. Hence, the projects have been bid more rationally, keeping equity returns in mind. In fiscals 2019 and 2020, degree of competition further reduced, with key private companies like Adani Transmission Limited and Sterlite Power Transmission Limited being awarded projects apart from PGCIL. Out of 158 transmission projects commissioned/ awarded through TBCM route, with the centre being as counterparty, of which 84 are won by private players while remaining 74 are won by the PGCIL. Furthermore, among private developers, Adani Transmission Limited and Sterlite Power Transmission Limited (SPTL) (24 projects awarded each, 15% project share). PGCIL remains a strong player in the TBCB mode as well. This shows that the public sector entity has fared well, even when it was not safeguarded or protected from competition. Some of the other major players include IndiGrid, GR Infra, Apraava Energy and Tata Power.

Market share of players in central transmission projects awarded through TBCB model



Others include ReNew, Technoelectric, Essel, Kalpataru, L&T etc.
Source: Monthly progress report as of Oct-2025 of transmission projects awarded through TBCB (CEA), Crisil Intelligence

5.6 Operational power transmission projects have minimal risk

In the project construction phase, transmission assets face execution risks including right of way, forest, and environment clearances, increase in raw material prices etc. However, post commissioning, with the implementation of POC mechanism, there is limited offtake and price risk as described below. Thus, operational transmission projects have annuity like cash flows and steady project returns. The presence of TSA with availability-linked tariff results in cash flow stability.

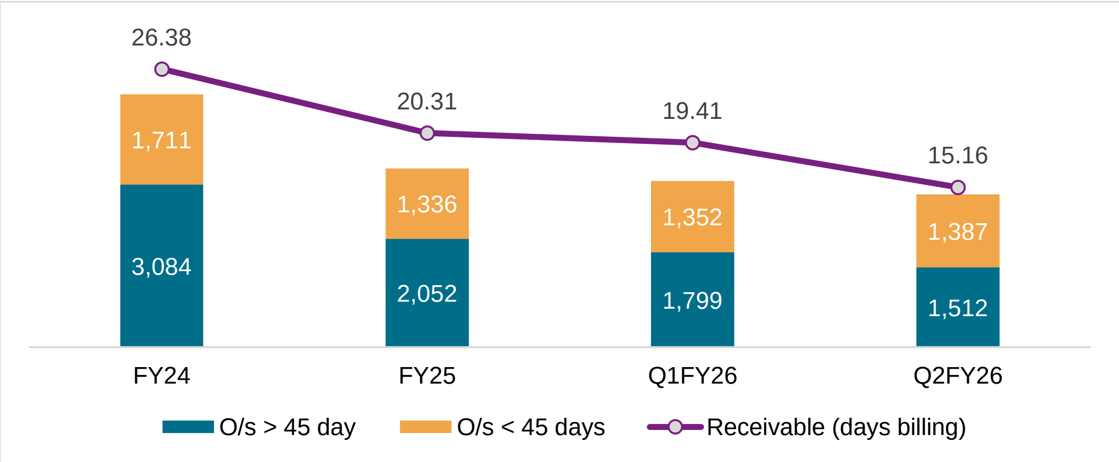
Revenue recovery irrespective of asset utilisation limits off-take risk: Under TBCB, the interested parties are required to quote a levelised tariff through the life of the asset. This means that the tariff will be the same for each year of the asset's life.

The transmission line developer is entitled to get an incentive amount (if availability is more than 98.5% for HVDC and more than 99.75% for HVAC) in the ratio of the transmission charges paid or actually payable at the end of the contract year. Also, in the case of low availability, a transmission licensee is liable to pay a penalty under the TSA, which will be apportioned in favour of the customers. Maintaining availability in excess of the targeted availability gives the relevant asset the right to claim incentives at pre-determined rates, ensuring an adequate upside to maintaining availability. However adequate training and deployment of advanced techniques such as use of helicopters for live line aerial patrolling, hot line maintenance, equipment condition monitoring including dynamic testing and use of thermos-vision scanning may result in higher transmission network availability. Hence, revenue recovery is not linked to volume of power flowing through transmission assets as long as normative line availability is met.

Collection risk offset owing to presence of CTU: All the inter-state transmission projects enjoy strong payment security. The CTU is responsible for collecting the transmission charges from the beneficiary users and disbursing the same to inter-state transmission licensees. Central Transmission Utility of India Limited (100% subsidiary of PGCIL) is assigned the CTU function (carved out from PGCIL).

PGCIL has achieved 102.7% realization of its billing in H1 of fiscal 2026. As per PGCIL ~ Rs. 18,737 crores received against outstanding dues of ~Rs. 18,248 crores settled in accordance with LPS Rules 2022 notification by MoP on June 03, 2022. Major dues are from Tamil Nadu, Uttar Pradesh, and Telangana.

PGCIL outstanding dues (at end of Qtr) (in Rs. crore)



Source: PGCIL Q4FY25 and H1FY26 Investor Presentations; Crisil Intelligence

Payment security: The transmission service agreement includes an arrangement for payment security, which reduces under-recovery of revenues. Payment security is available in terms of a revolving letter of credit of required amount that can be utilized to meet the revenue requirement in case of a shortfall**.** It ensures that the TSP is paid for its services, and it also helps to protect the TSP from financial losses.

Relatively low probability of default: Beneficiaries are less likely to default on transmission charges as there exists limited alternative infrastructure to supply / off-take the power. As per the CERC (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020, consequences of non-payment of dues by a DIC include regulation of power supply, denial of short-term Open Access by RLDC or NLDC and suspension or termination of Long-Term Access or Medium-Term Open Access. Further, the said Regulations also mandate Letter of Credit as instrument of payment security mechanism. If a DIC fails to pay any bill or part thereof by the Due Date, the Central Transmission Utility may encash the Letter of Credit. Further there are limitations on transmission utilities to pass on the additional cost incurred on account of penal interest to the end users. Given a confluence of the above factors, the beneficiaries are less likely to default. Moreover, transmission costs form a relatively lower proportion of the total operational costs. In fact, for most of the State Discoms, the interstate transmission charges account for less than 5% of the total power purchase cost.

5.7 Power transmission infrastructure has better risk-return profile

Returns from various infrastructure projects (other than transmission line projects) like roads, ports and power generation rely mostly on the operational performance of the assets, which in turn is dependent on factors where developers have limited control. For instance, in the roads sector (non-annuity-based project) the company's profits are dependent on collection of toll revenues, the port sector bears risk of cargo traffic, while in the case of power generation, it depends on availability of fuel and offtake by distribution companies.

Further, the counter party risk is higher in annuity-based roads projects as the sole revenue counter party for annuity-based payments is National Highway Authority of India (NHAI), while in the case of ISTS transmission projects the revenue counter party is a pool of distribution and generation companies, thus reducing the counterparty risk based on account of diversification.

Also, in the case of an inter-state transmission asset, the revenue stream is consistent based on the unitary charge (Rs. Million/annum) determined at the time of bidding for the entire concession period of 35 years. These charges are independent of the total power transmitted through the transmission lines and hence factors such as volume and traffic do not fluctuate the revenues.

Moreover, inter-state transmission assets have limited O&M costs as compared to other infrastructure assets. Typically, transmission projects incur relatively low O&M costs of 7-8 per cent of revenues in order to ensure normative availability. In comparison, road projects incur as high as 35-40 per cent as O&M costs.

In addition, transmission lines could also be used for providing telecom services thereby diversifying the revenue profile. Telecom and data service companies leverage the reach of the transmission towers in potential semi-urban and rural regions to offer their services. The telecom companies could plan low cost and high-quality telecom infrastructure on the existing and planned transmission line infrastructure. This can be done by using technologies such as OPGW – Optical Fibre Ground Wire over high voltage Transmission line and MPLS – Multi Protocol Label Switching. In fact, PGCIL has been able to leverage its assets by supporting telecom service providers. PGCIL operates its telecom business through a wholly-owned subsidiary named Powertel. At the end of fiscal 2025, the Company's telecom network covers over 1 Lakh kilometers and more than 40,000 locations nationwide. The revenue from the telecom business rose to Rs. ~976 crores in fiscal 2025, which constituted ~2% of its operating revenue.

The company is also exploring new business segments and offering novel solutions such as MPLS, VPN, content delivery networks etc. Further, a few of the other government institutions have leveraged their existing tower infrastructure assets for generating additional revenue stream. For instance, RailTel (a subsidiary of Indian Railways and provider of neutral telecom infrastructure) has created its optical fiber network by having point of presence (PoP) at each of the station (for the purpose of signaling and tracking), spaced at every 8 to 10 Kms, thereby generating additional revenues by leasing their network and microwave tower assets to telecom operators.

Also, GAILTel, the telecom and telemetry services arm of GAIL (India) Limited, which is primarily in the business of processing and distributing natural gas has been leasing its OFC network and towers spaces to telecom operators across India. For renewable power generation, counter-party risk remains a key concern, especially for those which do not have any payment security mechanism. Certainty of cash flows remain strong while future growth potential is robust.

The chart given below compares other infrastructure assets to the transmission assets.

Comparison of transmission assets with other infrastructure assets

	Inter-state power transmission	Roads	Ports	Conventional power generation	Solar energy power generation	Wind energy power generation	Commercial Real Estate
Certainty of cash flows	● Driven by long-term agreements	◑ Traffic risk in BOT projects	◕ End-user industry risk	◑ Offtake and cost of fuel	● Broadly driven by long term agreements	● Broadly driven by long term agreements	◑ Preffered by global institutional investors and HNI investors but risks of seasonality
Counterparty risk	◕ Exposure limited to systemic risk	◑ Cost overruns, limited O&M impact toll collection	◑ Exposure to multiple end users	◑ Direct exposure to debt laden SEBs	◕ Faster clearance to payments under NVVN/ SECI Scheme (2-3 months). Weaker discoms delay the payments (5-6 months)	◕ Faster clearance to payments under NVVN/ SECI Scheme (2-3 months). Weaker discoms delay the payments (5-6 months)	◑ Regular challenges of delays and cancellations
Operational Risk	● Limited O&M requirements	◑ High O&M required	◕ Limited O&M requirements	◑ Substantial periodic maintenance needs	● Limited O&M requirements	◕ Substantial periodic O&M requirements	◕ Limited O&M requirements
Future Growth Potential	● Severe deficit in power transmission capacity	◕ High growth potential	◑ Good potential, limited by feasible locations	◑ Moderate potential from baseload power demand	● Governments to scale up capacity to 100 GW by FY2022 from ~12 GW in FY2017	● Governments to scale up capacity to 60 GW by FY2022 from ~32 GW in FY2017	◑ Pivoting towards hybrid models as work from home becomes more acceptable with digital means of communication
Competitive Environment	● Few credible players	◑ Highly competitive given multiple private players	◕ Few private players	◑ High competitiveness given multiple players	◑ Highly competitive given multiple private players	◑ Highly competitive given multiple private players	◑ Low number of large players, smaller ones merging due to impact on business
Summary	●	◑	◑	◑	●	●	◑

● Most Favourable ◕ Favourable ◑ Marginally Favourable

Source: Crisil Intelligence

Thus, other infrastructure projects, over and above the construction risk, also bear the risk of poor returns in case of lower utilization of assets. Transmission projects, on the other hand, are insulated from such risk, thus making it an attractive investment.

5.8 Other key trends

5.8.1 Key technology trends

To meet the long-term power transfer requirement by fiscal 2027 and beyond as well as for the optimal utilization of right of way, large power evacuation corridors are needed to be planned, which requires advancements in transmission voltage, conductor technology, substation equipment and infrastructure etc. Further, due to large geographical expanse of India and strongly growing power consumption need, there is requirement for transfer of large quantum of power from various generation complexes in Chhattisgarh, Jharkhand, Orissa to load centers in Northern and Western regions. Hence PGCIL has successfully tested evacuation at higher voltage of 1200 KV. In a joint initiative taken by PGCIL, CPRI and Equipment Manufacturers a 1200 kV testing station and an experimental line at Bina in Madhya Pradesh is already set up. Power flow commenced in 2016. However, major limitations in erection of an ultra-high voltage lines are transportation of large equipment's to remote places, dielectric design and short circuit withstand capability.

On the conductor front there have been many advancements such as usage of high temperature low sag, high surge impedance loading, and gas insulated line conductors. These conductors have been used in recent 132 kV lines bid out by the Odisha power Transmission Corporation limited, 400 kV Meerut- Kaithal D/C line and in the Naptha- Jhakri hydro project. Usage of these conductors increases the transfer capability of the transmission line and simultaneously reduce the line losses. HSIL conductors help to protect the transmission lines from lightning strikes.

Further due to growing urbanization and high real estate prices in cities, newer technology-based Gas insulated switchgear (GIS) substations are used, which not only reduces the space requirement by also cuts down on the maintenance and improves reliability. Modern substations are also using highly automated components with digital communication facilities, to increase the reliability of operations and reduce system downtime. With the advent of smart grid networking infrastructure and communication solutions synchronous digital hierarchy is utilized to communicate between substations, which not only helps in quick addressal of the fault but also helps in maintaining the grid frequency.

There have also been new innovative techniques used in the construction of transmission lines. For instance, there have been use of Light Detection and Ranging (LIDAR) technology, which uses laser distance measuring technology to conduct topographic mapping with the help of aircrafts. Further, helicopters are used for stringing (heli stringing) of transmission lines. A helicopter pulls the rope through stringing wheels, which are attached to each arm of structure. Conductor is then pulled back through the stringing wheels using a machine located on the ground. Then the stringing wheels are removed from each arm while attachments including dampeners are used to minimize the vibration on the conductor. Other newer technologies which help in automated inspection and maintenance planning such as drones are used to monitor lines spread over long distances. Further preventive maintenance of transmission lines is also done by modern equipment's which includes thermo vision scanning, punctured insulator detector, corona measurement devices etc.

Storage as a transmission asset: As per the Electricity (Amendment) Rules, 2025, energy storage system may be developed, owned, leased, or operated by a generating company or a transmission licensee or a distribution licensee or a consumer or a system operator or an independent energy storage service provider. The ESS owned and operated by and co-located with a generating station or a transmission licensee or a distribution licensee or a consumer, shall have the same legal status as that of the owner. Transmission corridors get underutilized because variable RE generation and lower consumption of RE due to inherent intermittency and different periods of generation and demand. Storage solutions will help in aligning the demand and generation profile. Storage solutions can be utilised for ancillary services such as black start, voltage stability, frequency regulations and congestion management. The government is providing financial support for BESS through the introduction of VGF and by extending transmission charge waivers for storage projects until 2028. These measures aim to integrate variable renewable energy sources, enhance grid stability, and attract investment into the storage sector.

Digital Substation: Use of technology to improve performance and reliability. These use various technologies such as digital communication networks, digital protection and control devices, digital sensors etc. This has provided a paradigm shift in the way the control & protection system are tested and maintained. Digital substations offer several benefits over traditional substations, including improved reliability, increased efficiency, improved monitoring and control, reduced O&M Costs, helps in advanced diagnostics and improvement in overall availability of the system.

Advanced monitoring and control systems: Advanced monitoring and control systems are used to monitor the performance of power transmission systems and to control the flow of power. These systems use a variety of sensors and software to collect data and make decisions about how to operate the grid.

Cybersecurity: Cybersecurity is a critical issue for the power transmission industry. As the grid becomes more digital, it is vulnerable to cyberattacks. Utilities are investing in cybersecurity measures to protect their systems from attack.

5.8.2 Operation and maintenance of transmission line

Transmission lines carry extra high voltage power over long distances; hence its efficient functioning is required for maintaining power quality, reliability and security of the grid.

The Central Commission has been vested with the functions to specify the Grid Code having regard to the Grid Standards. Further, the Electricity Act 2003 mandates the Central Electricity Authority to specify the Grid Standards for operation and maintenance of the transmission lines. Further, the said Act also mandated the Central Commission to specify and enforce the standards with respect to the quality, continuity, and reliability of services by the licensees.

In order to ensure the proper functioning of transmission line, The Indian Electricity Grid Code (IEGC) regulation made by the Central Commission has laid down rules, guidelines and standards to be followed by participants in the system to plan, develop, maintain and operate the power system while facilitating healthy competition in the generation and supply of electricity. In order to monitor the compliance of IEGC norms, Regional Power Committee (RPC) in the regions are vested with the responsibility to continuously monitor the instances of non-compliance and also deliberate the ways in which non-compliance can be averted in future. These norms have enlisted various technical and operational parameters such as Procedure for connection, Protection requirements for Connectivity to the Grid, Reactive Power Compensation, Data and Communication Facilities, Responsibilities for safety, guidelines for connectivity of renewable energy generating station to the grid, governor action for a generation plant etc. Further, these guidelines detail out the reporting procedure for various organizations such as NLDC, RLDCs and RPCs. Most of the thermal power plant facilities plan for scheduled operation and maintenance activity due to which the thermal plant does not remain under operation, but the planned outage schedule has to be adjusted in such a manner that generation output and transmission system should be adequate after taking into account the outages. Under the outage management process the RPC Secretariat prepares a draft annual outage schedule. All SEBs/STUs, transmission licensees, CTU, ISGS IPPs, MPPs and other generating stations provides RPC Secretariat their proposed outage programmes in writing for the next financial year by 30th November, which gets finalized by January 31st.

Most of the large ISTS transmission lines in India have high availability factor, upwards of 98% (i.e., continuous operation), which requires them to undergo checks and inspections. Since transmission lines run for hundreds of kms hence maintenance activity takes days and weeks with multiple teams operating simultaneously. Transmission line maintenance is a recurring process that requires cleaning insulators in order clean them of dust and other particles that build up in the air. Line inspection is usually ocular in nature, but in case of transmission lines located at remote distances technicians use infrared or ultraviolet light cameras and ultrasound detectors to obtain data locally or remotely. Techniques such as live-line (or hot line) maintenance is used to perform maintenance activities without removing them from service.

5.9 Key risks and challenges in power transmission sector

Particulars	Description
ROW Issues	Right of way (RoW) issues are caused by land acquisition challenges, complex clearances, local resistance, and inadequate compensation, leading to significant project delays and cost overruns. These challenges are particularly acute in rural, forest, and tribal areas.
Execution delays	Execution slippage may occur due to various external factors, such as right-of-way issues, delay in getting environmental clearances, political unrest, terror attacks, etc. or internal factors like shortage of manpower or raw material. Larger firms with greater expertise and experience at handling such issues would be able to manage such events relatively better than smaller players.
Delays in permissions and clearances	Delays in permissions and clearances for transmission line projects are a major cause of project overruns and cost increases, primarily stemming from issues with right-of-way (RoW), environmental and forest clearances, and coordination among multiple stakeholders.
Increasing RE penetration	Robust renewable energy capacity additions and transmission strengthening schemes are expected to offset to some extent the slowdown in the conventional space. However, most of the RE projects are generally located in remote areas. Therefore, connecting RE power plants to the main grid via reliable transmission system remains a major obstacle.
Regulatory and policy issues	There are frequent regulatory and policy changes, electricity being concurrent subject States also have their own policies which at times are non-uniform, involvement of multiple stakeholders, ambiguity in compensation clause, change in law complications after change in taxes and duties etc.
Monitor working capital requirements	Having an effective working capital monitoring system, optimization of working capital resources and constant monitoring are crucial, given the long gestation period of projects and the long receivables cycle. Interest costs, being a volatile component, have to be managed effectively to control the cost of funds.

Particulars	Description
Management of raw material cost	Commodity prices are known to be volatile with prices impacted by several macro-economic and global factors. Transmission tower industry utilizes several key commodities such as steel, aluminum, and zinc. Contracts with a price escalation clause can insulate the company from price increases. One common method adopted by players is to enter into contracts with suppliers for procuring raw material at the time the contract is awarded. Players also enter into forward contracts to protect margins.

5.10 Overview of Infrastructure Investment Trusts (InvITs)

Infrastructure Investment Trusts (InvITs) in India serve as a key mechanism to channel investment into vital infrastructure, particularly the power transmission sector. These SEBI-regulated vehicles allow a wide range of investors to earn stable, long-term returns from operational assets like transmission lines and substations. InvITs function similarly to mutual funds but pool capital for infrastructure projects. They are structured as a trust with four key participants: a Sponsor (the entity that sets it up), a Trustee (holds assets on behalf of investors), an Investment Manager (manages assets and investments), and a Project Manager (oversees day-to-day operations). InvITs offer diversification and exposure to India's infrastructure growth story. They are well-suited for investors seeking stable, regular income streams and long-term investment horizons. Overall, transmission InvITs are a crucial and growing part of the Indian financial landscape, offering an institutionalized way to invest in core national infrastructure.

Comparison of Transmission InvITs in India (as of 30th September 2025)

Particulars	IndiGrid Infrastructure Trust	POWERGRID Infrastructure Investment Trust	Anzen India Energy Yield Plus Trust
Registration with SEBI on	28-Nov-16	7-Jan-21	18-Jan-22
Sponsor	Esoteric II Pte. Ltd.	Power Grid Corporation Ltd.	Edelweiss Infrastructure Yield Plus fund
Operational Transmission Assets	18 operational projects, 8,742 ckm, Substations 20,050 MVA	5 Operational Projects; 11 Tx lines: 3,699 ckm 3 substations; 6,630 MVA	Tr lines ~855 ckt km; 1168 Towers and 2 substations (1400 MVA)
Operational Solar Asset	20 projects with 1,507 MWp capacity	NA	1 project having ~420 MWp capacity
Other Operational Assets	BESS: 20 MW / 40 MWh	NA	ROFO 1: 12 Solar Assets with ~813.2 MWp capacity ROFO 2: 1 ISTS project : ~980 ckt km
Assets under management	Rs. 325 Bn	Rs. 88.57 Bn	Rs. 39.7 Bn

5.11 About IndiGrid Infrastructure Trust

IndiGrid Infrastructure Trust (IndiGrid) is the India's first listed power sector infrastructure investment trust (InvIT), sponsored by Esoteric II Pte. Ltd., a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR. It owns, operates, and manages power transmission, renewable generation, and energy storage assets that deliver reliable power throughout India.

On the basis of its strengths and through the implementation of strategies, IndiGrid is well-positioned to capitalize on the growth potential of India's power transmission, renewable energy and battery storage systems industry.

Tariffs under the ISTS project TSAs, which contribute to the majority of Transmission Assets of IndiGrid, are billed and collected pursuant to the PoC mechanism. Under the PoC mechanism, payments are made to a central payment pool and the proceeds are distributed proportionately to all transmission services providers, such as the Transmission Assets. Any shortfall in collection of transmission charges by the CTU is shared on a pro rata basis by all transmission service providers. Payment securities in the form of a revolving letter of credit, a late payment surcharge of 1.25% per month for delay in payment beyond 60 days from the date of billing, pursuant to provisions of the project TSAs (and a late payment surcharge of 1.50% per month pursuant to the Sharing of Charges and Losses Regulations) and lack of alternate power infrastructure, deter beneficiaries from defaulting. This mechanism diversifies counterparty risk, ensures a stable cash flow independent of asset utilization and provides payment security.

IndiGrid has been assigned a credit rating of 'CRISIL AAA/Stable' and 'Crisil A1+' by CRISIL, 'IND AAA/Stable and 'IND A1+' by India Ratings and 'ICRA/AAA/Stable' and 'ICRA A1+' by ICRA. IndiGrid has also have a track record of continuous distributions for the past three financial years.

All Transmission Assets of IndiGrid are located in strategically important areas for electricity transmission connectivity, delivering power from generating centers to load centers to meet inter-regional power deficits.

The transmission lines of the Transmission Assets of IndiGrid are predominantly located in areas where developing alternate lines may be challenging due to the terrain, challenges in obtaining rights of way, limited corridors and high construction costs. This puts IndiGrid in an advantageous position to capitalize the opportunities to increase its power transmission capacity through the same corridor by upgrading existing systems.

Further, Solar Assets of IndiGrid are strategically located in high irradiation areas. The projects are located across seven states of India, being, Tamil Nadu, Uttar Pradesh, Maharashtra, Gujarat, Rajasthan, Madhya Pradesh, Punjab and Andhra Pradesh.

IndiGrid is focused on the Indian market, where it believes that private participation in the power sector will continue to grow significantly. It also believes that energy sector in India has matured and there is an attractive opportunity to aggregate good quality power transmission, solar and energy storage projects, (i) having attractive TSAs, long terms PPAs and BESPAs, respectively, which is also consistent with its investment philosophy of long term cash yielding stable projects; (ii) with operational track record for a well-capitalized platform like IndiGrid; (iii) with good quality equipment; and (iv) financially strong and creditworthy counterparties

OUR BUSINESS

Overview

We are India's first listed power sector infrastructure investment trust. IndiGrid was established on October 21, 2016 and is registered with SEBI pursuant to the InvIT Regulations. IndiGrid currently owns and operates transmission and BESS projects and solar projects in India and has assets under management of approximately ₹ 325.00 billion as on September 30, 2025.

We own 45 projects (comprising 39 operating projects and six under construction projects) across two energy sub-sectors i.e., transmission and BESS projects, solar generation projects in 20 states and two union territories. Our operating projects, consist of 19 transmission projects and BESS projects, and 20 solar projects, while our under construction assets consist of six transmission and BESS projects. Our transmission projects consist of a total circuit length of approximately 9,336 ckms and 16 substations with approximately 25,050 MVA of transformation capacity, across 20 states and two union territories in India while our BESS projects have an aggregate storage capacity of 900 MWh. Our solar projects have an aggregate capacity of 1.5GWp and are located across the states of Andhra Pradesh, Punjab, Tamil Nadu, Rajasthan, Gujarat, Maharashtra, Madhya Pradesh and Uttar Pradesh.

Please see below the manner in which we have grown our portfolio since May, 2017:

Date	Details
May, 2017	Acquisition of BDTCL and JTCL from Sterlite Electric
February, 2018	Acquisition of PKTCL, RTCL and MTPL, from Sterlite Electric
August 2018	Acquisition of PTPCL from TEECL and TPGCL
June, 2019	Acquisition of NTL from Sterlite Electric
July, 2019	Acquisition of OGPTL from Sterlite Electric
May, 2020	Acquisition of ENICL from SPGVL and Sterlite Electric
August, 2020	Acquisition of GPTPL from SPGVL and SGL4
October, 2020	Acquisition of JKPTL from KPTL and TEECL
January, 2021	Acquisition of PrKTCL from Reliance Infrastructure Limited
March, 2021	Acquisition of NER from SGL4
December, 2021	Acquisition of Kallam from REC Power Development and Consultancy Limited
July, 2021	Acquisition of IGL Solar I and IGL Solar II from FRV Solar Holdings XI B.V
November, 2022	Acquisition of RSTCPL from Patel Engineering Limited, Simplex Infrastructures Limited and BS Limited
February, 2023	Acquisition of JUPL from ReNew Solar Power Private Limited
March, 2023	Acquisition of KTL from Sterlite Electric
August 25, 2023	Acquisition of GGEPL, UMD, USUPL, GSPPL, PLG, Solar Edge, TKSPL, TSEG, TNSPEPL, TRSPL, TSEC, TSEN, TSET, TSEP and TSESPL which we acquired through the acquisition of VRET
October, 2023	KBPL, which was set up after receiving the letter of award by BSES Rajdhani Power Limited
February, 2024	Acquisition of IPTL and DPTL from REC Power Development and Consultancy Limited
March, 2024	GBPL which was set up after receiving the letter of intent/ letter of award from GUVNL
April, 2024	Acquisition of KTCO from REC Power Development and Consultancy Limited
November 2024	RBPL which was set up after receiving the letter of intent/ letter of award from NVVNL
March, 2025	Acquisition of RKPTL from REC Power Development and Consultancy Limited
May, 2025	Acquisition of EIPL 1 from Enerica ReGrid Infra Private Limited ("**EnerGrid**")
June, 2025	Acquisition of KNTL from ReNew Transmission Ventures Private Limited and KNI India AS
June, 2025	Acquisition of RSAPL from ReNew Solar Power Private Limited

Further, IndiGrid has also executed definitive agreements (i) dated December 2, 2025 in relation to the acquisition of 100% of the equity shareholding in GTL from ReNew Transmission Ventures Private Limited and KNI India AS; (ii) dated August 20, 2025, with Techno Electric & Engineering Company Limited, for the acquisition of 100% of the equity shareholding of NERES XVI Power Transmission Limited; and (iii) dated August 25, 2025 with EnerGrid, amongst others, for acquisition of a BESS project in Uttar Pradesh under TBCB through Enerica Infra 3 Private Limited. EIPL 1 is also the Project Manager for the BESS Assets.

Further, IndiGrid has also signed a framework agreement dated November 12, 2024 with British International Investment PLC ("**BII**") and Norwegian Climate Investment Fund managed by Norfund via KNI India AS ("**Norfund**" and such agreement, the "**Framework Agreement**"), pursuant to which IndiGrid has agreed to finance a platform, being Energrid, for development and construction of (i) power transmission projects with a focus on Inter-State Transmission Systems, which are currently being bid out on a "build, own, operate, transfer" basis; (ii) standalone BESS projects currently being bid out by Solar Energy Corporation of India Limited, NTPC Vidyut Vyapar Nigam Limited, Gujarat Urja Vikas Nikam Limited or other state discoms; and (iii) such other business opportunities in renewable projects, hybrid projects or FDRE projects, provided such opportunities align with the strategic goals of the business and are agreed upon by all parties. In accordance with the Framework Agreement, these projects will be fully acquired by IndiGrid at a pre-agreed enterprise value, 12 months post the projects commencing commercial operations or as may be prescribed in the relevant concession agreement.

We believe that we are well positioned to take advantage of the growth potential of India's power industry given the quality of our transmission and BESS assets and solar assets, and our financial position, support from our Sponsor and the robust regulatory framework for transmission and BESS projects and solar projects in India. We believe the infrastructure necessary to transmit and deliver electricity is vital to India's continued economic advancement, given the inter-regional power deficit in India resulting from a mismatch between power generation and load centers, and the demand-supply deficit which is expected to result from India's projected GDP growth.

Our continued focus and strategy will be on accretive acquisition of transmission and BESS projects, and solar projects with annuity profile in their respective TSAs, BESPAs and long terms PPAs yielding stable cash flows, operational track record, good quality equipment and financially strong and creditworthy counterparties. For further details, please see the section entitled "*Industry Overview*" on page 188.

We are focused on providing stable and sustainable distributions to our Unitholders. Infrastructure investment trusts are required to distribute at least 90% of their net distributable cash flows to unitholders once at least every six months in every financial year, according to the InvIT Regulations. However, we have adopted a quarterly distribution policy. For further details on our distribution policy, please see the section entitled "*Distribution*" on page 336. We believe our assets, financial position and business model will enable us to offer stable distributions to our Unitholders.

Additionally, following the utilization of the Issue Proceeds, our aggregate consolidated borrowings and deferred payments (net of cash and cash equivalents) will not exceed 70% of the total value of our assets. Our consolidated total income was ₹ 34,377.27 million in Fiscal 2025 and ₹ 17,371.80 million in the half year ended September 30, 2025 and our EBITDA on a consolidated basis was ₹ 30,396.60 million in Fiscal 2025 and ₹ 14,804.78 million in the half year ended September 30, 2025. We have consistently been assigned a credit rating of 'CRISIL AAA/Stable' by CRISIL, 'IND AAA/Stable' and 'IND A1+' by India Ratings and 'ICRA/AAA/Stable' and 'ICRA A1+' by ICRA.

We are sponsored by Esoteric II Pte. Ltd., a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR. Esoteric II Pte. Ltd. was incorporated under the laws of Singapore as a private company limited by shares. Esoteric II Pte. Ltd. currently owns a stake of around 1.17% in IndiGrid. IndiGrid Investment Managers Limited is the investment manager of IndiGrid. Electron IM Pte. Ltd., an affiliate of KKR, currently owns 100% of the issued, paid-up and subscribed capital of the Investment Manager. Axis Trustee Services is the trustee in respect of IndiGrid. IGL and EIPL 1 are the project managers for our Portfolio Assets. For further details on the parties to the Trust, please see the section entitled "*Parties to IndiGrid*" on page 142.

On the basis of our strengths and through the implementation of our strategies, we believe that we are well-positioned to capitalize on the growth potential of India's transmission and BESS industry and solar industry.

Competitive Strengths

Stable cash flows from assets with minimal counterparty risks

- Our Portfolio Assets include a majority of operational transmission and BESS projects and our solar projects. Such operational Portfolio Assets have minimal construction risks and are not subject to any major capital expenditure. Further, transmission and BESS projects and solar projects are typically characterized by low levels of operating risk.

- Most of our revenues are derived out of contracted tariffs under long-term contracts (up to 35 years or 25 years (for ENICL and JKTPL), unless extended) from the majority of our Transmission Assets with relatively low operating and maintenance costs. Inter-state power transmission projects receive tariffs on the basis of availability, irrespective of the quantum of actual power transmitted through the line. We have maintained an annual availability for the majority of our Transmission Assets in excess of 98% since commissioning for which we have earned maximum incentive revenues under the respective TSAs. Maintaining availability of such Transmission Assets in excess of 98% gives us the right to claim incentives under the TSA, ensuring an adequate upside to maximize availability. The amount of incentive revenue earned increases as our availability levels increase, with a maximum incentive revenue earned for maintaining 99.75% (or ranging between 98% to 100% in case of JKTPL and between 98.5% and 99.75% in case of PrKTCL) availability. All of IndiGrid's BESS projects have secured 12-year BESPAs with utilities, under which the tariff is pre-determined at the time of bidding and is payable as long as the system remains available for use by the off-taker, following a structure similar to transmission service agreements. Tariffs under the ISTS project TSAs, which contribute to the majority of our Transmission Assets, are billed and collected pursuant to the PoC mechanism. Under the PoC mechanism, payments are made to a central payment pool and the proceeds are distributed proportionately to all transmission services providers, such as the Transmission Assets. Any shortfall in collection of transmission charges by the CTU is shared on a *pro rata* basis by all transmission service providers. Payment securities in the form of a revolving letter of credit, a late payment surcharge of 1.25% per month for delay in payment beyond 60 days from the date of billing, pursuant to provisions of the project TSAs (and a late payment surcharge of 1.50% per month pursuant to the Sharing of Charges and Losses Regulations) and lack of alternate power infrastructure, deter beneficiaries from defaulting. This mechanism diversifies counterparty risk, ensures a stable cash flow independent of asset utilization and provides payment security.

- Each of the Solar Assets have entered into long term PPAs with the weighted average residual term of the PPAs, calculated using DC capacity, of approximately 18 years. Further, the Solar Assets have maintained an average DC plant load factor ("**PLF**") of 17.51%, 17.50%, 17.93% and 17.08% during the half year ended September 30, 2025 and the Fiscals 2025, 2024 and 2023, thus allowing us to maintain stable cash flows from our Solar Assets. In accordance with the terms of the PPAs, the Solar Assets have a pre-determined tariff structure.

Strong financial position

- We have been assigned a credit rating of 'CRISIL AAA/Stable' by CRISIL, 'IND AAA/Stable and 'IND A1+' by India Ratings and 'ICRA/AAA/Stable' and 'ICRA A1+' by ICRA. Following the utilization of the Issue Proceeds, our aggregate consolidated borrowings and deferred payments (net of cash and cash equivalents) will not exceed 70% of the total value of our assets. We also have a track record of continuous distributions for the past three financial years. For further details, please see the section entitled "*Distribution*" on page 336.

Strategic location of assets

- All our Transmission and BESS Assets are located in strategically important areas for electricity transmission connectivity, delivering power from generating centers to load centers to meet inter-regional power deficits. Once a transmission project has been commissioned, it requires relatively low levels of expenditure to operate and maintain, which means that IndiGrid will have the benefit of owning a critical asset without incurring significant operational costs.

- The transmission lines of the Transmission Assets are predominantly located in areas where developing alternate lines may be challenging due to the terrain, challenges in obtaining rights of way, limited corridors and high construction costs. This puts us in an advantageous position to capitalize the opportunities to increase our transmission capacity through the same corridor by upgrading our existing systems. Further, our BESS Assets are located at Gujarat, Rajasthan and Delhi.

- Further, our Solar Assets are strategically located in high irradiation areas. The projects are located across seven states of India, being, Tamil Nadu, Uttar Pradesh, Maharashtra, Gujarat, Madhya Pradesh, Punjab, Rajasthan and Andhra Pradesh.

Strong lineage and support from the Sponsor

- Esoteric II Pte. Ltd. is the sponsor of IndiGrid. Esoteric II Pte. Ltd. is a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR. Founded in 1976, KKR is a leading global investment firm with approximately US$ 723 billion of assets under management as of September 30, 2025, that offers alternative asset management as well as capital markets and insurance solutions. KKR sponsors investment funds that invest in private equity, credit and real assets and has strategic partners that manage hedge funds. KKR's insurance subsidiaries offer retirement, life and reinsurance products under the management of Global Atlantic Financial Group. KKR aims to generate attractive investment returns by following a patient and disciplined investment approach, employing world-class people, and supporting growth in its portfolio companies and communities. Esoteric II Pte. Ltd. currently owns a stake of around 1.17% in IndiGrid. Separately, Electron IM Pte. Ltd., an affiliate of KKR, currently owns 100% of the issued, paid-up and subscribed capital of the Investment Manager.

- In 2008, KKR established a dedicated infrastructure team and strategy focused on global investment opportunities. KKR has been one of the more active infrastructure investors globally over the past several years, having made approximately 75 infrastructure investments globally and approximately US$ 95 billion in assets under management within infrastructure.

- Today, KKR's infrastructure platform has expanded to include approximately 110 dedicated investment professionals covering a broad spectrum of investment opportunities in various infrastructure subsectors, including: midstream energy, renewables, power & utilities, water and wastewater, waste, telecommunications and transportation, among others. KKR continually monitors infrastructure sectors and infrastructure-related investments for emerging trends and may identify and prioritize investments in other sectors as conditions change or cycles evolve.

- We have leveraged and continue to leverage the experience and expertise of the Sponsor, to gain a competitive advantage within the Indian power industry. For further details on the Sponsor, please see the section entitled "*Parties to IndiGrid*" on page 142.

Strong corporate governance and skilled and experienced Investment Manager

We benefit from the skills and experience of the board of directors and the management teams of the Investment Manager, IndiGrid Investment Managers Limited, in investing and financially managing our transmission and BESS projects, and solar projects for the beneficial interest of our Unitholders. Some of the members of our Investment Manager's board of directors and management teams have extensive experience in the power sector and have established track records in negotiating, structuring and financing investments and financially managing these projects as well as governing similar trusts internationally. For further details, please see the section entitled "*Parties to IndiGrid*" on page 142.

The InvIT Regulations set out the statutory requirements for, among other things, the board composition of an investment manager, which promotes strong corporate governance in IndiGrid. The key features of our corporate governance structure are as follows:

- The chairman of the board of the Investment Manager is an independent director with experience in the infrastructure sector.

- The Investment Manager has constituted committees of the board, including amongst others, the stakeholders' relationship committee, the audit committee, the investment committee, ESG and CSR committee and the risk management committee. All these committees are chaired by independent directors.

- All related party transactions with our Sponsor are required to be approved by the investment committee (50% of which consists of independent directors) and the audit committee of the Investment Manager (majorly comprising of independent directors).

Business Strategy

Portfolio Strategy

- ***Focus on maintaining stable operations for predictable and sustainable distributions while pursuing value accretive acquisition***

  We focus on owning transmission and BESS assets and solar energy assets with long-term contracts, low operating risks and stable cash flows consistent with the characteristics of our Portfolio Assets as well as other assets which we intend to acquire in the future. We believe that by focusing on this asset class and leveraging our Investment Manager's industry knowledge and experience, we will maximize our strategic opportunities and overall financial performance.

We are focused on the Indian market, where we believe that private participation in the power sector will continue to grow significantly. We believe that energy sector in India has matured and there is an attractive opportunity to aggregate good quality transmission and BESS projects, and solar projects, (i) having attractive TSAs and BESPAs and long terms PPAs, respectively, which is also consistent with our investment philosophy of long term cash yielding stable projects; (ii) with operational track record for a well-capitalized platform like ours; (iii) with good quality equipment; and (iv) financially strong and creditworthy counterparties.

Our future growth is intended to be derived mainly from our Investment Manager's value accretive acquisition strategy, which provide long-term, regular and predictable cash flows, demonstrate potential to maintain or enhance returns to Unitholders and the potential for long-term capital growth in accordance with our investment objectives.

We intend to continue our expansion through an active evaluation of organic and inorganic acquisitions in accordance with the investment conditions specified in the InvIT Regulations. We believe that our experienced operational and management teams will enable us to identify, structure, execute and integrate acquisitions effectively based on our demonstrated ability to acquire high quality transmission and BESS projects and solar projects.

- ***Leveraging Energrid's greenfield projects***

  IndiGrid has signed a framework agreement dated November 12, 2024 with BII and Norfund to create a platform, EnerGrid which will bid and develop greenfield transmission and BESS projects in India. Once these projects commence operation, they will be fully acquired by IndiGrid at a pre-agreed enterprise value. Each of the three partners namely BII, Norfund and IndiGrid have committed to invest USD 100.00 million in the platform totalling to USD 300.00 million. IndiGrid has executed a definitive agreement dated August 25, 2025 with EnerGrid, amongst others, for the acquisition of a BESS project (187.5 MW/750 MWh standalone BESS) in Uttar Pradesh with viability gap funding under the tariff-based competitive bidding process after one year from its commercial operations date, in one or more tranches through a special purpose vehicle, Enerica Infra 3 Private Limited.

  We have, in the past, received letters of intent to establish, on a consortium basis or otherwise, various transmission projects including (i) Inter-State transmission system for "Transmission scheme for evacuation of power from Ratle HEP (850 MW) & Kiru HEP (624 MW): Part-A" on a BOOT basis; (ii) Inter-State transmission system for "Western Region Network Expansion scheme in Kallam area of Maharashtra" on a BOOT basis; (iii) Inter-State Transmission system for "Transmission scheme for evacuation of power from Dhule 2 GW REZ" on a BOOT basis; and (iv) to establish Inter-State Transmission system for "Western Region Expansion Scheme XXXIII (WRES-XXXIII): Part C" on a BOOT basis. Additionally, IndiGrid has received letters of intent or acceptance for design, supply, testing, installation, commissioning, operation and maintenance of BESS projects in Rajasthan and Gujarat and for that purpose has incorporated the special purpose vehicles, RBPL and GBPL in order to ensure growth through development of greenfield projects.

Sustainable and Stable Distribution Strategy

We intend to distribute at least 90% of our net distributable cashflows available to Unitholders once in every quarter. For further details, please see the section entitled "*Distribution*" on page 336.

We aim to pursue additional opportunities across transmission and BESS projects and renewable projects, in order to increase the cash available for distribution and, as a result, increase our distribution per Unit.

Our ability to grow the revenues from our asset portfolio and thereby increase the cash available for distribution and distributions per Unit, is subject to a number of factors including stable revenue generating assets.

Optimal Capital Structure

We intend to maintain a balanced capital structure and consolidated leverage to provide for a stable and predictable cash flow. Following the utilization of the Issue Proceeds, our consolidated borrowings and deferred payments net of cash and cash equivalents will be below 70% of the total value of our assets, as prescribed by the InvIT Regulations. If such borrowings and payments exceed 49%, we are required to obtain a credit rating of "AAA" or equivalent for the consolidated borrowing and proposed borrowing under the InvIT Regulations. We have been able to fulfil this criteria consistently.

We intend to consider both private and public markets for debt capital to provide the most balanced and optimal capital structure to acquire additional transmission and BESS projects and solar energy projects. We also intend to maintain appropriate risk policies to help mitigate foreign exchange and market risks.

Resilient Asset Management

In relation to our transmission assets, we aim to achieve high availability, sustain 99.5% availability throughout our operational portfolio and earn incentive revenue on a sustainable basis through a Reliability Centered Maintenance approach by deploying prudent asset management practices, conducting routine and predictive maintenance and using advanced technology, such as drones and thermo-vision scanning. We aim to ensure that our assets follow an approach centered maintenance strategy by deploying prudent asset management practices, conducting routine and predictive maintenance using advance technology, such as inverter performance heat map to monitor solar panels healthiness and the integration of the solar assets configuration on an analytics platform to assist in identifying anomalies and reinforcing preventative maintenance. We also intend to maintain rigorous performance standards for our battery energy storage systems, focusing on achieving the required Round-Trip Efficiency (RTE), ensuring high system availability, and optimising battery degradation throughout the asset life cycle.

We intend to continue applying advanced technology, underpinned by digital and predictive analysis and strengthen our O&M capabilities to better manage and operate our Portfolio Assets. For example, our DigiGrid platform which is an integrated digital asset management system is deployed across our Portfolio Assets. It enables real-time asset performance monitoring through advanced data acquisition and analytics tools. DigiGrid aggregates operational data providing a centralised dashboard for asset condition visibility. This platform supports automated alerts and data driven decision-making, facilitating a shift from traditional reactive maintenance to a predictive and preventive maintenance model. A key feature of DigiGrid is the Asset Health Index (AHI), an advanced analytical metric designed to quantify asset condition through rigorous data integration and analysis. By providing a quantitative and holistic view of asset health, the AHI enables us to prioritize maintenance activities effectively, mitigate operational risks, and extend asset lifespans. We believe that DigiGrid and the AHI exemplify our digital transformation journey, enhancing resilience, reliability, and value delivery across our Portfolio Assets.

We have also adopted periodic drone based patrolling of transmission lines. This method, using a high-resolution camera, helps conduct close-range observations and identify even the minutest defects. We believe that this enables system engineers to proactively plan and schedule maintenance and shutdowns while focusing on risk prioritization. We believe that this will improve the productivity of engineers manyfold while enhancing data accuracy.

Industry Stewardship

We intend to exercise industry stewardship by actively participating in policy-shaping and sector dialogues to deepen the private sector's role in developing, operating and financing critical infrastructure. Through constructive engagement with policymakers, regulators and industry bodies, we seek to contribute practical insights from operating platforms to support efficient, transparent and bankable frameworks that can unlock long-term private capital, enhance asset lifecycle performance and foster innovation, while maintaining high standards of governance and risk management.

In parallel, we aim to build broader visibility for IndiGrid and for InvITs more generally as credible platforms for stable, risk-adjusted infrastructure returns by pursuing thought leadership, investor education and data-led communication of performance, governance and ESG practices, thereby helping to broaden the domestic and international institutional as well as investor base.

IndiGrid Structure

IndiGrid was set up as an infrastructure investment trust under the provisions of the Indian Trust Act, 1882 on October 21, 2016 by Sterlite Electric, the erstwhile sponsor of the Trust, and is registered with SEBI pursuant to the InvIT Regulations. Esoteric II Pte. Ltd. by way of its letter dated September 8, 2020 to the Investment Manager, proposed to seek induction as a 'sponsor' of IndiGrid, in accordance with Regulation 22(7) of the InvIT Regulations. Esoteric II Pte. Ltd, was inducted as one of the sponsors of IndiGrid pursuant to the annual general meeting of IndiGrid held on September 28, 2020. Sterlite Electric was declassified as a sponsor of IndiGrid with effect from July 6, 2023. Subsequently, the name of the Trust was change from 'India Grid Trust' to 'IndiGrid Infrastructure Trust' and a revised certificate of registration dated December 9, 2024 was issued reflecting the change in name. IndiGrid Investment Managers Limited is the investment manager of IndiGrid. Further, Electron IM Pte. Ltd., an affiliate of KKR, currently owns 100% of the issued, paid-up and subscribed capital of the Investment Manager. For further details, please see the section entitled "*Parties to IndiGrid*" on page 142.

The Sponsor

Esoteric II Pte. Ltd. is the sponsor of IndiGrid. For further details, please see the section entitled "*Parties to IndiGrid – The Sponsor and Sponsor Group – Esoteric II Pte. Ltd.*" on page 142.

The Project Managers

IGL and EIPL1 are the project managers for the Portfolio Assets in accordance with the relevant IGL Project Implementation and Management Agreement and EIPL 1 Project Implementation and Management Agreement, as applicable. For further details, please see the section entitled "*Parties to IndiGrid*" on page 142.

The Investment Manager

IndiGrid Investment Managers Limited, wholly owned by Electron IM Pte. Ltd., an affiliate of KKR, is our Investment Manager and takes decisions concerning our assets for the beneficial interest of our Unitholders. The Investment Manager has overall responsibility for setting our strategic direction and deciding on the acquisition, divestment or enhancement of our assets in accordance with its stated investment strategy.

The Investment Manager has the key objective of generating sustainable income with long-term growth potential and investing in transmission and BESS projects and solar projects to provide our Unitholders with regular distributions at a competitive rate of return, in accordance with the InvIT Regulations and the Investment Management Agreement.

For further details, please see the section entitled "*Parties to IndiGrid – The Investment Manager – IndiGrid Investment Managers Limited*" on page 155.

The Trustee

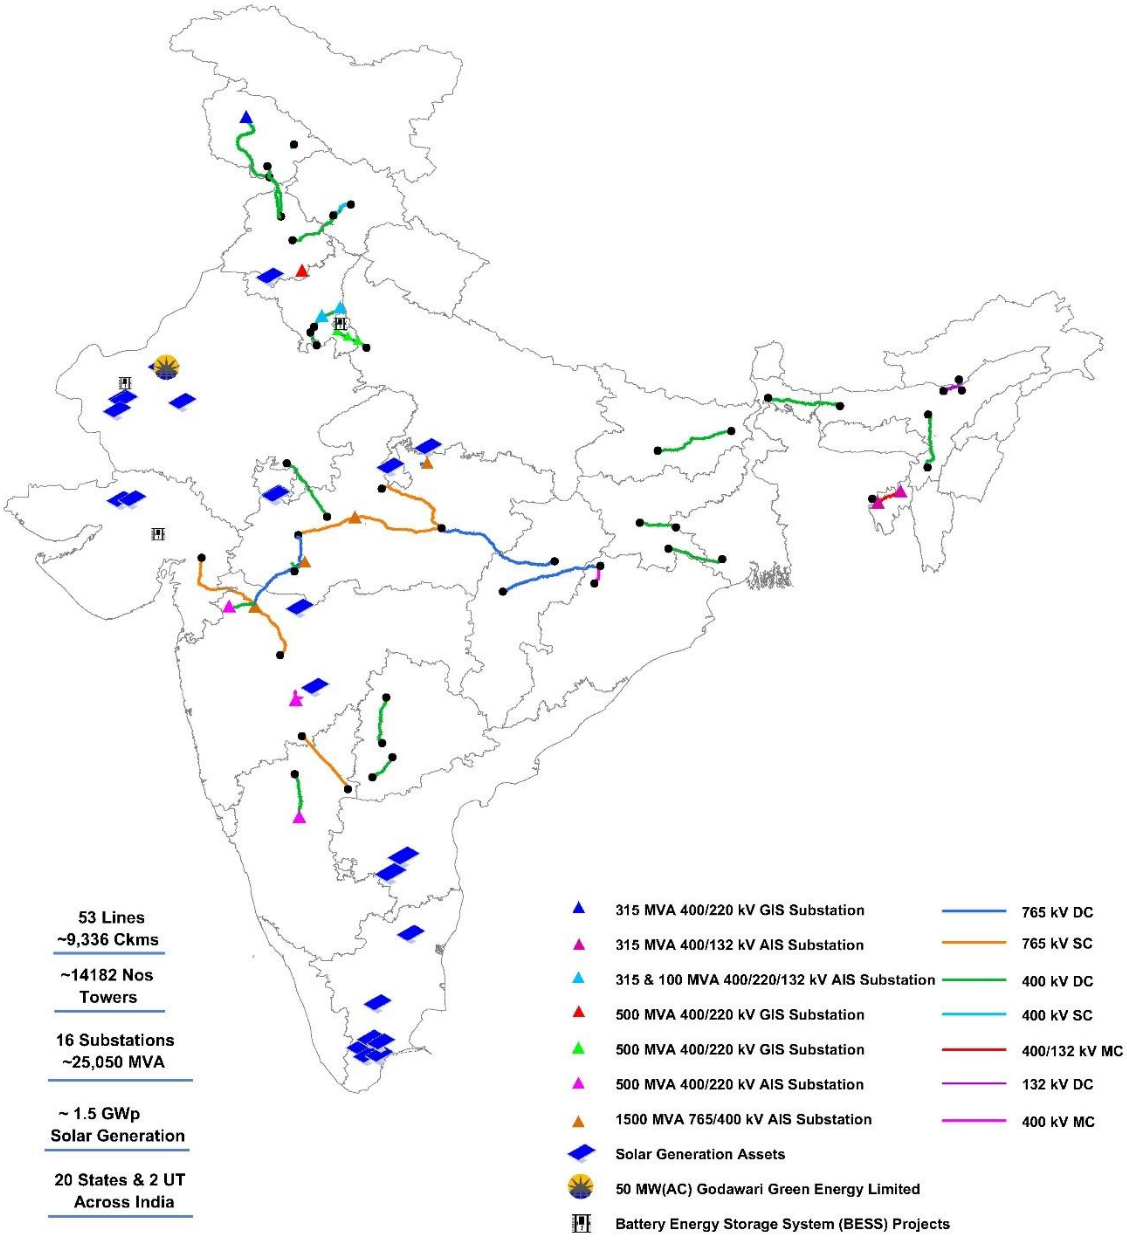
Axis Trustee Services Limited is the trustee in respect of IndiGrid. On behalf of our Unitholders, the Trustee is responsible for ensuring that our business activities and investment policies comply with the provisions of the InvIT Documents and the InvIT Regulations as well as monitoring the activities of the Investment Manager under the Investment Management Agreement and the Project Managers under the Project Implementation and Management Agreements.

For further details, please see the section entitled "*Parties to IndiGrid – The Trustee – Axis Trustee Services Limited*" on page 144.

[*Remainder of the page intentionally left blank*]

The Portfolio Assets

The Portfolio Assets comprise 45 transmission and BESS projects and solar projects located across several states in India. The following map shows the locations and breakdown of the Portfolio Assets:



The Transmission and BESS Assets

The Transmission Assets

The Transmission Assets comprise 18 operational projects and four under construction projects located across several states in India. IndiGrid owns, directly or indirectly, 100% of most of the Transmission Assets. The transmission projects consist of a total circuit length of approximately 9,336 ckms and 16 substations with approximately 22,050 MVA of transformation capacity, across 20 states and 2 union territory in India. Majority of our Transmission Assets have in place long-term TSAs of 35 years or 25 years (in case of ENICL and JKTPL) from the scheduled commercial operation date of the relevant Transmission Asset. The TSAs have a contract term of 35 years or 25 years (in case of ENICL and JKTPL) from the scheduled commercial operation date, after which we can apply to CERC for renewal, if not unilaterally extended by CERC.

Most of the Transmission Assets, were originally awarded under the TBCB mechanism on a BOOM basis. The power transmission projects earn revenue pursuant to long-term TSAs and tariff orders passed by CERC in accordance with the Electricity Act. These projects receive availability-based tariffs under the TSAs irrespective of the actual quantum of power transmitted through the line. The tariff for inter-state power transmission projects in India, including our power transmission projects, is contracted for the period of the TSA, which is up to 35 years from the scheduled commission date of the asset (other than ENICL and JKTPL for which it is 25 years), which may be renewed in accordance with the TSA and the Electricity Act. The revenues generated by intra-state transmission assets (being, JKTPL) are not dependent on a regulatory order and are dependent on tariffs as determined in terms of the relevant TSA, and such intra-state transmission assets recover tariffs equivalent to a base unitary charge which is subject to annual revisions. For further details on the TBCB mechanism and the Indian electricity transmission industry, please see the section entitled "*Industry Overview*" on page 188.

Tariffs under these TSAs are billed and collected pursuant to the PoC mechanism, a regulatory payment pooling system offered to ISTS such as the systems operated by majority of our Portfolio Assets. Under the PoC mechanism, payments are made to a central payment pool and the proceeds are distributed proportionately to all transmission services providers, such as the Portfolio Assets. The availability-based tariffs and PoC payment mechanism enable a stable and certain cash flow stream. For further details, please see the section entitled "*Industry Overview*" on page 188.

The following table sets forth a summary description of our Transmission Assets:

Project Name	**Transmission Line /Substation**	**Configuration**	**Route Length(ckms)**	**Actual commission date**	**Total transformation capacity (in MVA)**	**Expiry of the term of the TSA**
BDTCL	Bhopal – Indore	765 kV S/C transmission line	176	November 19, 2014	NA	March 2049
	Dhule – Aurangabad	765 kV S/C transmission line	192	December 5, 2014	NA	
	Dhule – Vadodara	765 kV S/C transmission line	262	June 13, 2015	NA	
	Bhopal – Jabalpur	765 kV S/C transmission line	260	June 9, 2015	NA	
	Dhule – Dhule	400 kV D/C transmission line	36	December 6, 2014	NA	
	Bhopal – Bhopal	400 kV D/C transmission line	18	August 12, 2014	NA	
	Bhopal substation	2 x 1,500 MVA 765/400 kV	-	September 30, 2014	3,000 MVA	
	Dhule substation	2 x 1,500 MVA 765/400 kV	-	December 6, 2014	3,000 MVA

***As per Central Electricity Regulatory Commission (Terms and Condition of Tariff) Regulations, 2019, effective COD for the consolidated project has to be used for the purpose of tariff determination. Based on the true up of tariff for block periods Financial Year 2014-19 and approved tariff for Financial Year 2019-24, effective COD is likely to be in Financial Year 2014-15.*
****An additional 315 MVA ICT augmentation is in progress.*

The total revenue earned by each of the operational Transmission Assets in fiscals 2025, 2024 and 2023 is set forth in the following tables. The results for the periods presented below are not necessarily indicative of the results to be expected for any future period.

All our Transmission Assets are located in strategically important areas for the electricity grid in India, which we believe makes their existence critical and their high replacement cost makes the transmission assets indispensable.

Tariff – Certain of our Portfolio Assets

Power transmission projects, including the Transmission Assets, earn revenue from electricity transmission tariffs pursuant to TSAs and tariff orders passed by CERC in accordance with the Electricity Act. These projects receive availability-based tariffs under the TSAs irrespective of the actual quantum of power transmitted through the line. The tariff for the Transmission Assets is contracted for the period of the relevant TSA, which is up to 35 years from the scheduled commission date, other than ENICL and JKTPL(for which it is for 25 years). The tariff rates are comprised of a fixed non-escalable charge, a variable escalable charge, and incentives for maintaining targeted availability. For further details, please see the section entitled "*Industry Overview*" on page 188. The following tables reflects the contracted non-escalable and escalable tariffs for our Transmission Assets remaining for the term of the applicable TSA.

[*Remainder of the page intentionally left blank*]

Non-Escalable Tariff for the majority of our Transmission Assets

The following tables reflect the non- escalable tariffs for the majority of our Transmission Assets:

(1) Includes 10.40 towards JS line commissioned in Financial Year 16, 17 and 36.87 towards SA line commissioned in Financial Year 18, 19.
(2) MTPL started commercial operations in fiscal 2018.
(3) We acquired PTCPL from TEECL and TPGCL on August 31, 2018.
** Above details do not include revenue/income from BESS project (KBPL), JKTPL and RTM Projects (Parbati, KTL, PTCPL, NTL, GPTPL & KNTL).*

Jabalpur Transmission Company Limited

JTCL was incorporated on September 8, 2009. JTCL entered into a TSA dated December 1, 2010 with the LTTCs and a TSA dated November 12, 2013 with PGCIL. The JTCL project was awarded to IGL by the Ministry of Power on January 19, 2011 for a 35-year period from the scheduled commercial operation date of the JTCL project, on a BOOM basis. We acquired JTCL from Sterlite Electric in May, 2017.

JTCL alleviates transmission capacity bottlenecks and expands the reliability and stability of the power grid in western and northern India by providing open access to transmit power from the independent power projects in the east of India. The corridors thus created are crucial links, on the basis of which the CTU has entered long-term open-access agreements with several generation companies in the eastern region of India.

JTCL operates two EHV overhead transmission lines of approximately 992 ckms in the states of Chhattisgarh and Madhya Pradesh comprising one 765 kV double circuit line of approximately 757 ckms from Dharamjaigarh (Chhattisgarh) to Jabalpur (Madhya Pradesh) and one 765 kV single circuit line of approximately 235 ckms from Jabalpur to Bina in Madhya Pradesh.

The JTCL project was fully commissioned in September 2015. The net depreciated value of the asset as of September 30, 2025 is ₹ 12,740.53 million.

Details of JTCL's transmission lines are set forth as follows:

Transmission Line	Location	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA term	Contribution to Total Tariff
Jabalpur-Dharamjaigarh	Chhattisgarh, Madhya Pradesh	757	765 kV D/C	September 14, 2015	March 31, 2049	72%
Jabalpur-Bina	Madhya Pradesh	235	765 kV S/C	July 1, 2015	March 31, 2049	28%
Total		**992**				

The average annual availability of JTCL since commissioning is set forth in the table below, which is higher than the target availability of 98% under the JTCL TSA.

As a result, JTCL earned a revenue of ₹ 761.39 million as of September 30, 2025.

As of September 30, 2025, the JTCL TSA had a remaining term of approximately 23 years 5 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, JTCL has availed a debt of ₹ 19,091.96 million from IndiGrid.

The JTCL transmission lines could not be commissioned on the scheduled commission date due to change in law and force majeure events including the amendment of the Forest Guidelines, delay in grant of forest clearance and delay in obtaining authorization under Section 164 of the Electricity Act. The delay was acknowledged by CERC following an initial petition by JTCL and the scheduled commercial operation date was revised accordingly. To compensate for the loss in revenue, JTCL filed an additional petition with CERC to quantify the increase in transmission charges. The CERC, through its order dated May 8, 2017 (in petition number 310/MP/2015) (the "**CERC Order**"), allowed an increase of 9.8903% per annum on the quoted non-escalable charges of the respective years from the date of commercial operation of the respective transmission lines on account of change in law, resulting in an increase in the cost of the project by ₹1,699.90 million (the "**Approved Cost Escalation**"). Sterlite Electric was entitled to an allotment of our Units for an amount equivalent to ₹1,359.92 million pursuant to the CERC Order, which is 80% of the Approved Cost Escalation. We allotted 13.6 million Units to the erstwhile project manager, which was the same entity as Sterlite Electric at an issue price of ₹ 100 per Unit on October 26, 2017.

Bhopal Dhule Transmission Company Limited

BDTCL was incorporated on September 8, 2009. BDTCL entered into a TSA dated December 7, 2010 with the LTTC and a TSA dated November 12, 2013 with CTUIL. The BDTCL project was awarded to IGL by the Ministry of Power on January 31, 2011 for a 35-year period from the scheduled commercial operation date of the BDTCL project, on a BOOM basis. We acquired BDTCL from Sterlite Electric in May, 2017.

BDTCL facilitates the transfer of electricity from coal-fired power generation sources from the states of Odisha and Chhattisgarh to power load centers in India's western and northern regions. As our largest transmission project, BDTCL operates six EHV overhead transmission lines of approximately 945 ckms comprising four 765 kV single circuit lines of approximately 891 ckms and two 400 kV double circuit lines of approximately 53 ckms. The single circuit lines comprise an approximately 260 ckms line from Bhopal to Jabalpur in Madhya Pradesh, an approximately 176 ckms line from Bhopal to Indore in Madhya Pradesh, an approximately 192 ckms line from Aurangabad to Dhule in Maharashtra and an approximately 263 ckms line from Dhule (Maharashtra) to Vadodara (Gujarat). The double circuit lines consist of an approximately 36 ckms line within Dhule and an approximately 17 ckms line within Bhopal. In addition, the project includes two 3,000 MVA substations, one each in Bhopal and Dhule.

BDTCL was fully commissioned in June 2015. The net depreciated value of the asset as of September 30, 2025 is ₹ 13,831.13 million.

BDTCL was awarded a Silver Shield for the year 2013-2014 in the category of "Early Completion of Transmission Projects" by the Ministry of Power for its Dhule substation.

Details of BDTCL's transmission lines and substations are set forth as follows:

Transmission Line / Substation	Route Length (ckms)	Specifications	Commission Date	Expiry term of TSA	Contribution to Total Tariff
Bhopal— Jabalpur	260	765 kV S/C	June 9, 2015	March 31, 2049	22%
Bhopal—Indore	176	765 kV S/C	November 19, 2014	March 31, 2049	12%
Bhopal—Bhopal (MPPTCL)	18	400 kV D/C	August 12, 2014	March 31, 2049	2%
Aurangabad—Dhule (IPTC)	192	765 kV S/C	December 5, 2014	March 31, 2049	10%
Dhule (IPTC)—Vadodara	262	765 kV S/C	June 13, 2015	March 31, 2049	16%
Dhule (IPTC)—Dhule (MSETCL)	36	400 kV D/C	December 6, 2014	March 31, 2049	4%
Bhopal Substation	—	2 x 1,500 MVA 765/400 kV	September 30, 2014	March 31, 2049	17%
Dhule Substation	—	2 x 1,500 MVA 765/400 kV	December 6, 2014	March 31, 2049	17%

The average annual availability of BDTCL since commissioning is set forth in the table below, which, for majority of the years, is higher than the target availability of 98% under the BDTCL TSA.

As a result, BDTCL earned a revenue of ₹ 960.96 million as of September 30, 2025.

As of September 30, 2025, the BDTCL TSA had a remaining term of over 23 years 6 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, BDTCL has availed a debt of ₹ 16,905.59 million from IndiGrid.

The BDTCL transmission lines could not be commissioned on their scheduled commission dates due to change in law and force majeure events, including the amendment of Forest Guidelines, delay in grant of forest clearance, delay in receiving authorisation under Section 164 of the Electricity Act, delay in allotment of land for the construction of the Bhopal substation and change in applicable rates of taxes. The delay was acknowledged by CERC and the scheduled commercial operation date was revised accordingly. To compensate for the loss in revenue, BDTCL filed a tariff revision petition with CERC, pursuant to which the CERC through its order dated June 25, 2018 sought further documents to establish BDTCL's claim in respect of cost escalation. Thereafter, BDTCL filed a consequential petition, claiming monetary relief resulting from the change in law pursuant to the CERC Order. CERC vide its order dated April 24, 2019 ("**Second CERC Order**") rejected the relief and subsequential carrying cost. Aggrieved by the Second CERC Order, BDTCL filed an appeal before APTEL on June 4, 2019 to claim the amount of interest during construction and subsequential carrying cost. APTEL by way of its order dated October 20, 2020 allowed the appeal filed by BDTCL. The estimated amount involved in this matter is ₹ 840.01 million. The matter is currently pending. For further details, please see the section entitled "*Litigation*" on page 379.

BDTCL had its 765 KV S/C Bhopal – Indore transmission line rendered inoperable for 51 days in fiscal 2015 when gale force winds damaged a transmission tower. BDTCL obtained a deemed availability certificate from CERC to receive tariffs for this period and substantially all of the repair and restoration costs were covered by Sterlite Electric's insurance.

Purulia & Kharagpur Transmission Company Limited

PKTCL was incorporated on December 15, 2012. PKTCL entered into a TSA on December 22, 2015 with PGCIL and a TSA dated August 6, 2013 with the LTTCs. The PKTCL project was awarded by the Ministry of Power on September 17, 2013 for a 35-year period from the scheduled commercial operation date of the PKTCL project, on a BOOM basis. We acquired PKTCL from Sterlite Electric in February, 2018.

PKTCL supports the interconnection of the West Bengal state grid and the ISTS and facilitates the exchange of additional power between them. PKTCL was established to strengthen the transmission system in the states of West Bengal and Jharkhand.

PKTCL operates two EHV overhead transmission lines with a total circuit length of approximately 545 ckms in the states of West Bengal and Jharkhand, comprising one 400 kV D/C line of approximately 322 ckms from Kharagpur (West Bengal) to Chaibasa (Jharkhand) and one 400 kV D/C line of approximately 223 ckms from Purulia (West Bengal) to Ranchi (Jharkhand).

The Kharagpur-Chaibasa 400 kV D/C transmission line was commissioned in June 2016, while the Purulia – Ranchi 400 kV D/C transmission line was commissioned in January 2017. The project was fully commissioned in January 2017. The net depreciated value of the asset as of September 30, 2025 is ₹ 3,118.19 million.

Details of PKTCL's transmission lines are set forth as follows:

Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of term of TSA	Contribution to Total Tariff
Kharagpur (WBSETCL)—Chaibasa (PG)	322	400 kV D/C	June 18, 2016	April 19, 2051	54%
Purulia PSP (WB)—Ranchi PG	223	400 kV D/C	January 7, 2017	April 19, 2051	46%

The average annual availability of PKTCL since commissioning is set forth in the following table, which is higher than the target availability of 98% under the PKTCL TSA.

As a result PKTCL earned a revenue of ₹ 374.55 million as of September 30, 2025.

As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, PKTCL has availed a debt of ₹ 2,784.54 million from IndiGrid. As of September 30, 2025, the PKTCL TSA had a remaining term of over 25 years 6 months.

Pursuant to CERC's order dated January 4, 2017 (the "**CERC Order**"), Punjab State Power Corporation Limited ("PSPCL") had been held liable to pay transmission charges of the PTCPL Project from scheduled commercial operation date or actual commission date, whichever is later, until commissioning of downstream system by PSPCL. PSPCL completed commissioning of downstream system on May 19, 2017 after substantial delay. PSPCL failed to pay liquidated dues of ₹ 113.67 million. Further, PSPCL has defaulted in making payment of ₹ 102.51 million as per notification no L-1/42/2010 passed by CERC dated September 28, 2010. Accordingly, PTCPL issued a "notice for regulation of power supply" dated July 6, 2017 to PSPCL for regulation of power supply unless dues are cleared by PSPCL by July 13, 2017. PSPCL filed an appeal before the Appellate Tribunal for Electricity ("Tribunal") challenging the CERC Order. The Tribunal dismissed the appeal through its order dated March 27, 2018 (the "**APTEL Order**"). PSPCL has subsequently filed an appeal before the Supreme Court of India against the APTEL Order. The estimated amount in this matter is ₹ 130 million. The matter is currently pending. For further details, please see the section entitled "*Litigation*" on page 379.

RAPP Transmission Company Limited

RTCL was incorporated on December 20, 2012. RTCL entered into a TSA on July 24, 2013 with LTTCs and a TSA dated December 22, 2015 with CTUIL. The RTCL project was awarded by the Ministry of Power on September 17, 2013 for a 35-year period from the scheduled commercial operation date of the RTCL project, on a BOOM basis. As of the date of this Placement Document, IndiGrid indirectly holds 100% of the paid-up share capital of RTCL. RTCL facilitates the strengthening of the transmission capability between the northern and western sectors of India's power grid by evacuating electricity from an atomic power plant near Kota in Rajasthan to central Madhya Pradesh. The project was undertaken in conjunction with the Rajasthan Atomic Power Project established by Nuclear Power Corporation of India.

RTCL operates one EHV overhead transmission line of approximately 403 ckms in the states of Rajasthan and Madhya Pradesh, comprised of one 400 kV D/C line from Rajasthan to Madhya Pradesh.

The project was fully commissioned in November 11, 2016. The net depreciated value of the asset as of September 30, 2025 is ₹ 1,772.47 million.

Details of RTCL's transmission line are set forth as follows:

Transmission Line	Route length (ckms)	Specifications	Commission Date	Expiry of term of TSA	Contribution to Total Tariff
RAPP—Shujalpur	403	400 kV D/C	March 1, 2016	February 2051	100%

The average annual availability of RTCL since commissioning is set forth in the following table, which is higher than the target availability of 98% under the RTCL TSA.

As a result, RTCL earned a revenue of ₹ 227.64 million as of September 30, 2025.

As of September 30, 2025, the RTCL TSA had a remaining term of approximately 25 years 5 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, RTCL has availed a debt of ₹ 1,557.88 million from IndiGrid.

RTCL filed a petition dated March 11, 2016 under Section 79(1)(f) read with Section 79(1)(c) of the Electricity Act seeking payment of monthly transmission charges for the period starting from December 26, 2015 under the RTCL TSA and the revenue sharing agreement and the order dated July 15, 2015 issued by the Ministry of Power entitled "Policy for Incentivizing Early Commissioning of Transmission Projects" under which RTCL contended that it is entitled to the payment of monthly transmission charges from the actual date of commercial operation, December 26, 2015, which is in advance of the scheduled commercial operation date of February 2016. CERC, by its order dated September 21, 2016 declared that RTCL was entitled to the payment of transmission charges accrued from the scheduled commercial operation date until bays are developed by the Nuclear Power Corporation of India Limited ("**NPCIL**"). NPCIL filed an application to stay the CERC order on November 4, 2016 before the Appellate Tribunal for Electricity which has been replied to by RTCL. Through an order passed on January 18, 2019 (the "**Order**"), APTEL dismissed the Interim Application. APTEL also granted liberty to RTCL to regulate the power supply of NPCIL if NPCIL failed to make the payment within 30 days of the Order. RTCL has accordingly sent letters to NPCIL for the disbursement of the withheld amounts along with applicable charges. NPCIL has filed an appeal before the Supreme Court of India against the Order and RTCL has filed the counter affidavit on August 27, 2019. The estimated amount involved in this matter is ₹ 280 million. For further details, please see the section entitled "*Litigation*" on page 379.

Maheshwaram Transmission Private Limited

MTPL was incorporated on August 14, 2014. MTPL entered into a TSA dated June 10, 2015 with LTTCs, a TSA dated April 27, 2017 with PGCIL and a RSA dated April 27, 2017 with PGCIL. The MTPL project was awarded by the Ministry of Power on July 21, 2015 for a 35-year period from the scheduled commercial operation date of the MTPL project, on a BOOM basis. As of the date of this Placement Document, IndiGrid indirectly holds 100% of the paid-up share capital of MTPL.

MTPL constitutes a key component in enabling the southern region of India to draw more power from the rest of the grid and seeks to address the issue of power stability in the state of Telangana. This improved grid connectivity is expected to facilitate power procurement from the ISTS network to meet electricity demands in south India.

MTPL operates two EHV overhead transmission lines with a total circuit length of approximately 477 ckms in the state of Telangana, comprising one 400kV D/C line of approximately 197 ckms from Maheshwaram to Mehboob Nagar in Telangana and one 400kV D/C line of approximately 279 ckms from Nizamabad to Yeddumailaram in Telangana. MTPL also has four 400kV line bays.

The Maheshwaram – Mehboob Nagar 400 kV D/C transmission line was commissioned on December 14, 2017, while the Nizamabad – Yeddumailaram 400 kV D/C transmission line was commissioned on October 14, 2017. The project was fully commissioned on December 14, 2017. The net depreciated value of the asset as of September 30, 2025 is ₹ 2,918.63 million.

Details of MTPL's transmission lines and line bays are set forth as follows:

Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term	Contribution to Total Tariff
Maheshwaram (PG)—Mehboobnagar	197	400 kV D/C	December 14, 2017	June 14, 2053	35%
2 Nos. of 400 kV line bays at Mehboob Nagar S/S of TSTRANSCO	-	-	-		
Nizamabad—Yeddumailaram (Shankarpalli)	279	400 kV D/C	October 14, 2017	October 14, 2053	65%
2 Nos. of 400kV line bays at Yeddumailaram (Shankarpalli) S/S of TSTRANSCO	-	-	-		

The average annual availability of MTPL since commissioning is set forth in the following table, which is higher than the target availability of 98% under the MTPL TSA.

As a result, MTPL earned a revenue of ₹ 290.14 million as of September 30, 2025.

As of September 30, 2025, the MTPL TSA had a remaining term of over 27 years 3 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, MTPL has availed a debt of ₹ 3,943.81 million from IndiGrid.

Patran Transmission Company Private Limited

PTCPL was incorporated on December 19, 2012. PTCPL entered into a TSA on May 12, 2014 with PGCIL. The PTCPL project was awarded by the Ministry of Power to TEECL and TPGCL through a letter of intent dated September 8, 2013 for a 35-year period from the scheduled commercial operation date of the PTCPL project, on a BOOM basis. As of the date of this Placement Document, IndiGrid indirectly holds 100% of the paid-up share capital of PTCPL. As a result, we now own PTCPL's one substation having 1,500 MVA of transformation capacity.

PTCPL constitutes a key component in strengthening the power transmission system in the state of Punjab. PTCPL operates one 400 kV D/C line from Patiala to Kaithal in Punjab and has a 1500 MVA, 400/220 kV substation at Patran and 14 kV line bays.

The Patiala – Kaithal 400 kV D/C transmission line was commissioned in November 2016. PTCPL was fully commissioned in November 11, 2016. The net depreciated value of the asset as of September 30, 2025 is ₹ 1,677.61 million.

Details of PTCPL's transmission lines are set forth as follows:

Transmission Line / Substations	Route Length (ckms)	Specifications	Commission Date	Expiry of term of the TSA	Contribution to Total Tariff
Patiala—Kaithal	-	400 kV D/C	November 11, 2016	November 11, 2051	-
Patran substation	-	2*500MVA, 400/220kV Substation at Patran with; i. 6 nos 400kV Bays ii. 8 nos 220kV Bays	November 11, 2016	November 11, 2051	100%

Further, CTUIL, on November 28, 2022, awarded PTCPL the ISTS project under the Regulated Tariff Mechanism ("**RTM**") for the augmentation of transformation capacity by 1x500 MV, 400/220kV ICT at 400/220kV Patran substation.

The average annual availability of PTCPL since commissioning is set forth in the table below, which is higher than the target availability of 98% under the PTCPL TSA.

As a result, PTCPL earned a revenue of ₹ 256.90 million as of September 30, 2025.

As of September 30, 2025, the PTCPL TSA had a remaining term of over 26 years 2 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, PTCPL has availed a debt of ₹ 1,957.06 million from IndiGrid.

PTCPL has filed before CERC under Section 62 petition read with Sections 79(1)(c) & (d) of the Electricity Act, 2003 read with Regulation 15(1)(a) of the CERC (Conduct of Business) Regulations, 2023, and the applicable provisions of the CERC (Terms and Conditions of Tariff) Regulations, 2024 for determination of transmission tariff from Commercial Operation that is December 29, 2024 to March 31, 2029. The matter is currently pending.

NRSS XXIX Transmission Limited

NTL was incorporated on July 29, 2013. NTL entered into a TSA dated January 2, 2014 with LTTCs and a TSA dated December 22, 2015 with PGCIL. The NTL project was awarded by the Ministry of Power on May 23, 2014 for a 35-year period from the scheduled commercial operation date of the NTL project, on a BOOM basis. We acquired NTL from Sterlite Electric in June, 2019.

The NTL project was expected to deliver over 2,000 MW of electricity from Punjab to the Kashmir Valley by strengthening the transmission system in the states of Jammu and Kashmir and Punjab.

The Jalandhar-Samba 400 kV D/C transmission line was commissioned in June 24, 2016 and the Uri-Wagoora transmission line was commissioned on September 1, 2018. The project was fully commissioned in September 2018. The net depreciated value of the asset as of September 30, 2025 is ₹ 22,057.64 million.

Details of NTL’s transmission lines and substations are set forth as follows:

Transmission Line / Substation	Route Length (ckms)	Specifications	Commissioned Date	Expiry of TSA term	Contribution to Total Tariff
Jalandhar—Samba	270	400 kV D/C	June 24, 2016	September 2053	22.1%
Samba—Amargarh	547	400 kV D/C	September 1, 2018	September 2053	77.9%

Transmission Line / Substation	Route Length (ckms)	Specifications	Commissioned Date	Expiry of TSA term	Contribution to Total Tariff
Jalandhar—Samba	270	400 kV D/C	June 24, 2016	September 2053	22.1%
Uri—Wagoora	14		September 1, 2018	September 2053	77.9%
Amargarh Substation	—	400/220 kV D/C GIS Substation with 735 MVA of transformation capacity	September 2, 2018	September 2053	

Further, CTUIL, on April 21, 2023, awarded NTL the ISTS project under the Regulated Tariff Mechanism ("**RTM**") for the augmentation of transformation capacity at Amargarh substation by 1x315 MVA, 400/220kV ICT.

The average annual availability of NTL since commissioning is set forth in the table below, which, for majority of the years, is higher than the target availability of 98% under the NTL TSA.

As a result, NTL earned a revenue of ₹ 2,587.68 million as of September 30, 2025.

As of September 30, 2025, the NTL TSA had a remaining term of over 27 years 11 months.As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, NTL has availed a debt of ₹ 20,131.56 million from IndiGrid.

NTL filed a petition dated June 22, 2016 under Section 79(1)(f) read with Section 79(1)(c) of the Electricity Act against PGCIL (in its capacity as a Central Transmission Utility) and the lead long term customers before the CERC seeking payment of monthly transmission charges for the period starting from April 7, 2016 under the NTL TSA and an order dated July 15, 2015 issued by the Ministry of Power entitled "Policy for Incentivizing Early Commissioning of Transmission Projects" under which NTL is entitled to the payment of monthly transmission charges from the actual date of commercial operation, April 7, 2016, which is in advance of the scheduled commercial operation date of June 3, 2017. Pursuant to CERC's order, NTL received tariffs for the stated period for the Jalandhar-Samba line, after which, NTL withdrew its petition.

Odisha Generation Phase - II Transmission Limited

OGPTL was incorporated on April 17, 2015. OGPTL entered into a TSA dated November 20, 2015 with LTTCs and a TSA dated April 27, 2017 with PGCIL. The OGPTL project was awarded by the Ministry of Power on January 6, 2016 for a 35-year period from the scheduled commercial operation date of the OGPTL project, on a BOOM basis. We acquired OGPTL from Sterlite Electric in July, 2019.

The Jharsuguda-OPGC 400kV D/C transmission line was commissioned in August 2017 and Raipur- Jharsuguda line was commissioned in April, 2019. OGPTL was fully commissioned on April 6, 2017. The net depreciated value of the asset as of September 30, 2025 is ₹ 9,792.22 million.

Details of OGPTL's transmission lines are set forth as follows:

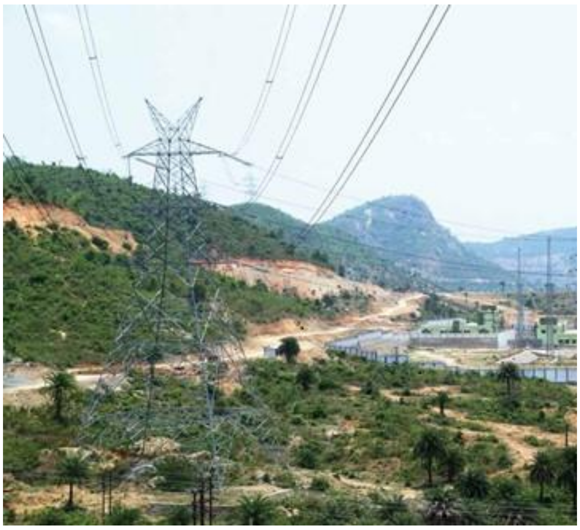
Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term	Contribution to Total Tariff
Raipur – Jharsuguda	608	765kV D/C	April 6, 2019	August 2054	94%
Jharsuguda – OPGC	103	400 kV D/C	August 30, 2017	July 2052	6%

The average annual availability of OGPTL since commissioning is set forth in the table below, which is higher than the target availability of 98% under the OGPTL TSA.

As a result, OGPTL earned a revenue of ₹ 749.59 million as of September 30, 2025.

As of September 30, 2025, the OGPTL TSA had a remaining term of over 28 years 6 months.As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, OGPTL has availed a debt of ₹ 10,901.24 million from IndiGrid.

East-North Interconnection Company Limited



ENICL was incorporated on February 1, 2007. ENICL entered into a TSA dated August 6, 2009 with the LTTC and a TSA dated January 28, 2013 with PGCIL. The ENICL project was awarded by the Ministry of Power on January 7, 2010 for a 25-year period from the date of issue of the license by CERC, on a BOOM basis. We acquired ENICL from Sterlite Electric in May, 2020.

ENICL operates two EHV overhead transmission lines of approximately 909 ckms in the states of Assam, Bihar and West Bengal, comprising one 400 kV D/C line of approximately 443 ckms from Bongaigaon (Assam) to Siliguri (West Bengal) and one 400 kV D/C line of approximately 466 ckms from Purnia (Bihar) to Biharsharif (Bihar).

The project was fully commissioned in November 2014. The net depreciated value of the asset as of September 30, 2025 is ₹ 6,457.81 million.

Details of ENICL's transmission lines are set forth as follows:

Transmission Line	Route Length (ckms)	Specifications	Commission Date	Contribution to Total Tariff
Bongaigaon-Siliguri	443	400 kV D/C	November 12, 2014	52%
Purnia-Biharsharif	466	400 kV D/C	September 16, 2013	48%

The average annual availability of ENICL since commissioning is set forth in the table below, which is higher than the target availability of 98% under the ENICL TSA.

As a result, ENICL earned a revenue of ₹ 759.05 million as of September 30, 2025.

As of September 30, 2025, the ENICL TSA had a remaining term of over 14 years and 2 months.As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, ENICL has availed a debt of ₹ 7,753.73 million from IndiGrid.

ENICL filed an appeal against PGCIL, CERC and 17 others ("**Respondents**") before APTEL, for quashing an order passed by CERC dated October 9, 2018 ("**CERC Order**"), directing ENICL to pay of transmission charges ("**Transmission Charges**") for a period when ENICL's projects were effected by force majeure events. The CERC Order directed ENICL to pay PGCIL the interest during construction ("**IDC**") and incidental expenditure during construction ("**IEDC**") for PGCIL's assets, namely two 400 kV line bays (for 400 kV D/C Siliguri-Bongaigaon transmission line) along with two 80 MVAR switchable line reactors at the 400 kV Siliguri sub-station, and two 400 kV line bays (for 400 kV D/C Siliguri-Bongaigaon transmission line) at the Bongaingaon sub-station from May 1, 2013 till the commissioning of ENICL's transmission elements, which are interconnected with PGCIL's transmission elements. ENICL has alleged that since its assets were affected by force majeure events during the said period, it should not be liable to pay the IDC and IEDC amounts. The estimated amount involved in this matter is ₹ 5.20 million. The matter is currently pending.

ENICL's 400 kV D/C line from Purnia to Biharsharif were inoperable from August, 2018, to December 29, 2019 when flooding damaged a transmission tower due to erosion of the river bank. A similar incident happened in the past, when the line was inoperable from August 2016 to July 2017, on account of damage to a transmission tower due to flooding. ENICL obtained deemed availability certificates from August 2016 to July 2017.

Gurgaon-Palwal Transmission Private Limited ("GPTPL")

GPTPL was incorporated on October 26, 2015. GPTPL entered into a TSA dated March 4, 2016 with LTTCs and a revenue sharing agreement with PGCIL dated April 27, 2017. The GPTPL project was awarded by the Ministry of Power on March 17, 2016 for a 35-year period from the scheduled commercial operation date of the GPTPL project, on a BOOM basis.

GPTPL was fully commissioned in April 13, 2020. The net depreciated value of the asset as of September 30, 2025 is ₹ 8,536.84 million.

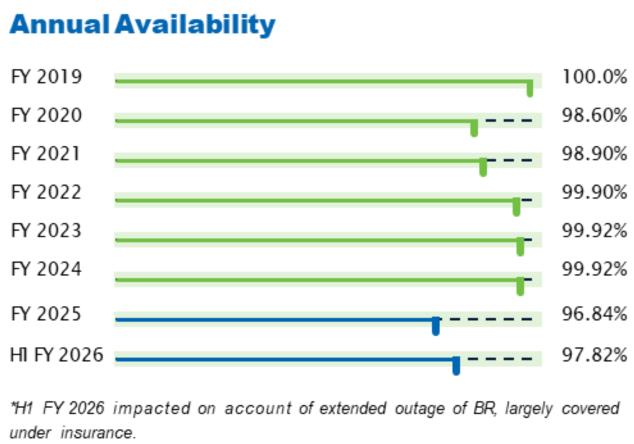
Details of GPTPL's transmission lines, substations and line bays are set forth as follows:

Transmission Line / Substations	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term	Contribution to Total Tariff
Aligarh - Prithala	99	400 kV D/C HTLS line	August 06, 2019	July 2054	17.5%
Prithala – Kadarpur	58	400 kV D/C HTLS line	December 7, 2019	July 2054	8.5%
Kadarpur-Sohna Road	21	400 kV D/C HTLS line	March 21, 2020	July 2054	1.3%
LILO of Gurgaon Manesar	1	400 kV D/C Quad line	March 13, 2020	July 2054	0.75%
Neemrana – Dhonanda	93	400 kV D/C HTLS line	February 25, 2019	July 2054	12.55%
Kadarpur substation	-	400/220 kV, 2 x 500 MVA	December 11, 2019	July 2054	19.3%
Sohna Road substation	-	400/220 kV, 2 x 500 MVA	April 13, 2020	July 2054	20%
Prithala substation	-	400/220 kV, 2 x 500 MVA	August 8, 2019(1)	July 2054	19.3%
Dhonanda substation	-	Two 400 kV line bays	February 25, 2019	July 2054	0.8%

(1) Deemed commission date.

Further, CTUIL, on June 24, 2022, awarded GPTPL the ISTS project under the Regulated Tariff Mechanism ("**RTM**") for the implementation of 22 kV line bays (GIS) at 400/22kV Prithla substation.

The average annual availability of GPTPL since commissioning is set forth in the table below, which, for majority of the years, is higher than the target availability of 98% under the GPTPL TSA.



As a result, GPTPL earned a revenue of ₹ 632.55 million as of September 30, 2025.

As of September 30, 2025, the GPTPL TSA had a remaining term of over 28 years 10 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, GPTPL has availed a debt of ₹ 9,943.28 million from IndiGrid.

Jhajjar KT Transco Private Limited ("JKTPL")

JKTPL was incorporated on May 19, 2010. JKTPL entered into a TSA dated May 28, 2010 with HVPNL. Based on the competitive bidding process conducted by HVPNL, PTL and TEECL were awarded the JKPTL project through public private partnership on design, build, finance, operate and transfer basis with viability gap funding. HVPNL has granted JKTPL the concession, including the exclusive right and authority to construct, operate and maintain the JKTPL project and to provide transmission services, for an initial period of 25 years with effect from November 9, 2010, being the appointed date, unless extended by HVPNL. In October 2020, we completed the acquisition of 100% of the equity shares of JKTPL from KPTL and TEECL.

JKTPL was fully commissioned on March 12, 2012. The net depreciated value of the asset as of September 30, 2025 is ₹ 1.30 million.

Details of the JKTPL's transmission lines are set forth as follows:

Transmission Line / Substation	Route Length (ckms)	Specifications	Commissioned Date	Expiry of TSA term
Jharli (Jhajjar) -Kabulpur (Rohtak)	70	400 kV	March 12, 2012	25 years from the appointed date - November 9, 2035
Kbulpur (Rohtak) -Dipalpur (Sonepat)	134	400 kV	March 12, 2012	
Dipalpur substation Abdullapur - Bawana line	0.7	400 kV S/C loop in loop out line at 400kV substation Dipalpur of 400 kV D/C line at from Abdullapur-Bawana	March 12, 2012	
Kabulpur (Rohtak) substation	-	400 kV/220 kV/ 132 kV, 830 MVA	March 12, 2012	
Dipalpur (Sonepat) substation	-	400 kV/220 kV/ 132 kV, 830 MVA	March 12, 2012	

The average annual availability of JKTPL since commissioning is set forth in the table below, which, for majority of the years, is higher than the target availability of 98% under the JKTPL TSA.

*H1 FY 2026 impacted on account of extended outage of ICT, covered under insurance.

As a result, JKTPL earned a revenue of ₹ 103.07 million as of September 30, 2025.

As of September 30, 2025, the JKTPL TSA had a remaining term of over 10 years 2 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, JKTPL has availed a debt of ₹ 1,203.18 million from IndiGrid.

Parbati Koldam Transmission Company Limited ("PrKTCL")

PrKTCL was incorporated on September 2, 2002. PrKTCL has entered into various bulk power transmission agreements with (i) Punjab State Electricity Board on December 17, 2008, (ii) Ajmer Vidyut Vitran Nigam Limited on November 27, 2008, (iii) BSES Rajdhani Power Limited on November 24, 2008, (iv) BSES Yamuna Power Limited on November 24, 2008, (v) President of India through Secretary Engineering Department of Chandigarh, Administration having its office at U.T. Sectt., Deluxe Building, Sector 9-D, Chandigarh 160 009, on January 7, 2009, (vi) Haryana Power Purchase Centre on behalf of Uttar Haryana Vidyut Vitran Nigam Limited and Dakshin Haryana Vidyut Vitran Nigam Limited, on December 3, 2008, (vii) Himachal Pradesh State Electricity Board on January 20, 2009, (viii) Power Development Department, Government of Jammu and Kashmir on May 19, 2009, (ix) Jodhpur Vidyut Vitran Nigam Limited on December 11, 2008, (x) Jaipur Vidyut Vitran Nigam Limited on November 27, 2008, (xi) North Delhi Power Limited on January 5, 2009, (xii) Uttar Pradesh Power Corporation Limited on December 12, 2008, and (xiii) Uttarakhand Power Corporation Limited on April 2, 2009 (collectively, "**PrKTCL BPTA**"). Further, PrKTCL entered into a transmission service agreement and revenue sharing agreement with PGCIL dated December 24, 2013. PGCIL had incorporated PrKTCL as a special purpose vehicle to maintain the PrKTCL project on BOO basis, i.e. to be maintained on a perpetual basis by the shareholders of the project. The transmission license was granted to PrKTCL for a period of 25 years on September 15, 2008. PrKTCL, under CERC (Terms and Conditions of Tariff) Regulations, 2019 is eligible to receive tariff for a period of 35 years from the date of commissioning of the project elements. In January, 2020, we completed the acquisition of 74 % of the equity shares of PrKTCL from Reliance Infrastructure Limited. As of the date of this Placement Document, IndiGrid holds 74% of the share capital of PrKTCL.

PrKTCL operates three transmission lines, subdivided into various revenue generating elements, with a total circuit length of has approximately 458 ckms of 400 kV transmission lines and substations, including, Koldam - Ludhiana line, with a length of 301 ckms, LILO of Parbati III HEP to LILO of Parbati Pooling Station line, with a length of 3.5 ckms, Banala to Nalagarh line, with a length of 66 ckms, Banala to Koldam line, with a length of 63 ckms, Parbati II to Banala line, with a length of 14 ckms, and Parbati II to Parbati III line, with a length of 10 ckms, as a part of the transmission system to evacuate power from the Parbati – II, Parbati – III and Koldam hydel power projects.

The project was fully commissioned on November 3, 2015. The net depreciated value of the asset as of September 30, 2025 is ₹ 5,026.47 million.

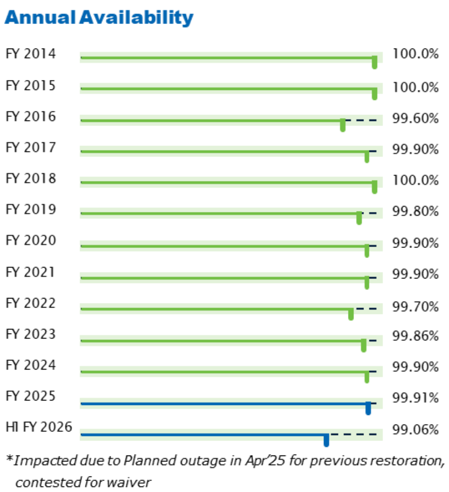
Details of PrKTCL's transmission lines and line bays are set forth as follows:

Transmission Line / Substations	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term
LILO point of Parbati III HEP to LILO point of Parbati Pooling Station	400 kV S/C, Quad Bundle Line, Section of CKt-II of Parbati-II to Koldam Transmission Scheme	3.5	August 01, 2013	35 years from COD i.e. FY 2049-50, as per CERC (Terms and Condition of Tariff) Regulations, 2019
Banala – Nalagarh	400 kV S/C along with D/C Quad Bundle Line, Part of Ckt-I of Parbati-II – Koldam Transmission Scheme starting from LILO point of Banala Pooling Station to Tower 9C of Ckt-I of Koldam – Nalagarh TL	66	October 10, 2014	
Banala - Koldam	400 kV S/C alongwith D/C Quad Bundle Line, Part of Ckt-II of Parbati-II – Koldam Transmission Scheme starting from LILO point of Banala Pooling Station to Tower 9E of Ckt-I of Koldam – Nalagarh TL	63	October 4, 2014	

Transmission Line / Substations	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term
Parbati-II – Banala	400 kV S/C alongwith D/C Quad Bundle Line, Part of Ckt-I of Parbati-II – Koldam Transmission Scheme starting from Parbati-II HEP to LILO point of Banala Pooling Station	14	November 3, 2015*	
Parbati-II – Parbati-III	400 kV S/C alongwith D/C Quad Bundle Line, Part of Ckt-I of Parbati-II – Koldam Transmission Scheme starting from Parbati-II HEP to LILO point of Parbati-III HEP (Post commissioning of Sainj HEP of HPPCL this section has been connected at Loc.#2 forming Parbati-II – Sainj and Sainj – Parbati-III Sections)	10	November 3, 2015*	
Koldam – Ludhiana	400 kV D/C, Triple Bundle Line.	301	Ckt-I: August 7, 2014 Ckt-II: April 1, 2015	

** The transmission line elements have been claimed as commissioned with effect from July 1, 2015 as per the CERC Tariff Petition.*

The average annual availability of PrKTCL since commissioning is set forth in the table below, which is higher than the target availability of 98% under the PrKTCL TSA:



As a result, PrKTCL earned a revenue of ₹ 414.65 million as of September 30, 2025.

As of September 30, 2025, the PrKTCL TSA had a remaining term of over 24 years. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, PrKTCL has availed a debt of ₹ 1,527.65 million from IndiGrid.

NER II Transmission Limited ("NER")

NER was incorporated on April 21, 2015. NER entered into a TSA dated December 27, 2016 with the LTTCs. The NER project was awarded by the Ministry of Power on February 22, 2017 for a 35-year period from the scheduled commercial operation date of the NER project, on a BOOM basis. The NER project is located in the state of Tripura, Assam and Arunachal Pradesh.

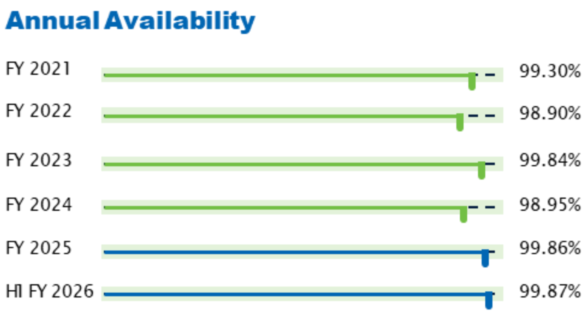
NER operates three 132kV D/C lines (AGTPP – P.K. Bari, BNC & LILO) two 400kV D/C transmission lines, two 400/132kV (2*315) MVA substations, one 400kV bay extension at Palatana, and three 132kV bay extensions at Itanagar, NEEPCO & P.K. Bari.

NER was fully commissioned on April 6, 2021. The net depreciated value of the asset as of September 30, 2025 is ₹ 26,103.46 million.

Details of NER's transmission lines, substations and line bays are set forth as follows:

Transmission line/Sub-station	Location	Route length (ckms)	Specifications	Actual commissioning Date
BNC – Itanagar	Assam, Arunachal Pradesh	132 kV DC	136	April 6, 2021
LILO of Biswanath Chariali (PG) – Itanagar	Arunachal Pradesh	132 kV DC	18	April 6, 2021
Line bays at Itanagar substation	Arunachal Pradesh	2 No. of line bays 132 KV	NA	April 6, 2021
Silchar – Misa	Assam	400 kV DC	357	February 26, 2021
Surajmaninagar substation	Tripura	400/132 kV (7x105 MVA)	NA	January 27, 2021
Surajmaninagar – PK Bari 400/132 kV	Tripura	400 kV DC	155	January 27, 2021
Palatana GBPP – switchyard	Tripura	2 no. of line bays at 400 kV	NA	January 27, 2021
NEEPCO – PK Bari	Tripura	132 kV DC	167	February 20, 2021
AGTPP (NEEPCO) line bays	Tripura	2 No. of line bays 132 kV	NA	February 20, 2021
PK Bari (TSECL) line bays	Tripura	2 No. of line bays 132 kV	NA	February 20, 2021
PK Bari substation	Tripura	400/132 kV (7x105 MVA)	NA	January 27, 2021

The average annual availability of NER since commissioning is set forth in the table below, which is higher than the target availability of 98% under the NER TSA.



NER earned transmission system availability revenue of ₹ 2,433.77 million as of September 30, 2025.

As of September 30, 2025, the NER TSA had a remaining term of over 30 years 6 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, NER has availed a debt of ₹ 27,585.73 million from IndiGrid.

Khargone Transmission Limited ("KTL")

KTL was incorporated on November 28, 2015. KTL entered into a TSA dated March 14, 2016 with the LTTCs. The KTL project was awarded by the Ministry of Power on May 26, 2016 for a 35-year period from the scheduled commercial operation date of the KTL project, on a BOOM basis.

KTL was fully commissioned on December 13, 2021. The net depreciated value of the asset as of September 30, 2025 is ₹ 14,208.86 million.

Details of KTL's transmission lines and line bays are set forth as follows:

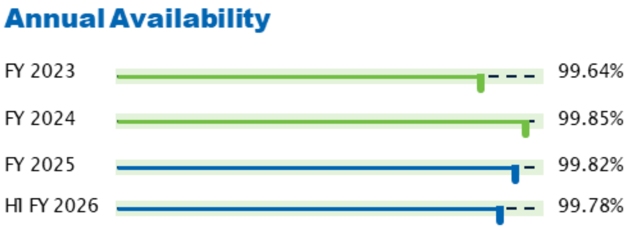
Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term
LILO of Khandwa – Rajgarh line	14	400 kV D/C line	July 8, 2018	July 2054
Khargone TPP Switchyard – Khandwa Pool	50	400 kV D/C line	March 19, 2020	July 2054
Khandwa Pool - Indore	180	765 kV D/C line	March 19, 2020	July 2054
Khandwa Pool - Dhule	383	765 kV D/C line	December 13, 2021	July 2054
Khandwa pooling station	-	3,000 MVA transformation capacity	March 19, 2020	July 2054
2 Nos. of 765 kV line bays and 7x80 MVAR	-	765 kV line bays and	December 13, 2021	July 2054

Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term
Switchable line reactors (1 Unit as spare) along with 800 Ω NGR and its auxiliaries for Khandwa Pool – Dhule 765 kV D/C at Dhule 765/400 kV substation		7x80 MVAR switchable reactors		
Total	627			

Further, NCT, in its 9th meeting held on September 28, 2022, approved the implementation of the ISTS project for augmentation of transformation capacity at Kalam PS by 2x500 MVA, 400/220 kV ICTs along with 220kV bays for RE interconnection.

CTUIL, on June 8, 2023, awarded ISTS project under the Regulated Tariff Mechanism ("**RTM**") for the implementation of 1 No. 400kV bay at Kallam PS for interconnection of RE project of Torrent Solar Power Pvt. Ltd., CTUIL, on February 13, 2024, provided for the modification in the implementation timeframe revising it from December 30, 2024 to March 31, 2025.

The average annual availability of KTL since commissioning is set forth in the table below, which is higher than the target availability of 98% under the KTL TSA.



As a result, KTL earned transmission system availability revenue of ₹ 900.78 million as of September 30, 2025.

As of September 30, 2025, the KTL TSA had a remaining term of over 28 years 10 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, KTL has availed a debt of ₹ 14,887.94 million from IndiGrid.

KTL has filed two petitions dated June 26, 2025 and July 10, 2025 under Section 62 read with Sections 79(1)(c) & (d) of the Electricity Act, 2003 read with Regulation 15(1)(a) of the CERC (Conduct of Business) Regulations, 2023 and the applicable provisions of the CERC (Terms and Conditions of Tariff) Regulations, 2024 for determination of transmission tariff from its commercial operation date until March 31, 2029. and Regulation 27(1)(c)(i) of CERC (Indian Electricity Grid Code), Regulations 2023 for the Kallam RTM-1 and Kallam RTM-2. The matter is currently pending

***Kallam Transmission Limited** ("Kallam")*

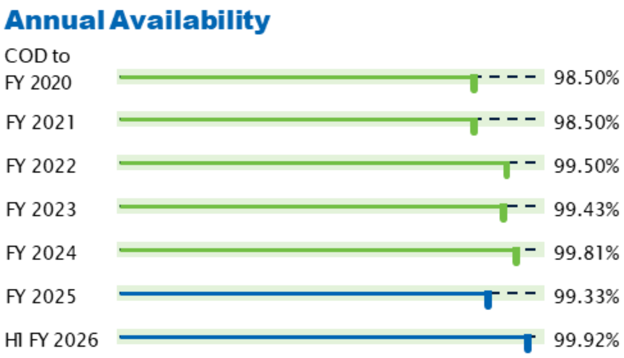
Kallam Transmission Limited was incorporated on May 28, 2020. Kallam entered into a TSA dated September 30, 2021 with the LTTCs. The letter of intent for development of Kallam was awarded to consortium of IGL 1 and IGL 2 ("**IndiGrid Consortium**") by the REC Power Development and Consultancy Limited on November 30, 2021 for a 35-year period from the scheduled commercial operation date, on a Build, Own, Operate and Maintain model. IndiGrid Consortium acquired the project on December 28, 2021.

The project is completed and commissioning date is February 14, 2024. The net depreciated value of the asset as of September 30, 2025 is ₹4,264.07 million.

Details of Kallam's transmission lines are set forth as follows:

Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term	Contribution to Total Tariff
Kallam S/S		400/220 KV, 2000 MVA	Q4 FY24	October 2059	63.48%
LILO of both circuits of Parli – Pune Line at Kallam S/S	67.6	400 KV D/C Line	Q4 FY24	October 2059	19.50%
Bus Reactor at Kallam PS	-	1x125 MVAr` BR	Q4 FY24	October 2059	6.38%
50MVAr Switchable Line Reactor with 400 ohms NGR at Kallam PS end of Kallam - Pune (GIS) 400kV D/c line		2x50MVAr SLR	Q4 FY24	October 2059	10.64%

The average annual availability of Kallam since commissioning is set forth in the table below, which is higher than the target availability of 98% under the Kallam TSA.



As a result, Kallam earned a revenue of ₹ 320.79 million as of September 30, 2025.

As of September 30, 2025, the Kallam TSA had a remaining term of over 33 years. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, Kallam has availed a debt of ₹ 3,436.20 million from IndiGrid.

Raichur Sholapur Transmission Company Private Limited

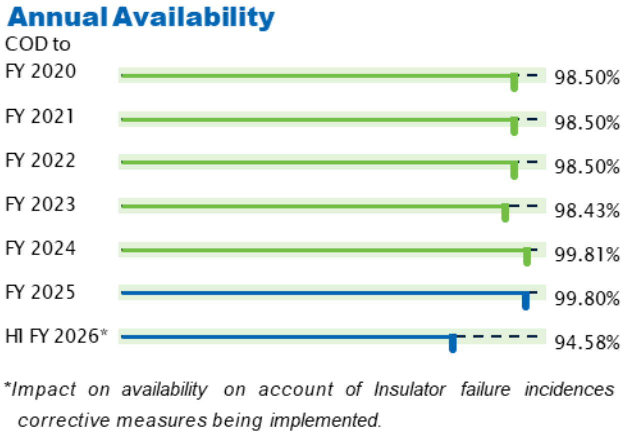
RSTCPL was incorporated on November 11, 2009. RSTCPL entered into a TSA dated May 5, 2010 with LTTCs. The Letter of Intent (LoI) for the RSTCPL project was awarded to consortium of Patel Engineering Limited (PEL), Simplex Infrastructures Limited (SIL) and BS Limited (BSL) by the RECPDCL (erstwhile RECTCL) on December 16, 2010 for a 35-year period from the scheduled commercial operation date, on a Build, Own, Operate and Maintain (BOOM) basis. IndiGrid acquired RSTCPL from the consortium in November 2022.

RSTCPL was fully commissioned on July 4, 2014. The net depreciated value of the asset as of September 30, 2025 is ₹ 1,653.94 million.

Details of RSTCPL's transmission lines are set forth as below:

Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term
Raichur - Sholapur	208	765 kV S/C line	July 4, 2014	January 2049

The average quarterly availability of RSTCPL since commissioning is set forth in the table below, which, for majority of the years, is higher than the target availability of 98% under the RSTCPL TSA.



As a result, RSTCPL earned transmission system availability revenue of ₹ 115.14 million as of September 30, 2025.

As of September 30, 2025, the RSTCPL TSA had a remaining term of over 23 years 3 months. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, RSTCPL has availed a debt of ₹ 2,077.61 million from IndiGrid.

Terralight Solar Energy Sitamauss Private Limited ("TSESPL")

TSESPL was incorporated on August 7, 2014, under the Companies Act, 2013 at Delhi, India as Focal Energy Solar Three India Private Limited. TSESPL facilitates step-up and evacuation to four solar assets, on a cost-to-cost basis, namely, GSPPL, TSEP (which are owned and operated by IndiGrid), Focal Photovoltaic India Private Limited and Focal Renewable Energy Two India Private Limited (which are owned and operated by third parties).

The net depreciated value of the asset as of September 30, 2025 is ₹70.10 million. Details of TSESPL's transmission lines are set forth as follows:

Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term
132 kV single circuit Panther	0.4 km	132 kV single circuit Panther	June 6, 2015	N.A.

TSESPL earned a revenue of ₹ 4.81 million as of September 30, 2025. As of September 30, 2025, there was no debt outstanding to external lenders. As of September 30, 2025, TSESPL has availed no debt from IndiGrid.

Koppal-Narendra Transmission Limited (“KNTL”)

KNTL was incorporated on November 18, 2019. KNTL entered into a TSA dated August 26, 2021 with ReNew Surya Ojas Private Limited. The KNTL project was awarded by the Ministry of Power on October 13, 2021 for a 35-year period from the scheduled commercial operation date of the KNTL project, on a TBCB basis. KNTL was acquired on June 6, 2025

The Koppal Narendra transmission line was commissioned in October 20, 2023, and acquired by IndiGrid in June 24, 2025. The net depreciated value of the asset as of September 30, 2025 is ₹7,189.34 million.

Details of KNTL’s transmission lines are set forth as follows:

Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term	Contribution to Total Tariff
Koppal S/S		Establishment of 400/220 kV Koppal Pooling Station 400kV	October 16, 2023	35 Years	54.13%

Transmission Line	Route Length (ckms)	Specifications	Commission Date	Expiry of TSA Term	Contribution to Total Tariff
		•ICT: 3x500MVA, 400/220kV •ICT bay: 3 nos. •Line bay: 2 nos. •Bus Reactor bay: 2 nos. 220kV •ICT bay: 3 nos •Line bay: 5 nos. •Bus coupler bay: 1 no. •Transfer Bus coupler bay: 1 no.			
400/220 kV Koppal Pooling Station (Ph-II) 400kV		•ICT: 2x500MVA, 400/220kV •ICT bay: 2 nos. 220kV •ICT bay: 2 nos •Line bay: 4 nos. •Bus sectionalizer bay: 2 no. •Bus coupler bay: 1 no. •Transfer Bus coupler bay: 1 no.	October 16, 2023	35 Years	12.76%
Pooling station (near Munirabad /suitable location in Koppal distt.) - Narendra (New)	280 ckms	400 KV D/C Line (Quad ACSR Moose)	October 16, 2023	35 Years	22.78%
GIS Line Bay at Narendra (New)		400 KV GIS	October 16, 2023	35 Years	2.07%
Bus reactor at Pooling station (near Munirabad /suitable location in Koppal distt.)		2x125 MVAr, 420kV	October 16, 2023	35 Years	8.26%

The availability of KNTL since acquisition is set forth in the table below, which is higher than the target availability of 98% under the KNTL TSA.

As a result, KNTL earned a revenue of ₹ 386.65 million as of September 30, 2025.

As of September 30, 2025, the KNTL TSA had a remaining term of over 33 years, 22 days. As of September 30, 2025, there was no debt outstanding to external lenders. Further, KNTL has issued OCDs amounting to ₹ 50 million, as of September 30, 2025. As of September 30, 2025, KNTL has availed a debt of ₹ 5,618.75 million from IndiGrid.

Ratle Kiru Power Transmission Limited ("RKPTL")

RKPTL was incorporated on October 23, 2024. RKPTL was acquired by IndiGrid on March 24, 2025. RKPTL entered into a TSA dated March 24, 2025 with LTTCs. The RKPTL project was awarded by the Ministry of Power on January 23, 2025 for a 35 year period from the scheduled commercial operation date of the RKPTL project, on a BOOT basis.

The project is currently under construction and the scheduled commercial operation date of March 24, 2027.

Details of RKPTL's transmission lines are set forth as follows:

Transmission Line	Status	Route Length (ckms)	Specifications	Termof TSA
LILO-400kV Kishenpur Dulhesti	Under construction	4.36 ckms	400KV DC	March 24, 2062
Kishenpur-Samba	Under construction	67.22	400 kV	March 24,2062
Samba-Jalandhar	Under construction	283.76	400 kV	March 24,2062
80 MVAr switchable line reactors with switching equipment's at Samba S/s end– 1 No	Under construction		420 kV	March 24,2062
63 MVAr switchable line reactors with switching equipment's at Jalandhar S/s end– 2 Nos.	Under construction		420 kV	March 24,2062

As of September 30, 2025, the RKPTL TSA has a term of over 35 years from the date of commissioning. As of September 30, 2025, there was no debt outstanding to external lenders. Further, RKPTL has issued OCDs amounting to ₹ 1,088.65 million, as of September 30, 2025. As of September 30, 2025, RKPTL has availed debt of ₹ 435.27 million from IndiGrid.

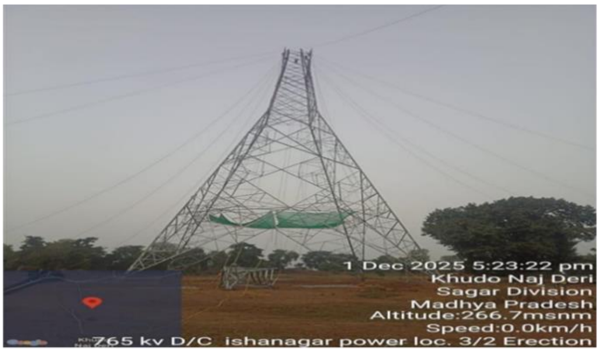
Pursuant to the Electricity Act, all transmission projects have to procure permits and clearances from various government departments in India, in order to be commissioned and receive tariffs. The status of the approvals and clearances for RKPTL as of September 30, 2025 is set forth in the table below:

Project	SPV acquisition	Approval for overhead lines (S.68 of EA)	Transmission license (CERC)	Tariff orders (CERC)	Financial closure	Forest clearance	Wildlife clearance	Construction	Approval under S.164 of EA
RKPTL	March 24, 2025	December 23, 2024	August 30, 2025	August 2, 205	March 31, 2025	Underway	NIL	July, 2025	Underway

The construction status of RKPTL is set forth in the following table as of September 30, 2025:

Foundations	Tower erection	Stringing	Substation Construction	Percent of completed construction as at September 30, 2025
4	0	0	0	14%

Ishanagar Power Transmission Limited ("IPTL")



IPTL was incorporated on June 9, 2023. IPTL entered into a TSA dated February 9, 2024 with LTTCs. The letter of intent for development of IPTL was awarded to Indigrid by the Ministry of Power on December 29, 2023 for a 35 year period from the scheduled commercial operation date, on a BOOT model.

The project is currently under construction and the scheduled commissioning date is February 8, 2026.

Further, CTUIL, on November 4, 2025, awarded ISTS project under the Regulated Tariff Mechanism ("**RTM**") for the implementation of 1 No. of 400kV line bay at Ishanangar (New) substation for interconnection of M/s Avaada Energy Pvt. Ltd. 350 MW REGS.

The following table sets forth a summary description of IPTL:

Location	Status	Description	Route Length (ckms)	Term of TSA
LILO of Jabalpur-Orau TL	Under construction	LILO Line	34.64 ckms	35 Years
Ishanagar S/S	Under Construction	2x1500 MVA, 765/400KV &2x500 MVA, 400/220 KV S/S along with 1x330 MVAr, 765 KV & 1x125 MVAr, 420 kV Bus Reactor		35 Years

As of September 30, 2025, the IPTL TSA has a term of 35 years from the date of commissioning.

As of September 30, 2025, there was no debt outstanding to external lenders. Further, IPTL has issued OCDs amounting to ₹ 683.67 million, as of September 30, 2025.As of September 30, 2025, IPTL has availed a debt of ₹ 86.31 million from IndiGrid.

Pursuant to the Electricity Act, all transmission projects have to procure permits and clearances from various government departments in India, in order to be commissioned and receive tariffs. The status of the approvals and clearances for IPTL as of September 30, 2025 is set forth in the table below:

Project	SPV acquisition	Approval for overhead lines (S.68 of EA)	Transmission license (CERC)	Tariff orders (CERC)	Financial closure	Forest clearance	Wildlife clearance	Construction	Approval under S.164 of EA
IPTL	February 9, 2024	October 16, 2023	June 25, 2024	June 14, 2024	-	NIL	NIL	33%	January 31, 2025

The construction status of IPTL is set forth in the following table as of September 30, 2025:

Foundations	Tower erection	Stringing	Substation Construction	Percent of completed construction as at September 30, 2025
15/45	1/45	0/34.64	35%	33%

Dhule Power Transmission Limited ("DPTL")

DPTL was incorporated on June 8, 2023. DPTL entered into a TSA dated February 8, 2024 with LTTCs. The letter of intent for development of DPTL was awarded to IndiGrid by the Ministry of Power on December 29, 2023 for a 35 years period from the scheduled commercial operation date, on a BOOT model.

The project is currently under construction and the scheduled commissioning date is February 8, 2026.

Further, CTUIL, on November 4, 2025, awarded ISTS project under the Regulated Tariff Mechanism ("**RTM**") for the implementation of 1 No. 220kV line bay at Dhule PS for interconnection of M/s Adyant Enersol Pvt. Ltd. 94 MW RHGS.

The following table sets forth a summary description of DPTL:

Location	Status	Description	Route Length (ckms)	Term of TSA
Dhule	Under construction	Dhule PS – Dhule (BDTCL) TL	130.58	35 Years

As of September 30, 2025, the DPTL TSA has a term of over 35 years from the date of commissioning.

As of September 30, 2025, there was no debt outstanding to external lenders. Further, DPTL has issued OCDs amounting to ₹ 494.41 million, as of September 30, 2025. As of September 30, 2025, DPTL has availed a debt of ₹ 78.21 million from IndiGrid.

Pursuant to the Electricity Act, all transmission projects have to procure permits and clearances from various government departments in India, in order to be commissioned and receive tariffs. The status of the approvals and clearances for DPTL as of September 30, 2025 is set forth in the table below:

Project	SPV acquisition	Approval for overhead lines (S.68 of EA)	Transmission license (CERC)	Tariff orders (CERC)	Financial closure	Forest clearance	Wildlife clearance	Construction	Approval under S.164 of EA
DPTL	February 9, 2024	November 6, 2023	August 9, 2024	July 10, 2024		Under Process	NIL	36%	March 28, 2025

The construction status of DPTL is set forth in the following table as of September 30, 2025:

Foundations	Tower erection	Stringing	Substation Construction	Percent of completed construction as at September 30, 2025
51/178	20/178	10/130.58	37%	36%

Kallam Transco Limited ("KTCO")

KTCO was incorporated on September 15, 2023. KTCO entered into a TSA dated April 5, 2024 with LTTCs. The letter of intent for development of Kallam Transco Limited was awarded to IndiGrid by the Ministry of Power on February 15, 2024 for a 35 years period from the scheduled commercial operation date, on a BOOT model. The project is currently under construction and the scheduled commissioning date was October 4, 2025. However, KTCO, on July 19, 2025, has informed CTUIL that the execution of the project has been affected due to severe 'Right of Way' resistance and high compensation demand by the landowners falling in the 'Right of Way' of the project. Therefore, KTCO has intimated CTUIL of a Force Majeure Event, under the relevant provisions of the KTCO TSA. CTUIL response is awaited.

The following table sets forth a summary description of KTCO:

Location	Status	Description	Route Length (ckms)	Term of TSA
LILO of Parli(PG) - Kajrat D/C Line at Kallam PS	Under construction	LILO of both circuits of Parli(PG) - Karjat 400 KV D/C Line at Kallam PS	55.28	35 Years

As of September 30, 2025, the KTCO TSA has a term of over 35 years from the date of commissioning.

As of September 30, 2025, there was no debt outstanding to external lenders. Further, KTCO has issued OCDs amounting to ₹ 231.70 million, as of September 30, 2025. As of September 30, 2025, KTCO has availed debt of ₹ 1,135.59 million from IndiGrid.

Pursuant to the Electricity Act, all transmission projects have to procure permits and clearances from various government departments in India, in order to be commissioned and receive tariffs. The status of the approvals and clearances for KTCO as of September 30, 2025 is set forth in the table below:

Project	SPV acquisition	Approval for overhead lines (S.68 of EA)	Transmission license (CERC)	Tariff orders (CERC)	Financial closure	Forest clearance	Wildlife clearance	Construction	Approval under S.164 of EA
KTCO	April 5, 2024	February 16, 2024	September 19, 2024	August 9, 2024	NA	NIL	NIL	74%	February 6, 2025

The construction status of KTCO is set forth in the following table as of September 30, 2025:

Foundations	Tower erection	Stringing	Substation Construction	Percent of completed construction as at September 30, 2025
11/41	2/41	0/55.28	100%	74%

Summary of Key Agreements of the Transmission Assets

The majority of our Transmission Assets have entered into TSAs and RSAs the key terms of which are provided below.

TSA

The majority of our Transmission Assets entered into TSAs with long-term transmission customers to set up projects on a BOOM basis and to provide transmission services on a long-term basis to such customers on the terms and conditions contained in the TSAs. The term of each TSA is 35 years from the scheduled commercial date of operation of the applicable project, (other than for ENICL and JKTPL, which is for 25 years), unless terminated earlier in accordance with the terms of the TSA. The TSAs provide for, among other things, details and procedures for project execution, development and construction, operation and maintenance.

Pursuant to the Central Electricity Regulatory Commission (Sharing of Inter State Transmission Charges and Losses) Regulations, 2010 ("**Sharing Regulations 2010**"), the majority of our Transmission Assets also entered into TSAs with the CTU, to govern the provision of inter-state transmission services, specifically in relation to sharing of transmission charges and losses and disbursing the transmission charges collected by the CTU. The inter-state transmission service customers and inter-state transmission service licensees are required to abide by the detailed billing, collection and disbursement procedure of the CTU and with the terms of the TSA. The CTU raises bills and also collects and disburses in accordance with the detailed billing, collection and disbursement procedures of the CTU, as approved by CERC. Under the terms of the TSA, each inter-state transmission service customer has agreed to allow the CTU to enforce recovery of payment through a letter of credit on behalf of all the inter-state transmission service licensees in the event of default of payment. If payment by an inter-state transmission service customer against any invoice raised under the billing, collection and disbursement procedure, is outstanding beyond 30 days after the due date or in case the required letter of credit or any other agreed payment security mechanism is not maintained by the inter-state transmission service customer, the CTU is empowered to undertake regulation of power supply on behalf of all the inter-state transmission service licensees so as to recover charges under the provisions of the Central Electricity Regulatory Commission (Regulation of Power Supply) Regulations, 2010 (the "**Power Supply Regulations**"). Additionally, the Sharing Regulations 2010 have been amended and replaced by the Central Electricity Regulatory Commission (Sharing of Inter State Transmission Charges and Losses) Regulations, 2020, which have come into effect from November 1, 2020.

The TSA also provides for force majeure relief to the inter-state transmission service licensees and inter-state transmission service customers (the "**Affected Parties**") affected by the occurrence of a force majeure event. The TSA defines a force majeure event as an event or circumstance, or a combination thereof, that wholly or partly prevents or unavoidably delays the Affected Party in the performance of its obligations under such TSAs, but only if and to the extent that such event or circumstance is not within the reasonable control, directly or indirectly of the Affected Party and could not have been avoided if the Affected Party had taken reasonable care or complied with Prudent Utility Practices (as defined in the TSA), and includes, among others, an act of God, act of war, radioactive contamination or ionizing radiation originating from a source in India and industry-wide strikes and labour disturbances having a nationwide impact in India. To the extent not prevented by a force majeure event, the Affected Party must continue to perform its obligations under the TSA and must use its efforts to mitigate the effect of such event, as soon as practicable. The Affected Party will not be in breach of its obligations under the TSA, except to the extent that the performance of its obligations was prevented, hindered or delayed due to a force majeure event. Each inter-state transmission service customer or inter-state transmission service licensee is entitled to claim relief for a force majeure event affecting its performance in relation to its obligations under the TSA. Computation of availability under outage due to a force majeure event must be in accordance to the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2014 as amended from time to time and any subsequent enactment thereof.

The TSA entered into with the CTU also defines change in law as being, among other events which result into any additional recurring/non-recurring expenditure by the inter-state transmission service licensees or any income to the inter-state transmission service licensees, (i) the enactment, coming into effect, adoption, promulgation, amendment, modification or repeal (without re-enactment or consolidation) in India, of any law, including rules and regulations framed pursuant to such law, (ii) change in the interpretation or application of any law by any Indian governmental instrumentality having the legal power to interpret or apply such law, or any competent court of law, (iii) the imposition of a requirement for obtaining any consents, clearances and permits which were not required earlier or a change in the terms and conditions prescribed for obtaining such consents, clearances and permits or the inclusion of any new terms or conditions for obtaining such consents, clearances and permits (iv) any change in tax or the introduction of any tax made applicable for transmission service by the inter-state transmission service licensees, as per the terms of the TSA. Any adjustment in the monthly transmission charges due to a change in law is to be determined and effective from such date, as decided by the CERC, subject to rights of appeal provided under applicable law. Further, in case of ISTS awarded through the competitive bidding process under Section 63 of the Electricity Act, the reference date for determining the implications of change in law is seven days prior to the relevant bid due date for submission of a tariff bid.

RSA

Pursuant to the Sharing Regulations 2010, the majority of our Transmission Assets entered into RSAs with PGCIL. The transmission charges billed in accordance with the billing, collection and disbursement procedures set out in the TSAs with CTUs are disbursed to the inter-state transmission system licensees by the CTU, pursuant to and in accordance with the RSAs. The PoC charges for use of inter-state transmission services by the inter-state transmission services customers, and are billed and collected by the CTU on behalf of all inter-state transmission services licensees. The CTU must disburse the collected transmission charges to the respective inter-state transmission services licensees and owners of deemed inter-state transmission services whose transmission charges have been considered for the purpose of calculation of the PoC charges in accordance with the billing, collection and disbursement procedure set out in the TSAs with the CTU. Delayed payment or partial payment by any inter-state transmission services customers results in a pro-rata reduction in the payouts to all the inter-state transmission services licensees and owners of deemed inter-state transmission services whose transmission charges have been considered for the purpose of calculation of PoC charges. The revenue sharing statements to be submitted to the CTU and the modality of disbursements by the CTU must be in accordance with the billing, collection and disbursement procedure. Each inter-state transmission licensee, under the applicable RSA, empowers the CTU to enforce recovery of payment from the inter-state transmission service customers through payment security mechanisms in the event of default or partial payment by the inter-state transmission service customer, in accordance with the billing, collection and disbursement procedure. Each inter-state transmission licensee has further agreed and empowered the CTU to invoke the provisions of the Power Supply Regulations in accordance with the detailed billing, collection and disbursement procedure.

BESS Assets

The BESS Assets comprise of one operational asset and 2 under-construction assets located across Delhi, Gujarat and Rajasthan. The BESS Projects have an aggregate capacity of 900 MWh.

A brief description of the BESS Assets has been set out below:

Project Name	State	Project Status	Commercial Operations Date	Capacit	Contract
KBPL	Delhi	Operational	April 1, 2025	20 MW/ 40 MWh	Fixed Tariff/ State
GBPL	Gujarat	Under-construction	February 21, 2026 (scheduled commissioning date)	180 MW/ 360 MWh	Fixed Tariff/ State
RBPL	Rajasthan	Under-construction	June 23, 2026 (scheduled commissioning date)	250 MW/ 500 MWh	Fixed Tariff/ State

The total revenue earned by each of the BESS Assets in fiscals 2025, 2024 and 2023 is set forth in the following table. The results for the periods presented below are not necessarily indicative of the results to be expected for any future period.

KBPL			
	Fiscal		
(INR in Millions)	**2023**	**2024**	**2025**
Capacity Charges / Tariff*	-	-	514.36
Total Revenue	**-**	**-**	**514.36**
**Revenue portion relates to Service concession accounting.*			

Kilokari BESS Private Limited ("KBPL")

KBPL was incorporated on November 6, 2023. KBPL entered into a Battery Energy Storage System Agreement ("**BESSA**") dated December 22, 2023 with BSES Rajdhani Power Limited ("**BRPL**"). The letter of award for development of 20 MW/40 MWh BESS was awarded by BRPL on October 23, 2023 for a 12 years period from the scheduled commercial operation date, on a BOOT model. The project is currently operational. As of September 30, 2025, the KBPL BESSA had a remaining term of over 11 years and two months. For further details of the KBPL BESSA, please see the section entitled "*Our Business - Summary of Battery Energy Storage Purchase Agreements*" on page 302.

Commissioning

The commercial operations date is April 1, 2025.

Land

The land on which the project is situated is held by KBPL on a right-to-use basis.

Financial Indebtedness

As of September 30, 2025, there was ₹ 807.90 million outstanding to external lenders and the revenue from operations was ₹ 216.91 million. As of September 30, 2025, KBPL has availed debt of ₹ 231.97 million from IndiGrid.

Gujarat BESS Private Limited ("GBPL")

GBPL was incorporated on April 24, 2024. GBPL entered into a BESPA dated June 26, 2024 with GUVNL. IndiGrid 2 Private Limited (a wholly owned subsidiary of IndiGrid Infrastructure Trust) has received the Letter of Intent ("**LOI**") dated March 14, 2024, from Gujarat Urja Vikas Nigam Limited ("**GUVNL**") for setting up of 180MW/360 MWh Standalone BESS in Gujarat for "on demand" usage under tariff based competitive bidding.

The project shall have concession tenure of 12 years post Commercial Operation Date. For further details of the GBPL BESPA, please see the section entitled "*Our Business - Summary of Battery Energy Storage Purchase Agreements*" on page 302.

Commissioning

The project is currently under construction and the planned commissioning date is February 21, 2026.

The status of the approvals and clearances for GBPL as of September 30, 2025 is set forth in the table below:

Project	SPV incorporation	Financial closure	Forest clearance	Wildlife clearance	Connectivity grant	Tariff Adoption Order	Construction
GBPL	April 24, 2024	June 18, 2024	NA	NA	December 20, 2024	June 14, 2024	As below

The construction status of GBPL is set forth in the following table as of September 30, 2025:

Foundations	Activity	Percent of completed construction as at September 30, 2025
1.	Civil	70
2.	Installation (AC & DC systems)	35
3.	Pre-commissioning (AC & DC systems)	10

Land

The land on which the project is situated is held by GBPL on a right-to-use basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders. Further, GBPL has issued OCDs amounting to ₹ 160.31 million, as of September 30, 2025. As of September 30, 2025, GBPL has availed debt of ₹ 4,678.38 million from IndiGrid.

Rajasthan BESS Private Limited ("RBPL")

IndiGrid 2 Private Limited, a fully-owned subsidiary of IndiGrid Infrastructure Trust, has secured a Letter of Intent dated November 22, 2024, from NTPC Vidyut Vyapar Nigam Limited ("**NVNN**") for setting up a 250 MW/500 MWh BESS in Rajasthan for "on demand" usage under tariff-based competitive bidding framework. The project will be setup under Build Own Operate basis, for making the energy storage capacity available to NVNN. with a concession term of 12 years starting from the Scheduled Commissioning Date.

RBPL was incorporated on December 3, 2024 for the development of the above project. RBPL entered into a BESPA dated December 23, 2024 with NVNN. For further details of the RBPL BESPA, please see the section entitled "*Our Business - Summary of Battery Energy Storage Purchase Agreements*" on page 302.

Commissioning

The project is currently under construction and the planned commissioning date is June 22, 2026.

The status of the approvals and clearances for RBPL as of September 30, 2025 is set forth in the table below:

Project	SPV incorporation	Financial closure	Forest clearance	Wildlife clearance	Connectivity Grant	Construction
RBPL	December 3, 2024	January 24, 2025	NA	NA	September 3, 2025	As below

The construction status of RBPL is set forth in the following table as of September 30, 2025:

Foundations	Activity	Percent of completed construction as at September 30, 2025
1.	Land acquisition	100
2.	Civil	10
3.	Installation (AC & DC system)	-
4.	Pre-commissioning (AC & DC system)	-

Land

The land on which the project is situated is held by RBPL on an owned basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders. Further, RBPL has issued OCDs amounting to ₹ 104.59 million, as of September 30, 2025.As of September 30, 2025, RBPL has availed debt of ₹ 49.51 million from IndiGrid.

Summary of the Battery Energy Storage Purchase Agreements

Term: The agreements are valid or a period of 12 years from their respective COD (*as defined in the agreements*). The project must demonstrate the operational residue BESS capacity of at least 70% of the total project capacity before the end of the agreements Thereafter, the BESS Developer (*as defined in the agreements*) shall transfer the project to the respective Procurer (*as defined in the agreements*).

Obligations of BESS Developer:

(a). obtaining and maintaining all consents, clearances and permits;
(b). commencement of charging and discharging of power up to the contracted capacity;
(c). maintaining the shareholding pattern as provided in the agreements;
(d). fulfilling the technical requirements as provided under the agreements and applicable laws;
(e). making arrangements for getting connectivity with the transmission systems;
(f). maintaining minimum annual average availability of 95% during any contract year etc.

Tariff and billing: The BESS Developer shall be entitled to receive tariffs at fixed amount charge monthly, for the entire term of the agreement. The agreements set out billing and payment procedures, provide for late payment surcharge and require payment of undisputed amounts pending resolution of disputes.

Change in law: In the event of occurrence of any event of change in law (*as defined under the Agreements*) results in any adverse financial loss or gain to the BESS Developer, the BESS Developer shall accordingly be entitled to compensation. In case of a loss, or liable to compensate the Procurer, in case of a gain.

BESS Developer event of default:

(a). failure to commence availability of BESS for providing energy storage up to the contracted capacity;
(b). failure to demonstrate guaranteed availability within six months of dentification of reduced annual availability;
(c). creation, assigning or mortgaging any charge on the assets or rights in relation to the project;
(d). failure to comply with material obligations under the Agreements;
(e). change in shareholding in breach of the clauses of the Agreements etc.

In case the default is not cured, the BESS Developer must pay damages as specified in the Agreements. Further, the Procurer may substitute the BESS Developer within 90 days after the period during which the mitigation is to be performed.

Solar Assets

The Solar Assets comprise a total of 20 operational assets under 18 SPVs located across eight states in India. IndiGrid owns, directly or indirectly, 100% of all the Solar Assets. The Solar Projects have an aggregate capacity of 1,506 MWp and are located across the states of Andhra Pradesh, Punjab, Tamil Nadu, Rajasthan, Gujarat, Maharashtra, Uttar Pradesh and Madhya Pradesh. The average residual life of the Solar Assets is approximately 19.6 years. The total contracted AC capacity is 1,105 MW and the total contracted DC capacity is 1,506 MW.

A brief description of the Solar Assets has been set out below:

Project Name	Commercial Operations Date	Contracted Capacity (MW AC)	Capacity (MW DC)	Tariff (₹/ kWh)	Off-taker	Duration of PPA (years)	Module Make and Inverter Make
IGL Solar I	July 22, 2018	50.00	68.00	4.43	SECI	25	Trina (modules) and Sungrow (Inverters)
IGL Solar II	January 31, 2019	50.00	70.00	4.43	SECI	25	Trina (modules) and Sungrow (Inverters)
GGEPL	June 19, 2013	50.00	50.00	12.20	NVVN	25 years from COD	Turbine - Siemens
GSPPL	January 29, 2016	20.00	23.60	6.969	MPPMSL	25 years from COD	Module - Solar Frontier Inverter - SMA, ABB
PLG	January 26, 2012	20.00	20.00	15 for first 12 years; 5 for subsequent 13 years.	GUVNL	25 years from COD	Module - Kyocera Inverter - ABB, Hitachi, Delta
Solar Edge	April 22, 2018; April 8, 2018 and April 26, 2018	130.00	169.00	4.43	SECI	25 years from COD	Modue - JA Solar, Astronergy, Canadian Solar Inverter - ABB
TKSPL	March 26, 2016	30.00	36.00	7.01	TANGEDCO	25 years from COD	Module – Talesun Inverter – ABB
TKSPL (Lalitpur)	March 19, 2015	10.00	12.40	8.44 for first 12 years, average power purchase cost price from 13th year	UPPCL	12 years from COD with 13 year extension	Module – Jinko Solar, Trina, Jakson Inverter - Schneider
TSEC	March 4, 2012; March 31, 2012; April 12, 2012; October 31, 2012	13.00	15.00	11.32 for 12 years reducing as per PPA after 13th year	GUVNL	12 years from COD with 13 year extension	Module – First Solar Inverter - Hitachi, Delta
TNSPEPL	November 2, 2015; September 28, 2015; December 28, 2015	23.00	27.60	7.01	TANGEDCO	25 years from COD	Module – JA Solar Inverter - ABB
TRSPL	September 26, 2018	50.00	54.00	3.47	TANGEDCO	25 years from COD	Module – JA Solar Inverter - Sening

Project Name	Commercial Operations Date	Contracted Capacity (MW AC)	Capacity (MW DC)	Tariff (₹/ kWh)	Off-taker	Duration of PPA (years)	Module Make and Inverter Make
TSEG	March 26, 2013	5.00	5.50	8.99	NVVN	25 years from COD	Module – Nex Power/JA Solar Inverter - Schneider, Sungrow
TSEN	March 24, 2015	4.00	4.20	8.30	PSPCL	25 years from COD	Module – First Solar Inverter - SMA
TSEP	June 1, 2015; June 12, 2015	20.00	22.00	5.45	SECI	25 years from effective date, i.e., March 28, 2015	Module – First Solar Inverter - SMA, ABB
TSET	October 15, 2011	5.00	5.80	17.91	NVVN	25 years from COD	Module – First Solar Inverter - SMA
UMD	November 16, 2015; March 21, 2016	25.00	30.00	7.01	TANGEDCO	25 years from COD	Module – JA Solar Inverter - ABB
USUPL	September 15, 2016	30.00	37.00	9.33 for first 12 years, average power purchase cost price from 13th year	UPPCL	25 years from COD	Module – Canadian Solar
	February 26, 2013	20.00	25.88	8.59 (average for both plants)	NVVN	25 years from COD	Inverter – ABB Module - Vikram, Trina, Jakson, JA Solar Inverter - Schneider
RSAPL	June 8, 2024	300.00	410.00	2.371	SECI	25 years from COD	Module /JA solar, Renew solar, Inverter/ Watt power, TBEA
JUPL	December 13, 2021	300.00	420.00	2.711	SECI	25 years from COD	Module/ JA solar, Longi solar, Inverter/ SunGrow, TBEA

The total revenue earned by each of the Solar Assets in fiscals 2025, 2024 and 2023 is set forth in the following table. The results for the periods presented below are not necessarily indicative of the results to be expected for any future period.

IndiGrid Solar-I (AP) Private Limited ("IGL Solar I")

IGL Solar I entered into a power purchase agreement dated October 5, 2016 with SECI ("**IGL Solar I PPA**"), wherein SECI agreed to procure power from IGL Solar I for 50 MW from the solar power generation facility located at Ananthapuramu Solar Park (developed by Andhra Pradesh Solar Power Corporation Limited) at Plot no. 2, Galiveedu Mandal, Dist. Kadapa, Andhra Pradesh at a pre-determined tariff of ₹ 4.43/kWh, for the entire term of the IGL Solar I PPA i.e. 25 years from the commercial operations date. We acquired IGL Solar I in December 2020.

The net depreciated value of the asset as of September 30, 2025 is ₹ 1,738.75 million. As of September 30, 2025, the IGL Solar I PPA had a remaining term of over 17 years and ten months. For further details of the IGL Solar I PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is July 22, 2018.

Land

IGL Solar I occupies the land on which the project is situated on a leasehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 209.45 million. As of September 30, 2025, IGL Solar I has availed debt of ₹ 2,771.92 million from IndiGrid.

IndiGrid Solar-II (AP) Private Limited ("IGL Solar II")

IGL Solar II entered into a power purchase agreement dated October 5, 2016 with SECI ("**IGL Solar II PPA**"), wherein SECI agreed to procure power from IGL Solar II for 50 MW from the solar power generation facility located at Ananthapuramu Solar Park (developed by Andhra Pradesh Solar Power Corporation Limited) at Plot no. 2, Galiveedu Mandal, Dist. Kadapa, Andhra Pradesh at a pre-determined tariff of ₹ 4.43/kWh, for the entire term of the IGL Solar II PPA i.e. 25 years from the commercial operations date. We acquired IGL Solar II in December 2020.

The net depreciated value of the asset as of September 30, 2025 is ₹ 1,776.44 million. As of September 30, 2025, the IGL Solar II PPA had a remaining term of over 18 years and four months. For further details of the IGL Solar II PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is January 31, 2019.

Land

IGL Solar II occupies the land on which the project is situated on a leasehold basis.

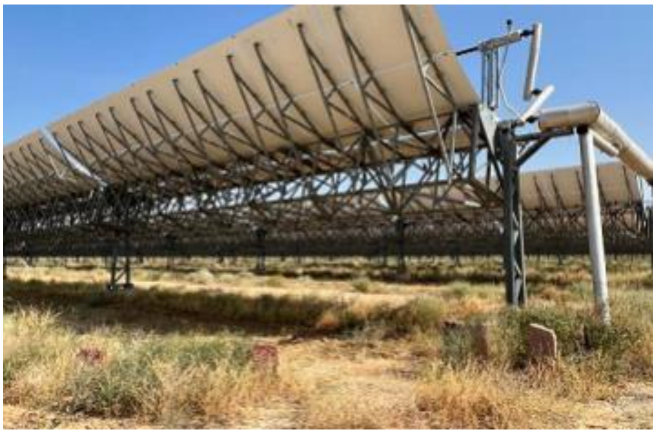
Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to lenders and the revenue from operations was ₹ 223.07 million. As of September 30, 2025, IGL Solar II has availed debt of ₹ 2,857.27 million from IndiGrid.

Godawari Green Energy Private Limited ("GGEPL")

GGEPL entered into a power purchase agreement dated January 10, 2011 with NTPC Vidyut Vyapar Nigam Limited ("**NVVN**"), as amended ("**GGEPL PPA**"), for sale of electricity from the GGEPL Project and a connection agreement dated October 14, 2014.

The net depreciated value of the asset as of September 30, 2025 is ₹ 4,381.82 million. As of September 30, 2025, the GGEPL PPA had a remaining term of over 12 years and nine months. For further details of the GGEPL PPA, please see the section entitled "*Our Business – Summary of Power Purchase Agreements*" on page 318.



Commissioning

The actual commercial operations date is June 19, 2013.

Land

The land on which the project is situated is held by GGEPL on a leasehold and freehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 118.05 million. As of September 30, 2025, GGEPL has availed debt of ₹ 1,992.16 million from IndiGrid.

Globus Steel & Power Private Limited ("GSPPL")

GSPPL entered into a power purchase agreement dated June 16, 2014 with MP Power Management Company Limited ("**GSPPL PPA**"), for sale of electricity from the GSPPL Project.

The net depreciated value of the asset as of September 30, 2025 is ₹ 726.05 million. As of September 30, 2025, the GSPPL PPA had a remaining term of over 15 years and four months. For further details of the Globus PPA, please see the section entitled "*Our Business – Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is January 29, 2016.

Land

The land on which the project is situated is held by GSPPL on a leasehold and freehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 100.08 million. As of September 30, 2025, GSPPL has availed debt of ₹ 1,468.45 million from IndiGrid.

PLG Photovoltaic Private Limited ("PLG")

PLG Photovoltaic Private Limited entered into power purchase agreement dated May 7, 2010 with Gujarat Urja Vikas Nigam Limited ("**GUVNL**"), as amended ("**PLG PPA**"), to supply 20 MW power at a pre-determined tariff of ₹15 per unit for the first 12 years and ₹5 per unit for the remaining 13 years of the tenure of the PPA.

The net depreciated value of the asset as of September 30, 2025 is ₹ 874.57 million. As of September 30, 2025, the PLG PPA had a remaining term of over 11 years and four months. For further details of the PLG PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is January 26, 2012.

Land

The land on which the project is situated is held by PLG on a freehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 118.32million. As of September 30, 2025, PLG has availed debt of ₹ 85.57 million from IndiGrid.

Solar Edge Power and Energy Private Limited ("Solar Edge")

SECI and Solar Edge entered into a power purchase agreement (the "**Solar Edge PPA**") dated February 10, 2017, wherein SECI agreed to procure 130 MW AC power from Solar Edge power generation facilities at pre-determined tariff of ₹4.43 per unit for the entire term of the agreement, i.e. 25 years effective from April 22, 2018.

The net depreciated value of the asset as of September 30, 2025 is ₹ 4,452.63 million. As of September 30, 2025, the Solar Edge PPA had a remaining term of over 17 years and seven months. For further details of the Solar Edge PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date for (i) 30 MW facility is April 22, 2018; (ii) 50MW Muktainagar facility is April 8, 2018; and (iii) 50MW Parli facility – April 26, 2018.

Land

The land on which the project is situated is held by Solar Edge on a freehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 389.41 million. As of September 30, 2025, Solar Edge has availed debt of ₹ 6,997.27 million from IndiGrid.

Terralight Kanji Solar Private Limited ("TKSPL")

TKSPL entered into Energy Purchase Agreement dated September 19, 2015 with Tamil Nadu Generation and Distribution Corporation Limited ("**TANGEDCO**") ("**TKSPL PPA**"), for sale of electricity from the TKSPL Project. Further, TKSPL entered into a power purchase agreement dated December 27, 2013 with UPPCL (as the off-taker) for the Lalitpur project.

The net depreciated value of the asset as of September 30, 2025 is ₹ 1,633.86 million. As of September 30, 2025, the TKSPL PPA had a remaining term of over 15 years and six months (including the extension period). For further details of the TKSPL PPAs, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The actual commercial operations date for the TKSPL project is March 26, 2016 and for the Lalitpur project is March 19, 2015.

Land

The land on which the TKSPL project and the Lalitpur project is situated is held by TKSPL on a freehold basis.

Financial Indebtedness

For the TKSPL Projects, as of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 249.91 million. As of September 30, 2025, TKSPL has availed debt of ₹ 2,317.69 million from IndiGrid.

Terralight Solar Energy Charanka Private Limited ("TSEC")

TSEC and GUVNL entered into a power purchase agreement dated May 29, 2010, as amended ("**TSEC PPA**") for sale of electricity from the TSEC project.

The net depreciated value of the asset as of September 30, 2025 is ₹ 368.39 million. As of September 30, 2025, the TSEC PPA had a remaining term of over 11 years and six months. For further details of the TSEC PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is (i) March 4, 2012 (4MW); (ii) March 31, 2012 (6 MW); (iii) April 12, 2012 (4.92 MW); and (iv) October 31, 2012 (0.08 MW).

Land

The land on which the project is situated is held by TSEC on a leasehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 71.68 million. As of September 30, 2025, TSEC has availed no debt from IndiGrid.

TN Solar Power Energy Private Limited ("TNSPEPL")

On March 5, 2015, March 17, 2015, and May 20, 2015, TANGEDCO and TNSPEPL entered into power purchase agreements (collectively, the "**TNSPEPL PPA**") wherein, TANGEDCO agreed to procure 23 MW AC power from TNSPEPL at pre-determined tariff of ₹7.01 per unit, without accelerated depreciation benefits for the entire term of the agreement, i.e., 25 years effective from the date of commencement of commercial operations of the project.

The net depreciated value of the asset as of September 30, 2025 is ₹ 665.95 million. As of September 30, 2025, the TNSESPL PPA had a remaining term of over 15 years and one month. For further details of the TNSPEPL PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The actual commercial operations date is November 2, 2015, September 28, 2015 and December 28, 2015.

Land

The land on which the project is situated is held by TNSPEPL on a freehold and leasehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 140.46 million. As of September 30, 2025, TNSPEPL has availed debt of ₹ 798.97 million from IndiGrid.

Terralight Rajapalayam Solar Private Limited ("TRSPL")

TRSPL entered into a power purchase agreement dated September 27, 2017, as supplemented with TANGEDCO ("**TRSPL PPA**") for sale of electricity from the TRSPL project.

The net depreciated value of the asset as of September 30, 2025 is ₹ 981.24 million. As of September 30, 2025, the TRSPL PPA had a remaining term of over 18 years. For further details of the TRSPL PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is September 26, 2018.

Land

The land on which the project is situated is held by TRSPL on leasehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 134.54 million. As of September 30, 2025, TRSPL has availed debt of ₹ 1,498.49 million from IndiGrid.

Terralight Solar Energy Gadna Private Limited ("TSEG")

TSEG and NVVN entered into a power purchase agreement dated January 27, 2012, as amended ("**TSEG PPA**") for sale of electricity from the TSEG project.

The net depreciated value of the asset as of September 30, 2025 is ₹ 135.57 million. As of September 30, 2025, the TSEG PPA had a remaining term of over 12 years and six months. For further details of the TSEG PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is March 26, 2013.

Land

The land on which the project is situated is held by TSEG on a freehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 34.18 million. As of September 30, 2025, TSEG has availed debt of ₹ 13.06 million from IndiGrid.

Terralight Solar Energy Nangla Private Limited ("TSEN")

TSEN and PSPCL entered into a power purchase agreement dated December 31, 2013 ("**TSEN PPA**") for sale of electricity from the TSEN project.

The net depreciated value of the asset as of September 30, 2025 is ₹ 162.40 million. As of September 30, 2025, the TSEN PPA had a remaining term of over 14 years and six months. For further details of the TSEN PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is March 24, 2015.

Land

The land on which the project is situated is held by TSEN on a freehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 27.62 million. As of September 30, 2025, TSEN has availed debt of ₹ 334.74 million from IndiGrid.

Terralight Solar Energy Patlasi Private Limited ("TSEP")

TSEP and SECI entered into a power purchase agreement ("**TSEP PPA**") dated April 25, 2014, as amended, for sale of electricity from the TSEP project.

The net depreciated value of the asset as of September 30, 2025 is ₹ 646.46 million. As of September 30, 2025, the TSEP PPA had a remaining term of over 14 years and seven months. For further details of the TSEP PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is: (a) for 10MW on June 1, 2015; and (b) for 10MW on June 12, 2015.

Land

The land on which the project is situated is held by TSEP on a leasehold basis and a freehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 76.25 million. As of September 30, 2025, TSEP has availed debt of ₹1,154.64 million from IndiGrid.

Terralight Solar Energy Tinwari Private Limited ("TSET")

On October 15, 2010, NVVN and TSET entered into a power purchase agreement (the "**TSET PPA**"), as amended or supplemented, wherein NVVN agreed to procure 5 MW power from TSET at pre-determined tariff of ₹ 17.91 per unit, for the entire term of the agreement i.e. 25 years effective from the commencement of commercial operations of the project.

The net depreciated value of the asset as of September 30, 2025 is ₹ 214.62 million. As of September 30, 2025, the TSET PPA had a remaining term of over 11 years and one month. For further details of the TSET PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is October 15, 2011.

Land

The land on which the project is situated is held by TSET on a leasehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 72.96 million. As of September 30, 2025, TSET has availed no debt from IndiGrid.

Universal Mine Developers & Service Providers Private Limited ("UMD")

UMD and TANGEDCO executed (i) a power purchase agreement dated March 25, 2015 for sale/purchase of 12 MW (AC)/ 14.4 MW (DC) solar power from TANGEDCO and (ii) a power purchase agreement dated May 20, 2015 for sale/purchase of 13 MW (AC)/ 15.6MW (DC) solar power from TANGEDCO (collectively, "**UMD PPA**") wherein TANGEDCO agreed to procure 25 MW AC power from UMD at pre-determined tariff of ₹7.01 per unit, without accelerated depreciation benefits for the entire term of the agreement i.e. 25 years effective from the commencement of commercial operations for the respective projects.

The net depreciated value of the asset as of September 30, 2025 is ₹ 749.71 million. As of September 30, 2025, the UMD PPA had a remaining term of over 15 years and four months. For further details of the UMD PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The actual commercial operations date is November 16, 2015 and March 21, 2016 for UMD project 1 and UMD project 2, respectively.

Land

UMD owns part of the land and occupies part of the land on which the project is situated on a freehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 156.69 million. As of September 30, 2025, UMD has availed debt of ₹ 986.45 million from IndiGrid.

Universal Saur Urja Private Limited ("USUPL")

USUPL entered into two power purchase agreements, each dated January 25, 2012; (i) No. 119 for 10MW with NVVN for 10MW capacity as amended; and (ii) No. 120 for 10MW with NVVN for 10 MW capacity as amended, for sale of electricity from the projects. Further, UPPCL and USUPL entered into a power purchase agreement dated April 6, 2015, as amended, wherein UPPCL agreed to procure 30MW (AC)/37 MW(DC) electricity from USUPL at pre-determined tariff of ₹9.33 per unit (collectively, the "**USUPL PPA**").

The net depreciated value of the asset as of September 30, 2025 is ₹ 1,653.68 million. As of September 30, 2025, the USUPL PPA had a remaining term of over 16 years. For further details of the USUPL PPA and the Jodhpur project PPAs, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date for the USUPL Project is September 15, 2016 and for the Jodhpur project is February 26, 2013.

Land

The land on which the USUPL project is situated is held by USUPL on a freehold basis and the land on which the Jodhpur project is situated is held by USUPL on a freehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 356.68 million. As of September 30, 2025, USUPL has availed debt of ₹ 1,723.64 million from IndiGrid.

Jaisalmer Urja VI Private Limited ("JUPL")

JUPL was incorporated on November 19, 2019. JUPL has entered into a PPA dated August 10, 2020 with SECI ("**JUPL PPA**"), whereas SECI agreed to procure power from JUPL for 300 MW from the solar power generation facility located at Village Mandhopura, Fatehgarh, Jaisalmer, Rajasthan at a pre-determined tariff of ₹ 2.71/kWh, for the entire term of the JUPL PPA i.e. 25 years from the commercial operations date. We acquired JUPL in February, 2024.

The net depreciated value of the asset as of September 30, 2025 is ₹ 12,316.20 million. As of September 30, 2025, the JUPL PPA had a remaining term of over 21 years and six months. For further details of the JUPL PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is December 16, 2021.

Land

The land on which the project is situated is held by JUPL on a leasehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 914.58 million. Further, JUPL has issued OCDs amounting to ₹ 105.87 million, as of September 30, 2025. As of September 30, 2025, JUPL has availed debt of ₹ 11,289.29 million from IndiGrid.

Renew Surya Aayan Private Limited ("RSAPL")

RSAPL was incorporated on June 22, 2020. RSAPL entered into power purchase agreement dated June 14, 2022 with SECI ("**RSAPL PPA**"), wherein SECI agreed to procure power from RSAPL for 300 MW from the solar power generation facility located at Village Neemba, Fatehgarh, Jaisalmer, Rajasthan at a pre-determined tariff of ₹ 2.37/kWh, for the entire term of the RSAPL PPA i.e. 25 years from the commercial operations date. We acquired RSAPL in June 2025.

The net depreciated value of the asset as of September 30, 2025 is ₹ 13,407.34 million. As of September 30, 2025, the RSAPL PPA had a remaining term of over 23 years and five months. For further details of the RSAPL PPA, please see the section entitled "*Our Business - Summary of Power Purchase Agreements*" on page 318.

Commissioning

The commercial operations date is (i) 290 MW on March 24, 2024, and (ii) 10 MW on May 13, 2024.

Land

The land on which the project is situated is held by RSAPL on a leasehold basis.

Financial Indebtedness

As of September 30, 2025, there was no debt outstanding to external lenders and the revenue from operations was ₹ 834.12 million. Further, RSAPL has issued OCDs amounting to ₹ 110.00 million, as of September 30, 2025. As of September 30, 2025, RSAPL has availed debt of ₹ 14,010.14 million from IndiGrid.

Summary of the Power Purchase Agreements

Term: The PPAs are typically valid for a period of 25 years from the commercial operations date of the relevant Solar Assets. The PPAs also provide for extension of the term, if such extension is mutually agreed upon by the parties to such PPAs.

Tariff and Billing: The PPAs typically prescribe a fixed tariff for the operational period of the Solar Assets. These agreements indicate the processes for billing and the procedure for payment of bills by the DISCOMs. The PPAs provide that the DISCOMs will be liable to pay a late payment surcharge on any amount due beyond the due date. Further, the PPAs also typically provide for rebates payable to the DISCOMs by the SPVs for the payments made.

Evacuation System and Metering: In accordance with the PPAs, the Solar Assets are responsible for the evacuation of power from the Solar Assets to certain interconnection points ("**Delivery Points**"), as set out in the Solar PPAs. All costs and losses up to that point will on the account of the Solar Assets. Further, the Solar Assets are required to bear all costs pertaining to installation, testing, calibration, maintenance, renewal and repair of meters on their side of the Delivery Points.

Letter of Credit: The DISCOMs are required to open unconditional, revolving and irrevocable letters of credit, through a scheduled bank, in favour of the Solar Assets. In the event the DISCOM fails to pay a bill within the due date, the Solar Assets may draw upon such letter of credit.

Minimum Guaranteed Offtake: In accordance with the PPAs, the Solar Assets are required to generate a minimum amount of energy from the relevant solar projects. In the event a Solar Asset is unable to generate such minimum offtake for any contract year, the Solar Asset may be required to pay a compensation or penalty amount to the relevant DISCOM.

Curtailment: In terms of the PPAs, the DISCOMs reserve the right to shut down the line during the occurrence of an emergency or such other events as prescribed in the PPAs. Accordingly, the DISCOMs have no obligation to evacuate power nor to pay any compensation during such period.

Events of Default and Termination: The PPAs contain standard events of default affecting the Solar Assets, including, amongst others, (i) repudiation of the PPA by the Solar Asset without rectification of such breach within a specified time period; (ii) assignment, mortgages or charges or purports to assign, mortgage or charge any assets or rights of the Solar Asset under the PPA in violation of its terms or the viability gap funding securitization agreement executed pursuant to the PPA; (iii) material breach of any obligations by the Solar Asset; (iv) change in controlling shareholding of the Solar Asset before the specified time frame under the PPA; (v) the failure to commence supply of power to the DISCOM up to the contracts capacity by the end of the specified period in the PPA; and (vi) if the Solar Asset becomes voluntarily or involuntarily the subject of any bankruptcy or insolvency or winding up proceedings and such proceedings remain uncontested for a specified period of time or any winding up or bankruptcy or insolvency order is passed against the Solar Asset or the Solar Asset goes into liquidation or dissolution or has a receiver or any similar officer appointed over all or substantially all of its assets or official liquidator is appointed to manage its affairs, except in specified circumstances. The DISCOMs may terminate the PPAs by issuing a notice of termination to the Solar SPVs in the event of occurrence of an event of default. The PPAs also provide that in case of a default by the Solar Asset, the lenders of such Solar Asset may exercise their rights, if any, under the financing arrangements, to seek substitution of the Solar Asset by a selectee for a residual period of the PPA for the purpose of securing the payments of the total debt amount from the Solar Asset and performing the obligations of the Solar Asset.

Force Majeure: The PPAs provide for standard force majeure events which include, amongst others, acts of god, epidemic, radioactive contamination or ionising radiation originating from a source in India, fire, explosion, acts of war, terrorist or military action (only if it is declared/notified by the competent state/central authority/agency), civil commotion, compulsory acquisition in national interest or expropriation of any Solar Asset or rights of the Solar Asset, and any other cause, accidents or circumstances beyond each control of the parties. However, the PPAs typically exclude the following events, amongst others, from the ambit of force majeure events: unavailability, late delivery or change in cost of plants and machinery, equipment, materials, spares parts or consumables, delay in performance of any contractor or sub-contractor or their agents, non-performance resulting from normal wear and tear typically experienced in power generation materials and equipment, strikes at the facilities of the affected party, insufficiency of finances or funds or the agreement becoming onerous to perform, and non-performance caused by or connected with the affected party's negligent or intentional acts, errors or omissions, failure to comply with an Indian law or breach of or default under the PPA. Either party may not undertake their obligations under the PPA if their ability to perform obligations under the PPA is affected by a force majeure event.

Operation and Maintenance

The operation and maintenance of the Portfolio Assets is the responsibility of the Project Managers, pursuant to their obligations under the Project Implementation and Management Agreements. The Project Managers are also subject to the oversight of the Power System Operation Corporation Limited and CERC, which are responsible for system operation and control, including inter-state and intra-state power management, inter-state and inter-regional transfer of power, covering contingency analysis and operational planning on a real-time basis as well as the operation of regional and state-level unscheduled interchange pool accounts and regional and state-level reactive energy accounts. Consequently, our operations and maintenance strategy focuses on deploying prudent grid management practices to achieve the following objectives:

- to achieve the targeted system availability specified in the TSAs and BESPAs;
- to optimize the life cycle cost of transmission and BESS assets and solar assets by preventive actions;
- to maximize excellence in quality, health, safety, security and environment; and
- to optimize operation and maintenance costs.

The Project Managers develop and track preventive maintenance plans and provides all personnel required to help ensure safe and reliable transmission and BESS assets and solar assets. By performing preventative and corrective maintenance on our assets, the Project Managers strive to minimize the need for reactive maintenance, which may adversely impact reliability and tends to be more costly than preventative maintenance. Preventive and corrective maintenance includes activities such as inspections, monitoring, servicing, vegetation management, fault restoration, repairs and patrols following failures, including by using advanced technologies. The transmission lines and substations of the majority of our Transmission Assets have achieved at least 98% of annual cumulative target availability during the half year ended September 30, 2025 and the past three Fiscals. The Project Managers also emphasize on-line techniques in order to minimize shutdown time for periodic maintenance checks and breakdown maintenance. Furthermore, to prepare for certain force majeure situations that cannot be predicted, the Project Managers partner with third party vendors to implement alternative transmission systems, such as emergency restoration systems, who in turn provide the skilled labor necessary to install and operate these emergency restoration systems.

Insurance

We have obtained insurance policies covering majority of our Portfolio Assets to cover risks including loss or damage from fire, flood, storm, terrorism, sabotage, machinery breakdown and any accidental and physical loss and destruction or damage to the insured property due to a cause, other than as excluded in the insurance policies. Certain of these insurance policies are subject to exclusions for certain circumstances including, among others, faulty or defective design materials or workmanship, wear and tear, larceny, acts of fraud or dishonesty, any wilful act or wilful negligence on the part of the insured or any person acting on its behalf, war, invasion, damage caused by nuclear weapons material or ionising radiation or contamination by radioactivity from any nuclear fuel or nuclear waste, loss or damage caused directly or indirectly from discharge of pollutants or contaminants, and certain properties, including, among others, money, cheques, bonds, credit cards, securities of any description and explosives. The principal types of insurance coverage typically include industrial all risk and burglary.

Human Resources

The details of the employees of the Investment Manager by function, as of September 30, 2025 are set forth in the table below:

Function	As of September 30, 2025	
	Number of employees	% of total
Managing Director	1	8.33%
Chief Financial Officer	1	8.33%
Mergers and Acquisitions	3	25.00%
Capital raise and Investor relations	1	8.33%
Asset management and regulatory	1	8.33%
Finance and compliance	2	16.67%
Others	3	25.00%
Total	**12**	**100.00%**

Competition

As per the CRISIL Report, the transmission business is perceived as a low risk business as annual levelised tariffs are independent of demand-supply dynamics and fluctuation in electricity tariffs. Further due to better payment security mechanism and assurance of payment from central and state transmission utilities, this business model has attracted many new players. Players across the value chain have participated in these bids including power sector players, construction companies and transmission equipment suppliers amongst others. Further, the Government has decided to invite bids for 50 GW of renewable energy capacity annually for the next five years i.e., from Fiscal 2024 till Fiscal 2028. The tendering activity for utility scale renewable projects has outpaced the Government of India's target of 50 GW for Fiscal 2024. With the announcement of several large-scale PS projects across the country, the PS segment is also expected to witness significant adoption of energy storage systems. Major renewable energy developers are aggressively adopting the energy storage systems.

Health, Safety and Environment

We are subject to extensive health, safety and environmental laws, regulations and government-prescribed operating procedures and environmental technical guidelines which govern our services, processes and operations. In compliance with these requirements, we maintain a health, safety and environment ("**HSE**") policy to address, among others, assessment of all occupational health related hazards and risks and ensure appropriate measures for elimination, reduction and control of these risks are in place. We are committed to ensuring the health and safety of their employees by providing and maintaining an accident-free and healthy workplace through implementation of HSE management systems in order to minimize health and safety hazards. Furthermore, the essential elements of our HSE program include, among others, (i) management commitment, (ii) policies and principles, (iii) integrated organization structure, (iv) risk management; (v) training and development, and (vi) performance evaluation through indicators. We believe that the Portfolio Assets are each in compliance in all material respects with Indian legislation in relation to environment laws and regulations and employee health and safety.

Properties

Pursuant to Section 164 of the Electricity Act, the Transmission Assets have been granted 'Right of Way' across the land that the transmission lines pass through. We have leasehold rights from the relevant state authorities, for the land on which our substations for BDTCL are situated, for the duration of the transmission licenses. Additionally, we own parcels of land for BDTCL, JTCL, PTCPL and MTPL. We have leasehold rights for the land on which some of our Solar Assets are situated, while we own parcels of land on which some of our Solar Assets such as TNSPEPL, UMD, USUPL, Solar Edge, PLG and TKSPL are situated. The registered office of the Investment Manager is located on leasehold land.

Intellectual Property

IndiGrid has registered the “IndiGrid” logo as a trademark under various classes such as Class 7, Class 9, Class 11, Class 35, Class 37, Class 40 Class 42 and Class 99.

Further, IndiGrid Limited has filed an application to trademark the word “EnerGrid” under various classes such as Class 4, Class 7, Class 9, Class 11, Class 35, Class 37, Class 39, Class 40 and Class 42, an application to trademark the “EnerGrid” logo under Class 4, Class 7, Class 9, Class 11, Class 35, Class 37, Class 39, Class 40 and Class 42.

Unitholding of the Sponsor, Sponsor Group, Investment Manager, Project Managers and Trustee

For details of the Units held by the Sponsor and Sponsor Group, please see the sections entitled "*Information Concerning the Units*" on page 322. The Trustee and the Project Managers do not hold any Units and shall not acquire any Units in this Issue. The Investment Manager holds 0.06% Units of the outstanding Units, being 552,825 Units and shall not acquire any Units in this Issue.

Unitholding of the directors or key managerial personnel of the Investment Manager

As on the date of this Placement Document, except as disclosed below, none of the directors or key personnel of the Investment Manager hold any Units in IndiGrid.

Sr. No.	Name of Director	Number of Units
1.	Harsh Dinesh Shah	161,108
2.	Meghana Pandit	63,130
3.	Urmil Shah	9,000

Sponsor and Sponsor Group lock-in

As on December 31, 2025, the Sponsor and Sponsor Group holds 1.17% Units of the outstanding Units, being 10,051,932 Units. Additionally, as IndiGrid has been listed for more than 7 years, in accordance with the InvIT Regulations, the Sponsor and the Sponsor Group are required to lock-in Units as follows:

From the beginning of sixth year after the date of listing pursuant to the initial offer and till the end of 10th year from the date of listing pursuant to the initial offer	3% of total Units or ₹ 500 crores, whichever is lower*
From the beginning of 11th year after the date of listing pursuant to the initial offer and till the end of 20th year from the date of listing pursuant to the initial offer	2% of total Units or ₹ 500 crores, whichever is lower*
After completion of the 20th year from the date of listing pursuant to the initial offer	1% of total Units or ₹ 500 crores, whichever is lower*

** Provided that the maximum value of Units to be held by the Sponsor and Sponsor Group for compliance with the above shall not exceed ₹500 crores or such other value as may be decided by SEBI from time to time wherein such valuation shall be based on the latest available net asset value of IndiGrid.*

The above lock-in requirements shall be applicable only to the additional Units issued by IndiGrid after the date of notification of the Securities and Exchange Board of India (Infrastructure Investment Trusts) (Second Amendment) Regulations, 2023, subject to compliance with the InvIT Regulations. As on the date of this Placement Document, the Sponsor has locked in 48,10,852 Units.

**The promoter of the Trustee has been allocated Units pursuant to this Issue. Allotment of such Units is subject to finalization.*

USE OF PROCEEDS

The proceeds of this Issue is up to ₹ 15,000.00 million (the "**Issue Proceeds**") and the proceeds of this Issue net of the total expenses in relation to this Issue (the "**Net Proceeds**") is up to ₹ 14,800.00 million.

Subject to compliance with applicable law, the Net Proceeds are proposed to be utilised, at the discretion of the Investment Manager and the Trustee, towards the following objects:

(i) Repayment or prepayment of borrowings availed by IndiGrid; and

(ii) General purposes.

The Investment Manager believes that abovementioned use of proceeds is consistent with IndiGrid's strategy of growth and expansion of its business and will also allow IndiGrid to meet its commitment towards distributions to Unitholders.

The details of the Issue Proceeds are provided in the following table:

(in ₹ million)

Particulars	Amount
Gross Proceeds from this Issue*	15,000.00
Less: Estimated Issue expenses	200.00
Net Proceeds	14,800.00

**Assuming full subscription and Allotment of Units. The size of the Issue shall be subject to finalisation of Allotment in the Issue.*

Requirements of Funds

The Net Proceeds are proposed to be used in accordance with the details provided in the following table:

(in ₹ million)

Sr. No.	Particulars	Amount
1.	Repayment or prepayment of borrowings availed by IndiGrid	13,320.00
2.	General purposes	1,480.00

The fund requirements mentioned above, and the proposed deployment are based on the estimates of the Investment Manager and have not been appraised by any bank, financial institution or any other external agency. The fund requirements may vary due to factors beyond the Investment Manager's control such as market conditions, competitive environment, interest rate and exchange rate fluctuations. In the event of any proposed variation in the utilization of the Net Proceeds, such variation shall be subject to (i) approval of the Unitholders and (ii) compliance with applicable law.

Any unutilised funds, until such amounts are deployed towards the objects of this Issue, as detailed herein, shall be invested by IndiGrid in the manner permitted under the provisions of the InvIT Regulations.

Details of the Objects of the Issue

The details in relation to the objects of the Issue are provided below:

1. ***Repayment or prepayment of borrowings availed by IndiGrid***

IndiGrid proposes to utilize a portion of the Net Proceeds to the extent of up to ₹ 13,320.00 million towards repayment or prepayment of certain external debt availed by IndiGrid.

IndiGrid proposes to repay the principal amount of, any or all, of the borrowings set out below:

Sr. No.	Name of Borrower	Name of Lender / Series of Non-convertible Debt Securities	*(Amounts in ₹ million)*		Interest Rate Applicable as of December 31, 2025 (in %)
			Amount Sanctioned	Principal Amount Outstanding as on December 31, 2025	
Rupee Term Loan					
1.	IndiGrid	HDFC Bank	20,000.00	15,340.00	6.95
2.	IndiGrid	Federal Bank	13,500.00	13,500.00	7.60 - 7.90
3.	IndiGrid	HSBC	6,500.00	6,500.00	6.72
4.	IndiGrid	IndusInd Bank	5,000.00	5,000.00	7.30
5.	IndiGrid	PNB Bank	20,000.00	11,298.75	7.25 - 7.85

13.	IndiGrid	Public NCD - 5 Years: Series II (Category III & IV)	964.74	964.74	7.60
Total			**98,674.59**	**85,313.34**	

* *As certified by Sen & Ray, Chartered Accountants by way of their certificate dated January 19, 2026 and January 22, 2026*
Note: Assuming full subscription and Allotment of Units. The size of the Issue shall be subject to finalisation of Allotment in the Issue.

For further details in relation to the debt availed by IndiGrid as set out above, please see the section entitled "*Financial Indebtedness and Deferred Payments*" on page 327.

The amount to be repaid by IndiGrid to the lenders shall vary based on (i) any change in the principal amount outstanding; (ii) discussions with the lenders; and (iii) other market conditions.

2. ***General purposes***

The Investment Manager shall, at its discretion, deploy the balance Net Proceeds aggregating ₹ 1,480.00 million towards general purposes, including expenses for the operation of IndiGrid, subject to compliance with the InvIT Regulations. The general purposes for which IndiGrid proposes to utilize Net Proceeds include meeting exigencies and expenses incurred or any other general purposes by IndiGrid in the ordinary course of business as considered expedient, and as approved by the Investment Manager or the Trustee, as the case may be, subject to compliance with applicable law.

The Investment Manager will have flexibility in utilizing the proceeds earmarked for general purposes, in accordance with the investment objectives of IndiGrid, policies of the board of directors of the Investment Manager and the InvIT Regulations.

Interim use of Net Proceeds

The Investment Manager will have flexibility to deploy the Net Proceeds in accordance with manner set out herein and subject to the compliance with applicable laws. Pending utilization of the Net Proceeds for the purposes described above, the Investment Manager may invest the funds in creditworthy instruments, including money market mutual funds, and deposits with banks and corporates or other securities, subject to compliance with the InvIT Regulations.

Issue expenses*

The total expenses of this Issue are estimated to be approximately ₹ 200.00 million, which will be borne solely by IndiGrid. The Issue expenses include fees and commissions payable to the Placement Agents, legal counsels, Registrar to the Issue, other advisors to this Issue, printing and stationery expenses, and all other incidental and miscellaneous expenses in relation to this Issue and listing of the Units issued pursuant to this Issue on the Stock Exchanges.

We propose to pay a fee to Axis Capital Limited ("Axis Capital**") from the net Proceeds in its capacity as a Placement Agent. While Axis Capital is an affiliate of the Trustee, it is not an associate of the Trust in terms of the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992. There is no conflict of interest under the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992, as amended, or any other applicable SEBI rules or regulations and current disclosure is being made to ensure disclosure of all transactions with affiliate of the Trustee. The current disclosure is being made to ensure disclosure of all transactions with affiliate of the Trustee.*

PLACEMENT

The Placement Agents have entered into a placement agreement dated January 19, 2026 with the Trustee (acting on behalf of, and in its capacity as the trustee of IndiGrid), Investment Manager (acting in its capacity as the investment manager of IndiGrid), the Sponsor and the Project Managers, pursuant to which the Placement Agents have agreed, subject to certain conditions, to procure subscribers for the Units in the Issue, on a reasonable efforts basis, pursuant to applicable provisions of the InvIT Regulations and Applicable Law.

The Placement Agreement contains customary representations and warranties, as well as indemnities from the Investment Manager, Project Managers and the Trustee, on behalf of IndiGrid, and it is subject to termination in accordance with the terms contained therein. The Preliminary Placement Document and this Placement Document has not been, and will not be, registered as an offer document or a prospectus. The Investment Manager (acting on behalf of IndiGrid) will make applications to list the Units issued pursuant to the Issue and admit them to trading on the Stock Exchanges. No assurance can be given as to the liquidity or sustainability of the trading market for such Units, the ability of Unitholders to sell their Units or the price at which holders of the Units will be able to sell their Units. The Placement Agents and their respective affiliates may engage in transactions with and perform services for IndiGrid, the Investment Manager, the Project Managers, the Trustee, the Portfolio Assets, the Sponsor, the Sponsor Group and their respective affiliates in the ordinary course of business and may have engaged, or may in the future engage, in financial advisory and financing services transactions with such entities, for which they may have received compensation and may in the future receive compensation.

Lock-up

Investment Manager and Trustee

The Investment Manager and Trustee (acting on behalf of IndiGrid), shall not, without the prior written consent of the Placement Agents, during the period commencing on the Closing Date and ending 90 days from the Closing Date (both dates inclusive), directly or indirectly: (i) issue, offer, pledge, sell, contract to sell or issue, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, lend or otherwise transfer or dispose of, directly or indirectly, any Units, or any securities convertible into or exercisable or exchangeable for the Units; (ii) enter into any swap or other agreement that transfers, directly or indirectly, in whole or in part, any of the economic consequences of ownership of the Units or any securities convertible into or exercisable or exchangeable for the Units; (iii) deposit Units or any securities convertible into or exercisable or exchangeable for Units or which carry the right to subscribe for or purchase Units or which carry the right to subscribe for or purchase Units in depository receipt facilities or enter into any such transactions (including a transaction involving derivatives) having an economic effect similar to that of a sale or deposit of Units in any depository receipt facility, or (iv) publicly announce its intention to enter into the transactions referred to in (i) to (iii) above.

Sponsor

The Sponsor shall not, without the prior written consent of the Placement Agents, during the period commencing on the Closing Date and ending 60 days from the Closing Date (both dates inclusive), directly or indirectly: (i) offer, lend, sell, pledge, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell or issue, grant any option, right or warrant to purchase, lend or otherwise transfer or dispose of, directly or indirectly, any Units, or any securities convertible into or exercisable or exchangeable for the Units; (ii) enter into any swap or other agreement that transfers, directly or indirectly, in whole or in part, any of the economic consequences of ownership of the Units or any securities convertible into or exercisable or exchangeable for the Units; (iii) deposit Units or any securities convertible into or exercisable or exchangeable for Units or which carry the right to subscribe for or purchase Units or which carry the right to subscribe for or purchase Units in depository receipt facilities or enter into any such transactions (including a transaction involving derivatives) having an economic effect similar to that of a sale or deposit of Units in any depository receipt facility, or (iv) publicly announce its intention to enter into the transactions referred to in (i) to (iii) above.

*********Post Issue principal amount outstanding represents principal amount outstanding as on September 30, 2025 reduced by partial repayment of the outstanding external debt of IndiGrid and may increase or decrease in the event the external debt of the Trust is not partially repaid through the Net Proceeds as disclosed in the section entitled "Use of Proceeds" on page 324 or repaid in different proportion or on account of Ind AS adjustment. The post-Issue principal amount outstanding remains subject to full subscription and allotment of Units, and receipt and utilization of the Net Proceeds in the manner set out in the section entitled "Use of Proceeds" on page 324. The post-Issue principal amount outstanding represents principal amount outstanding as on September 30, 2025 may be reduced by other prepayment opted for, or repayment required in accordance with the relevant financing documents*

Leverage

In accordance with the InvIT Regulations, the Unitholders of IndiGrid, at the annual general meeting held on July 26, 2019, approved the increase in the aggregate consolidated borrowings and deferred payments of IndiGrid up to 70% of the aggregate of the Trust Assets, including but not limited to issuance of debentures, term loans, advances, deposits and bonds. IndiGrid or the Portfolio Assets may, from time to time, avail further borrowings or enter into re-financing arrangements and draw down funds thereunder, within the leverage limits as are approved by the Unitholders.

Principal terms of the borrowings availed by certain Portfolio Assets from the Trust

The principal terms of the transaction documents entered in relation to the loans between IndiGrid and certain Portfolio Assets are as follows:

1. *Tenor and Repayment*: The interest is around 9.50% to 16.00% per annum. The Portfolio Asset shall repay the principal amount of the Loan to the Trust or the Investment Manager, through a single bullet payment due and payable in accordance with the transaction documents.

2. *Covenants:* The transaction documents entered into by IndiGrid and certain Portfolio Assets, provide that the Portfolio Assets shall at all times:

   (i). comply with all the laws;
   (ii). pay all tax assessments, reassessments, government charges, levies, lawful claims and obligations;
   (iii). preserve and maintain its corporate existence and legal structure;
   (iv). permit the Trust or its agents or representatives to examine and make copies of the records, registers and books of accounts; and
   (v). keep proper books of records and accounts.

3. *Events of Default:* The transaction documents entered into by the Portfolio Assets provide certain events of default, including:

   (i). failed to pay any amount under the agreement;

   (ii). any material loss or damage where insurance proceeds are not applied as required, repair and reinstatement is not effected as required, or sufficiency of funds to repair and reinstate and meet debt service cannot be demonstrated; and

   (iii). defaulted under the financing facilities availed by the Trust from its lenders under the relevant financing agreements with such lenders, provided that the Portfolio Asset is not in default under any other financing facilities, if any, availed by the Portfolio Assets from any other banks/financial institutions.

4. *Consequences of Events of Default:* The transaction documents provide certain consequences of events of default, including:

   (i). recall the whole or part of the principal amount along with any accrued interest; and
   (ii). declare the entire amount outstanding to be payable.

This is an indicative list of the terms of transaction documents in relation to the loan between IndiGrid and certain Portfolio Assets and there may be additional terms, conditions and requirements under such transaction documents.

Principal terms of the borrowings availed by us

The principal terms of the borrowing arrangements entered into by IndiGrid are as follows:

1. *Security:* Loans under the loan agreements are secured by, amongst others, (i) first pari-passu charge on entire current assets of the IndiGrid, including loans and advances and any receivables accrued/realized from such loans and advances extended by IndiGrid to its Hold Cos/ SPVs, (ii) first pari-passu charge on all current assets of the IGL, IGL 1 and IGL 2, including loans and advances and any receivables accrued/realized from loans and advances extended by the IGL, IGL 1 and IGL 2 to its SPV, (iii) first pari-passu charge on the escrow account of the IndiGrid (excluding ISRA/DSRA & distribution accounts), (iv) pledge of the equity share capital of the specified SPVs as per respective borrowing agreements, and (v) first and exclusive charge on the ISRA/DSRA of respective borrowing.

2. *Pre-payment:* We may prepay the outstanding amount of its loans, in full or in part, any time on the terms and conditions agreed with the lender after paying the prepayment premium, if applicable. All prepayments shall be made together with the interest, charges and other monies due and payable to the lenders up to the date of such prepayment.

3. *Restrictive Covenants:* Borrowing arrangements entered into by IndiGrid contain standard restrictive covenants, including:

   (i). change the general nature of its business as per the applicable law;

   (ii). change the Amended and Restated Trust Deed or other constitutional documents in any material way which would prejudicially affect the interests of the debenture holders;

(iii). undertake or permit any consolidation, re-organization, corporate restructuring, capital reduction, or compromise with its creditors or unitholders, except in case of procurement/purchase of additional assets and subject to:

(a) the credit rating of IndiGrid/ Facility is AAA from all the rating agencies;

(b) as long as overall debt is as per the InvIT Regulations; and

(c) prior written intimation of 20 days is provided to the debenture trustee;

(iv). any additional indebtedness exceeding the thresholds prescribed in the transaction documents without the approval of debenture holders;

(v). change in control of any of the Portfolio Assets;

(vi). wind-up, liquidate or dissolve its affairs or take any actions towards the same; and

(vii). such other customary covenants for transaction of similar nature.

4. *Events of Default:* The borrowing arrangements entered into by IndiGrid contain standard events of default, including:

(i) default in payment of principal amount or interest along with additional interest if applicable or any other amount payable;

(ii) abandonment of Portfolio Assets by IndiGrid and/or the projects by the Portfolio Assets having a material adverse effect;

(iii) revocation of material clearances;

(iv) default in performance of material conditions and covenants;

(v) business of the Portfolio Assets becomes unlawful; and

(vi) invalidity of the financing agreements.

5. *Consequences of default*: In terms of the borrowing arrangements entered into by us, the following, amongst others, are the consequences of default:

(i) cancellation or suspension of the lenders' obligation to lend;

(ii) acceleration of repayment obligations and declaration of amounts outstanding to be forthwith due and payable;

(iii) enforcement of security interests; and

(iv) exercise of other remedies as permitted or available under the borrowing arrangements.

The principal terms of the borrowing arrangements entered into by KBPL are as follows:

1. *Security*: (i) a first ranking charge by way of a hypothecation on all the movable assets of the KBPL (including plant, machinery, machinery spares, tools and accessories, furniture, fixture, vehicles, raw material, stock-in trade, inventory and all other movable properties of whatsoever nature), both present and future; (ii) a first ranking charge by way of a hypothecation on all its current assets, including but not limited to book debts, operating cash flows, receivables, commissions or revenues whatsoever arising, both present and future; (iii) a first ranking charge by way of a hypothecation on all the KBPL's intangible assets, including but not limited to intellectual property, goodwill, rights, undertakings, uncalled capital, both present and future; (iv) a first ranking charge by way of a hypothecation on all of the KBPL's borrowers' account including the designated account (save and except the distribution account), account and the statutory dues payment account and amounts lying to the credit of such accounts amongst others, both present and future; (v) a first ranking charge of all the rights, permits, title, interest, benefits, claims, Insurances and demands whatsoever of the KBPL in the project documents, insurances, any guarantees, both present and future; and (vi) a first ranking pledge over at least 51% (fifty one percent) of the entire share capital of the KBPL, on a fully diluted basis.

2. *Tenor and repayment*: We may repay the outstanding amounts within 12 years (as per repayment schedule mentioned in relevant financing agreements) from the Long Stop Date being the earlier of the commercial operations date and the scheduled commercials operations date of KBPL.

3. *Restrictive Covenants:* The restrictive covenants include:

(i) The Borrower shall not enter into any amalgamation, demerger, merger, consolidation or corporate reconstruction.

(ii) The Borrower shall not amend or vary any of its constitutional documents without the prior written consent of the Lender save and except any amendment necessitated pursuant to change in Applicable Laws

4. *Events of Default:* The borrowing arrangements entered into by KBPL contain standard events of default, including:

(i) non-payment of interest or principal amount or any other amount due and payable as per transaction documents on the due date;

(ii) breach of obligations;

(iii) insolvency, winding up, cessation of business, cross default etc.

This is an indicative list of the terms of the borrowings availed by us and there may be additional terms, conditions and requirements under the various borrowing arrangements entered into by us.

Given the nature of these borrowings and the terms of prepayment, the aggregate outstanding borrowing amounts may vary from time to time. In addition to the above, each of the Portfolio Assets may, from time to time, enter into re-financing arrangements and draw down funds thereunder.

(x) 50,000 fully paid-up, senior, secured, listed, rated, redeemable, non-convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon of 7.84% per annum aggregating up to ₹ 5,000 million ("**Series U**");
(xi) 50,000 fully paid up senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon of 7.88% per annum aggregating up to ₹ 5,000 million ("**Series W**");
(xii) 50,000 fully paid up senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon of 7.88% per annum aggregating up to ₹ 5,000 million ("**Series X**")
(xiii) 65,000 fully paid up, senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon of 7.87% per annum aggregating up to ₹ 6,500 million ("**Series Y**");
(xiv) 50,000 fully paid up, senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon of 7.49% per annum aggregating up to ₹ 5,000 million ("**Series Z**");

(xv) 7,000 fully paid up, senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon of 7.80% per annum aggregating up to ₹ 700 million ("**Series AA**");

(xvi) 63,000 fully paid up, senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon of 7.58% per annum aggregating up to ₹ 6,300 million ("**Series AB**");

(xvii) 46,000 fully paid up, senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon of 6.40% per annum aggregating up to ₹ 4,600 million ("**Series AC**");

(xviii) 30,000 fully paid up, senior, secured, listed, rated, redeemable, non-convertible debt securities or debentures of face value of ₹ 0.1 million each with an initial coupon of 7.04% per annum aggregating up to ₹ 3,000 million ("**Series AD**");

(xix) 150,000 fully paid up, senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon of 7.28% per annum aggregating up to ₹ 15,000 million ("**Series AE**");

(xx) 120,000 fully paid up, senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon 7.07% per annum aggregating up to ₹12,000 million ("**Series AF**");

(xxi) 30,000 fully paid up, senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon 7.01% per annum aggregating up to ₹ 3,000 million ("**Series AG**");

(xxii) 190,000 partly paid up, senior, secured, listed, rated, redeemable, non – convertible debt securities or debentures having a face value of ₹ 0.1 million each with an initial coupon 7.345% per annum aggregating up to ₹ 19,000 million ("**Series AH**");

Public Debt Securities

Further, IndiGrid has, on a public issue basis, issued rated, listed, secured, redeemable, non-convertible debt securities of face value of ₹ 1,000 each for an amount aggregating up to ₹ 98.9 million at interest rates ranging from 7.45% to 8.20% as follows:

(i). 8,59,846 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 7.45% per annum aggregating up to ₹ 859.846 million ("**Public NCD- 5 Years: Series II (Category I & II)**")

(ii). 9,64,739 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 7.60% per annum aggregating up to ₹ 964.739 million ("**Public NCD- 5 Years: Series II (Category III & IV)**")

(iii). 10,04,247 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 7.70% per annum aggregating up to ₹ 1004.247 million (:**Public NCD- 7 Years: Series III (Category I & II)**")

(iv). 4,09,090 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 7.90% per annum aggregating up to ₹ 409.09 million ("**Public NCD- 7 Years: Series III (Category III & IV)**")

(v). 4,718 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 7.49% per annum aggregating up to ₹ 4.718 million ("**Public NCD- 7 Years: Series IV (Category I & II)**")

(vi). 1,20,336 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 7.69% per annum aggregating up to ₹ 120.336 million ("**Public NCD- 7 Years: Series IV (Category III & IV)**")

(vii). 1,26,458 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 7.95% per annum aggregating up to ₹ 126.458 million ("**Public NCD- 10 Years: Series V (Category I & II)**")

(viii). 59,91,836 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 8.20% per annum aggregating up to ₹ 5991.836 million ("**Public NCD- 10 Years: Series V (Category III & IV)**")

(ix). 4,719 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 7.72% per annum aggregating up to ₹ 4.719 million ("**Public NCD- 10 Years: Series VI (Category I & II)**") (x). 4,12,180 fully paid up, senior, secured, listed, rated, redeemable non-convertible debt securities of face value of ₹ 1,000 each with an initial coupon 7.97% per annum aggregating up to ₹ 412.18 million ("**Public NCD- 10 Years: Series VI (Category III & IV)**")

(collectively, the "**IndiGrid Debentures**").

The principal terms of the transaction documents entered into by IndiGrid in relation to the IndiGrid Debentures are as follows:

1. *Security:* The IndiGrid Debentures are secured by, amongst others, (i) a first Pari-passu charge on entire current assets of the IndiGrid, including loans and advances and any receivables accrued/realized from such loans and advances extended by IndiGrid to its HoldCos/ SPVs, (ii) a first pari-passu charge on all current assets of the IGL, IGL 1 and IGL 2, including loans and advances and any receivables accrued/realized from loans and advances extended by the IGL, IGL 1 and IGL 2 to its SPVs, (iii) a first pari-passu charge on Escrow account of the IndiGrid (excluding ISRA/DSRA and distribution accounts), (iv) pledge of the equity share capital of the specified SPVs as per respective debenture agreements, and (v) first and exclusive charge on the ISRA/DSRA of respective debentures. (The security as stipulated, shall be created within a specified period from the deemed date of allotment and perfected within a specified period from the date of its creation.

2. *Tenor and Repayment*: The IndiGrid borrowings have a tenor of up to 22 years from the date of drawdown, and the repayment of the relevant borrowing would be done as per the relevant repayment schedule.

3. *Restrictive Covenants:* The transaction documents entered into by IndiGrid, provide that IndiGrid shall not affect any of the following, without the prior written permission of the debenture trustees:

   (i). change the general nature of its business as per the applicable law;

   (ii). change the Amended and Restated Trust Deed or other constitutional documents in any material way which would prejudicially affect the interests of the debenture holders;

   (iii). undertake or permit any consolidation, re-organization, corporate restructuring, capital reduction, or compromise with its creditors or unitholders, except in case of procurement/purchase of additional assets and subject to:

      (a) the credit rating of IndiGrid/ Debenture is AAA from all the rating agencies;

      (b) as long as overall debt is as per prevailing guidelines; and

      (c) prior written intimation of 60 days is provided to the debenture trustee;

   (iv). any additional indebtedness exceeding the thresholds prescribed in the transaction documents without the approval of debenture holders;

   (v). change in control of any of the Portfolio Assets;

   (vi). wind-up, liquidate or dissolve its affairs or take any actions towards the same; and

   (vii). such other customary covenants for transaction of similar nature.

4. *Events of Default:* The transaction documents entered into by IndiGrid provide certain events of default, including:

   (i) non-payment of interest or principal amount or any other amount due and payable in relation to the IndiGrid Debentures in terms of the transaction documents on the due date;

   (ii) misleading representations and warranties;

   (iii) commencement of voluntary insolvency, bankruptcy, winding up or other similar proceedings, including under the InvIT Regulations, by IndiGrid, the Sponsor or the Unitholders; and

   (iv) cessation of business;

   (v) non-creation or perfection of the security within the timelines stipulated under the transaction documents or security becoming invalid, in jeopardy, invalid or not having the ranking under the transaction documents, as stipulated;

   (vi) material adverse effect;

(vii) delisting of the Units or the IndiGrid Debentures; and

(viii) default under any term of the relevant financing agreement or any other financing agreement entered into by the Portfolio Assets leading to a material adverse effect.

5. *Consequences of Events of Default:* The transaction documents entered into by IndiGrid provide certain consequences of events of default, including:

(i) applying all cash proceeds arising in the escrow account towards repayment of IndiGrid's obligations to the debenture holders;

(ii) enforcement of security and any rights available under transaction documents;

(iii) applying the amounts standing to the credit of the escrow account and the permitted investments towards payment of dues under the IndiGrid Debentures;

(iv) exercise all or any rights or remedies of IndiGrid under one or more project documents against any parties to such project documents; and

(v) exercise such other remedies as permitted or available under applicable law including any circulars issued by RBI or SEBI.

This is an indicative list of the terms of transaction documents in relation to the IndiGrid Debentures and there may be additional terms, conditions and requirements under such transaction documents.

Principle terms of the optionally convertible debentures issued by certain Portfolio Assets

Certain Portfolio Assets have issued optionally convertible debentures ("**OCDs**") to third parties. The principal terms of the OCDs are as follows:

1. *Tenure of the securities*: The tenure of the OCDs shall be up to February 28, 2030, unless converted or redeemed.

2. *Redemption*: The holder of the OCDs ("**OCD Holders**") can redeem the same on the agreed upon redemption date by sending a notice. Payments will include interest followed by principal, subject to tax deductions as required by law.

3. *Use of Proceeds*: 100% of proceeds to be utilized towards funding of capex in relation to the Project (as defined under Project Agreements executed by the relevant Portfolio Assets).

4. Conversion Rights:

(i) The OCD Holders must inform the relevant Portfolio Assets 45 days before the exit event if it chooses to convert the OCDs into equity shares;
(ii) Conversion cannot exceed the OCD Holder's proportionate capital contribution in the relevant Portfolio Assets on a fully diluted basis;
(iii) Shares issued upon conversion will rank equally with existing equity shares, including dividend rights, and must comply with Project Documents and InvIT Regulations;
(iv) If some OCDs can't be converted due to restrictions, such OCDs will be converted in tranches within 15 days, maintaining the same equity stake as if converted all at once; and
(v) No principal or interest will be payable on the OCDs converted into equity shares. For non-converted securities, interest will accrue, and the OCD Holder can either redeem or convert them into equity shares.

5. *Share Capital*: The Portfolio Assets shall at all times maintain a sufficient number of authorized and unissued equity shares in the share capital of the Portfolio Assets to permit the conversion of the OCDs.

6. *Transferability:* The OCD Holders can transfer the OCDs held by it to affiliates anytime under the agreement terms.

Principle terms of the compulsory convertible debentures issued by certain portfolio Assets

Certain Portfolio Assets, have issued compulsorily convertible debentures ("**CCDs**") to their shareholders. The principal terms of the CCDs are as follows:

1. *Interest:* The interest for each CCDs is 15% per annum until they are converted to equity shares.

2. *Payment of Interest:* Till the commercial operations date, the interest shall accrue at the end of every quarter beginning from the date of subscription of the CCDs. However, the accrued interest will be payable post COD.

3. *Conversion:* Each CCD shall be converted to one equity share of the Portfolio Asset. The debentures might be converted at any time at the option of the debenture holder post the COD or on the 20th anniversary of the date of issuance of the CCD.

4. *General Terms and Conditions:* The CCD agreements entered into by the Portfolio Assets contain standard restrictive covenants, including:

   (i) The CCDs cannot be sold in stock exchanges in or outside India;
   (ii) The rights and conditions attached to the CCDs may not be varied unless a resolution of the board of directors of the relevant Portfolio Assets is passed and prior consent of the lenders is procured;
   (iii) The relevant Portfolio Assets cannot undertake issuance of any securities without prior consent of the debenture holder; and
   (iv) The equity shares to be issued upon the conversion of the CCDs shall not be issued as fractional shares and the number of equity shares to be issued shall be rounded off to the next highest round number.

Principal terms of the non-convertible debt securities issued by certain Portfolio Assets

Certain Portfolio Assets have issued non-convertible debentures ("**NCDs**") to third parties. The principal terms of the NCDs are as follows:

1. *Interest*: The interest of the NCDs range from 7% to being computed on a day to day basis and payable on redemption.

2. *Redemption:* The NCDs are to be redeemed at par.

3. *Marketability and transferability:* The NCDs are non-marketable and non – transferable, subject to the terms of the agreement entered into in relation to the NCDs.

4. *Use of Proceeds:* All amounts invested should be used by the relevant Portfolio Asset for the construction and operation of the Project.

In addition, we have availed certain non-fund based borrowings from various banks.

Status of lender consents

IndiGrid has received all lender consents in relation to this Issue. As of the date of this Placement Document, there are no lender consents required in relation to the debt of the Portfolio Assets.

DISTRIBUTION

Statements contained in this section entitled "Distribution" that are not historical facts are forward-looking statements. Such statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those that may be projected. Under no circumstances should the inclusion of such information herein be regarded as a representation, warranty, undertaking or prediction with respect to the accuracy of the underlying assumptions by IndiGrid, the Trustee, the Sponsor, the Investment Manager, the Placement Agents or any other person. Bidders are cautioned not to place undue reliance on these forward-looking statements that are stated, in the Preliminary Placement Document, only as at the date of the Preliminary Placement Document and in this Placement Document, only as at the date of this Placement Document. For details in relation to forward-looking statements, please see the section entitled "Forward-Looking Statements" on page 23.

The net distributable cash flows of IndiGrid (the "**Distributable Income**") are based on the cash flows generated from the underlying operations undertaken by the InvIT Assets, in this case being the Portfolio Assets. For details of the business and operations presently undertaken by the InvIT Assets, please see the section entitled "*Our Business*" on page 247. Presently, cash flows receivable by IndiGrid may be in the form of dividend, interest income or principal repayment received from the InvIT Assets in relation to debt sanctioned by IndiGrid, or a combination of both.

In terms of the InvIT Regulations and the distribution policy of IndiGrid, with respect to distributions made by IndiGrid and its HoldCos and/or the SPVs (the "**Distribution Requirements**"): (i) not less than 90% of the net distributable cash flows of any SPV shall be distributed to IndiGrid /HoldCo in proportion of its holding in the SPV, subject to applicable provisions in Companies Act, 2013 or Limited Liability Partnership Act, 2008; (ii) not less than 90% of net distributable cash flows of IndiGrid shall be distributed to Unitholders. With regard to distribution of net distributable cash flows by any HoldCo to IndiGrid, the following shall be complied with: (i) with respect to the cash flows received by the HoldCo from underlying SPVs, 100% of such cash flows received by the HoldCo shall be distributed to IndiGrid; and (ii) with respect to the cash flows generated by the HoldCo on its own, not less than 90% of such net distributable cash flows shall be distributed by the HoldCo to IndiGrid.

However, if any infrastructure asset is sold by IndiGrid, the HoldCo or an SPV, or if the equity shares or interest in the HoldCo or SPV are sold by IndiGrid; (i) if IndiGrid proposes to re-invest the sale proceeds into another infrastructure asset, it shall not be required to distribute any sales proceeds to IndiGrid or to the unitholders; or (ii) if IndiGrid proposes not to invest the sale proceeds into any other infrastructure asset within a period of one year, it shall be required to distribute the same in accordance with the Distribution Requirements.

Pursuant to the InvIT Regulations and the distribution policy of IndiGrid, IndiGrid shall declare and distribute at least 90% of the Distributable Income to the Unitholders, not less than once every six months in every financial year. In accordance with the InvIT Regulations, distributions by IndiGrid shall be made within five working days from the record date, being two working days from the date of declaration of distribution, excluding the date of declaration and the record date. Any amount remaining unclaimed or unpaid out of the distributions declared by IndiGrid shall be transferred to the 'Investor Protection and Education Fund' constituted by SEBI, in such manner as may be specified by SEBI.The distribution, when made, shall be made in Indian Rupees.

The distribution policy of IndiGrid is available at https://www.indigrid.co.in/wp-content/uploads/2021/12/7_Distribution-Policy_23.01.2025.pdf. For details on the risks relating to distribution, please see the section entitled "*Risk Factors*" on page 86.

Method of calculation of Distributable Income

The Distributable Income of IndiGrid shall be calculated in accordance with the InvIT Regulations and any circular, notification or guidance issued thereunder. Presently, IndiGrid proposes to calculate distributable income in the manner provided below:

a. Calculation of net distributable cash flows at the HoldCo / SPV level:

Particulars
Cash flow from operating activities as per Cash Flow Statement of SPV
Add: Cash Flows received from SPV's which represent distributions of NDCF computed as per relevant framework (relevant in case of HoldCos)
Add: Treasury income / income from investing activities (interest income received from FD, tax refund, any other income in the nature of interest, profit on sale of Mutual funds, investments, assets etc., dividend income etc., excluding any Ind AS adjustments. Further clarified that these amounts will be considered on a cash receipt basis)
Add: Proceeds from sale of infrastructure investments, infrastructure assets or shares of SPVs or Investment Entity adjusted for the following: - Applicable capital gains and other taxes - Related debts settled or due to be settled from sale proceeds - Directly attributable transaction costs - Proceeds reinvested or planned to be reinvested as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations

Particulars
Add: Proceeds from sale of infrastructure investments, infrastructure assets or sale of shares of SPVs or Investment Entity not distributed pursuant to an earlier plan to reinvest as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations, if such proceeds are not intended to be invested subsequently
Less: Finance cost on Borrowings as per Profit and Loss Account excluding finance cost on any shareholder debt/loan from trust. The amortization of any transaction costs can be excluded provided such transaction costs have already been deducted while computing NDCF of previous period when such transaction costs were paid
Less: Debt repayment (to include principal repayments as per scheduled EMI's except if refinanced through new debt including overdraft facilities and to exclude any debt repayments / debt refinanced through new debt, in any form or equity raise as well as repayment of any shareholder debt / loan from Trust)
Less: any reserve required to be created under the terms of, or pursuant to the obligations arising in accordance with, any: loan agreement entered with banks / financial institution from whom the Trust or any of its SPVs/ HoldCos have availed debt, or terms and conditions, covenants or any other stipulations applicable to debt securities issued by the Trust or any of its SPVs/ HoldCos, or terms and conditions, covenants or any other stipulations applicable to external commercial borrowings availed by the Trust or any of its SPVs/ HoldCos, or agreement pursuant to which the SPV/ HoldCo operates or owns the infrastructure asset, or generates revenue or cashflows from such asset (such as, concession agreement, transmission services agreement, power purchase agreement, lease agreement, and any other agreement of a like nature, by whatever name called); or statutory, judicial, regulatory, or governmental stipulations;
Less: any capital expenditure on existing assets owned / leased by the SPV or Holdco, to the extent not funded by debt / equity or from reserves created in the earlier years
Net Distributable Cash Flows for HoldCo/SPV's

b. Calculation of net distributable cash flows at the Trust level:

Particulars
Cashflows from operating activities of the Trust
Add: Cash flows received from SPV's / Investment entities which represent distributions of NDCF computed as per relevant framework
Add: Treasury income / income from investing activities of the Trust (interest income received from FD, any investment entities as defined in Regulation 18(5), tax refund, any other income in the nature of interest, profit on sale of Mutual funds, investments, assets etc., dividend income etc., excluding any Ind AS adjustments. Further clarified that these amounts will be considered on a cash receipt basis)
Add: Proceeds from sale of infrastructure investments, infrastructure assets or shares of SPVs/Holdcos or Investment Entity adjusted for the following: - Applicable capital gains and other taxes - Related debts settled or due to be settled from sale proceeds - Directly attributable transaction costs - Proceeds reinvested or planned to be reinvested as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations
Add: Proceeds from sale of infrastructure investments, infrastructure assets or sale of shares of SPVs/ Hold cos or Investment Entity not distributed pursuant to an earlier plan to re-invest as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations, if such proceeds are not intended to be invested subsequently
Less: Finance cost on Borrowings as per Profit and Loss Account. However, amortization of any transaction costs can be excluded provided such transaction costs have already been deducted while computing NDCF of previous period when such transaction costs were paid
Less: Debt repayment at Trust level (to include principal repayments as per scheduled EMI's except if refinanced through new debt including overdraft facilities and to exclude any debt repayments/debt refinanced through new debt in any form or funds raised through issuance of units)
Less: any reserve required to be created under the terms of, or pursuant to the obligations arising in accordance with, any: loan agreement entered with financial institution, or terms and conditions, covenants or any other stipulations applicable to debt securities issued by the Trust or any of its SPVs/ HoldCos, or terms and conditions, covenants or any other stipulations applicable to external commercial borrowings availed by the Trust or any of its SPVs/ HoldCos, or agreement pursuant to which the Trust operates or owns the infrastructure asset, or generates revenue or cashflows from such asset (such as, concession agreement, transmission services agreement, power purchase agreement, lease agreement, and any other agreement of a like nature, by whatever name called), or statutory, judicial, regulatory, or governmental stipulations.
Less: any capital expenditure on existing assets owned / leased by the InvIT, to the extent not funded by debt / equity or from contractual reserves created in the earlier years
Net Distributable Cash Flows at Trust level (Distributable Income)

Notes/Other Rules

(i) NDCF computed at SPV level for a particular period to be added under this line item, even if the actual cashflows from SPV to Trust has taken place post that particular period, but before finalization and adoption of accounts of the Trust.

(ii) The Trust retains the option to distribute any surplus amounts, unless such surplus is required to create reserves for any subsequent period. However, any reserve created out of debt funds at the time of availing debt as per the terms of the financing documents shall not be reduced.

(iii) The option to retain 10% distribution under Regulation 18(6) of InvIT Regulations needs to be computed by taking together the retention done at HoldCo, SPV level and Trust level.

While computation of the NDCF, IndiGrid shall additionally comply with the notes and the rules as specified by the SEBI in accordance with the InvIT Regulations and circulars issued thereunder, as amended from time to time.

In terms of the InvIT Regulations, if the distribution is not made within five working days from the record date, being two working days from the date of declaration of distribution, excluding the date of declaration and the record date, the Investment Manager shall be liable to pay interest to the Unitholders at the rate of 15% per annum till the distribution is made. Such interest shall not be recovered in the Management Fees of the Investment Manager or in the form of fee or any other form payable to the Investment Manager by IndiGrid.

Distributions by IndiGrid

The details of distribution declared by IndiGrid are provided below.

Sr. No.	Record Date	Number of Units (in million)	Distribution per Unit (in ₹)	Interest	Dividend	Capital Repayment	Others	Amount of Distribution paid on Units including tax on distribution (in ₹ million)

(1) *Please note that the acquisition of BDTCL and JTCL was completed in June, 2017 and accordingly, IndiGrid made distributions for the period beginning from May 30, 2017, until March 31, 2018.*

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FACTORS BY THE DIRECTORS OF THE INVESTMENT MANAGER AFFECTING THE FINANCIAL CONDITION, RESULTS OF OPERATIONS AND CASH FLOWS

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with the section entitled "Financial Statements" enclosed at Annexure B. This discussion contains forward-looking statements and involves numerous risks and uncertainties, including, but not limited to, those described in the section entitled "Risk Factors" on page 86. Actual results could differ materially from those contained in any forward-looking statements and for further details regarding forward-looking statements, please see the section entitled "Forward-Looking Statements" on page 23.

The Consolidated Financial Statements have been presented for the Fiscals 2025, 2024 and 2023 and for the half year ended September 30, 2025. Unless context requires otherwise, information given for the Fiscals 2025, 2024 and 2023 have been derived from the audited financial statements for these fiscals prepared in accordance with Ind AS and InvIT regulations. Information given for the half year ended September 30, 2025 is derived from unaudited interim condensed consolidated financial statements for the half year ended September 30, 2025 prepared in accordance with Ind AS 34 and the InvIT Regulations and information for the half year ended September 30, 2024 is derived from comparative amounts presented in unaudited interim condensed consolidated financial statements for the half year ended September 30, 2025. For details, please see the section entitled "Risk Factors - The audited Consolidated Financial Statements and Standalone Financial Statements of IndiGrid presented in this Placement Document may not be indicative of our future financial condition, results of operations and cash flows" and "Risk Factors - The unaudited consolidated and standalone interim condensed financial statements prepared in accordance with Ind AS 34 and the InvIT Regulations of IndiGrid present in this Placement Document may not be indicative of our financial condition, results of operations and cash flows" on page 110. Unless stated otherwise or the context otherwise requires, industry and market data used in this section has been obtained or derived from the CRISIL Report, publicly available information as well as industry publications and sources, including from various government publications and websites.

Overview

We are India's first listed power sector infrastructure investment trust. IndiGrid was established on October 21, 2016 and is registered with SEBI pursuant to the InvIT Regulations. IndiGrid currently owns and operates transmission and BESS projects and solar projects in India and has assets under management of approximately ₹ 325.00 billion as on September 30, 2025.

We own 45 projects (comprising 39 operating projects and six under construction projects) across two energy sub-sectors i.e., transmission and BESS projects, solar generation projects in 20 states and two union territories. Our operating projects, consist of 19 transmission projects and BESS projects, and 20 solar projects, while our under construction assets consist of six transmission and BESS projects. Our transmission projects consist of a total circuit length of approximately 9,336 ckms and 16 substations with approximately 25,050 MVA of transformation capacity, across 20 states and two union territories in India while our BESS projects have an aggregate storage capacity of 900 MWh. Our solar projects have an aggregate capacity of 1.5GWp and are located across the states of Andhra Pradesh, Punjab, Tamil Nadu, Rajasthan, Gujarat, Maharashtra, Madhya Pradesh and Uttar Pradesh.

Please see below the manner in which we have grown our portfolio since May, 2017:

Date	Details
May, 2017	Acquisition of BDTCL and JTCL from Sterlite Electric
February, 2018	Acquisition of PKTCL, RTCL and MTPL, from Sterlite Electric
August 2018	Acquisition of PTPCL from TEECL and TPGCL
June, 2019	Acquisition of NTL from Sterlite Electric
July, 2019	Acquisition of OGPTL from Sterlite Electric
May, 2020	Acquisition of ENICL from SPGVL and Sterlite Electric
August, 2020	Acquisition of GPTPL from SPGVL and SGL4
October, 2020	Acquisition of JKPTL from KPTL and TEECL
January, 2021	Acquisition of PrKTCL from Reliance Infrastructure Limited
March, 2021	Acquisition of NER from SGL4
December, 2021	Acquisition of Kallam from REC Power Development and Consultancy Limited
July, 2021	Acquisition of IGL Solar I and IGL Solar II from FRV Solar Holdings XI B.V
November, 2022	Acquisition of RSTCPL from Patel Engineering Limited, Simplex Infrastructures Limited and BS Limited
February, 2023	Acquisition of JUPL from ReNew Solar Power Private Limited
March, 2023	Acquisition of KTL from Sterlite Electric
August 25, 2023	Acquisition of GGEPL, UMD, USUPL, GSPPL, PLG, Solar Edge, TKSPL, TSEG, TNSPEPL, TRSPL, TSEC, TSEN, TSET, TSEP and TSESPL which we acquired through the acquisition of VRET
October, 2023	KBPL, which was set up after receiving the letter of award by BSES Rajdhani Power Limited
February, 2024	Acquisition of IPTL and DPTL from REC Power Development and Consultancy Limited
March, 2024	GBPL which was set up after receiving the letter of intent/ letter of award from GUVNL
April, 2024	Acquisition of KTCO from REC Power Development and Consultancy Limited
November 2024	RBPL which was set up after receiving the letter of intent/ letter of award from NVVNL
March, 2025	Acquisition of RKPTL from REC Power Development and Consultancy Limited

Date	Details
May, 2025	Acquisition of EIPL 1 from Enerica ReGrid Infra Private Limited (“**EnerGrid**”)
June, 2025	Acquisition of KNTL from ReNew Transmission Ventures Private Limited and KNI India AS
June, 2025	Acquisition of RSAPL from ReNew Solar Power Private Limited

Further, IndiGrid has also executed definitive agreements (i) dated December 2, 2025 in relation to the acquisition of 100% of the equity shareholding in GTL from ReNew Transmission Ventures Private Limited and KNI India AS; (ii) dated August 20, 2025, with Techno Electric & Engineering Company Limited, for the acquisition of 100% of the equity shareholding of NERES XVI Power Transmission Limited; and (iii) dated August 25, 2025 with EnerGrid, amongst others, for acquisition of a BESS project in Uttar Pradesh under TBCB through Enerica Infra 3 Private Limited. EIPL 1 is also the Project Manager for the BESS Assets.

Further, IndiGrid has also signed a framework agreement dated November 12, 2024 with British International Investment PLC (“**BII**”) and Norwegian Climate Investment Fund managed by Norfund via KNI India AS (“**Norfund**” and such agreement, the “**Framework Agreement**”), pursuant to which IndiGrid has agreed to finance a platform, being Energrid, for development and construction of (i) power transmission projects with a focus on Inter-State Transmission Systems, which are currently being bid out on a “build, own, operate, transfer” basis; (ii) standalone BESS projects currently being bid out by Solar Energy Corporation of India Limited, NTPC Vidyut Vyapar Nigam Limited, Gujarat Urja Vikas Nikam Limited or other state discoms; and (iii) such other business opportunities in renewable projects, hybrid projects or FDRE projects, provided such opportunities align with the strategic goals of the business and are agreed upon by all parties. In accordance with the Framework Agreement, these projects will be fully acquired by IndiGrid at a pre-agreed enterprise value, 12 months post the projects commencing commercial operations or as may be prescribed in the relevant concession agreement.

We believe that we are well positioned to take advantage of the growth potential of India’s power industry given the quality of our transmission and BESS assets and solar assets, and our financial position, support from our Sponsor and the robust regulatory framework for transmission and BESS projects and solar projects in India. We believe the infrastructure necessary to transmit and deliver electricity is vital to India’s continued economic advancement, given the inter-regional power deficit in India resulting from a mismatch between power generation and load centers, and the demand-supply deficit which is expected to result from India’s projected GDP growth.

Our continued focus and strategy will be on accretive acquisition of transmission and BESS projects, and solar projects with annuity profile in their respective TSAs, BESPAs and long terms PPAs yielding stable cash flows, operational track record, good quality equipment and financially strong and creditworthy counterparties. For further details, please see the section entitled “*Industry Overview*” on page 188.

We are focused on providing stable and sustainable distributions to our Unitholders. Infrastructure investment trusts are required to distribute at least 90% of their net distributable cash flows to unitholders once at least every six months in every financial year, according to the InvIT Regulations. However, we have adopted a quarterly distribution policy. For further details on our distribution policy, please see the section entitled “*Distribution*” on page 336. We believe our assets, financial position and business model will enable us to offer stable distributions to our Unitholders.

Additionally, following the utilization of the Issue Proceeds, our aggregate consolidated borrowings and deferred payments (net of cash and cash equivalents) will not exceed 70% of the total value of our assets. Our consolidated total income was ₹ 34,377.27 million in Fiscal 2025 and ₹ 17,371.80 million in the half year ended September 30, 2025 and our EBITDA on a consolidated basis was ₹ 30,396.60 million in Fiscal 2025 and ₹ 14,804.78 million in the half year ended September 30, 2025. We have consistently been assigned a credit rating of ‘CRISIL AAA/Stable’ by CRISIL, ‘IND AAA/Stable’ and ‘IND A1+’ by India Ratings and ‘ICRA/AAA/Stable’ and ‘ICRA A1+’ by ICRA.

We are sponsored by Esoteric II Pte. Ltd., a company affiliated with funds, vehicles and/or entities managed and/or advised by affiliates of KKR. Esoteric II Pte. Ltd. was incorporated under the laws of Singapore as a private company limited by shares. Esoteric II Pte. Ltd. currently owns a stake of around 1.17% in IndiGrid. IndiGrid Investment Managers Limited is the investment manager of IndiGrid. Electron IM Pte. Ltd., an affiliate of KKR, currently owns 100% of the issued, paid-up and subscribed capital of the Investment Manager. Axis Trustee Services is the trustee in respect of IndiGrid. IGL and EIPL 1 are the project managers for our Portfolio Assets. For further details on the parties to the Trust, please see the section entitled “*Parties to IndiGrid*” on page 142.

On the basis of our strengths and through the implementation of our strategies, we believe that we are well-positioned to capitalize on the growth potential of India’s transmission and BESS industry and solar industry.

Factors Affecting Our Results of Operation

Factors affecting our results of operations include, but are not limited to:

Tariff Structures and system availability

We operate most of our transmission and BESS projects under an availability-based tariff regime. The Tariff Regulations as well as the provisions of Transmission Service Agreements provide specific guidance on the calculation of availability and take into account the elements in the transmission system (including transmission lines and substations) as well as the reason for any outages, with force majeure outages being excluded from such calculation. If our availability falls below the required minimum threshold (ranging between 95% to 98%) for a particular line, we are subject to a penalty which reduces the annual transmission charge we receive for the relevant period. In terms of the BESPA's, in relation to BESS projects, we are required to maintain minimum annual average availability of 95% during any contract year. In the event our availability falls below the required thresholds, the BESPAs require payment of damages and in the event of continued default, the procurer under the BESPA may substitute the developer.

Accidents or malfunctions involving transmission lines or substations including failure of transmission towers, power conductors or insulators, may disrupt transmission of electricity and result in availability being below expected levels. Such malfunctions may also result in the requirement of scrapping certain components of the project asset and replacing them. In addition, transmission and BESS projects rely on equipment that is built by third parties, and which is subject to malfunction. Although, in certain cases, manufacturers provide warranties and performance guarantees, and may be required to compensate us for certain equipment failures, engineering and design defects, such arrangements are subject to time limits, fixed liability caps and may not fully compensate us for the damage incurred or for penalty payments which may be imposed on us due to any reduced availability below required levels. Warranties under certain supplier contracts for certain of our Portfolio Assets have expired, as a result of which we may not be compensated for equipment failures, engineering and design defects from such suppliers.

The transmission and BESS projects operated by us are generally in geographically remote areas with difficult terrain, which poses particular challenges for their operation and maintenance, including security and accessibility.

Operation Performance of the Solar Assets

Our revenue from contracts with customers attributable to our Solar Assets is dependent on the volume of power generated and sold by our Solar Assets. Our results of operations are materially influenced by the degree to which we operate our Solar Assets in order to achieve maximum generation of power in an efficient and cost-effective manner. The power generation capability of our Solar Assets is dependent on a number of factors, including suitable weather conditions, the length of scheduled and any unexpected downtime required for maintenance and upkeep of our power plants and the generation efficiency of our Solar Assets. Generation of solar energy do not typically vary much year on year with limited variation in annual radiation levels. Therefore, maintaining a consistent PLF over the years will ensure us to maintain stable cash flows from our Solar Assets.

Tariff structures under the long-term PPAs

Our revenue from contracts with customers attributable to our Solar Assets primarily consist of sale of power generated from our solar power projects under the terms of our long term PPAs. As a result, a key factor affecting our results of operations is the terms of our PPAs and the creditworthiness of our off-takers. We have entered into long term PPAs with central and state off-takers such as SECI and APSPDCL.

The PPAs have pre-defined tariff for the entire term of the relevant PPA for contracted capacity and the majority of our offtakers, at any time during a contract year, are not obliged to purchase any additional energy from the relevant Solar Assets beyond the specified capacity in the relevant PPA and may purchase power beyond acceptable deviations at lower tariffs. If for any contract year, it is found that the relevant Solar Asset has not been able to generate minimum energy of specified capacity with the time periods specified in the relevant PPA, on account of reasons solely attributable to the Solar Assets, then such noncompliance shall make the Solar Assets liable to pay the compensation provided in the relevant PPA as payable to buying utilities (as defined in the relevant PPA), subject to certain conditions specified, and may lead to termination of the relevant PPA. Further, any excess generation over and above the specified quantity may be purchased by our off-takers at a lower rate at their option and often subject to conditions such as their ability to procure purchasers for such excess generation. The PPAs executed by us have a pre-determined tariff structure, and we had a limited ability to negotiate the terms of such PPAs. If there is an industry-wide increase in tariffs, we may not be able to renegotiate the terms of the PPAs to take advantage of such increased tariffs. As a result, in the event of increase in operating costs or equipment costs, or increased costs as a result of changes in applicable laws or as a result of inflation, we may not be able to pass these cost increases on to our counterparties. The restrictions and uncertainties impose constraints on the flexibility of IndiGrid to conduct its business and its financial conditions and results of operations may be adversely affected. In the event any off-taker or a lender invokes any restrictive provision in the relevant PPA or interprets any term or condition in an adverse manner or there are any changes to our current tariff rates, such invocation or interpretation or amendment may adversely affect our business, financial condition and results of operations.

Tariff Payments from LTTCs

In accordance with the Sharing of Charges and Losses Regulations and the CERC's PoC payment system, transmission licensees, such as our Transmission Assets, are entitled to recover their approved tariffs from ISTS charges collected by the CTU. The CTU collects transmission charges from customers, including our LTTCs on a regular basis and pays such transmission charges to the transmission licensees, including the Transmission Assets. The payment mechanism is structured in accordance with the Tariff Regulations to incentivize the end consumers to make timely payments through rebates, and a surcharge that is levied on untimely payments by LTTCs.

The LTTCs under the PoC mechanism include various state utilities, other distribution licensees and TSUs. These LTTCs have experienced periods of financial weakness in the past. A failure or delay on the part of any LTTCs to make timely payments or on the part of distribution licensees or TSUs to make the requisite payments to the CTU could affect the capability of the CTU to make the corresponding payments to transmission licensees, including our Transmission Assets. As a result, factors beyond our control that affect the business, prospects, financial condition, results of operations or cash flows of the LTTCs could result in the delay or failure of our Transmission Assets to receive tariff payments.

PGCIL serves as a CTU and is responsible for the planning, development and operation of inter-state transmission of electricity and the national grid. PGCIL also undertakes high capacity transmission corridor and grid strengthening projects. Its dual roles as a CTU and transmission project developer and operator may give rise to conflicts of interest that could result in delays in tariff payments to us. As a result of these and similar factors that may be beyond our control, our business, prospects, financial condition, results of operations and cash flows may be adversely affected.

Our Critical Accounting Policies

a. **Summary of significant accounting policies**

The following is the summary of significant accounting policies applied by the Group in preparing its consolidated financial statements:

a) Business combinations and goodwill

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed in the periods in which the costs are incurred and the services are received, with the exception of the costs of issuing debt or equity securities that are recognised in accordance with Ind AS 32 and Ind AS 109.

A business combination involving entities or businesses under common control is a business combination in which all of the combining entities or businesses are ultimately controlled by the same party or parties both before and after the business combination and the control is not transitory. The transactions between entities under common control are specifically covered by Ind AS 103. Such transactions are accounted for using the pooling-of-interest method. The assets and liabilities of the acquired entity are recognised at their carrying amounts of the Company's financial statements. No adjustments are made to reflect fair values or recognise any new assets or liabilities. The components of equity of the acquired companies are added to the same components within the Company's equity.

The Group determines that it has acquired a business when the acquired set of activities and assets include an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired process is considered substantive if it is critical to the ability to continue producing outputs, and the inputs acquired include an organised workforce with the necessary skills, knowledge, or experience to perform that process or it significantly contributes to the ability to continue producing outputs and is considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs. Generally, when a group of infrastructure (transmission/ solar or renewable) SPVs with varied risks and returns are acquired and the Group is unable to meet the optional concentration test as per Ind AS 103, the Group concludes that the acquisition is a business combination.

At the acquisition date, the identifiable assets acquired, and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable. However, the following assets and liabilities acquired in a business combination are measured at the basis indicated below:

- ► Deferred tax assets or liabilities, and the liabilities or assets related to employee benefit arrangements are recognised and measured in accordance with Ind AS 12 Income Tax and Ind AS 19 Employee Benefits respectively.

- ► Potential tax effects of temporary differences and carry forwards of an acquiree that exist at the acquisition date or arise as a result of the acquisition are accounted in accordance with Ind AS 12.

- ► When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability that is a financial instrument and within the scope of Ind AS 109 Financial Instruments, is measured at fair value with changes in fair value recognised in profit or loss in accordance with Ind AS 109. If the contingent consideration is not within the scope of Ind AS 109, it is measured in accordance with the appropriate Ind AS and shall be recognised in profit or loss. Contingent consideration that is classified as equity is not re-measured at subsequent reporting dates and subsequent its settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

Where goodwill has been allocated to a cash-generating unit and part of the operation within that unit is disposed of, the goodwill associated with the disposed operation is included in the carrying amount of the operation when determining the gain or loss on disposal. Goodwill disposed in these circumstances is measured based on the relative values of the disposed operation and the portion of the cash-generating unit retained.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted through goodwill during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date. These adjustments are called as measurement period adjustments. The measurement period does not exceed one year from the acquisition date.

When the acquisition of an asset or group of assets does not constitute a business, it is accounted for as an acquisition of a group of assets and liabilities. The cost of the acquisition is allocated to the individual identified assets and liabilities acquired based upon their relative fair values and no goodwill or deferred tax is recognised.

When the Group acquires operational transmission and Solar Project SPVs, the purchase consideration primarily pertains to the fair value of the transmission and Solar assets and the Group meets the conditions of optional concentration test, the Group generally concludes that the acquisition is not a business and the same is accounted for as an acquisition of group of assets and liabilities. Such assets are operational assets with fixed tariff revenues under the Transmission Services Agreements (TSAs) for 35/ 25 years and fixed tariff rate per unit under power purchase agreement ('PPA') for 25 years. The only key activity for these SPVs is the maintenance of the transmission assets and project assets which is outsourced to third parties and partially done in house. There are few employees in these entities and no other significant processes are performed for earning tariff revenues. Based on evaluation of the above fact pattern vis-a-vis the guidance on definition of business under Ind AS and also keeping in view the relevant guidance on similar fact pattern available under accounting standards applicable in other jurisdictions, the management has classified the acquisition of such transmission/ solar SPVs as asset acquisitions.

b) Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services. The Group has concluded that it is the principal in its revenue arrangements because it typically controls the services before transferring them to the customer.

Power transmission services

Revenue from contracts with customers comprises of revenue from power transmission services rendered in India to Long Term Transmission Customers (LTTCs) pursuant to the respective Transmission Services Agreements (TSAs) executed by the Group with LTTCs for periods of 35/25 years. The Group is required to ensure that the transmission assets meet the minimum availability criteria under the respective TSAs. The Group's performance obligation under the TSAs is to provide power transmission services. The performance obligation is satisfied over time as the customers receive and consume the benefits provided by the Group's performance as the Group performs. Accordingly, the revenue from power transmission services is recognised over time based on the transmission asset availabilities and the tariff charges approved under the respective CERC tariff orders and includes unbilled revenues accrued up to the end of the accounting period. The payment is generally due within 60 days upon receipt of monthly invoice by the customer.

Solar Business – Electricity generation

Revenue from contracts with customers comprises of revenue arrangement is based on long term PPA with its customers which includes SECI and other DISCOMs. As per the PPA, the Group's performance obligation is to supply solar power at a rate specified in the PPA. Revenue is recognised over time for each period based on the volume of solar power supplied to the Customer as per the terms stated in the PPA at the metering point of the Customer. Estimates used in the revenue recognition as mentioned above are re-assessed periodically and are adjusted if required.

Regulatory Assets and revenue:

The group determines revenue gap for the period (i.e shortfall in actual returns over assured returns) based on the principles laid down under the CERC regulations and tariff orders issued by CERC. In respect of such revenue gaps, appropriate adjustments, have been made for the respective periods on a conservative basis in accordance with accounting policies and the requirement of Ind AS 114, "regulatory deferral accounts" read with guidance note on Accounting for rate regulated activities issued by Institute of Chartered Accountants of India. ("**ICAI**").

Service Concession Arrangements:

The group through one of its subsidiaries also has operating and maintaining the power transmission system including sub-station constructed to provide services for a specified period of time in accordance with the transmission agreement entered into with the grantor.

Under Appendix D to lnd AS 115, this arrangement is considered as Service Concession Arrangement and in accordance with para 16 of the Appendix D to Ind AS 115, rights to receive the consideration from the grantor for providing services has been recognised as "financial assets".

Finance Income for Service Concession Arrangements under finance assets model is recognised using effective interest rate method. Revenue from operations and maintenance services are separately recognised in each period as and when services are rendered.

Change in Law

Revenue for Change in Law is accounted when legal claims are approved and there is certainty for its realization.

Contract balances

A receivable is recognized if an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due). Refer to accounting policies of financial assets in section (O) Financial instruments – initial recognition and subsequent measurement.

c) Taxation

Current income tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted at the reporting date.

Current income tax relating to items recognised outside statement of profit or loss is recognised outside statement of profit or loss (either in other comprehensive income or in equity). Current tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and considers whether it is probable that a taxation authority will accept an uncertain tax treatment. The group shall reflect the effect of uncertainty for each uncertain tax treatment by using either most likely method or expected value method, depending on which method predicts better resolution of the treatment.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences;
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.
- Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:
- When the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences;
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

In assessing the recoverability of deferred tax assets, the Group relies on the same forecast assumptions used elsewhere in the financial statements and in other management reports.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

Deferred tax relating to items recognised outside statement of profit or loss is recognised outside statement of profit or loss. Deferred tax items are recognised in correlation to the underlying transaction either in OCI or directly in equity. Tax benefits acquired as part of a business combination, but not satisfying the criteria for separate recognition at that date, are recognised subsequently if new information about facts and circumstances change. Acquired deferred tax benefits recognised within the measurement period reduce goodwill related to that acquisition if they result from new information obtained about facts and circumstances existing at the acquisition date. If the carrying amount of goodwill is zero, any remaining deferred tax benefits are recognised in OCI/ capital reserve depending on the principle explained for bargain purchase gains. All other acquired tax benefits realised are recognised in profit or loss.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

Sales/value added/goods and service taxes paid on acquisition of assets or on incurring expenses

Expenses and assets are recognised net of the amount of sales/value added/goods and service taxes paid, except:

- When the tax incurred on a purchase of assets or services is not recoverable from the tax authority, in which case, the tax paid is recognised as part of the cost of acquisition of the asset or as part of the expense item, as applicable.

- When receivables and payables are stated with the amount of tax included.

The net amount of tax recoverable from, or payable to, the tax authority is included as part of receivables or payables in the balance sheet.

d) Fair value measurement

The Group measures financial instruments such as mutual funds at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the Group.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1- Quoted (unadjusted) market prices in active markets for identical assets or liabilities;

Level 2- Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable;

Level 3- Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

In estimating the fair value of transmission assets/projects, the Group engages independent qualified external valuers to perform the valuation. The management works closely with the external valuers to establish the appropriate valuation techniques and inputs to the model. The management in conjunction with the external valuers also compares the change in fair value with relevant external sources to determine whether the change is reasonable. The management reports the valuation report and findings to the Board of the Investment Manager quarterly to explain the cause of fluctuations in the fair value of the transmission/ solar projects.

At each reporting date, the management analyses the movement in the values of assets and liabilities which are required to be re-measured or reassessed as per the Group’s accounting policies. For this analysis, the management verifies the major inputs applied in the latest valuation by agreeing the information in the valuation computation to contracts and other relevant documents.

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

Our Income

We generate substantially all of our income under the transmission contracts with customers pursuant to electricity transmission tariffs, which we account for as a sale of power transmission services. We also generate income from sale of electricity generated by our solar assets under the power purchase agreements and from BESS assets under the BESPAs.

Our Expenses

Our primary expenses include:

Construction charges and infrastructure maintenance charges

Our construction and infrastructure maintenance charges primarily comprise of payments under EPC and operation and maintenance contracts with third parties. It also consists of repair and maintenance (replacement of construction materials) if any.

Insurance

Our Investment Manager has obtained insurance policies covering the majority of our Portfolio Assets to cover risks including loss or damage from fire, flood, storm, terrorism, sabotage, machinery breakdown and any accidental and physical loss and destruction or damage to the insured property due to a cause, other than as excluded in the insurance policies. Certain of these insurance policies are subject to exclusions for certain circumstances including, among others, faulty or defective design materials or workmanship, wear and tear, larceny, acts of fraud or dishonesty, any wilful act or wilful negligence on the part of the insured or any person acting on its behalf, war, invasion, damage caused by nuclear weapons material or ionising radiation or contamination by radioactivity from any nuclear fuel or nuclear waste, loss or damage caused directly or indirectly from discharge of pollutants or contaminants, and certain properties, including, among others, money, cheques, bonds, credit cards, securities of any description and explosives.

Management Fees

Under the terms of the Investment Management Agreement, for all Portfolio Assets except PrKTCL, the Investment Manager is entitled to a fee aggregating to 0.25% of AUM (as defined under the Amended and Restated Investment Management Agreement) of the Portfolio Assets, subject to the condition that the fees payable shall not exceed 1.75% of the difference between revenue from operations and operating expenses (other than the fee of the Investment Manager) of each Portfolio Asset, per annum. For PrKTCL, the Investment Manager is entitled to a fee aggregating to 0.25% of the AUM of PrKTCL subject to the condition that the fees payable shall not exceed 1.56% of the difference between revenue from operations and operating expenses (other than the fee of the Investment Manager) of PrKTCL, per annum. For this purpose, the operating expenses do not include depreciation, finance cost and income tax expense. This fee is exclusive of all taxes. For each Fiscal, such fee shall be payable on a quarterly basis, as applicable, based on actuals, within a period of 15 days from the date of declaration of financial results by IndiGrid (being the period ended March 31, June 30, September 30 and December 31, respectively, of each financial year) or in the case of PrKTCL, in the mode and manner as may be agreed between PrKTCL and the Investment Manager. IndiGrid is also required to pay to the Investment Manager an amount equal to 0.5% of the enterprise value of assets acquired in a particular financial year as acquisition fee, subject to achieving distribution per unit guidance of that particular financial year, where the enterprise value of an asset shall be as per the enterprise value as disclosed in filings made with stock exchanges for that particular asset.

Under the terms of the Project Implementation and Management Agreement, IGL is entitled to a fee amounting to 7% of the gross expenditure incurred by each completed Portfolio Asset (apart from KBPL, GBPL and RBPL) in relation to operation and maintenance costs, per annum. IndiGrid, or any or all of the Portfolio Assets (apart from KBPL, GBPL and RBPL), as the case may be, shall bear any GST/ service tax and other applicable taxes payable on the fee and any other payments made to IGL in terms of the IGL Project Implementation and Management Agreement, provided that IGL shall be liable to pay income tax on such fee and payments. In relation to the under-construction assets being DPTL, KTCO, IPTL and RKPTL, IGL is entitled to a fixed monthly fee until the completion of the assets.

Further, EIPL 1 is entitled to a fee amounting to 7% of the gross expenditure incurred by each of KBPL, GBPL and RBPL in relation to operation and maintenance costs, per annum. IndiGrid, or any or all of KBPL, GBPL and RBPL as the case may be, shall bear any GST/ service tax and other applicable taxes payable on the fee and any other payments made to EIPL 1 in terms of the EIPL 1 Project Implementation and Management Agreement, provided that EIPL 1 shall be liable to pay income tax on such fee and payments. Provided that during the construction period (i.e. before commissioning of the project), the Project Manager shall be paid a total monthly fee of ₹ 500,000 and ₹ 350,000 for GBPL and RBPL, respectively.

Employee benefits expense

Employee benefits expenses primarily comprise salaries, wages and bonus, contribution towards provident fund and superannuation fund, employees long term incentive programme, gratuity expense and staff welfare expenses.

Finance costs

Finance costs primarily comprise interest on financial liabilities measured at amortised cost, other bank and finance charges.

Depreciation and amortization expenses

Depreciation and amortization expenses include depreciation of tangible assets, depreciation of right of use assets and amortization of intangible assets.

Results of Operations

The following table sets forth certain information with respect to the result of operations of the Group (Trust and Portfolio Assets), on a consolidated basis, for the periods / years indicated below which are derived from audited consolidated financial statements of the Group for the Fiscals 2025, 2024 and 2023 and unaudited interim condensed consolidated financial statement of the Group for the half year ended September 30, 2025 and comparatives appearing in the unaudited interim condensed consolidated financial statement of the Group for the half year ended September 30, 2024:

Consolidated Half year ended September 30, 2025 compared to the half year ended September 30, 2024

Total Income

We had a total income of ₹ 17,371.80 million in the half year ended September 30, 2025, an increase of 1.40% from our total income of ₹ 17,131.46 million in the half year ended September 30, 2024. This increase in total income was primarily due to:

Revenue from contracts with customers: Our revenue from contracts with customers in the half year ended September 30, 2025 increased by 1.55% from ₹ 16,411.06 million in the half year ended September 30, 2024 to ₹ 16,665.74 million in the half year ended September 30, 2025. This increase in revenue from contracts with customers is primarily attributable to (i) the increase in revenue from the acquisition of two new projects and commencement of operations of two RTM projects in January 2025 and March 2025; (ii) notional revenue recognised for one BOOT project in line with service concession accounting in accordance with Ind AS 115; and (iii) a onetime exceptional CIL claim amount received in relation to NER and GPTPL in the half year ended September 30, 2024. The increase in revenue was partially offset due to non-operation of certain assets namely GPTPL, JKTPL and GGEPL and the impact of a CERC order dated July 23, 2025 for truing up of the transmission tariff in relation to PrKTCL for the tariff period from 2014 to 2019 and tariff determination for 2019-2024.

Other income: Our other income decreased by 1.99% from ₹ 720.40 million in the half year ended September 30, 2024 to ₹706.06 million in the half year ended September 30, 2025. This decline was primarily driven by lower income from investment in mutual funds and interest income on investment in bank deposits, partially offset by an increase in other non-operating income, including gains on foreign exchange fluctuations and income from the shifting of transmission line.

Total expenses

Our total expenses had increased by 11.18 % from ₹ 14,636.64 million in the half year ended September 30, 2024 to ₹ 16,272.37 million in the half year ended September 30, 2025, primarily due to reasons explained below*:*

Finance costs: Our finance costs had increased by 5.74% from ₹ 7,612.56 million in the half year ended September 30, 2024 to ₹ 8,049.54 million in the half year ended September 30, 2025. This is primarily attributable to an increase in interest on debts and borrowings measured at amortised cost, interest expense on lease liabilities and other bank and finance charges.

Depreciation and amortization expense: Depreciation and amortization expense totalled ₹ 5,661.10 million in the half year ended September 30, 2025, a 3.08% increase over an amount of ₹ 5,491.81 million in the half year ended September 30, 2024, which was primarily attributable to increase in depreciation of property, plant and equipments on account of acquisition of two new projects.

Cost of construction of service concession asset: In the half year ended September 30, 2025, the cost of construction of service concession asset was recorded amounting to ₹728.02 million in accordance with Ind AS 115 Revenue from Contracts with Customers.

Investment management fees: Our Investment management fees increased by 42.73% from ₹ 320.44 million in the half year ended September 30, 2024 to ₹ 457.36 million in the half year ended September 30, 2025 reflecting the inclusion of acquisition fees at 0.5% of the enterprise value of two newly acquired assets during the period.

Loss on sale of Property, plant and equipments: In the half year ended September 30, 2025, the Loss on sale of Property, plant and equipments was recorded amounting to ₹ 119.71 million due to scrapping of assets majorly in GPTPL on account of reactor failure.

Profit before tax

As a result of the factors outlined above, our profit before tax was ₹ 1,094.14 million in the half year ended September 30, 2025, compared to a profit before tax of ₹ 2,494.92 million in the half year ended September 30, 2024.

Total tax expense

Total tax expense reduced to ₹ (44.97) million in the half year ended September 30, 2025, from ₹ 137.83 million in the half year ended September 30, 2024, on account of deferred tax income of ₹ 59.23 million in the half year ended September 30, 2025, as against deferred tax expense of ₹ 47.51 million in the half year ended September 30, 2024, and a decrease in current tax expense from ₹ 90.32 million in the half year ended September 30, 2024 to ₹ 14.26 million in the half year ended September 30, 2025.

Total Comprehensive Income for the period

As a result of the factors outlined above, our total comprehensive income for the period (net of tax) was ₹ 2,290.85 million in the half year ended September 30, 2024 as compared to a total comprehensive income for the period of ₹ 1,236.49 million in the half year ended September 30, 2025. This was a decrease of 46.02%.

Consolidated Fiscal 2025 compared to Fiscal 2024

Total Income

We had a total income of ₹ 34,377.27 million in Fiscal 2025, resulting in an increase of 15.07 % from our total income of ₹ 29,874.81 million in Fiscal 2024. This increase in total income was primarily due to:

Revenue from contracts with customers: Our revenue from contracts with customers in Fiscal 2025 increased by 14.79% from ₹ 28,639.55 million in Fiscal 2024 to ₹ 32,876.37 million in Fiscal 2025. This increase in revenue from contracts with customers is primarily attributable to increase in revenue from sale of electricity (solar) on account of acquisition of 15 solar assets in the month of August 2023 and 1 solar asset in the month of March 2024 and revenue from construction service recognised in accordance with Ind AS 115 for 2 BOOT projects. The newly acquired assets contributed to revenue only for a part of Fiscal 2024 following their acquisition as compared to revenue generated for the full year in Fiscal 2025.

Interest income on investment in bank deposits: Our interest income on investment in bank deposits increased by 34.95% from ₹ 406.22 million in Fiscal 2024 to ₹ 548.19 million in Fiscal 2025. This is primarily attributable to increase in surplus cash and increase in DSRA.

Other income: Our other income increased by 41.66% from ₹ 219.08 million in Fiscal 2024 to ₹ 310.35 million in Fiscal 2025, which is primarily attributable to increase in miscellaneous income of ₹ 151.47 million. Miscellaneous income includes carrying cost compensation, interest income on security deposit, GST claim received and other income. This increase majorly includes a one-time exceptional CIL claim in NER i.e. carrying cost compensation.

Total expenses

Our total expenses increased by 12.00% from ₹ 26,724.42 million in Fiscal 2024 to ₹ 29,931.86 million in Fiscal 2025, primarily due to reasons explained below*:*

Finance costs: Our finance costs increased by 14.30% from ₹ 13,076.54 million in Fiscal 2024 to ₹ 14,947.02 million in Fiscal 2025. This is primarily attributable to increase in interest on debts and borrowings measured at amortized cost.

Depreciation and amortization expense: Depreciation and amortization expense totalled ₹ 9,394.72 million in Fiscal 2024, and increased by 17.17% to ₹ 11,007.37 million in Fiscal 2025, which was primarily attributable to increase in depreciation of plant, property and equipment and amortization of intangible assets on account of acquisition of 15 solar assets in the month of August 2023and 1 solar asset in the month of March 2024.

Employee benefits expenses: Our employee benefits expenses decreased by 39.53% from ₹ 1,075.58 million in Fiscal 2024 to ₹ 650.42 million in Fiscal 2025 due to compensation paid to exiting senior management of the acquired VRET group in August 2023.

Infrastructure maintenance charges: Infrastructure maintenance charges decreased by 28.56% from ₹ 742.88 million in Fiscal 2024 to ₹ 530.71 million in Fiscal 2025 due to the transition from externally managed operations and maintenance to an in-house model in some of the transmission entities and increase on account of acquisition of solar entities.

Investment management fees: Our Investment management fees decreased by 35.60% from ₹ 974.39 million in Fiscal 2024 to ₹ 627.47 million in Fiscal 2025 due to acquisition fees recorded in Fiscal 2024.

Cost of construction of service concession asset: In Fiscal 2025, Cost of construction of service concession asset was recorded amounting to ₹ 677.86 million in accordance with Ind AS 115.

Profit before tax

As a result of the factors outlined above, our profit before tax was ₹ 4,442.21 million in Fiscal 2025 compared to a profit before tax of ₹ 3,150.20 million in Fiscal 2024.

Total tax expense

Total tax expense increased to ₹ 337.18 million in Fiscal 2025 from ₹ 185.40 million in Fiscal 2024, primarily on account of deferred tax of ₹ 178.53 million in Fiscal 2025 as against deferred tax of ₹ 45.76 million in Fiscal 2024.

Total Comprehensive Income for the year (net of tax)

As a result of the factors outlined above, our total comprehensive income for the year (net of tax) was ₹ 3,914.93 million in Fiscal 2025 compared to a total comprehensive income for the year (net of tax) of ₹ 2,938.77 million in Fiscal 2024. This was an increase of 33.22%.

Consolidated Fiscal 2024 compared to Fiscal 2023

Total Income

We had a total income of ₹ 29,874.81 million in Fiscal 2024, resulting in an increase of 23.74 % from our total income of ₹ 24,142.88 million in Fiscal 2023. This increase in total income was primarily due to:

Revenue from contracts with customers: Our revenue from contracts with customers in Fiscal 2024 increased by 22.82% from ₹ 23,318.12 million in Fiscal 2023 to ₹ 28,639.55 million in Fiscal 2024. This increase in revenue from contracts with customers is primarily attributable to increase in revenue from sale of electricity (Solar) on account of acquisition of 15 solar assets in the month of August 2023 and 1 solar asset in the month of March 2024.

Income from investment in mutual funds: Our income from our investment in mutual funds had increased by 59.13 % from ₹ 362.55 million in Fiscal 2023 to ₹ 576.93 million in Fiscal 2024. This is primarily attributable to increase in surplus cash.

Interest income on investment in bank deposits/fixed deposits: Our interest income on investment in bank deposits/fixed deposits increased by 69.70% from ₹ 239.37 million in Fiscal 2023 to ₹ 406.22 million in Fiscal 2024. This is primarily attributable to increase in surplus cash and increase in DSRA.

Other income: Our other income decreased by 0.83% from ₹ 220.91 million in Fiscal 2023 to ₹ 219.08 million in Fiscal 2024, which is primarily attributable to decrease in the income received from the sale of scrap by ₹ 61.18 million, decrease in deferred income on VGF by ₹ 22.82 million which was offset by an increase in income from shifting of transmission line of ₹ 66.76 million.

Total expenses

Our total expense increased by 37.37% from ₹ 19,454.40 million in Fiscal 2023 to ₹ 26,724.42 million in Fiscal 2024 due to reasons explained below.

Finance costs: Our finance costs increased by 29.36% from ₹ 10,108.90 million in Fiscal 2023 to ₹ 13,076.54 million in Fiscal 2024 due to an increase in the interest on debts and borrowings measured at amortised cost, other bank and finance charges and interest expense on lease liabilities.

Depreciation and amortization expense: Depreciation and amortization expense was ₹ 7,040.70 million in Fiscal 2023, which increased by 33.43% compared ₹ 9,394.72 million in Fiscal 2024 which is primarily on account of increase in depreciation and amortization due to acquisition of 15 solar assets in the month of August 2023 and one solar asset in the month of March 2024.

Employee benefits expenses: Our employee benefits expenses increased by 205.60% from ₹ 351.96 million in Fiscal 2023 to ₹ 1,075.58 million in Fiscal 2024 due to compensation paid to exiting senior management of the acquired VRET group in August 2023.

Infrastructure maintenance charges / Transmission infrastructure maintenance charges: Our Infrastructure maintenance charges / Transmission infrastructure maintenance charges had increased by 41.06% from ₹ 526.64 million in Fiscal 2023 to ₹ 742.88 million in Fiscal 2024 increase on account of acquisition of solar entities.

Profit before tax

As a result of the factors outlined above, our profit before tax was ₹ 3,150.20 million in Fiscal 2024 compared to a profit before tax of ₹ 4,687.58 million in Fiscal 2023.

Total tax expense

Total tax expense for the Fiscal 2024 increased to ₹ 185.40 million as compared to ₹ 29.79 million in Fiscal 2023 primarily on account of increase in deferred tax of ₹ 137.01 million and increase in current tax expense from ₹ 119.78 million in Fiscal 2023 to ₹ 138.83 million in Fiscal 2024.

Total Comprehensive Income for the year (net of tax)

Our total comprehensive income for the year (net of tax) for the year was ₹ 2,938.77 million in Fiscal 2024 compared to the total comprehensive income for the year (net of tax) for the year of ₹ 4,660.53 million in Fiscal 2023, as a result of the factors outlined above.

Reconciliation from Profit for the period/year to EBITDA

The table below reconciles the profit for the period / year to EBITDA. EBITDA is calculated as profit for the period / year, plus finance costs, total tax expense and depreciation and amortization expense.

(in ₹ million)

Particulars	For the half year ended September 30, 2025	For the year ended March 31, 2025
Profit for the period/year (A)	**1,139.11**	**4,105.03**
Add: Finance costs (B)	8,049.54	14,947.02
Add: Total Tax expense (C)	(44.97)	337.18
Add: Depreciation and amortization expense (D)	5,661.10	11,007.37
Earnings before interest, tax, depreciation and amortization expenses (EBITDA) E= (A+B+C+D)	**14,804.78**	**30,396.60**

Liquidity and Capital Resources of IndiGrid

Overview

Our principal capital requirements are for interest costs and the repayment of long-term borrowings.

Over the past three years, we have been able to finance our capital requirements through cash generated from our operations, long term bank loans and non-convertible debentures. We have been able to finance the operations and maintenance of our Portfolio Assets through cash generated from our operations. As at September 30, 2025, we had cash and cash equivalents of ₹ 1,920.88 million, bank balances (other than cash and cash equivalent) of ₹ 4,216.98 million, current trade receivables of ₹ 7,277.17 million, and current investments of ₹ 11,563.61 million.

We believe that, after taking into account the expected cash to be generated from our operations, we will have sufficient liquidity for our present requirements and anticipated requirements for interest costs and the repayment of long-term borrowings for at least 12 months following the date of this Placement Document.

The following table sets forth information on our current investments and cash and cash equivalents, and bank balances (other than cash and cash equivalents) as at the dates indicated below:

(*in ₹ million*)

Particulars	As at September 30, 2025	As at September 30, 2024	As at March 31, 2025	As at March 31, 2024	As at March 31, 2023
Current Investments	11,563.61	8,276.02	17,611.78	7,419.05	4,462.46
Bank Deposit with remaining maturity for less than 12 months / Bank deposit with original maturity for more than 12 months	1,803.74	3,708.32	2,827.57	3,143.46	-
Bank Deposits for remaining maturity of more than 12 months / 1 year	474.43	462.64	424.48	1,060.22	102.69
Cash and cash equivalents	1,920.88	359.08	1,052.62	2,323.75	3,166.23
Bank balances (other than cash and cash equivalents)	4,216.98	2,378.91	4,037.38	5,135.41	3,870.50

The following table sets forth certain information concerning our cash flows for the periods/ years indicated:

(*in ₹ million*)

Particulars	For the half year ended September 30, 2025	For the half year ended September 30, 2024	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023
Net cash flow generated from operating activities	10,989.86	13,721.29	29,015.94	26,648.11	20,356.06
Net cash flow (used in) investing activities	(10,214.31)	(3,168.36)	(17,796.13)	(61,036.81)	(21,179.44)
Net cash flow generated from/(used in) financing activities	92.71	(12,517.60)	(12,490.94)	33,559.26	(7,883.76)

Net cash flow generated from operating activities

Net cash flow generated from operating activities increased from ₹ 13,721.29 million in the half year ended September 30, 2024 to ₹ 10,989.86 million in the half year ended September 30, 2025, primarily due to additional cash flows generated from two newly acquired assets.

Net cash flow generated from operating activities increased from ₹ 26,648.11 million in Fiscal 2024 to ₹ 29,015.94 million in Fiscal 2025, primarily due to cash flows generated throughout the entire fiscal year 2025 on account of the acquisition of 15 solar assets in the month of August 2024 and one solar asset in the month of March 2024, which had contributed cash flows only for a part of fiscal year 2024 following their acquisition.

Net cash flow generated from operating activities increased to ₹ 26,648.11 million in Fiscal 2024 from ₹ 20,356.06 million in Fiscal 2023, primarily due to additional cash flows generated on account of acquisition of 15 solar assets in the month of August 2023 and one solar asset in the month of March 2024.

Net Cash flow (used in) Investing Activities

Net cash flow (used in) investing activities increased from ₹ (3,168.36) million in the half year ended September 30, 2024 to ₹ (10,214.31) million in the half year ended September 30, 2025, primarily due to property plant and equipment acquired on acquisition of two new assets namely RSAPL and KNTL.

Net cash flow (used in) investing activities decreased to ₹ (17,796.13) million in Fiscal 2025 from net cash flow (used in) investing activities of ₹ (61,036.81) million in Fiscal 2024, primarily due to decrease in the net cash flow used in purchase of property, plant and equipment (including capital work-in-progress) and property, plant and equipment acquired on acquisition from ₹ 32,281.27 million in Fiscal 2024 to ₹ 7,635.47 million in Fiscal 2025. This was primarily attributable to the acquisition of 16 new solar assets in Fiscal 2024.

Net cash flow (used in) investing activities increased to ₹ (61,036.81) million in Fiscal 2024 from ₹ (21,179.44) million in Fiscal 2023, primarily due to increase in the net cash flow used in purchase of property, plant and equipment (including capital work-in-progress) and property, plant and equipment acquired on acquisition to ₹ 32,281.27 million in Fiscal 2024 compared to purchase of property plant and equipment (including capital work-in-progress) of ₹ 17,826.59 million in Fiscal 2023. This was primarily attributable to the acquisition of 16 new solar assets in Fiscal 2024. IndiGrid acquired 15 solar assets in the month of August 2024 and 1 solar asset in the month of March 2024.

Net Cash flow generated from / (used in) Financing Activities

Net cash flow generated from /(used in) financing activities increased from ₹ (12,517.60) million in the half year ended September 30, 2024 to ₹ 92.71 million in the half year ended September 30, 2025, primarily due to additional borrowings availed for acquisition of two new assets.

Net cash flow generated from / (used in**)** financing activities decreased from ₹ 33,559.26 million in Fiscal 2024 to ₹ (12,490.94) million in Fiscal 2025, primarily due to proceeds from issue of unit capital and additional borrowings availed to fund the acquisitions in Fiscal 2024.

Net cash flow generated from / (used in) financing activities was ₹ (7,883.76) million for Fiscal 2023 and the net cash flow generated from financing activities was ₹ 33,559.26 million in Fiscal 2024. This increase was primarily due to proceeds from issue of unit capital and additional borrowings availed to fund the acquisitions in Fiscal 2024.

Financial Resources

Consolidated as of September 30, 2025 compared to September 30, 2024

As of September 30, 2025, we had cash and cash equivalent of ₹ 1,920.88 million and bank balances (other than cash and cash equivalent) of ₹ 4,216.98 million, compared to ₹ 359.08 million and ₹ 2,378.91 million, respectively, as of September 30, 2024. The increase in cash and cash equivalent by ₹ 1,561.80 million and in bank balances (other than cash and cash equivalent) by ₹ 1,838.07 million was primarily attributable to increased borrowings during the period.

Further, our bank deposit with remaining maturity for less than 12 months has increased from ₹ 8.54 million as of September 30, 2024 to ₹ 1,803.74 million as of September 30, 2025 on account of an increase borrowing.

Our current trade receivables increased from ₹ 7,065.24 million as of September 30, 2024 to ₹ 7,277.17 million as of September 30, 2025 due to lower collections.

Consolidated as of March 31, 2025 compared to March 31, 2024

As of March 31, 2025, we had cash and cash equivalent of ₹ 1,052.62 million, which is a decrease of ₹ 1,271.13 million from ₹ 2,323.75 million as of March 31, 2024. We had bank balances (other than cash and cash equivalent) of ₹ 4,037.38 million as of March 31, 2025, compared to ₹ 5,135.41 million as of March 31, 2024. Further, we had current investments of ₹ 17,611.78 million as of March 31, 2025, an increase of ₹ 10,192.73 million from ₹ 7,419.05 million as of March 31, 2024. This was primarily on account of proceeds from the issue of unit capital and borrowing availed during Fiscal 2025.

Our current trade receivables increased from ₹ 4,466.68 million as of March 31, 2024 to ₹ 7,065.24 million as of March 31, 2025, due to lower collections.

Consolidated as of March 31, 2024 compared to March 31, 2023

As of March 31, 2024, we had cash and cash equivalent of ₹ 2,323.75 million, which is a decrease of ₹ 842.48 million from ₹ 3,166.23 million as of March 31, 2023. We had bank balances (other than cash and cash equivalent) of ₹ 5,135.41 million as of March 31, 2024 compared to ₹ 3,870.50 million as of March 31, 2023.

Further, we had current investments of ₹ 7,419.05 million as of March 31, 2024, which is an increase of ₹ 2,956.59 million from ₹ 4,462.46 million as of March 31, 2023. This was primarily on account of proceeds from issue of unit capital and borrowing availed during Fiscal 2024.

Our current trade receivables increased from ₹ 4,180.21 million as of March 31, 2023 to ₹ 4,466.68 million as of March 31, 2024 due to lower collections.

Contingent Liabilities

Our contingent liability (as per Ind AS 37 - Provisions, Contingent Liabilities and Contingent Assets) could adversely affect our financial condition, results of operations and cash flows

Details of our contingent liabilities as of September 30, 2025 are set forth in the table below:

Particulars	As of September 30, 2025 (in ₹ million)
Entry tax demand	432.59
Sales tax demand	28.26
Income tax demand	7.79
Land dispute matters	4.00
Other demands (including GST demands and ROW Claims)	323.28

As of March 31, 2025, we had a contingent liability as per Ind AS 37 of ₹ 791.60 million, the details for which are as set forth in the table below:

Particulars	As of March 31, 2025 (in ₹ million)
Entry tax demand	432.59
VAT/ GST demand	27.94
Income tax demand	7.79
Other demands (including GST demands and ROW Claims)	323.28

Borrowings

As of September 30, 2025, we had consolidated total borrowings of ₹ 219,639.70 million which had increased by 13.32 % from ₹ 1,93,822.20 million as of September 30, 2024, primarily due to additional borrowing availed to fund the acquisition of 2 new assets and fund the capital expenditure for the under-construction projects.

As of March 31, 2025, we had consolidated total borrowings of ₹ 200,461.26 million, which had increased by 4.03% from ₹ 192,702.83 million as of March 31, 2024, primarily due to additional borrowings availed to fund the capital expenditure of the under-construction projects.

As of March 31, 2024, we had consolidated total borrowings of ₹ 192,702.83 million, which had increased by 32.96 % from ₹ 144,931.31 million as of March 31, 2023, primarily due to acquisition of 15 new SPVs and VRET.

(*in ₹ million*)

Particulars	As of September 30, 2025	As of September 30, 2024	As of March 31, 2025	As of March 31, 2024	As of March 31, 2023
Non-Current Borrowing (A)	1,99,822.30	1,68,140.49	173,497.61	181,258.94	135,674.58
Current Borrowing (B)	19,817.40	25,681.71	26,963.65	11,443.89	9,256.73
Total borrowings (A+B)	219,639.70	1,93,822.20	200,461.26	192,702.83	144,931.31

For further details, please see the section entitled "*Financial Indebtedness and Deferred Payments*" on page 327.

Planned capital expenditure

Other than the capital expenditure to be incurred for completion of the under-construction Portfolio Assets, capacity augmentation and in the ordinary course of business, we do not anticipate any further capital expenditures for the Portfolio Assets

Off-Balance Sheet Transactions

We do not have any off-balance sheet transactions.

Related party transactions

We have in past engaged, and in the future may engage, in related party transactions. For a description of our related party transactions and procedures for dealing with and approval of related party transactions, please see the section entitled "*Related Party Transactions*" on page 366.

Market Risks

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: interest rate risk, currency risk and other price risk such as equity price risk. Financial instruments affected by market risk include loans and borrowings, bank deposits, debt and equity investments and derivative financial instruments and investments.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Our exposure to the risk of changes in market interest rates relates primarily to our long-term debt obligations with floating interest rates. We have both fixed and fluctuating rate of borrowing. However, the interest rate risk is low since substantial portion of borrowing is at fixed rate i.e. approximately 88% as at September 30, 2025.

The development and construction of the Portfolio Assets were funded to large extent by debt and increase in interest expenses could have adverse effect on our cash flows, results of operations and financial condition. Although from time to time we may engage in interest rate hedging transactions or exercise any rights available to us under these financing arrangements to terminate the existing debt financing arrangement and enter into new financing arrangements, there can be no assurance that we will be able to do so on commercially reasonable terms, that our counterparties will perform their obligations, or that these agreements, if entered into, will protect us adequately against interest rate risks.

Foreign currency risk

We do not have any revenues in foreign currency. As of September 30, 2025, we do not have any foreign currency borrowings. However, we have foreign currency based capex imports for certain Transmission and BESS Assets, which have been majorly hedged as on September 30, 2025.

Liquidity risk

Liquidity risk is the risk that we may encounter when we face difficulties in meeting financial obligations that are required to be settled by delivering cash or another financial asset. We primarily require funds for short term operational needs as well as for long term investment programs mainly to finance projects. We manage this risk by closely monitoring our liquidity position and by deploying a cash management system, and we aim to minimise these risks by sufficient operational cash flows, which in addition to the available cash and cash equivalents and liquid investments will provide liquidity.

Credit Risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. We are exposed to credit risk from its operating activities (primarily trade receivables) and from its financing activities, including deposits with banks and financial institutions and other financial instruments.

We, through its subsidiaries is engaged in transmission business and currently derive its revenue primarily from long term transmission customers ("**LTTC's**"). Being transmission licensees, we receive payments as per the pooling arrangements specified under the Central Electricity Regulatory Commission (Sharing of Inter State Transmission Charges and Losses) Regulations, 2010 (the "**Pooling Regulations**"). In the PoC method, the transmission charges to be recovered from the entire system are allocated between users based on their location in the grid. Under the PoC mechanism, all the charges collected by the Central Transmission Utility from LTTC's are disbursed pro-rata to all Transmission Service Providers ("**TSPs**") from the pool in proportion of the respective billed amount. Due to this, the TSPs are shielded against any potential default by a particular customer. If a particular customer delays or defaults, the delay or shortfall is prorated amongst all the TSPs. Based on past history of payments, payments due have always been paid and there have been no write-offs for due amounts. Due to the payment mechanism explained above as well as due to no history of any write-offs of payments which were due, we have not considered any expected credit loss on the financial assets in the nature of trade receivables. During the various periods presented, there has been no change in the credit risk of trade receivables. However, this assessment may need a review if there is any change in the Pooling Regulations.

Solar and BESS entities have entered in to long-term PPAs and/or BESPA with central and state distribution companies (discoms). Where there is only single customer i.e. various DISCOMs which are generally high rated public sector undertakings.

Inflation

Inflation may have a material impact on our business, results of operations and cash flows. Only a relatively small proportion of our tariff fee is comprised of an escalable component which varies with inflation, most of the tariff is on a fixed non-escalable rate. Our major expenses, including insurance costs and third party contractors for operations and maintenance, are subject to inflation.

Seasonality

Our financial results are not affected by seasonality.

Unusual or Infrequent Events or Transactions

Except as described in this Placement Document, there have been no events or transactions to our knowledge which may be described as "unusual" or "infrequent".

Known Trends or Uncertainties

Other than as described in this section and the section entitled "*Risk Factors*" on page 86, respectively, to our knowledge there are no known trends or uncertainties that have or had or are expected to have a material adverse impact on our revenues or income from continuing operations.

Future Changes in Relationships between Cost and Revenue

Other than as described in this section and the section entitled "*Risk Factors*" on page 86, to our knowledge there are no known factors which will have a material adverse impact on our operations or finances.

New Services or Business

Other than as described in the section entitled "*Our Business*" on page 247, there are no new services or business in which we operate.

Competitive Conditions

We expect competitive conditions in our industry to intensify further as new entrants emerge and as existing competitors seek to emulate IndiGrid's business model and offer similar services and investment opportunities. For further details, please see the sections entitled "*Industry Overview*", "*Risk Factors*" and "*Our Business*" on pages 188, 86 and 247, respectively.

Significant Developments after September 30, 2025

To our knowledge, there has been no material development after the date of the financial statements included in this Placement Document, apart from the below:

- Except as stated below, there are no developments have taken place since September 30, 2025, i.e. the date of the financial statements as disclosed in the Issue Documents (as defined hereinafter) which affect or are likely to affect, materially and adversely, the operations, revenue or profitability of the Trust, or the value of its assets, or its ability to pay its liabilities within the next 12 months:

- IndiGrid has executed a share purchase agreement dated December 2, 2025 for the acquisition of 100% of the equity shares and management control of Gadag Transmission Limited from ReNew Transmission Ventures Private Limited and KNI India AS;

- the Investment Manager, acting in the capacity of investment manager to IndiGrid on November 11, 2025, considered and approved allotment of 2,59,82,092 Units on preferential basis to the eligible allottees for cash at a price of ₹ 168.77 per unit aggregating to approximately ₹ 43.85 million. The newly issued units are listed and permitted to trade on BSE Limited and National Stock Exchange of India Limited with effect from Friday, November 14, 2025.

- there are no material changes in the contingent liabilities of the Trust and the Portfolio Assets since September 30, 2025, i.e. the date of the financial statements as disclosed in the Issue Documents; and

- there are no material changes in the capital and other commitments of and the Portfolio Assets since September 30, 2025, i.e. the date of the financial statements as disclosed in the Issue Documents.

Further, no developments have taken place or circumstances arisen which have materially and adversely affected or are likely to affect within the next twelve months the: (i) trading, profitability, performance or prospects of IndiGrid or its underlying holding companies and special purpose vehicles (on a standalone or consolidated basis); (ii) value of the assets of the IndiGrid or its underlying holding companies and special purpose vehicles (on a standalone or consolidated basis); (iii) the ability of the IndiGrid or its underlying holding companies and special purpose vehicles (on a standalone or consolidated basis) to pay its liabilities.

Investment Manager (on behalf of IndiGrid) confirms that there has been no material change in the contingent liabilities since September 30, 2025, being the date of latest financial information included in this Placement Document.

IndiGrid and the Investment Manager confirm that there has been no material change in the capital and other commitments since September 30, 2025, being the date of latest financial information included in this Placement Document.

The month-wise unaudited revenue for the Portfolio Assets from the date of the latest financial statements included in this Placement Document until the completed month before the filing of this Placement Document has been provided below:

RELATED PARTY TRANSACTIONS

In terms of Regulation 2(1)(zv) of the InvIT Regulations, related party shall be as defined as under the Companies Act, 2013 or under the applicable accounting standards and shall also include: (i) Parties to IndiGrid; and (ii) promoters, directors, and partners of the Parties to IndiGrid. Further, related parties also include such persons and entities as defined in terms of the applicable accounting standards, being Ind AS 24 on "*Related Party Disclosures*" (the "**Related Parties**"). The Parties to IndiGrid, may, from time to time, enter into related party transactions, in accordance with applicable law.

Proposed Related Party Transactions

The Investment Manager's Internal Controls System

The Investment Manager has implemented an internal controls system to ensure that all future or any subsequent modifications of transactions of IndiGrid with related parties will be:

(a). on an arm's length basis in accordance with the relevant accounting standards;

(b). in the best interest of the Unitholders; and

(c). consistent with the strategy and investment objectives of IndiGrid.

For a description of the various measures implemented by the Investment Manager in this regard, please see the section entitled "*Corporate Governance*" on page 179.

We propose to pay a fee to Axis Capital Limited ("Axis Capital**") from the net Proceeds in its capacity as a Placement Agent. While Axis Capital is an affiliate of the Trustee, it is not an associate of the Trust in terms of the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992. There is no conflict of interest under the Securities and Exchange Board of India (Merchant Bankers) Regulations, 1992, as amended, or any other applicable SEBI rules or regulations and current disclosure is being made to ensure disclosure of all transactions with affiliate of the Trustee. The current disclosure is being made to ensure disclosure of all transactions with affiliate of the Trustee*

Procedure for dealing with Related Party Transactions and Potential Conflicts of Interest

The Investment Manager has established certain procedures to deal with conflict of interest issues. For details and description of such procedures, please see the section entitled "*Corporate Governance*" on page 179 and the "*Policy on Related Party Transactions*" adopted by the Investment Manager, which is available at https://www.indigrid.co.in/wp-content/uploads/2021/12/10_Policy_on_Ralated_Part_-Transactions_23.01.2025.pdf

Disclosure of Related Party Transactions

For details of the related party transactions as per Ind AS 24 entered into by IndiGrid as of and for the last three Fiscals, and as of and for the half year ended September 30, 2025, please see the "*Financial Statements*" enclosed at *Annexure B*.

REGULATIONS AND POLICIES

The following description is a summary of certain sector specific laws currently in force in India, which are applicable to our business and operations. The information detailed in this section has been obtained from publications available in the public domain. The description below may not be exhaustive, and is only intended to provide general information, and is neither designed as, nor intended to substitute, professional legal advice. Judicial and administrative interpretations are subject to modification or clarification by subsequent legislative, judicial or administrative decisions.

Industry specific legislations

Electricity Act, 2003 and the Electricity Rules, 2005

The Electricity Act, 2003 (the "**Electricity Act**") is the central legislation which covers, amongst others, generation, transmission, distribution, trading and use of electricity and prescribes technical standards in relation to the connectivity of generating companies with the grid. As per provisions of the Electricity Act and the rules made thereunder, generating companies are required to establish, operate and maintain generating stations, tie-lines, sub-stations and dedicated transmission lines. Further, the generating companies may supply electricity to any licensee or to consumers subject to availing open access to the transmission and distribution systems and payment of transmission charges, including wheeling charges and open access charges, as may be determined by the concerned electricity regulatory commission, in accordance with the Electricity Act and the rules and regulations made thereunder.

Under the Electricity Act, the transmission, distribution and trade of electricity are licensed activities that require licenses from the Central Electricity Regulatory Commission (the "**CERC**"), concerned State Electricity Regulatory Commissions (the "**SERCs**") or a joint commission (constituted by an agreement entered into by two or more state governments or the central government in relation to one or more state governments, as the case may be) (the joint commission along with the CERC and the SERCs, hereinafter collectively referred to as the "**Appropriate Commission**"). In accordance with Section 7 of the Electricity Act, a generating company may establish, operate and maintain a generating station without obtaining a licence under the Electricity Act if it complies with the technical standards relating to connectivity with the grid prescribed under clause (b) of Section 73 of the Electricity Act.

Under the Electricity Act, the SERCs are required to promote co-generation and generation of electricity from renewable sources of energy and sale of electricity to any person. The Electricity Act further requires the SERCs to specify, for the purchase of electricity from renewable sources, a percentage of the total consumption of electricity within the area of a distribution licensee ("**Renewable Purchase Obligations**" or "**RPOs**").

Additionally, Electricity Rules, 2005 (the "**Electricity Rules**") also prescribe a regulatory framework for developing captive generating plants. Pursuant to the Electricity Rules, a power plant shall qualify as a captive power plant only if not less than 26% of ownership is held by captive users and not less than 51% of the aggregate electricity generated in such plant, determined on an annual basis, is consumed for captive use. In case of a generating station owned by a company formed as a special purpose vehicle, the electricity required to be consumed by the captive users are to be determined with reference to such unit or units identified for captive use and not with reference to the generating station as a whole, and the equity shares of such special purpose vehicle required to be held by the captive users must not be less than 26% of the proportionate equity interest of the company related to the generating unit or units identified as the captive generating plant. Further, pursuant to amendments to the Electricity Rules, the license period for deemed licensees which do not have a fixed license period has been fixed as 25 years from the date of coming into force of the Electricity Act.

Tariff Determination

Under the Electricity Act, tariffs are broadly determined in the following manner:

(i) in terms of Section 62(1) of the Electricity Act, the Appropriate Commission is empowered to determine the tariff for the supply of electricity by a generating company to a distribution licensee, and for transmission, wheeling and retail sale of electricity. The Appropriate Commission is guided by certain principles while determining the tariff applicable to power generating companies which include, among other things, principles and methodologies specified by the CERC for tariff determination, safeguarding consumer interest and other multiyear tariff principles and the National Electricity Policy (the "**NEP**") and the applicable Tariff Policy; and

(ii) alternatively, tariff may be determined through the transparent process of bidding in accordance with the guidelines issued by Government of India and in terms of Section 63 of the Electricity Act, the Appropriate Commission shall adopt such tariff.

The Ministry of Power notified the Electricity (Amendment) Rules, 2025 on September 19, 2025 stating that an energy storage system may be utilised as either an independent energy storage system or as a part of generation, transmission or distribution and clarifies the legal status of the ownership of BESS assets, along with providing an option of selling, renting or leasing the asset.

National Tariff Policy, 2016 ("NTP 2016")

In exercise of the powers conferred under Section 3 of the Electricity Act, 2003, the Government of India has notified the revised tariff policy to be applicable from January 28, 2016. NTP 2016 specifies that any action taken under the provisions of the Tariff Policy, shall, in so far as it is not inconsistent with NTP 2016, be deemed to have been done or taken under the provisions of this NTP 2016. NTP 2016 has introduced several reforms and has an increased focus on renewable energy, sourcing power through competitive bidding and the need for 'reasonable rates'. The objective of NTP 2016, includes, amongst other things:

(i) ensuring financial viability of the power sector and attract investments;
(ii) ensuring availability of electricity to consumers at reasonable and competitive rates;
(iii) promoting generation of electricity from renewable power sources; and
(iv) promoting hydroelectric power generation.

The NTP 2016 has been drafted to guide the CERC and SERCs. The NTP 2016 states that the renewable purchase obligations ("**RPO**") in respect of co-generation from sources other than renewable sources shall not be excluded from the applicability of the RPO obligation and certain clarifications on the renewable generation obligations. Further, the NTP 2016 states that renewable energy produced by each generator may be bundled with its thermal generation for the purpose of sale. In case an obligated entity procures this renewable power, then the SERCs will consider the obligated entity to have met the RPO to the extent of power bought from such renewable energy generating stations.

Further, states have been mandated to make necessary endeavours to procure power from renewable energy through competitive bidding. NTP 2016 also states that 35% of the installed capacity can be procured by the state at SERC determined tariff. NTP 2016 states that no inter-state transmission charges and losses for renewable power (solar or wind)maybe levied until such date as may be notified by the Government of India. The NTP 2016 also discusses the implementation of Multi-Year Tariff Framework.

National Electricity Plan, for the period 2022 -32 ("NEP")

The National Electricity Plan (Volume I: Generation), for the period of 2022-32, was notified by the CEA in May 2023 ("**NEP**"). The key highlights include, among other things, the following:

(i) the estimated installed capacity for the year 2026-27 is 669,340 MW (comprising of 208,260 MW of Solar and 8,680 MW of BESS based capacity);.

(ii) the target installed capacity for the year 2031-32 is estimated to be 997,352MW (comprising of 385,153 MW of Solar and 47,244 MW of BESS based capacity); and

(iii) the estimated total capacity addition is in line with the target of the country to achieve a non-fossil based installed capacity of around 500 GW by the year 2029-30.

The National Electricity Plan (Volume II: Transmission) ("**NEP-II**"), notified by the CEA in October 2024, covers the review of development of transmission system during the period 2017-22, detailed plan for the period 2022-27, and perspective plan for the period 2027-32.

Electricity (Amendment) Rules, 2023

The Electricity (Amendment) Rules, 2023 were notified on June 30, 2023.The amendment introduces a rule pertaining to a person or entity functioning as a licensee under the previous act and continues to function as a licensee and where the duration of the license is not prescribed, in such cases the period of the license shall be 25 years from the date of the coming into force of the act. Further the license shall be renewed for a period of 25 years at a time or for a lesser period, if requested by the licensee.

Central Electricity Regulatory Commission (Terms and Conditions for Tariff Determination from Renewable Energy Sources) Regulations, 2024

The CERC has notified the Central Electricity Regulatory Commission (Terms and Conditions for Tariff Determination from Renewable Energy Sources) Regulations, 2024 (the "**CERC Tariff Regulations**") which supersede the regulations issued in 2020. The Tariff Regulations govern the determination of tariff, for a grid connected generating station or a unit thereof commissioned during the 'control period' (being a period from July 1, 2024 to March 31, 2027 (the "**Control Period**"). The CERC Tariff Regulations apply to cases where tariff for a grid connected generating station or a unit thereof commissioned during the Control Period and based on renewable energy sources, is to be determined by the CERC in accordance with Section 62 read with Section 79 of the Electricity Act, as well as Section 4 of the CERC Tariff Regulations, which provides for the eligibility criteria, as may be applicable. The CERC Tariff Regulations further lay down the parameters for determining the tariff for the sale of electricity generated from renewable sources along with the tariff structure and design. CERC, in accordance with the procedure provided in the CERC Tariff Regulations, will determine the generic tariff on the basis of petition at the beginning of each year of the Control Period. The CERC Tariff Regulations provides for different renewable energy projects for which 'generic tariff' and 'project specific tariff' is to be determined by CERC.

Central Electricity Regulatory Commission (Fees and Charges of Regional Load Despatch Centre and The other related matters) Regulations, 2024

The CERC notified the Central Electricity Regulatory Commission (Fees and Charges of Regional Load Despatch Centre and other related matters) Regulations, 2024 (the "**CERC RLDC Regulations**") on July 12, 2024 and shall be applicable during the control period from April 1, 2024 to March 31, 2029 for determination of fees and charges to be collected by RLDCs from the generating companies, distribution licensees, inter-state transmission licensees, buyers, sellers and inter-state trading licensees and any other users. The CERC RLDC Regulations also sets out the registration process and functions for RLDCs or NLDCs, application process for determination of fees and charges, computation of capital cost, additional capitalization and decapitalization, debt – equity ratio, fees and charges structure, computation and recovery of fees and charges and performance linked incentives. The CERC RLDC Regulations were amended by the Central Electricity Regulatory Commission (India Electricity Grid Code) (First Amendment) Regulations, 2024 dated October 23, 2024.

Central Electricity Regulatory Commission (Indian Electricity Grid Code) Regulations, 2023 ("Grid Code, 2023")

On May 29, 2023, the CERC notified the CERC (Indian Electricity Grid Code) Regulations, 2023 ("**Grid Code, 2023**"). The Grid Code, 2023 lays down a single set of technical and commercial rules, encompassing all the utilities connected to/or using the interstate transmission system. The Grid Code, 2023 also lays down the rules, guidelines and standards to be followed for planning, developing, maintaining and operating the power systems, in the most secure, reliable, economic and efficient manner. The Grid Code, 2023 require the wind and solar power generators to forecast and schedule their power generation on a day ahead basis. Further, the Grid Code, 2023, read along with Electricity (Promotion of Generation of Electricity from Must-Run Power Plant) Rules, 2021, provides a 'must-run' status to all solar and wind power plants and exempts such power plants from 'merit order dispatch' principles.

Apart from the provisions relating to the roles of various statutory bodies, the Grid Code, 2023, contains provisions pertaining to the reliability and adequacy of resources, technical and design criteria for connectivity to the grid, integration of renewable energy sources and cyber security considerations.

Central Electricity Regulatory Commission (Deviation Settlement Mechanism and Related Matters) Regulations, 2024

The CERC has announced the Central Electricity Regulatory Commission (Deviation Settlement Mechanism and Related Matters) Regulations, 2024 (the "**CERC Deviation Settlement Mechanism Regulations**") on August 5, 2024. The CERC Deviation Settlement Mechanism Regulations seek to ensure, through a commercial mechanism that users of the grid do not deviate from and adhere to their schedule of drawal and injection of electricity in the interest of security and stability of the grid. The CERC Deviation Settlement Mechanism Regulations were amended on June 25, 2025 by way of the Central Electricity Regulatory Commission (Deviation Settlement Mechanism and Related Matters) (Second Amendment) Regulations, 2025 to revise the charges for injection of infirm power.

Central Electricity Regulatory Commission (Open Access in Inter-State Transmission) Regulations, 2008 (the "CERC Open Access Regulations")

The CERC Open Access Regulations for inter-state transmission provide for a framework which not only facilitates traditional bilateral transaction (negotiated directly or through electricity traders), but also cater to collective transactions discovered in a power exchange through anonymous, simultaneous competitive bidding by sellers and buyers. Applicable to short term open access transactions up to one month as a time, the emphasis of the CERC Open Access Regulations is on scheduling rather than reservation to ensure that the request of an open access customer is included in the despatch schedules released by RLDCs. Further, certain types of transmission services by payment of transmission charges (to be levied in rupees per MWH) shall be available to open access customers based on the type of transactions, i.e. bilateral or collective. In addition to transmission charges, certain operating charges shall also be levied. The CERC Open Access Regulations enable entities connected to inter-state transmission as well as intra-state transmission and distribution system to purchase power from a source other than the incumbent distribution licensee situated outside the relevant State.

On December 12, 2019, CERC notified the CERC (Open Access in Inter-State Transmission) (Sixth Amendment) Regulations, 2019. By way of this amendment, certain changes to provisions relating to intra-day transaction or contingency transaction, real time transactions, procedure for scheduling of transaction in real-time market were introduced.

On April 1, 2022, CERC approved the procedure for short term open access in inter-state transmission system through national open access registry as set out in CERC (Open Access in Inter-State Transmission) (Fifth Amendment) Regulations, 2018 dated January 2, 2019 and the same shall be effective from the date of this amendment.

Central Electricity Regulatory Commission (Connectivity and General Network Access to the inter-State

Transmission System) Regulations, 2022 ("GNA Regulations")

The CERC notified the GNA Regulations on June 7, 2022, in order to provide for a regulatory framework to facilitate non-discriminatory open access to licensees, generating companies and consumers for the use of the inter-state transmission system through general network access along with a consolidation of prior regulations. The GNA Regulations repealed the CERC (Grant of Connectivity, Long-Term Access and Medium-Term Open Access in Inter-State Transmission and related matters) Regulations, 2009 along with the detailed procedures of central transmission utility under clause (1) of Regulation 27 of the CERC (Grant of Connectivity, Long-term Access and Medium-term Open Access in inter-state Transmission and related matters) Regulations, 2009.

These regulations set out the application procedure for grant of connectivity with or grant of access to the inter-State transmission system where designated nodal agencies are responsible for the grant. Along with the Electricity (Promoting Renewable Energy Through Green Open Access) Rules, 2022 these regulations create an application process for general network access for renewable energy generators and consumers.

On April 1, 2023 the CERC notified the CERC (Connectivity and General Network Access to the Inter-State Transmission System)(First Amendment) Regulations, 2023, which among other changes, introduces Regulation 11A introducing conditions to be fulfilled by a connectivity grantee after the grant of connectivity and general network access.

Central Electricity Regulatory Commission (Sharing of Inter State Transmission Charges and Losses) Regulations, 2020 ("**2020 ISTS Charges Regulations**")

The 2020 ISTS Charges Regulations shall come into effect from November 11, 2020 and have replaced the CERC (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2010. The 2020 ISTS Charges Regulations lays down the details and mechanism applicable to all designated ISTS customers, inter-state transmission licensees, NLDC, RLDC, SLDCs and regional power committees in relation to inter-state transmission charges and losses. In accordance with the order dated August 5, 2020, issued by the Ministry of Power, (in supersession of its previous orders dated February 13, 2018 and November 6, 2019), no inter-state transmission charges and losses for the use of ISTS network is payable for the electricity generated from power plants for a period of 25 years from the date of commissioning of power plants which meet the following criteria:

(i) power plants using wind, solar including the wind-solar hybrid projects with or without storage commissioned till June 30, 2023 for sale of power to entities having RPO irrespective of whether the power is within RPO or not, provided that in case of distribution licensees, the power has been competitively procured under the guidelines issued by central government.

(ii) solar photo-voltaic power plants commissioned under the Ministry of New and Renewable Energy's Central Public Sector Undertaking Scheme Phase-II dated March 5, 2019.

(iii) solar photo-voltaic power plants commissioned under SECI manufacturing linked tender dated June 25, 2019 for sale to entities having RPO, irrespective of whether power is within RPO or not.

On June 26, 2025, the CERC notified the CERC (Sharing of Inter-State Transmission Charges and Losses) (Fourth Amendment) Regulations, 2025. By way of this amendment certain principal regulations including the grant of waiver for battery energy storage systems.

The Central Electricity Regulatory Commission (Terms and Conditions for Renewable Energy Certificates for Renewable Energy Generation) Regulations, 2022 (the "REC Regulations")

The CERC notified the REC Regulations on May 9, 2022. The REC Regulations aim at the development of market for power from renewable energy sources by issuance of transferable and saleable credit certificates (renewable energy certificates or RECs). Under the REC Regulations, renewable energy generating stations, captive generating stations, open access consumers and distribution licensees can issue RECs and the certificates remain valid till they are redeemed for an indefinite period. One REC is equivalent to 1 megawatt-hour energy generated from renewable energy generator and injected into the grid.

The CERC has nominated the National Load Despatch Centre as the central agency to perform the functions, including, amongst other things, registration of eligible entities, issuance of certificates, maintaining and settling accounts in respect of certificates, acting as repository of transactions in certificates and such other functions incidental to the implementation of REC mechanism as may be assigned by the CERC.

Net Metering Regulations

These regulations have been formulated by various states to promote the generation of electricity from renewable energy sources in respect of the grid connected solar rooftop photovoltaic systems. These regulations regulate the supply of excess electricity from an eligible consumer allowing the consumer to export the excess quantum of electricity produced from his premises to the distribution licensee. Under these regulations, the eligible consumer can avail the benefit of the excess quantum supplied to be carried forward to the next billing cycle as credited units of electricity.

Guidelines for Tariff Based Competitive Bidding Process for Procurement of Power from Grid Connected Wind Solar Hybrid Projects ("Hybrid Project Competitive Bidding Guidelines")

The Ministry of Power has issued the Hybrid Project Competitive Bidding Guidelines on August 21, 2023. These guidelines supersede the previous competitive bidding guidelines issued by the Ministry of Power in 2017 and 2020 in this regard. The Hybrid Project Competitive Bidding Guidelines aim to, *inter-alia*, promote competitive procurement of electricity from grid connected wind solar hybrid projects by distribution licensees, facilitate renewable capacity addition, transparency and fairness in the procurement process and provide a risk-sharing framework among stakeholders. Bidders are required to submit bids within a range of two to five percent of the lowest tariff bid (the L1 bid). According to the guidelines, the procurer can purchase excess energy generated beyond the maximum capacity utilization factor (CUF) at the PPA tariff price. Projects with up to 1,000 MW capacities are now required to commence power supply within 24 months of signing the PPA, while projects exceeding the 1,000 MW threshold have been granted a timeline of 30 months from execution of PPA. Further, the standard tenure of a PPA has been fixed at 20 years. The revised guidelines have also incorporated penalties for project delays. In cases where the project is delayed by more than six months from the scheduled commissioning date, the contracted capacity may be reduced. The Hybrid Project Competitive Bidding Guidelines extend to all forthcoming wind, solar and hybrid power projects.

Guidelines for Development of Onshore Wind Power Projects, 2016 ("**MNRE Guidelines**")

The Ministry of New and Renewable Energy ("**MNRE**") initially issued guidelines for orderly growth of wind power sector, which have been revised from time to time. The MRNE Guidelines aim to facilitate the development of wind power projects in an efficient, cost effective and environmentally benign manner, taking into account the requirements of project developers and state and national imperatives. These guidelines provide, amongst others, provisions for site selection and feasibility, type certification and quality assurance, grid connectivity, micrositing, metering and real time monitoring. MNRE issued an office memorandum dated July 4, 2024, amending the guidelines to further include specific guidelines on micrositing.

Renewable Purchase Obligations

The Electricity Act and the Tariff Policy require the SERCs to specify, for the purchase of electricity from renewable sources, a percentage of the total consumption of electricity within the area of a distribution licensee. RPOs are required to be met by obligated entities (distribution licensees, captive power plants and open access consumers) by purchasing renewable energy, either by renewable energy power producers or by purchasing RECs. In the event of default by an obligated entity, the SERCs may direct the obligated entity to pay a penalty or to deposit an amount determined by the relevant SERC, into a fund to be utilized for, among others, the purchase of renewable energy certificates.

Ujjwal Discom Assurance Yojana ("UDAY")

The UDAY scheme for Operational and Financial Turnaround of Power Distribution Companies, is a scheme formulated by the Ministry of Power, Government of India, by way of an office memorandum dated November 20, 2015 with an objective to improve the operational and financial efficiency of DISCOMs. The scheme is applicable only to state-owned DISCOMs, including combined generation, transmission and distribution undertakings.

National Action Plan on Climate Change

The National Action Plan on Climate Change (the "**NAPCC**") issued by the Government of India in 2008 has recommended that the national renewable energy generation standard be set at 5% of total grid purchase and that it be increased by 1% each year for 10 years. SERCs can set higher percentages than this minimum at each point in time. NAPCC also recommends imposition of penalty under the Electricity Act in case of utilities falling short to meet their Renewable Standard Obligations.

National Wind Mission

In order to boost electricity generation from on-shore and off-shore wind sources, ensure certainty for stakeholders and capacity building, the MNRE formulated the National Wind Mission as part of the Twelfth Five Year Plan, which provides for, amongst other, land allocation mechanisms, tariff and financing mechanisms.

Integrated Energy Policy 2006

The Integrated Energy Policy, 2006, (the "**Policy**") is a report of an expert committee constituted by the Government of India, to explore alternative technologies and possible synergies that would increase energy system efficiency and meet the requirement for energy services. The aims and objectives of this Policy include, amongst others, providing appropriate fiscal policies to take care of externalities, tax measures, transparent and targeted subsidies, promoting energy efficiency, providing incentive for renewable energy production by linking the incentive to not just the outlay but also the output. The Policy also provides for the respective power regulators to mandate feed-in-laws for renewable energy, as may be appropriate and as provided under the Electricity Act. With respect to wind power, the Policy provides that where cultivations are not affected, a wind turbine installation should be permitted on an agricultural land without requiring its conversion into non-agricultural land.

State Level Policies, Guidelines for Promotion and Establishment of Renewable Energy Projects

Various states, from time to time, have announced administrative policies relating to wind and solar power projects and the matters relating thereto. Typically, these state policies are framed by nodal agencies responsible for development of renewable energy and energy conservation in the respective states. These policies provide for, among others, the incentives of setting up of wind and or solar power projects in the relevant states, procedure and approvals required for setting up of wind and solar power projects within the state, regulation of grid integration, connectivity and security, and tariff determination.

Guidelines for Procurement and Utlization of Battery Energy Storage Systems as part of the Generation, Transmission and Distribution assets, along with Ancillary Services

The Ministry of Power issued the Guidelines for Procurement and Utilization of BESS on March 10, 2022 to facilitate procurement of BESS, as part of individual renewable energy projects or separately for addressing the variability/firming power supply, increasing energy output, extending the time of supply from an individual RE project or a portfolio of renewable energy projects, augmentation of existing renewable energy projects and/or to provide ancillary, grid support and flexibility services for the grid, and facilitate procurement of BESS for optimum utilization of transmission and distribution network. These Guidelines for Procurement and Utilization of BESS are focused on procurement of energy from BESS by the 'procurers', through competitive bidding, from grid connected projects to be set up on "Build-Own-Operate" or "Build-Own-Operate-Transfer" basis. Further, it provides the parameters for minimum project sizes and bid capacity requirements.

Scheme for Viability Gap Funding for development of Battery Energy Storage Systems

The Ministry of Power, on March 15, 2024, implemented the schemed for Viability Gap Funding for development of Battery Energy Storage Systems (the "**Scheme**") for the development of 4,000 MWh of Bess capacity. The salient features of the scheme are as follows:

(i) the scheme period shall be three years from 2023-24 to 2025-26. Projects falling under the scheme will receive approval during this period, and the funds will be disbursed up to 2030-31;

(ii) VGF of up to 40% of capital cost for BESS shall be provided by the Central Government. The VGF shall be a non-recurring expenditure and shall be fully funded from central grant; and

(iii) The projects are required to be commissioned within a period of 24 months from the date of signing of the agreement.

The Scheme, with a total outlay of ₹9,400 crores, includes a budgetary support of ₹3,760 crores. It will be administered as a Central Sector Scheme by the Government of India. Adequate budgetary provisions will be made in the annual budget each year.

National Framework for Promoting Energy Storage Systems ("ESS Framework")

The Ministry of Power, on August 2023, has issued the National Framework for Promoting Energy Storage Systems to support the development and deployment of ESS through policy and regulatory measures, financial and fiscal incentives, and performance-based incentives.

Guidelines for Tariff Based Competitive Bidding Process for Procurement of Firm and Dispatchable Power from Grid Connected Renewable Energy Power Projects with Energy Storage Systems ("TBCB Guidelines for BESS")

The Ministry of Power, on June 9, 2023, has issued the TBCB Guidelines for BESS with the following objectives:

(i) to provide firm and dispatchable power to the DISCOMs from renewable energy sources;

(ii) to facilitate renewable capacity addition and fulfilment of Renewable Purchase Obligation (RPO)/ Storage Power obligations (SPO) requirement of DISCOMs;

(iii) to provide a transparent, fair, standardized procurement framework based on open competitive bidding with appropriate risk-sharing between various stakeholders to enable procurement of power at competitive prices in consumer interest, improve bankability of projects and ensure reasonable returns to the investors; and

(iv) to provide for a framework for the inter-state/ intra-state, long-term, sale-purchase of power as a further measure to derisk the sector.

Environmental Laws

The Central Pollution Control Board of India ("**CPCB**"), a statutory organisation established in 1974 under the Ministry of Environment, Forest and Climate Change ("**MoEF&CC**"), is responsible for setting the standards for maintenance of clean air and water and providing technical services to the MoEF&CC.

CPCB has classified industrial sectors under the red, orange, green or white categories. The newly introduced white category pertains to those industrial sectors which are practically non-polluting, including solar power generation through photovoltaic cells, wind power projects of all capacities and mini hydroelectric power. In relation to the white category of industries, only intimation to the relevant SPCB is required, and there is no requirement to obtain a consent to operate for this category. Certain environmental laws which may be applicable to us due to the nature of our business, include:

(i) Water (Prevention and Control of Pollution) Act, 1974, as amended;
(ii) Air (Prevention and Control of Pollution) Act, 1981, as amended;
(iii) The Environmental Impact Assessment Notification, 2006;
(iv) Hazardous and Other Wastes (Management & Transboundary Movement) Rules 2016, as amended; and
(v) The Environment (Protection) Act 1986, along with the Battery Waste Management Rules, 2022, as amended.

Industrial and Labour Laws

The Government has consolidated 29 separate labour laws into four comprehensive Labour Codes: the Code on Wages, 2019, the Industrial Relations Code, 2020, the Code on Social Security, 2020, and the Occupational Safety, Health and Working Conditions Code, 2020 to modernize and streamline India's labour law framework. Its objectives include improving the ease of doing business, fostering job creation, and ensuring every worker's safety, health, and social and wage security. A key reform is the move toward single registration, single license, and single return, designed to reduce compliance burdens and support employment growth. The four Codes took effect on November 21, 2025. During the transition, relevant provisions of existing labour Acts and their associated rules, regulations, notifications, standards, and schemes will continue to apply. In addition to the aforementioned laws and regulations, in respect of our business and operations, we are also required to obtain licenses and registrations and make timely payments as prescribed under certain labour laws as provided under the following four codes now:

(i) The Code on Wages, 2019 (enacted by the parliament of India and assented to by the President of India on August 8, 2019) seeks to simplify, consolidate, and rationalize the provisions of four existing laws - The Payment of Wages Act, 1936; The Minimum Wages Act, 1948; The Payment of Bonus Act, 1965; and The Equal Remuneration Act, 1976. Under the Code, all workers to receive a statutory right minimum wage payment. It aims to strengthen workers' rights while promoting simplicity and uniformity in wage-related compliance for employers.

(ii) The Industrial Relations Code, 2020 (enacted by the Parliament of India and assented to by the President of India on September 28, 2020) has been prepared after amalgamating, simplifying and rationalizing the relevant provisions of the Trade Unions Act, 1926, the Industrial Employment (Standing Orders) Act, 1946 and the Industrial Disputes Act, 1947. The Code acknowledges the fact that survival of worker depends upon survival of industry. In this backdrop, it simplifies laws related to trade unions, conditions of employment in industrial establishment or undertaking, investigation and settlement of industrial disputes.

(iii) The Code on Social Security, 2020 (enacted by the Parliament of India and assented to by the President of India on September 28, 2020) incorporates existing nine Social Security Acts which are - The Employee's Compensation Act, 1923; The Employees' State Insurance Act, 1948; The Employees' Provident Funds and Miscellaneous Provisions Act, 1952; The Employment Exchanges (Compulsory Notification of Vacancies) Act, 1959; The Maternity Benefit Act, 1961; The Payment of Gratuity Act, 1972; The Cine-Workers Welfare Fund Act, 1981; The Building and Other Construction Workers' Welfare Cess Act, 1996 and; The Unorganised Workers' Social Security Act, 2008. The Code extends social security to all workers including unorganized, gig, and platform workers covering life, health, maternity, and provident fund benefits, while introducing digital systems and facilitator-based compliance for greater efficiency.

(iv) The Occupational Safety, Health and Working Conditions Code 2020 (enacted by the Parliament of India and assented to by the President of India on September 28, 2020) has been drafted after amalgamation, simplification and rationalization of the relevant provisions of the 13 Central Labour Acts - The Factories Act, 1948; The Plantations Labour Act, 1951; The Mines Act, 1952; The Working Journalists and other Newspaper Employees (Conditions of Service and Miscellaneous Provisions) Act, 1955; The Working Journalists (Fixation of Rates of Wages) Act, 1958; The Motor Transport Workers Act, 1961; The Beedi and Cigar Workers (Conditions of Employment) Act, 1966; The Contract Labour (Regulation and Abolition) Act, 1970; The Sales Promotion Employees (Conditions of Service) Act, 1976; The Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) Act, 1979; The Cine-Workers and Cinema Theatre Workers (Regulation of Employment) Act, 1981; The Dock Workers (Safety, Health and Welfare) Act, 1986 and; The Building and Other Construction Workers (Regulation of Employment and Conditions of Service) Act, 1996. The Code balances the twin objectives of safeguarding worker rights and safe working conditions, and creating a business-friendly regulatory environment. This will spur economic growth and employment thereby, making India's labour market more efficient, fair, and future-ready.

Shops and Establishments legislations in various states

The provisions of various shops and establishments legislations, as applicable in the states in which our establishments are set up, regulate the conditions of work and employment in shops and commercial establishments, and generally prescribe obligations in respect of, amongst others, registration, opening and closing hours, daily and weekly working hours, holidays, leave, health and safety measures, and wages for overtime work.

Intellectual Property Laws

Certain laws relating to intellectual property rights such as trademarks protection under the Trade Marks Act, 1999 (the "**Trade Marks Act**") are applicable to us.

The Trade Marks Act provides for the process for making an application and obtaining registration of trademarks in India. The purpose of the Trade Marks Act is to grant exclusive rights to marks such as a brand, label, and heading and to obtain relief in case of infringement for commercial purposes as a trade description.

Other Indian laws

In addition to the above, we are also governed by the real estate property laws, relevant central and state tax laws and other applicable laws and regulations imposed by the central and state government for our day to day business and operations.

REGULATORY APPROVALS

IndiGrid and the Portfolio Assets are required to obtain consents, licenses, registrations, permissions and approvals for carrying out their present business activities. Such approvals include approvals for registration as an infrastructure investment trust, transmission licenses, consents, licenses, registrations, permissions and approvals under the Electricity Act, 2003 and regulations made thereunder, approvals from the telegraph authority, energisation approvals from the Central Electricity Authority, aviation clearances from the Airport Authority of India, no objection certificates from the Ministry of Defence, certain environmental or forest approvals and clearances and tax related approvals. There are certain other consents, licenses, registrations, permissions and approvals that the Portfolio Assets obtain for our business, which include, labour related approvals, approvals under the shops and establishments acts of various states, power line crossing approvals, railway line crossing approvals and other approvals. The requirement for such approvals for a particular project undertaken by us may vary based on factors such as the legal requirement in the state in which the project is being undertaken, the size of the projects undertaken and the type of project. Further, as the obligation to obtain such approvals arises at various stages of construction or completion of our projects and related assets, applications are filed and the necessary approvals are obtained at the appropriate stage.

Other than as stated in this section, IndiGrid and the Portfolio Assets have obtained necessary consents, licenses, permissions, registrations and approvals from various governmental, statutory and regulatory authorities, required for the registration as an infrastructure investment trust and for carrying out its present business, as applicable. Certain material consents, licenses, registrations, permissions and approvals that are required to be obtained by IndiGrid and the Portfolio Assets for undertaking their business may elapse from time to time in their normal course and they make applications to the relevant Central or State government authorities for renewal of such consents, licenses, registrations, permissions and approvals or may have made such applications (wherever expedient and prudent) for renewal of such consents, licenses, registrations, permissions and approvals. In view of the approvals listed below, IndiGrid can undertake the Issue as well as its current business, as applicable, and no further major approvals from any governmental or regulatory authority are required to undertake the Issue or to continue its business, as applicable. Unless otherwise stated, these approvals are all valid as on date of this Placement Document.

I. Approvals in relation to the Issue

(i). In-principle approval from the BSE dated January 19, 2026.

(ii). In-principle approval from the NSE dated January 19, 2026.

II. Approvals for IndiGrid

(i). Certificate of registration as an infrastructure investment trust bearing number IN/InvIT/16-17/0005 dated November 28, 2016 issued by SEBI.

(ii). Fresh certificate of registration dated December 9, 2024 issued by SEBI pursuant to the change in name of IndiGrid.

III. Approval received by our Transmission and BESS Assets

<u>Transmission Assets</u>

(i). Transmission licenses issued by CERC for building, owning operating and maintaining transmission lines.

(ii). Tariff orders issued by the CERC under Section 68 of the Electricity Act for adoption of transmission charges in respect of the transmission system.

(iii). Approvals issued by Ministry of Power, Government of India under Section 164 of the Electricity Act for the interstate transmission systems.

(iv). Approvals issued by CEA under Regulation 43 of Central Electricity Authority (Measures relating to Safety and Electric Supply) Regulation, 2010 for energization of transmission lines.

(v). Approvals issued by Ministry of Road Transport & Highways or the relevant state road development corporations for installation of overboard crossing transmission lines.

(vi). Approvals issued by Ministry of Environment, Forest and Climate Change or the relevant state forest departments for diversion of forest land for setting up transmission lines.

(vii). Clearances issued by the Power & Telecommunication Coordination Committee, Government of India, relevant zonal railway authorities and relevant state power transmission corporation for amongst others, installation of overboard crossing transmission lines.

(viii). No-objection certificates issued by the Airport Authority of India and the Ministry of Defense for the construction of transmission projects.

(ix). Approval issued by CERC under Section 14 and Section 17(3) of Electricity Act, 2003.

BESS Assets

(i). Commissioning certificate in relation to KBPL as issued by the relevant commissioning committee;

(ii). Grant of connectivity issued by the relevant governmental transmission authority;

(iii). Tariff orders issued by the CERC under Section 63 and Section 86(1)(b) of the Electricity Act for adoption of tariff./rate discovered under competitive bidding process;

(iv). Registration of the energy storage system project under the relevant state government scheme;

IV. Approvals received by certain Solar Assets

(i). Commissioning certificates and declarations of commercial operations certifying successful commissioning of the projects held by certain Solar Assets.

(ii). Labour licenses obtained under the Contract Labour (Regulation & Abolition) Act, 1970, for registration as principal employers and contractors.

(iii). No-objection certificates issued by the relevant water resources authorities for abstraction and extraction of ground water.

(iv). Registration of factories under the Factories Act, 1948, as applicable.

(v). Energization approval under Central Electricity Authority (Measures relating to Safely and Electrical supply) Regulations, 2010, for energizing the electrical equipment comprising of the solar power plants.

(vi). Fire no objection certificates from the relevant fire department of the respective states.

(vii). Letter of registration/allotment in favor of certain of the Solar Assets for setting up the solar power project issued by RRECL, UPNEDA or Energy and Petrochemicals Department, Gujarat, as the case may be.

(viii). Certain Solar Assets have obtained interconnection approvals for interconnecting the sub-station to the solar project.

(ix). Consent to establish and operate issued by the relevant pollution control boards under Section 21 of the Air Act (Prevention and Control of Pollution), 1981.

(x). Consent to establish and operate issued by the relevant pollution control boards under Section 24 of the Water Act (Prevention and Control of Pollution), 1974.

V. Approvals applied for, but not yet received

Except as disclosed below, there are no approvals required by IndiGrid and the Portfolio Assets for which applications have been made, but approvals have not been received as on the date of this Placement Document:

Transmission and BESS Assets

Transmission Assets

(i). Application to Ministry of Power, Government of India by RKPTL under Section 164 of the Electricity Act for the interstate transmission systems.

(ii). Application to Air Head Quarters made by NTL, seeking a no objection certificate for the construction of the Uri – Wagoora transmission line.

(iii). Application to Air Headquarters made by NTL for approval to construct 10 towers in relation to the 400 kV D/C Jalandhar to Samba and Samba to Amargarh transmission line.

(iv). Application to Power & Telecommunication Coordination Committee, Government of India made by DPTL for the construction of 400 kV D/C Dhule (PS) to Dhule (BDTCL) transmission line.

(v). Application to Deputy Labour Commissioner made by RBPL, for the certificate of registration to be obtained under the Contract Labour (Regulation & Abolition) Act, 1970, for registration as principal employers and contractors.

(vi). Application to Deputy Labour Commissioner made by RBPL, for the certificate of registration to be obtained under the Inter-State Migrant Workmen (Regulation of Employment and Conditions of Service) Act, 1979.

Solar Assets

(i). Application to Uttar Pradesh Power Transmission Corporation Limited made by USUPL, for the fire no objection certificate.

(ii). Application to Chief Fire Officer, Jodhpur made by TLET, for the fire no objection certificate.

(iii). Application to Directorate of Industrial Safety and Health, Gujarat made by PLG and TLEC for factory licenses.

(iv). Application to Directorate of Industrial Safety and Health, Maharashtra made by Solar Edge for a factory license.

(v). Application to respective Electrical Inspector made by TRSPL and TNSPEPL for CEIG safety certificate to be obtained under the Electricity Authority (Measures relating to Safety and Electric Supply) Regulations, 2010.

VI. Approvals for which applications are yet to be made

(i). Application to be made by USUPL TLET and TLEG to the relevant fire department of the respective state for a fire no objection certificate.

(ii). Application to be made by NTL and IPTL to the CEA under Regulation 43 of Central Electricity Authority (Measures relating to Safety and Electric Supply) Regulation, 2010 for energization of transmission lines.

(iii). Application to be made by RKPTL to the Ministry of Defense for a no objection certificate, for the construction of 400 kV Samba- Jalandhar D/C line (Quad), 400 kV Kishenpur-Samba D/C line (Quad) & LILO of 400 kV Kishenpur-Dulhasti line (Twin) at Kishtwar SS.

(iv). Application to be made by RKPTL to the Airports Authority of India for a no objection certificate, in relation height clearance.

(v). Application to be made by RKPTL to the Punjab State Transmission Corporation Limited for the power line crossings for (i) 400 kV Samba- Jalandhar D/C line (Quad) to be obtained from; (ii) 400 kV Kishenpur-Samba D/C line (Quad) to be obtained from PGCIL; and (ii) LILO of 400 kV Kishenpur- Dulhasti line (Twin) at Kishtwar S/s to be obtained from PGCIL.

(vi). Application to be made by RKPTL to the National Highways Authority of India, for the road crossings for (i) 400 kV Samba- Jalandhar D/C line (Quad) to be obtained from NHAI; (ii) 400 kV Kishenpur-Samba D/C line (Quad).

(vii). Application to be made by RKPTL to the Northern Railways of India, for the railway crossings for 400 kV Samba-Jalandhar D/C line (Quad).

(viii). Application to be made by RKPTL to the Ministry of Environment, Forest and Climate Change, for diversion of forest land for construction of 400 kV Samba- Jalandhar D/C line (QUAD), 400 kV Kishenpur-Samba D/C line (Quad) & LILO of 400 kV Kishenpur- Dulhasti line (Twin) at Kishtwar SS.

(ix). Applications to be made by KTCO, DPTL, IPTL and RKPTL to the relevant central or state electricity regulatory commission for connectivity permission under the relevant transmission service agreements.

(x). Application to be made by RKPTL, KTCO, DPTL and IPTL to Power System Operation Corporation Limited seeking registration as a user under the relevant Regional Load Dispatch Centre.

(xi). Applications to be made by IPTL and DPTL to the relevant Municipal Corporations, for approving the building plan for their respective substations.

LITIGATION

Except as stated in this section and on the basis of the below, there are no pending material litigation and actions by regulatory authorities, which are not in the ordinary course of business, in each case against IndiGrid, the Portfolio Assets, the Investment Manager, the Project Managers, or any of their Associates (excluding Associates of the Investment Manager which are affiliates of KKR) and the Trustee, as on the date of this Placement Document. Further, except as stated in this section and on the basis of the below, there are no pending material litigation and actions by regulatory authorities which are not in the ordinary course of business against the Sponsor or any of its Associates or the Sponsor Group or Associates of the Investment Manager which are affiliates of KKR.

For the purpose of this section, details of all regulatory actions and criminal matters, that are pending against IndiGrid, the Portfolio Assets, the Investment Manager, the Project Manager, or any of their Associates (excluding Associates of the Investment Manager which are affiliates of KKR) and the Trustee have been disclosed. For the purpose of this section and on the basis of the below, details of all regulatory actions which are not in ordinary course of business and criminal matters that are pending against the Sponsor or any of its Associates or Associates of the Investment Manager, in each case, which are affiliates of KKR have been disclosed (and, for the avoidance of doubt, such Associates exclude IndiGrid, its Portfolio Assets, the Investment Manager, and the Project Managers and their respective Associates). Furthermore, any matter that is pending involving an amount equivalent to, or more than the amount or threshold as disclosed below, in respect of the Sponsor or any of its Associates or Associates of the Investment Manager, in each case, which are affiliates of KKR, have been disclosed on the basis of the below.

For the Project Managers, the outstanding quantifiable litigation involving each of the Project Managers and its Associates, in excess of 5% of the total revenue of such Project Managers for the financial year ended March 31, 2025, may be considered as material outstanding civil litigation of such Project Managers and its Associates. The Project Managers do not have any outstanding litigation. For the Investment Manager, the outstanding quantifiable litigation involving the Investment Manager and its Associates (excluding Associates of the Investment Manager which are affiliates of KKR), in excess of 5% of the net worth of the Investment Manager as on March 31, 2025 shall be considered as material outstanding civil litigation of the Investment Manager and its Associates (excluding Associates of the Investment Manager which are affiliates of KKR). The Investment Manager does not have any outstanding civil, regulatory or criminal litigation. For such entities which are associates of the Investment Manager and the Project Managers, outstanding quantifiable litigation involving an amount exceeding 5% of the net worth of the Investment Manager as on March 31, 2025 or 5% of the total revenue of relevant Project Managers for the financial year ended March 31, 2025, whichever is higher, shall be considered as material outstanding civil litigation for such entities.

*The disclosures with respect to material litigations and non-ordinary course regulatory actions relating to the Sponsor and its Associates and the Sponsor Group (other than IndiGrid, its HoldCos and its Associates, the Project SPVs, the Investment Manager, and the Project Managers and their respective Associates), have been made solely on the basis of the public disclosures made by KKR & Co. Inc. (“**KKR & Co.**”) in the most recent quarterly report on Form 10-Q filed with U.S. Securities and Exchange Commission on November 7, 2025 relating to the quarter ended September 30, 2025 with respect to all entities, which are consolidated for financial reporting purposes with KKR & Co., which is listed on the New York Stock Exchange. In accordance with applicable securities law and stock exchange rules, KKR & Co., is required to disclose material litigations through applicable securities filings and KKR & Co. and has made no public filings with the SEC after November 7, 2025 which materially changes the disclosures made in that regard in such quarterly report. The threshold for identifying material litigations in such disclosures is based, among other considerations, on management judgment and periodically reviewed thresholds applied by the independent auditor of KKR & Co., in expressing its opinion on the financial statements.*

For the Trustee, the total consolidated income for Fiscal 2025 was ₹ 609.50 million and the consolidated net worth (i.e. the total of share capital and consolidated reserves and surplus) was ₹ 1,071.20 million. Accordingly, in respect of the Trustee, all outstanding civil matters which involve an amount equal to or exceeding ₹ 30.48 million (being 5% of the total consolidated income for Fiscal 2025) have been considered material.

In relation to the IndiGrid and Portfolio Assets, all outstanding quantifiable litigation which exceed 5% of the total revenue, for the Fiscal, 2025, for IndiGrid and each such Portfolio Asset have been considered material. Further, all outstanding matters that may have a material impact on IndiGrid or the Portfolio Assets in terms of its business, prospects, financial condition, results of operations or cash flow, have been considered for the purposes of disclosure in this section. Please see below the total revenue of each Portfolio Asset and the corresponding materiality thresholds:

I. Litigation involving IndiGrid Infrastructure Trust and its Portfolio Assets

1. IndiGrid Infrastructure Trust

NIL

2. IGL

NIL

3. JTCL

Regulatory matters

The Central Electricity Regulatory Commission ("**CERC**") in its order dated September 2, 2022 ("**Order**"), in Tariff

Petition No. 261/TT/2015 filed by PGCIL, had directed that JTCL is liable to pay transmission charges from (i) October 5, 2014 to June 30, 2015 to PGCIL for one asset; and (ii) November 13, 2014 to June 30, 2015 for another asset. Aggrieved by the Order, JTCL filed an appeal before the APTEL. The first hearing on the interim application filed for seeking stay on the invoice raised by PGCIL on JTCL ("**IA**") was held on September 23, 2022. APTEL identified certain discrepancies in the appeal. The IA and appeal were taken up before APTEL on November 15, 2022 for completion of service/pleadings. A hearing was held on January 12, 2023 wherein APTEL directed filing of reply and rejoinder and the Registry was directed to check if any pleadings were left. The amount involved in the matter is ₹173.74 million. The matter is currently pending.

Civil matters

Certain persons ("**Petitioners**") have filed separate cases before various courts, against JTCL and certain others ("**Respondents**"), alleging amongst others, (i) damage caused due to the construction or laying of high voltage transmission lines by the Respondents, (ii) land being utilised by the Respondents without acquiring it in accordance with law, and (iii) inadequate compensation paid for cutting of trees in order to lay transmission lines by the Respondents. The Petitioners, by way of these cases have claimed certain compensation from the Respondents. The Respondents have filed their reply with respect of these cases. These matters are currently pending at various stages of adjudication.

4. BDTCL

Civil matters

Certain persons ("**Petitioners**") have filed separate cases before various courts, against BDTCL and certain others ("**Respondents**"), alleging amongst others, (i) breach of right of way by the Respondents over the Petitioners land, (ii) damage caused to the Petitioners land, crops and others due to the construction or laying of high voltage transmission lines by the Respondents, (iii) inadequate compensation paid to the Petitioners in respect of these lands, and (iv) challenging the validity and jurisdiction of the notification issued under section 164 of the Electricity Act issued by the Director, Ministry of Power, Government of India dated January 24, 2013. The Petitioners, by way of these cases have claimed certain compensation from the Respondents. These matters are currently pending before various courts.

5. PKTCL

Regulatory matters

CERC, vide its orders dated April 3, 2018 and April 26, 2018 ("**CERC Orders**"), pursuant to the petition number 110/MP/2016 filed by PKTCL, had approved extension of the commercial operation date of 'PR Line' by a period of 274 days and 'KC Line' by a period of 42 days from their respective scheduled commercial operation dates. Further, CERC directed that transmission charges of the KC Line, from May 20, 2017 till June 18, 2017, shall be payable by PGCIL and the same was paid in September 2021. Aggrieved by the CERC Orders, PGCIL filed a review petition before CERC. The review petition was dismissed by CERC by way of its order dated April 23, 2019. Aggrieved by the dismissal, PGCIL filed an appeal before APTEL against the payment of transmission charges, to which PKTCL has filed its reply. Additionally, on January 3, 2020, PGCIL has also filed a rejoinder to PKTCL's response filed earlier. The estimated amount involved in this matter is ₹ 50.00 million. The matter is currently pending.

Criminal matters

An FIR was filed by Tutul Kumar Sinha ("**Complainant**"), an employee of PKTCL with the Beliapara police station on behalf of the State of West Bengal on July 25, 2022, against Nagen Ban ("**Accused**") under Section 107 of the Criminal Procedure Code, 1973. The Accused had caused obstruction and nuisance when the site team entered the village to carry out operations and management activities. The matter was later brought before the Court of the Executive Magistrate, Jhargram, which passed an order dated September 20, 2022, directing the Accused to show cause as to execute a bond and to maintain peace. The matter is currently pending.

6. RTCL

Regulatory matters

RTCL filed a petition dated March 11, 2016 under Section 79(1)(f) read with Section 79(1)(c) of the Electricity Act, 2003 before the CERC seeking payment of monthly transmission charges for the period starting from December 26, 2015 under the RTCL TSAs and the revenue sharing agreement and the order dated July 15, 2015 issued by the Ministry of Power, Government of India entitled "Policy for Incentivizing Early Commissioning of Transmission Projects" under which RTCL has prayed that it is entitled to the payment of monthly transmission charges starting from the actual date of commercial operation, December 26, 2015, which is in advance of the scheduled commercial operation date of February 2016. CERC, by its order dated September 21, 2016 (the "**Impugned Order**"), required

Nuclear Power Corporation of India Limited ("**NPCIL**") to pay the transmission charges from March 1, 2016 till the bays are commissioned. NPCIL filed an appeal, along with an interim application before APTEL dated November 4, 2016 (the "**Appeal**") praying that the Impugned Order be stayed, since it is in violation of the principles of natural justice. Through an order passed on January 18, 2019 (the "**Order**"), APTEL has dismissed the Appeal. APTEL has also given liberty to RTCL to regulate the power supply of NPCIL if NPCIL fails to make the payment within 30 days of the Order. RTCL has accordingly sent letters to NPCIL for the disbursement of the withheld amounts along with applicable charges. NPCIL has filed an appeal before the Supreme Court of India against the Order and RTCL has filed the counter affidavit on August 27, 2019. The estimated amount involved in this matter is ₹ 280.00 million. The matter is currently pending.

7. MTPL

NIL

8. PTCPL

Regulatory matters

(i) Pursuant to CERC's order dated January 4, 2017 (the "**CERC Order**"), Punjab State Power Corporation Limited ("**PSPCL**") had been held liable to pay transmission charges of the PTCPL Project from scheduled commercial operation date or actual commission date, whichever is later, until commissioning of downstream system by PSPCL. PSPCL completed commissioning of downstream system on May 19, 2017, after substantial delay. PSPCL failed to pay liquidated dues of ₹ 113.67 million. Further, PSPCL has defaulted in making payment of ₹ 102.51 million as per notification no L-1/42/2010 passed by CERC dated September 28, 2010. Accordingly, PTCPL issued a "notice for regulation of power supply" dated July 6, 2017, to PSPCL for regulation of power supply unless dues are cleared by PSPCL by July 13, 2017. PSPCL filed an appeal before the Appellate Tribunal for Electricity ("**Tribunal**") challenging the CERC Order. The Tribunal dismissed the appeal through its order dated March 27, 2018 (the "**APTEL Order**"). PSPCL has subsequently filed an appeal before the Supreme Court of India against the APTEL Order. The estimated amount in this matter is ₹ 130.00 million. The matter is currently pending.

(ii) PTCPL has filed a petition dated March 11, 2025 before the CERC under Section 62 read with Sections 79(1)(c) and Section 79(1) (d) of the Electricity Act, 2003 read with Regulation 15(1)(a) of the CERC (Conduct of Business) Regulations, 2023, and the applicable provisions of the CERC (Terms and Conditions of Tariff) Regulations, 2024 seeking, amongst others, (i) condonation of delay of 124 days in declaring the commercial operations date for the project operated by PTCPL due to force majeure events; (ii) for determination of transmission tariff of the augmentation scope awarded by CTUIL from the commercial operations date, being December 29, 2024 until March 31, 2029; and (iii) allowing interim tariff of 90% in accordance with applicable law. The matter is currently pending.

9. GPTPL

Regulatory matters

(i) GPTPL ("**Petitioner**") filed a petition dated November 26, 2019 against UTC Chandigarh and others ("**Respondents**") before CERC, under Sections 63 and 79 (1)(f) of the Electricity Act, read with the GPTPL TSA, amongst others, seeking monetary compensation due to change in law events and extension of the scheduled commissioning date of certain elements of a GPTPL project, on account of force majeure events. On May 19, 2024, the CERC passed an order granting the Petitioner's request and directed that the applicable transmission charged are to be recovered in the ratio of 50:50 from PGCIL and HPPC (the "**Impugned Order**"). PGCIL has filed an appeal dated July 4, 2024 before the APTEL at New Delhi seeking setting aside of the Impugned Order and such other relief as APTEL may deem fit. The matter is currently pending.

(ii) Power Grid Corporation of India Limited ("**Petitioner**") filed a petition before CERC under the Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019 seeking approval of the COD and the determination of the transmission tariff from the period from COD to March 31, 2024 in relation to ,amongst other, GPTPL. CERC by way of order dated August 8, 2024, read with corrigendum order dated September 11, 2024 (collectively, "**Impugned Order**") recorded errors in the COD date, among other issues. The Petitioner filed a review petition before CERC challenging the Impugned Order on the ground that CERC erred in passing it. The matter is currently pending

Civil matters

Certain persons ("**Petitioners**") have filed separate cases before various courts, against GPTPL and certain others ("**Respondents**"), alleging amongst others, (i) breach of right of way by the Respondents over the Petitioners land and thereby interfering with the peaceful possession of the Petitioners land, (ii) damage caused to the Petitioners land, goods and others due to the construction or laying of high voltage transmission lines by the Respondents, and (iii) inadequate compensation paid to the Petitioners in respect of these lands. The Petitioners, by way of these cases have claimed certain compensation from the Respondents. These matters are currently pending at various stages of adjudication.

10. ENICL

Regulatory matters

ENICL filed an appeal against PGCIL, CERC and 17 others ("**Respondents**") before APTEL, for quashing an order passed by CERC dated October 9, 2018 ("**CERC Order**"), directing ENICL to pay of transmission charges ("**Transmission Charges**") for a period when ENICL's projects were effected by force majeure events. The CERC Order directed ENICL to pay PGCIL the interest during construction ("**IDC**") and incidental expenditure during construction ("**IEDC**") for PGCIL's assets, namely two 400 kV line bays (for 400 kV D/C Siliguri-Bongaigaon transmission line) along with two 80 MVAR switchable line reactors at the 400 kV Siliguri sub-station, and two 400 kV line bays (for 400 kV D/C Siliguri-Bongaigaon transmission line) at the Bongaingaon sub-station from May 1, 2013 till the commissioning of ENICL's transmission elements, which are interconnected with PGCIL's transmission elements. ENICL has alleged that since its assets were affected by force majeure events during the said period, it should not be liable to pay the IDC and IEDC amounts. The estimated amount involved in this matter is ₹ 5.20 million. The matter is currently pending.

Criminal matters

ENICL filed a complaint against M/s. Akshya Urja Private Limited ("**Contractor**") and its directors, before the Metropolitan Magistrate Court, Esplanade, Mumbai, in order to recover an amount of ₹10.80 million paid to the Contractor, pursuant to a service contract between the parties. The Contractor failed to perform according to the terms of the service contract and was unable to return the advance amount paid to it. The cheques tendered by the Contractor were returned dishonoured, as a consequence of which ENICL filed a complaint under section 138 of the Negotiable Instruments Act, 1881. The matter is currently pending.

Civil matters

Various persons ("**Petitioners**") have filed six cases, against ENICL ("**Respondent**") under Section 10 read with Section 16 of the Indian Telegraph Act, 1885 before the District Judge, Jalpaiguri (the "**District Judge**") alleging damage caused due to construction of high-tension transmission lines over the land of the Petitioners. The estimated amount involved in this matter is ₹ 96.19 million. The matter is currently pending.

11. NTL

Regulatory matters

(i) NTL filed an appeal, under Section 111(1) of the Electricity Act, 2003, challenging an order dated July 11, 2022, passed by CERC. CERC had disallowed additional ₹ 1,204.30 million of change in law ("**CIL**") claims out of the total additional claim amount of ₹ 1,253.80 million. The CIL claim events included the: (i) unforeseen requirement of forest clearance; (ii) unforeseen higher ROW compensation due change in the land compensation policy; (iii) unforeseen higher ROW compensation towards apple orchid and walnut trees; and (iv) unforeseen additional expenditure towards use of helicrane - ₹363.80 million. Aggrieved by the same, NTL has filed the appeal claiming the CIL amount of ₹ 1,298.60 million as well as seeking direction from APTEL to re-consider the disallowed CODs of transmission line elements under the project held by NTL and impact on tariff of ₹ 34.60 million. The matter is currently pending.

(ii) Central Transmission Utility of India ("**CTUIL**") filed a petition before the CERC under Section 79(1)(f) of the Electricity Act, 2003 read with Regulation 111 of the Central Electricity Regulatory Commission (Conduct of Business) Regulations, 1999 seeking directions for installation of optical ground wire on the 400 kV Kurukshetra-Malerkotla Transmission Line established under the Northern Region System Strengthening Scheme XXXI(b). Pursuant to an order of the CERC, NTL was impleaded as a respondent in the matter. On March 10, 2022, the CERC sought certain additional information. After hearing the parties, the Commission reserved the order and directed Central Transmission Utility of India to file minutes of meetings and other parties to file written submission if any. The matter is currently reserved for orders.

(iii) CERC by way of an order dated April 19, 2024 ("**Impugned Order**") had denied NTL the force majeure and the corresponding deemed availability for the outage of the 400 kV D/C Samba–Amargarh line from January 20 to February 8, 2022. NTL contends the outage was triggered by Border Roads Organisation uninformed hill-cutting and excavation at the hill footing near Tower 286 which was in violation of Regulation 63 of the CEA (Measures relating to Safety and Electricity Supply) Regulations, 2010 and the Telegraph Act, 1885. NTL filed an appeal before the Appellate Tribunal for Electricity, New Delhi on February 5, 2025, under Section 111 of the Electricity Act 2003 seeking to set aside the Impugned Order and that the deemed availability for the outage be granted as a force majeure event under the NTL TSA and the applicable laws. The estimated amount involved in this matter is ₹ 200 million. The matter is currently pending.

Criminal matters

Pursuant to an application filed under section 156(3) of the Criminal Procedure Code, 1973 ("**CrPC**"), titled Mohd. Kabir v. Tata Starlight Company India Private Limited, the Munsiff Court Thanamandi passed an order dated December 10, 2022, directing that an FIR be registered and investigations be carried out against Zeeshan Fida, an employee of IndiGrid ("**Petitioner**"), in relation to offences under sections 336 and 337 of the Indian Penal Code, 1860. The Petitioner filed an application under section 482 of the Criminal Procedure Code, 1973, before the High Court of Jammu and Kashmir ("**High Court"**) dated May 9, 2023, challenging the legality and validity of the FIR and seeking quashing thereof. By way of order dated May 12, 2023, the High Court allowed the investigation to be continued, but disallowed the filing of a challan without the leave of the High Court. The matter is currently pending.

Civil matters

Certain persons (the "**Petitioners**") have filed separate petitions against NTL and others ("**Respondents**"), before various courts, including the Jammu and Kashmir High Court, Punjab and Haryana High Court, Sub Judge, Pattan, Sub Judge, Rajouri and the Chief Judicial Magistrate, Budgam, stating amongst others, that (i) the Respondents have not adopted the due course of law while commencing construction and installation work on their lands and the process required under the Land Acquisition Act was not initiated, (ii) the adequate compensation was not paid to them in relation to acquisition of such lands, (iii) praying the Respondents be restrained from installation of electric towers, conductors or transmission lines, as applicable, on their lands, and (iv) praying for the damages caused to their lands by the Respondents. In certain cases, contempt applications have been filed, alleging attempt by the Respondents to execute work on the disputed properties. The Petitioners by way of these cases have also claimed certain compensation from the Respondents. These matters are currently pending at various stages of adjudication.

12. OGPTL

Regulatory matters

(i) Pursuant to a petition filed by PGCIL, against Damodar Valley Corporation and others, in relation to determination of tariff of certain lines operated by PGCIL and certain lines which were associated with a common transmission system being operated by OGPTL. CERC passed an order dated February 14, 2019 ("**First CERC Order**"), determining the tariff for PGCIL's assets, namely asset-I of both circuit of 400 kV D/C Rourkela-Raigrah (second line), along with four 400 kV line bays at Jharsuguda (Sundargarh) sub-station; asset-II – split bus arrangement at 400 kV bus at Jharsuguda (Sundargarh) sub-station and asset-III – two 400 kV line bays for termination of OPGC (IB thermal power station) - Jharsuguda 400 kV D/C line (under tariff based competitive bidding at Jharsuguda (Sundargarh). In the First CERC Order, CERC held that the transmission charges from November 23, 2017 till the commercial operation date of the generating station shall be borne by OPGC, to be recovered on monthly basis. Aggrieved by this Order of CERC, OPGC filed an appeal before APTEL. The matter is currently pending

(ii) OGPTL filed an appeal before APTEL, challenging APTEL's order dated August 28, 2022 ("**Impugned Order**") passed by CERC. OGPTL filed its petition before CERC under Sections 79(1)(c), 79(1)(d), 79(1)(f) and 79(1)(f) of the Electricity Act, read with Articles 11 and 12 of the relevant TSA, seeking, *inter-alia*, a declaration that OGPTL is not liable for delay in commissioning of the OPGC-Jharsuguda Transmission Line and monetary compensation on account of occurrence of force majeure and change in Law events. The matter is currently pending.

Civil matters

Certain persons ("**Petitioners**") have filed separate cases before various courts, against OGPTL and certain others ("**Respondents**"), alleging amongst others, (i) breach of right of way by the Respondents over the Petitioners land, (ii) damage caused due to the construction of high voltage transmission lines operated by the Respondents, and (iii) land being utilised by the Respondents without acquiring it in accordance with law. The Petitioners, by way of these cases have claimed certain compensation from the Respondents. These matters are currently pending at various stages of adjudication.

Criminal matters

M/s APL Apollo Building Private Limited ("**Accused**") had started construction of a wall under and near OGPTL's transmission line and towers in the right of way (corridor) of Jharsuguda (Sundargarh) – Raipur pool 765 KV D/C line. In an attempt to stop the activity and remove the construction from the right of way OGTPL had sent a letter to the Accused on November 17, 2020, and subsequently filed an application under Section 133 of the Criminal Procedure Code and Section 68(5) Electricity Act, 2003 before the Sub-Divisional Magistrate ("**SDM**"), Simga for an injunction seeking the removal and permanent stoppage of such construction work of a compound wall. The SDM passed an order in July 31, 2024 ("**Impugned Order**") for removal of construction. The Accused has filed a revision application against the Impugned Order. The matter is currently pending.

13. JKTPL

Regulatory matters

(i) JKTPL filed an appeal before APTEL on June 21, 2018 ("**Appeal**"), against the HERC order dated May 21, 2018 ("**HERC Order**") disposing of JKTPL's petition, claiming payment of full unitary charges allegedly deducted wrongly by HVPNL by wrongly computing availability of the transmission system capacity for the months of February and March 2016, due to occurrence of force majeure events. JKTPL has prayed for refund of the wrongful deduction of ₹ 35.45 million unitary charges, along with interest payable by HVPNL, for the months of February and March 2016. HERC, by way of the HERC Order, held, amongst others, that the intention of the transmission agreement is not to grant unitary charge during the force majeure event in addition to extension of the concession period and directed JKTPL and HVPNL to re-work the unitary charge payable for the aforesaid months. The matter is currently pending.

(ii) JKTPL filed a petition against HVPNL before HERC, regarding the alleged wrongful deduction of penalty on annualized unitary charges ("**Petition I**"). HVPNL filed its reply and issued a notice dated March 5, 2019 ("**HVPNL Notice**") to JKTPL. JKTPL filed an interim application before HERC seeking stay of the HVPNL Notice. Thereafter, JKTPL filed another petition before the HERC, seeking directions to HVPNL, to not initiate recovery of amounts from any of the invoices from the HVPNL Notice ("**Petition II**"). HERC, amongst others, summarily dismissed the Petition II vide order dated April 4, 2019 ("**First HERC Order**"). JKTPL filed a review petition before HERC against the First HERC Order passed in relation to Petition I and Petition II. The review petition was dismissed by HERC vide its order dated May 27, 2019 ("**Second HERC Order**"). Subsequently, JKTPL has filed an appeal before APTEL, praying, amongst others, to set aside the First and Second HERC Orders and to refund the entire amounts allegedly deducted wrongfully by HVPNL on account of incorrect methodology adopted for calculating the reliability parameter, along with the interest amount. The estimated amount involved in this matter is ₹ 54.58 million. The matter is currently pending.

(iii) JKTPL and HVPNL entered into a transmission services agreement dated May 28, 2010, which provides for a repair time of 30 days for certain inter connecting transformers ("**ICTs**"). However, HVPNL granted JKTPL 120 days as repair time for ICTs and deducted certain penalty amount ("**Penalty amount**") on the period exceeding 30 days for the delay in repair time of these ICTs at Kabulpur. Pursuant to a petition filed by JKTPL, HERC passed an order dated April 4, 2019, granting relief on the repair time of the ICTs up to 120 days ("**HERC Order**"). Aggrieved by the HERC Order, HVPNL filed an appeal before APTEL against the HERC Order and prayed amongst others, to set aside the HERC Order and uphold the Penalty amount deducted in relation to the ICTs ("**Appeal**"). JKTPL filed its reply on August 27, 2019, against the Appeal, denying the contentions of HVPNL and seeking that the Appeal be dismissed, and further that the amount deducted by HVPNL be paid to JKTPL, along with certain interest amount. The estimated amount involved in this matter is ₹ 7.73 million. The matter is currently pending.

Civil matters

(i) Various persons have filed separate petitions before the District Court, Jhajjar ("**District Court**"), against the State of Haryana, JKTPL and others ("**Respondents**"), seeking compensation from December 2010 onwards, under the Indian Telegraph Act, 1885, the Electricity Act, 2003 and the Land Acquisition Act, 2013, in relation to installation of one of the high voltage transmission lines operated by JKTPL. The total compensation claimed in these matters amount to approximately ₹ 88.38 million, with an additional interest amount of ₹ 219.00 million approximately. Summons have been received, and replies have been filed, in some of these matters, by JKTPL. These matters are currently pending at various stages of adjudication.

(ii) Various persons ("**Petitioners**") have filed separate appeals before the High Court of Punjab and Haryana ("**High Court**") against the Union of India, JKTPL and others ("**Respondents**"), in relation to a judgement dated July 19, 2011 of the High Court, questioning whether the Respondents can be allowed to lay high power electric supply line of 400 KV over the agricultural land without following the due procedure laid down under law, particularly the Indian Telegraph Act, 1885, the Electricity Act, 2003, the Land Acquisition Act, 1894 and the Constitution of India. In the original writ petition the Petitioners had further questioned: (i) Whether provisions of the Land Acquisition Act, 1894 are attracted in using and occupying land for laying down high power electric supply lines over the land in question; and (ii) whether Article 300A of the Constitution of India is attracted in using and occupying land for high power electric supply line. These matters are currently pending at various stages of adjudication.

16. PrKTCL

Regulatory matters

(i) Pursuant to a petition filed by PrKTCL against Himachal Pradesh State Electricity Board and others, before CERC, the CERC passed a provisional tariff order dated December 23, 2014 ("**First CERC Order**") and the final order dated December 19, 2016 ("**Second CERC Order**", together with the First CERC Order, the "**CERC Orders**"), which stated, among others, that PrKTCL was allowed to recover only interest during construction ("**IDC**") and incidental expenditure during construction ("**IEDC**") amounts from NTPC from August 7, 2014 to August 14, 2014. Aggrieved by the CERC Orders, NTPC filed a review petition before CERC, seeking, among others, complete transmission charges for its two assets from August 7, 2014 and August 14, 2014, respectively, until March 30, 2015. NTPC filed a review petition against the Second CERC Order, praying to set aside the direction holding NTPC liable for delay and to pay IEDC and IDC to PKTCL. CERC, vide order dated July 24, 2019 ("**Revision Order**"), pursuant to the review petitions, directed NTPC to pay full transmission charges to PrKTCL for the petitioned periods. NTPC filed an appeal against the Revision Order, before APTEL The estimated amount involved in this matter is ₹ 580.75 million, along with additional interest as well as the amount payable to beneficiary is ₹ 465.77 million, along with interest. The matter is currently pending.

(ii) Pursuant to a petition filed by PrKTCL against Himachal Pradesh State Electricity Board and others, before CERC, the CERC passed a provisional tariff order dated December 22, 2014 ("**First CERC Order**") and the final order dated January 16, 2017 ("**Second CERC Order**", together with the First CERC Order, the "CERC Orders"), which stated, among others, that PrKTCL was allowed to recover only interest during construction ("**IDC**") and incidental expenditure during construction ("**IEDC**") amounts from NTPC. Aggrieved by the Second CERC Order, PrKTCL filed a review petition before CERC seeking, among other things, recovery of transmission charges effective from October 10, 2014. NTPC filed a review petition against the Second CERC Order, praying to set aside the direction holding NTPC liable for delay and to pay IEDC and IDC to PKTCL. CERC, vide order dated August 19, 2019 ("**Revision Order**"), pursuant to the review petitions, among others, directed NTPC to pay full transmission charges to PrKTCL from October 4, 2014, and March 20, 2015. NTPC filed an appeal against the Second CERC Order and the Revision Order, before APTEL. The estimated amount involved in this matter is ₹ 153.71 million, along with additional interest as well as the amount payable to beneficiary is ₹ 132.23 million, along with interest. The matter is currently pending.

(iii) Pursuant to a petition filed by PGCIL, Himachal Pradesh State Electricity Board and others ("**Original Petition**") before CERC, the CERC passed an order dated May 26, 2015 ("**First CERC Order**"), in relation to PGCIL assets related to PrKTCL line, allowing, among others, additional capital expenditure for the year 2013-2014. PGCIL filed a review petition against the First CERC Order, praying for approval of the commercial operation date of 'Asset-II' and grant of tariff. CERC, vide its orders dated July 21, 2016, and September 7, 2016 ("**Revision Orders**") held that transmission charges from August 1, 2013 to March 23, 2014 shall be borne by NHPC in respect of the assets of PGCIL. Aggrieved by the Revision Orders, NHPC filed an appeal before APTEL, against the Revision Order granting 100% transmission charges to PGCIL to be recovered from NTPC. PrKTCL was also made a party to the matter as PrKTCL assets associated in the scheme were also involved. APTEL, during the course of hearing, identified a similar matter of PrKTCL pending before CERC with similar facts, which involved PGCIL. Accordingly, APTEL passed an order dated July 16, 2018, and directed CERC to freshly carry out complete / comprehensive adjudication and reconsideration on the pending petitions. CERC, vide order dated December 12, 2018, merged the pending PrKTCL petition with the PGCIL petition, for fresh consideration. CERC issued an order dated February 5, 2020 ("**Second CERC Order**"), stating, among others, that the transmission charges for the period of mismatch shall be borne exclusively by NTPC and that there is no error in the Revision Order passed by the CERC. Aggrieved by the Second CERC Order, NTPC filed an appeal before APTEL. The matter is currently pending.

(iv) PrKTCL ("**Appellant**") filed an appeal on November 21, 2022, before the APTEL under Section 111(1) of the Electricity Act, 2003, challenging CERC's findings in (i) Order dated February 9, 2021, in Petition No. 156/TT/2015 ("**Impugned Order**") and (ii) Review Order dated September 7, 2022 in the review petition filed by PrKTCL against the Impugned Order (to the extent of fresh findings). The Appellant had filed a CERC petition seeking approval of the commercial operations date for certain assets. By way of the Impugned Order, the CERC rejected the Appellant's application. Alleging that the CERC had made certain mistakes in fact and law, the Appellant had filed a review petition, which was rejected by the CERC by way of the Review Order. The matter was heard on January 3, 2023, and the APTEL granted time to the respondents to file their reply for the interim application for condonation of delay and to the Appellant to file a rejoinder, if any. In its order dated March 21, 2023, APTEL condoned the delay, admitted the appeal and directed the respondents to file their reply within four weeks and the Appellant to file their rejoinder, if any. The matter is currently pending.

(iii) PrKTCL ("**Appellant**") filed a petition dated September 9, 2025 before the CERC under Section 62 read with Sections 79(1)(c) and Sections 79(1)(d) of the Electricity Act, 2003 read with Regulation 15(1)(a) of the CERC (Conduct of Business) Regulations, 2023 andthe applicable provisions of the CERC (Terms and Conditions of Tariff) Regulations, 2024 seeking, amongst other things (i) determination of transmission tariff from the COD being March 12, 2025 to March 31, 2029; and (ii) allowing interim tariff of 90% in accordance with applicable law. The matter is currently pending.

Civil matters

(i) Vishwanath ("**Petitioner**") has filed a writ petition before the High Court of Himachal Pradesh ("**High Court**"), against the State of Himachal Pradesh, PrKTCL and others ("**Respondents**"), seeking directions from the High Court to ensure that means of livelihood of the people, including the Petitioner, are not lost due to the construction of the 400 Kv D/C Koldam line in the district of Bilaspur, especially due its towers. The Petitioner has prayed for adequate compensation and a source of livelihood to be provided. The Petitioner has alleged that towers were constructed on his land, and on the lands of other people, in the process of which trees, fruits, etc. were destroyed by the Respondents. The estimated amount involved in this matter is ₹ 100.00 million. The matter is currently pending.

(ii) Certain persons ("**Petitioners**") have filed separate cases before various courts, against PrKTCL and others ("**Respondents**"), in relation to breach of right of way by the Respondents over the Petitioners land, seeking various reliefs, including, (i) restraining PrKTCL from interfering in the ownership and possession of the suit property by constructing, laying or installing of any transmission line or tower, or changing the nature of the land in any way, (ii) removal of overhead high voltage transmission wires installed by PrKTCL, and (iii) monetary compensation towards damage caused to property, trees, crops and others including recovery of mesne profits. Further, in certain of these cases, the Petitioners have filed for injunctions against the Respondents. Separately, certain persons ("**Claimants**") have also filed a petition against the Respondents, alleging, amongst others, that the Respondents had removed certain existing transmission lines of the Claimants for installing a transmissions line, and that the Respondents have not returned these poles and transmission line accessories to the Claimants. A higher compensation has been demanded in this matter from the Respondents. The Respondents have filed their reply with respect to these matters. These matters are currently pending at various stages of adjudication.

(iii) Various persons ("**Petitioners**") have filed separate applications before the District Judge, Ropar and Additional District Judge, Mandi ("**ADJ**") against PrKTCL, the Ministry of Power and others ("**Respondents**"), seeking enhancement of compensation of the lands, on which poplar trees and wheat crops were standing (collectively, "**Trees and Crops**"). The Petitioners have alleged that the Trees and Crops were cut and removed by the Respondents from the lands. In this regard, the Petitioners have sought, among other things, higher compensation on the value of the lands including certain interest amounts, due to the installation of high voltage wires on these lands. PrKTCL filed an application seeking rejection of the petitions filed by the Petitioners, on the ground that, *inter-alia,* the claims are barred by limitation. However, the application filed by PrKTCL was dismissed vide an order of the Additional District Judge, Rupanaga dated January 17, 2020 ("**ADJ Dismissal Order**"). In certain matters, PrKTCL also filed civil revision application before the High Court of Punjab and Haryana ("**High Court**"), against certain orders ("**ADJ Award Orders**") passed by the ADJ *ex parte*, awarding compensation to the Petitioners. The High Court, by its order dated February 19, 2020 has remitted these matters back to the ADJ, for re-determination. Certain Petitioners have filed applications before the ADJ for execution of the ADJ Award Orders and PrKTCL has filed its objections to this execution petition. The Ministry of Power has also filed applications before the ADJ, seeking to set aside the ADJ Award Orders and has also sought a stay on the execution proceedings. These matters are currently pending at various stages of adjudication.

Criminal matters

(i) Khub Ram and others ("**Petitioners**") have filed a complaint before Judicial Magistrate (First Class), Gohar, Mandi ("**Judicial Magistrate**"), against Satish Seth and others, including certain members of the board of directors of PrKTCL ("**Respondents**"), seeking registration of a first information report ("**FIR**") against the Respondents, alleging forcible construction of transmission line and illegal cutting of trees on the Petitioner's land, without any payment of compensation. It was further alleged that the Respondents had trespassed upon the Petitioner's land with criminal intention and without showing any khasra number allocation by the Government of India. Pursuant to an order dated June 24, 2019 ("**First Order**") passed by the Judicial Magistrate, the Petitioner's application was allowed, and the complaint was allowed to be sent to the station house officer, Gohar ("**SHO**"), for registration of the FIR and investigation in accordance with law. The matter is currently pending.

(ii) Jagat Ram and others ("**Petitioners**") have filed a complaint before the Additional Chief Judicial Magistrate, Sunder Nagar ("**Additional Chief Judicial Magistrate**"), against Satish Seth and others, including certain members of the board of directors of PrKTCL ("**Respondents**"), seeking issue of directions to the station house officer, Mandi ("**SHO**") to register a first information report ("**FIR**") against certain PrKTCL officials pursuant to the provisions of the Indian Penal Code, 1860, the Environment Protection Act, 1986, the Indian Forest Act, 1927 and the Prevention of Corruption Act (Amendment) Act, 2018. The Additional Chief Judicial Magistrate, vide order dated August 13, 2019, directed that the complaint filed by the Petitioners should be treated as a private complaint under section 202 of the Code of Civil Procedure, 1908. The matter is currently pending.

(iii) PrKTCL (through its board member Satish Seth) and others ("**Petitioners**") have filed three criminal special leave petitions before the Supreme Court of India ("**Supreme Court**"), against the State of Himachal Pradesh and others ("**Respondents**"), against a judgment dated May 16, 2019 ("**Impugned Order**") passed by the High Court of Himachal Pradesh ("**High Court**"), pursuant to which the High Court dismissed the petitions filed by the Petitioners, holding that there was a *prima facie* case against Petitioners for registration of a first information report ("**FIR**"). The Petitioners had sought quashing of proceedings pending before the Judicial Magistrate, Bilaspur ("**Judicial Magistrate**") and three FIRs lodged against the Petitioners ("**Impugned FIRs**"). The complaint on which the Impugned FIRs were registered was made by certain landowners against the Petitioners, alleging that the Petitioners had entered their premises without permission and had cut valuable trees for laying transmission lines and installing towers. Further, it was alleged that the Petitioners had not paid enough compensation to the farmers for using their land for laying the transmission lines and installing towers. Aggrieved by the FIRs, the Petitioners had filed criminal miscellaneous petitions before the High Court, which were disposed of vide the common Impugned Order. The Petitioners have prayed the Supreme Court to grant special leaves to appeal against the Impugned Order, interim relief of stay in operation of the Impugned Order and stay in the proceedings pending before the Judicial Magistrate. The matters are currently pending at various stages of adjudication.

(iv) An FIR was filed by Baggaram and others ("**Complainants**") against PrKTCL and certain of its employees ("**Accused**") under Sections 120-B, 145, 147, 379, and 392 of the IPC, amongst others, certain provisions of the Environment Protection Act, 1986, the Indian Forest Act, 1927 and the Himachal Pradesh Land Preservation Act, 1978, registered with the Police Station at Nalagarh, alleging, amongst others, (i) trespass on the land of the Complainants by the Accused; (ii) forcible construction of high voltage transmission line towers over the residential houses, cowsheds and land of the Complainants; and (iii) subsequent damage caused to the land of the Complainants by the Accused. The matter is currently pending.

17. NER

Regulatory matters

NER filed a petition under Section 61, Section 63 and Section 79 of the Electricity Act, 2003 read with statutory framework and Article 11 and Article 12 of the Transmission Service Agreement dated December 27, 2016 executed between NER-II Transmission Limited and its long-term transmission customers, before the CERC for inter-alia claiming compensation of ₹1,723.47 million due to changes in law and seeking an extension to the scheduled commissioning date of the relevant elements of the NER Project on account of force majeure events in terms of the transmission service agreement. The matter is currently pending. PGCIL filed an appeal on July 4, 2024, before APTEL under 111 of the Electricity Act, 2003, challenging CERC order May 19, 2024 ("**Impugned Order**") claiming compensation due to changes in law and seeking an extension to the scheduled commissioning date of the relevant elements of the NER Project on account of force majeure events in terms of the transmission service agreement. The matter is currently pending.

Civil matters

Tata Projects Limited issued a notice dated September 7, 2023 under Section 21 of the Arbitration and Conciliation Act, 1996 against NER for invoking arbitration proceedings under Section 31 of the supply and services contracts executed between the parties, seeking a recovery of the encashed bank guarantees amounting to ₹ 434.50 million along with an interest of 18% per annum and a further sum of ₹ 3.26 million, which was incurred by Tata Projects Limited towards bank guarantee and additional bank guarantee charges and for damages suffered. Tata Projects Limited also filed a petition before the High Court of Delhi under Section 9 of the Arbitration & Conciliation Act, 1996 seeking an urgent intervention to preserve the subject matter of dispute. The arbitration was concluded on August 8, 2025, and an award was passed holding amongst other things the encashment of the Bank Guarantee held to be valid, however since only partial relief was granted, the award has been challenged by NER before the Delhi High Court. The matter is currently pending.

Criminal matters

(i) An FIR was filed by Rajneesh Pandey on behalf of NER against Harilal Das and Babul Chakrabarty, under Sections 341, 325, 385, 506 and 341 of the IPC, registered with the Silchar Police Station, in relation to the manhandling of Rajneesh Pandey, one of the employees of NER, at Srikona. The said FIR was filed pursuant to a letter dated August 11, 2019, sent by NER to the Officer in Charge, Silchar Sadar Police Station, complaining of mental and physical harassment of Rajneesh Pandey. The matter is currently pending.

(ii) An FIR was filed by Santosh Kumar on behalf of NER against Shaidul Islam Hq. Mozumder, under Sections 120-B and 384 of the IPC, registered with the Borkhola Police Station, in relation to creating obstructions while commencing construction of certain towers and demanding higher compensation beyond what is prescribed under the applicable guidelines ("**Cause of action**"). The said FIR was filed pursuant to a letter dated May 12, 2020 written by NER to the Officer in Charge, Borkhola Police Station, in relation to the Cause of action. The matter is currently pending.

(iii) An FIR was filed by Bashu Lal Das ("**Complainant**") against certain employees of SPGVL ("**Accused**") under Sections 447, 427, 406, 294, 501, 506, 34 of the IPC, registered with the Silchar Police Station. As per the FIR, an agreement was made between the Complainant, the Accused and NER for an amount of ₹ 0.60 million for the use of the Complainant's land for transporting certain raw materials through JCB and trucks. Further, it was alleged, amongst others, by the Complainant that the Accused failed to undertake the repair of the land, crops and vegetables and trespassed on the land. The Accused applied for anticipatory bail on August 25, 2020 before the Sessions Court, Cachar, Silchar, which was granted to the Accused vide order dated September 10, 2020. The matter is currently pending.

(iv) An FIR was filed by Manish Mishra, on behalf of NER, against Basu Lal Das, Kajal Das, and certain others, under Sections 341, 385, 506, 341 of the IPC, registered with the Silchar Police Station, for obstructing work undertaken on a project and demanding high right of way compensation, beyond what is prescribed by the guidelines under Section 10 of the Indian Telegraph Act, 1885 and guidelines issued by the Government of Assam. The matter is currently pending.

(v) A complaint ("**Complaint**") was filed with the Senior Superintendent of Police, West Tripura, Agartala for reporting an incident against that Bittu Dev Barma, Kajal Dev Barma, Uttam Debbarma and certain others ("**Accused**") for stoppage of work, in relation to construction of certain sub-station, as a part of the NER project. On April 19, 2019, a notice was issued to one of the accused, Uttam Debbarma and he was directed to appear before the Sub-Inspector of Police, Ranir Bazar Police Station within seven days of receipt of that notice. Further, an FIR was filed by Captain Vivek Sachar under sections 448, 342, 384, 506 and 34 of the IPC against the Accused, pursuant to the Complaint. The matter is currently pending.

(vi) An FIR was filed by Santosh Kumar, on behalf of NER, against Shaibur Rahman Laskar, Azad Hussain Laskar, Iftakar Alom Lakskar and others, under Sections 420, 384 and 353 of the IPC, alleging that the accused are obstructing construction of a transmission line under the NER project ("**Cause of action**"). The said FIR was filed pursuant to a letter dated October 24, 2020 sent by NER to the Officer in Charge, Borkhola Police Station, in relation to the Cause of action. The matter is currently pending.

(vii) An FIR was filed by Rajneesh Pandey, on behalf of NER, under sections 341, 294,385, 506, 34 of the IPC, against Aklim Raja Barbhuiya, Aftab Uddin Barbhiuya, Taj Uddin Barbhuiya ("**Accused**") alleging, amongst others, that the Accused had obstructed the work undertaken on a project and demanded higher right of way compensation beyond what is prescribed under the applicable guidelines, without any basis ("**Cause of action**"). The said FIR was filed pursuant to a letter dated December 25, 2020 filed by NER to the Officer in Charge, Srikona Police Outpost, Silchar, in relation to the Cause of action. The matter is currently pending.

(viii) An FIR was filed by Basulal Das ("**Complainant**"), against an unknown Sterlite manager, Amit Singh, Ashok Rauth, Sunil Kumar and certain others ("**Accused**"), under sections 147, 447, 294, 427, 188 and 506 of the IPC, registered with the Silchar Police Station, alleging amongst others, certain unauthorised work undertaken by the Accused on the land of the Complainant, thereby causing damage to such land. The matter is currently pending.

(ix) An FIR was filed by NER against Jakir Hussain Laskar under Section 341/385 of the IPC with Silchar police station for obstructing construction of 400 D/C (Quad) Transmission Line from Silchar to Misa under NER Project by NER and demanding high ROW compensation beyond stipulated guidelines. The matter is currently pending.

(x) An FIR was filed by NER against Wahida Akhtar Barbhuiya, Rashid Ahmed Barbhuiya under Section 353 and 384 of the IPC with Silchar police station for obstructing construction of 400 D/C (Quad) Transmission Line from Silchar to Misa under NER system Strengthening Scheme II (Part B) and V by NER – II Transmission Limited. The matter is currently pending.

18. KTL

Regulatory Matters

(i) KTL has filed an appeal challenging Order dated July 4, 2023 ("**Impugned Order**") passed by the CERC in Petition No. 694/TT/2020 ("**PGCIL Petition**") whereby CERC has ordered KTL to pay the transmission charges for the period from August 1, 2019 to March 18, 2020. Appeal along with interim application ("**IAs**") were filed on August 28, 2023. An appeal filed against PGCIL Petition and the IAs has been filed for exemption from filing certified copy of impugned order. The matter is currently pending.

(ii) KTL filed a petition, under Sections 63 and 79 of the Electricity Act, 2003 read with the statutory framework governing Inter-state Transmission Systems, and Articles 11 and 12 of the Transmission Service Agreement dated March 14, 2016 executed between Khargone Transmission Limited and its Long-Term Transmission Customers before the CERC for inter alia (i) consonance of the delays in the project's implementation, caused due to the force majeure events; (ii) claiming compensation of ₹1202.20 million due to change in law; and (iii) seeking extension in the scheduled commercial operation date of the relevant elements of the KTL project on account of force majeure. The Madhya Pradesh Power Management Company Limited has filed a review petition under Section 94(1)(F) of the Electricity Act, 2003 read with Regulation 52 of the CERC (Conduct of Business) Regulations, 2023 against the order dated December 31, 2023, passed by CERC ("**Impugned Order**"), whereby CERC had granted KTL partial force majeure condonations and compensation. The matter is currently pending.

19. RSTCPL

NIL

20. Kallam

Regulatory Matters

(i) Kallaam filed two petitions dated June 6, 2026 and July 10, 2025 against Central Transmission Utility of India Limited and others ("**Respondents**") before the CERC under Section 62 read with Sections 79(1)(c) and Sections 79(1)(d) of the Electricity Act, 2003 read with Regulation 15(1)(a) of the CERC (Conduct of Business) Regulations, 2023, the applicable provisions of the CERC (Terms and Conditions of Tariff) Regulations, 2024 seeking amongst others (i) determination of transmission tariff of the augmentation scope awarded from COD to March 31, 2029 for certain assets and (ii) allowing interim tariff of 90% in accordance with applicable law. The matter is currently pending.

21. RKPTL

NIL

22. DPTL

Regulatory Matters

DPTL filed a petition dated August 19, 2025 against Central Transmission Utility of India before the CERC under Section 79(1)(c) and 79(1)(f) of the Electricity Act, 2003 read with relevant provisions of Transmission Service Agreement dated February 9, 2024 and Regulations 65 and Regulations 69 of the CERC (Conduct of Business) Regulations, 2023 seeking that directions be passed to mitigate the expected mismatch in scheduled commercial operation date of the project operated by DPTL till the start date of connectivity of renewable energy developers. The matter is currently pending.

25. KNTL

Regulatory Matters

(i) KNTL has filed a petition dated January 24, 2024, against Renew Surya Ojas Private Limited and others ("**Respondent**") seeking amongst other things (i) an extension of the SCOD of certain assets from June 12, 2023, to the actual COD being October 20, 2023, on account of force majeure events and (ii) allow compensatory relief owing to compensatory relief owing to change in law ("**CIL**") event that impacted the construction of the assets. An interim application was also filed before CERC on April 16, 2025, seeking direction for payment of amount due from COD being October 20, 2023 to February 28, 2025 on account of increase in transmission charges due to CIL events. The estimated amount involved in this matter is ₹ 342.97 million. The matter is currently pending.

(ii) KNTL has filed a petition dated May 1, 2025, against Renew Surya Ojas Private Limited and others ("**Respondent**") under Section 79 of the Electricity Act, 2003 seeking amongst other things (i) the extension of the SCOD by 46 days from December 12, 2023 to actual Commercial Operation Date of January 27, 2024 on account of Force Majeure events, and (ii) allow compensatory relief owing to compensatory relief owing to change in law ("**CIL**") event that impacted the construction of the assets. The estimated amount involved in this matter is ₹ 20.00 million. The matter is currently pending.

(iii) Renew Surya Ojas Private Limited and others ("**Petitioners**") have filed a petition dated February 28, 2024 before CERC under Section 79 of the Electricity Act, 2003 challenging the bills of supply for bilateral and transmission charges raised by Central Transmission Utility of India Limited ("**CTUIL**") which were contrary to the CERC (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020 and the CERC (Connectivity and General Network Access to the Inter-State Transmission System) Regulations, 2022. On the directions passed by the CERC, KNTL has also been impleaded as a party to this petition. Subsequently a review petition was filed on April 3, 2024 under Section 94 of the Electricity Act, 2003, read with Section 114 of the Code of Civil Procedure, 1908, and Regulation 52 of the CERC (Conduct of Business) Regulations, 2023, challenging the CERC's order dated March 18, 2024, which directed the Petitioners to pay 50% of the amounts raised under the impugned invoices. The review petitions are currently pending,

(iv) Anaya Renewable Power Six Private Limited and others ("**Petitioners**") has filed a writ petition dated March 18, 2024 before the High Court of Karnataka, Bengaluru, challenging the bilateral charges imposed by made by Central Transmission Utility of India. The demand is contested on the grounds the charges imposed are in contravention of the Ministry of Power's Order dated November 23, 2021, which exempts interstate transmission system charges for projects commissioned before June 30, 2025. The Petitioners' petition also includes an application for KNTL's impleadment, which has been allowed. The matter is currently pending.

28. Solar Edge

Regulatory Matters

(i) A writ petition has been filed by Solar Edge before the Bombay High Court on December 15, 2020 against the MERC and others challenging the MERC (Forecasting, Scheduling and Deviation Settlement for Solar and Wind Generation) Regulations, 2018 ("Maharashtra F&S Regulations") on grounds including, (i) the Maharashtra F&S Regulations being arbitrary, onerous in nature and are hence violative of Article 14 of the Constitution of India, (ii) the charges levied on the renewables project having no nexus to the objective of grid security, leading to unjust charges being sought from the renewables energy generators. The matter is currently pending.

Criminal Matters

(i) Three FIRs were filed by Sudhakar Tribhuvannath Shukla ("**Complainant**"), an employee of the Solar Edge, with the Parali Gramin police station on July 9, 2024 and August 7, 2024, and with Sirsala police station on August 12, 2024 against unknown person ("**Accused**"), under Section 303(2) of the Bhartiya Nyaya Sanhita, 2023, accusing the theft of electrical materials. The matter is currently under investigation.

(ii) An FIR was filed by Vandana Gautam Gaikwad ("**Complainant**"), an employee of the Solar Edge, with the Muktai Nagar police station on August 7, 2024, against unknown persons ("**Accused**"), under Section 303(2) of the Bhartiya Nyaya Sanhita, 2023, accusing theft of electric wires. The matter is currently under investigation.

29. TKSPL

Regulatory matter

(i) National Solar Energy Federation of India ("**NSFI**"), on behalf of TKSPL, TNSPEPL, UMD and TRSPL ("**Solar Entities**") has filed a petition dated August 10, 2016, before the Tamil Nadu Electricity Regulatory Commission ("**TNERC**") against TANGDECO, Tamil Nadu, SLDC (TNSLDC), TANTRANSCO and others ("**Respondents**") seeking directions be issued to the Respondents to observe the must-run status of the solar power plant and payment of deemed generation charges on account of loss of power generation units due to allegedly unjustified and unlawful backing down instructions issued by SLDC verbally without any written confirmation and forceful disconnection and curtailment of supply by TANGEDCO and TANTRANSCO. The TNERC by way of an order dated March 25, 2019 ("**TNERC Order**") held that the TNSLDC should not resort to back down instructions without recording a reason. On the issue of deemed generation benefits, TNERC observed that it has already instructed the TNSLDC to not to resort to back down instructions without reasons and that no provision in the purchase agreements pertains to payment of deemed generation charges. Therefore, no deemed generation benefits were awarded. The TNERC Order was challenged by NSFI on behalf of the Solar Entities before the Appellate Tribunal for Electricity ("**APTEL**") seeking (i) to quash and set aside the TNERC Order; (ii) a direction to TANGDECO and TNSLDC to pay deemed generation charges to the solar power plants when generation from solar power plants was curtailed along with carrying costs. The APTEL, in its order dated August 2, 2021, set aside the TNERC Order to the extent of denial of deemed generation charges/compensation for issuing backdown orders other than for grid security reasons. TANGEDCO has filed a civil appeal before the Supreme Court of India against the aforementioned APTEL order. The matter is currently pending.

(ii) TRSPL, TNSEPL, TKSPL and UMD ("**Solar Entities**") have filed a writ petition dated June 15, 2021, before the Madras Hight Court against the Tamil Nadu Electricity Regulatory Commission ("**TNERC**"), TANTRANSCO, Tamil Nadu Generation and Distribution Corporation Limited and the State of Tamil Nadu the grounds that the Tamil Nadu Electricity Regulatory Commission (Forecasting, Scheduling and Deviation Settlement and related matters for Wind and Solar Generation) Regulations ("**TN F&S Regulations**") are arbitrary and hence are violative of Article 14, due to the following reasons (i) the TN F&S Regulations seek to treat the renewable energy projects (like wind and solar) at par with conventional thermal power stations, which is arbitrary, since it is not possible for renewable energy projects to give accurate projections on how the weather condition will impact their generation at a given point of time of day (ii) the TN F&S Regulations have sought to fix the absolute error band at (+ / -10%) which is a much narrower and tightened error band compared to forecasting and scheduling regulations in other similarly placed renewable energy rich states as well as the Forum of Regulators ("**FOR**") Model Regulations (at + / - 15%); and (iii) the TN F&S Regulations do not include provisions pertaining to aggregation of generation schedules among pooling substations at the state level, which would provide appropriate treatment of impact on grid and apply reasonable penalties. The matter is currently pending.

Civil matter

(i) As part of the acquisition of the Lalitpur project by way of a slump sale on a going concern basis, Jakson Power Private Limited ("**JPPL**") and TKSPL executed and registered a sale deed for transfer of the immovable property forming part of the Lalitpur project. At the time of execution on August 22, 2022, JPPL paid the requisite stamp duty. However, subsequently, government authorities initiated legal proceedings against TKSPL for paying deficit stamp duty on the sale deed, on various grounds including that allegation that the solar modules and generators installed on the project land were not considered while calculating and paying the stamp duty. As per the terms of the business transfer agreement executed with JPPL ("**BTA**"), it was JPPL's obligation to pay the adequate stamp duty on the sale deed and keep TKSPL indemnified for any loss arising out of JPPL's breach of its obligation. Accordingly, the TKSPL has notified JPPL of the same and JPPL is controlling the defence of this matter before the District Magistrate in terms of the BTA. The District Magistrate has ordered to deposit an amount of ₹ 36.12 million as deficit stamp duty, ₹0.1 million as penalty and another amount of ₹7.22 million along with interest at the rate of 1.5% since August 22, 2022 (deed of execution). TKSPL has filed an appeal against order dated April 4, 2025 before the Commissioner (Stamp). This matter is currently pending.

Criminal matter

(i) An FIR was filed by Amarendra Pandey ("**Complainant**"), an employee of the TKSPL, with the Lalitpur police station on May 21, 2024, against Arvind Singh, Chhatrapal Singh and three unknown persons ("**Accused**"), under Section 147, 323, 504 and 506 of the Indian Penal Code, 1860 accusing them of rioting, intimidating, insulting and causing harm. The matter is currently under investigation.

(ii) An FIR was filed by Saravanakumar ("**Complainant**"), an employee of the TKSPL, with the Pachal police station on September 12, 2024, against Suresh and Kumaresan ("**Accused**"), under Section 131, 296(b), 324(2), 303(2) and 351(3) of the Bhartiya Nyaya Sanhita, 2023, accusing theft, criminal intimidation and verbal abuse. The matter is currently under investigation.

30. TNSPEPL

Other than the matters disclosed in the section entitled "*Litigation – TKSPL – Regulatory matter*" on page 391, there is no litigation involving TNSPEPL.

31. UMD

Other than the matters disclosed in the section entitled "*Litigation – TKSPL – Regulatory matter*" on page 391, there is no litigation involving UMD.

32. TRSPL

Other than the matters disclosed in the section entitled "*Litigation – TKSPL – Regulatory matter*" on page 391, there is no litigation involving TRSPL.

33. GGEPL

Regulatory matters

(i) GGEPL has filed a petition before the CERC against NTPC Vidyut Vyapar Nigam Limited (NVVN) and others, requesting for an increase in the tariff from ₹ 12.20 per kWh to ₹ 15.00 per kWh claiming, *inter alia*, the lower direct normal irradiance (DNI) and variation in foreign exchange rates has resulted in a force majeure event. Accordingly, GGEPL should be given relief under the provision of the power purchase agreement dated January 10, 2011. Further, NVVN should not be allowed to claim any compensation on account of shortfall of MSO and minimum CUF, since such failures were on account of force majeure events. By way of order dated October 11, 2017, the CERC ruled that the shortfall of DNI cannot be considered a force majeure event and NVVN and the DISCOMs are not entitled to raise claims from GGEPL unless they can prove that they suffered loss on account of non-compliance of renewable purchase obligation due to shortfall generation (the "**CERC Order**"). The CERC Order was challenged before the APTEL, (a) by GGEPL seeking increase in tariff and (b) by NVVN to set aside the portion of the CERC order requiring NVVN to adjust the claim for shortage of energy supplied by GGEPL. In an order dated July 26, 2022, APTEL allowed the GGEPL appeal and directed CERC to formulate the mechanism for compensating the generators (including GGEPL) against the reduction in DNI from the adopted value of DNI for determination of generic tariff to the actual annual values measured at project sites. In the said order, APTEL also set aside the demand of liquidated damages claimed by NVVN on account of short supply of power by GGEPL. Punjab State Power Corporation Limited and distribution companies in Punjab have filed an appeal against the APTEL order before the Supreme Court of India, which has stayed the order. The matter is currently pending.

(ii) Punjab State Power Corporation Limited filed an appeal dated December 9, 2022, before the Supreme Court of India against GGEL challenging an order by APTEL dated July 26, 2022, regarding the company's obligations under the Power Purchase Agreement ("**PPA**"). Under the terms of the PPA, GGEL was required to meet a Minimum Scheduled Offtake ("**MSO**") of at least 98.55 million kWh per contract year and maintain a Capacity Utilization Factor ("**CUF**") of 24.5% for the entire year and 26.5% for a consecutive three-month period. The PPA also allows NVVN to claim monetary compensation from GGEL if these obligations are not met, based on the amounts payable by DISCOMs for failing to meet their Renewable Purchase Obligation ("**RPO**"), with a minimum of 25% of the tariff. GGEL has failed to meet the MSO and CUF requirements, citing lower Direct Normal Irradiance ("**DNI**") than originally assumed. The DNI used in the bidding process was 2,168 kWh/m²/year, but the actual DNI has been lower at 1,763 kWh/m²/year. In response, GGEL filed a petition with the CERC requesting a tariff increase from ₹12.20 per kWh to ₹15.00 per kWh, claiming the lower DNI constitutes a force majeure event, and thus, it should be granted relief under the PPA. GGEL further argued that NVVN should not claim compensation for the MSO and CUF shortfall due to these force majeure conditions. In its October 2017 order, CERC ruled that the DNI shortfall could not be considered a force majeure event and denied the tariff increase. CERC also stated that NVVN must demonstrate the amounts payable by DISCOMs for failing to meet their RPO obligations in order to claim compensation for MSO and CUF shortfalls. GGEL appealed the CERC decision to APTEL, which ruled in favor of GGEL, directing CERC to develop a mechanism for compensating generators, including GGEL, for the DNI shortfall. APTEL also set aside the liquidated damages claimed by NVVN for GGEL's short supply of power due to low DNI, directing NVVN to refund approximately ₹ 140.00 million in liquidated damages. The matter is currently pending.

44. RSAPL

Regulatory Matters

(i) RSAPL filed a petition before CERC against SECI and Kerela State Electricity Board, for seeking an appropriate adjustment or compensation to offset financial or commercial impact of 'Change in Law' event, as defined under the RSAPL PPA, on account of (i) the Supreme Court of India's order dated April 19, 2021, issuing directions for mandatory undergrounding of overhead powerlines and interim installation of bird diverters on the existing powerline in the priority and potential habitats of Great Indian Bustard; and; (ii) increase in the rate of goods and services tax from 5% to 12 % on renewable energy devices and parts for their manufacture. This matter is currently pending.

(ii) RSAPL filed a petition before CERC against SECI, CTUIL and Grid Controller of India Limited under Section 79 (1)(b) and 79(1)(f) of the Electricity Act, 2003 read with CERC (Conduct of Business Regulations), 2023, seeking an in principle declaration for the '*Report of the working group in respect of date submission procedure and verification of compliance to CEA Regulation on Technical Standards for Connectivity to the Grid by RE Generators*' to be a 'Change in Law' event, as defined under the RSAPL PPA, and the grant of consequential relief thereto. This matter is currently pending.

(iii) RSAPL, amongst others, filed a petition before CERC against SECI and CTUIL under Section 79 of the Electricity Act, 2003, challenging the invoices raised by CTUIL levying bilateral/ transmission charged under the CERC (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2020. This matter is currently pending.

(iv) Northern Regional Road Dispatch Centre ("**Petitioner**") filed a petition before CERC against JUSPL, amongst other renewable energy plants, under Section 79 of the Electricity Act, 2003, read with Regulation 7(1) of CERC (lndian Electricity Grid Code) Regulations, 2023 and Central Electricity Authority (Technical Standards for Connectivity to the Grid) Regulations, 2007 ("**CEA Grid Regulations**"), seeking directions regarding the adoption of preventive measures to avoid recurrence of grid failure events which leads to renewable energy generation loss, system instability and non-compliance of CEA Grid Regulations. This matter is currently pending.

45. JUPL (formerly RSUPL)

Regulatory matters

(i) Northern Regional Road Dispatch Centre ("**Petitioner**") filed a petition before CERC against JUPL, amongst other renewable energy plants, under Section 79 of the Electricity Act, 2003, read with Regulation 7(1) of CERC (lndian Electricity Grid Code) Regulations, 2023 and Central Electricity Authority (Technical Standards for Connectivity to the Grid) Regulations, 2007 ("**CEA Grid Regulations**"), seeking directions regarding the adoption of preventive measures to avoid recurrence of grid failure events which leads to renewable energy generation loss, system instability and non-compliance of CEA Grid Regulations. This matter is currently pending.

(ii) JUPL has filed an appeal before the APTEL challenging CERC's order dated November 30, 2023, wherein CERC held that JUPL is entitled to a change in law compensation for the increase in the rate of GST from 5% to 12 % and increase in the rate of basic customs duty on import of inverters. However, while granting carrying cost CERC adopted a view that JUPL would be granted carrying cost at the lowest of the following three rates, (i) at the actual rate of interest paid by JUPL for arranging funds; or (ii) at the rate of interest on working capital as per applicable Central Electricity Regulatory Commission (Terms and Conditions for Tariff Determination from Renewable Energy Sources) Regulations, 2020; or (iii) at the late payment surcharge rate. The matter is currently pending.

Criminal matters

An FIR was filed by Bhom Singh ("**Complainant**"), an employee of the JUPL, with the Sankra police station on August 16, 2024, against Maga Ram, Kamal Singh, Jograj Singh and others ("**Accused**"), under Section 329(2) of the Bhartiya Nyaya Sanhita, 2023 and Section 136 of the Electricity Act, 2003, accusing them of criminal trespass and theft of electrical material. The matter is currently under investigation.

46. GBPL

NIL

47. RBPL

NIL

48. Matters that may impact solar assets

GERC, by way of its tariff order dated January 29, 2010 ("**GERC Tariff Order**") determined the generic tariff for procurement of power from the solar energy developers by the discoms. The tariff for solar power projects for 25 years basis the capital cost of ₹165 million per MW and debt-equity ratio of 70:30, was determined as two sub-periods: (a) ₹15 per unit for first 12 years starting from date of commercial operation; and (b) ₹5 per unit for the balance 13 years thereafter, and this tariff would apply only to the projects commissioned within two years from the date of the order. GUVNL filed a petition before the GERC for revisiting the parameters laid down in the GERC Tariff Order. GERC dismissed the petition as being not maintainable by its order dated August 8, 2013 ("**Impugned Order**") on account of delay. Therefore, GUVNL filed an appeal with APTEL, New Delhi for the setting aside of the Impugned Order and for issuing consequential directions. APTEL in its order dated August 22, 2014 ("**APTEL Order**") upheld the Impugned Order and stated that GERC was correct in holding that the GUVNL petition for re-determination of tariff was not maintainable. Subsequently, GUVNL filed a civil appeal against APTEL's order on October 27, 2014, against GERC and others before the Supreme Court of India. The matter is currently pending.

II. Litigation involving the Project Managers – IGL and Associates of the Project Manager

Please see the section entitled "*Litigation - Litigation involving IndiGrid Infrastructure Trust and its Portfolio Assets*" on page 379.

III. Litigation involving the Project Managers – EIPL 1 and Associates of the Project Manager

Please see the section entitled "*Litigation - Litigation involving IndiGrid Infrastructure Trust and its Portfolio Assets*" on page 379.

IV. Litigation and regulatory actions against the Sponsor and its Associates, the Sponsor Group and Associates of the Investment Manager which are affiliates of KKR

*The disclosures with respect to material litigations and non-ordinary course regulatory actions relating to the Sponsor and its Associates and the Sponsor Group (other than IndiGrid, its HoldCos and its Associates, the Project SPVs, the Investment Manager, and the Project Managers and their respective Associates) have been made solely on the basis of the public disclosures made by KKR & Co. Inc. ("**KKR & Co.**") in the most recent quarterly report on Form 10-Q filed with U.S. Securities and Exchange Commission on November 7, 2025 relating to the quarter ended September 30, 2025 with respect to all entities, which are consolidated for financial reporting purposes with KKR & Co., which is listed on the New York Stock Exchange. In accordance with applicable securities law and stock exchange rules, KKR & Co., is required to disclose material litigations through applicable securities filings and KKR & Co., and has made no public filings with the SEC after November 7, 2025 which materially changes the disclosures made in that regard in such quarterly report. The threshold for identifying material litigations in such disclosures is based, among other considerations, on management judgment and periodically reviewed thresholds applied by the independent auditor of KKR & Co., in expressing its opinion on the financial statements.*

Except as stated below in this section and on the basis of the above, there are no pending material litigation and regulatory action, which are not in the ordinary course of business, against us, the Sponsor Group or any of our Associates (as defined under the InvIT Regulations), or Associates of the Investment Manager, in each case, which are affiliates of KKR & Co. Inc. (and, for the avoidance of doubt, for purposes of this disclosure, such Associates exclude IndiGrid, its HoldCos and its Associates, the Project SPVs, the Investment Manager, and the Project Managers and their respective Associates).

From time to time, KKR (including Global Atlantic) is involved in various legal proceedings, requests for information, lawsuits, arbitration, and claims incidental to the conduct of KKR's businesses. KKR's businesses are also subject to extensive regulation, which may result in regulatory or other legal proceedings against them. Moreover, in the ordinary course of business, KKR is and can be the defendant or the plaintiff in numerous lawsuits with respect to acquisitions, bankruptcy, insolvency and other events. Such lawsuits may involve claims, or may be resolved on terms, that adversely affect the value of certain investments owned by KKR's funds and Global Atlantic's insurance companies.

Kentucky Matter

In December 2017, KKR & Co. L.P. (which is now KKR Group Co. Inc.) and its then Co-Chief Executive Officers, Henry Kravis and George Roberts, were named as defendants in a lawsuit filed in Kentucky state court (the "**2017 Action**") alleging, among other things, the violation of fiduciary and other duties in connection with certain separately managed accounts that Prisma Capital Partners LP, a former subsidiary of KKR, manages for the Kentucky Retirement Systems. Also named as defendants in the lawsuit are certain current and former trustees and officers of the Kentucky Retirement Systems, Prisma Capital Partners LP, and various other service providers to the Kentucky Retirement Systems and their related persons. The 2017 Action was dismissed at the direction of the Supreme Court of Kentucky for lack of Kentucky constitutional standing. This dismissal became final on February 16, 2024.

On July 21, 2020, the Office of the Attorney General, on behalf of the Commonwealth of Kentucky (the "**Kentucky AG**"), filed a new lawsuit in the same Kentucky state court (the "**2020 AG Action**") making essentially the same allegations as those raised in the 2017 Action, including against what was then KKR & Co. Inc. (now KKR Group Co. Inc.) and Messrs. Kravis and Roberts. On May 1, 2024, the trial court denied motions to dismiss the 2020 AG Action filed by KKR & Co. Inc. and Messrs. Kravis and Roberts.

On April 8, 2024, after receiving permission from the Kentucky trial court in the 2020 AG Action, the Kentucky AG amended its complaint in the 2020 AG Action to add a claim for breach of contract. The Kentucky AG also filed an action (the "**2024 AG Action**") substantially identical to the 2020 AG Action, including the new claim for breach of contract. On April 23, 2024, KKR & Co. Inc., Messrs. Kravis and Roberts and other defendants moved to strike the Kentucky AG's amended complaint in the 2020 AG Action, to stay consideration of the breach of contract claim and the 2024 AG Action until after the trial court's ruling on the motions to dismiss the 2020 AG Action, and to deny a motion by the Kentucky AG to consolidate the 2020 AG Action and the 2024 AG Action. These motions were denied, and the trial court consolidated the 2020 AG Action with the 2024 AG Action. On June 17, 2024, KKR & Co. Inc., Messrs. Kravis and Roberts and other defendants filed new motions to dismiss the consolidated 2020 AG Action and 2024 AG Action.

In January 2021, some of the attorneys for the plaintiffs in the 2017 Action filed a new lawsuit on behalf of a new set of plaintiffs, who claim to be "Tier 3" members of Kentucky Retirement Systems (the "**Tier 3 Plaintiffs**"), alleging substantially the same allegations as in the 2017 Action. On July 9, 2021, the Tier 3 Plaintiffs served an amended complaint, which purports to assert, on behalf of a class of beneficiaries of Kentucky Retirement Systems, direct claims for breach of fiduciary duty and civil violations under the Racketeer Influenced and Corrupt Organizations Act ("**RICO**"). This complaint was removed to the U.S. District Court for the Eastern District of Kentucky, which has entered an order staying this case until the completion of the 2020 AG Action. On August 20, 2021, the Tier 3 Plaintiffs and other individual plaintiffs filed a second complaint in Kentucky state court (the "**Second Tier 3 Action**"), purportedly on behalf of Kentucky Retirement Systems' funds, alleging the same claims against what was then KKR & Co. Inc. (now KKR Group Co. Inc.) and Messrs. Kravis and Roberts as in the July 9th amended complaint but without the RICO or class action allegations. On May 1, 2024, the trial court denied motions to dismiss the Second Tier 3 Action filed by KKR & Co. Inc. and Messrs. Kravis and Roberts. On July 3, 2024, KKR & Co. Inc., Messrs. Kravis and Roberts and other defendants filed a writ of prohibition asking the Kentucky Court of Appeals to order the trial court to dismiss the Second Tier 3 Action. On November 12, 2024, the Court of Appeals denied the request for a writ of prohibition. Defendants have appealed that denial by petitioning the Kentucky Supreme Court for a writ of prohibition. The Second Tier 3 Action is stayed pending the outcome of this petition.

On March 24, 2022, in a separate declaratory judgment action brought by the Commonwealth of Kentucky regarding the enforceability of certain indemnification provisions available to what was then KKR & Co. Inc. (now KKR Group Co. Inc.) and Prisma Capital Partners LP, the Kentucky state court concluded that it has personal jurisdiction over KKR & Co. Inc. in that action, and that the indemnification provisions violated the Kentucky Constitution and were therefore unenforceable. On December 1, 2023, the Kentucky Court of Appeals reversed the trial court's summary judgment on the issue of personal jurisdiction over KKR & Co. Inc., but affirmed the trial court's rulings that the indemnification provisions violated the Kentucky Constitution and were unenforceable. On February 5, 2024, the Kentucky Court of Appeals denied the petitions of KKR & Co. Inc. and others for rehearing. On April 8, 2024, KKR & Co. Inc. and other defendants in the declaratory judgment case filed motions with the Supreme Court of Kentucky for discretionary review of the Court of Appeals' December 1, 2023 decision. On August 14, 2024, the Kentucky Supreme Court granted discretionary review in the Kentucky AG's declaratory judgment case of both personal jurisdiction over KKR & Co. Inc. and the enforceability and constitutionality of the indemnification provisions.

On January 8, 2025, KKR, Messrs. Kravis and Roberts, Prisma Capital Partners L.P., and certain other defendants entered into an agreement with the Commonwealth of Kentucky, Kentucky Public Pensions Authority, County Employees Retirement System and Kentucky Retirement Systems (the "**KPPA Entities**") to settle the 2020 AG Action and the 2024 AG Action. On May 12, 2025, the Kentucky trial court entered an order declining to enter the parties' jointly proposed order approving the settlement. Because the receipt of the court's approval was a contractual condition to the settlement becoming final, the settlement agreement terminated. KKR, Messrs. Kravis and Roberts, Prisma Capital Partners L.P., and the other defendants that were party to the settlement agreement continue to deny any liability, wrongdoing, or damage, maintain that the settlement was not an admission of any fault, liability, wrongdoing or damage, and maintain that they entered into the settlement solely to avoid further legal expense, inconvenience, and the distraction of burdensome and protracted litigation. KKR intends to continue to vigorously defend against all claims against KKR and Messrs. Kravis and Roberts.

Shareholder Derivative Litigation

On July 30, 2024, a shareholder derivative complaint was filed in Delaware Chancery Court and was subsequently amended on August 7, 2024 and further amended on August 19, 2025. The operative complaint claims, among other matters, that the Co-Founders and various current and former executive officers and directors of KKR & Co. Inc. breached fiduciary duties and wasted corporate assets in connection with transactions contemplated by the Reorganization Agreement pursuant to which, among other things, the Co-Founders, certain current and former executive officers, and other senior executives of KKR received common stock from KKR. The suit seeks to recover on behalf of KKR & Co. Inc. a cancellation of shares issued in the reorganization, monetary damages, injunctive relief, restitution, and other remedies. KKR & Co. Inc. and other defendants filed a motion to dismiss the first amended complaint on December 19, 2024 and filed a motion to dismiss the second amended complaint on October 6, 2025.

Regulatory Matters

KKR currently is, and expects to continue to become from time to time, subject to various examinations, inquiries and investigations by various U.S. and non-U.S. governmental and regulatory agencies. Such examinations, inquiries and investigations may result in the commencement of civil, criminal or administrative proceedings, or the imposition of fines, penalties, or other remedies, against KKR and its personnel. KKR is subject to periodic examinations of its regulated businesses by various U.S. and non-U.S. governmental and regulatory agencies, including but not limited to the Securities and Exchange Commission ("**SEC**"), Financial Industry Regulatory Authority ("**FINRA**"), the U.K. Financial Conduct Authority, Central Bank of Ireland, Monetary Authority of Singapore, U.S. state insurance regulatory authorities, and the Bermuda Monetary Authority. KKR may also become subject to civil, criminal, administrative, or other inquiries or investigations (through a request for information, civil investigative demand, subpoena or otherwise) by any of the foregoing governmental and regulatory agencies as well as by any other U.S. or non-U.S. governmental or regulatory agency, including but not limited to the SEC, U.S. Department of Justice ("**DOJ**"), U.S. state attorney generals, and similar non-U.S. governmental or regulatory agencies.

Since 2022, as previously disclosed, KKR has been subject to investigations by the Antitrust Division of the DOJ (the "**DOJ**") related to the accuracy and completeness of certain filings made by KKR pursuant to the premerger notification requirements under the Hart-Scott-Rodino Act of 1976 ("**HSR**") for certain transactions in 2021 and 2022. On January 14, 2025, the DOJ filed a civil antitrust complaint (the "**DOJ Complaint**") in the U.S. District Court for the Southern District of New York against KKR and various KKR-sponsored investment entities (the "**KKR Defendants**") alleging violations of the HSR Act. The DOJ Complaint requests various relief for the alleged violations of the HSR Act by the KKR Defendants, including civil penalties in an amount to be determined and various equitable relief, including potential disgorgement and injunctive relief against future violations of the HSR Act. On January 14, 2025, KKR filed a complaint (the "**KKR Complaint**") in the U.S. District Court for the District of Columbia against Doha Mekki in her official capacity as Acting Assistant Attorney General of the United States for the Antitrust Division, the DOJ, the Federal Trade Commission ("**FTC**"), and the United States of America pertaining to the HSR-related investigations conducted by the DOJ. On January 16, 2025, KKR voluntarily dismissed the KKR Complaint filed in the U.S. District Court for the District of Columbia and re-filed it in the U.S. District Court for the Southern District of New York as related to the DOJ Complaint. The KKR Complaint requests various forms of relief, including declaratory judgments that: (i) KKR did not violate the HSR Act; (ii) the DOJ's and FTC's interpretations of the HSR Act are unconstitutionally vague; and (iii) the DOJ seeks an excessive fine in violation of the U.S. Constitution. KKR intends to vigorously defend against the DOJ Complaint and filed a motion to dismiss the DOJ Complaint on April 17, 2025. The DOJ filed its motion to dismiss the KKR Complaint on April 23, 2025, and KKR and the DOJ agreed to dismiss one count of the KKR Complaint and to stay the rest of the DOJ's motion to dismiss pending resolution of KKR's motion to dismiss the DOJ Complaint. While the DOJ Complaint is currently stayed as a result of the U.S. government shutdown, the DOJ has continued its investigations into certain of KKR's past HSR filings, and KKR continues to cooperate in connection with these investigations. The DOJ may initiate additional civil or criminal proceedings or take other actions against KKR, its employees or portfolio companies, which could include further antitrust investigations into past HSR filings or transactions or other purported violations of law. There can be no certainty as to the possible outcome of the DOJ Complaint, the KKR Complaint, the DOJ's investigations, or such other proceedings or other actions, any of which could result in a range of adverse financial and non-financial consequences to KKR. Even in the event that the parties are able to settle the pending litigation, it is possible that any such settlement could involve significant monetary penalties and/or other possible remedial measures. In addition, KKR is currently, and may from time to time become, subject to other investigations by the Antitrust Division of the DOJ and other U.S. or non-U.S. governmental authorities related to antitrust matters, including the European Commission's investigation relating to the acquisition of certain infrastructure assets of Telecom Italia S.p.A. and FiberCop S.p.A. KKR is currently cooperating in connection with these other investigations.

Loss Contingencies

KKR establishes an accrued liability for legal or regulatory proceedings only when those matters present loss contingencies that are both probable and reasonably estimable. KKR includes in its financial statements the amount of any reserve for regulatory, litigation and related matters that Global Atlantic includes in its financial statements. No loss contingency is recorded for matters where such losses are either not probable or reasonably estimable (or both) at the time of determination. Such matters also have the possibility of resulting in losses in excess of any amounts accrued. To the extent KKR can in any particular period estimate an aggregate range of reasonably possible losses, these decisions involve significant judgment given that it is inherently difficult to determine whether any loss for a matter is probable or even possible or to estimate the amount of any loss in many legal, governmental and regulatory matters.

Estimating an accrued liability or a reasonably possible loss involves significant judgment due to many uncertainties, including among others: (i) the proceeding may be in early stages; (ii) damages sought may be unspecified, unsupportable, unexplained or uncertain; (iii) discovery may not have been started or is incomplete; (iv) there may be uncertainty as to the outcome of pending appeals or motions; (v) there may be significant factual issues to be resolved; (vi) there may be novel legal issues or unsettled legal theories to be presented or a large number of parties; or (vii) the proceeding relates to a regulatory examination, inquiry, or investigation. It is not possible to predict the ultimate outcome of all pending litigations, arbitrations, claims, and governmental or regulatory examinations, inquiries, investigations and proceedings, and some of the matters discussed above seek or may seek potentially large or indeterminate relief. Consequently, management is unable as of the date of filing of the quarterly report to estimate an amount or range of reasonably possible losses related to matters pending against KKR. In addition, any amounts accrued as loss contingencies or disclosed as reasonably possible losses may be, in part or in whole, subject to insurance or other payments such as contributions and indemnity, which may reduce any ultimate loss.

As of the date of filing the quarterly report, management does not believe, based on currently available information, that the outcomes of the matters pending against KKR will have a material adverse effect upon its financial statements. However, given the potentially large and/or indeterminate relief sought or that may be sought in certain of these matters and the inherent unpredictability of litigations, arbitrations, claims, and governmental or regulatory examinations, inquiries, investigations and proceedings, it is possible that an adverse outcome in certain matters could have a material adverse effect on KKR's financial results in any future period. In addition, there can be no assurance that material losses will not be incurred from claims that have not yet been asserted or those where potential losses have not yet been determined to be probable or possible and reasonably estimable.

V. Litigation involving the Investment Manager

Nil

VI. Litigation involving the Associates of the Investment Manager (Excluding the Associates of the Investment Manager which are affiliates of KKR)

Please see the section entitled "*Litigation - Litigation involving the Associates of IndiGrid*" above.

VII. Litigation involving the Trustee

Civil Matters

There are no outstanding civil litigation against the Trustee. However,

(i). there is an ongoing arbitration matter pending before SIAC filed by Garg Family in respect of an underlying share purchase agreement against the Trustee as trustee of a real estate infrastructure trust ("**REIT**") and the manager of the REIT. There are no allegations against the Trustee in its own corporate capacity; and

(ii). there is one ongoing investigation that is case bearing number 29 of 2021 before the Competition Commission of India against the Trustee in its former official capacity as one of the office bearers of the Trustees Association of India, for alleged cartelization.

Criminal Matters

(i) A criminal application has been filed by Ganesh Benzoplast Limited before the Delhi High Court, against Axis Trustee Services Limited in its capacity as Debenture Trustee, on behalf of the debenture holders. where no reliefs have been sought against the Trustee. The matter is currently pending.

(ii) The Trustee has filed a petition under Section 528 of the Bhartiya Nagrik Suraksha Sanhita, 2023 seeking quashing of FIR, registered at Safdarjung Enclave Police Station. The FIR was lodged under Sections 316, 318, and 3(5) of the Bhartiya Nyaya Sanhita, 2023 by auction bidder in connection with a dispute related to auction of secured asset under SARFAESI Act. As directed by Delhi High Court, the Trustee has deposited the disputed amount Rs 10.5 million. The Parties have filed the quashing application and settlement agreement. The Trustee is acting in the capacity of debenture trustee for and on behalf of debenture holders.

(iii) The Trustee in its various capacities acting as a trustee, debenture trustee, security trustee, among others, has initiated several proceedings against certain parties based on instructions received from its clients, as follows:

a. Applications under Section 138 of Negotiable Instruments Act, 1881, based on the instructions of debenture holders/ lenders, in relation to dishonour of cheques.

b. The Trustee, upon instructions of their client has filed an appeal under Section 26(1) of Prevention of Money Laundering Act, 2002 before the appellate tribunal against the order of the adjudicating authority in the matter OC No.2470 of 2024. The matter is currently pending.

VIII. Tax Proceedings

Details of all direct tax and indirect tax matters against IndiGrid, Associates of IndiGrid, Parties to IndiGrid, their Associates (excluding the Trustee's and the Sponsor Group's associates) and the Portfolio Assets as of the date of this Placement Document, are as follows:

Please note that the proceedings involving the Sponsor Group, its Associates and the Investment Manager and its Associates which are affiliates of KKR (other than IndiGrid, its HoldCos and its Associates, the Project SPVs, the Investment Manager, and the Project Managers and their respective Associates) are only disclosed basis the materiality threshold set out above. Further, other than as provided herein there are no direct tax and indirect tax matters involving the Portfolio Assets.

IX. Certain other matters

Tarun Kataria, was an independent director of a hospitality trust of US hotel properties, listed on the SGX. The units of the trust were suspended on March 19, 2019. The impact of COVID led to the inability of the trust to maintain the minimum guaranteed lease rent from hotel occupancy since 15 of the 18 hotels were shut down. This led to the suspension of the units and later a winding up of the trust. While an MAS investigation is underway, there is no restriction on Tarun Kataria or the other independent directors from acting as independent directors of SGX listed companies. The MAS has also requested the independent directors to be witnesses in its prosecution of the CEO. Tarun Kataria remained lead independent director of Mapletree Logistics Trust, a listed entity, until September 2022, when the standard nine years as an independent director concluded. He is also currently the chairman of the Investment Committee of Mapletree US Europe Logistics Private Trust, an unlisted trust and also Asian Development Bank's nominee director on the board of Fourth Partners Energy Limited.

SECURITIES MARKET OF INDIA

The information in this section has been extracted from documents available on the website of SEBI and the Stock Exchanges and has not been prepared or independently verified by the Parties to IndiGrid or the Placement Agents or any of their respective affiliates or advisors.

The Indian Securities Market

India has a long history of organized securities trading. In 1875, the first stock exchange was established in Mumbai. The BSE and the NSE, together, hold a dominant position among the stock exchanges in terms of the number of listed companies, market capitalisation and trading activity.

Stock Exchange Regulation

Indian stock exchanges are regulated primarily by SEBI, as well as by the Government acting through the Ministry of Finance, Capital Markets Division, under the SCRA and the SCRR. SEBI, in exercise of its powers under the SCRA and the SEBI Act, notified the Securities Contracts (Regulation) (Stock Exchanges and Clearing Corporations) Regulations, 2018 on October 3, 2018 (the "**SCR (SECC) Regulations**"), which regulate *inter alia* the recognition, ownership and governance of stock exchanges and clearing corporations in India together with providing for minimum net worth requirements for stock exchanges. The SCRA, the SCRR and the SCR (SECC) Regulations along with various rules, bye-laws and regulations of the respective stock exchanges, regulate the recognition of stock exchanges, the qualifications for membership thereof and the manner, in which contracts are entered into, settled and enforced between members of the stock exchanges.

The SEBI Act empowers SEBI to regulate the Indian securities markets, including stock exchanges and intermediaries in the capital markets, promote and monitor self-regulatory organisations and prohibit fraudulent and unfair trade practices. Regulations concerning minimum disclosure requirements by public companies, rules and regulations concerning investor protection, insider trading, substantial acquisitions of shares and takeover of companies, buy-backs of securities, employee stock option schemes, stockbrokers, merchant bankers, underwriters, mutual funds, foreign institutional investors, credit rating agencies and other capital market participants have been notified by the relevant regulatory authority.

Listing and Delisting of Units

The InvIT Regulations provide for listing and delisting of units of infrastructure investment trusts on the Stock Exchanges.

BSE

Established in 1875, it is the oldest stock exchange in India. In 1957, it became the first stock exchange in India to obtain permanent recognition from the Government under the SCRA. It has evolved over the years into its present status as one of the premier stock exchanges of India. The BSE provides a market for trading in equity. Currencies, debt instruments, derivatives and mutual funds. Pursuant to the BSE (Corporatization and Demutualization) Scheme 2005 of SEBI, with effect from August 19, 2005, BSE was incorporated as a company under the Companies Act, 1956. The equity shares of BSE were listed on NSE on February 3, 2017.

NSE

NSE was established by financial institutions and banks to provide nationwide online, satellite-linked, screen-based trading facilities with market-makers and electronic clearing and settlement for securities including government securities, debentures, public sector bonds and units. It has evolved over the years into its present status as one of the premier stock exchanges of India. NSE was recognised as a stock exchange under the SCRA in April 1993 and commenced operations in the wholesale debt market segment in June 1994. The capital market (equities) segment commenced operations in November 1994 and operations in the derivatives segment commenced in June 2000. Presently, the products on the exchange are organized into three assets classes for trading, namely (i) equity and equity-linked products such as stocks, IDRs, ETFs and units of closed ended mutual fund schemes, (ii) derivates and (iii) fixed income securities and debt products, including corporate bonds, sovereign gold bonds and other debt securities.

Internet-based Securities Trading and Services

Internet trading takes place through order routing systems, which route client orders to exchange trading systems for execution. Stockbrokers interested in providing this service are required to apply for permission to the relevant stock exchange and also have to comply with certain minimum conditions stipulated by SEBI. The NSE became the first exchange to grant approval to its members for providing internet-based trading services. Internet trading is possible on both the "equities" as well as the "derivatives" segments of the NSE.

Trading Hours

Trading on both the NSE and the BSE occurs from Monday to Friday, between 9:15 a.m. and 3:30 p.m. 1ST (excluding the 15 minutes pre-open session from 9:00 a.m. to 9:15 a.m.). The BSE and the NSE are closed on public holidays. The recognised stock exchanges have been permitted to set their own trading hours (in the cash and derivatives segments) subject to the condition that (i) the trading hours are between 9.00 a.m. and 5.00 p.m.; and (ii) the stock exchange has in place a risk management system and infrastructure commensurate to the trading hours.

Trading Procedure

In order to facilitate smooth transactions, the BSE replaced its open outcry system with BSE On-line Trading facility in 1995. This totally automated screen based trading in securities was put into practice nationwide. This has enhanced transparency in dealings and has assisted considerably in smoothening settlement cycles and improving efficiency in back-office work.

NSE has introduced a fully automated trading system called National Exchange for Automated Trading ("**NEAT**"), which operates on strict time/price priority besides enabling efficient trade. NEAT has provided depth in the market by enabling large number of members all over India to trade simultaneously, narrowing the spreads.

Depositories

The Depositories Act provides a legal framework for the establishment of depositories to record ownership details and effect transfer in book-entry form. Further, SEBI framed regulations in relation to the registration of such depositories, the registration of participants as well as the rights and obligations of the depositories, participants, companies and beneficial owners. The depository system has significantly improved the operation of the Indian securities markets.

RIGHTS OF UNITHOLDERS

The rights and interests of Unitholders are included in this Placement Document and the InvIT Regulations. Under the Amended and Restated Trust Deed and the Amended and Restated Investment Management Agreement, these rights and interests are safeguarded by the Trustee and the Investment Manager, respectively. Any rights and interests of Unitholders as specified in this Placement Document would be deemed to be amended to the extent of any amendment to the InvIT Regulations.

Beneficial Interest

Each Unit represents an undivided beneficial interest in IndiGrid. A Unitholder has no equitable or proprietary interest in the InvIT Assets and is not entitled to any share in the transfer of the InvIT Assets (or any part thereof) or any interest in the InvIT Assets (or any part thereof) of IndiGrid. A Unitholder's right is limited to the right to require due administration of IndiGrid in accordance with the provisions of the Amended and Restated Trust Deed and the Amended and Restated Investment Management Agreement.

Ranking

No Unitholder of IndiGrid shall enjoy superior voting or any other rights over another Unitholder. Further, the Units of IndiGrid shall not have multiple classes. However, subordinate Units may be issued only to the Sponsor, its Associates and the Sponsor Group entities, where such subordinate units carry only such rights as mentioned under Regulation 4(2)(h) and Chapter IV A of the InvIT Regulations.

Grievance Redressal Mechanism

The Investment Manager shall ensure adequate and timely redressal of all Unitholders' grievances pertaining to the activities of the Trust and the Trustee shall periodically review the status of Unitholders' complaints and their redressal undertaken by the Investment Manager. The Stakeholders' Relationship Committee of the Investment Manager shall monitor the status of complaints and their redressal. The Investment Manager shall maintain records of the Unitholders' grievances and the actions taken thereon, including copies of correspondences made with the Unitholders and SEBI. For details, please see "*Corporate Governance*" on page 179.

Distribution

The Unitholders shall have the right to receive distribution in accordance with the InvIT Regulations and in the manner set forth in this Placement Document. For details, please see the section entitled "*Distribution*" on page 336.

Meeting of Unitholders

Meetings of Unitholders will be conducted in accordance with the InvIT Regulations.

Passing of resolutions

1. With respect to any matter requiring approval of the Unitholders:

    (i) a resolution shall be considered as passed when the votes cast by Unitholders, so entitled and voting, in favour of the resolution exceed a certain percentage as specified in the InvIT Regulations, of total votes cast;

    (ii) the voting threshold specified under the InvIT Regulations shall be calculated on the basis of Unitholders present and voting, unless otherwise specified. Further, The Unitholders voting through the electronic voting facility and postal ballot shall be counted for the determination of Unitholders present and voting;

    (iii) the voting may be done by postal ballot or electronic mode;

    (iv) a notice of not less than 21 days shall be provided to the Unitholders. However, a meeting of Unitholders may be called after giving shorter notice than 21 days, if consent, in writing or by electronic mode, is accorded thereto, (a) in case of an annual meeting, by not less than 95% of the Unitholders entitled to vote thereat, and (b) in case of any other meeting, by majority of the Unitholders in number entitled to vote thereat and who represent not less than 95% of such part of the units by value as gives a right to vote at the meeting;

    (v) voting by any Unitholder (including, the Sponsor in its capacity as a Unitholder), who is a related party in such transaction, as well as associates of such Unitholder(s) shall not be considered on the specific issue;

    (vi) the Investment Manager shall be responsible for all the activities pertaining to conducting of meeting of the Unitholder, subject to oversight by the Trustee. However, for issues pertaining to the Investment Manager, including a change in the Investment Manager, removal of Investment Manager or change in control of

Investment Manager; the Trustee shall convene and handle all activities pertaining to conduct of the meetings. Additionally, for issues pertaining to the Trustee, including change in Trustee, the Trustee shall not be involved in any manner in the conduct of the meeting; and

(vii) for all Unitholder meetings, the investment manager shall provide an option to the Unitholders to attend the meeting through video conferencing or other audio visual means and the option of remote electronic voting in the manner as may be specified by SEBI.

2. With respect to IndiGrid:

(i) an annual meeting of all Unitholders shall be held not less than once a year within 120 days from the end of each financial year and the time between two meetings shall not exceed 15 months;

(ii) with respect to the annual meeting of Unitholders,

(a) any information that is required to be disclosed to the Unitholders and any issue that, in the ordinary course of business, may require approval of the Unitholders may be taken up in the meeting including:

- latest annual accounts and performance of IndiGrid;
- approval of auditor and fee of such auditor, as may be required;
- latest valuation reports;
- appointment of valuer, as may be required; and
- any other issue;

(b) for any issue taken up in such meetings which require approval from the Unitholders, votes cast in favour of the resolution shall be more than 50% of the total votes cast for the resolution unless otherwise specified under the InvIT Regulations.

3. Notwithstanding generally of the foregoing, in case of the following, approval from the Unitholders shall be required for the following matters where the votes cast in favour of the resolution shall be more than 50% of the total votes cast for the resolution:

(i) any approval from the Unitholders required in terms of Regulation 18 (*Investment conditions and dividend policy),* Regulation 19 (*Related party transactions)* and Regulation 21 *(Valuation of assets*) of the InvIT Regulations;

(ii) any transaction, other than any borrowing, the value of which is equal to or greater than 25% of the InvIT Assets of IndiGrid;

(iii) any borrowing in terms of the limit specified under clause (a) of Regulation 20(3) of the InvIT Regulations;

(iv) any issue of Units after initial public offer by IndiGrid, in whatever form, other than any issue of Units which may be considered by SEBI, under Regulation 22(5) of the InvIT Regulations;

(v) increasing period for compliance with investment conditions to one year in accordance with Regulation 18(5)(c) of the InvIT Regulations;

(vi) any issue, in the ordinary course of business, which in the opinion of the Sponsor or the Trustee or the Investment Manager, is material and requires approval of the Unitholders, if any;

(vii) any issue for which SEBI or the designated stock exchanges requires approval.

4. In case of the following, approval from the Unitholders shall be required where the votes cast in favour of the resolution shall be at least 60% of total votes cast for the resolution:

(i) any change in the Investment Manager, including removal of the Investment Manager or change in control of the Investment Manager;

(ii) any material change in investment strategy or any change in the management fee of IndiGrid;

(iii) the Trustee and Investment Manager proposing to seek delisting of units of IndiGrid under the InvIT Regulations;

(iv) any issue, not in the ordinary course of business, which in the opinion of the Sponsor or Investment Manager or Trustee requires approval of the Unitholders;

(v) any issue for which SEBI or the designated stock exchanges require approval;

(vi) any issue taken up on request of the Unitholders including:

(a) removal of the Investment Manager and appointment of another investment manager to IndiGrid;

(b) removal of the Auditor and appointment of another auditor to IndiGrid;

(c) removal of the Valuer and appointment of another valuer to IndiGrid;

(d) delisting of IndiGrid, if the Unitholders have sufficient reason to believe that such delisting would act in the interest of the Unitholders;

(e) any issue which the Unitholders have sufficient reason to believe that is detrimental to the interest of the Unitholders;

(f) change in the Trustee if the Unitholders have sufficient reason to believe that acts of such Trustee is detrimental to the interest of the Unitholders;

(vii) introduction of unit based employee benefit scheme after an initial offer in the manner and form set out under the InvIT Regulations

With respect to the rights of the Unitholders under clauses 4(vi) above:

(i) not less than 25% of the Unitholders by value, other than any party related to the transactions and its associates, shall apply, in writing, to the Trustee for the purpose;

(ii) on receipt of such application, the Trustee shall require, with the Investment Manager to place the issue for voting in the manner as specified in the InvIT Regulations;

(iii) with respect to clause 4(vi)(f) above, not less than 60% of the Unitholders by value shall apply, in writing, to the Trustee for the purpose.

5. In case of any borrowing by an InvIT in terms of the limit specified Regulation 20(3)(b), the approval from 75% of the Unitholders by value shall be obtained.

6. No person, other than sponsor(s), its related parties and its associates, shall acquire units of IndiGrid which are taken together with units held by such person and by persons acting in concert with such person in IndiGrid, exceeds 25% of the value of outstanding Units unless approval from 75%. of the Unitholders by value excluding the value of Units held by parties related to the transaction, is obtained. If the required approval is not received, the person acquiring the units shall provide an exit option to the dissenting Unitholders to the extent and in the manner as may be specified by SEBI.

7. In case of any change in sponsor or inducted sponsor or change in control of sponsor or inducted sponsor or conversion to Self-Sponsored Investment Manager –

(i) prior to such change, approval from 75% per cent. of the Unitholders by value excluding the value of Units held by parties related to the transaction shall be obtained.

(ii) if the required approval is not received-

a) in case of change of sponsor or inducted sponsor, the proposed inducted sponsor shall provide the dissenting unit holders an option to exit by buying their units in the manner specified by SEBI;

b) in case of change in control of the sponsor or inducted sponsor, the said sponsor or inducted sponsor shall provide the dissenting unitholders an option to exit by buying their units in the manner specified by SEBI;

c) in case of conversion to Self-Sponsored Investment Manager, the Investment Manager shall provide the dissenting unit holders an option to exit by buying their units in the manner specified by SEBI. It is to be noted change in sponsor or inducted sponsor shall mean any change due to entry of a new sponsor or exit of an existing sponsor.

Information rights

The Investment Manager, on behalf of IndiGrid, shall also submit such information to the Stock Exchanges and Unitholders, on a periodical basis as may be required under the InvIT Regulations. The Investment Manager (on behalf of IndiGrid) shall disclose to the Stock Exchanges, Unitholders and SEBI, all such information and in such manner as specified under the InvIT Regulations and such other requirements as may be specified by SEBI. The Investment Manager, on behalf of IndiGrid, shall also provide disclosures or reports specific to the sector or sub-sector in which IndiGrid has invested or proposes to invest, in the manner as may be specified by SEBI. Further, SEBI has also notified an investor charter for InvITs, by way of its circular dated June 12, 2025, to amongst other things, enhance transparency for investors and Unitholders.

Nomination Rights

Unitholder(s), holding not less than 10% of the total outstanding Units, either individually or collectively, shall be entitled to nominate one director on the board of directors of the Investment Manager in accordance with the InvIT Regulations and the Amended and Restated Trust Deed, and in the manner specified by SEBI.

Buyback of Units

Any buyback of Units shall be in accordance with the Trust Deed and the InvIT Regulations.

De-listing of Units

Any delisting of Units shall be in accordance with the Trust Deed and the InvIT Regulations.

ISSUE INFORMATION

The following is a summary intended to present a general outline of the procedure relating to the bidding, application, payment of Application Amount, Allocation and Allotment of the Units pursuant to the Issue. The procedure followed in the Issue may differ from the one mentioned below and investors are assumed to have apprised themselves of the same from the Investment Manager or the Placement Agents. Investors are advised to inform themselves of any restrictions or limitations that may be applicable to them and are required to consult their respective advisers in this regard. Investors that apply in the Issue will be required to confirm, and will be deemed to have represented to us, the Trustee, the Investment Manager, the Placement Agents, the Parties to the Trust and their respective directors, officers, agents, affiliates and representatives, that they are eligible under all applicable law, rules, regulations and guidelines to acquire the Units in the Issue. Also see "Selling Restrictions" beginning on page 420. IndiGrid, the Investment Manager, the Trustee, the Placement Agents, the Parties to the Trust and their respective directors, officers, agents, advisors, affiliates and representatives accept no responsibility or liability for advising any investor on whether such investor is eligible to bid for, acquire or hold the Units in the Issue. The Trustee and the Investment Manager are acting on behalf of IndiGrid.

IndiGrid, the Investment Manager, the Trustee, the Placement Agents and their respective directors, officers, agents, advisors, affiliates and representatives are not liable for any amendment or modification or change to applicable laws or regulations, which may occur after the date of this Placement Document. Investors are advised to make their independent investigations and satisfy themselves that they are Eligible Investors and are eligible to apply in the Issue. Eligible Investors are advised to ensure that any single Bid from them does not exceed the investment limits or maximum number of Units that can be held by them under applicable law or regulation or as specified in the Preliminary Placement Document or this Placement Document. Further, Eligible Investors shall be solely responsible for compliance with applicable securities laws, including the SEBI Insider Trading Regulations and the Policy on Unpublished Price-Sensitive Information and dealing in Units by the Parties to the Trust, other applicable law and dealing in securities of IndiGrid.

Authority for the Issue

THE PRELIMINARY PLACEMENT DOCUMENT AND THIS PLACEMENT DOCUMENT RELATE TO AN ISSUE BEING MADE ONLY TO ELIGIBLE INVESTORS AND NO OFFER IS BEING MADE TO THE PUBLIC OR TO ANY OTHER CLASS OF INVESTORS.

The Preliminary Placement Document and this Placement Document has not been, and will not be, filed as a prospectus with SEBI and, no Units will be offered in India or overseas to the public or any members of the public or any other class of investors, other than Eligible Investors.

The Issue is being made to Eligible Investors in reliance upon the Master Circular and the InvIT Regulations, through the mechanism of an institutional placement. IndiGrid is eligible to undertake the Issue under Master Circular and the InvIT Regulations.

The Preliminary Placement Document and this Placement Document are private documents provided only to select Eligible Investors. Please note that if you did not receive a serially numbered copy of the Preliminary Placement Document addressed to you, you may not rely on the Preliminary Placement Document or this Placement Document uploaded or to be uploaded, as applicable, on the website of the Stock Exchanges or IndiGrid, with a disclaimer to the effect that it is in connection with an institutional placement and that no offer is being made to the public or to any other category of investors, for making an application to subscribe to Units pursuant to the Issue.

The Issue was authorized and approved by the Board of Directors of the Investment Manager by way of their resolutions dated October 10, 2025 and December 8, 2025 and approved by the Unitholders by way of their resolution dated December 29, 2025 in accordance with the InvIT Regulations and Master Circular.

Units being Allotted pursuant to the Issue shall not be sold for a period of one year from the date of Allotment, except on a recognized stock exchange.

The Units offered in the Issue have not been and will not be registered under the U.S. Securities Act or any other applicable law of the United States and, unless so registered, may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Units are being offered and sold outside the United States in "offshore transactions" as defined in and in reliance on Regulation S and the applicable laws of the jurisdictions where such offers and sales are made. For further information, please see the section entitled "*Selling Restrictions*" on page 420.

The Units have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The Investment Manager has filed a copy of the Preliminary Placement Document and this Placement Document with each of the Stock Exchanges. The Trust has received in-principle approval from each of the Stock Exchanges under the Master Circular pursuant to the letters dated January 19, 2026.

After the Allotment of Units pursuant to the Issue, the Investment Manager shall make applications to the Stock Exchanges for the listing approvals. Subsequently, after the credit of Units to the beneficiary accounts of the Allottees, the Investment Manager shall make applications to the Stock Exchanges for the final trading approvals.

Issue Procedure

This Issue is being conducted in accordance with applicable law, in relation to the Allotment of Units under this Issue, IndiGrid is not in violation of any applicable law, including but not limited to the Securities and Exchange Board of India (Prohibition of Insider Trading) Regulations, 2015, as amended and the Securities and Exchange Board of India (Prohibition of Fraudulent and Unfair Trade Practices relating to Securities Market) Regulations, 2003, as amended. It is further represented by IndiGrid, the Investment Manager and the Sponsor that any and all information provided by IndiGrid, the Investment Manager or the Sponsor and/or their respective agents and/or advisors, to any of the Eligible Investors, in relation to this Issue and/or the Allocation and Allotment of Units under this Issue and/or any information in relation to the Trust, its Portfolio Assets, the Project Managers and/or their respective business and operations is (i) available in the public domain; and/or (ii) have been disclosed in this Placement Document.

1. On the Issue Opening Date, the Investment Manager and the Placement Agents have circulated serially numbered copies of the Preliminary Placement Document and the serially numbered Application Form, either in electronic or physical form, to Eligible Investors and the Application Form was specifically addressed to each such Eligible Investor. The Placement Agents have maintained a record of the Eligible Investors to whom a serially numbered Preliminary Placement Document and Application Form has been dispatched. The list of Eligible Investors to whom the Preliminary Placement Document and the Application Form were delivered was determined by the Investment Manager in consultation with the Placement Agents and recorded in writing by the Investment Manager.

2. **Unless a serially numbered Preliminary Placement Document along with the serially numbered Application Form, which includes the details of the bank account where the Application Amount is to be deposited, was addressed to a particular Eligible Investor, no invitation to make an offer to subscribe shall be deemed to have been made to such Eligible Investor.** Even if such documentation were to come into the possession of any person other than the intended recipient, no offer or invitation to offer shall be deemed to have been made to such person and any application that does not comply with this requirement shall be treated as invalid.

3. Eligible Investors were required to submit the Application Form, including any revisions thereof along with the Application Amount and a copy of the PAN card or PAN allotment letter, during the Issue Period to the Placement Agents.

4. Bidders were required to indicate the following in the Application Form:

   - full official name of the Bidder to whom Units are to be Allotted, complete address, phone number, PAN, e-mail address and bank account details;
   - number of Units Bid for;
   - category to which they belong to, as indicated in the Application Form;
   - price at which they are agreeable to subscribe for the Units and the aggregate Application Amount for the number of Units Bid for;
   - details of the depository account to which the Units should be credited;
   - a representation that such person is an "Institutional Investor" in terms of the InvIT Regulations;
   - agreement to certain other representations set forth in the Application Form and the Preliminary Placement Document;
   - eligible FPIs are required to indicate their SEBI FPI registration number in the Application Form; and
   - a representation that they are outside the United States and acquiring the Units in an "offshore transaction" as defined in and in reliance on Regulation S and the applicable laws of the jurisdictions where such offers and sales are made, and they have agreed to certain other representations set forth in the section entitled "*Notice to Investors*" on page 9, and certain other representations made in the Application Form.

5. Each Bidder was required to make the entire payment of the Application Amount for the Units Bid for, along with the Application Form, only through electronic transfer to the Escrow Account within the Issue Period as specified in the Application Form sent to the respective Bidders. Please note that any payment of Application Amount for the Units was required to be made from the bank accounts of the relevant Bidders and the Investment Manager has kept a record of the bank account from where such payment has been received. Application Amount payable on Units to be held by joint holders were to be paid from the bank account of the person whose name appears first in the Application Form. Pending Allotment, the Trustee and the Investment Manager has ensured that the Application Amount received for subscription of the Units is kept in a separate bank account in the name of IndiGrid and shall only be utilized for adjustment against allotment of Units or refund of money to the Bidders till the time such Units

are listed. Notwithstanding the above, in the event, among others, a Bidder is not Allocated Units in the Issue, or a Bidder withdraws the Bid prior to the Issue Closing Date or the number of Units Allocated to the Bidder is lower than the number of Units applied for through the Application Form and towards which Application Amount has been paid by such Bidder, or the Application Amount is in excess of the amount equivalent to the product of the Units that have been Allocated to the Bidder and the Issue Price, the excess Application Amount will be refunded to the same bank account from which it was remitted, in the form and manner set out in "- *Refunds*" below.

6. Once a duly completed Application Form is submitted by a Bidder and the Application Amount is transferred to the Escrow Account, such Application Form constitutes an irrevocable offer and the Bid cannot be withdrawn or revised downwards after the Issue Closing Date. The Issue Closing Date shall be notified to the Stock Exchanges and the Eligible Investors shall be deemed to have been given notice of such date after receipt of the Application Form.

7. The Bids made by asset management companies or custodians of Mutual Funds were required to specifically state the names of the concerned schemes for which the Bids are made. In case of a Mutual Fund, a separate Bid could have been made in respect of each scheme of the Mutual Fund registered with SEBI.

8. Each eligible FPI was required to submit a separate Application Form.

9. Upon receipt of the duly completed Application Form and the Application Amount in the Escrow Account, after the Issue Closing Date, the Investment Manager has, in consultation with the Placement Agents, determined the final terms, including the Issue Price of the Units to be issued pursuant to the Issue and Allocation and the successful Bidders to whom such Units have been Allocated.

10. Upon such determination, the Placement Agents, on behalf of IndiGrid, will send serially numbered CANs, along with this serially numbered Placement Document to the successful Bidders who have been Allocated Units in the Issue. The dispatch of a CAN, and this Placement Document (when dispatched) to a successful Bidder shall be deemed a valid, binding and irrevocable contract for successful Bidders to subscribe to the Units Allocated to such Bidders at an aggregate price equal to the product of the Issue Price and Units Allocated to such Bidders. The CAN shall contain details such as the number of Units Allocated to the successful Bidders, Issue Price and the aggregate amount received towards the Units Allocated. **Please note that the Allocation will be at the absolute discretion of the Investment Manager in consultation with the Placement Agents. The Placement Agents, the Investment Manager, the Trustee, and their respective directors, officers, employees, affiliates and, associates shall not take any responsibility for acts, mistakes, errors, omissions and commissions in relation to Applications. Please note that none of the Investment Manager, the Trustee or the Placement Agents shall be responsible for delay in the receipt of the Application Form not attributable to them or electronic transmission delays or failures, or if the Application Forms are delayed or misplaced in the transit.**

11. Upon dispatch of the serially numbered Placement Document, the Investment Manager shall Allot Units as per the details in the CANs sent to successful Bidders. The Investment Manager will inform the Stock Exchanges of the details of the Allotment.

12. After passing the resolution for Allotment and prior to the credit of Units into the beneficiary account of the successful Bidders maintained by the depository participant, the Investment Manager shall apply to the Stock Exchanges for listing approvals in respect of the Units Allotted pursuant to the Issue.

13. After receipt of the listing approvals from the Stock Exchanges, the Investment Manager shall ensure credit of the Units Allotted pursuant to the Issue into the beneficiary accounts of the respective Allottees.

14. The Investment Manager will then apply for the final trading approvals from the Stock Exchanges.

15. The Units that would have been credited to the beneficiary account with the Depository Participant of the successful Bidders shall be eligible for trading on the Stock Exchanges only upon the receipt of final trading and listing approvals from the Stock Exchanges.

16. As per applicable law, the Stock Exchanges will notify the final listing and trading approvals, which are ordinarily available on their websites, and the Investment Manager may communicate the receipt of the listing and trading approvals to the Allottees. The Investment Manager, IndiGrid, the Trustee and the Placement Agents shall not be responsible for any delay or non-receipt of the communication of the final trading and listing permissions from the Stock Exchanges or any loss arising from such delay or non-receipt. Investors are advised to apprise themselves of the status of the receipt of the permissions from the Stock Exchanges.

17. The Bid Amounts will be transferred to the account of IndiGrid only after receipt of the final listing and trading approvals for the Units from the Stock Exchanges.

Institutional Investors

Only Eligible Investors are eligible to invest in the Units pursuant to the Issue. Currently, Eligible Investors, who are eligible to participate in the Issue are:

- family trust and intermediary registered with SEBI, having a net worth of more than ₹ 5,000 million, as per the latest audited financial statements;

- qualified institutional buyer as defined in the SEBI ICDR Regulations consisting of the following:

  a) a mutual fund, venture capital fund, alternative investment fund and foreign venture capital investor registered with the SEBI;
  b) a foreign portfolio investor other than individuals, corporate bodies and family offices;
  c) a public financial institution;
  d) a scheduled commercial bank;
  e) a multilateral and bilateral development financial institution;
  f) a state industrial development corporation;
  g) an insurance company registered with the Insurance Regulatory and Development Authority of India;
  h) a provident fund with minimum corpus of ₹25 crore;
  i) a pension fund with minimum corpus of ₹25 crore registered with the Pension Fund Regulatory and Development Authority established under section 3(1) of the Pension Fund Regulatory and Development Authority Act, 2013;
  j) National Investment Fund set up by resolution no. F. No. 2/3/2005-DDII dated November 23, 2005 of the Government of India published in the Gazette of India;
  k) insurance funds set up and managed by army, navy or air force of the Union of India;
  l) insurance funds set up and managed by the Department of Posts, India;
  m) systemically important non-banking financial companies; and
  n) accredited investors as defined in regulation 2(1)(ab) of the Securities and Exchange Board of India (Alternative Investment Funds) Regulations, 2012, for the limited purpose of their investment in Angel Funds registered with the Board, under the Securities and Exchange Board of India (Alternative Investment Funds) Regulations, 2012.

subject to such Eligible Investors not being excluded pursuant to the Master Circular.

No allotment will be made, either directly or indirectly, to the Sponsor or the Investment Manager, or any institutional investor who is a person related to, or related party or associate of, the Sponsor or the Investment Manager. Provided that Allotment may be made to the Sponsor for un-subscribed portion of Units in the Issue, subject to the fulfilment of the conditions set out in the Master Circular.

All Non-Resident Investors should note that, in accordance with the Foreign Exchange Management (Non-debt Instruments) Rules, 2019, as amended, including Press Note No.3 (2020 Series), dated April 17, 2020 issued by the DPIIT, where the beneficial owner of a proposed investment into India is situated in or is a citizen of a country that shares land border with India (but is not a multilateral bank or fund of which India is a member), approval of the Government will be required prior to such investment.

Eligible FPIs are permitted to participate in the Issue in accordance with the FEMA Rules read with applicable provisions of the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 and other applicable foreign exchange laws and such other terms and conditions as may be prescribed by the SEBI from time to time.

Investors may be subject to adverse foreign, state or local tax or legal consequences as a result of trading in the Units. Investors who intend to trade in the Units should consult their tax advisor or stock broker regarding any cost, applicable taxes, charges and expenses (including brokerage) that may be levied for trading in Units. The Placement Agents, the Trustee and the Investment Manager accept no responsibility to bear or pay any cost, applicable taxes, charges and expenses (including brokerage), and such costs will be incurred solely by the Bidders.

Investors are requested to strictly adhere to these instructions. Failure to do so could result in an Application being rejected, with the Investment Manager, the Trustee, the Placement Agents and the Registrar not having any liability to the Bidders.

Bids by FPIs

Foreign Portfolio Investors are permitted to participate in the Issue subject to compliance with Schedule II and Schedule VIII of FEMA Rules read with the applicable provisions of the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019, as amended, and such other terms and conditions as may be prescribed by SEBI from time to time. In case of Bids by FPIs the payment should be paid as inward remittance from abroad through banking channels or out of funds held in NRE, SNRR or FCNR(B) account maintained in accordance with the Foreign Exchange Management (Deposit) Regulations, 2016, along with documentary evidence in support of the remittance. In case of Bids made by FPIs, a verified true copy of the certificate of registration issued by the designated depository participant under the SEBI FPI Regulations was required to be attached along with the Application Form, failing which the Investment Manager, in consultation with the Placement Agents, reserves the right to reject the Bid.

It is hereby clarified that bids received from FPIs bearing the same PAN shall be treated as multiple Bids and are liable to be rejected, except for Bids from FPIs that utilize the multiple investment manager structure in accordance with the operational guidelines for FPIs and designated Depository Participants issued to facilitate implementation of SEBI FPI Regulations (such structure referred to as "**MIM Structure**"), provided such Bids have been made with different beneficiary account numbers, Client IDs and DP IDs. Accordingly, it should be noted that multiple Bids received from FPIs, who do not utilize the MIM Structure, and bear the same PAN, are liable to be rejected. In order to ensure valid Bids, FPIs making multiple Bids using the same PAN, and with different beneficiary account numbers, Client IDs and DP IDs, were required to provide a confirmation in the Application Forms that the relevant FPIs making multiple Bids utilize the MIM Structure. In the absence of such confirmation from the relevant FPIs, such multiple Bids shall be rejected.

Please note that, the maximum Bid by any Bidder should not exceed the investment limits prescribed for them under applicable laws. Further, multiple Bids by a FPI Bidder utilising the MIM Structure shall be aggregated for determining the permissible maximum Bid. Further, please note that, Application Forms are liable to be rejected in the event that the Bid in the Application Form "exceeds the Issue size and/or investment limit or maximum number of Units that can be held under applicable laws or regulations or maximum amount permissible under applicable laws or regulations, or under the terms of the Preliminary Placement Document".

Bids by SEBI registered VCFs and AIFs

The SEBI VCF Regulations prescribe, amongst others, the investment restrictions on VCFs registered with SEBI under the said regulations. Further, the SEBI AIF Regulations prescribe, amongst others, the investment restrictions on AIFs. Further, VCFs which have not re-registered as an AIF under the SEBI AIF Regulations shall continue to be regulated by the SEBI VCF Regulations until the existing fund or scheme managed by the fund is wound up and such funds shall not launch any new scheme after the notification of the SEBI AIF Regulations. Additionally, VCFs and AIFs are subject to certain investment restrictions, including with respect to the percentage of investible funds held in each investee entity. Under the SEBI AIF Regulations, Category I and II AIFs are permitted to invest not more than 25% of the investable funds in one "investee company" (which includes the Trust) and Category III AIFs are permitted to invest not more than 10% of the investable funds in one "Investee company". Allotments made to VCFs and AIFs in the Issue are subject to the rules and regulations that are applicable to each of them respectively.

Bids by Banking Companies

Bids may be made by banks as permitted by the RBI and are subject to conditions specified in the Prudential Guidelines – Banks' investment in units of REITs and InvITs dated April 18, 2017. In case of Bids made by banking companies registered with the RBI, certified copies of (i) the certificate of registration issued by the RBI, and (ii) the approval of such banking company's investment committee are required to be attached to the Application Form. Banks may participate in public issuances by Trusts within the overall ceiling of 20% of their net worth permitted for direct investments in shares, convertible bonds/ debentures, units of equity-oriented mutual funds and exposures to VCFs, subject to the following conditions: (i) Banks should put in place a board approved policy on exposures to the Trust which lays down an internal limit on such investments within the overall exposure limits in respect of the real estate sector and infrastructure sector; (ii) Banks shall not invest more than 10% of the unit capital of the Trust; (iii) Banks should ensure adherence to the prudential guidelines issued by RBI from time to time on Equity investments by Banks, Classification and Valuation of Investment Portfolio, Basel III Capital requirements for Commercial Real Estate Exposures and Large Exposure Framework, as applicable. Failing this, the Investment Manager, in consultation with the Placement Agents, reserves the right to reject the Bid.

Bids by Provident Funds/ Pension Funds

On March 2, 2015, the Ministry of Finance issued a notification allowing investments by non-government provident funds, superannuation funds and gratuity funds up to 5% in infrastructure investment trusts, as specified. On May 29, 2015, the Ministry of Labour and Employment issued a notification allowing investments by provident funds up to 5% in infrastructure investment trusts, as specified. The Pension Fund Regulatory and Development Authority issued circulars dated June 3, 2015 and September 2, 2015, respectively, allowing investments by national pension funds up to 5% in infrastructure investment trusts, as specified. However, such investments by provident funds and pension funds will be subject to, amongst others, the sponsor having a minimum of AA or equivalent rating from at least two credit rating agencies registered with SEBI. In case of Bids made by provident funds/ pension funds (registered with the Pension Fund Regulatory and Development Authority established under section 3(1) of the Pension Fund Regulatory and Development Authority Act, 2013), subject to applicable laws, with minimum corpus of ₹ 250 million, a certified copy of certificate from a chartered accountant certifying the corpus of the provident fund/pension fund must have been attached to the Application Form. Failing this, the Bid(s) may be rejected.

Bids by NPS Schemes

The Pension Fund Regulatory and Development Authority ("**PFRDA**") has issued circulars allowing investments by national pension fund schemes (other than corporate central government schemes, corporate state government schemes, central government sector schemes, state government sector schemes, NPS Lite Schemes of NPS and Atal Pension Yojana schemes) ("**Non- Govt. NPS Schemes**") and corporate central government schemes, corporate state government schemes, central government sector schemes, state government sector schemes, NPS Lite Schemes of NPS and Atal Pension Yojana schemes ("**Govt. NPS Schemes**" and together with the Non-Govt NPS Schemes, the "**NPS Schemes**") to invest in units of infrastructure investment trusts that are listed or proposed to be listed. The cumulative investment in units and debt instruments of InvITs and REITs by NPS Schemes is not permitted to exceed 3% of the assets under management of the relevant pension fund at any time. Non-Govt. NPS Schemes are also not permitted to invest more than 5% of the units issued by a single InvIT. Such investment will be subject to, amongst other conditions, (i) for Govt. NPS Schemes, the units being rated AAA (or equivalent) in the applicable rating scale of the InvIT from at least two credit rating agencies registered with SEBI ("**CRAs**") and the rating of the sponsor floating the trust being AAA (or equivalent) in the applicable rating scale of the InvIT from at least two CRAs, and (ii) for Non-Govt. NPS Schemes, such securities being rated AA (or equivalent) in the applicable rating scale of the InvIT from at least two CRAs In case of Bids made by NPS Schemes, with minimum corpus of ₹ 250 million, a certified copy of certificate from a chartered accountant certifying the corpus of the provident fund/pension fund must have been attached to the Application Form, failing which, the Investment Manager, in consultation with the Placement Agents, reserves the right to reject the Bid.

Bids by Mutual Funds

Bids may be made by mutual funds under all its schemes, existing and future, subject to the investment conditions and other restrictions prescribed under the Securities and Exchange Board of India (Mutual Funds) Regulations, 1996 (including, the circular on mutual funds dated July 27, 2024 and any other circulars, notifications and guidelines issued thereunder). A mutual fund may invest in the Units subject to the following:

(a) No mutual fund under all its schemes shall own more than 10% of the units; and
(b) A mutual fund scheme shall not invest:
    (i) more than 10% of its net asset value in the units issued by InvIT; and
    (ii) More than 5% of its net asset value in the units,

provided that the limits mentioned in sub-clauses (i) and (ii) above shall not be applicable for investments in case of index fund or sector or industry specific scheme pertaining to Trusts.

Bids by Insurance Companies

Bids may be made by insurance companies as permitted by the Insurance Regulatory and Development Authority of India in terms of the Master Circular – Investments, 2016 and the circular issued by the IRDAI titled 'Investment in Units of Real Estate Investment Trusts (REIT) & Infrastructure Investment Trusts (InvIT)' and dated March 14, 2017 and the circular issued by the IRDAI entitled Investments in Debt Securities of InvITs and REITs dated April 22, 2021. In case of Bids made by insurance companies registered with the IRDAI, a certified copy of the certificate of registration issued by IRDAI must have been attached to the Bid cum Application Form. Failing this, the Investment Manager, in consultation with the Placement Agents, reserves the right to reject the Bid. An insurer can invest not more than 3% of respective fund size of the insurer or not more than 5% of the units issued by a single InvIT, whichever is lower.

Bids under Power of Attorney

In case of Bids made pursuant to a power of attorney by Institutional Investors, a certified copy of the power of attorney or the relevant resolution or authority, as the case may be, along with a certified copy of the memorandum of association and articles of association and/or bye laws must have been submitted along with the Application Form. Failing this, the Investment Manager, in consultation with the Placement Agents, reserves the right to reject the Bid.

The Investment Manager, in consultation with the Placement Agents, in its absolute discretion, reserves the right to relax the above condition of simultaneous submission of the power of attorney along with the Application Form.

Allotments, if any, made to FVCIs, VCFs and AIFs in the Issue are subject to the respective rules and regulations that are applicable to each of them.

Note: *Affiliates or associates of the Placement Agents who are Eligible Investors may participate in the Issue in compliance with applicable law.*

Maximum and Minimum Bid Size

(i) Each Bidder was required to Bid for a minimum bid size in accordance with the InvIT Regulations and the Master Circular.

(ii) No Bidder should have Bid for that number of Units which exceeds the Issue Size.

The Sponsor, the Investment Manager, the Trustee and the Placement Agents shall not liable for any amendment, modification or change in applicable law which occurs after the date of the Preliminary Placement Document and this Placement Document. Eligible Investors are advised to make their independent investigations and satisfy themselves that they were eligible to apply in this Issue. Eligible Investors are advised to ensure that any single application from them does not exceed the investment limits or maximum number of Units that can be held by them under applicable law or regulation or as specified in the Preliminary Placement Document and this Placement Document.

Restriction on Allotment

Pursuant to the Master Circular, allotment in the Issue shall not be made to an institutional investor who is a "sponsor" or "investment manager", each as defined under the InvIT Regulations, of the Trust or to a person related to, a related party or associate (as defined under the InvIT Regulations) of any of the Sponsor or the Investment Manager, provided that allotment of units can be made to the Sponsor for un-subscribed portion in the institutional placement subject to following conditions:

a. at least ninety percent of the issue size has been subscribed;
b. objects of the issue is acquisition of assets from that sponsor;
c. units allotted to sponsor shall be locked in accordance with the Master Circular;
d. unitholders approval shall be taken for unsubscribed portion being allotted to sponsor.

No Allotment shall be made pursuant to Bids submitted by Eligible Investors such that the Bid or subscription to the Units by the investor would result in acquisition of Units which, taken together with Units already held by such investor and any person acting in concert with such investor in IndiGrid, would exceed 25% of the value of the outstanding units of the Trust.

The Trustee, or the Valuer or an employee of the Valuer involved in the valuation of the Portfolio Assets or the assets proposed to be acquired out of the proceeds of the Issue are not permitted to invest in the Units.

Affiliates or associates of the Placement Agents, who are Eligible Investors, may participate in the Issue in compliance with applicable laws.

Bid Process

Application Form

Eligible Investors were required to only use the serially numbered Application Forms (which are addressed to them) supplied by the Placement Agents in either electronic form or by physical delivery for the purpose of making a Bid (including revision of a Bid) in terms of this Placement Document.

By making a Bid (including any revision thereof) for Units through Application Forms and pursuant to the terms of the Preliminary Placement Document and this Placement Document, the Eligible Investors will be deemed to have made the following representations, warranties, acknowledgements, and undertakings given or made under the sections entitled "*Notice to Investors*" and "*Selling Restrictions*" on pages 9 and 420, respectively:

- The Eligible Investor confirms that it is an Institutional Investor and is not prohibited under the Master Circular from participating in the Issue, has a valid and existing registration under the applicable law in India (to the extent applicable) and is eligible to participate in the Issue;
- The Eligible Investor acknowledges that it has no right to withdraw or revise its Bid after the Issue Closing Date;
- The Eligible Investor confirms that if Units are Allotted through the Issue, it shall not, for a period of one year from Allotment, sell such Units otherwise than on the Stock Exchanges;
- The Eligible Investor confirms that it was and is eligible to Bid and hold Units so Allotted together with any Units already held by it prior to the Issue. The Eligible Investor further confirms that its holding of the Units, does not and shall not, exceed the level permissible as per any applicable law applicable to the Eligible Investor;
- The Eligible Investor agrees that although the Application Amount was required to be paid by it along with the Application Form within the Issue Period, the Investment Manager (on behalf of IndiGrid) reserves the right to Allocate and Allot Units pursuant to the Issue on a discretionary basis in consultation with the Placement Agents. The Eligible Investor further acknowledges and agrees that the payment of Application Amount does not guarantee Allocation and/or Allotment of Units Bid for in full or in part;
- The Eligible Investor confirms that the Bid submitted by it or its subscription to the Units will not result in acquisition of Units which taken together with Units already held by it and any person acting in concert with it in IndiGrid

exceeding 25% of the value of the outstanding units of IndiGrid;

- The Eligible Investor confirms that it is outside the United States, and is acquiring the Units in an "offshore transaction" as defined in and in reliance on Regulation S and the applicable laws of the jurisdictions where such offers and sales are made, and is not our affiliate or a person acting on behalf of such an affiliate; and
- The Eligible Investor confirms that it shall not undertake any trade in the Units credited to its beneficiary account maintained with the Depository Participant until such time that the final listing and trading approvals for the Units are issued by the Stock Exchanges.

Further, in accordance with Press Note No. 3 (2020 Series), dated April 17, 2020, issued by the Department for Promotion of Industry and Internal Trade, Government of India, together with the FEMA Rules, investments where the beneficial owner of the Units is situated in or is a citizen of a country which shares land border with India, can only be made through the Government approval route, as prescribed in the FEMA Rules.

ELIGIBLE INVESTORS WERE REQUIRED TO PROVIDE THEIR NAME, E-MAIL ID, BENEFICIARY ACCOUNT DETAILS/ DEMAT ACCOUNT, PAN, NATIONALITY, DEPOSITORY PARTICIPANT'S NAME, COMPLETE ADDRESS, DEPOSITORY PARTICIPANT IDENTIFICATION NUMBER AND BENEFICIARY ACCOUNT NUMBER IN THE APPLICATION FORM. ELIGIBLE INVESTORS WERE REQUIRED TO ENSURE THAT THE NAME GIVEN IN THE APPLICATION FORM IS EXACTLY THE SAME AS THE NAME IN WHICH THEIR BENEFICIARY ACCOUNT/ DEMAT ACCOUNT IS HELD.

IF SO REQUIRED BY THE PLACEMENT AGENTS, THE ELIGIBLE INVESTORS SUBMITTING A BID, ALONG WITH THE APPLICATION FORM, WERE ALSO REQUIRED TO SUBMIT REQUISITE DOCUMENT(S) TO THE PLACEMENT AGENTS TO EVIDENCE THEIR STATUS AS AN "INSTITUTIONAL INVESTOR" AS SET OUT ABOVE.

IF SO REQUIRED BY THE PLACEMENT AGENTS, ESCROW COLLECTION BANK OR ANY STATUTORY OR REGULATORY AUTHORITY IN THIS REGARD, INCLUDING AFTER ISSUE CLOSURE, THE ELIGIBLE INVESTORS SUBMITTING A BID AND/OR BEING ALLOTTED UNITS IN THE ISSUE, WILL ALSO HAVE TO SUBMIT REQUISITE DOCUMENT(S) TO FULFILL THE KNOW YOUR CUSTOMER (KYC) NORMS.

Demographic details such as address and bank account will be obtained from the Depositories as per the Depository Participant account details provided in the Application Form.

The submission of an Application Form and payment of the Application Amount pursuant to the Application Form by a Bidder were deemed a valid, binding and irrevocable offer for such Bidder to pay the entire Issue Price for the Units that may be Allotted to such Bidder and shall become a binding contract on a successful Bidder upon issuance of the CAN and this Placement Document (when dispatched) by the Investment Manager in favour of the successful Bidder.

Instructions for completing the Application Form

Bidders may note that forms not filled completely or correctly as per instructions provided in thethe Preliminary Placement Document and the Application Form are liable to be rejected. The Bids were required to adhere to the following:

(i) Bids must have been made only in the prescribed Application Form;

(ii) Application Form must have been completed in full, in BLOCK LETTERS in ENGLISH and in accordance with the instructions contained herein and in the Application Form. Incomplete Application Forms are liable to be rejected. Bidders were required to provide details of valid and active DP ID, Client ID and PAN clearly and without error. Invalid accounts, suspended accounts or where such account is classified as invalid or suspended shall not be considered for Allotment. Bidders should note that the Placement Agents and the Investment Manager will not be liable for errors in data entry due to incomplete or illegible Application Forms; and

(iii) Bidders were required to sign the Application Form. Bidders were required to ensure that the thumb impressions and signatures other than in the languages specified in the Eighth Schedule to the Constitution of India, are attested by a Magistrate or a Notary Public or a Special Executive Magistrate under official seal.

Submission of Application Form

All Application Forms were required to be duly completed with information including the number of Units applied for along with payment and a copy of the PAN card or PAN allotment letter. Additionally, the Application Form included details of the relevant Escrow Account into which the Application Amounts will have to be deposited. The Application Amount was required to be deposited in the Escrow Account as is specified in the Application Form and the Application Form was required to be submitted to the Placement Agents and/or the Investment Manager either through electronic form or through physical delivery at any of the following addresses:

The Placement Agents, the Trustee and the Investment Manager shall not be required to provide any written acknowledgement of the receipt of the Application Form and the Application Amount.

All Bidders submitting a Bid in the Issue were required to pay the entire Application Amount during the Issue Period.

Payment of Application Amount

The Investment Manager has opened the Escrow Account (designated as "INDIGRID INFRASTRUCTURE TRUST INSTITUTIONAL PLACEMENT ESCROW ACCOUNT") with the Escrow Collection Bank, in terms of the Escrow Agreement. Bidders were required to deposit the entire Application Amount payable for the Units applied for through the Application Form submitted by it in accordance with the applicable laws.

Payments were to be made only through electronic fund transfer.

Payments through cheque, demand draft or cash shall be rejected.

If the payment was not made favouring the Escrow Account within the Issue Period stipulated in the Application Form, the Bid is liable to be rejected.

Permanent Account Number or PAN

Each Bidder was required mention its PAN allotted under the Income Tax Act, 1961 in the Application Form. Applications without this information will be considered incomplete and are liable to be rejected, except from Bidders which are not required to hold a PAN under applicable law. Bidders should not submit the GIR number instead of the PAN as the Application Form is liable to be rejected.

Bank Account Details

Each Bidder was required to mention the details of the bank account from which the payment of Application Amount has been made along with confirmation that such payment has been made from such account.

Pricing and Allocation

Build-up of the Book

The Eligible Investors were required to submit their Bids (including any revision thereof) through the Application Forms within the Issue Period to the Placement Agents. Such Bids cannot be withdrawn or revised after the Issue Closing Date. The book shall be maintained by the Placement Agents.

Price Determination and Allocation

The Investment Manager, in consultation with the Placement Agents, has determined the Issue Price in accordance with the Master Circular. The Issue Price is at or above the Floor Price. However, the Investment Manager (on behalf of the Trust), in consultation with the Placement Agents, has offered a discount of approximately 2.64% on the Floor Price in terms of Master Circular or other provisions of law as approved by the Unitholders at their meeting on December 29, 2025.

After finalisation of the Issue Price, the Investment Manager has updated the Preliminary Placement Document with the Issue Price details and filed this Placement Document with the Stock Exchanges.

Method of Allocation

The Investment Manager has determined the Allocation in consultation with the Placement Agents on a discretionary basis in accordance with the allocation methodology approved by the board of directors of the Investment Manager and in compliance with InvIT Regulations and Master Circular. After finalization of the Allocation, the Investment Manager has updated the Preliminary Placement Document with the Issue details and filed this Placement Document with the Stock Exchanges, and dispatched the CAN, together with a serially numbered Placement Document to each successful Bidder.

Bids received from the Bidders at or above the Issue Price shall be grouped together to determine the total demand. The Allocation to all such Bidders has been made at the Issue Price.

THE DECISION OF THE INVESTMENT MANAGER IN CONSULTATION WITH THE PLACEMENT AGENTS IN RESPECT OF ALLOCATION SHALL BE FINAL AND BINDING ON ALL ELIGIBLE INVESTORS. ELIGIBLE INVESTORS MAY NOTE THAT ALLOCATION OF UNITS IS AT THE SOLE AND ABSOLUTE DISCRETION OF THE INVESTMENT MANAGER IN CONSULTATION WITH THE PLACEMENT AGENTS AND ELIGIBLE INVESTORS MAY NOT RECEIVE ANY ALLOCATION EVEN IF THEY HAVE SUBMITTED VALID APPLICATION FORMS AND PAID THE ENTIRE APPLICATION AMOUNT AT OR ABOVE THE ISSUE PRICE. NEITHER THE INVESTMENT MANAGER NOR THE PLACEMENT AGENTS ARE OBLIGED TO ASSIGN ANY REASON FOR ANY NON-ALLOCATION.

Confirmation of Allocation Note or CAN

Based on receipt of the Application Forms and Application Amount, the Investment Manager, in consultation with the Placement Agents, in its sole and absolute discretion, has decided the successful Bidders to whom the serially numbered CAN is dispatched, pursuant to which the details of the Units Allocated to them, the Issue Price and the total amount received towards Units Allocated to them shall be notified to such successful Bidders. The successful Bidders have also be sent a serially numbered Placement Document either in electronic form or by physical delivery.

The dispatch of the serially numbered CAN and this Placement Document (when dispatched), to the Eligible Investors shall be deemed a valid, binding and irrevocable contract for the Eligible Investors to subscribe to the Units Allocated to such successful Bidders at an aggregate price equivalent to the product of the Issue Price and Units Allocated to such successful Bidders. Subsequently, Board of Directors or the Issue Committee will approve the Allotment of the Units to the Allottees.

Eligible Investors are advised to instruct their Depository Participant to accept the Units that may be Allotted to them pursuant to the Issue.

By submitting the Application Form, the Eligible Investors would have deemed to have made the representations and warranties as specified in the section entitled "*Notice to Investors*" on page 9 and further that such Eligible Investors shall not undertake any trade on the Units credited to its Depository Participant account pursuant to the Issue until such time as the final listing and trading approval is issued by the Stock Exchanges.

Designated Date and Allotment of Units

The Investment Manager, at its sole discretion, reserves the right to cancel the Issue at any time up to Allotment without assigning any reason whatsoever.

Following the Allotment, the Investment Manager shall apply to the Stock Exchanges for listing approvals and post receipt of the listing approvals from the Stock Exchanges, the Investment Manager shall credit the Units into the beneficiary accounts of the successful Bidders. Following the credit of the Units into the successful Bidders' beneficiary accounts, the Investment Manager will apply for final listing and trading approvals from the Stock Exchanges.

The pre and post-Issue Unitholding pattern of IndiGrid will be filed by the Investment Manager with the Stock Exchanges and the Investment Manager will also file an allotment report with the SEBI providing details of the Allottees and the Allotment made.

After finalization of the Issue Price and Allocation of Units to the Bidders, the Investment Manager has updated the Preliminary Placement Document with the Issue details and filed the same with the Stock Exchanges as this Placement Document.

Refunds

In the event that the Units are not Allocated to a Bidder for any reason, or the number of Units Allocated to a successful Bidder is lower than the number of Units applied for through the Application Form and towards which Application Amount has been paid by such Bidder, or the Application Amount paid by a successful Bidder is in excess of the amount equivalent to the product of the Units that have been Allocated to such Bidder and the Issue Price, or a Bidder withdraws the Application Form prior to the Issue Closing Date, or the Issue is cancelled prior to Allocation, the excess Application Amount paid by such Bidder will be refunded to the same bank account from which the Application Amount was remitted, in the form and manner set out in the CAN. The Refund Amount will be transferred to the relevant Bidders within two Working Days from the date of issuance of the CAN.

Post Allotment, the Investment Manager shall make an application for listing of the units to the stock exchange(s) and the Units shall be listed within two working days from the date of Allotment.

If the Units are not listed within the specified time, the monies received shall be refunded through verifiable means within four working days from the date of the allotment, and if any such money is not repaid within such time after the issuer becomes liable to repay it, IndiGrid, the Trustee (on behalf of the Trust) and the Investment Manager and its director or partner who is an officer in default shall, on and from the expiry of the fourth working day, be jointly and severally liable to repay that money with interest at the rate of 15% per annum.

Allotment pursuant to the Unitholders' resolution dated December 29, 2025 approving the Issue shall be completed within a period of 365 days from the date of passing of the unitholder resolution.

Other Instructions

Right to Reject Applications

The Investment Manager, in consultation with the Placement Agents, may reject Bids, in part or in full, without assigning any reason whatsoever. The decision of the Investment Manager in consultation with the Placement Agents in relation to the rejection of Bids shall be final and binding. In the event the Bid is rejected, the Application Amount paid by the Bidder shall be refunded to the same bank account from which the Application Amount was remitted by such Bidder. For details please see the section entitled "– *Bid Process*" and "– *Refund*" above.

Units in Dematerialized form with NSDL or CDSL

Investors should note that Allotment of Units to successful Bidders will only be in the dematerialized form. On Allotment, the Units will be traded only on the dematerialized segment of the Stock Exchanges.

The Allotment of the Units in the Issue shall be only in dematerialized form (i.e., not in physical certificates but be fungible and be represented by the statement issued through the electronic mode).

An Eligible Investor applying for Units to be issued pursuant to the Issue must have at least one beneficiary account with a Depository Participant of either NSDL or CDSL prior to making the Bid. Units Allotted to an Eligible Investor will be credited in electronic form directly to the specified beneficiary account (with the Depository Participant) of the Eligible Investor.

Units in electronic form can be traded only on the stock exchanges having electronic connectivity with NSDL and CDSL. The Stock Exchanges have electronic connectivity with NSDL and CDSL.

The trading of the Units to be issued pursuant to the Issue would be in dematerialized form only for all Eligible Investors in the demat segment of the respective Stock Exchanges.

The Investment Manager and the Placement Agents will not be responsible or liable for the delay in the credit of Units to be issued pursuant to the Issue due to errors in the Application Form, delays in payment of Application Amount or otherwise on the part of the Eligible Investor.

Release of Funds to Trust

The Escrow Collection Bank shall not release the monies lying to the credit of the Escrow Account to Trust until the receipt of final trading and listing approvals of the Stock Exchanges for Units offered in the Issue and the receipt of the relevant instructions.

SELLING RESTRICTIONS

The distribution of the Preliminary Placement Document and this Placement Document or any offering material and the offering, sale or delivery of the Units is restricted by law in certain jurisdictions. Therefore, persons who may come into possession of the Preliminary Placement Document and this Placement Document or any offering material are advised to consult with their own legal advisors as to what restrictions may be applicable to them and to observe such restrictions. The Preliminary Placement Document and this Placement Document may not be used for the purpose of an offer or invitation in any circumstances in which such offer or invitation is not authorized and/or by any person who is not an Eligible Investor.

General

No action has been taken or will be taken that would permit a public offering of the Units to occur in any jurisdiction other than India, or the possession, circulation or distribution of the Preliminary Placement Document and this Placement Document or any other material relating to IndiGrid or the Units in any jurisdiction where action for such purpose is required. Accordingly, the Units may not be offered or sold, directly or indirectly, and neither the Preliminary Placement Document and this Placement Document nor any offering materials or advertisements in connection with the Units may be distributed or published in or from any country or jurisdiction except under circumstances that will result in compliance with any applicable rules and regulations of any such country or jurisdiction. The Issue will be made in compliance with the applicable regulations issued and notified by SEBI. Each purchaser of the Units in the Issue will be deemed to have made acknowledgments and agreements as described under the section entitled "*Notice to Investors*" on page 9.

India

The Preliminary Placement Document may and this Placement Document not be distributed directly or indirectly in India or to residents of India and any Units may not be offered or sold directly or indirectly in India to, or for the account or benefit of, any resident of India except as permitted by applicable Indian laws and regulations, under which an offer is strictly on a private and confidential basis and is limited to Eligible Investors and is not an offer to the public or any other class of investors other than Eligible Investors. The Preliminary Placement Document may and this Placement Document is neither a public issue nor a prospectus/offer document under the Companies Act, 2013 or the InvIT Regulations or the Master Circular or an advertisement and should not be circulated to any person other than to whom it is addressed. The Preliminary Placement Document may and this Placement Document has not been and will not be registered as a prospectus in India. Units Allotted through the Issue shall not be sold by the Allottees for a period of one year from the date of allotment, except on a recognized stock exchange.

European Economic Area

In relation to each Member State of the European Economic Area (each a "**Relevant State**"), no Units have been offered or will be offered pursuant to the Issue to the public in that Relevant State except that the Units may be offered to the public in that Relevant State at any time:

(i) to any legal entity which is a qualified investor as defined under Article 2 of the Prospectus Regulation;

(ii) to fewer than 150 natural or legal persons (other than qualified investors as defined under Article 2 of the Prospectus Regulation), subject to obtaining the prior consent of the Placement Agents for any such offer; or

(iii) in any other circumstances falling within Article 1(4) of the Prospectus Regulation,

(iv) provided that no such offer of the Units shall require the Trust or any Placement Agent to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation.

For the purposes of this provision, the expression an "offer to the public" in relation to the Units in any Relevant State means the communication in any form and by any means of sufficient information on the terms of the offer and any Units to be offered so as to enable an investor to decide to purchase or subscribe for any Units, and the expression "Prospectus Regulation" means Regulation (EU) 2017/1129.

Hong Kong

The Units have not been offered or sold and will not be offered or sold in Hong Kong, by means of any document, other than (a) to "professional investors" as defined in the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong) (the "**SFO**") and any rules made under the SFO; or (b) in other circumstances which do not result in the document being a "prospectus" as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong (the "**C(WUMP)O**") or which do not constitute an offer to the public within the meaning of the C(WUMP)O.

No advertisement, invitation or document relating to the Units, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to Units which are or are intended to be disposed of only to persons outside Hong Kong or only to "professional investors" as defined in the SFO and any rules made under the SFO has been or will be issued, whether in Hong Kong or elsewhere.

Singapore

The Preliminary Placement Document and this Placement Document has not been and will not be registered as a prospectus with the Monetary Authority of Singapore, and the Units will be offered pursuant to exemptions under the Securities and Futures Act (Chapter 289) of Singapore, as modified or amended from time to time (the "**SFA**"). Accordingly, the Units may not be offered or sold or made the subject of an invitation for subscription or purchase nor may the Preliminary Placement Document or any other document or material in connection with the offer or sale or invitation for subscription or purchase of the Units be circulated or distributed, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the SFA) pursuant to Section 274 of the SFA, (ii) to a relevant person (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A) of the SFA, and in accordance with the conditions specified in Section 275 of the SFA, or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where Units are subscribed or purchased under Section 275 of the SFA by a relevant person which is:

(a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or

(b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor, securities or securities-based derivatives contracts (each term as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries' rights and interest (howsoever described) in that trust shall not be transferred within six (6) months after that corporation or that trust has acquired the Units pursuant to an offer made under Section 275 of the SFA except:

i. to an institutional investor or to a relevant person, or to any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the SFA;
ii. where no consideration is or will be given for the transfer;
iii. where the transfer is by operation of law;
iv. as specified in Section 276(7) of the SFA; or
v. as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and Securities-based Derivatives Contracts) Regulations 2018.

PRODUCT CLASSIFICATION PURSUANT TO SECTION 309B OF THE SECURITIES AND FUTURES ACT (CHAPTER 289 OF SINGAPORE)

Singapore Securities and Futures Act Product Classification – Solely for the purposes of its obligations pursuant to sections 309B(1)(a) and 309B(1)(c) of the SFA (Chapter 289 of Singapore), the Trust has determined, and hereby notifies all relevant persons (as defined in Section 309A of the SFA) that the Units are "prescribed capital markets products" (as defined in the Securities and Futures (Capital Markets Products) Regulations) 2018.

United Arab Emirates (excluding the Dubai International Financial Centre)

The Preliminary Placement Document and this Placement Document does not constitute or contain an offer of securities to the general public in the United Arab Emirates ("**UAE**"). No offering, marketing, promotion, advertising or distribution (together, "**Promotion**") of this document or the Units may be made to the general public in the UAE) unless: (a) such Promotion has been approved by the UAE Securities and Commodities Authority (the "**SCA**") and is made in accordance with the laws and regulations of the UAE, including SCA Board of Directors' Chairman Decision no. (3/R.M.) of 2017 (the "**Promotion and Introduction Regulations**"), and is made by an entity duly licensed to conduct such Promotion activities in the UAE; or (b) such Promotion is conducted by way of private placement made: (i) only to non-natural persons "**Qualified Investors**" (as such term is defined in the Promotion and Introduction Regulations); or (ii) otherwise in accordance with the laws and regulations of the UAE; or (c) such Promotion is carried out by way of reverse solicitation only upon an initiative made in writing by an investor in the UAE. None of the SCA, the UAE Central Bank, the UAE Ministry of Economy or any other regulatory authority in the UAE has reviewed or approved the contents of the Preliminary Placement Document, this Placement Document nor does any such entity accept any liability for the contents of the Preliminary Placement Document or this Placement Document.

United Kingdom

The Preliminary Placement Document and this Placement Document is only directed at, and will only be provided to, persons to whom interests may lawfully be promoted pursuant to section 21 of the Financial Services and Markets Act 2000 (the "**FSMA**"). In particular, the Preliminary Placement Document and this Placement Document is only directed at, and will only be provided to, investment professionals ("**Relevant Persons**") within the meaning of article 19 of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 ("**FPO**"). Any investment or investment activity to which the Preliminary Placement Document and this Placement Document relates is available only to Relevant Persons and dealings hereunder will be made only with Relevant Persons. Persons who are not investment professionals within the meaning of article 19 of the FPO should not rely on the Preliminary Placement Document and this Placement Document.

The Preliminary Placement Document and this Placement Document has not been delivered for approval to the United Kingdom Financial Conduct Authority in the United Kingdom or to an authorized person within the meaning of the FSMA. No approved prospectus within the meaning of section 85 of the FSMA or of the Prospectus Regulation has been published or is intended to be published in relation to the Issue. The Preliminary Placement Document and this Placement Document does not constitute a prospectus for the purposes of the FSMA or the Prospectus Regulation.

United States of America

Each purchaser or subscriber of Units in the United States will be deemed to have represented and agreed that it has received a copy of the Preliminary Placement Document and this Placement Document and such other information as it deems necessary to make an investment decision and that:

(i) it understands and agrees that the Units have not been and will not be registered under the Securities Act or with any securities regulatory authority of any state, territory or other jurisdiction of the United States and may not be offered, resold, pledged or otherwise transferred, except (1) in an "offshore transaction" complying with Rule 903 or Rule 904 of Regulation S, (2) pursuant to an exemption from the registration requirements of the Securities Act or (3) pursuant to an effective registration statement under the Securities Act and (4) in accordance with all applicable securities laws of any state, territory or other jurisdiction of the United States;

(ii) it understands that in the event Units are held in certificated form, such certificated Units will bear a legend substantially to the following effect:

> "THE SECURITY EVIDENCED HEREBY HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE UNITED STATES SECURITIES ACT OF 1933, AS AMENDED (THE "SECURITIES ACT"), ANY STATE SECURITIES LAWS IN THE UNITED STATES OR THE SECURITIES LAWS OF ANY OTHER JURISDICTION AND MAY NOT BE OFFERED, SOLD, PLEDGED OR OTHERWISE TRANSFERRED, EXCEPT: (A) IN AN OFFSHORE TRANSACTION IN ACCORDANCE WITH RULE 903 OR RULE 904 OF REGULATION S UNDER THE SECURITIES ACT; (B) PURSUANT TO AN EXEMPTION FROM THE REGISTRATION REQUIREMENTS OF THE SECURITIES ACT; OR (C) PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE SECURITIES ACT, IN EACH CASE IN ACCORDANCE WITH ANY APPLICABLE SECURITIES LAWS OF ANY STATE OF THE UNITED STATES. NO REPRESENTATION CAN BE MADE AS TO THE AVAILABILITY OF THE EXEMPTION PROVIDED UNDER THE SECURITIES ACT FOR RESALES OF THIS SECURITY.";

(iii) any resale made other than in compliance with the above stated restrictions shall not be recognised by the Trust;

(iv) it agrees that it will give to each person to whom it transfers Units notice of any restrictions on transfer of such Units;

(v) it agrees that neither it, nor any of its affiliates, nor any person acting on behalf of the purchaser or any of its affiliates, will make any "directed selling efforts" as defined in Regulation S under the Securities Act with respect to the Units; and

it acknowledges that the Trust, the Sponsor and the Placement Agents and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations and agreements and agrees that, if any of such acknowledgements, representations or agreements deemed to have been made by virtue of its purchase of Units are no longer accurate, it will promptly notify the Trust, the Sponsor and the Placement Agents, and if it is acquiring any Units as a fiduciary or agent for one or more accounts, it represents that it has sole investment discretion with respect to each such account and that it has full power to make the foregoing acknowledgements, representations and agreements on behalf of each such account.

Other Jurisdictions

The distribution of the Preliminary Placement Document and this Placement Document and the offer and sale of the Units may be restricted by law in certain jurisdictions. Persons into whose possession the Preliminary Placement Document and this Placement Document comes are required to inform themselves about, and to observe, any such restrictions to the extent applicable.

PURCHASER REPRESENTATIONS AND WARRANTIES

Due to the following restrictions, Bidders are advised to consult legal counsel prior to Bidding for the Units or making any offer, resale, pledge or transfer of the Units.

The Units Allotted in the Issue are not permitted to be sold for a period of one year from the date of Allotment, except on BSE or NSE. Due to the following restrictions, investors are advised to consult legal counsel prior to making any resale, pledge or transfer of the Units, except if the resale of the Units is by way of a regular sale on BSE or NSE.

The Units have not been and will not be registered under the U.S. Securities Act or any other applicable state securities laws of the United States and, unless so registered, may not be offered or sold within the United States except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, the Units are being offered and sold only outside the United States in 'offshore transactions' as defined in, and in reliance on, Regulation S and the applicable laws of the jurisdictions where such offers and sales are made.

Purchaser Representations and Transfer Restrictions

By accepting delivery of the Preliminary Placement Document and this Placement Document, submitting a bid to purchase Units and/or accepting delivery of Units, you will be deemed to have represented and agreed as follows:

- You will comply with all laws, regulations and restrictions (including the selling restrictions contained in the Preliminary Placement Document and this Placement Document) which may be applicable in your jurisdiction and you have obtained or will obtain any consent, approval or authorization required for you to purchase and accept delivery of Units, and you acknowledge and agree that none of us or the Placement Agents and their respective affiliates shall have any responsibility in this regard.

- You certify that you are, or at the time the Units are purchased will be, (a) the beneficial owner of the Units, you are located outside the United States, and you have not purchased the Units for the account or benefit of any person in the United States or entered into any arrangement for the transfer of the Units or an economic interest therein to any person in the United States; or (b) you are a broker dealer acting on behalf of a customer and you customer has confirmed to you that (i) such customer is, or at the time the Units are purchased will be, the beneficial owner of the Units, (ii) such customer is located outside the United States, and (iii) such customer has not purchased the Units for the account or benefit of any person in the United States or entered into any arrangement for the transfer of the Units or an economic interest therein to any person in the United States.

- You understand and agree (or if you are a broker-dealer acting on behalf of a customer, your customer has confirmed to you that such customer understands and agrees) that the Units are being offered in a transaction not involving any public offering within the meaning of the U.S. Securities Act, have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States and may not be reoffered, resold, pledged or otherwise transferred except (A)(i) in an "offshore transaction" in compliance with Rule 903 or Rule 904 of Regulation S, as applicable, (ii) pursuant to another available exemption from the registration requirements of the U.S. Securities Act, or (iii) pursuant to an effective registration statement under the U.S. Securities Act, and (B) in each case, in accordance with all applicable securities laws of the states of the United States and any other jurisdiction.

- You agree (or if you are a broker-dealer acting on behalf of a customer, your customer has confirmed to you that such customer agrees) that neither you, nor any of your affiliates, nor any person acting on your behalf, will make any "directed selling efforts" as defined in Regulation S. You acknowledge and agree that you are not purchasing any Units as a result of any "directed selling efforts".

- You will base your investment decision on a copy of the Preliminary Placement Document. You acknowledge that neither the Trust, the Investment Manager nor any of its affiliates nor any other person (including the placement agent) or any of their respective affiliates has made or will make any representations, express or implied, to you with respect to the Trust, the Issue, the Units or the accuracy, completeness or adequacy of any financial or other information concerning the Trust, the Issue or the Units, other than (in the case of the Trust) the information contained in the Preliminary Placement Document, as may be supplemented.

- You acknowledge and agree (or if you're a broker-dealer acting on behalf of a customer, your customer has confirmed to you that such customer acknowledges and agrees) that we, the placement agent, your affiliates and others will rely upon the truth and accuracy of the foregoing acknowledgments, representations and agreements and agree that, if any of such acknowledgments, representations or agreements are no longer accurate, you will promptly notify us; and if you are acquiring any of the Units as a fiduciary or agent for one or more accounts, you represent that you have sole investment discretion with respect to each such account and that you have full power to make, and do make, the foregoing acknowledgments, representations and agreements on behalf of each such account. Any offer, resale, pledge or other transfer of the Units made other than in compliance with the above stated restrictions, will not be recognized by us.

TAXATION

STATEMENT OF POSSIBLE TAX BENEFITS AVAILABLE TO THE TRUST AND ITS UNIT-HOLDERS UNDER THE APPLICABLE LAWS IN INDIA

The Board of Directors
Indigrid Investment Managers Limited as Investment Manager of IndiGrid Infrastructure Trust (formerly known as India Grid Trust)
Unit No 101, First Floor,
Windsor Village, Kole Kalyan Off CST Road,
Vidyanagari Marg, Santacruz (East),
Mumbai-400098,
Maharashtra.

Dear Sirs/Madams,

Statement of Possible Tax Benefits available to IndiGrid Infrastructure Trust ("the Trust" or "issuer" or "InvIT") and its unit-holders under the applicable laws in India

1. We hereby confirm that the enclosed Annexure, prepared by management of Indigrid Investment Managers Limited, (hereinafter referred as the "Investment Manager"), provides the possible tax benefits available to the Trust and to the unit-holders of the Trust under the Income-tax Act, 1961 (the "Act") as amended by the Finance Act 2025, i.e. applicable for the Financial Year 2025-26 relevant to the assessment year 2026-27, presently in force in India (together, the **'Tax Laws'**). This statement can be included in the Offer Letter proposed to be filed with the BSE Limited and National Stock Exchange of India Limited (collectively, the "Stock Exchanges") for the proposed offering ("the issue") of Units (the "Units" or "Securities"), by the Trust outside the United States, as required under the provisions of the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended. Several of these benefits are dependent on the Trust or its unit-holders fulfilling the conditions prescribed under the relevant provisions of the Act. Hence, the ability of the Trust and / or its unit-holders to derive the tax benefits is dependent upon their fulfilling such conditions which, based on business imperatives the Trust faces in the future, the Trust or its unit-holders may or may not choose to fulfil.

2. The benefits discussed in the enclosed Annexure are not exhaustive and the preparation of the contents stated is the responsibility of the Investment Manager. We are informed that this statement is only intended to provide general information to the investors and is neither designed nor intended to be a substitute for professional tax advice. In view of the individual nature of the tax consequences and the changing tax laws, each investor is advised to consult his or her own tax consultant with respect to the specific tax implications arising out of their participation in the offering.

3. We do not express any opinion or provide any assurance as to whether:

   i) the Trust or its unit-holders will continue to obtain these benefits in future;
   ii) the conditions prescribed for availing the benefits have been / would be met with; and
   iii) the revenue authorities/courts will concur with the views expressed herein.

4. The contents of the enclosed Annexure are based on information, explanations and representations obtained from the Trust and on the basis of their understanding of the business activities and operations of the Trust.

5. This Statement is issued solely in connection with the issue of units and is not to be used, referred to or distributed for any other purpose. We have no responsibility to update this Statement for events and circumstances occurring after the date of this statement.

Date: January 19, 2026

ANNEXURE TO STATEMENT OF POSSIBLE TAX BENEFITS AVAILABLE TO INDIGRID INFRASTRUCTURE TRUST ('INDIGRID TRUST' or 'BUSINESS TRUST') AND ITS UNITHOLDERS UNDER THE APPLICABLE LAWS IN INDIA

The information provided below sets out the possible tax benefits available to the Indigrid Trust and its unitholders for the Financial Year 2025-26 in a summary manner only and is not a complete analysis or listing of all potential tax consequences of purchase, ownership and disposal of equity shares or units, under the Tax Laws presently in force in India. It is not exhaustive or comprehensive analysis and is not intended to be a substitute for professional tax advice.

Unitholders should consult their own tax advisors concerning the India tax implications and consequences of purchase, owning and disposing of units, including tax implications on any distributions by/receipts from Indigrid Trust, in their particular situation.

I. UNDER THE INCOME-TAX ACT, 1961 (hereinafter referred to as 'the Act')

1. <u>TAX BENEFITS AVAILABLE TO INDIGRID INFRASTRUCTURE TRUST UNDER THE ACT</u>

Indigrid Trust is an **Infrastructure Investment Trust** in accordance with the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended ('SEBI Regulations').

The following benefits are available to the Business Trust after fulfilling conditions as per the applicable provisions of the Act and the guidelines prescribed by the Securities and Exchange Board of India ('SEBI') [including the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended] ('SEBI Regulations').

Business Trust is defined under section 2(13A) of the Act to include a trust registered as an Infrastructure Investment Trust under the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014.

1.1. Tax benefit in the hands of Indigrid Trust in respect of interest and dividend income received from the Special Purpose Vehicle(s) ('SPVs'):

Interest and dividend received or receivable by Indigrid Trust from the Project SPVs shall be exempt from tax, subject to satisfaction of conditions given under section 10(23FC) of the Act. For the purposes of this section, SPV means an Indian company in which the Business trust holds controlling interest and specified percentage of shareholding or interest, as may be required by the regulations under which such trust is granted registration.

Further, in view of the provisions of section 14A of the Act, any expenditure incurred in relation to earning the above exempt income shall not be tax deductible. In case the Tax Authorities are not satisfied by the disallowance considered by Indigrid Trust, the quantum of disallowance shall be computed in accordance with the provisions of section 14A read with Rule 8D of the Income-tax Rules, 1962 ('the Rules').

1.2. Taxability of Capital Gains

In terms of section 115UA(2) of the Act, the total income of Indigrid Trust shall be chargeable to tax at the maximum marginal rates in force except for

a) Income chargeable to tax on transfer of Short-term Capital assets under section 111A;

b) Income chargeable to tax on transfer of Long-terms Capital assets under section 112 of the Act; and

c) Income chargeable to tax on transfer of Long-term Capital assets under section 112A of the Act

Post amendment in section 2(42A) by Finance Act 2024, the nature of capital asset (whether long term or short term) with effect from 23 July 2024 is determined as follows:

- If the period of holding of a security listed on a recognised stock exchange in India or a unit of the Unit Trust of India or a unit of an equity-oriented fund or a zero-coupon bond or units of business trust is more than 12 months, it will be considered a long-term capital asset as per section 2(29AA) read with section 2(42A) of the Act.

- With respect to shares of a company not being listed on a recognized stock exchange or unit of a mutual fund specified under clause section 10(23D) other than equity oriented mutual fund, the determinative period of holding shall be more than 24 months for it to be regarded as long-term capital asset.

Assets not considered as long-term capital asset shall be regarded as short-term capital assets.

As per amendment in section 111A by Finance Act 2024, any income arising from transfer of short-term capital asset, on or after 23 July 2024, being an equity share in a company or a unit of an equity- oriented fund or a unit of an eligible Business trust, transacted through a recognized stock exchange and subject to securities transaction tax, shall be taxable at 20% (plus applicable surcharge and cess if any).

As per the provisions amendment in section 112(1)(d) of the Act by Finance Act 2024, gains arising on the transfer of long-term capital assets made on or after 23 July 2024 shall be chargeable to tax in the hands of Indigrid Trust at the rate of 12.5% (plus applicable surcharge and cess). Further, the benefit of indexation as provided by second proviso to section 48 will not be available for long-term capital assets transferred by a Business Trust on or after 23 July 2024.

As per the amendment in section 112A by Finance Act 2024, gains arising on the transfer of long-term capital asset being an equity share in a company or a unit of an equity-oriented fund or a unit of business trust shall be chargeable to tax at the rate of 12.5%, in case the long-term capital gains exceeds Rs 1,25,000 in a financial year and where transfer of long-term capital asset is made on or after 23 July 2024 and in case securities transaction tax has been paid –

(a) on acquisition and transfer of an equity share in a company
(b) on transfer of unit of an equity oriented fund or unit of a business trust

As per section 70 read with section 74 of the Act, short-term capital loss arising during a year is allowed to be set-off against short-term capital gains as well as long-term capital gains. Balance loss, if any, shall be carried forward and set-off against any capital gains arising during subsequent eight assessment years. Also, as per section 70 of the Act, long-term capital loss arising during a year is allowed to be set-off only against long-term capital gains. Balance loss, if any, shall be carried forward and set-off against long-term capital gains arising during subsequent eight assessment years.

1.3. Dividend from other than SPVs as per section 10(34) and Income from specified units as per section 10(35) of the Act

Finance Act, 2020 has discontinued exemption on Dividend referred under section 115-O of the Act due to abolishment of Dividend Distribution Tax. Hence, any dividend received by Business Trust from its investments other than in SPVs shall be taxable at maximum marginal rate.

Finance Act, 2020 has discontinued the exemption available under section 10(35) of the Act and hence the Business trusts shall be liable to pay tax on income received in respect of units specified in section 10(35) of the Act on or after April 1, 2020 at maximum marginal rate.

Deduction of interest expense wholly and exclusively incurred for earning of such dividend income, or income in respect of units from Mutual Fund or specified company referred in section 10(35) of the Act can be claimed under section 57 of the Act. However, such deduction is restricted to 20 per cent of such income received.

2. **<u>TAX BENEFITS AVAILABLE TO UNIT-HOLDERS OF INDIGRID INFRASTRUCTURE TRUST</u>**

2.1. <u>Benefits available to the Unitholders of Indigrid Trust:</u>

Following tax benefit is specifically available to the unitholders of Indigrid Trust subject to the fulfilment of the conditions specified in the Act and SEBI Regulations:

2.1.1. Section 10(23FD) of the Act - Tax exemption in respect of income distributed by Indigrid Trust

As per the provisions of section 115UA(1) of the Act, the income distributed by Indigrid Trust shall be deemed to be of the same nature and in the same proportion in the hands of the Unit-holder as if such income was received by or accrued to Indigrid Trust.

As per the provisions of section 10(23FD), any income referred to in section 115UA(1) of the Act and distributed by the Business trust shall not be included in the total income of the unitholders except for the following income:

a. Interest referred to in section 10(23FC)

b. Specified dividend i.e. dividend income received in cases where SPV has exercised the option under section 115BAA of the Act

Further, in view of the provisions of section 14A of the Act, any expenditure incurred in relation to earning the exempt income under section 10(23FD) shall not be tax deductible. In case the Tax Authorities are not satisfied by the disallowance considered by unitholders, the quantum of disallowance shall be computed in accordance with the provisions of section 14A read with Rule 8D of the Rules.

Interest income from loan given to SPVs [referred to in section 10(23FC)] received by the unitholders from Indigrid

Trust shall be taxable as follows:

a) at the applicable tax rates, in case of resident unitholders; and

b) at 5% (plus applicable surcharge and cess) in case of non-resident Unitholders.

Further, in case the SPVs of Indigrid Trust are opting for the concessional tax rate under section 115BAA, the dividend received by the unit holders shall be taxable in their hands as follows:

c) at the applicable tax rates, in case of resident unitholders; and

d) at 20% (plus applicable surcharge and cess) in case of non-resident Unitholders.

As per section 57 of the Act, no deduction shall be allowable against the taxable dividend income other than deduction on account of interest expense wholly and exclusively incurred for earning of such dividend income. Further, such interest expense shall not exceed 20% of the gross dividend income from Indigrid Trust included in the total income for that year.

Under the provisions of section 90(2) of the Act, a non-resident will be governed by the provisions of the Agreement for Avoidance of Double Taxation ('DTAA') between India and the country of tax residence of the non-resident, and the provisions of the Act apply to the extent they are more beneficial to the non-resident assessee.

2.1.2. Distribution in the form of loan repayment by SPV to Indigrid Trust and taxability in hands of unitholders of Indigrid Trust:

The Act has specific provisions for taxation of the income of Business trust such as dividend, interest and capital gains. However, there are certain distributions such as debts repayment by SPV to Indigrid Trust which are further distributed by Indigrid Trust to its unitholders and the debts repayments are not covered in the tax regime for Business trust. Accordingly, the Finance Act, 2023 had introduced a new provision whereby any other distributions (such as repayment of debt) by Business trusts that presently do not suffer taxation either in the hands of Business trust or in the hands of unit holders, will henceforth be taxed as "other income" in the hands of unit holders under section 56(2)(xii) of the Act.

Section 56(2)(xii) of the Act provides the manner of computing the distribution which is taxable as "Other Income" in the hands of unit holders referred to as "Specified sum" which shall be the result of 'A – B - C', where:

A = aggregate of sum distributed by the business trust with respect to such unit, during the previous year or during any earlier previous year or years, to such unit holder, who holds such unit on the date of distribution of sum or to any other unit holder who held such unit at any time prior to the date of such distribution, which is,—
(a) not in the nature of income referred to in clause (23FC) or clause (23FCA) of section 10; and
(b) not chargeable to tax under sub-section (2) of section 115UA in the hands of Business Trust

B = amount at which such unit was issued by the business trust

C = amount charged to tax under this clause in any earlier previous year

Where B + C > A, the specified sum shall be deemed to be NIL.

In a situation where, the cost of acquisition in the hands of the unitholder in respect of units held and distributions made in the nature of return of capital prior to 1 April 2023 is to be determined, the cost of acquisition in the hands of unitholders as on 1 April 2023 would be the cost of acquisition of the units reduced by the distributions received by the unitholder in the nature of return of capital.

- In a situation where, the cost of acquisition in the hands of the unitholder in respect of units held and distributions made in the nature of return of capital post 1 April 2023 is to be determined, the distribution received in respect of a unit in the nature of return of capital which does not result in an actual tax outflow under section 56(2)(xii) should be reduced from the cost of acquisition of a unit. Otherwise, when the computation under section 56(2)(xii) results in an actual tax liability, such distribution in the nature of return of capital should not be reduced from the cost of acquisition.

- The rate of tax on income from other sources is the tax rate (plus applicable surcharge and cess) applicable for residents and non-residents subject to the beneficial rate provided in the tax treaty.

- Other income (income other than interest or dividend income or income chargeable to tax under section 56(2)(xii) of the Act) such as treasury income earned by the Business trust and distributed to unitholder shall be exempt in hands of unitholders as the same shall be taxable in the hands of Business trust. Further, there shall be no withholding on distribution of such other income by the Business trust to the unitholders.

2.1.3. Section 10(23FE) of the Act - Tax exemption in respect of specified income earned by notified Sovereign Wealth Funds and Provident Funds

Finance Act, 2020 (further amended by the Finance Act, 2024) has introduced a specific tax exemption under section 10(23FE) of the Act to 'Specified Persons' with respect to the income in the nature of **dividend or interest or long-term capital gains or other income as specified in section 56(2)(xii) of the Act** arising from direct India investments made on or after 1 April 2020 but on or before 31 March 2030, inter alia, in units of an Infrastructure Investment Trust, if such investment is:

a. made on or after the 01 April 2020 but on or before the 31 March 2030; and

b. is held for at least 3 years

For the purposes of the above exemption, following investors are considered as 'Specified Persons':

a. Wholly owned subsidiaries of Abu Dhabi Investment Authority which is a resident of the United Arab Emirates and makes investment, directly or indirectly, out of the fund owned by the Government of the Abu Dhabi;
b. notified foreign Sovereign Wealth Fund ('SWF');
c. notified foreign pension Fund ('PF');
d. Public Investment fund of the Government of the Kingdom of Saudi Arabia; and
e. Wholly owned subsidiary of the Public Investment Fund of the Government of the Kingdom of Saudi Arabia which-
   (i) is a resident of Saudi Arabia; and

   (ii) makes investment, directly or indirectly, out of the fund owned by the said Government.

For the purpose of claiming the aforesaid exemption, the aforesaid 'Specified Persons' need to be specifically notified under section 10(23FE) and need to satisfy the conditions specified in the notification.

In this regard, please note that there are no amendments in the withholding tax provisions under the Act for providing exemption from withholding taxes on above mentioned income accruing to specified persons, however, they are eligible to apply for a lower/ nil withholding certificate.

2.2. <u>General Benefits available to all the Unitholders of Indigrid Trust:</u>

2.2.1. <u>For resident Unitholder:</u>

For the purpose of computation of capital gains on sale of units of Indigrid Trust, consideration received on sale of units of the Business trust shall be reduced by cost of acquisition of such units and expenditure incurred wholly and exclusively in connection with such sale.

The amount of distribution to the extent not chargeable to tax u/s 56(2)(xii) of the Act and not covered u/s 10(23FC), 10(23FCA) or 115UA(2) of the Act, shall be reduced from the cost of units, for the purpose of computation of capital gains.

Income arising from transfer of units on or after 23 July 2024 held for more than 12 months and subject to securities transaction tax, shall be considered as long term capital assets. Assets not considered as long term capital assets shall be considered as short term capital assets.

Long term capital gain exceeding Rs. 1,25,000 on transfer of units on or after 23 July 2024 shall be taxable at 12.5% (plus applicable surcharge and cess) as per the provisions of section 112A of the Act (amended by Finance Act, 2024).The limit of Rs 1,25,000 is for whole financial year. In case of a Unitholder being an individual or HUF, where the total taxable income as reduced by long-term capital gains is below the basic exemption limit, the long-term capital gains will be reduced to the extent of the shortfall and only the balance long-term capital gains will be subjected to such tax in accordance with the proviso to sub-section (2) of section 112A of the Act.

Short-term capital gains arising on transfer of the units made on or after 23 July 2024 of Indigrid Trust will be chargeable to tax at the rate of 20% as per the provisions of section 111A of the Act (amended by Finance Act, 2024) provided such transaction is subject to STT and through a recognized stock exchange. In case of a Unitholder being an individual or HUF, where the total taxable income as reduced by short-term capital gains is below the basic exemption limit, the short-term capital gains will be reduced to the extent of the shortfall and only the balance short-term capital gains will be subjected to such tax in accordance with the proviso to sub-section (1) of section 111A of the Act.

Short-term Capital Loss computed for the given year is allowed to be set-off against Short-term/ Long-term Capital Gains computed for the said year under section 70 of the Act. Further, as per Section 71 of the Act, short-term capital loss for the year cannot be set-off against income under any other heads for the same year. Balance loss, if any, shall be carried forward and set-off against any capital gains arising during subsequent eight assessment years. Also, as per section 70 of the Act, long-term capital loss arising during a year is allowed to be set-off only against long-term capital gains. Balance loss, if any, shall be carried forward and set-off against long-term capital gains arising during subsequent eight assessment years.

Where the gains arising on the transfer of the units of Indigrid Trust are included in the business income of an assessee assessable under the head "Profits and Gains from Business or Profession" and on which securities transaction tax has been charged, such securities transaction tax shall be a deductible expense from business income as per the provisions of section 36(1)(xv) of the Act. In such case the income tax rates mentioned above for capital gains shall not apply and such business income shall be taxable at applicable rates. The characterisation of gains/ losses, arising from sale of shares, as capital gains or business income would depend on the nature of holding in the hands of the unitholder and various other factors

2.2.2. <u>For unitholders who are Foreign Portfolio Investors ('FPIs')/ Foreign Institutional Investors ('FIIs'):</u>

As per section 2(14) of the Act, transfer of any shares/ securities (other than those held as stock in trade) being invested in accordance with the regulations made under the Securities and Exchange Board of India Act, 1992 shall be deemed to be treated as Capital Gains. Income arising from transfer of units made on or after 23 July 2024 of Indigrid Trust held for more than 12 months and subject to securities transaction tax, shall be considered as long-term capital assets. Assets not considered as long-term capital assets shall be considered as short-term capital assets.

Section 115AD read with section 112A of the Act (amended by Finance Act, 2024) provides for concessional rate of 12.5% (plus applicable surcharge and cess) on long term capital gains (exceeding Rs. 1,25,000 in a Financial Year) arising from transfer of units of Indigrid Trust made on or after 23 July 2024, if such transfer is subject to STT.

As per section 115AD of the Act, the tax on long term capital gains arising to the FPI/FII on transfer of listed units made on or after 23 July 2024 of Indigrid Trust (other than those covered under section 112A) shall be at 12.5% (plus applicable surcharge and cess) without indexation benefit.

Under section 115AD(1)(ii) read with section 111A of the Act, income by way of short term capital gains arising to the FPI/ FII on transfer of units on or after 23 July 2024 of Indigrid Trust shall be chargeable at the rate of 20% (plus applicable surcharge and cess) if such transaction of sale is entered on a recognised stock exchange in India and is chargeable to STT. In any other case, such gain shall be taxable at 30% (plus applicable surcharge and cess) as per section 115AD(1)(ii).

As per section 70 read with section 74 of the Act, short term capital loss arising during a year is allowed to be set-off against short term capital gains as well as long term capital gains. Balance loss, if any, shall be carried forward and set-off against any capital gains arising during subsequent eight assessment years. Long term capital loss arising during a year is allowed to be set-off only against long term capital gains. Balance loss, if any, shall be carried forward and set-off against long term capital gains arising during subsequent eight assessment years.

In respect of non-residents, the tax rates and consequent taxation mentioned above will be further subject to any benefits available under the DTAA, if any, between India and the country in which the FII has Fiscal domicile. As per the provisions of section 90(2) of the Act, the provisions of the Act would prevail over the provisions of the DTAA to the extent they are more beneficial to the FII.

As per Explanation 4 to section 115JB(2) of the Act, the Minimum Alternate Tax provisions are not applicable to foreign company, if—

(i) it is a resident of a country or a specified territory with which India has an agreement referred to in sub-section (1) of section 90 or the Central Government has adopted any agreement under sub-section (1) of section 90A and it does not have a permanent establishment in India in accordance with the provisions of such agreement; or

(ii) it is a resident of a country with which India does not have an agreement of the nature referred to in clause (i) and the assessee is not required to seek registration under any law for the time being in force relating to companies.

2.2.3. <u>For non-resident Unitholder (other than FIIs/ FPIs):</u>

Income arising from transfer of units on or after 23 July 2024 of Indigrid Trust held for more than 12 months and subject to securities transaction tax, shall be considered as long term capital assets. Assets not considered as long term capital assets shall be considered as short term capital assets.

Section 112A of the Act provides for concessional rate of 12.5% (plus applicable surcharge and cess) on long term capital gains (exceeding Rs. 1,25,000 in a financial year) arising from the units of Indigrid Trust on or after 23 July

2024, if such transaction is subjected to STT. The benefit of indexation shall not be applicable for computing long term capital gains taxable under section 112A of the Act.

As per the provisions of section 111A of the Act (as amended by Finance Act, 2024), short term capital gain on transfer of units on or after 23 July 2024 shall be taxable at rate of 20% (plus applicable surcharge and cess if any), if such transaction is subjected to STT. As per section 70 read with section 74 of the Act, short term capital loss arising during a year is allowed to be set-off against short term capital gains as well as long term capital gains. Balance loss, if any, shall be carried forward and set-off against any capital gains arising during subsequent eight assessment years. Long term capital loss arising during a year is allowed to be set-off only against long term capital gains. Balance loss, if any, shall be carried forward and set-off against long term capital gains arising during subsequent eight assessment years.

Where the gains arising on the transfer of units of Indigrid Trust are included in the business income of an assessee assessable under the head "Profits and Gains from Business or Profession" and on which securities transaction tax has been charged, such securities transaction tax shall be a deductible expense from business income as per the provisions of section 36(1)(xv) of the Act. In such case the income tax rates mentioned above for capital gains shall not apply and such business income shall be taxable at applicable rates. The characterisation of gains/ losses, arising from sale of shares, as capital gains or business income would depend on the nature of holding in the hands of the unitholder and various other factors.

Under the provisions of section 90(2) of the Act, a non-resident will be governed by the provisions of the DTAA between India and the country of tax residence of the non-resident and the provisions of the Act apply to the extent they are more beneficial to the non-resident assessee.

As per Explanation 4 to section 115JB(2), the provisions of section 115JB shall not be applicable to a foreign company if the foreign company is a resident of a country having DTAA with India and such foreign company does not have a permanent establishment within the definition of the term in the relevant DTAA, or the foreign company is a resident of a country which does not have a DTAA with India and such foreign company is not required to seek registration under any law for the time being in force relating to companies.

Investors are advised to consult their tax advisor for computation of capital gains including cost of acquisition of units as per Indian tax laws in each case.

2.2.4. <u>For unitholders who are Mutual Funds:</u>

Under section 10(23D) of the Act, any income earned by a Mutual Fund registered under the Securities and Exchange Board of India Act, 1992, or a Mutual Fund set up by a public sector bank or a public financial institution, or a Mutual Fund authorised by the Reserve Bank of India would be exempt from income-tax, subject to such conditions as the Central Government may by notification in the Official Gazette specify in this behalf.

II. TAX DEDUCTION AT SOURCE

<u>Section 193 – Interest on securities distributed/ paid by SPVs to Indigrid Trust:</u>

As per section 193 of the Act, interest income distributed/ paid by an SPV in respect of any securities to Indigrid Trust shall not be subject to withholding tax.

<u>Section 194 – Dividend distribution by the SPVs to Indigrid Trust:</u>

As per section 194 of the Act, dividend income distributed/ paid by an SPV to Indigrid Trust shall not be subject to withholding tax.

<u>Section 194A – Interest paid by the SPVs to Indigrid Trust on loans:</u>

As per Clause (xi) of sub-section 3 to section 194A of the Act, interest income paid by the SPVs to Indigrid Trust in respect of the loans shall not be subjected to any withholding tax.

<u>Section 194LBA – Certain income from units of Indigrid Trust:</u>

Where any distributed income payable by Indigrid Trust referred to in section 115UA, is in the nature referred to in sub clause (a) of clause (23FC) of section 10 i.e., interest, to its unit holder being a resident, Indigrid Trust shall at the time of credit of such payment deduct tax at the rate of 10%.

In case payment referred to above is made to a non-resident unit holder, then the same shall be subjected to the tax deduction at the rate of 5% (plus applicable surcharge and cess).

Where any distributed income payable by Indigrid Trust referred to in section 115UA, is in the nature referred to in sub clause (b) of clause (23FC) of section 10 i.e. any dividend is received from SPV which has exercised the option under section 115BAA of the Act, shall at the time of credit of such payment to the account of the payee or at the time of payment, whichever is earlier, deduct tax at the rate of 10%. In case of payments to non-resident unit holders, the rate of 10% shall be further increased by applicable surcharge and cess.

No tax is required to be deducted on dividend income distributed by Indigrid Trust to the unit holders, in case such dividend is received from an SPV which has not opted for the option under section 115BAA.

Section 196 – Distribution by Indigrid Trust to Mutual Funds:

As per section 196 of the Act, no tax is to be deducted from income distributed/ paid by Indigrid Trust to a Mutual Fund specified under section 10(23D) of the Act.

Applicability of other provisions

No income tax is deductible at source from income by way of capital gains arising to a resident unitholder under the present provisions of the Act. However, as per the provisions of Section 195 of the Act, any income by way of capital gains payable to non-residents may be subject to withholding of tax at the rate under the domestic tax laws or under DTAA, whichever is beneficial to the assessee, unless a lower withholding tax certificate is obtained from the tax authorities. However, the non-resident investor will have to furnish a certificate of him being a tax resident in a country outside India and a suitable declaration for not having a fixed base/ permanent establishment in India, to get the benefit of the applicable DTAA and such other document as may be prescribed as per the provision of section 90(4) of Act.

Pursuant to amendment in section 206AA vide notification 53/2016 dated 24 June 2016 introducing Rule 37BC, requirement of quoting permanent account number (PAN) in case of certain specified income of non-residents is eliminated by maintaining specified documents as mentioned in the said notification. In any other case, the tax needs to be deducted at applicable rate or 20%, whichever is higher, as per section 206AA if unitholder doesn't have valid PAN.

Provisions of section 206AB have been omitted from 1 April 2025.

Notes:

1. The income-tax rates specified in this note are as applicable for the financial year 2025-26, and are exclusive of surcharge and education cess, if any. Rate of surcharge and cess are provided below:

Surcharge:

Domestic companies / Co-operative Societies (not opting for Section 115BAA/ 115BAB/115BAD):

If the net income does not exceed INR 10 million – Nil

If the net income exceeds INR 10 million but does not exceed INR 100 million - 7 per cent If the net income exceeds INR 100 million - 12 per cent

Domestic companies / Co-operative Societies (opting for Section 115BAA/ 115BAB/115BAD): 10%

Foreign companies:

If the net income does not exceed INR 10 million - Nil

If the net income exceeds INR 10 million but does not exceed INR 100 million - 2 per cent

If the net income exceeds INR 100 million - 5 per cent

Individuals, HUF, AOP and BOI:

If the net income does not exceed INR 5 million – Nil

If the net income exceeds INR 5 million but does not exceed INR 10 million – 10 per cent

If the net income exceeds INR 10 million but does not exceed INR 20 million – 15 per cent If the net income exceeds INR 20 million but does not exceed INR 50 million – 25 per cent

If the net income exceeds INR 50 million – 37 per cent

The enhanced surcharge of 25% and 37%, is not levied on dividend income and income chargeable to tax under sections 111A, 112, 112A and 115AD(1)(b). The maximum rate of surcharge on tax payable on such incomes shall be 15 per cent. Further, the rate of surcharge cannot exceed 25 per cent if such assessee had opted for new regime u/s 115BAC.

For other assessees, surcharge at the rate of 12% shall be applicable if the total income exceeds INR 10 million.

Health and Education cess:

In all cases, health and education cess will be levied at the rate of 4 per cent of income-tax and surcharge.

3. The above annexure to statement of possible direct tax benefits sets out the provisions of law in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of Shares, units and other securities.

4. The above annexure covers only certain relevant direct tax law benefits and does not cover any indirect tax law benefits or benefit under any other law.

5. The stated benefits will be available only to the sole/ first named holder in case the units are held by joint holders.

6. In respect of non-residents, the tax rates and the consequent taxation mentioned above shall be further subject to any benefits available under the applicable tax treaty, if any, between India and the country in which the non-resident has fiscal domicile.

7. This annexure is intended only to provide general information to the investors and is neither designed nor intended to be substituted for professional tax advice. In view of the individual nature of tax consequences, each investor is advised to consult his/her own tax advisor with respect to specific tax consequences of his/her participation in the scheme.

8. No assurance is given that the revenue authorities/courts will concur with the views expressed herein. Our views are based on the existing provisions of law and its interpretation, which are subject to changes from time to time. We do not assume responsibility to update the views consequent to such changes. We shall not be liable to any person in respect of this annexure.

9. This annexure to statement of possible direct tax benefits enumerated above is as per the Act as amended by the Finance Act, 2025. The above statement of possible direct-tax benefits sets out the possible tax benefits available to the Business Trust and its unitholders under the current tax laws presently in force in India. Several of these benefits available are dependent on the taxpayer's parties to the transaction fulfilling the conditions prescribed under the relevant tax laws.

10. The information provided above sets out the possible tax benefits available to the investors in a summary manner only and is not a complete analysis or listing of all potential tax consequences of the purchase, ownership and disposal of units and other securities, under the current tax laws presently in force in India. It is not exhaustive or comprehensive and is not intended to be a substitute for professional advice. Investors are advised to consult their own tax consultant with respect to the tax implications of an investment in the units particularly in view of the fact that certain recently enacted legislation may not have a direct legal precedent or may have a different interpretation impacting the benefits, which an investor can avail.

Note: The above annexure to statement of possible tax benefits is prepared as per Income tax Act, 1961 and the same does not cover/refer to the provisions of New Income tax Act, 2025 applicable with effect from 1 April 2026

Battery Energy Storage System Assets:

Sr. No.	Name of SPVs	Abbreviation	Capacity	Tariff Models	Project Models
41	Kilokari BESS Pvt Ltd	KBPL	20 MW/40 MWh	TBCB	BOOT
42	Gujarat BESS Pvt Ltd	GBPL	180 MW/360 MWh	TBCB	BOO
43	Rajasthan BESS Pvt Ltd	RBPL	250 MW/500 MWh	TBCB	BOO

(Herein after all the above 43 SPVs are together referred to as the "**the SPVs**")

These SPVs were acquired by the Trust and are to be valued as per Regulation 21(5) contained in the Chapter V of the SEBI InvIT Regulations.

As per Regulation 21(5) of Chapter V of the SEBI InvIT Regulations:

"A half yearly valuation of the assets of the InvIT shall be conducted by the valuer for the half-year ending September 30th for a publicly offered InvIT for incorporating any key changes in the previous six months and such half yearly valuation report shall be submitted by the Investment Manager to the designated stock exchanges(s) along with the quarterly financial results for quarter ending 30th September.

If the consolidated borrowings and deferred payments of an InvIT, in terms of regulation 20 of these regulations, exceeds forty nine per cent.; a quarterly valuation of the assets of InvIT shall be conducted by the valuer as at the end of the quarters ending June, September and December for incorporating any key changes from the previous quarter and such quarterly valuation report shall be submitted by the investment manager to the designated stock exchange(s) along with the quarterly financial results of the corresponding quarter."

I understand from the Investment Manager that Debt to AUM of Indigrid Infrastructure Trust as at 30th June 2025 was 61.20%. In this regard, the Investment Manager and the Trustee intends to undertake the fair enterprise valuation of the SPVs as on 30th September 2025 ("**Valuation Date**") for incorporating any key changes from the period ended 30th June 2025 till 30th September 2025.

I am enclosing the Report providing opinion on the fair enterprise value of the SPVs on a going concern basis as at 30th September 2025 ("**Valuation Date**").

Enterprise Value ("**EV**") is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash or cash equivalents to meet those liabilities. The attached Report details the valuation methodologies used, calculations performed and the conclusion reached with respect to this valuation.

I have relied on explanations and information provided by the Investment Manager. Although, I have reviewed such data for consistency, those are not independently investigated or otherwise verified. My team and I have no present or planned future interest in the Trust, the SPVs or the Investment Manager except to the extent of this appointment as an independent valuer and the fee for this **Valuation Report** ("**Report**") which is not contingent upon the values reported herein. The valuation analysis should not be construed as investment advice, specifically, I do not express any opinion on the suitability or otherwise of entering into any financial or other transaction with the Trust.

The analysis must be considered as a whole. Selecting portions of any analysis or the factors that are considered in this Report, without considering all factors and analysis together could create a misleading view of the process underlying the valuation conclusions. The preparation of a valuation is a complex process and is not necessarily susceptible to partial analysis or summary description. Any attempt to do so could lead to undue emphasis on any particular factor or analysis.

The information provided to me by the Investment Manager in relation to the SPVs included but not limited to historical financial statements, forecasts/projections, other statements and assumptions about future matters like forward-looking financial information prepared by the Investment Manager. The forecasts and projections as supplied to me are based upon assumptions about events and circumstances which are yet to occur. I have not tested individual assumptions or attempted to substantiate the veracity or integrity of such assumptions in relation to the forward-looking financial information, however, I have made sufficient enquiry to satisfy myself that such information has been prepared on a reasonable basis.

Notwithstanding anything above, I cannot provide any assurance that the forward looking financial information will be representative of the results which will actually be achieved during the cash flow forecast period.

The valuation provided by me and the valuation conclusion are included herein and the Report complies with the SEBI InvIT Regulations and guidelines, circular or notification issued by SEBI thereunder.

Please note that all comments in the Report must be read in conjunction with the caveats to the Report, which are contained in Section 11 of this Report. This letter, the Report and the summary of valuation included herein can be provided to Trust's advisors and may be made available for the inspection to the public and with the SEBI, the stock exchanges and any other regulatory and supervisory authority, as may be required.

I draw your attention to the limitation of liability clauses in Section 11 of this Report.

This letter should be read in conjunction with the attached Report.

Yours faithfully,

S. Sundararaman

1. Executive Summary

Background

1.1. The Trust

i. IndiGrid Infrastructure Trust ("IndiGrid" or "Trust") was set up on 21st October 2016, as an irrevocable trust pursuant to the trust deed under the provisions of the Indian Trusts Act, 1882 and was registered with SEBI as an InvIT on 28th November 2016, under Regulation 3(1) of the InvIT Regulations.

ii. IndiGrid is India's first infrastructure investment trust ("InvIT") in the power sector. It owns and acquires power transmission assets (overhead transmission lines and substations) & solar assets. Today, it owns 22 power transmission projects with transmission lines of more than 9,000 ckms, 15 substations with 22,550 MVA transformation capacity, and 18 solar generation projects with 1,096 MW DC of solar generation capacity along with 3 battery energy storage system projects with 900 MWh battery energy storage capacity.

iii. The units of the Trust are listed on the National Stock Exchange of India Limited and BSE Limited since 6th June 2017.

iv. Unit holding pattern of the Trust as on 30th September 2025 is as under:

Particulars	No of Units	Total No. of Units	%
Esoteric II Pte. Ltd (Sponsor)		1,00,51,932	1.20%
Insurance Companies		9,69,46,432	11.62%
Financial Institutions/ Banks		3,32,331	0.04%

Total		**83,45,58,088**	**100.00%**

Source: Investment Manager

1.2. The Sponsor

i. The Trust is currently sponsored by Esoteric II Pte. Ltd., an affiliate of KKR & Co. Inc. ("Esoteric"). IndiGrid was originally sponsored by Sterlite Power Grid Venture Limited (now merged with Sterlite Electric Limited) as an irrevocable trust pursuant to the Trust Deed, under the provisions of the Indian Trusts Act, 1882.

ii. SEBI has granted its approval for de-classification of Sterlite Electric Limited ("SEL") (formerly known as Sterlite Power Transmission Limited) as a Sponsor of IndiGrid Infrastructure Trust (."IndiGrid") vide its letter dated July 6, 2023. Accordingly, SEL has been de-classified as a Sponsor of IndiGrid with effect from July 6, 2023.

iii. In the annual meeting of Trust held on 28th September 2020, the unitholders approved induction of Esoteric II Pte. Ltd., an affiliate of KKR & Co. Inc. ("Esoteric"), as a sponsor.

iv. Esoteric is an affiliate of KKR & Co. Inc. KKR & Co. Inc. was founded in 1976 and is a leading global investment firm. KKR & Co. Inc. sponsors investment funds that invest in multiple alternative asset classes, including private equity, credit and real assets, with strategic partners that manage hedge funds.

v. Shareholding Pattern of Sponsor as on 30th September 2025:

Sr. No.	Name of Shareholder	No of Units	%
1	KKR Ingrid Co-Invest L.P.	2,28,50,459	62.89%
2	KKR PIP Investments L.P	10,59,588	2.92%
3	Esoteric I Pte. Ltd.	1,24,26,836	34.20%
	Total	**3,63,36,883**	**100.00%**

1.3. Investment Manager

IndiGrid Investment Managers Limited (formerly known as Sterlite Investment Managers Limited) (**"the Investment Manager"** or **"IIML"**) has been appointed as the investment manager to the Trust by Axis Trustee Services Limited (**"the Trustee"**) and is responsible to carry out the duties of such a person as mentioned under SEBI InvIT Regulations.

Shareholding of the Investment Manager as on 30th September 2025 is as under:

Sr. No.	Name of Shareholder	%
1	Electron IM Pte. Ltd. (KKR affiliate entity)	100.00%
	Total	**100.00%**

1.4. Project Manager

The Investment Manager has entered into a Project Implementation and Management Agreement (PIMA) with IndiGrid Limited (IGL), appointing IGL as the Project Manager for all Transmission and Solar SPVs on June 30, 2021 and July 13, 2021 respectively.

Shareholding of the Project Manager as on 30th September 2025 is as under:

Sr. No.	Name of Shareholder	%
1	IndiGrid Infrastructure Trust	100.00%
	Total	**100.00%**

The Investment Manager has excuted a separate Project Implementation and Management Agreement (PIMA) on 16th May 2025, with Enerica Infra 1 Private Limited designating it as the Project Manager of BESS Projects.

Shareholding of the Project Manager as on 30th September 2025 is as under:

Sr. No.	Name of Shareholder	%
1	IndiGrid 2 Private Limited	74.00%*
2	Enerica ReGrid Infra Private Limited	26.00%
	Total	**100.00%**

**IndiGrid 2 Private Limited owns 100% interest in Enerica Infra 1 Private Limited.*

1.6. Purpose of Valuation

i. As per Regulation 21(5) of Chapter V of the SEBI InvIT Regulations:

"A half yearly valuation of the assets of the InvIT shall be conducted by the valuer for the half-year ending September 30th for a publicly offered InvIT for incorporating any key changes in the previous six months and such half yearly valuation report shall be submitted by the Investment Manager to the designated stock exchanges(s) along with the quarterly financial results for quarter ending 30th September.

If the consolidated borrowings and deferred payments of an InvIT, in terms of regulation 20 of these regulations, exceeds forty nine per cent.; a quarterly valuation of the assets of InvIT shall be conducted by the valuer as at the end of the quarters ending June, September and December for incorporating any key changes from the previous quarter and such quarterly valuation report shall be submitted by the investment manager to the designated stock exchange(s) along with the quarterly financial results of the corresponding quarter."

ii. I understand from the Investment Manager that Debt to AUM of Indigrid as at 30th June 2025 was 61.20%. In this regard, the Investment Manager and the Trustee intends to undertake the fair enterprise valuation of the SPVs as on 30th September 2025 for incorporating any key changes from the period ended 30th June 2025 till 30th September 2025.

iii. In this regard, the Investment Manager and the Trustee have appointed Mr. S. Sundararaman ("**Registered Valuer**" or "**RV**" or "**I**" or "**My**" or "**Me**") bearing IBBI registration number IBBI/RV/06/2018/10238 to undertake the fair valuation at the enterprise level of the SPVs as per the SEBI InvIT Regulations as on 30th September 2025. Enterprise Value ("**EV**") is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash and cash equivalents to meet those liabilities.

iv. I declare that:

a. I am competent to undertake the financial valuation in terms of the SEBI InvIT Regulations;

b. I am not an associate of the sponsor(s) or investment manager or trustee and I have not less than five years of experience in valuation of infrastructure assets;

c. I am independent and has prepared the Valuation Report ("the Report") on a fair and unbiased basis.

d. I have valued the SPVs based on the valuation standards as specified / applicable as per SEBI InvIT Regulations.

This Report covers all the disclosures required as per the SEBI InvIT Regulations and the valuation of the SPVs is impartial, true and fair and in compliance with the SEBI InvIT Regulations.

(Please refer appendix 13 for further information about myself)

1.7. Scope of Valuation

i. Financial Asset to be Valued:
The RV has been mandated by the Investment Manager to arrive at the Enterprise Value of the SPVs. Enterprise Value is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash or cash equivalents to meet those liabilities.

ii. Valuation Bases:
Valuation base means the indication of the type of value being used in an engagement. In the present case, I have determined the fair value of the SPVs at the enterprise level. Fair Value Bases defined as under:

Fair Value:
Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the valuation date. It is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. Fair value or Market value is usually synonymous to each other except in certain circumstances where characteristics of an asset translate into a special asset value for the party(ies) involved.

iii. Valuation Date:
Valuation Date is the specific date at which the value of the assets to be valued gets estimated or measured. Valuation is time specific and can change with the passage of time due to changes in the condition of the asset to be valued. Accordingly, valuation of an asset as at a particular date can be different from other date(s).

The valuation date considered for the fair enterprise valuation of the SPVs is 30th September 2025 (**"Valuation Date"**). The attached Report is drawn up by reference to accounting and financial information as on 30th September 2025. The RV is not aware of any other events having occurred since 30th September 2025 till date of this Report which he deems to be significant for his valuation analysis.

iv. Premise of Value:
Premise of Value refers to the conditions and circumstances about how an asset is deployed. In the present case, I have determined the fair enterprise value of the SPVs on a Going Concern Value defined as under:

Going Concern Value:
Going concern value is the value of a business enterprise that is expected to continue to operate in the future. The intangible elements of Going Concern Value result from factors such as having a trained work force, an operational plant, the necessary licenses, systems, and procedures in place etc.

<<This space is intentionally left blank>>

1.8. Summary of Valuation

I have assessed the fair enterprise value of each of the SPVs on a stand-alone basis by using the Discounted Cash Flow ("**DCF**") method under the income approach. Following table summarizes my explaination on the usage or non usage of different valuation methods:

Valuation Approach	Valuation Methodology	Used	Remarks
Cost approach	Net Assets Value method	Yes	**Transmission Assets:** NRSS-II, GPTL-II, KTCO, DPTL, IPTL, and RKPTL are currently under construction, with their expected COD after 3 to 24 months. Given this stage of development, the certainty of cash flows is relatively higher only post-COD or when the overall project progress reaches a materially significant level, making revenue generation reasonably certain. Hence in present case the above SPVs that are under construction as at valuation date are valued at NAV Method. The business of TL Sitamau Sub-Station is primarily for captive consumption, as a result the entire revenue is generated from the current SPVs of the InvIT. Hence, in such circumstances, more than the earnings the underlying asset is relatively of higher importance and I have considered NAV method as the primary method for valuation of this SPV.
		No	**Solar Assets:** NAV does not capture the future earning potential of the business. Since all the Solar assets have achieved COD, NAV method has not been considered for Solar Assets.
		Yes	**BESS Assets:** GBPL and RBPL are under construction and their likely COD is after 8 to 24 months. In such circumstances the certainty of cash flows are relatively more only after COD or % completion are at material level and reasonably certain. Hence in present case the SPVs that are under construction as at valuation date are valued at NAV Method. KBPL have achieved COD and is operational in nature, since NAV does not capture the future earning potential of the business, KBPL is valued as per Income approach as defined below.
Income Approach	Discounted Cash Flows method	Yes	**Transmission Assets:** The revenues of the Transmission Assets are defined for 35 years under the TSA (for ENICL the TSA period is only for 25 years). In such scenario, the true worth of its business would be reflected in its future earnings potential and therefore, DCF method under the income approach has been considered as an appropriate method for the present valuation exercise. For Transmission Assets, the terminal value is calculated based on the business potential for further growth beyond the explicit forecast period. The "constant growth model" is applied, which implies an expected constant level of growth for perpetuity in the cash flows over the last year of the forecast period. JKTPL is based on DBFOT model in which case the asset is to be transferred at the end of 35 years and hence the terminal period value for JKTPL has been considered based on the value on account of cash flows from realization of working capital at the end of the tenure. NRSS-II, GPTL-II, KTCO, DPTL, IPTL, RKPTL, are under construction assets and as explained above these SPVs are valued based on NAV method. **Solar Assets:** The tariff rates for Solar Assets are defined for 25 years under the PPA. In such scenario, the true worth of its business would be reflected in its future earnings potential and therefore, DCF Method under the income approach has been considered as an appropriate method for the present valuation exercise. The ownership of the underlying assets (tangible assets) except the leasehold land shall remain with the SPVs even after the expiry of PPA term. The terminal period value (i.e. value on account of cash flows to be generated after the expiry of the period) has been considered based on the salvage value of the plant & machinery, sale of freehold land and realization of working capital at the end of the tenure. **BESS Assets:** The revenues of the BESS Assets are defined for 12-15 years under the BESPA. In such scenario, the true worth of its business would be reflected in its future earnings potential and therefore, DCF method under the income approach has been considered as an appropriate method for the present valuation exercise. In case of KBPL the respective asset is as per BOOT model in which case the asset is to be transferred at the end of 12 years and hence the terminal period value for KBPL has been considered based on the value on

			account of cash flows from realization of working capital at the end of the tenure. GBPL and RBPL are under construction assets and as explained above these SPVs are valued based on NAV method.
	Capitalization of Earnings Method	No	In the present case, the revenue of the SPVs are either pre-determined or could be fairly estimated for the life of the projects. Since the future earning can easily be estimated, I find it appropriate to not consider Capitalization of Earnings Method for the current valuation exercise.
Market Approach	Market Price method	No	Currently, the equity shares of SPVs are not listed on any recognized stock exchange of India. Hence, I was unable to apply market price method.
	Comparable Companies multiples method	No	In the absence of any exactly comparable listed companies with characteristics and parameters similar to that of the SPVs, I have not considered CCM method in the present case.
	Comparable Transactions multiples method	No	In the absence of adequate details about Comparable Transactions, I was unable to apply the CTM method.

Under the DCF Method, the Free Cash Flow to Firm ("**FCFF**") has been used for the purpose of valuation of each of the SPVs. In order to arrive at the fair EV of the individual SPVs under the DCF Method, I have relied on the Unaudited provisional financial statements as at 30th September 2025 prepared in accordance with the Indian Accounting Standards (Ind AS) and the financial projections of the respective SPVs prepared by the Investment Manager as at the Valuation Date based on their best judgement. The discount rate considered for the respective SPVs for the purpose of this valuation exercise is based on the Weighted Average Cost of Capital ("**WACC**") for each of the SPVs.

Based on the methodology and assumptions discussed further, RV has arrived at the fair enterprise value of the SPVs as on the Valuation Date:

Total Fair Enterprise Value of BESS Assets (C)	3,646
Total Fair Enterprise Value (A+B+C)	**325,411**

Further to above considering that present valuation exercise is based on the future financial performance and based on opinions on the future credit risk, cost of debt assumptions, etc., which represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, a particular event will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary from these estimates and variations may be material. Accordingly, a quantitative sensitivity analysis is considered on the following unobservable inputs.:

1. Weighted Average Cost of Capital (WACC) by increasing / decreasing it by 0.5%
2. Weighted Average Cost of Capital (WACC) by increasing / decreasing it by 1.0%
3. Total Expenses considered during the projected period by increasing / decreasing it by 20%
4. Terminal period value considered for the SPVs increasing / decreasing it by 20%

1. **Fair Enterprise Valuation Range based on WACC parameter (0.5%)**

1.9. KEY CHANGES DURING THE QUARTER SEPTEMBER 2025

SPV Name	Observations
JKTPL	In reference to the incident on 11th August 2024, when a 315 MVA ICT Transformer at the Kabulpur AIS Substation (Rohtak) tripped, causing severe damage to the winding, insulation, bushings, and the transformer tank, the restoration has now been completed. The transformer replacement was successfully commissioned on 4th August 2025, and since then, the plant has been operating at the required normative availability under the Transmission Service Agreement (TSA) and Tariff Adoption Order (TAO).
GPTL	In reference to the incident on 2nd August 2024, when a 125 MVAr Bus Reactor at the Kadarpur Substation was taken out of service due to voltage regulation issues and subsequently tripped again upon restoration on 3rd August 2024, the OEM had recommended a full replacement of the reactor. The replacement process was successfully completed on 23rd June 2025, and since then, the reactor has been in service with the plant operating at the required normative availability under the Transmission Service Agreement (TSA) and Tariff Adoption Order (TAO).
GGEL	In reference to the incident that occurred on 21st March 2025 at the GGEL power plant, operations were interrupted due to a sudden shutdown triggered by a stator earth fault. Consequently, the generator rotor was removed, and restoration efforts were immediately initiated. As part of the restoration process, a replacement stator bar was procured from Siemens Germany. Following installation and associated works, the restoration activities were successfully completed on 21st July 2025. Accordingly, the plant has been operational from 21st July 2025, and revenue generation has commenced from the same date.
JUPL	IGL 2 has acquired the remaining 26% equity stake of JUPL from Enerica ReGrid Infra Pvt. Ltd., making it a wholly owned subsidiary of IGL 2.
NPTL	The trust has executed the binding agreements on 20th August, 2025, with Techno Electric & Engineering Company Limited (“Techno”), for the acquisition of NERES XVI Power Transmission Limited (“NPTL”), in one or more tranches, post the Project achieving Commercial Operation Date (“COD”) at an enterprise value not exceeding INR 4,600 million, subject to closing adjustments on acquisition date, as specified in the definitive documents entered into, in accordance with Transmission Service Agreement (“TSA”) along with the lock-in restrictions therein. The expected Commercial Operation Date (“COD”) is December 2026.
EIPL 3 – SJVN Project	The trust has executed definitive agreement dated 25th August, 2025 for acquisition of Battery Energy Storage System (BESS) project post one year from achieving Commercial Operation Date (“COD”) along with Special Purpose Vehicle (“SPV”) i.e Enerica Infra 3 Private Limited (“EIPL 3”) from Enerica ReGrid Infra Private Limited (EnerGrid) in one or more tranches at an enterprise value not exceeding INR 7,056 million excluding all adjustments as specified in the definitive documents entered into (“Closing Adjustments”), in line with the terms of the definitive agreements and Battery Energy Storage Purchase Agreement (“BESPA”) and subject to compliance with InvIT Regulations.

2. Procedures adopted for current valuation exercise

2.1. I have performed the valuation analysis, to the extent applicable, in accordance with ICAI Valuation Standards 2018 ("**IVS**") issued by the Institute of Chartered Accountants of India.

2.2. In connection with this analysis, I have adopted the following procedures to carry out the valuation analysis:

(i) Requested and received financial and qualitative information relating to the SPVs;

(ii) Obtained and analyzed data available in public domain, as considered relevant by me;

(iii) Discussions with the Investment Manager on:

- Understanding of the business of the SPVs – business and fundamental factors that affect its earning-generating capacity including strengths, weaknesses, opportunities and threats analysis and historical and expected financial performance;

(iv) Undertook industry analysis:

- Research publicly available market data including economic factors and industry trends that may impact the valuation;
- Analysis of key trends and valuation multiples of comparable companies/comparable transactions, if any, using proprietary databases subscribed by me;

(v) Analysis of other publicly available information;

(vi) Selection of valuation approach and valuation methodology/(ies), in accordance with IVS, as considered appropriate and relevant by me;

(vii) Conducted Physical Site Visit of the following SPVs:

Solar Assets: JUPL, RSAPL, TL Kanji, TL Raj, TNSEPL and UMD;

Transmission Assets: NERTL, BDTCL, JTCL, KhTL, KTCO, KTL, OGTPL, PTCL and RSTCPL.

(viii) Determination of fair value of the EV of the SPVs on a going concern basis at the Valuation Date.

<<This space is intentionally left blank>>

3. Overview of InvIT and SPVs

3.1. The Trust

3.1.1. IndiGrid Infrastructure Trust ("IndiGrid" or "Trust") was set up on 21st October 2016, as an irrevocable trust pursuant to the trust deed under the provisions of the Indian Trusts Act, 1882, and was registered with SEBI as an InvIT on 28th November 2016, under Regulation 3(1) of the InvIT Regulations.

3.1.2. The units of the Trust are listed on the National Stock Exchange of India Limited and BSE Limited since 6th June 2017.

3.1.3. The InviT owns 22 power transmission projects with transmission lines of more than 9,000 ckms, 15 substations with 22,550 MVA transformation capacity, and 18 solar generation projects with 1,096 MW DC of solar generation capacity along with 3 battery energy storage system projects.

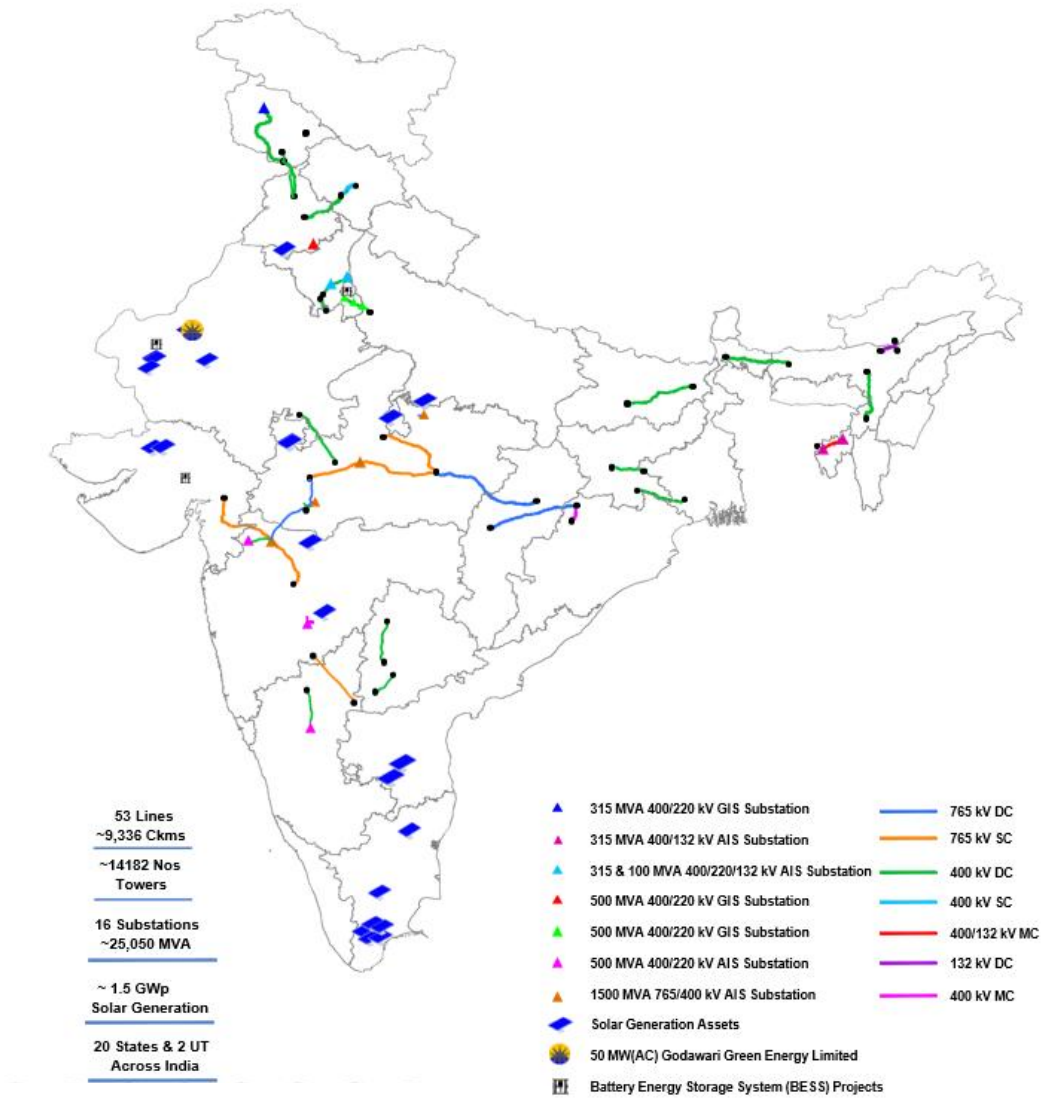
3.1.4. Following is a map of India showing the area covered by the SPVs of the Trust:



3.2. Background of the SPVs

Transmission Assets:

1. Bhopal Dhule Transmission Company Limited ("BDTCL")

- The BDTCL project was awarded to IndiGrid Limited (formerly known as Sterlite Grid 1 Limited) by the Ministry of Power on 31st January 2011 for a 35 year period from the scheduled commercial operation date on a BOOM basis. The expiry date of TSA shall be the date which is 35 years from the Scheduled Commercial Operation Date ("SCOD") of the project.
- BDTCL operates six extra high voltage overhead transmission lines of 943 Ckms comprising four 765 kV single circuit lines of 890 Ckms and two 400 kV dual circuit lines of 53 Ckms. The single circuit lines comprise a 259 ckms line from Jabalpur to Bhopal in Madhya Pradesh, a 176 Ckms line from Bhopal to Indore in Madhya Pradesh, a 192 Ckms line from Aurangabad to Dhule in Maharashtra and a 263 Ckms line from Dhule (Maharashtra) to Vadodara (Gujarat). The double circuit lines consist of a 36 Ckms line within Dhule and a 17 Ckms line within Bhopal. In addition, the project includes two 3,000 MVA sub- stations, one each in Bhopal and Dhule. BDTCL facilitates the transfer of electricity from coal-fired power generation sources from the states of Odisha and Chhattisgarh to power load centers in India's western and northern regions.
- Due to various Force Majeure and Change in Law events during the construction period which adversely affected and delayed the commissioning, BDTCL has been granted an increase in Annual Non Escalable Transmission charges by Appellate Tribunal for Electricity through order dated 20th October 2020 at the rate of 2.987%.
- Summary of project details of BDTCL are as follows:

Parameters	Details – BDTCL
Project Cost	INR 21,634 Mn
Total Length	945 ckms
Location of Assets	Madhya Pradesh, Maharashtra, Gujarat
SCOD as per TSA	31st March 2014
Expiry Date of License	30th March 2049
Concession period	35 years from SCOD
COD of last element of the SPV	13th June 2015
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
Jabalpur – Bhopal	259	9 Jun 2015	MP
Bhopal – Indore	176	19 Nov 2014	MP
Bhopal - Bhopal (MPPTCL)	17	12 Aug 2014	MP
Aurangabad -Dhule (IPTC)	192	5 Dec 2014	MH
Dhule (IPTC) – Vadodara	263	13 Jun 2015	MH,GJ
Dhule (IPTC) - Dhule (MSETCL)	36	6 Dec 2014	MH
Bhopal Substation	NA	30 Sep 2014	MP
Dhule Substation	NA	6 Dec 2014	MH

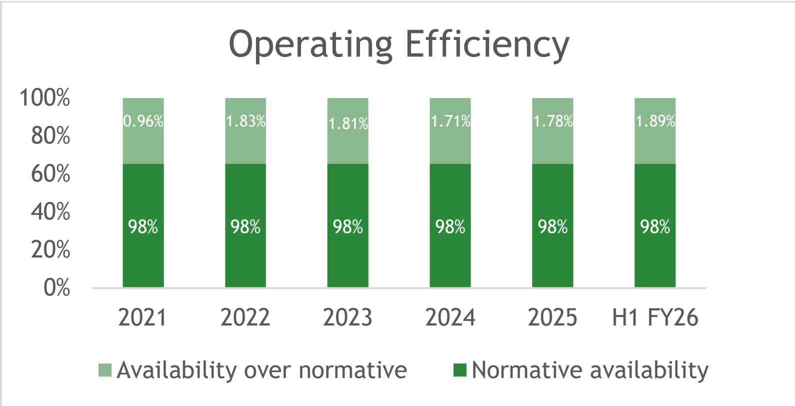
Source: Investment Manager

- The equity shareholding of BDTCL as on Report Date is as follows:

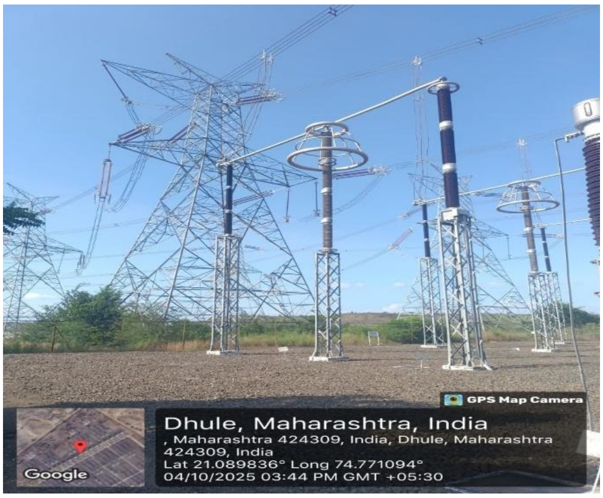
Sr. No.	Particulars	No. of shares	%
1	IndiGrid Limited*	6,00,000	100%
	Total	**6,00,000**	**100%**

** Including shares held with nominees*
Source: Investment Manager

- **Operating Efficiency history of BDTCL:**



- My team has conducted physical site visit of the transmission assets of BDTCL on 4th October 2025. Refer below for the pictures of the plant site:



2. Jabalpur Transmission Company Limited ("JTCL")

- The JTCL project was awarded to IndiGrid Limited (formerly known as Sterlite Grid 1 Limited) by the Ministry of Power on 19th January 2011 for a 35 year period from the scheduled commercial operation date on a BOOM basis. The expiry date of TSA shall be the date which is 35 years from the scheduled COD of the project.

- JTCL operates two extra high voltage overhead transmission lines of 994 Ckms in the states of Chhattisgarh and Madhya Pradesh comprising one 765 kV dual circuit line of 759 Ckms from Dharamjaygarh (Chhattisgarh) to Jabalpur (Madhya Pradesh) and one 765 kV single circuit Line of 235 Ckms from Jabalpur to Bina in Madhya Pradesh.

- JTCL alleviates transmission capacity bottlenecks and expands the reliability and stability of the power grid in western and northern India by providing open access to transmit power from the independent power projects in the east of India.

- Summary of project details of JTCL are as follows:

Parameters	Details – JTCL
Project Cost	INR 19,183 Mn
Total Length	994 ckms
Location of Assets	Chattisgarh, Madhya Pradesh
TSA signing Date	12th November 2013
SCOD as per TSA	1st March 2014
Concession period	35 years from SCOD
COD of the last element of the SPV	14th September 2015
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
Jabalpur – Dharamjaygarh	759	14 Sep 2015	CH, MP
Jabalpur-Bina	235	1 Jul 2015	MP

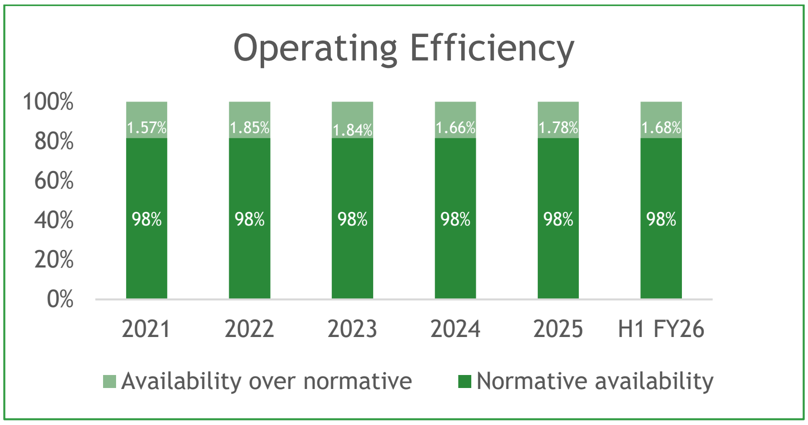
Source: Investment Manager

- The equity shareholding of JTCL as on Report Date is as follows:

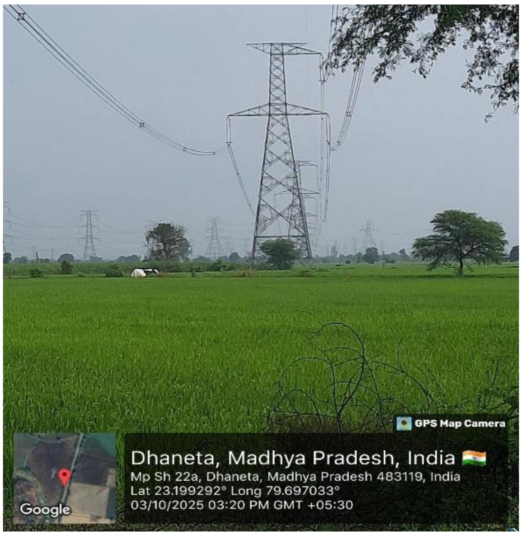
Sr. No.	Particulars	No. of shares	%
1	IndiGrid Limited*	5,50,000	100%
	Total	**5,50,000**	**100%**

** Including shares held with nominees*
Source: Investment Manager

- **Operating Efficiency history of JTCL:**



- My team has conducted physical site visit of the transmission assets of JTCL on 3th October 2025. Refer below for the pictures of the plant site:



3. Maheshwaram Transmission Private Limited ("MTL")

- The MTL project was awarded to IndiGrid 2 Private Limited (formerly known as Sterlite Grid 3 Limited) by the Ministry of Power on 10th June 2015 for a 35 year period from the scheduled commercial operation date on BOOM basis. The expiry date of TSA shall be the date which is 35 years from the SCOD of the project. MTL will create a key component to enable Southern region to draw more power from North-East-West Grid and address the issue of power stability in Telangana region.

- The improved grid connectivity shall facilitate power procurement from the ISTS network to the beneficiary states Telangana, Tamil Nadu, Seemandhra and Karnataka to meet their electricity demands. The project is envisaged to provide grid connectivity for Maheshwaram 765/400 kV Pooling Substation and Nizamabad 765/400 kV Substation.

- Summary of project details of MTL are as follows:

Parameters	Details –MTL
Project Cost	INR 3,841 Mn
Total Length	474 ckms
Location of Assets	Telangana, Tamil Nadu and Karnataka
TSA signing Date	18th June 2015
SCOD as per TSA	1st June 2018
Concession period	35 years from SCOD
COD of the last element of the SPV	14th December 2017
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
Maheshwaram (PG) – Mehboob Nagar	196	14 Dec 2017	TS
2 Nos. of 400 kV line bays at Mehboob Nagar S/S of TSTRANCO	NA	14 Dec 2017	TS

4. RAPP Transmission Company Limited ("RTCL")

- The RTCL project was awarded to IndiGrid 1 Limited (formerly known as Sterlite Grid 2 Limited) by the Ministry of Power on 24th July 2013 for a 35 year period from the scheduled commercial operation date on a BOOM basis. The expiry date of TSA shall be the date which is 35 years from the scheduled COD of the project.

- The RTCL project transfers power from the atomic power plant near Kota in Rajasthan to Shujalpur in Madhya Pradesh to provide the path for the evacuation of electricity generated at RAPP-7 and 8. Its route length is 201 Kms. The network will act as an interregional link between the Northern and the Western region.

- RTCL alleviates transmission capacity bottlenecks and expands the reliability and stability of the power grid in western and northern India by providing open access to transmit power from the independent power projects in the west of India.

- Summary of project details of RTCL are as follows:

Parameters	Details –RTCL
Project Cost	INR 2,601 Mn
Total Length	403 ckms
Location of Assets	Rajasthan, Madhya Pradesh
TSA signing Date	24th July 2013
SCOD as per TSA	1st March 2016
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
RAPP- Shujalpur	403	1 Mar 2016	RJ, MP

Source: Investment Manager

- The equity shareholding of RTCL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Limited*	35,30,621	74%
2	IndiGrid 1 Limited	12,40,489	26%
	Total	**47,71,110**	**100%**

** Including shares held with nominees*

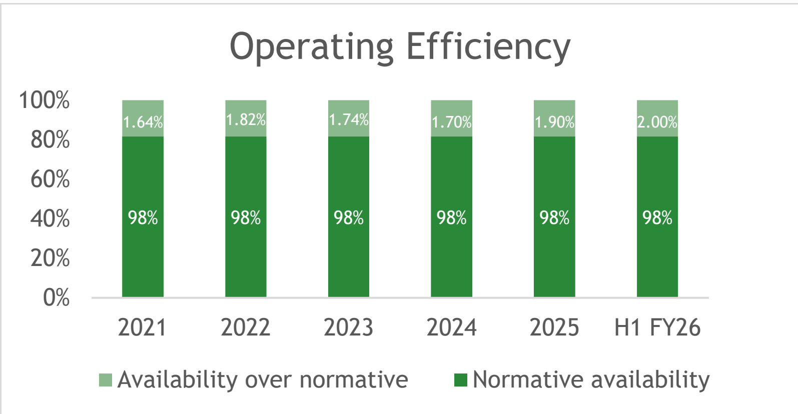
- **Operating Efficiency history of RTCL:**



5. Purulia & Kharagpur Transmission Company Limited ("PKTCL")

- The PKTCL project was awarded to IndiGrid 1 Limited (formerly known as Sterlite Grid 2 Limited) by the Ministry of Power on 6th August 2013 for a 35 year period from the scheduled commercial operation date on BOOM basis. The expiry date of TSA shall be the date which is 35 years from the scheduled COD of the project.

- PKTCL project has been brought into existence, keeping in view the growing generation capacity in the eastern region. It was much needed to strengthen the interconnection of the state grids with regional grids to facilitate exchange of additional power between them. Its route length is 545 Ckms

- Summary of project details of PKTCL are as follows:

Parameters	Details –PKTCL
Project Cost	INR 4,405 Mn
Total Length	545 ckms
Location of Assets	Jharkhand, Odisha
TSA signing Date	24th July 2013
SCOD as per TSA	11th March 2016
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

6. Patran *Transmission Company Private Limited ("PTCL")*

A. PTCL I

- The PTCL project located in Patran Village Nihal, Punjab was awarded to Techno Electric & Engineering Co. Ltd. by the Ministry of Power for a 35 year period from the scheduled commercial operation date on BOOM basis. The expiry date of TSA shall be the date which is 35 years from the scheduled COD of the project.

- The PTCL project's need arose because of the partial grid disturbance in the Patial – Sangrur district of Punjab in July 2011. There were 5 substations of 220 kV in the vicinity and a need for 400 / 220 kV substation was felt to avoid the unbalanced loading. The 400/220 kV S/s at Patran would be connected to the grid by LILO of Patial-Kaithal 400 kV D/C.

- Summary of project details of PTCL I are as follows:

Parameters	Details –PTCL I
Project Cost	INR 2,250 Mn
Total Length	10 ckms
Location of Assets	Punjab
TSA signing Date	24th July 2013
SCOD as per TSA	11th Nov 2016
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
Patiala- Kaithal LILO	10	12 Nov 2016	PB
Patran Substation	NA	12 Nov 2016	PB

Source: Investment Manager

B. PTCL II

- PTCL was awarded a Letter of Award on November 28, 2022, for its extension project, which was commissioned on 29th December 2024. The management anticipates that the revenue from this project will be realized on a Cost-Plus basis. Since the project began operations, financial projections have been considered for valuation basis Income Approach.

- Summary of project details of PTCL II are as follows:

Parameters	Details –PTCL II
Project Cost	INR 880 Mn
Location of Assets	Punjab
SCOD as per TSA	29th December, 2024
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

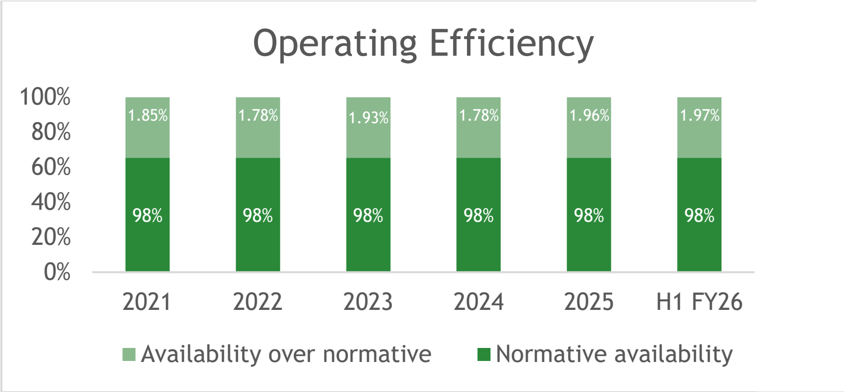
- The equity shareholding of PTCL as on Report Date is as follows:

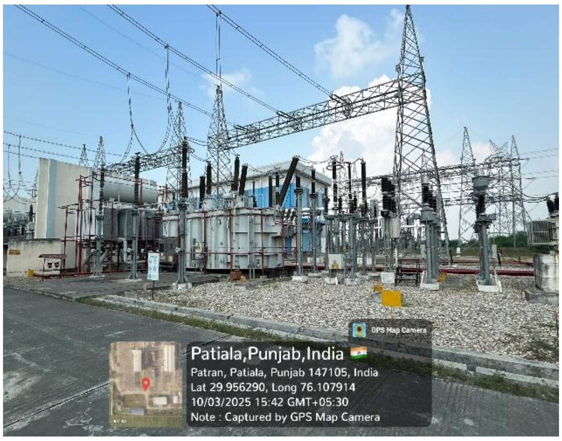
Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastucture Trust*	6,23,71,795	100%
	Total	**6,23,71,795**	**100%**

** Including shares held with nominees*
Source: Investment Manager

- **Operating Efficiency history of PTCL:**



- My team has conducted physical site visit of the transmission assets of PTCL on 3th October 2025. Refer below for the pictures of the plant site:



7. NRSS XXIX Transmission Limited ("NRSS")

A. NRSS- I

- The NRSS project was awarded by the Ministry of Power on 2nd January 2014 for a 35 years period from the commercial operation date on a BOOM basis. The NRSS XXIX Transmission Limited project is expected to deliver over 2,000 MW of electricity from Punjab to the Kashmir Valley by strengthening the transmission system in these two states.

- The Jalandar-Samba 400 kV D/C transmission line was commissioned in June 2016. NRSS XXIX Transmission Limited commissioned the other two 400 kV double circuit transmission lines and one 400/220 kV GIS sub- station in September 2018. The SPV would operate and maintain these for a minimum tenure of 35 years.

- Summary of project details of NRSS I are as follows:

Parameters	Details –NRSS I
Project Cost	INR 28,200 Mn
Total Length	830 ckms/415 kms
Location of Assets	Punjab, Jammu & Kashmir
TSA signing Date	2nd January 2014
SCOD as per TSA	05th Aug 2018
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
Jalandar- Samba	270	24 Jun 2016	PB, JK
Samba- Amargarh	546	2 Sept 2018	JK
Uri- Wagoora	14	2 Sept 2018	JK
Amargarh Substation	NA	2 Sept 2018	JK

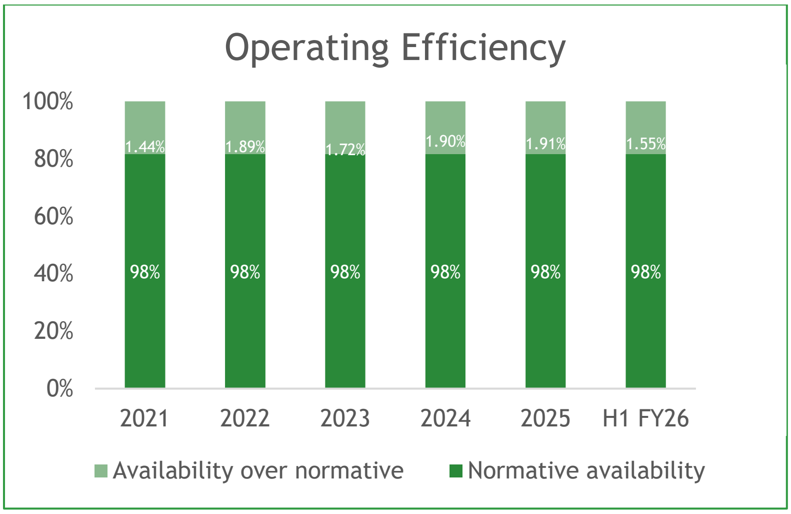
- The equity shareholding of NRSS as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 1 Limited*	3,35,19,144	100%
	Total	**3,35,19,144**	**100%**

** Including shares held with nominees*
Source: Investment Manager

- **Operating Efficiency history of NRSS:**



In FY 22, a force majeure event occurred in NRSS in Jan and Feb 2022, resulting in shutdown of 400kV Samba Amargarh Transmission line. Hence, I have not considered availability for the months of Jan and Feb 2022.

The average of Annualized Availability for NRSS from COD to FY 25 is 99.72%.

B. NRSS- II

- NRSS was awarded an extension project under Cost plus mechanism as per order of Central Transmission Utility of India on 21st April 2023, having reached 35% of its total project cost. Since detailed financial projections up to the Commercial Operation Date (COD) are not available, the estimated value of this ongoing project has been factored into NRSS's overall valuation using NAV method.

- Summary of project details of NRSS- II are as follows:

Parameters	Details –NRSS II
Location of Assets	Punjab, Jammu & Kashmir
SCOD as per TSA	August, 2025
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location

8. Odisha Generation Phase- II Transmission Limited ("OGPTL")

- The OGPTL project was awarded to IndiGrid 2 Private Limited (formerly known as Sterlite Grid 3 Limited) by the Ministry of Power on 19th January 2011 for a 35 years period from the SCOD date on a BOOM basis.

- The OGPTL project is a part of Common Transmission System for Phase – II Generation Projects and Immediate Evacuation System for OPGC Projects in Odisha. The transmission lines will be part of the interstate transmission network providing additional evacuation up to 5,000 MW of electricity from Odisha-based plants that are seeking better access to power-consuming centers. The OPGC – Jharsuguda 400 kV D/C transmission line was commissioned in August 2017 and Jharsuguda – Raipur 765 kV D/C transmission line in April 2019. The SPV would operate and maintain these for a minimum tenure of 35 years.

- Summary of project details of OGPTL are as follows:

Parameters	Details – OGPTL
Project Cost	INR 12,200 Mn
Total Length	713 ckms /355 kms
Location of Assets	Odisha, Chattisgarh
TSA signing Date	17th November 2015
SCOD as per TSA	8th Aug 2019
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
Jharsuguda-Raipur	610	6 Apr 2019	OD

9. East-North Interconnection Company Limited ("ENICL")

- The ENICL project was awarded to Sterlite Technologies Limited, by the Ministry of Power on 7th January 2010 for a period of 25 years from the date of issue of Transmission License by Central Electricity Regulatory Commission ("CERC") on a BOOM basis.

- ENICL is engaged in the establishment of two 400 KV Double Circuit transmission lines (with a total line length of 452 Km) that passes through the Indian states at Assam, West Bengal, and Bihar. Bongaigaon Silliguri Line, having the length of 219 kms passing through the states of Assam and West Bengal. Purnea Biharsharif Line with the length of 229 kms passes through the state of Bihar. As per the terms of TSA, ENICL would construct, operate and maintain these for a minimum tenure of 25 years

- Summary of project details of ENICL are as follows:

Parameters	Details – ENICL
Project Cost	INR 12,519 Mn
Total Length	896 ckms
Location of Assets	Assam, West Bengal and Bihar
TSA signing Date	August 2009
SCOD as per TSA	7th Jan 2013
Concession period	25 years from issue of transmission license
Trust's stake	100% economic ownership

Source: Investment Manager

.

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Specifications	Kms	COD	Location	Contribution to Total Revenue
Bongaigaon-Silliguri	400 kV D/C	438	12 Nov 2014	AS,WB,BH	52%
Purnea-Biharsharif	400 kV D/C	458	16 Sep 2013	BH	48%

10. Gurgaon Palwal Transmission Private Limited ("GPTL")

A. GPTL-I

- GPTL project was awarded to Sterlite Grid 4 Limited, a wholly owned subsidiary of SPGVL (now merged with SPTL), by the Ministry of Power for a period of 35 years from the Scheduled COD on a BOOM basis. GPTL was granted Transmission License by CERC on 29th September 2016. GPTL consists of three GIS substations, transmission lines and two bays to meet the rising power demand in Gurgaon and Palwal.

- GPTL consists of three gas-insulated substations (GIS) with a total transformation capacity of 3,000 MVA and ~273 circuit kilometers of 400 KV transmission lines, to enhance power transmission in the region. Due to change in law during the construction period, GPTL has been claiming an increase in Non Escalable Transmission charges at the rate of 1.52% from its Long-Term Transmission Customers. I have considered such an increase in Non Escalable Transmission charges based on representation by the Investment Manager

- Summary of project details of GPTL I are as follows:

Parameters	Details –GPTL I
Project Cost	INR 10,520 Mn
Total Length	273 ckms
Location of Assets	Haryana
TSA signing Date	9th February 2016
SCOD as per TSA	13th September 2019
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

.

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
Aligarh-Prithala	99	6 Aug 2019	Haryana
Prithala-Kadarpur	58	7 Dec 2019	Haryana
Kadarpur-Sohna Road	21	21 Mar 2020	Haryana
LILO of Gurgaon Manesar	2	13 Mar 2020	Haryana
Neemrana-Dhonanda	93	25 Feb 2019	Haryana
Kadarpur Substation	-	11 Dec 2019	Haryana
Sohna Substation	-	13 Apr 2020	Haryana
Prithala Substation	-	6 Aug 2019	Haryana
Dhonanda Substation Bays	-	25 Feb 2019	Haryana

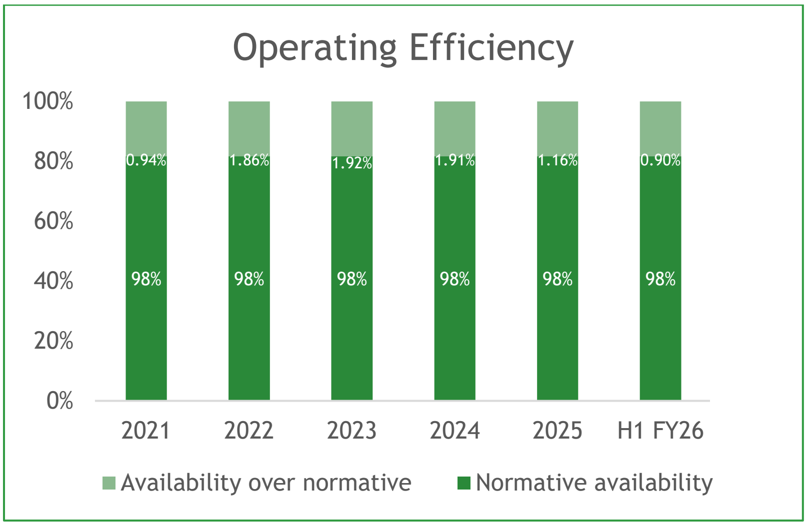
Source: Investment Manager

- The equity shareholding of GPTL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastucture Trust*	7,90,914	69%
2	Sterlite Electric Limited	351,186	31%
	Total	**11,42,100**	**100%**

** Including shares held with nominees*
Source: Investment Manager

- Operating Efficiency history of GPTL:



* The normative availability of GPTL is 98% in the year 2025. But, as mentioned above in the report about the breakdown of transformer in FY25, the actual availability dropped down to 96.84% in FY25. The incentive loss for the same was reflected in the Financials of FY25.

B. GPTL- II

- GPTL was awarded an extension project under Cost plus mechanism as per order of Central Transmission Utility of India on 24th June 2022, having reached 50% of its total project cost. Since detailed financial projections up to the Commercial Operation Date (COD) are not available, the estimated value of this ongoing project has been factored into GPTL's overall valuation using NAV method.

- Summary of project details of GPTL- II are as follows:

Parameters	Details –GPTL II
Location of Assets	Haryana
SCOD as per TSA	September, 2025
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following substations:

Sub-Station	Specifications	COD	Location
2*220 Kv Line bays (GIS) at 440/220 Kv Prithla (GPTL) S/s	2*220 kV line bays	1st April 2026	Haryana

11. NER-II Transmission Limited ("NERTL")

- The NERTL project was awarded to SGL 4, wholly owned subsidiary of SPGVL (now merged with SPTL), by the Ministry of Power for a period of 35 years from SCOD of NERTL on a BOOM basis. NERTL was granted Transmission License by CERC on 23rd May 2017. The project has 11 elements including two substations of~1,260 MVA capacity and four transmission lines extending over ~898 circuit kilometers. The asset spans across the states of Assam, Arunachal Pradesh and Tripura.

- Due to change in law during the construction period, NERTL has been claiming an increase in Non Escalable Transmission charges through an order dated 19th May 2024 at the rate of 2.39%, from its Long Term Transmission Customers. I have considered such an increase in Non Escalable Transmission charges based on representation by the Investment Manager

- Summary of project details of NERTL are as follows:

Parameters	Details – NERTL
Project Cost	INR 30,649 Mn
Total Length	832 Ckms /449 kms
Location of Assets	Assam, Arunachal Pradesh, Tripura
TSA signing Date	26th December 2016
SCOD as per TSA	31st March 2020 to 30th November 2020
Revised SCOD	31st August 2020 and 30th April 2021
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- My team has conducted physical site visit of the transmission assets of NERTL on 29th August 2025. Refer below for the pictures of the plant site:

12. Raichur Sholapur Transmission Company Private Limited ("RSTCPL")

- RSTCPL was incorporated on 19th November 2009 to establish transmission system for evacuation of power from Krishnapattnam UMPP and other IPPS in southern region to beneficiaries in the western region of India. The SPV was responsible for the construction of one line of 765 KV between Raichur and Sholapur.

- As informed by the Investment Manager, based on the due diligence done, 3 towers of the transmission line of the SPV collapsed in the month of May 2019 due to heavy storms, due to which the availability for the months of June and July 2019 were affected. The deemed availability was granted to the SPV for the month of June 2019, but not for July 2019. The Investment Manager has informed that it was an exceptional one-time event and that they do not foresee any deficiency in the transmission assets of the SPV.

- Summary of project details of RSTCPL are as follows:

Parameters	Details – RSTCPL
Project Cost	INR 3200 Mn
Total Length	208 ckms
Location of Assets	Karnataka, Maharashtra
SCOD as per TSA	7th Jan 2014
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

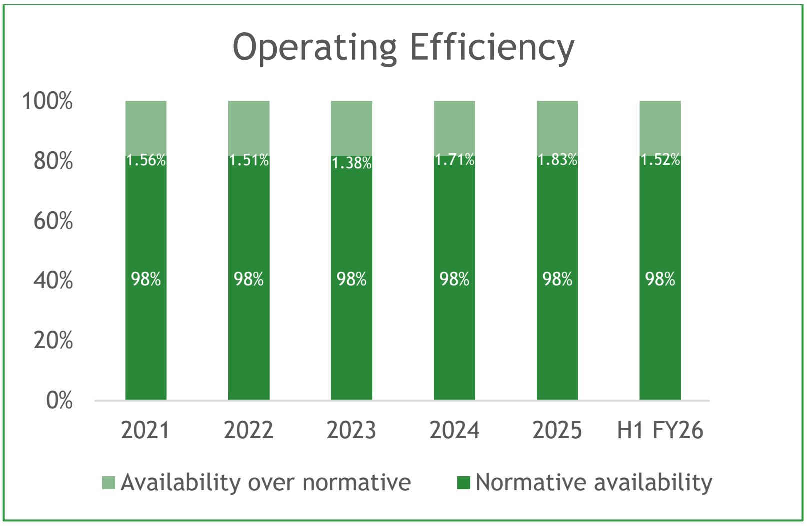
- Operating Efficiency history of RSTCPL:



- My team has conducted physical site visit of the transmission assets of RSTCPL on 4th October 2025. Refer below for the pictures of the plant site:

13. Khargone Transmission Limited ("KhTL")

- KhTL was incorporated to establish transmission system for Transmission System Strengthening in WR associated with Khargone Thermal Power Plant of 1,320 MW (2×660MW) at Khargone in the state of Madhya Pradesh. The SPV was responsible for the construction of 4 transmission lines between Maharashtra and Southern region. The project will evacuate 1,320 MW of power generated by the Khargone Power Plant to 765 kV Khandwa substation to further distribute it downstream across Madhya Pradesh, Maharashtra, Chhattisgarh, Gujarat, Goa, Daman & Diu, and Dadra & Nagar Haveli.

- KhTL was incorporated on 28th November 2015 by REC Transmission Projects Company Limited. After successful completion of the bidding process for the project, the SPV was transferred to a Sterlite Grid 4 Limited vide share purchase agreement dated 22nd August 2016. Further, during FY 2021-22, Sterlite Grid 4 Limited was merged into its immediate holding company, i.e. Sterlite Power Transmission Limited.

- Due to change in law (GST impact) during the construction period, KhTL has been claiming an increase in Non Escalable Transmission charges at the rate of ~1.57% from its Long-Term Transmission Customers. I have considered such an increase in transmission charges based on the representation by the Investment Manager.

- Summary of project details of KhTL are as follows:

Parameters	Details – khTL
Project Cost	INR 16,630 Mn
Total Length	626 ckms
Location of Assets	Maharashtra
TSA signing Date	14th March 2016
Line Voltage Class (Kv)	765 Kv / 400 kv
SCOD as per TSA	31st July 2019
Concession period	35 years from SCOD
Actual COD	13th December 2021
Trust's stake	100% economic ownership

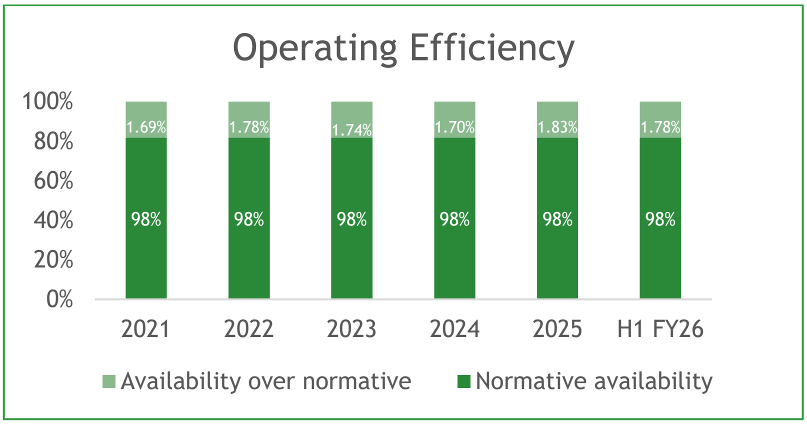
- Operating Efficiency history of KhTL:



- My team has conducted physical site visit of the transmission assets of KhTL on 4th October 2025. Refer below for the pictures of the plant site:

14. Jhajjar KT Transco Private Limited ("JKTPL")

- The JKTPL project was awarded on 28th May 2010 to a joint venture between Kalpataru Power Transmission Ltd and Techno Electric & Engineering Co. Ltd., by the Haryana Vidyut Prasaran Nigam Limited ("HVPNL") for a period of 25 years effective from the appointed date on a DBFOT basis. JKTPL was granted Transmission License by CERC on 26th October 2010. JKTPL consists of ~100 kms 400 KV Jhajjar – Kabalpur - Dipalpur transmission line and two substations with a transformation capacity of 830 MVA each in the state of Haryana. It spans over 205 ckms, while delivering from the 1,320 MW thermal power plant in Jhajjar to enhance power transmission in the region.

- Summary of project details of JKTPL are as follows:

Parameters	Details – JKTPL
Total Length	205 ckms
Location of Assets	Haryana
SCOD as per TSA	12th March 2012
Concession period	25 years from the issue of Transmission License, extendable for 10 years as per TSA
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
Jharli (Jhajjar) to Kabulpur (Rohtak)	70	14 Dec 2017	Haryana
Kabulpur (Rohtak) to Dipalpur (Sonepat)	134	14 Dec 2017	Haryana

Dipalpur AIS Substation (Sonepat)	NA		Haryana

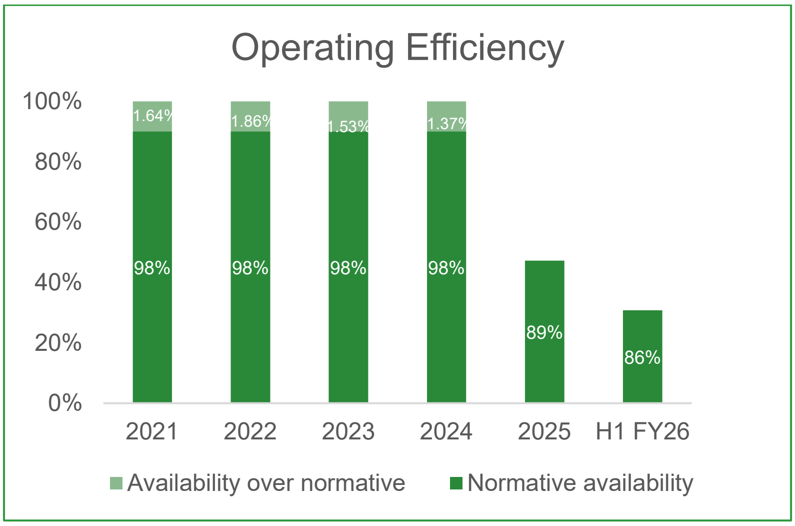
Source: Investment Manager

- The equity shareholding of JKTPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastucture Trust	2,26,57,143	100%
	Total	**2,26,57,143**	**100%**

** Including shares held with nominees*
Source: Investment Manager

- Operating Efficiency history of JKTPL:



*The normative availability of JKTPL is 98% in the year 2025. But, as mentioned above in the report about the breakdown of transformer in FY25, the actual availability dropped down to 89.45% in FY25. The incentive loss for the same was reflected in the Financials of FY25.

15. Parbati Koldam Transmission Company Limited ("PrKTCL")

- PrKTCL owns and operate 280 Km (458 circuit kms) of 400 kV transmission lines across Himachal Pradesh and Punjab. PrKTCL evacuate power from power plants situated in Himachal Pradesh, viz. 800MW Parbati – II and 520MW Parbati – III Hydro Electric Plant (HEP) of NHPC, 800 MW Koldam HEP project of NTPC and 100 MW Sainj HEP of HPPCL.

- PrKTCL was incorporated on 2nd September 2002 and promoted to undertake the construction and operation of transmission line in area of Punjab and Haryana on BOO basis. PrKTCL has been granted transmission license under section 14 of the Act. PrKTCL operate 458 ckm of 400 kV lines in the area of Punjab and Himachal Pradesh. The tariff of PrKTCL is determined under section 62 of the Act read with Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019. The transmission assets have been developed under a cost-plus tariff model which includes construction, maintenance and operation of transmission lines and evacuating power from power plants situated in Himachal Pradesh and Punjab, with total line length of ~458 Ckms

- Summary of project details of PrKTCL are as follows:

Parameters	Details – PrKTCL
Project Cost	INR 9,354 Mn
Total Length	458 ckms
Location of Assets	Himachal Pradesh, Punjab
RSA signing Date	24th December 2013
SCOD as per TSA	03rd November 2015
Concession period	35 Years
Trust's stake	74% economic ownership (Balance 26% stake held by PGCIL)

Source: Investment Manager.

- The project consists of the following transmission lines and substations:

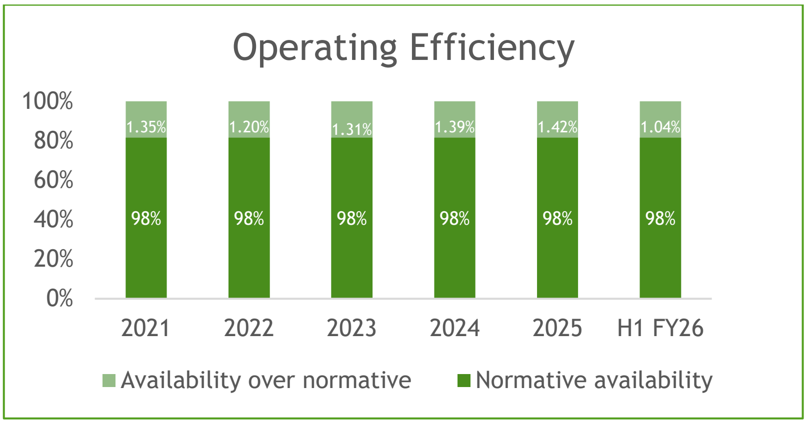
- Operating Efficiency history of PrKTCL:



16. Kallam Transmission Limited ("KTL")

A. KTL- I

- KTL-I consists of a LILO multi circuit line of ~18 kms. KTL I commenced its operations on 14th February 2024

- KTL-I consists of a LILO multi circuit line of ~18 kms. KTL I commenced its operations on 14th February 2024. This commencement date was revised in this quarter to 14th August 2024 in accordance with the Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2023.

- KTL project will strengthen the transmission system in Maharashtra by improving the grid availability for evacuation & integration of renewable energy in the state. The project is situated in a low-risk plain topography. Its objective is to establish a transmission system for evacuation of power from renewable energy projects in Osmanabad area (1 GW) in Maharashtra.

- The KTL project was awarded to the consortium of IndiGrid 1 Limited and IndiGrid 2 Private Limited (wholly-owned subsidiaries of IndiGrid Infrastructure Trust), by REC Power Development and Consultancy Limited for a period of 35 years from COD of KTL on a BOOM basis through tariff based competitive bidding

- Summary of project details of KTL I are as follows:

Parameters	Details –KTL I
Project Cost	INR 2300 Mn
Total Length	~66 Ckms
Total Capacity (MVA)	1,260
Location of Assets	Maharashtra
TSA signing Date	30th September 2021
SCOD as per TSA	27th June 2023
Concession period	35 years from SCOD
COD	14th August 2024
Trust's stake	100% economic ownership

19. Ishanagar Power Transmission Limited ("IPTL")

- The consortium of IndiGrid 2 Private Limited and IndiGrid 1 Limited, wholly-owned subsidiaries of IndiGrid Infrastructure Trust, has completed the acquisition of 100% of the paid-up capital and management control of Ishanagar Power Transmission Limited (IPTL) and Dhule Power Transmission Limited (DPTL) from REC Power Development and Consultancy Limited on February 9, 2024.

- Ishanagar Power Transmission Limited (IPTL), incorporated on June 9, 2023, was established for development of a substation in Madhya Pradesh. The substation is designed to operate at two voltage levels: 765/400 kV and 400/220 kV. Additionally, the project includes a Loop-In Loop-Out (LILO) of a single circuit of the 765 kV double circuit line, extending approximately 18 kms.

- This project was under construction at the time of Valuation Date.

- Summary of project details of IPTL are as follows:

Parameters	Details – IPTL
Project Cost	INR 6,500 Mn
Total Length	36 ckms
Location of Assets	Madhya Pradesh
TSA signing Date	23rd January 2024
SCOD as per TSA	February, 2026

20. Ratle Kiru Power Transmission Limited ("RKPTL")

- IndiGrid 2 Private Limited (wholly owned subsidiary of IndiGrid Infrastructure Trust) has received the Letter of Intent ("LOI") dated February 28, 2025, from REC Power Development and Consultancy Limited to establish Inter-State transmission system for "Transmission scheme for evacuation of power from Ratle HEP (850 MW) & Kiru HEP (624 MW): Part-A" on Build, Own, Operate and Transfer (BOOT) basis.

- The project will be constructed over a period of ~24 months and will have annual transmission charges worth ~INR 1952.32 million post commissioning.

- IndiGrid 2 Private Limited (wholly-owned subsidiary of IndiGrid Infrastructure Trust) has completed the acquisition of 100% paid-up capital and management control of Ratle Kiru Power Transmission Limited ("RKPTL") from REC Power Development and Consultancy Limited ("REC") on March 24, 2025.

- Summary of project details of RKPTL are as follows:(need to be filled)

Parameters	Details – RKPTL
Project Cost	INR 14,699 Mn
Total Length	177 ckm
Location of Assets	Jammu and Kashmir
TSA signing Date	24th March 2025
SCOD as per TSA	31st March 2027

21. Terralight Solar Energy SitamauSS Private Limited ("TL SitamauSS")

- TL SitamauSS is engaged in the business of providing transmission and step-up services to its shareholder companies. The services provided by TL SitamauSS are essential and integral to the functioning of the solar plants owned by these shareholder companies. TL SitamauSS serves as an interconnection between the electricity delivery point and the electricity generating plant.

- Moreover, TL SitamauSS offers transmission services to four Special Purpose Vehicles (SPVs). Among these SPVs, two are owned by VRET (Globus and TL Patlasi), while the other two are owned by Brookfield (Focal Photovoltaic India Private Limited and Focal Renewable Energy Two Private Limited). VRET hold a 66.06% ownership stake in TL SitamauSS through its SPVs, TL Patlasi and Globus, with each SPV owning 33.03%, the remaining balance is owned by Brookfield entities.

- Considering the SPV's nature of being used for captive consumption and functioning solely as a cost center without generating any revenue, the Investment Manager has decided not to value the same for the current valuation exercise.

- Summary of project details of TL SitamauSS are as follows:

Parameters	Details – TL SitamauSS
Location of Assets	Madhya Pradesh
TSA signing Date	NA
Trust's stake	100% economic ownership

Source: Investment Manager

- The equity shareholding of TL SitamauSS as on Report Date is as follows:

22. Koppal Narendra Transmission Ltd ("KNTL")

- Koppal Narendra Transmission Limited ("KNTL" or the "Target SPV" or the "SPV") is a Special Purpose Vehicle (SPV) incorporated on 18th November, 2019 having its registered office in New Delhi. KNTL consists of two projects – Inter State Transmission System (ISTS) TBCB project (KNTL-1) & regulated Tariff Mechanism (RTM) project (KNTL-2), developed by ReNew Power Limited ('RPL") through its subsidiary RTVPL. KNTL project will evacuate the power generated from renewable sources in Koppal wind energy zone (Karnataka) of ~2,500 MW.

- KNTL was awarded a Letter of Award on 2nd January 2024, for its extension project i.e., KNTL-2. The revenue from this project will be realized on a Cost-Plus basis.

- Summary of project details of KNTL-1 are as follows

Parameters	Details – KNTL
Project Cost	INR 7,891 Mn
Total Length	276 ckms
Location of the Asset	Karnataka
SCOD as per TSA	26th August, 2023
Actual COD	12th December, 2023
Concession period	35 years from COD
Balance Project Life	≈ 33 years and 9 months

- Summary of project details of KNTL-2 are as follows

Parameters	Details – KNTL
Model	BOOM
Project Cost	INR 608.4 Mn
Total Length	276 ckms
Location of the Asset	Karnataka
SCOD as per TSA	30th June, 2025
Actual COD	NA
Concession period	35 years from COD
Balance Project Life	35 years

Solar Assets:

23 & 24. IndiGrid Solar-I (AP) Private Limited (“ISPL 1”) and IndiGrid Solar-II (AP) Private Limited (“ISPL 2”)

- ISPL 1 was incorporated on 14th July 2016 and ISPL 2 was incorporated on 9th July 2016. These Solar Assets have each set up and commissioned a 50 MW (AC) solar photo voltaic power generation system at Annanthapuramu Solar Park in the state of Andhra Pradesh. Power generated from these Solar Assets is sold under long term Power Purchase Agreement (“PPA”) to Solar Energy Corporation of India Limited (“SECI”).
- SECI has further signed PPA with Eastern and Southern Power Distribution Companies of Andhra Pradesh - APEPDCL & APSPDCL for entire capacity.
- The Solar Assets were selected through competitive reverse bidding under JNNSM Phase – II Batch-III, Tranche-IV. SECI is the nodal agency for implementation of Ministry of New & Renewable Energy (“MNRE”) schemes for developing grid connected solar power capacity through Viability Gap Funding (“VGF”) mode.
- These Solar Assets have entered into a leasehold agreement for the land parcel from APSCPL for a period of 25 years from the COD, which can be extended through mutual agreement.

- Summary of project details of ISPL 1 and ISPL 2 are as follows:

Parameters	ISPL 1	ISPL 2
Project Cost	INR 3,130 Mn	INR 3,149 Mn
Installed Capacity (AC)	50 MW	50 MW

27. Terralight Kanji Solar Private Limited ("TL Kanji")

- TKSPL (earlier known as Shapoorji Pallonji Solar PV Private Limited) is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Tiruvannamalai, Tamil Nadu.

- TKSPL had entered into a PPA with Tamil Nadu Generation and Distribution Corporation Ltd. ("TANGEDCO") on 12th September 2014 for implementation of a 36 MW Solar Photovoltaic Power Generation Unit in the State of Tamil Nadu, under which it has a commitment to sell electricity for a period of 25 years.

- TL Kanji acquired 12.42 MW (10.00 MW AC) solar project from Jakson Power Private Limited in Aug '22. Lalitpur Project is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Lalitpur, Uttar Pradesh.

- TL Kanji had entered into a PPA with Uttar Pradesh Power Corporation Limited ("UUPCL") on 12th September 2014 for implementation of a 12.42 MW Solar Photovoltaic Power Generation Unit in the State of Uttar Pradesh, under which it has a commitment to sell electricity for a period of 12 years. As per the PPA the term can be extended to further 13 years on willingness of the developer.

Project I - TKSPL

- Summary of project details of TKSPL are as follows:

Parameters	TKSPL
Installed Capacity (AC)	30.00 MW
Installed Capacity (DC)	36.00 MW
Plant Location	Tiruvannamalai, Tamil Nadu (36.00 MW)
Actual COD	26th Mar 2016
Land Area	160.03 Acres
O&M Contractor	AVI Solar Energy Pvt. Ltd.
PPA Counterparty	Tamil Nadu Generation and Distribution Corporation Ltd.
PPA Date	12th Sept 2014

- My team had conducted physical site visit of TL Kanji on 26th August 2025. Refer below for the pictures of the plant site:

28. Terralight Rajapalayam Solar Private Limited ("TL Raj")

- Terralight Rajapalayam Solar Private Limited (earlier known as Shapoorji Pallonji Suryaprakash Private Limited) is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Rajapalayam, Tamil Nadu.

- TL Raj had entered into a PPA with TANGEDCO on 27th September 2017 for implementation of a 54.00 MW Solar Photovoltaic Power Generation Unit in the State of Tamil Nadu, under which it has a commitment to sell electricity for a period of 25 years.

- Summary of project details of TL Raj are as follows:

Parameters	TL Raj
Installed Capacity (AC)	50.00 MW
Installed Capacity (DC)	54.00 MW
Plant Location	Rajapalayam, Tamil Nadu
Actual COD	26th Sep 2018
Land Area	224.48 Acres
O&M Contractor	AVI Solar Energy Pvt. Ltd.
PPA Counterparty	Tamil Nadu Generation and Distribution Corporation Ltd. (TANGEDCO)
PPA Date	27th Sep 2017
PPA Term	25 years from Actual COD
PPA Tariff	INR 3.47 per unit
Trust's stake	100% economic ownership
Scheduled Commercial Operation Date (SCOD)	26th Sep 2018

29. Solar Edge Power and Energy Private Limited ("Solar Edge")

- Solar Edge is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Beed (104 MW) & Jalgaon (65 MW) in Maharashtra.

- It had entered into a Power Purchase Agreement ("PPA") with Solar Energy Corporation of India Ltd. ("SECI") on 10th February 2017 for implementation of a 169.00 MW Solar Photovoltaic Power Generation Unit in the State of Maharashtra, under which it has a commitment to sell electricity for a period of 25 years.

- Summary of project details of Solar Edge are as follows:

Parameters	Solar Edge
Installed Capacity (AC)	130 MW
Installed Capacity (DC)	169 MW
Plant Location	Beed, Maharashtra (104 MW) Jalgaon, Maharashtra (65 MW)
Actual COD	18th April 2018
Land Area	718.99 Acres
O&M Contractor	Param Renewable Energy Pvt. Ltd.
PPA Counterparty	Solar Energy Corporation of India Ltd. (SECI)
PPA Date	10th Feb 2017
PPA Term	25 years from Actual COD
PPA Tariff	INR 4.43 per unit
Trust's stake	100% economic ownership
Scheduled Commercial Operation Date (SCOD)	23th Dec 2017

30. Terralight Solar Energy Charanka Private Limited ("TL Charanka")

- Terralight Solar Energy Charanka Private Limited (earlier known as Sindicatum Solar Energy Gujarat Private Limited) is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Patan, Gujarat.

- TL Charanka had entered into a PPA with Gujarat Urja Vikas Nigam Limited ("GUVNL") on 29th May 2010 for implementation of a 15.00 MW Solar Photovoltaic Power Generation Unit in the State of Gujarat, under which it has a commitment to sell electricity for a period of 25 years.

- Summary of project details of TL Charanka are as follows:

Parameters	TL Charanka
Installed Capacity (AC)	13.00 MW
Installed Capacity (DC)	15.00 MW
Plant Location	Patan, Gujarat
Actual COD	28th Mar 2012
Land Area	78.52 Acres
O&M Contractor	Mitarsh Energy Private Limited
PPA Counterparty	Gujarat Urja Vikas Nigam Limited
PPA Date	29th May 2010
PPA Term	25 years from Actual COD
PPA Tariff	INR 11.32 till FY 23 INR 11.11 during FY 24 INR 6.99 during FY 25 INR 6.47 from FY 26 till FY 37
Trust's stake	100% economic ownership

33. Universal Saur Urja Private Limited ("USUPL")

- USUPL is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Mahoba District, Uttar Pradesh. The Company had entered into a PPA with Uttar Pradesh Power Corporation Ltd. on 6th April 2015 for implementation of a 35.24 MW (capacity now augmented to 36.98 MW) Solar Photovoltaic Power Generation Unit in the State of Uttar Pradesh, under which it has a commitment to sell electricity for a period of 25 years.
- USUPL acquired Jodhpur Project 25.88 MW (20.00 MW AC) solar project from Jakson Power Private Limited during FY 23. Jodhpur Project is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Jodhpur, Rajasthan. The Company had entered into a PPA with NTPC Vidyut Vyapar Nigam Ltd. on 25th January 2012 for implementation of a 25.88 MW Solar Photovoltaic Power Generation Unit in the State of Jodhpur, under which it has a commitment to sell electricity for a period of 25 years.

Project I - USUPL

- Summary of project details of USUPL are as follows:

Parameters	USUPL
Installed Capacity (AC)	30.00 MW
Installed Capacity (DC)	36.98 MW
Plant Location	Mahoba District, Uttar Pradesh
Actual COD	15-Sept-16
Land Area	37.06 Acres
O&M Contractor	Meera Corporation
PPA Counterparty	Uttar Pradesh Power Corporation Ltd.

38. Godawari Green Energy Private Limited ("GGEL")

- GGEL is engaged in carrying on the business of setting up, generating and selling of renewable power from its thermal solar power plant located at Naukh, Rajasthan, India. The Company has entered into a PPA with NTPC Vidhyut Vyapar Nigam Limited for implementation of a 50 MW Concentrated Solar Power Generation Unit in the state of Rajasthan, under which it has a commitment to sell electricity for a period of 25 years.
- The technology of GGEL plant is Parabolic-trough solar concentrating systems. This Concentrating Solar Power (CSP) produces electricity by reflecting sunlight via solar collectors to heat a receiver to high temperatures. This heat is transformed first into mechanical energy, by turbines or Stirling engines, and then to electricity.

- Summary of project details of GGEL are as follows:

Parameters	GGEL
Installed Capacity (AC)	50 MW
Installed Capacity (DC)	50 MW
Plant Location	Naukh, Rajasthan, India
Actual COD	19-Jun-13
Land Area	~609 acres
O&M Contractor	In-house
PPA Counterparty	NTPC Vidhyut Vyapar Nigam Limited
PPA Date	19-Sep-13
PPA Term	25 Years from Actual COD
PPA Tariff	INR 12.20 per unit
Trust's stake	100% economic ownership
Technology of Plant	Parabolic-trough solar concentrating systems

39. Jaisalmer Urja VI Private Limited ("JUPL")

- Jaisalmer Urja VI Private Limited (hereinafter referred as "JUPL" or the "Company") is a private limited company domiciled in India. JUPL was incorporated on 19th November 2019 for carrying out business activities relating to generation of power through non-conventional and renewable energy sources. JUPL belongs to the ReNew Power Group ("ReNew Power").

- ReNew Power participated in tender floated by SECI dated June 28, 2019. Subsequently in the e-Reverse Auction held in October 2019, it won 300 MW capacity at tariff of 2.71 INR / kWh. ReNew Power successfully setup a 300 MW/420 MW ground mounted solar power project and the project was commissioned on December 2021 and official offtake from SECI started from May 2022.

- The project is located in Fatehgarh Tehsil of Jaisalmer District in Rajasthan spread across around 980 acres of land. Out of 980 acres, around 810 acres land is privately leased and remaining 170 acres is self-owned. The power from the project is evacuated through Fatehgarh-II Pooling station and around 25 km of transmission lines majorly owned and utilized by ReNew Power for evacuation of different solar and wind projects in its portfolio.

- ReNew Power develops, builds, owns and operates utility scale wind and solar energy projects as well as distributed solar energy projects that generate energy for commercial and industrial customers.

- Summary of project details of JUPL are as follows:

Parameters	JUPL
Installed Capacity (AC)	300 MW
Installed Capacity (DC)	420 MW
Plant Location	Village Mandhopura, Fatehgarh Tehsil, Jaisalmer District, Rajasthan
Actual COD	11th May 2022
Land Area	980 acres (810 acres land privately leased)
O&M Contractor	ReNew Services Private Limited
PPA Counterparty	Solar Energy Corporation of India Limited (SECI)
PPA Date	10th August 2020
PPA Term	25 Years from Actual COD
PPA Tariff	INR 2.71/ Unit
Trust's stake	100% economic ownership

40. ReNew Surya Aayan Private Limited ("RSAPL")

- ReNew Surya Aayan Private Limited ("RSAPL" or "the Target" or the "SPV") is a Special Purpose Vehicle (SPV) incorporated on 22nd June 2020 having its registered office in New Delhi and is a wholly owned subsidiary of ReNew Solar Power Private Limited.

- Solar power plant operated by RSAPL is located at Kalijal and Nagarda villages in Shiv Tehsil, Barmer District, Rajasthan. In July 2020, Renew Power was selected in the competitive bidding process for setting up of 300 MW capacity solar power plant at PPA tariff rate of INR 2.37 / kWh.

- Renew Power successfully set up a 300 MW (AC) /410 MW (DC) ground mounted solar power project. 290MW of the project was commissioned in March 2024 with balance 10MW commissioned in June 2024 and official offtake under PPA by SECI started from January 2025. However, project sold power to SECI from March 2024.

- Summary of project details of RSAPL are as follows:

Parameters	RSAPL
Installed Capacity (AC)	300 MW
Installed Capacity (DC)	410 MW
Plant Location	Village Mandhopura, Fatehgarh Tehsil, Jaisalmer District, Rajasthan
Actual COD	290 MW- 31st March 2024, 10 MW- 8th June 2024
Land Area	959 acres (954 acres land privately leased)
O&M Contractor	ReNew Services Private Limited

Battery Energy Storage System Assets:

41. Kilokari BESS Private Limited ("KBPL")

- Kilokari BESS Private Limited ("KBPL") is a battery energy storage system project which is located at the 33/11 kv substation of BRPL in Kilokari, Delhi.

- A consortium comprising IndiGrid 2 Private Limited (a wholly owned subsidiary of Trust) and Amperehour Solar Technology Private Limited has been granted the Letter of Intent (LOI) / Letter of Award (LOA) on October 23, 2023, by BSES Rajdhani Power Limited. The LOI/LOA pertains to the "Design, Supply, Testing, Installation, Commissioning, Operation and Maintenance of 20 MW/ 40 MWh Battery Energy Storage Systems in Delhi" under the BOOT framework.AAThe trust has incorporated Kilokari BESS Private Limited as on 6th November 2023 for this purpose where in IGL 2 holds 95% stake and Amperehour Solar Technology Private Limited holds 5% stake.

- Summary of project details of KBPL are as follows:

Parameters	KBPL
Installed Capacity	20MW/40MWh (Actual installed capacity is 48 MWh)
Plant Location	Kilokari, Delhi
Battery used	Lithium- ion batteries
Actual COD	01-Apr-25
O&M Contractor	In-House
BESSA Counterparty	BSES Rajdhani Power Limited ("BRPL")
BESSA Date	22-Dec-23
BESSA Term	12 Years from Actual COD
BESSA Tariff	INR 5.76 Mn/MW/Year
Trust's Stake	95% economic ownership (Balance 5% stake held by Amperehour Solar Technology Private Limited)

42. Gujarat BESS Private Limited ("GBPL")

- IndiGrid 2 Private Limited (a wholly owned subsidiary of IndiGrid Infrastructure Trust), has received the Letter of Intent (LOI) / Letter of Award (LOA) dated March 13, 2024, from Gujarat Urja Vikas Nigam Limited ("GUVNL") for Setting up of 360 MWh (180 MW x 2 hrs) Standalone Battery Energy Storage Systems in Gujarat for "on Demand" usage under Tariff-based Competitive Bidding. The project will be setup under BOO model. The project shall have an annual revenue of over INR 97 Crore with a concession tenure of 12 years post Commercial Operation Date (COD).

- The project will be located at Charal, Sanand in Gujarat. Gujarat BESS Private Limited ("GBPL") is a battery energy storage system project, which is currently non- operational.

- Summary of project details of GBPL are as follows:

Parameters	GBPL
Installed Capacity	180MW/360MWh
Plant Location	Gujarat
Battery used	Lithium- ion batteries
Actual COD	NA
BESSA Counterparty	Gujarat Urja Vikas Nigam Limited ("GUVNL")
BESSA Date	20th June 2024
BESSA Term	12 Years from Actual COD
BESSA Tariff	INR 0.45 Mn/MW/Month
TRUST's stake	100% Economic Ownership

Source: Investment Manager

43. Rajasthan BESS Private Limited ("RBPL")

- IndiGrid 2 Private Limited, a fully-owned subsidiary of IndiGrid Infrastructure Trust, has secured a Letter of Intent (LOI) / Letter of Award (LOA) dated November 22, 2024, from NTPC Vidyut Vyapar Nigam Limited (NVNN) for setting up a 250 MW / 500 MWh Battery Energy Storage System (BESS) in Rajasthan for "ondemand" usage under tariff-based competitive bidding framework. The project will be setup under Build Own Operate (BOO) model and is projected to generate annual revenue exceeding INR 71 crore, with a concession term of 12 years starting from the Commercial Operation Date (COD).

- RBPL was set up for development of 500 MWh (250 MW x 2 hrs) Standalone Battery Energy Storage Systems in Rajasthan for "on Demand" usage and will be set-up under BOO model. RBPL, a battery energy storage system project, will be located at Bhadla in Rajasthan and currently non - operational.

- Summary of project details of RBPL are as follows:

Parameters	RBPL
Installed Capacity	250MW/500MWh
Plant Location	Rajasthan
Battery used	Lithium- ion batteries
Actual COD	NA
BESSA Counterparty	NTPC Vidyut Vyapar Nigam Limited ("NVVNL")
BESSA Date	21st December 2024
BESSA Term	12 years from the date of Actual COD
BESSA Tariff	INR 0.27 Mn/MW/Month
TRUST's stake	100% Economic Ownership

Source: Investment Manager

- The equity shareholding of RBPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited*	10,000	100%
	Total	**10,000**	**100%**

** Including shares held with nominees*

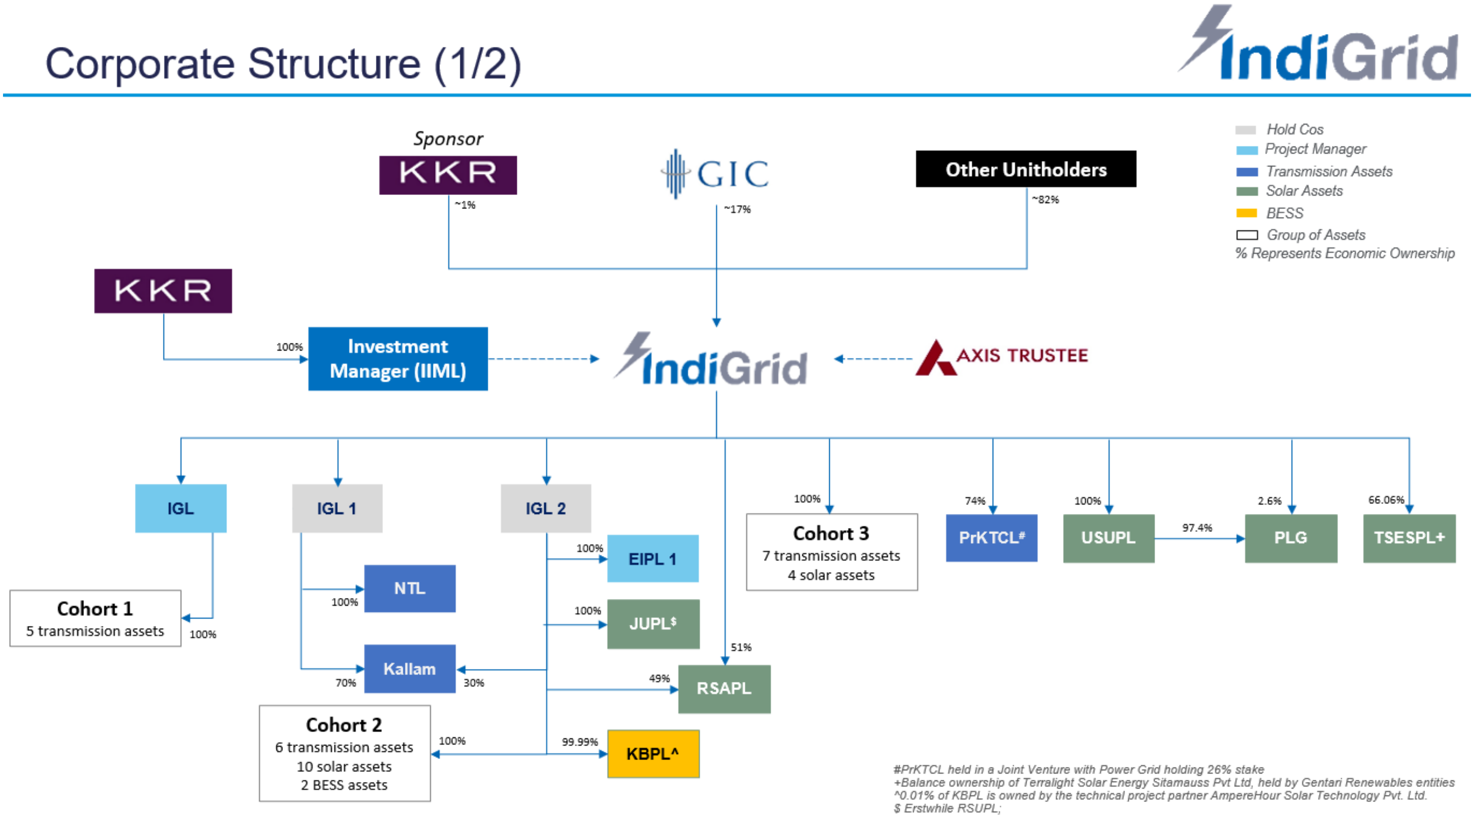
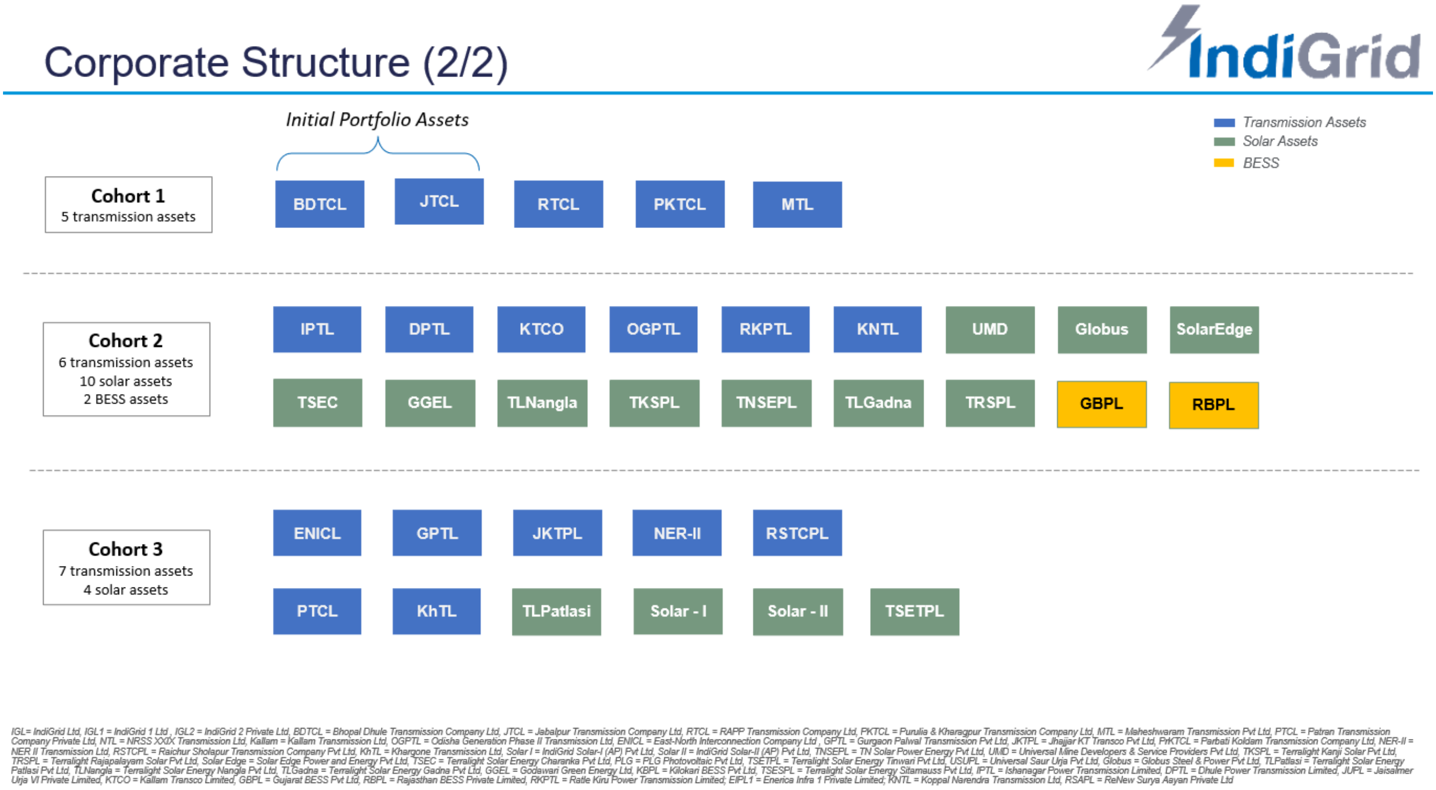
4. Structure of the Trust

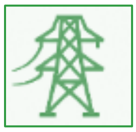
Following is the structure of the Trust as on 30th September 2025:





5. Overview of the Industries

Part A: Transmission Sector



5.1. Introduction:

5.1.1 India is the third largest producer and third largest consumer of electricity in the world, with the installed power capacity reaching 490 GW as of 31st July 2025 *(Source: Central Electricity Authority)*. The country also has the fifth largest installed capacity in the world. The country has 4th raking for renewable energy installed capacity.

5.1.2 While conventional sources currently account for 52% of installed capacity, with the Government of India's ("GOI") ambitious projects and targets, power generated from Renewable Energy Sources ("RES"), which currently accounts for 48% of installed capacity, is expected to quickly overtake power generated from conventional sources. With a consistent focus on the renewable sector, the percentage share of installed capacity is expected to shift towards renewable capacity.

5.1.3 Peak Energy Demand grew at a compounded annual growth rate ("CAGR") of 3.59% from 148 GW in FY 2014 to 249 GW in FY 2025, while peak supply grew at a CAGR of 5% over the same period. As a result, the peak shortage dropped from 7 GW to 0.2 GW. The peak power demand in the country stood at 242.77 GW in June 2025.

5.1.4 The transmission sector is divided into inter-state and intra-state transmission projects. In addition, transmission network also includes cross-border interconnections with neighboring countries viz, Bangladesh, Bhutan, Nepal and Myanmar to facilitate optimal utilization of resources.

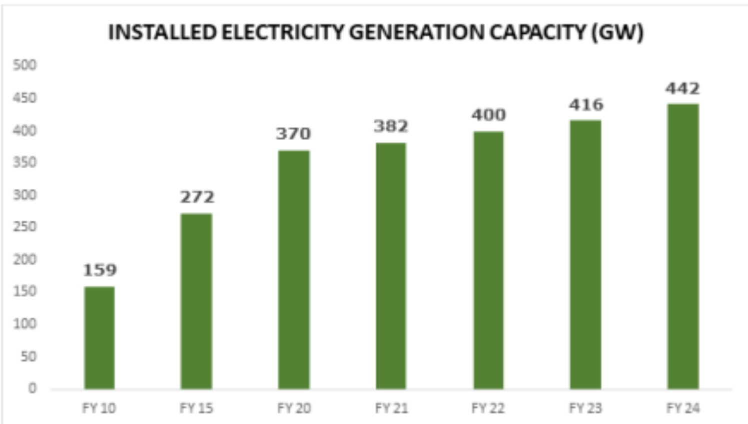
5.2. Power Demand and Supply:

5.2.1. India has seen a robust growth in the installed power generation capacity in the past four years. With a generation of 1,844 Terawatt hour ("TWh"), India is the third largest producer and the third largest consumer of electricity in the world.

5.2.2. The Government plans to double the share of installed electricity generation capacity of renewable energy to 40% till 2030. With a commitment to achieving 500 GW of non-fossil fuel-based energy capacity by 2030, India is emerging as a global leader in clean energy. As on 31st July 2025, India's total non-fossil fuel-based energy capacity has reached 295..9 GW.

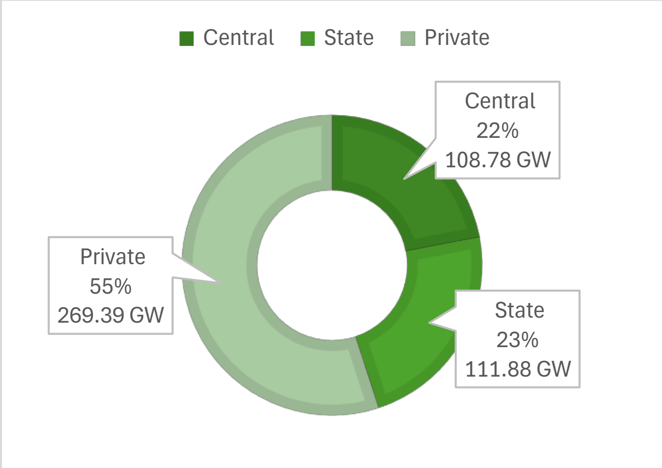
5.2.3. New renewable energy infrastructure can now be built within two years from initial plans through to completion, years faster than any new coal or LNG fired plants. Unlike conventional thermal generation capacity which takes more than 5 years, renewable capacity addition takes less than 2 years to develop.

5.2.4. India's per capita electricity consumption rose to a record 1,538 kilowatt-hours (kWh) in FY25, up from 1,395 kWh in the previous year, according to updated data released by the Ministry of Power.



(Source: Press Information Bureau)

5.2.5. Details of Installed power capacity in India are as follows:
Sector-wise total installed capacity as at 31st July 2025:



(Source: Central Electricity Authority)

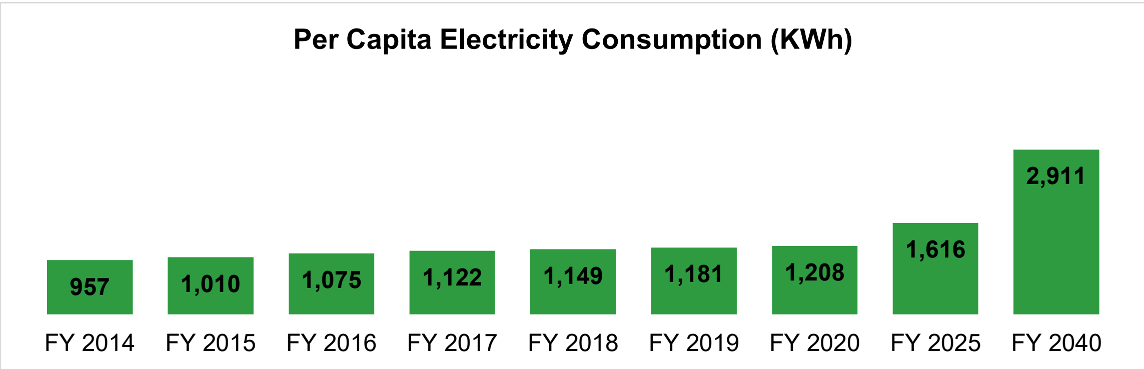
5.2.6. India's Total Installed Power Capacity as on 31st July 2025 (in GW)**:**

Particulars	Total Capacity (GW)	% of Total
Thermal:		
- Coal	216.45	40.1%
- Lignite	6.62	1.2%
- Gas	20.13	3.7%
- Diesel	0.6	0.1%
Nuclear	8.7	1.7%
Hydro	49.6	9.19%
Renewable Energy Source	237.49	44.01%
Total	**539.59**	**100.0%**

(Source: Central Electricity Authority)

5.2.7. New renewable energy infrastructure can now be built within two years from initial plans through to completion, years faster than any new coal or LNG fired plants. Unlike conventional thermal generation capacity which takes more than 5 years, renewable capacity addition takes less than 2 years to develop.

5.2.8. Per capita electricity consumption in India has surged to 1,395 kWh in 2023-24, marking a 45.8% increase (438 kWh) from 957 kWh in 2013-14.



5.2.9. In addition, various initiatives introduced by the GOI, such as Power for All, Deendayal Upadhyaya Gram Jyoti Yojana, Integrated Power Development Scheme (IPDS) and Ujwal DISCOM Assurance Yojana Scheme will improve and strengthen the demand and supply of electricity in India as well as assist the DISCOMs in improving operational and financial efficiencies.

5.3. Global Renewable Energy Outlook

5.3.1. In FY24 Solar and wind energy dominated new capacity additions, with solar capacity growing by 88% and surpassing hydropower and nuclear.

5.3.2. Global energy demand grew by 2.2% in 2024 – faster than the average rate over the past decade. Demand for all fuels and technologies expanded in 2024. The increase was led by the power sector as electricity demand surged by 4.3%, well above the 3.2% growth in global GDP, driven by record temperatures, electrification and digitalisation. Renewables accounted for the largest share of the growth in global energy supply (38%), followed by natural gas (28%), coal (15%), oil (11%) and nuclear (8%).

5.3.3. Global electricity consumption rose by nearly 1100 terawatt-hours (TWh) in 2024, more than twice the annual average increase over the past decade.

5.3.4. Under existing policies and market conditions, global renewable capacity is forecast to reach 7,300 GW by 2028. This growth trajectory would see global capacity increase to 2.5 times its current level by 2030, falling short of the tripling goal.

5.3.5. The driving forces behind growth in renewable energy capacity includes robust policy support, energy security priorities and improved competitiveness against fossil fuels, outweighing challenges like higher costs and supply chain issues

5.3.6. Escalating electricity prices from the energy crisis prompted policymakers, particularly in Europe, to prioritize energy security and seek alternatives to imported fossil fuels. This shift favors solar PV, especially for quick installation of residential and commercial systems to meet surging requirement for renewable energy.

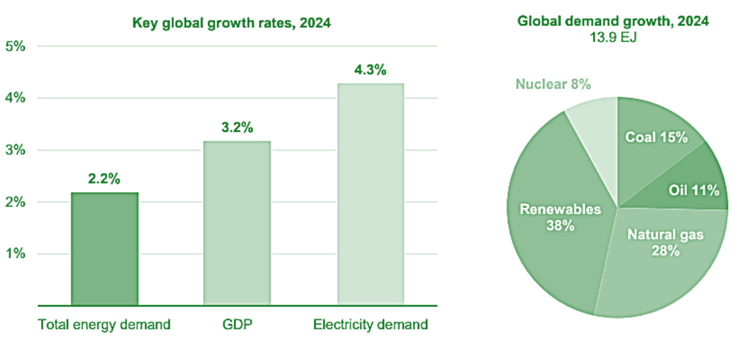
5.3.7. According to IEA's Renewable 2024 Report, over the coming six years several renewable energy milestones are expected to be achieved:

- In 2024, solar PV and wind generation together surpass hydropower generation.
- In 2025, renewables-based electricity generation overtakes coal-fired.
- In 2026, wind and solar power generation both surpasses nuclear.
- In 2027, solar PV electricity generation surpasses wind.
- In 2029, solar PV electricity generation surpasses hydropower and becomes largest renewable power source.
- In 2030, wind-based generation surpasses hydropower.

5.3.8. The rapid expansion of ever cheaper solar PV is expected to account for roughly half of global electricity demand growth to 2027, up from 40% in 2024. Globally, solar PV generation hit the 2 000 TWh mark in 2024, producing 7% of global electricity generation, up from 5% in 2023.

5.3.9. Renewable energy sector is expected to focus on various areas, including advanced solar photovoltaic (PV) technology, robotics, artificial intelligence (AI), large-scale data analysis (big data), decentralized energy storage systems, integration with power grids, blockchain technology, the production of green hydrogen, bioenergy, hydropower and wind power.

Key global growth rates and the share of energy demand growth by source, 2024



IEA. CC BY 4.0.

5.4.1 According to the Economic Survey 2018-19, additional investments in renewable energy plants up to the year 2022 were projected at approximately US$ 80 billion. For the period from 2023 to 2030, the required investment is estimated to be around US$ 250 billion. These figures highlight the substantial financial commitment needed to achieve the renewable energy targets.

India's macroeconomic stability has improved, coupled with increased government expenditure in infrastructure sectors. These factors have contributed to enhancing India's ranking in the Global Competitiveness Index (GCI), which rose to 39th in 2024 from 43rd in 2019-20. This improved ranking reflects the country's strengthened economic fundamentals and competitiveness on the global stage.

5.4. India's economic outlook:

India's economic landscape has seen remarkable developments in recent times, showcasing its robust growth and strategic shifts:

5.4.2 In the fiscal year 2025–26, India's economic growth is projected to rise to **6.7%**, up from **6.4%** in the previous year, positioning the country as one of the fastest-growing economy within the G20. Additionally, India has surpassed the Japan to become the fourth largest global economy and overtaken China to emerge as the world's most populous nation.

5.4.3 The pace of planned thermal capacity additions has decelerated significantly, reflecting a strategic shift by the Government of India (GoI) towards renewable energy. The GoI has set ambitious targets, aiming for a renewable power capacity of 500GW by 2030. This aggressive target underscores the policy makers' strong commitment to sustainable energy.

5.4.4 The power sector remains a pivotal area for attracting Foreign Direct Investment (FDI) into India, with the government allowing 100 percent FDI in this sector. This openness to foreign investment highlights the sector's critical role in India's economic strategy.

5.4.5 The Union Budget 2025-26 allocates ₹26,549.38 crore to the Ministry of New & Renewable Energy (MNRE) a massive 53.48% jump from last year's revised ₹17,298.44 crore, demonstrating the government's enhanced focus on solar energy initiatives.

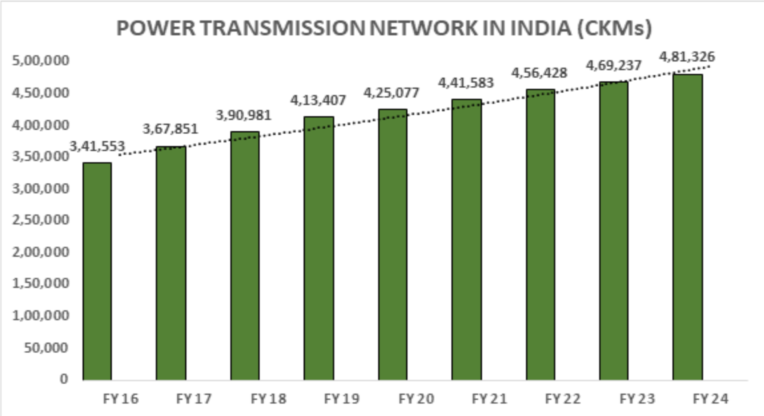
5.4.6 According to the Economic Survey 2018-19, additional investments in renewable energy plants up to the year 2022 were projected at approximately US$ 80 billion. For the period from 2023 to 2030, the required investment is estimated to be around US$ 250 billion. These figures highlight the substantial financial commitment needed to achieve the renewable energy targets.

5.4.7 India's macroeconomic stability has improved, coupled with increased government expenditure in infrastructure sectors. These factors have contributed to enhancing India's ranking in the Global Competitiveness Index (GCI), which rose to 39th in 2024 from 43rd in 2019-20. This improved ranking reflects the country's strengthened economic fundamentals and competitiveness on the global stage.

5.5. Power transmission network in India:

5.5.1. The government's focus on providing electricity to rural areas has led to the T&D system being extended to remote villages. Total Transformation Capacity addition during FY 2024-25 is 86433 MVA and the Total Transformation Capacity is 13.37 Lakh MVA. The total transmission network has increased from ~3.13 Lakhs Ckms in FY 15 to around ~4.81 Lakhs Ckms in FY24.

5.5.2. Inter-state transmission has seen considerable growth in the past decade, which led to the creation of a synchronous National Grid, achievement of 'One Nation-One Grid-One Frequency', which has been an enabler for power markets in the country. The total inter-regional transmission capacity of the National Grid wa s 1,20,340 MW as on July,2025.



(Source: NIP & CEA Executive Summary)

5.5.3. As on January 2019 approx. 7.2% of total transmission network is owned by private players which showcase the need of more private sector participation in this space. India has been underinvested as far as transmission is concerned.

5.5.4. PGCIL has remained the single largest player in inter regional power transmission capacity addition contributing to 45%-50% of the total investment in the sector with a vast transmission network covering over 1,77,699 Ckm (circuit kilometers) of lines and 278 substations boasting a transformation capacity exceeding 5,27,446 MVA.

5.5.5. Of the total capacity-addition projects in transmission during the 12th FYP, about 42% can be attributed to the state sector. The share of private sector in transmission line and substation additions since the beginning of 12th FYP is 14% and 7%, respectively, as the majority of high-capacity, long-distance transmission projects were executed by PGCIL and state transmission utilities during this period.

5.5.6. In order to strengthen the power system and ensure free flow of power, significant investments would be required in the T&D segment. Moreover, commissioning of additional generation capacity, rising penetration of renewable energy, regional demand-supply mismatches, up gradation of existing lines, rising cross border power trading would necessitate huge investments in transmission sector in India.

5.5.7. Over the past five years, India's T&D sector has attracted significant investments to enhance grid reliability, reduce losses and support renewable energy integration. Between fiscals 2019 and 2024, the total investments in the transmission sector amounted to Rs 2,63,800 crore, of which Rs 3,000 crore was dedicated to GEC projects. Further, the total investments in the distribution sector amounted to Rs 4,22,400 crore, of which Rs 4,500 crore was dedicated to smart metering projects.

5.6. Factors Encouraging Investments in Power Transmission in India:

5.6.1. Operational power transmission projects have minimal risks:

In the project construction phase, transmission assets face execution risks including right of way, forest and environment clearances, increase in raw material prices etc. However, post commissioning, with the implementation of the Point of Connection (PoC) mechanism, there is limited offtake and price risk. Thus, operational transmission projects have annuity like cash flows and steady project returns.

5.6.2. Availability based regime:

As per the TSA, the transmission line developer is entitled to get an incentive amount in the ratio of the transmission charge paid or actually payable at the end of the contract year. Maintaining availability in excess of the targeted availability gives the relevant asset the right to claim incentives at pre-determined rates, ensuring an adequate upside to maintaining availability.

5.6.3. Counter-party risk diversified:

Given PAN-India aggregation of revenue among all TSPs and not asset specific billing, the counter party risk is diversified. If a particular beneficiary delays or defaults, the delay or shortfall is prorated amongst all the licensees. Thus, delays or defaults by a particular beneficiary will have limited impact, which will be proportionate to its share in overall ISTS.

5.6.4 Payment security:

The TSA includes an arrangement for payment security, which reduces under recovery of revenues. Payment security is available in terms of a revolving letter of credit of required amount that can be utilized to meet the revenue requirement in case of a shortfall.

5.6.5 Collection risk offset owing to the presence of CTU:

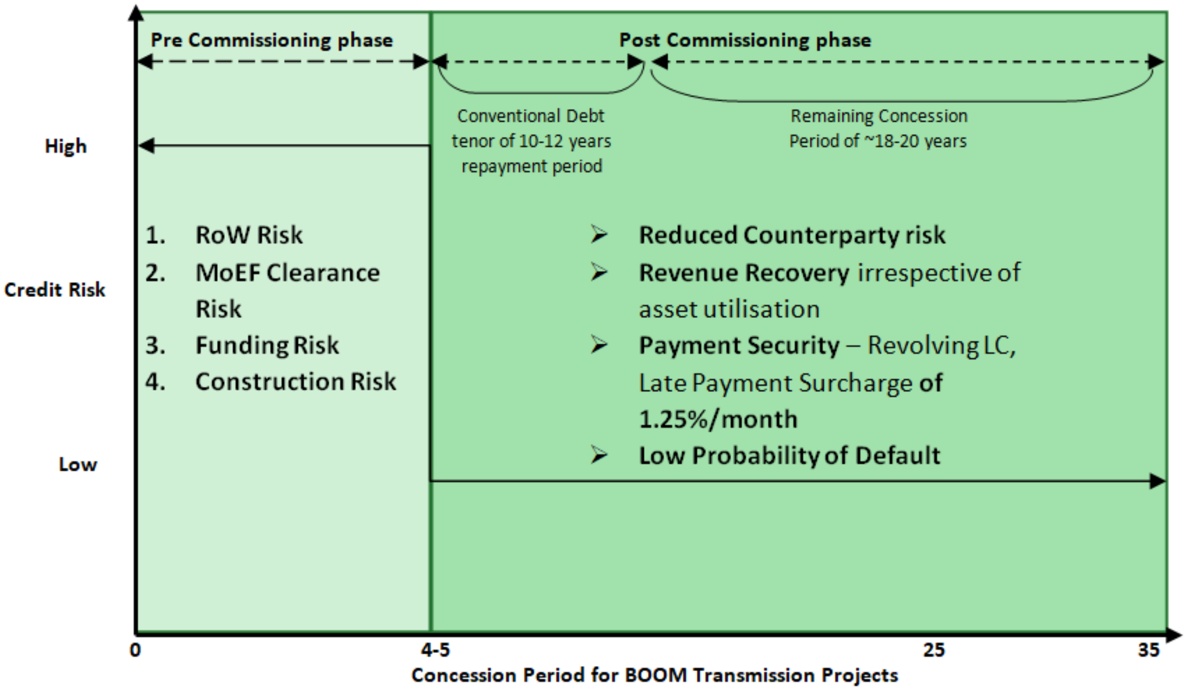
According to CERC (sharing of inter-state transmission charges and losses) regulations, 2010, CTU has been assigned the responsibility of carrying out activities including raising of transmission charge bills on behalf of all ISTS licensees, collecting the amount and disbursing the same to ISTS licenses. Thus, a private transmission licensee no longer needs to collect transmission charges from multiple DISCOMs for each transmission project. Instead, the transmission revenue payable to the licensee is disbursed by the CTU on a monthly basis.

5.6.6 Increase in Pace of Awarding Projects under TBCB :

Between 2010-11 and 2014-15, the pace of award of project was slow with only Rs. 180-190 billion (~USD 2.48-2.62 billion) of projects being awarded. However, the pace of award of project has significantly increased. In fact, in 2015-16, projects aggregating to ~Rs. 260 billion (~USD 3.58 billion) were awarded. Awarding of projects through TBCB picked up from fiscal 2017 onwards. In fact, between fiscals 2017 and 2020, projects worth ~312 billion have been awarded by BPCs (REC, PFC).

5.6.7 Power Transmission infrastructure has better risk return profile as compared to other infrastructure projects:

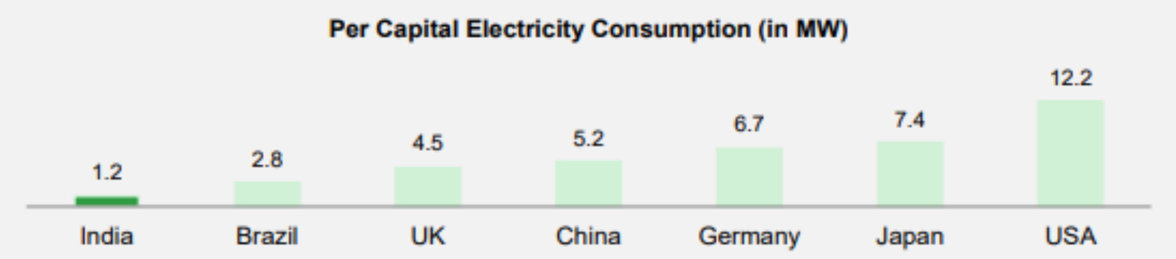
Returns from various infrastructure projects (other than transmission line projects) like roads, ports and power generation rely mostly on the operational performance of the assets, which in turn is dependent on factors where developers have limited control. For instance, in the roads sector (non-annuity based project) the company's profits are dependent on collection of toll revenues, the port sector bears risk of cargo traffic, while in the case of power generation, it depends on availability of fuel and offtake by distribution companies while in the case of ISTS transmission projects the charges are independent of the total power transmitted through the transmission lines and hence factors such as volume, traffic do not fluctuate the revenues.



(Sources: CRISIL Infrastructure Yearbook 2025, CEA Executive Summary on Power Sector: March 2025, Installed capacity report FY 2025, PGCIL Annual Report, Growth Summary of Transformation Capacity, All India Installed Capacity of Power Stations March 2025-Central Electricity Authority of India, Press Information Bureau)

Part B: Renewable Sector

5.7 India is the most populous democracy in the world with a population of more than 1.4 billion. India's GDP grew 6.2% in the third quarter of Financial Year 2025, following a 5.6% increase in the preceding quarter. The overall GDP growth for the fiscal year is projected at 6.5%. An efficient, resilient, and financially robust power sector is essential for the growth of the Indian economy. A series of reforms in the 1990s and the Electricity Act 2003 as amended from time to time have moved the Indian power sector towards being a competitive market with multiple buyers and sellers supported by regulatory and oversight bodies.



- India is the 3rd largest energy consuming country in the world. It stands 4th globally in renewable energy installed capacity,4th wind power capacity and 3rd in solar Power capacity (as per IRENA RE Statistics 2025).The country has set an enhanced target at the COP26 of 500 GW of non-fossil fuelbased energy by 2030. This has been a key pledge under the Panchamrit Scheme. This is the world's largest expansion plan in renewable energy.

- India's cumulative solar power capacity stood at 119.02 GW as of July 2025. This includes 90.99 GW from ground-mounted solar plants, 19.88 GW from grid-connected rooftop systems, 3.06 GW from hybrid projects, and 5.09 GW from off-grid solar installations, reflecting the country's diverse approach to expanding renewable energy.
  India made 1,08,494 GWh of solar power, more than Japan's 96,459 GWh, and became the world's third-biggest solar energy producer. India's solar module manufacturing capacity jumped from 38 GW to 74 GW during FY 2024–25.

- Electricity security has improved through the creation of one national power system and major investments in clean energy. India is now working on integrating higher shares of variable renewable energy into the energy mix.

- India's progress in the renewable energy sector reflects the country's focused policies and strategic planning under national leadership. As part of the pledge made at COP26, efforts are being directed towards reaching the target of 500 GW of non-fossil fuel electricity capacity by 2030. This commitment is seen as a key step in India's clean energy transition and its broader climate goals.

5.8 Global Renewable Energy Outlook

5.8.1 Under existing policies and market conditions, global renewable capacity is forecast to reach 7,300 GW by 2028. This growth trajectory would see global capacity increase to 2.5 times its current level by 2030, falling short of the tripling goal.

5.8.2 The driving forces behind growth in renewable energy capacity includes robust policy support, energy security priorities and improved competitiveness against fossil fuels, outweighing challenges like higher costs and supply chain issues.

5.8.3 Escalating electricity prices from the energy crisis prompted policymakers, particularly in Europe, to prioritize energy security and seek alternatives to imported fossil fuels. This shift favors solar PV, especially for quick installation of residential and commercial systems to meet surging requirement for renewable energy.

5.8.4 The rapid expansion of ever cheaper solar PV is expected to account for roughly half of global electricity demand growth to 2027, up from 40% in 2024. Globally, solar PV generation hit the 2 000 TWh mark in 2024, producing 7% of global electricity generation, up from 5% in 2023.

5.8.5 According to IEA's Renewable 2024 Report, over the coming five years several renewable energy milestones are expected to be achieved:

- In 2024, solar PV and wind generation together surpass hydropower generation.
- In 2025, renewables-based electricity generation overtakes coal-fired.

- In 2026, wind and solar power generation both surpasses nuclear.
- In 2027, solar PV electricity generation surpasses wind.
- In 2029, solar PV electricity generation surpasses hydropower and becomes largest renewable power source.
- In 2030, wind-based generation surpasses hydropower.

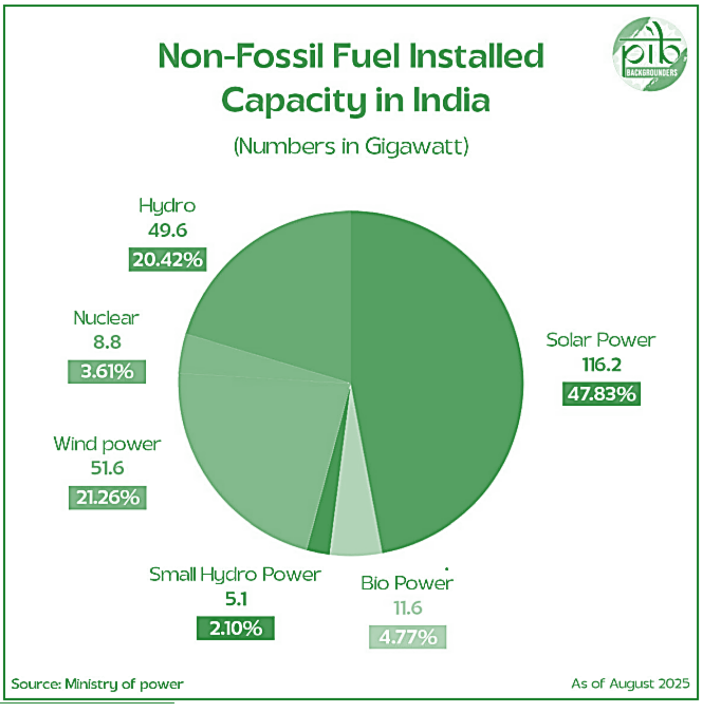
5.8.6 The renewable energy sector is expected to focus on various areas, including advanced solar photovoltaic (PV) technology, robotics, artificial intelligence (AI), large-scale data analysis (big data), decentralized energy storage systems, integration with power grids, blockchain technology, the production of green hydrogen, bioenergy, hydropower and wind power.

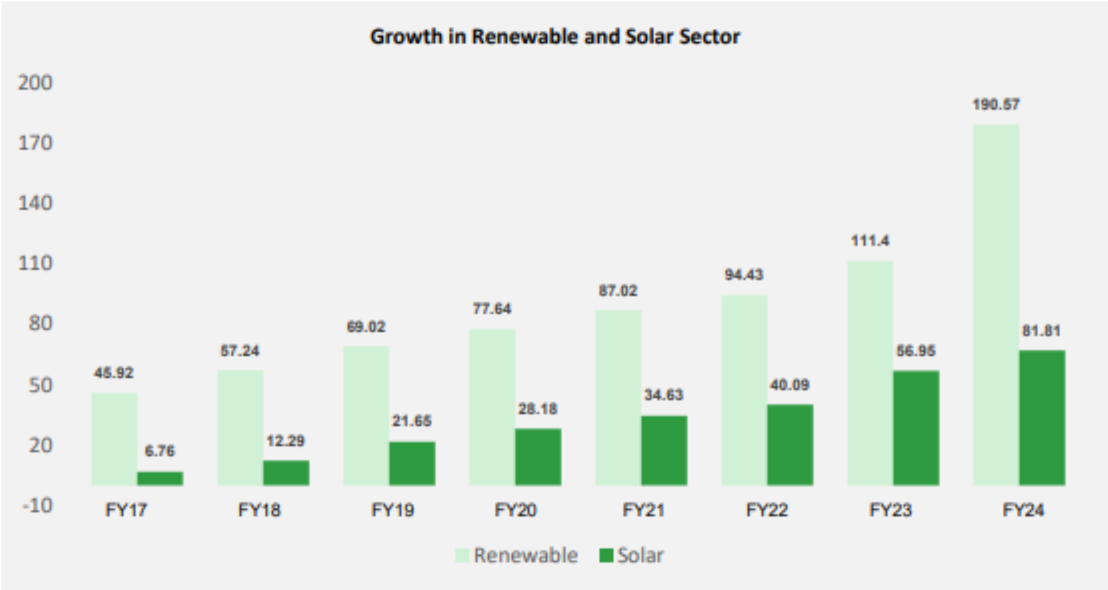
5.9 Indian Renewable Energy Outlook

5.9.1 India's energy sector uses many different sources to produce electricity. These include fossil fuel sources like coal, gas, lignite, diesel, etc, as well as non-fossil fuel sources like solar, wind, hydro, nuclear and biomass. India's total power capacity has now reached around 485 GW. Out of this, 242 GW comes from thermal power, 116 GW from solar, and 51.6 GW from wind. This shows India's strong move towards clean energy and better energy security.

5.9.2 In the last 11 years, India has made significant progress in renewable energy. To meet the goal set at COP26, the Ministry of New & Renewable Energy (MNRE) is working to reach 500 GW of non-fossil fuel capacity by 2030.

5.9.3 By June 2025, India has installed 242.8 GW of non-fossil fuel installed capacity, including 233.99 GW of renewable energy and 8.8 GW of nuclear power. This now makes up 50.07% of the country's total power capacity of 484.82 GW. Renewable energy alone has grown almost three times, from 76.37 GW in 2014 to 233.99 GW in 2025, showing a strong move toward a cleaner and sustainable future.



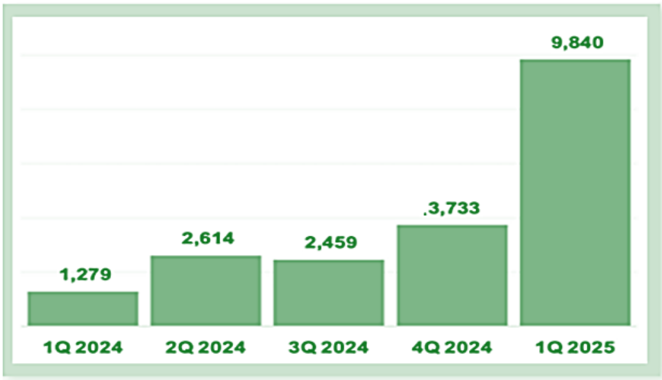


Source: PIB

5.9.4 India added a record 29.52 GW of renewable energy in FY 2024–25, boosting total clean power capacity to 220.10 GW, up from 190.57 GW last year. This progress brings India closer to its goal of 500 GW non-fossil capacity by 2030, in line with the "Panchamrit" climate targets set by the Prime Minister

5.9.5 Investments in Renewable Energy Sector has increased from US$ 3,733 Mn to US$ 9,840 Mn.

Investments in India's Renewable Energy Sector (US$ million)



Source: JMK Research, News Reports

5.9.6 As March 2024, there are a total of 58 solar parks in India with a sanctioned capacity of 40 GW, in contrast to March 2016, when there were only 34 solar parks with 20 GW sanctioned capacity.

5.10 Budget Overview: Renewable Energy Sector

5.10.1 The 2024-25 Interim Budget provided for a budgetary allocation of Rs 10,000 Cr to solar power grid projects in FY2025 BE, which is massive 110% increase from Rs 4,557 Cr allocated in FY2024 Revised Estimates.

5.10.2 Through rooftop solarization, one crore households will be enabled to obtain up to 300 units free electricity every month. Each household is expected to save Rs.15000 to Rs.18000 annually.

5.10.3 Viability gap funding will be provided for harnessing offshore wind energy potential for initial capacity of one giga-watt.

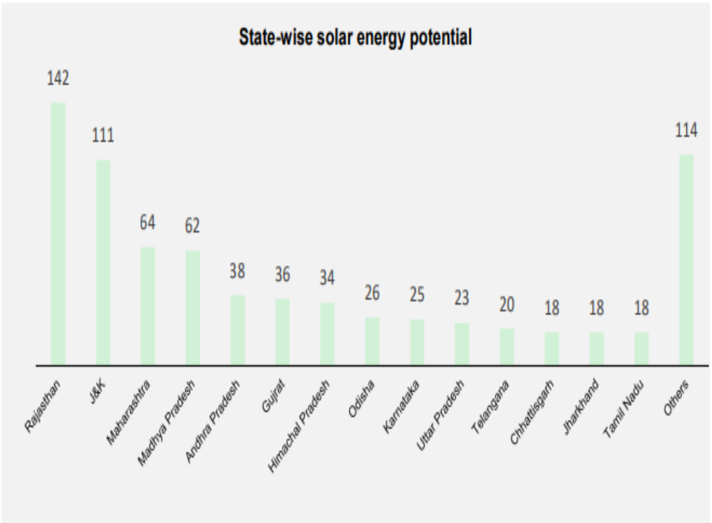
5.10.4 Coal gasification and liquefaction capacity of 100 MT will be set up by 2030. This will also help in reducing imports of natural gas, methanol, and ammonia.

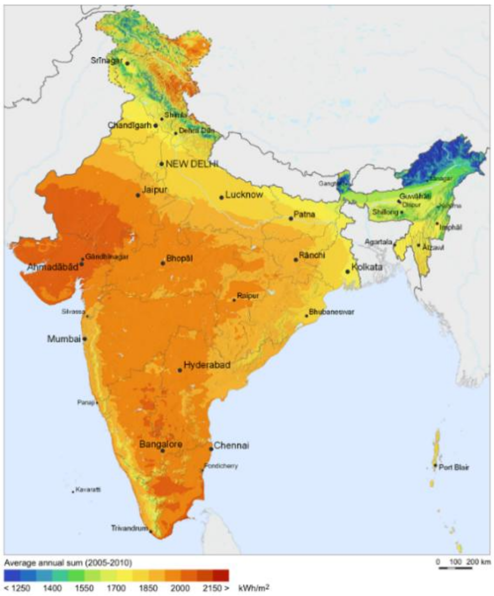
5.10.5 Phased mandatory blending of compressed biogas (CBG) in compressed natural gas (CNG) for transport and piped natural gas (PNG) for domestic purposes will be mandated.

5.10.6 Financial assistance will be provided for procurement of biomass aggregation machinery to support collection.

5.11 Indian Solar Industry Outlook

5.11.1 India is endowed with vast solar energy potential. About 5,000 trillion kWh per year energy is incident over India's land area with most parts receiving 4-7 kWh per sq. m per day. Solar photovoltaic power can effectively be harnessed providing huge scalability in India. Solar also provides the ability to generate power on a distributed basis and enables rapid capacity addition with short lead times. Off-grid decentralized and low-temperature applications will be advantageous from a rural application perspective and meeting other energy needs for power, heating and cooling in both rural and urban areas. From an energy security perspective, solar is the most secure of all sources, since it is abundantly available. Theoretically, a small fraction of the total incident solar energy (if captured effectively) can meet the entire country's power requirements.





Source: PIB

5.11.2 National Institute of Solar Energy has assessed the Country's solar potential of about 748 GW assuming 3% of the waste land area to be covered by Solar PV modules. Solar energy has taken a central place in India's National Action Plan on Climate Change with National Solar Mission as one of the key Missions. National Solar Mission (NSM) was launched on 11th January, 2010. NSM is a major initiative of the Government of India with active participation from States to promote ecological sustainable growth while addressing India's energy security challenges. It will also constitute a major contribution by India to the global effort to meet the challenges of climate change. The Mission's objective is to establish India as a global leader in solar energy by creating the policy conditions for solar technology diffusion across the country as quickly as possible. The Mission targets installing 100 GW grid-connected solar power plants by the year 2022. This is in line with India's Intended Nationally Determined Contributions (INDCs) target to achieve about 40 percent cumulative electric power installed capacity from non-fossil fuel based energy resources and to reduce the emission intensity of its GDP by 33 to 35 percent from 2005 level by 2030.

5.11.3 Recently, India stands 4th in solar PV deployment across the globe as on end of 2023. Solar power installed capacity has reached around 82 GW as on 31st March, 2024. Presently, solar tariff in India is very competitive and has achieved grid parity.

5.11.4 As per the Central Electricity Authority (CEA) estimates, by 2029-30, the share of renewable energy generation would increase from 18% to 44%, while that of thermal is expected to reduce from 78% to 52%. The share of solar energy of overall RE installed capacity has increased from 7.5% in 2014 to around 39.7% in 2020, growing at a CAGR of 53.7%.

5.12 Understanding key terms used in the solar industry

5.12.1 Plant Load Factor (PLF)

- The Central Electricity Regulatory Commission defines Plant Load Factor as a percentage of energy sent out by the power plant corresponding to installed capacity in that period. In the context of solar power plants, it reflects how efficiently the plant is utilizing its installed solar panel capacity to generate electricity over a specific period, often a year. In India, the Ministry of Power has, since the early 90s, used the Plant Load Factor as a metric to check the efficiency of a plant. A PLF norm has been set, and incentives are being given to those producers who produce power in excess of the norm.

  PLF= (Actual Energy Output / (Installed Capacity*Total Time))*100

  where, Actual Energy Output: The total amount of energy generated by the solar power plant over the chosen time period.

  Installed Capacity: The maximum power output the solar panels are designed to produce under ideal conditions (rated capacity).

  Total Time: The duration for which the plant has been operating (usually measured in hours).

- A low PLF is bad for the power plant as it indicates that the plant is not being used to its optimal capacity. This will increase the per-unit cost of the power thus produced, making it unattractive for purchase by DISCOMs. A higher PLF, on the other hand, will generate a greater total output which will reduce the cost per unit of energy generated. The higher the output, the lesser will be cost per unit. The additional energy produced would also result in an increase in revenue of the plant.

- The average Plant Load Factor (PLF) for solar power plants can vary significantly depending on factors such as location, technology, weather conditions, maintenance practices, and the design of the solar plant. Generally, PLF for solar power plants is influenced by the availability of sunlight, which can vary based on the geographical location and weather patterns

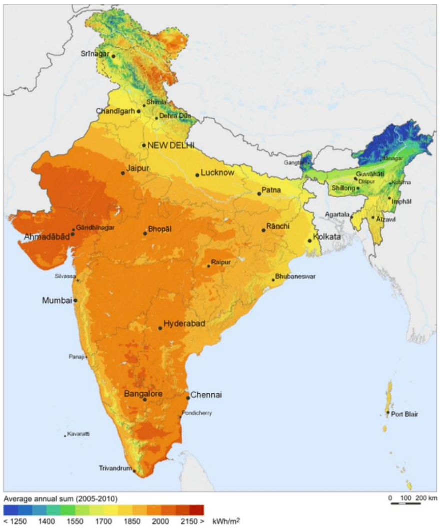
- On average, well-designed and efficiently operated solar power plants can achieve PLFs in the range of 15% to 25%. However, some high-performing solar installations can achieve even higher PLFs, exceeding 25%.

- The trend in PLF in the solar industry has been improving over the years due to advancements in solar technology, improved design practices, better site selection, and increased experience in operation and maintenance. As technology has progressed, solar panels have become more efficient at converting sunlight into electricity, and better forecasting and monitoring systems have allowed operators to optimize their plants' performance. Additionally, the growth of solar power capacity in regions with abundant sunlight has contributed to better overall PLF figures.

- The PLF is not the same as the availability factor. The availability factor of a power plant is the amount of time that it is able to produce electricity over a certain period, divided by the amount of the time in the period. The availability of a power plant varies greatly depending on the type of design of the plant and how the plant is operated. The variability in the PLF is a result of seasonality, cloud covers, air pollution, and daily rotation of the earth, equipment efficiency losses, breakdown of transmission system and grid availability.

Another factor that affects the PLF is the performance ratio of the plant. The performance ratio is a measure of the quality of a PV plant that is independent of location, and it therefore often described as a quality factor. The performance ratio (PR) describes the relationship between the actual and theoretical energy outputs of the PV plant. The plant load factor is effective in measuring the performance of the power plants. Higher plant load factor at a plant indicates increased electricity generation

5.12.2 Solar Irradiation



- Solar irradiance is the output of light energy from the sun that reaches the earth. It is measured in terms of the amount of sunlight that hits a square meter of a surface in one second.

- Solar irradiance is a key factor in determining the energy output of solar power plants. By understanding the local solar irradiance conditions, engineers can design solar installations to capture the maximum amount of available sunlight. It also plays a crucial role in sizing solar panels, predicting energy production, and optimizing the orientation and tilt angles of panels to achieve higher energy yields.

- In conclusion, solar irradiance is the foundation of solar energy generation. It's the primary resource that solar panels capture and convert into electricity. Understanding local irradiance patterns is crucial for effective solar power plant design, operation, and energy yield optimization.

- Solar irradiance is influenced by various factors, including:

  Time of Day: Irradiance is highest when the sun is directly overhead (solar noon) and decreases in the morning and evening.

  Season: Irradiance varies with the sun's angle in the sky, which changes with the seasons.

  Geographical Location: Solar irradiance is generally higher near the equator and lower toward the poles.

  Weather Conditions: Cloud cover, air pollution, and atmospheric conditions can attenuate or scatter sunlight, affecting irradiance levels

5.12.3 Degradation

Solar panels convert solar radiation into electrical energy. The ability to do so declines steadily and irreversibly over time. The degradation may be in a cell or parts of a module or both. The ability to accurately predict power delivery over time is vital to assess the credit risk profile of a project. The thumb rule in the industry is 0.50% system degradation per annum. Anything higher is considered a risk to cash generating ability and, by extension, to debt servicing ability. Degradation depends on many factors such as technology, panel quality.

5.12.4 Global Horizontal Irradiance (GHI)

Global Horizontal Irradiance (GHI) is the amount of terrestrial irradiance falling on a surface horizontal to the surface of the earth. GHI can be measured with a variety of instruments. The most common instrument used to measure GHI is called a pyranometer which has a hemispherical (180°) view angle.

5.12.5 Performance Ratio (PR)

The performance ratio (PR) is a metric used in the PV industry to measure the relationship between a plant's actual and theoretical energy outputs. It's calculated by dividing the energy generated by the plant (kWh), by the irradiance (kWh/m2), then multiplying by the active area of the PV module (m2), and finally multiplying by the PV module efficiency. The PR is stated as a percentage and is independent of location.

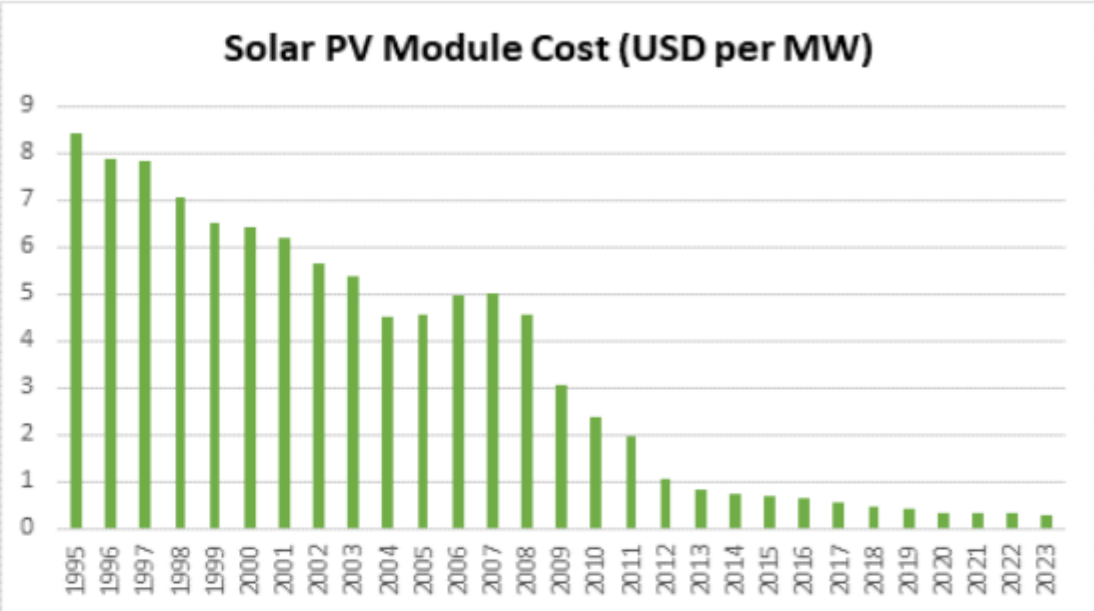
5.12.6 Plant Availability Factor (PAF)

Plant Availability Factor (PAF) is the ratio of a power plant's actual operating hours to its scheduled operating hours during a given period. In a solar PV power plant, PAF is an important factor that depends on the functioning of its components and grid regulation. A high PAF indicates that the plant is operating efficiently and reliably, while a low PAF can lead to higher downtime and revenue loss.

5.12.7 Deviation Settlement Mechanism Charges (DSM Charges)

Any demand-supply imbalance of electricity leads to a fluctuation in the grid frequency from the standard value, which is set at 50 Hertz (Hz) in India. A significant drop or rise in frequency could lead to a power system blackout. Therefore, the Indian Electricity Grid Code (IEGC) 2010 restricts the operational frequency between 49.90 to 50.05 Hz. To maintain the frequency within the band, the power distribution companies must predict demand accurately and schedule supply accordingly. Deviation Settlement Mechanism (DSM) is a regulatory mechanism by which grid stability is achieved by imposing penalty and incentives for over drawl/injection or under drawl/injection from the schedule. DSM is a frequency linked mechanism. It is not related to any market conditions.

India's solar power tariffs are expected to touch ₹2.6-2.7 per unit due to the increase in the goods and services tax (GST) on renewable energy equipment and a proposed customs duty on imported solar modules, according to Crisil Ratings. According to a recent research report released by India Ratings, the decline in solar tariffs is being driven by (a) Advancement in panel designs enabling a higher capacity utilisation factor (CUF); (b) Lower financing costs due to declining interest rates and (c) Lower capital cost/MW of around ₹ 40 million/MW due to declining Panel costs as can be seen in the below chart:



Source: ourworldindata.org

5.13 Challenges

- There are several challenges to overcome, including regulatory and policy inconsistencies, changes in duties, and payment delays by distribution companies (DISCOMs), among others.

- Payment disputes by DISCOMs were also rampant, slowing down any progress made by developers. The government's introduction of credit mechanisms and amendments to policies has done little in the way of negating these issues. A 25% Safeguard Duty (SGD) was announced on solar cell and module imports from China and Malaysia between July 30, 2018, and July 29, 2019. The duty was set at 25% for the first year, followed by a phased down approach for the second year, with the rate set to be lowered by 5% every six months until July 2020.

- Manufacturers of solar modules, ancillary products, system integrators, and raw material suppliers in the solar photovoltaic space complained that the government's protectionist policies were increasing costs for smaller local manufacturers and had loopholes.Tender cancellations, tariff re-negotiations by a few states had increased the uncertainty of some of the large-scale projects and hence delayed their executions.

Part C: Battery Energy Storage Sector

5.14 Introduction:

- The India Battery Energy Storage Systems (BESS) market is valued at USD 3.5 billion, based on a five-year historical analysis. This market has been driven primarily by the rapid expansion of renewable energy projects across the country, which require efficient storage solutions for grid stabilization and peak load management. The Indian government's emphasis on increasing renewable energy capacity, especially solar and wind, has significantly boosted the demand for battery energy storage solutions. Additionally, advancements in battery technology, such as the declining cost of lithium-ion batteries, have contributed to the increasing adoption of BESS.

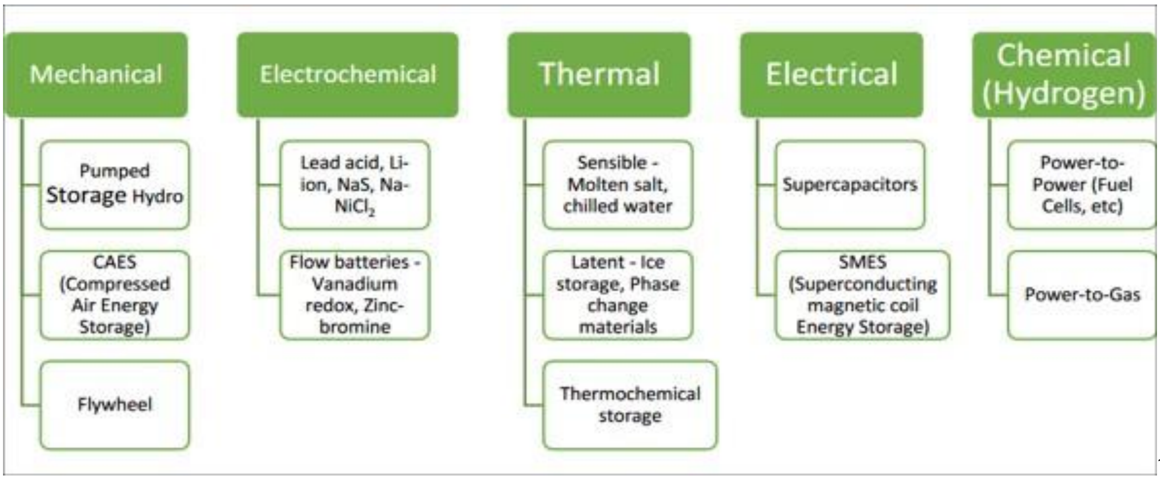
- The Indian government has launched the Battery Energy Storage Systems (BESS) Scheme, which aims to develop 4,000 MWh of battery energy storage system projects by 2030-31 with an initial budget of USD 1.129 billion. This initiative is part of India's broader goal to achieve 500 GW of renewable energy capacity by 2030. The BESS Scheme is a crucial part of India's broader goal to achieve 500 GW of renewable energy capacity by 2030. This target is a significant step towards reducing India's emission intensity by 33-35% from 2005 levels by 2030 and achieving 40% electricity generation from non-fossil fuels.

- Key cities and regions leading in battery energy storage systems include Mumbai, Bangalore, Delhi, and states like Tamil Nadu and Gujarat. These regions dominate the market due to their rapid industrialization, urbanization, and large-scale renewable energy projects. Mumbai and Bangalore are home to several technology companies and energy innovators, while Tamil Nadu and Gujarat have extensive solar and wind power generation capacities, necessitating efficient energy storage systems for grid stability.

- India has set a target to achieve 50% cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by 45% by 2030, based on 2005 levels. The incorporation of a significant amount of variable and intermittent Renewable Energy into the energy mix presents a challenge for maintaining grid stability and uninterrupted power supply. The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable Energy and further can be used during peak hours of the day. The various benefits of Energy Storage are help in bringing down the variability of generation in RE sources, improving grid stability, enabling energy/ peak shifting, providing ancillary support services, enabling larger renewable energy integration, brings down peak deficit and peak tariffs, reduction of carbon emissions, deferral of transmission and distribution capex, energy arbitrage etc.

- As per National Electricity Plan (NEP) 2023 of Central Electricity Authority (CEA), the energy storage capacity requirement is projected to be 82.37 GWh (47.65 GWh from PSP and 34.72 GWh from BESS) in year 2026-27. This requirement is further expected to increase to 411.4 GWh (175.18 GWh from PSP and 236.22 GWh from BESS) in year 2031-32. Further, CEA has also projected that by the year 2047, the requirement of energy storage is expected to increase to 2380 GWh (540 GWh from PSP and 1840 GWh from BESS), due to the addition of a larger amount of renewable energy in light of the net zero emissions targets set for 2070. A long-term trajectory for Energy Storage Obligations (ESO) has also been notified by the Ministry of Power to ensure that sufficient storage capacity is available with obligated entities. As per the trajectory, the ESO shall gradually increase from 1% in FY 2023-24 to 4% by FY 2029-30, with an annual increase of 0.5%. This obligation shall be treated as fulfilled only when at least 85% of the total energy stored is procured from Renewable Energy sources on an annual basis.

- There are several energy storage technologies available, broadly – mechanical, thermal, electrochemical, electrical and chemical storage systems, as shown below:



[1]

Source: Ministry of New and Renewable Energy
Market research.com

5.15 Recent Developments

- Government has given go ahead for inviting the expression of interest for installation of 1,000 MWh Battery Energy Storage System (BESS) as a pilot project. This is the joint effort of both Ministry of New and renewable energy and Ministry of Power who have been working on this to provide a road map for the installation of the energy storage system in the country.

- In order to support the ambitious goal of achieving 450 GW renewable energy target of Ministry of New and renewable energy by 2030, it is important that it gets duly supported with installation of energy storage systems (battery energy storage system, hydro pump storage plants etc.).

- Solar Energy Corporation of India (SECI), a CPSU under Ministry of New and renewable energy, has called for the expression of interest for procurement of 1,000 MWh BESS. This will be published along with the RFS bid document and the draft comprehensive guideline for procurement and utilization of BESS as a part of generation, transmission and distribution assets and with all ancillary services.

- Going forward, India plans to use energy storage system under following business cases:-

  i. Renewable energy along with the energy storage system.

  ii. Energy storage system as grid element to maximize the use of transmission system and strengthening grid stability and also to save investment in the augmentation of transmission infrastructure.

  iii. Storage as an asset for balancing services and flexible operation. The system operator i.e. load dispatchers (RLDCs and SLDCs) may use storage system for frequency control and balancing services to manage the inherent uncertainty/variations in the load due to un-generation.

  iv. Storage for distribution system i.e. it may be placed at the load centre to manage its peak load and other obligations.

6. Valuation Methodology and Approach

6.1 The present valuation exercise is being undertaken in order to derive the fair EV of the SPVs.

6.2 The valuation exercise involves selecting a method suitable for the purpose of valuation, by exercise of judgment by the valuers, based on the facts and circumstances as applicable to the business of the company to be valued.

6.3 There are three generally accepted approaches to valuation:

(a) "Cost" approach
(b) "Market" approach
(c) "Income" approach

6.4 Cost Approach

The cost approach values the underlying assets of the business to determine the business value. This valuation method carries more weight with respect to holding companies than operating companies. Also, cost value approaches are more relevant to the extent that a significant portion of the assets are of a nature that could be liquidated readily if desired.

Net Asset Value ("NAV") Method

The NAV Method under Cost Approach considers the assets and liabilities, including intangible assets and contingent liabilities. The Net Assets, after reducing the dues to the preference shareholders, if any, represent the value of a company.

The NAV Method is appropriate in a case where the main strength of the business is its asset backing rather than its capacity or potential to earn profits. This valuation approach is also used in cases where the firm is to be liquidated, i.e. it does not meet the "Going Concern" criteria.

As an indicator of the total value of the entity, the NAV method has the disadvantage of only considering the status of the business at one point in time.

Additionally, NAV does not properly take into account the earning capacity of the business or any intangible assets that have no historical cost. In many aspects, NAV represents the minimum benchmark value of an operating business.

6.5 Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies, and comparable companies trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors perception about the true worth of the company.

Comparable Companies Multiples ("**CCM**") Method
The value is determined on the basis of multiples derived from valuations of comparable companies, as manifest in the stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Comparable Transactions Multiples ("**CTM**") Method
Under the CTM Method, the value is determined on the basis of multiples derived from valuations of similar transactions in the industry. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances. Few of such multiples are EV/Earnings before Interest, Taxes, Depreciation & Amortization ("**EBITDA**") multiple and EV/Revenue multiple.

Market Price Method
Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded. The market value generally reflects the investors perception about the true worth of the company.

6.6 Income Approach

The income approach is widely used for valuation under "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

DCF Method

Under DCF Method value of a company can be assessed using the Free Cash Flow to Firm Method ("**FCFF**") or Free Cash Flow to Equity Method ("**FCFE**"). Under the DCF method, the business is valued by discounting its free cash flows for the explicit forecast period and the perpetuity value thereafter. The free cash flows represent the cash available for distribution to both, the owners and creditors of the business. The free cash flows in the explicit period and those in perpetuity are discounted by the WACC. The WACC, based on an optimal vis-à-vis actual capital structure, is an appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk by incorporating debt-equity ratio of the firm.

The perpetuity (terminal) value is calculated based on the business' potential for further growth beyond the explicit forecast period. The "Constant Growth Model" is applied, which implies an expected constant level of growth for perpetuity in cash flows over the last year of forecast period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business' future operations. The EV (aggregate of the present value of explicit period and terminal period cash flows) so derived, is further reduced by the value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of the business.

Conclusion on Valuation Approach

6.7 It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond my control. In performing my analysis, I have made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of the SPVs. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the SPVs, and other factors which generally influence the valuation of companies and their assets.

6.8 The goal in selection of valuation approaches and methods for any business is to find out the most appropriate method under particular circumstances on the basis of available information. No one method is suitable in every possible situation. Before selecting the appropriate valuation approach and method, I have considered various factors, inter-alia, the basis and premise of current valuation exercise, purpose of valuation exercise, respective strengths and weaknesses of the possible valuation approach and methods, availability of adequate inputs or information and its reliability and valuation approach and methods considered by the market participants.

6.9 Cost Approach

In the present case, since the SPVs have entered into TSA/PPA, the revenue of the SPVs are pre-determined for the life of the projects. In such scenario, the true worth of the business is reflected in its future earning capacity rather than the cost of the project. Considering that DPTL, IPTL, KTCO, NRSS II, GPTL II, RKPTL, GBPL and RBPL projects are currently under-construction and TL SitamauSS is currently being utilised for captive consumption and in absence of any specific projections, I have considered NAV method for the purpose of valuation of these SPVs.

6.10 Market Approach

The present valuation exercise is to arrive at the Fair EV of the SPVs engaged in the power transmission business for a specific tenure. Further, the tariff revenue expenses are very specific to the SPVs depending on the nature of their geographical location, stage of project, terms of profitability. In the absence of any exactly comparable listed companies with characteristics and parameters similar to that of the SPVs, I have not considered CCM method in the present case. In the absence of adequate details about the Comparable Transactions, I was unable to apply the CTM method. Currently, the equity shares of the SPVs are not listed on any recognized stock exchange of India. Hence, I was unable to apply market price method.

6.11 Income Approach

Currently, each of the SPVs except DPTL, IPTL, KTCO, NRSS II, GPTL II, RKPTL, GBPL and RBPL are completed and are revenue generating SPVs. The cash flows of the SPVs for the projected period are driven by the contracts entered by the SPVs as on date like the TSA, O&M Agreements, etc. The revenues of the projects are defined for 35 years under the TSA. Hence, the growth potential of the SPVs and the true worth of its business would be reflected in its future earnings potential and therefore, DCF method under the income approach has been considered as an appropriate method for the present valuation exercise for all the SPVs except DPTL, IPTL, KTCO, NRSS II, GPTL II, RKPTL, GBPL, RBPL and TL SitamauSS as explained above in the Cost approach.

In the present exercise, my objective is to determine the Fair Enterprise Value of the SPV as per the DCF Method. EV is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash and cash equivalents to meet those liabilities. Accordingly, in the present case, I have considered it appropriate to consider cash flows at FCFF (Free Cash Flow to Firm) level i.e., cash flows that are available to all the providers of capital (equity shareholders, preference shareholders and lenders). Therefore, cash flows required to service lenders and preference shareholders such as interest, dividend, repayment of principal amount and even additional fund raising are not considered in the calculation of FCFF.

While carrying out this engagement, I have relied extensively on the information made available to me by the Investment Manager. I have considered projected financial statement of the SPV as provided by the Investment Manager. I have not tested individual assumptions or attempted to substantiate the veracity or integrity of such assumptions in relation to the forward-looking financial information. However, I have made sufficient enquiries to satisfy myself that such information has been prepared on a reasonable basis. Notwithstanding anything above, I cannot provide any assurance that the forward-looking financial information will be representative of the results which will actually be achieved during the cash flow forecast period.

The following are the major steps I have considered in order to arrive at the EV of the SPV as per the DCF Method:

1. Determination of Free Cash Flows to Firm which included:
   a) Obtaining the financial projections to determine the cash flows expected to be generated by the SPV from the Investment Manager;
   b) Analyzed the projections and its underlying assumptions to assess the reasonableness of the cash flows.
2. Determination of the discount rate; and
3. Applying the discount rate to arrive at the present value of the cash flows.

7 Valuation of the SPVs

The key assumptions for transmission revenue, incentives and penalty of the SPVs, are as follows:

Transmission Revenue:

Power transmission projects, including the SPVs, earn revenue from electricity transmission tariffs pursuant to TSAs read with the Tariff Adoption Order ("TAO") passed by CERC in accordance with the Electricity Act. These SPVs receive availability based tariffs under the TSAs irrespective of the actual quantum of power transmitted through the line. The tariff for the SPVs is contracted for the period of the relevant TSA, which is up to 35 years from the scheduled commissioning date, other than ENICL and JKTPL, which is for 25 years.

7.1.1 The majority of the SPVs have entered into TSAs with long-term transmission customers to set up projects on a BOOM or BOO basis and to provide transmission services on a long-term basis to such customers on the terms and conditions contained in the TSAs. The term of each TSA is 35 years from the scheduled commercial date of operation of the applicable project, (other than for ENICL and JKTPL, which are for 25 years each) unless terminated earlier in accordance with the terms of the TSA. The TSAs provide for, among other things, details and procedures for project execution, development and construction, operation and maintenance.

7.1.2 Tariffs under these TSAs are billed and collected pursuant to the 'Point of Connection' (PoC) mechanism, a regulatory payment pooling system offered to interstate transmission system (ISTS) such as the systems operated by majority of the SPVs. Under the PoC mechanism, payments are made to a central payment pool and the proceeds are distributed proportionately to all transmission services providers, such as the SPVs.

7.1.3 The tariff rates are comprised of a fixed non-escalable charge, a variable escalable charge, and incentives for maintaining targeted availability.

- **Non Escalable Transmission Revenue:** The Non-Escalable Transmission Revenue remains fixed for the entire life of the project. I have corroborated the revenue considered in the financial projections with the respective TSA read with TAO and documents provided to us by the Investment Manager.
- In case of certain SPVs, the transmission lines could not be commissioned on their scheduled commissioning dates due to change in law and force majeure events, including the amendment of Forest Guidelines, delay in grant of forest clearance, delay in receiving authorisation under Section 164 of the Electricity Act, delay in allotment of land for the construction, change in applicable rates of taxes, etc. These delays when acknowledged by CERC, the scheduled commercial operation date gets revised accordingly. Further to compensate for the loss in revenue, the SPVs file a tariff revision petition with CERC, pursuant to which the CERC once satisfied may agree to the claim in respect of cost escalation.

  In the present case, as represented us by the Investment Manager following SPVs have filed for incremental revenue (increase in tariff amount):

SPVs	CERC Order	Description
MTL and BDTCL	Received	Incremental Revenue is considered in MTL and BDTCL due to change in law and/ or force majeure, mainly due to introduction of GST in FY 2017, the additional expenditure incurred due to such change in law shall be reimbursed as per the CERC order dated 11th March 2019 and 20th October 2020 respectively.
ENICL	Received	To compensate for the damages sustained by ENICL, an increase in revenue charges was approved as per various CERC orders detailed below: **Purnea–Biharsharif Line**: Due to obstruction at Mahenderpur village and flooding in Bihar, CERC, through its order dated 24th August 2016, granted compensation by allowing an increase in both Non-Escalable and Escalable revenue by approximately 6.18%. **Bongaigaon–Siliguri Line**: In light of delays caused by the pending forest clearance, riots in Kokrajhar, and bandh in Assam, CERC, through its order dated 13th September 2017, approved a compensation by increasing the Non-Escalable revenue by approximately 3.73%. **Change in Law During Construction**: Further, due to a Change in Law event during the construction phase, CERC, via its order dated 19th September 2018, allowed an increase in Non-Escalable Transmission Charges by approximately 1.09%.
JTCL,KhTL,OGPTL, NRSS, PKTCL, GPTL and NERTL	Not Required	According to the Investment Manager, the claim for incremental revenue by the respective SPVs arises from the additional tax liability due to the introduction of the Goods and Services Tax (GST) compensation cess. This claim does not require a separate CERC order, as it is covered under the scope of the CERC order dated 17th December 2018. Additionally, due to significant changes in law during the construction period, CERC, through its order dated 19th May 2024, approved an increase in Non-Escalable Transmission Charges for NERTL at a rate of approximately 2.39%. Furthermore, NERTL and NRSS have been granted increases in Non-Escalable Transmission Charges on account of force majeure events, at rates of approximately 4.76% and 0.26%, respectively.

Accordingly, I have received computation of such incremental revenue from the Investment Manager.

- **Escalable Transmission Revenue:**
  Escalable Transmission Revenue is the revenue component where the revenue is duly escalated based on the rationale as provided in the respective TSA read with TAO and documents provided to me by the Investment Manager. The escalation, as presented to us by the investment manager, is to mainly compensate for the inflation factor.

- **Transmission Revenue for JKTPL:**
  The revenues generated by intra-state transmission assets (being, JKTPL) are not dependent on a regulatory order and are dependent on tariffs as determined in terms of the relevant TSA, and such intra -state transmission assets recover tariffs equivalent to a base unitary charge which is subject to annual revisions. The transmission revenue of JKTPL comprises of Unitary Charges (“UC”) as provided in the TSA. Unitary Charges (“UC”): Unitary Charges is the monthly fee for transmission services as per the TSA, which is duly escalated based on the Wholesale Price Index series 2011-12 (restated with 2004-05 series) to arrive at the indexed UC rationale as provided in the respective TSA read with TAO and documents provided to me by the Investment Manager.

- **Transmission Revenue for PrKTCL, PTCL-II, KTL-II, KTL-III and KNTL-II:**
  The transmission revenue of PrKTCL, PTCL-II, KTL-II, KTL-III and KNTL-II are calculated on cost plus basis as per the extant provisions of the CERC Tariff Regulations, 2024 and it comprises of depreciation, interest on loan, return on equity, interest on working capital and O&M expenses. The same has been determined on the basis of the mechanism provided under the extant provisions.

7.1.4 **Incentives:**

As provided in the respective TSA, if the annual availability exceeds 98%, the SPVs shall be entitled to an annual incentive as provided in TSA. Provided no incentives shall be payable above the availability of 99.75%. Based on the past track record of the asset and the general industry standard, the annual availability shall be above 98% where the SPVs shall be entitled to the incentives as provided in the respective TSA.

For KTCO, if the annual availability exceeds 98.5%, the SPVs shall be entitled to an annual incentive as provided in TSA. Provided no incentives shall be payable above the availability of 99.75%.

For JKTPL, when the availability exceeds the Normative Availability of 98%, incentive is received based on pro rata basis in same proportion as UC bears to Normative Availability. Further, for JKTPL, as per its TSA, if the transmission loss for any month is less than the normative loss, then the SPV will receive an incentive. As provided in the TSA, if the annual availability exceeds 98%, the SPV shall be entitled to an annual incentive as provided in TSA. Provided no incentives shall be payable above the availability of 100%.

For PrKTCL and PTCL-II when the actual availability exceeds the Normative Availability of 98.5%, incentive is received by PrKTCL and PTCL-II. Incentive is computed on pro rata basis in same proportion as Transmission Revenue bears to Normative Availability. No incentive in case of availability beyond 99.75%. As represented to us by the Investment Manager, the annual availability of PrKTCL shall be above 98.5% where it shall be entitled to the incentives as provided in the CERC Tariff Regulations, 2019.

7.1.5 **Penalty:**

If the annual availability in a contract year falls below 95%, the SPVs shall be liable for an annual penalty as provided in the TSA. Based on my analysis, in the present case, it is assumed that the annual availability will not fall below 95% and hence, penalty is not considered in the financial projections.

For JKTPL, when the Availability in any month is less than the 98%, the UC for such month shall be proportionately reduced and such reduction shall be multiplied by a factor of 1.5 by way of penalty. If the transmission loss of JKTPL for any month is more than the normative loss, penalty will be payable by JKTPL as per the computations provided in the TSA. The reliability of the system capacity in an accounting year shall be measured in terms of the number of forced Outages occurring on the individual elements of the System Capacity in successive Reliability Measurement Units (“RMU”). The cumulative incentive or penalty shall be determined with reference to normative availability within 30 days from close of every year.

7.1.6 **Expenses:**

Expenses are estimated by the Investment Manager for the projected period based on the inflation rate as determined for the SPVs. I have relied on the projections provided by the Investment Manager.

- **Operations & Maintenance (“O&M”):** O&M expenditure is estimated by the Investment Manager for the projected period based on the inflation rate as determined for the SPVs. The Investment Manager has projected expenses to be incurred for the O&M of the SPVs including, but not limited to, transmission line maintenance expenses, rates and taxes, legal and professional fees and other general and administration expenses. I have relied on the projections provided by Investment Manager on the O&M expenses for the projected period.

- **Insurance Expenses:** I understand from the Investment Manager that the insurance expenses of the SPVs are not reasonably expected to inflate for the projected period. I have relied on the projections provided by the Investment Manager on the insurance expenses for the projected period.

O&M expenses are projected to escalate ~2.5% to 5% year on year basis. PM fees is observed to be escalating on the same basis ~2.5% to 5% p.a in line with operating expenses (excluding Insurance and any expense which is statutory in nature).

(Refer Appendix 6 and 10 for detailed working)

7.1.7 **Depreciation:**

For calculating depreciation as per Income Tax Act for the projected period, I have considered depreciation rate as specified in the Income Tax Act and WDV as provided by the Investment Manager. The book depreciation has been provided by the Investment Manager till the life of the SPVs for all the projects except RTBP projects. The book depreciation for RTBP projects has been calculated using the rates and methodology notified vide CERC Tariff regulations, 2024.

7.1.8 **Capex:**

As represented by the Investment Manager, regarding the maintenance capex, the same has already been considered in the Operations & Maintenance expenditure for the projected period and regarding the expansion capex, the SPVs are not expected to incur any Capex in the projected period except for BDTCL and PTCL.

7.1.9 **Tax and Tax Incentive:**

As per the discussions with the Investment Manager, Section 115BAA of Income Tax Act,196 has been considered for the projected period of the SPVs (except PrKTCL) for the current valuation exercise, which inter alia does not provide benefits of additional depreciation and section 80-IA and Sec 115 JB. Accordingly, the base corporate tax rate of 22% (with applicable surcharge and cess) is considered. As per the discussions with the Investment Manager, PrKTCL will continue with old tax regime and avail the benefits of additional depreciation, section 115 JB and section 80-IA. Post complete utilization of MAT Credit, PrKTCL will shift to the new tax regime as per the Income Tax Act.

7.1.10 **Working Capital:**

The Investment Manager has represented the working capital requirement of the SPVs for the projected period. The operating working capital assumptions for the projections provided by the Investment Manager comprises of prepaid expense, security deposit, trade receivables, trade payables and others.

7.1.11 **Terminal Period Cash Flows:**

Terminal value represents the present value at the end of explicit forecast period of all subsequent cash flows to the end of the life of the asset or into perpetuity if the asset has an indefinite life.

I understand, based on the representation of the Investment Manager, that all the SPVs except JKTPL are expected to generate cash flow even after the expiry of concession period as the projects are either on BOOM or BOO model and the ownership will remain with the respective SPVs even after the expiry of concession period. The value of SPVs at the end of the concession period may be dependent on the expected renewal/extension of concession period with limited capital expenditure or the estimated salvage value the assets of the SPVs can fetch.
Considering the estimation uncertainty involved in determining the salvage value and basis my discussion with the Investment Manager on the cash flow estimates for the period after the concession period, I found it appropriate to derive terminal period value, which represents the present value at the end of explicit forecast period/concession period of all subsequent cash flows to the end of the life of the asset or into perpetuity if the asset has an indefinite life, based on the perpetuity value derivation / Gordon growth model with 0% terminal growth rate. Accordingly, for the terminal period (i.e. after the expiry of 35 years), a terminal growth rate of 0% has been applied on cash flows based on Investment Manager's estimate for all the SPVs, other than ENICL.

ENICL was one of the earlier projects awarded to the Sponsor through the process of Tariff Based Competitive Bidding ("TBCB") on 7th January 2010. The terms of tariff for ENICL are governed by the CERC Order ("Tariff Adoption Order") dated 28th October 2010, read with the TSA. As per the Tariff Adoption Order, the tariff adopted for the transmission system is valid for a period of 25 years. The tariff of the transmission assets beyond the period of 25 years will be governed by the provisions of clause (4) of Regulation 13 of CERC (Procedure, Terms and Conditions for grant of Transmission Licence and other related matters) Regulations ("CERC Licence Regulations") dated 26th May 2009 as amended from time to time. Hence, in case of ENICL, based on the extant provisions of the CERC Regulations, in case of transmission assets that have been awarded on the basis of competitive bidding under Section 63 of the Electricity Act, as in the case of the ENICL, the tariff beyond the initial period of TSA shall be determined based on various factors, inter-alia, basis of norms prevalent during the period in which the TSA is due to expire. Considering the extant provisions of CERC Regulations, the Investment Manager has represented me a post-tax return on equity of 15% on estimated equity can be considered as a cash flow for period after end of TSA period. Accordingly, the Investment Manager has provided me an estimated terminal cash flow to be expected after the end of TSA period in case of ENICL. I have considered the same for my valuation analysis.

I understand from the representation of the Investment Manager that JKTPL will generate cash flow even after the expiry of concession period of 25 years, as the project has an extension clause stating a further increase in the license tenure for 10 years. Since the project is based on DBOFT model the ownership will not remain with the SPV after the expiry of the extended period. Based on my discussions with the Investment Manager, I understand it is a highly probable that JKTPL will receive an extension of 10 years as per terms of TSA. Hence, I have considered an extension of 10 years for the JKTPL project without assigning any value to the Terminal period. Accordingly, I have projected the revenue and thus the Valuation working till FY 46, considering the impact of extension of 10 years in the TSA post the end the Concession Period.

7.1.12 **True up petition for PrKTCL:**

I understand that PrKTCL has filed petition with CERC for Approval of Truing up of Transmission Tariff for 2014-19 Tariff Block and Determination of Transmission Tariff for 2019-24 Tariff Block for transmission line elements and final order is reserved by CERC. The Truing up of Transmission Tariff for 2019-24 Tariff Block and determination of Transmission Tariff for 2024-29 Tariff Block will be filed once reserved petition order is received from CERC. The Investment Manager has informed me that the projections for PrKTCL are based on the above mentioned petition. Thus, as per the CERC Tariff Regulations, 2024, revenue components, interest during construction, incidental expenses during construction, spares, interest amount and additional capital expenditure are expected to be trued up as per the final true up order of CERC. This truing up may have a bearing on the transmission revenue of PrKTCL for the projected period.

The key assumptions for Solar and CER Revenue of the SPVs, are as follows:

I have estimated the fair EV of the SPVs using the DCF Method. While carrying out this engagement, I have relied extensively on the information made available to me by the Investment Manager. I have considered projected financial statements of the SPVs as provided by the Investment Manager.

Valuation

The key assumptions of the projections provided to us by the Investment Manager are divided into two parts:

A. Key Assumptions for cash flows dependent on the terms of the respective PPAs of the SPVs

B. Key Assumptions for cash flows pertaining to Certified Emission Reduction ("CER") Units.

(A) Key assumptions for Cash Flows dependent on terms of PPA are as follows:

Cash Flows falling under this category are mainly driven by the revenue and operations required as per the terms of the respective SPVs PPAs, O&M Agreements, etc

7.2.1. Revenue from sale of electricity units:

The revenues generated by the SPV are correlated to the amount of electricity generated, which in turn is dependent upon available irradiance and weather conditions. Irradiance and weather conditions have natural variations from season to season and from year to year and may also change permanently because of climate change or other factors. The total kilowatt hour units expected to be generated annually during the tenure of PPA are estimated using budgeted plant load factors based on inter-alia the forecasted irradiance and weather conditions.

The contractual tariff rates are applied to this annual estimate to determine the total estimated revenue over the term of the PPA. The Plant Load Factor ("PLF") is the ratio of the actual output of a solar power plant over the reporting period to their potential output if it were possible for them to operate at full rated capacity. I have relied on the same.

In the present valuation, the technical team of the Investment Manager has prepared the PLF estimates for the projected period basis historical performance after considering the variance on account of seasonal factors and any one-time instances or events. I have relied on the projections provided by the Investment Manager for the projected PLF of the SPVs. I have corroborated the assumptions made by the Investment Manager in relation to the projected PLF of the SPVs with an independent technical report.

Sr. No.	SPV	Tariff rate as per PPA	Balance PPA Period	Customer
1	ISPL 1	4.43	~ 17 Years 10 Months	SECI
2	ISPL 2	4.43	~ 18 Years 4 Months	SECI
3	TNSEPL	7.01	~ 15 Years 1 Months	TANGEDCO
4	UMD	7.01	~ 15 Years 4 Months	TANGEDCO
5	TL Kanji	7.01	~ 15 Years 6 Months	TANGEDCO
		8.44		UPPCL
6	TL Raj	3.47	~ 18 Years 0 Months	TANGEDCO
7	Solar Edge	4.43	~ 17 Years 7 Months	SECI
8	TL Charanka	11.32 till FY 23 11.11 during FY 24 6.99 during FY 25 6.47 from FY 26 to FY 37	~ 11 Years 6 Months	GUVNL
9	TL Tinwari	17.91	~ 11 Years 1 Month	NVVN
10	PLG	15 per unit for first 12 years 5 per unit from 13th Year	~ 11 Years 4 Months	GUVNL
11	USUPL	9.33 per unit for first 12 years 3.25 per unit from 13th year	~ 16 Years	UPPCL
		8.59		NVVN
12	Globus	6.969	~ 15 Years 4 Months	MPPMCL
13	TL Patlasi	5.45	~ 14 Years 7 Months	SECI
14	TL Nangla	8.3	~ 14 Years 6 Months	PSPCL
15	TL Gadna	8.99	~ 12 Years 6 Months	NVVN
16	GGEL	12.2	~ 12 Years 9 Months	NVVN
17	JUPL	2.71	~ 24 Years 8 Months	SECI
18	RSAPL	2.37	~ 24 Years 4 Months	SECI

7.2.2. GST Annuity

If there is any additional increase in BCD, SGD and/or IGST which increases the Project Cost during execution of the Project, then Project developer can claim the additional expenditure under PPA provision of 'Change in Law - CIL'.

As informed by the Investment Manager, Solar Edge, ISPL 1 and ISPL 2 shall receive monthly GST Annuity for an increase in capital expenditure due to the introduction of GST, claimed as Change in Law in terms of the PPA(s) by

Solar Edge, ISPL 1 and ISPL 2. The CERC order, entitled Solar Edge, ISPL 1 and ISPL 2 to receive monthly annuity payments until Mar'29, Mar'33 and Mar'33 respectively is relied upon for this revenue.

7.2.3. Tariff Upside in relation to GGEL:

In its order dated 26th July, 2022, APTEL directed CERC to devise a mechanism for an upward revision of the tariff in the case of GGEL, in light of the lower actual DNI compared to the projected DNI.
Pursuant to this order, the Investment Manager has submitted a request to CERC and NVVN for an incremental tariff increase of INR 4.15 per unit, applicable from COD through the end of the project's life. The Investment Manager anticipates receiving the revised tariff (with retrospective effect) starting from FY 2027.
As per the transaction documents between GGEL and the erstwhile sellers, 75% of the incremental tariff cash flows (net of tax) actually received shall be paid to the erstwhile sellers. Additionally, the documents stipulate that GGEL is also obligated to pay 75% of the net present value (NPV) of future incremental tariff-related cash flows (net of tax), calculated using a 12% discount rate.

7.2.4. Expenses:

I have relied on the projections provided by the Investment Manager for expenses and have checked the reasonableness of the same, by analyzing the past trend in expenses and the expenses projected by the SPVs.

1. **Operations & Maintenance ("O&M"):** O&M expenditure is estimated by the Investment Manager for the projected period on the basis of the O&M Agreement entered by the SPV with an adequate escalation considered by the Investment Manager. The Investment Manager has escalated these costs by approximately ~2-4% p.a. The Investment Manager has provided the estimated O&M costs for the projected period and I have corroborated the said expenses with O&M Contract signed.
2. **Lease Charge:** The amount of lease charges is corroborated with the lease agreements entered into by the SPV. I have relied on the projected lease expenses working and Lease agreements provided by the Investment Manager.
3. **Insurance Expenses:** I understand from the Investment Manager that the insurance expenses of the SPVs are not reasonably expected to inflate for the projected period. I have relied on the projections provided by the Investment Manager on insurance expenses for the projected period, which are based on the existing insurance costs of the SPVs.
4. **Other Expenses:** Other Expenses represented by the Investment Manager includes Statutory fees, Rajasthan Renewable Energy Development Fund Charges (RREDC), Spares, Inverter Charges/ Replacements costs, Overheads which include expenses related to IT, HR, Admin, Compliance, Audit fees, etc. I have relied on the estimate of these expenses as provided by the Investment Manager.

O&M expenses are projected to escalate ~2-4% year on year basis. PM fees is observed to be escalating at 7% p.a in line with operating expenses (excluding Insurance and any expense which is statutory in nature). Other costs are escalated at ~2.5% p.a.

(Refer Appendix 6 and 10 for detailed working)

7.2.5. Capital Expenditure ("Capex"):
I understand that Solar SPVs has sourced majority of its components such as solar panels and inverters directly from multiple manufacturers with industry standard warranty and guarantee terms. I understand that some of the SPVs are expected to incur Capex in the projected period.

7.2.6 Tax and Tax Incentive:
As per the discussions with the Investment Manager, the new provisions of Income Tax Act has been considered for the projected period of the Solar SPVs except for UMD, TL Kanji and TL Nangla wherein new provisions of Income tax act have been considered after lapse of 80IA and utilization of MAT credit benefits.

7.2.7 Working Capital:
The Investment Manager has represented the working capital requirement of the SPV for the projected period in terms of trade payables days and trade receivables (Debtors & Unbilled revenue) days.
The trade payables days are considered to be 45 days (of annual expenses) based on historical trend, and trade receivables days are considered to be 45 days (of annual revenue), based on the historical collection trends, terms of the respective PPAs and applicable Electricity Rules (like Electricity Rules, 2022).

7.2.8 RREDC Charges:
REDC are state-imposed levies applicable to renewable energy projects, primarily solar and wind, in select Indian states. These charges are collected by the respective State Nodal Agencies or State Load Despatch Centres (SLDCs) to fund regulatory activities, facilitate infrastructure development, and promote the growth of renewable energy within the state.

7.2.9 Terminal Value:

Terminal value represents the present value at the end of explicit forecast period of all subsequent cash flows till the end of the life of the asset or into perpetuity if the asset has an indefinite life. As the ownership of the underlying assets (tangible assets) shall remain with the SPV even after the expiry of PPA term and as the cash flows beyond the end of tenure i.e. 30 years are relatively uncertain, the terminal period value (i.e. value on account of cash flows to be generated after the expiry of the period) has been considered based on the salvage value of the plant & machinery, sale of freehold land and realization of working capital at the end of the tenure.

(B) The key assumptions for Cash Flows pertaining to Certified Emission Reduction ("CER") are as follows:

The SPVs are also engaged in selling CER units to carbon credit traders/ end users. I understand from the Investment Manager that the SPVs have received the necessary registrations / certifications. Hence revenue generated from this activity has been estimated by the Investment Manager during the projected period for all the SPVs. The Cash Flows under this category are driven by market forces of demand and supply.

7.2.10 Sale of units for Certified Emission Reductions (CERs):

The Investment Manager has estimated the revenue from sale of CER units based on projected units generated by the SPVs from their respective Solar Plant(s), whereas the estimated selling price of CER is based on a market information. The Investment Manager expects to sell the CER units from FY27.

7.2.11 Expenses / Capital Expenditure:

I have been informed by the Investment Manager that no material separate expenses or capital expenditure is expected to be incurred by the SPVs for selling the CER units earning. The general admin expenses are already considered while projecting the expenses in Para 7.2.4 above.

7.2.12 Taxes and Tax Incentive:

As per discussions with the Investment Manager, income generated from the sale of carbon credits is subject to effective tax under the Income Tax Act.

7.2.13 Working Capital:

The Investment Manager has represented the working capital requirement of the SPVs will be negligible. Based on the past trend, the Investment Manager has represented that income generated from the sale of CER units is typically received concurrent with the sales themselves. Therefore, for the forecasted period concerning CER Income, the Investment Manager has projected a trade receivable period of 0 days.

The key assumptions for Battery Energy Storage System revenue, incentives and penalty of the SPVs, are as follows:

7.3.1 Revenue:

Battery Energy Storage System Projects SPV, earn revenue from the sale of BESS Capacity pursuant to BESPA as approved by the appropriate commission, which will be fixed for entire term of agreement at delivery point. As a capacity-based contract, the SPV receives availability-based tariff under the BESPA irrespective of the actual utilization of BESS by the buying utility. The tariff for the SPV is contracted for the period of the relevant BESPA, which is up to 12 years from the scheduled commissioning date.

Where long-term BESPAs are in place, BESS SPVs receive fixed availability-based payments, independent of actual dispatch, provided the system remains operational and available as per the agreed technical performance standards.

7.3.2 Penalty:

If monthly system availability falls below 95%, the monthly capacity charges are proportionally reduced as per the BESPA. Based on my analysis, in the present case, it is assumed that the monthly availability will not fall below 95% and hence, penalty is not considered in the financial projections.

7.3.3 Expenses:

Expenses are estimated by the Investment Manager for the projected period based on the inflation rate as determined for the SPVs. I have relied on the projections provided by the Investment Manager.

- **Operations & Maintenance ("O&M"):** O&M expenditure is estimated by the Investment Manager for the projected period based on the inflation rate as determined for the SPVs. The Investment Manager has projected expenses to be incurred for the O&M of the SPVs including, but not limited to, BESS maintenance expenses, rates and taxes, legal and professional fees and other general and administration expenses. I have relied on the projections provided by Investment Manager on the O&M expenses for the projected period.

- **Insurance Expenses:** I understand from the Investment Manager that the insurance expenses of the SPVs are not reasonably expected to inflate for the projected period. I have relied on the projections provided by the Investment Manager on the insurance expenses for the projected period.
  (Refer Appendix 6 and 9 for detailed workings)

7.3.4 Depreciation:

For calculating depreciation as per Income Tax Act for the projected period, I have considered depreciation rate as specified in the Income Tax Act and WDV as provided by the Investment Manager.

7.3.5 Capex:

For calculating depreciation as per Income Tax Act for the projected period, I have considered depreciation rate as specified in the Income Tax Act and WDV as provided by the Investment Manager.

7.3.6 Tax and Tax Incentive:

As per the discussions with the Investment Manager, Section 115BAA of Income Tax Act,196 has been considered for the projected period of the SPVfor the current valuation exercise, which inter alia does not provide benefits of additional depreciation and section 80-IA and Sec 115 JB. Accordingly, the base corporate tax rate of 22% (with applicable surcharge and cess) is considered.

7.3.7 Working Capital:

The Investment Manager has represented the working capital requirement of the SPVs for the projected period. The operating working capital assumptions for the projections provided by the Investment Manager comprises of prepaid expense, security deposit, trade receivables, unbilled revenue, trade payables and others.

7.4. Calculation of Weighted Average Cost of Capital for the SPVs:

7.4.1. Cost of Equity:

Cost of Equity (CoE) is a discounting factor to calculate the returns expected by the equity holders depending on the perceived level of risk associated with the business and the industry in which the business operates.

For this purpose, I have used the Capital Asset Pricing Model (CAPM), which is a commonly used model to determine the appropriate cost of equity for the SPVs.

K(e) = Rf + (ERP* Beta) + CSRP

Wherein:
K(e) = cost of equity
Rf = risk free rate
ERP = Equity Risk Premium
Beta = a measure of the sensitivity of assets to returns of the overall market
CSRP = Company Specific Risk Premium (In general, an additional company-specific risk premium will be added to the cost of equity calculated pursuant to CAPM).
For valuation exercise, I have arrived at adjusted cost of equity of the SPVs based on the above calculation *(Refer Appendix 3 for detailed working).*

7.4.2. Risk Free Rate:

I have applied a risk free rate of return of 6.72% on the basis of the zero coupon yield curve as on 30th September 2025 for government securities having a maturity period of 10 years, as quoted on the website of Clearing Corporation of India Limited. For comparison, the previous valuation as of June 2025 used a risk-free rate of 6.46%.

7.4.3. Equity Risk Premium (“ERP”):

The Equity Risk Premium (ERP) is a measure of the additional return that investors require for investing in equity markets over risk-free assets, such as government bonds. It is typically estimated by comparing historical realised returns on equity with the risk-free rate, often represented by 10-year government securities. For my estimation of the ERP for India, I have analysed rolling historical returns of the Nifty 50 Index over 10-year, 15-year, and 20-year periods, covering data from 2000 to 2025. As of 30th September, the calculated ERP based on these rolling return periods stands at 6.42%, 6.71% and 7.53% for the 10-year, 15-year and 20-year periods respectively. These figures indicate variability in ERP over different investment horizons, but collectively they suggest a range around 6% to 8%. Considering the historical trends, variability across periods, and long-term expectations, an equity risk premium of 7% for India continues to be an appropriate and reasonable assumption. For comparison, the previous valuation as of June 2025 used an Equity Risk Premium of 7.00%.

7.4.4. Beta:

Beta is a measure of the sensitivity of a company’s stock price to the movements of the overall market index. In the present case, I find it appropriate to consider the beta of companies in similar business/ industry to that of the SPVs for an appropriate period.

Transmission Assets:

Based on my analysis of the listed InvITs and other companies in power and infrastructure sectors, I find it appropriate to consider the beta of Power Grid Corporation of India Limited (“PGCIL”), Powergrid Infrastructure Investment Trust and IndiGrid Infrastructure Trust for the current valuation exercise.

Solar Assets:

(A) Beta for cash flows dependent on the terms of PPA:
For the valuation of the SPVs, I find it appropriate to consider the beta of NTPC Limited, Powergrid Infrastructure Investment Trust, Power Grid Corporation of India Ltd. and IndiGrid Infrastructure Trust for an appropriate period. The beta so arrived, is further adjusted based on the factors of mentioned SPVs like completion of projects, revenue certainty, past collection trend, lack of execution uncertainty, etc. to arrive at the adjusted unlevered beta appropriate to the SPVs.

(B) Beta for cash flows pertaining to Certified Emission Reduction (“CER”):
For the purpose of determination of Ke for discounting CER Cash Flows, I find it appropriate to consider the beta of one (1) considering the risk in the absence of any comparable companies for this business activitiy. I have considered debt-equity at 0:100 for the cash flows pertaining to CER. Accordingly, the re-levered beta of 1 has been considered for all the SPVs for the cash flows pertaining to CER.

Battery Energy Storage System Assets:

Based on my analysis of the listed InvITs and other companies in power and infrastructure sectors, I find it appropriate to consider the beta of Power Grid Corporation of India Limited ("PGCIL"), Powergrid Infrastructure Investment Trust and IndiGrid Infrastructure Trust for the current valuation exercise.

(Refer Appendix 2 for justification for including the above comparables in beta computation)

I have further unlevered the beta of such companies based on market debt-equity of the respective company using the following formula:
Unlevered Beta = Levered Beta / [1 + (Debt / Equity) *(1-T)]
Further I have re-levered it based on debt-equity at 70:30 based on the industry Debt: Equity ratio using the following formula:
Re-levered Beta = Unlevered Beta * [1 + (Debt / Equity) *(1-T)]
Accordingly, as per above, I have arrived at re-levered betas of the SPVs.
(Refer Appendix 2 for relevered beta)

7.4.5. Company Specific Risk Premium ("CSRP"):

Discount Rate is the return expected by a market participant from a particular investment and shall reflect not only the time value of money but also the risk inherent in the asset being valued as well as the risk inherent in achieving the future cash flows.

While determining the WACC or K(e) of ENICL for the terminal period, I have considered CSRP of 3% on account of uncertainty attached to the determination of cash flows of ENICL for the terminal period.

The tariff of PrKTCL, KTL-II, KTL-III, PTCL-II and KNTL-II is determined under Section 62 of the Act by CERC which is subject to changes on a regular interval. Certain components that subject to changes are the expected rate of return on equity, operation and maintenance expenses, interest expenses, etc. that may have a bearing on the estimated tariff and consequently on the cash flows of the SPVS during the projected period. Hence, for PrKTCL, KTL, PTCL and KNTL considering the nature of regulatory risk and its likely impact on the cash flows of the SPVs during the projected period due to review of tariff determination (such tariff determination review is carried out every five years) norms during the useful life of the SPV and later, approval of the true up petition by CERC and basis my discussion with Investment Manager, I found it appropriate to consider 1% CSRP.

In other case, considering the length of the explicit period, the basis of deriving the underlying cash flows and basis my discussion with Investment Manager, I found it appropriate to consider 0% CSRP.

For comparison, the CSRP was same for previous valuations as of June 2025.

7.4.6. Cost of Debt:

The calculation of Cost of Debt post-tax can be defined as follows:
K(d) = K(d) pre-tax * (1 - T)

Wherein:
K(d) = Cost of debt
T = tax rate as applicable

For the current valuation exercise, pre-tax cost of debt has been considered as 7.44%, as represented by the Investment Manager. For comparison, the previous valuation as of June 2025 used a Cost of Debt of 7.53%

7.4.7. Debt : Equity Ratio:

In the present valuation exercise, I have considered debt : equity ratio of 70:30 based on industry standards and as per the guidance provided by various statutes governing the industry. I have considered the industry benchmark since the cost of capital is a forward-looking measure and captures the cost of raising new funds to buy the asset at any valuation date (not the current actually deployed). Specifically, such benchmark is required to consider the nature of the asset class, and the comparative facts from the industry to arrive at the correct assumption.

Moreover, Regulation 20 of Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014 permits an InvIT to raise debt upto 70 percent of the value of assets subject to the fulfillment of specific conditions including:

(i) obtaining a credit rating of "AAA" or equivalent for its consolidated borrowing and the proposed borrowing, from a credit rating agency registered with the Board;

(ii) have a track record of at least six distributions, in terms of sub-regulation (6) of regulation 18, on a continuous basis, post listing, as at the end of the quarter preceding the date on which the enhanced borrowings are proposed to be made.

(iii) utilize the funds only for acquisition or development of infrastructure projects.

(iv) obtain the approval of unitholders in the manner specified in sub-regulation (5A) of regulation 22.]

Given the risk profile of Solar, Transmission & Battery Energy Storage System projects and considering the leverage at 70% of the total project cost based on rating agencies reports available in public domain, and further considering the InvIT Regulations allowing in general upto 70% leverage in assets where the AAA rating has been obtained, a debt-to-equity ratio of 70% for Solar asset was found to be appropriate.

Accordingly, I have considered the same weightage to arrive at the WACC of the SPVs. For comparison, the previous valuation of June 2025 used a Debt Equity Ratio of 70:30.

7.4.8. Weighted Average Cost of Capital (WACC):

The discount rate, or the WACC, is the weighted average of the expected return on equity and the cost of debt. The weight of each factor is determined based on the company's optimal capital structure.

Formula for calculation of WACC:
WACC = [K(d) * Debt /(Debt + Equity)] + [K(e) * (1 - Debt /(Debt + Equity))]

Accordingly, as per above, I have arrived the WACC for the explicit period of the SPVs.
(Refer Appendix 3 for detailed workings).

Transmission Assets:

Sr No.	SPVs	30-Sep-25	30-Jun-25

**These SPVs are under construction SPVs which are valued on NAV basis hence WACC is not applicable.*

7.4.9. Cash Accrual Factor (CAF) and Discounting Factor

Discounted cash flow require to forecast cash flows in future and discount them to the present in order to arrive at present value of the asset as on Valuation Date.

To discount back the projections we use the Cash Accrual Factor ("CAF"). The Cash Accrual Factor refers to the duration between the Valuation date and the point at which each cash flow is expected to accrue. Discounted cash flow is equal to sum of the cash flow in each period divided by discounting factor, where the discounting factor is determined by raising one plus discount rate (WACC) to the power of the CAF.

$DCF = [CF1 / (1+r)^{CAF1}] + [CF2 / (1+r)^{CAF2}] + ... + [CFn /(1+r)^{CAFn}]$

Where,

CF = Cash Flows,

CAF = Cash accrual factor for particular period , R = Discount Rate (i.e. WACC)

8 Valuation Conclusion

8.1 The current valuation has been carried out based on the discussed valuation methodology explained herein earlier. Further, various qualitative factors, the business dynamics and growth potential of the business, having regard to information base, management perceptions, key underlying assumptions and limitations were given due consideration.

8.2 I have been represented by the Investment Manager that there is no potential devolvement on account of the contingent liability as of valuation date; hence no impact has been factored in to arrive at fair EV of the SPVs.

8.3 Based on the above analysis, the fair EV as on the Valuation Date of the SPVs is as mentioned below:

Transmission Assets:

INR Mn

Sr No.	SPVs	Projection Period (Balance TSA Period)	WACC	Fair EV
1	BDTCL	~ 23 Years 6 Months	7.66%	20,596
2	JTCL	~ 23 Years 5 Months	7.78%	17,196
3	MTL	~ 27 Years 3 Months	7.39%	6,294
4	RTCL	~ 25 Years 5 Months	7.21%	4,455
5	PKTCL	~ 25 Years 6 Months	7.22%	6,780
6A	PTCL I	~ 26 Years 2 Months	7.48%	4,402
6B	PTCL II	~ 34 Years 3 Months		
7A	NRSS I	~ 27 Years 11 Months	7.16%	42,743
7B	NRSS II*	~35 years from the date of COD	NA	495
8	OGPTL	~ 28 Years 6 Months	7.45%	14,813
9	ENICL**	~ 10 Years 1 Months	7.84% to 11.05%	11,298
10A	GPTL I	~ 29 Years 6 Months	7.41%	12,158
10B	GPTL II*	~35 years from the date of COD	NA	264
11	NERTL	~ 30 Years 6 Months	7.30%	58,226
12	RSTCPL	~ 23 Years 3 Months	7.72%	2,799
13	KhTL	~ 28 Years 10 Months	7.47%	17,773
14	JKTPL	~ 20 Years 1 Months	7.19%	3,280
15	PrKTCL	~ 24 Years	7.50%	6,492
16A	KTL-I	~ 33 Years 10 Months	7.54%	5,454
16B	KTL-II	~ 34 Years		
16C	KTL-III	~ 34 Years 6 Months		
17	KTCO*	NA	NA	1,146
18	DPTL*	NA	NA	1,033
19	IPTL*	NA	NA	1,370
20	RKPTL*	NA	NA	892
21	SitamauSS*	NA	NA	75
22A	KNTL - I	~ 33 Years 3 months	7.60%	7,960
22B	KNTL – II	~ 35 Years from the date of COD		
Total Fair Enterprise Value of Transmission Assets (A)				**247,992**

** Since these projects are valued as per Cost approach. Hence WACC is not applicable.*

*** For ENICL, I have considered separate WACC for explicit period and terminal period. The WACC for explicit period is 7.84% and the WACC for terminal period is 11.05%*

Solar Assets:

INR Mn

Sr No	SPVs	Projection Period (Balance PPA Period)	WACC	Fair EV

Particulars	Fair EV
Total Fair Enterprise Value of Transmission Assets (A)	247,992
Total Fair Enterprise Value of Solar Assets (B)	73,773
Total Fair Enterprise Value of BESS Assets (C)	3,646
Total Fair Enterprise Value (A+B+C)	**325,411**

8.4 EV is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash or cash equivalents to meet those liabilities.

8.5 The EV as described above is not inclusive of cash and cash equivalents of the SPVs as on the Valuation Date.

8.6 The fair EV of the SPVs is estimated using DCF method. The valuation requires the Investment Manager to make certain assumptions about the model inputs including forecast cash flows, discount rate, and credit risk.

8.7 Valuation is based on estimates of future financial performance or opinions, which represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, a particular event will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary from these estimates and the variations may be material.

Accordingly, a quantitative sensitivity analysis is considered on the following unobservable inputs:

1. Weighted Average Cost of Capital (WACC) by increasing / decreasing it by 0.5%
2. Weighted Average Cost of Capital (WACC) by increasing / decreasing it by 1.0%
3. Total Expenses considered during the projected period by increasing / decreasing it by 20%
4. Terminal period value considered for the SPVs increasing / decreasing it by 20%

The detailed results of the above sensitivity analysis are presented in **Section 1.8 – Summary of Valuation**, for reference and further consideration.

9. Minimum Disclosures mandated under Schedule V of SEBI InvIT Regulations for Full Valuation Reports

9.1 Scope of Work:

The Schedule V of the SEBI InvIT Regulations prescribes the minimum set of mandatory disclosures to be made in the Full Valuation Report. Being a quarterly valuation report, all disclosures where there were material updates, during the quarter, are being disclosed. In this reference, the minimum disclosures in valuation report may include following information as well, so as to provide the investors with the adequate information about the valuation and other aspects of the underlying assets of the InvIT.

The additional set of disclosures, as prescribed under Schedule V of InvIT Regulations, to be made in the valuation report of the SPVs are as follows:

	Schedule V of the SEBI InvIT Regulations	Reference In Report
i.	Details of the project including whether the transaction is a related party transaction	Section 9.2 (A)
ii.	Latest pictures of the project	Section 9.2 (B) & Section 3.2 – Background of the SPVs
iii.	the existing use of the project	Section 3.2 – Background of the SPVs
iv.	the nature of the interest the InvIT holds or proposes to hold in the project, percentage of interest of the InvIT in the project	Section 4 – Structure of the Trust, Appendix 5
v.	Date of inspection and date of valuation	Same as Point (ii) as mentioned above
vi.	Qualifications and assumptions	Section 7 – Valuation of the SPVs (Key Assumptions)
vii.	Methods used for valuation	Section 6 – Valuation Methodology
viii.	Valuation standards adopted	Section 2 – Procedures adopted for Valuation
ix.	Extent of valuer's investigations and nature and source of data to be relied upon	Section 10 – Sources of information
x.	Purchase price of the project by the InvIT (for existing projects of the InvIT)	Same as Point (i) as mentioned above
xi.	Valuation of the project in the previous 3 years; (for existing projects of the InvIT)	Section 1.10- Executive Summary
xii.	Detailed valuation of the project as calculated by the valuer;	Appendix 1,2,3
xiii.	List of one-time sanctions/approvals which are obtained or pending;	Section 9.2 (C)
xiv.	List of up to date/overdue periodic clearances;	Section 9.2 (D)
xv.	Statement of assets	Section 9.2 (E)
xvi.	Estimates of already carried as well as proposed major repairs and improvements along with estimated time of completion;	Section 9.2 (F)
xvii.	Revenue pendencies including local authority taxes associated with InvIT asset and compounding charges, if any;	Section 9.2 (G)
xviii.	On-going material litigations including tax disputes in relation to the assets, if any;	Section 9.2 (H)
xix.	Vulnerability to natural or induced hazards that may not have been covered in town planning/ building control.	Section 9.2 (I)

9.2 Analysis of Additional Set of Disclosures for the SPVs

A. Purchase Price of the SPVs by the InvIT:

** Purchase price considered is the Enterprise value as on the acquisition date of the respective SPVs subject to cash, working capital adjustments and liabilities outstanding.*

*** IGT has acquired control of VRET via Acquisition resulting in addition of 16 operating solar projects (14 SPVs) and 1 Transmission asset i.e TL SitamauSS held by 15 SPVs with a capacity of 538 MW w.e.f 25th August 2023 (hereinafter referred to as the VRET Assets.*

\# Not applicable since these are awarded SPVs.

KNTL and RSAPL were jointly acquired for a total purchase consideration of INR 21,079 million on 24th June 2025.

B. Latest Pictures of the Project:

My team and I visited following sites during this quarter: JUPL, RSAPL, TL Kanji, TL Raj, TNSEPL, UMD and NERTL, the site visit pictures of which are disclosed in Section 3.2 - Background of the SPVs.
Additional site visits for the remaining SPVs are planned in the forthcoming months, and details relating to the respective projects, along with relevant photographs, will be updated and disclosed in the forthcoming reports.

C. List of one-time sanctions/approvals which are obtained or pending:

The list of sanctions/ approvals obtained by the SPVs till the date of this Report is provided in Appendix 11. As informed by the Investment Manager, there are few applications for government sanctions/licenses by the SPVs for which approval is pending as on 30th September 2025, as disclosed in Appendix 11.

D. List of up to date/ overdue periodic clearances:

The list of clearances obtained by the SPVs till the date of this Report is provided in Appendix 11. The Investment Manager has confirmed that the SPVs are not required to take any periodic clearances other than those mentioned in Appendix 11.

E. Statement of assets included:

The details of assets of the SPVs as per the financial statements reviewed by the auditors as at 30th September 2025 is disclosed in Appendix 8.

F. Estimates of already carried as well as proposed major repairs and improvements along with estimated time of completion:

I have been informed that maintenance is regularly carried out by the SPVs in order to maintain the working condition of the assets and there are no material maintenance charges which has been deferred to the upcoming year, as the maintenance activities are carried out regularly.
(Refer Appendix 9 for detailed working)

G. Revenue pendencies including local authority taxes associated with InvIT asset and compounding charges, if any:

Investment Manager has informed me that there are no material dues including local authority taxes (such as Municipal Tax, Property Tax, etc.) pending to be payable to the government authorities with respect to the SPVs (proposed InvIT assets).

H. On-going material litigations including tax disputes in relation to the assets, if any:

As informed by the Investment Manager, the status of ongoing litigations and tax assessments as on 30th September 2025 are disclosed in Appendix 12.

The Investment Manager has informed us that it expects majority of the cases to be settled in favour of SPVs. Further, Investment Manager has informed us that majority of the cases are low to medium risk and accordingly no material outflow is expected against the litigations.

I. Vulnerability to natural or induced hazards that may not have been covered in town planning/ building control:

The Investment Manager has confirmed to me that there are no natural or induced hazards which have not been considered in town planning/ building control.

10. Sources of Information

For the purpose of undertaking this valuation exercise, I have relied on the following sources of information provided by the Investment Manager:

10.1 Audited financial statements of the SPVs for the Financial Year ("FY") ended 31st March 2019, 31st March 2020, 31st March 2021, 31st March 2022, 31st March 2023, 31st March 2024 and 31st March 2025.

10.2 Provisional financial statements of the SPVs for the Financial Year ("FY") ended 30th September 2025.

10.3 Projected incremental tariff revenue workings (including change in law claims in MTL, NRSS, OGPTL, BDTCL, JTCL, ENICL, GPTL, NERTL and KTL)

10.4 Projected financial information for the remaining project life for each of the SPVs;

10.5 Details of projected Major Repairs & Capital Expenditure (Capex);

10.6 Details of brought forward losses and MAT credit (as per Income Tax Act) of the SPVs as at 30th September 2025:

10.7 Details of Written Down Value (WDV) (as per Income Tax Act) of SPVs as at 30th September 2025;

10.8 Shareholding pattern of the equity shares issued by the SPVs and other entities mentioned in this Report as at 30th September 2025 and as at the date of this report;

10.9 Power Purchase Agreements (PPA) entered into by the solar SPVs with their respective customers.

10.10 Technical Report issued in the month of May 2020 by Mahindra Teqo (For ISPL 1 & ISPL 2)

10.11 Transmission Service Agreement of the SPVs with Long Term Transmission Customers and Tariff Adoption Order issued by CERC;

10.12 Battery Energy Storage Purchase Agreements of the BESS SPVs

10.13 List of licenses / approvals, details of tax litigations, civil proceedings and arbitrations of the SPVs;

10.14 Management Representation Letter by the Investment Manager dated 30th October 2025;

10.15 Relevant data and information about the SPVs provided to us by the Investment Manager either in written or oral form or in the form of soft copy;

10.16 Information provided by leading database sources, market research reports and other published data.

The information provided to me by the Investment Manager in relation to the SPVs included but not limited to historical financial statements, forecasts/projections, other statements and assumptions about future matters like forward-looking financial information prepared by the Investment Manager. The forecasts and projections as supplied to me are based upon assumptions about events and circumstances which are yet to occur.

For the purpose of Calculation of Raw beta, we have sourced the data from S&P Capital IQ.

I have not tested individual assumptions or attempted to substantiate the veracity or integrity of such assumptions in relation to the forward-looking financial information, however, I have made sufficient enquiries to satisfy myself that such information has been prepared on a reasonable basis.

Notwithstanding anything above, I cannot provide any assurance that the forward-looking financial information will be representative of the results which will actually be achieved during the cash flow forecast period.

11. Exclusions and Limitations

11.1 My Report is subject to the limitations detailed hereinafter. This Report is to be read in totality, and not in parts, in conjunction with the relevant documents referred to herein.

11.2 Valuation analysis and results are specific to the purpose of valuation and is not intended to represent value at any time other than the valuation date of 30th September 2025 ("Valuation Date") mentioned in the Report and as per agreed terms of my engagement. It may not be valid for any other purpose or as at any other date. Also, it may not be valid if done on behalf of any other entity.

11.3 This Report, its contents and the results are specific to (i) the purpose of valuation agreed as per the terms of my engagements; (ii) the Valuation Date; and (iii) are based on the financial information of the SPVs till 30th September 2025. The Investment Manager has represented that the business activities of the SPVs have been carried out in normal and ordinary course between 30th September 2025 and the Report Date and that no material changes have occurred in the operations and financial position between 30th September 2025 and the Report date.

11.4 The scope of my assignment did not involve me performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of any financial or analytical information that was provided and used by me during the course of my work. The assignment did not involve me to conduct the financial or technical feasibility study. I have not done any independent technical valuation or appraisal or due diligence of the assets or liabilities of the SPVs or any of other entity mentioned in this Report and have considered them at the value as disclosed by the SPVs in their regulatory filings or in submissions, oral or written, made to me.

11.5 In addition, I do not take any responsibility for any changes in the information used by me to arrive at my conclusion as set out herein which may occur subsequent to the date of my Report or by virtue of fact that the details provided to me are incorrect or inaccurate.

11.6 I have assumed and relied upon the truth, accuracy and completeness of the information, data and financial terms provided to me or used by me; I have assumed that the same are not misleading and do not assume or accept any liability or responsibility for any independent verification of such information or any independent technical valuation or appraisal of any of the assets, operations or liabilities of the SPVs or any other entity mentioned in the Report. Nothing has come to my knowledge to indicate that the material provided to me was misstated or incorrect or would not afford reasonable grounds upon which to base my Report.

11.7 This Report is intended for the sole use in connection with the purpose as set out above. It can however be relied upon and disclosed in connection with any statutory and regulatory filing in connection with the provision of SEBI InvIT Regulations. However, I will not accept any responsibility to any other party to whom this Report may be shown or who may acquire a copy of the Report, without my written consent.

11.8 It is clarified that this Report is not a fairness opinion under any of the stock exchange/ listing regulations. In case of any third party having access to this Report, please note this Report is not a substitute for the third party's own due diligence/ appraisal/ enquiries/ independent advice that the third party should undertake for his purpose.

11.9 Further, this Report is necessarily based on financial, economic, monetary, market and other conditions as in effect on, and the information made available to me or used by me up to, the date hereof. Subsequent developments in the aforementioned conditions may affect this Report and the assumptions made in preparing this Report and I shall not be obliged to update, revise or reaffirm this Report if information provided to me changes.

11.10 This Report is based on the information received from the sources as mentioned in Section 9 of this Report and discussions with the Investment Manager. I have assumed that no information has been withheld that could have influenced the purpose of my Report.

11.11 Valuation is not a precise science and the conclusions arrived at in many cases may be subjective and dependent on the exercise of individual judgment. There is, therefore, no indisputable single value. I have arrived at an indicative EV based on my analysis. While I have provided an assessment of the value based on an analysis of information available to me and within the scope of my engagement, others may place a different value on this business.

11.12 Any discrepancies in any table / appendix between the total and the sums of the amounts listed are due to rounding-off.

11.13 Valuation is based on estimates of future financial performance or opinions, which represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, a particular event will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary from these estimates and the variations may be material.

11.14 I do not carry out any validation procedures or due diligence with respect to the information provided/extracted or carry out any verification of the assets or comment on the achievability and reasonableness of the assumptions underlying the financial forecasts, save for satisfying ourselves to the extent possible that they are consistent with other information provided to me in the course of this engagement.

11.15 My conclusion assumes that the assets and liabilities of the SPVs, reflected in their respective latest balance sheets remain intact as of the Report date, except for changes occurring due to ordinary course of business.

11.16 Whilst all reasonable care has been taken to ensure that the factual statements in the Report are accurate, neither myself, nor any of my associates, officers or employees shall in any way be liable or responsible either directly or indirectly for the contents stated herein. Accordingly, I make no representation or warranty, express or implied, in respect of the completeness, authenticity or accuracy of such factual statements. I expressly disclaim any and all liabilities, which may arise based upon the information used in this Report. I am not liable to any third party in relation to the issue of this Report.

11.17 The scope of my work has been limited both in terms of the areas of the business & operations which I have reviewed and the extent to which I have reviewed them. There may be matters, other than those noted in this Report, which might be relevant in the context of the transaction and which a wider scope might uncover.

11.18 For the present valuation exercise, I have also relied on information available in public domain; however the accuracy and timelines of the same has not been independently verified by me.

11.19 In the particular circumstances of this case, my liability (in contract or under any statute or otherwise) for any economic loss or damage arising out of or in connection with this engagement, however the loss or damage caused, shall be limited to the amount of fees actually received by me from the Investment Manager, as laid out in the engagement letter for such valuation work. However, such cap shall not be applicable to damages arising from fraud or willful default or gross negligence as established in civil or criminal proceedings.

11.20 In rendering this Report, I have not provided any legal, regulatory, tax, accounting or actuarial advice and accordingly I do not assume any responsibility or liability in respect thereof.

11.21 This Report does not address the relative merits of investing in InvIT as compared with any other alternative business transaction, or other alternatives, or whether or not such alternatives could be achieved or are available.

11.22 I am not an advisor with respect to legal, tax and regulatory matters for the proposed transaction. No investigation of the SPVs' claim to title of assets has been made for the purpose of this Report and the SPVs' claim to such rights have been assumed to be valid. No consideration has been given to liens or encumbrances against the assets, beyond the loans disclosed in the accounts. Therefore, no responsibility is assumed for matters of a legal nature.

11.23 I have no present or planned future interest in the Trustee, Investment Manager or the SPVs and the fee for this Report is not contingent upon the values reported herein. My valuation analysis should not be construed as investment advice; specifically, I do not express any opinion on the suitability or otherwise of entering into any financial or other transaction with the Investment Manager or SPVs.

11.24 I have submitted the draft valuation report to the Trust & Investment Manager for confirmation of accuracy of factual data used in my analysis and to prevent any error or inaccuracy in this Report.

11.25 Other Limitations:

- This Report is based on the information provided by the representatives of the Investment Manager. The exercise has been restricted and kept limited to and based entirely on the documents, records, files, registers and information provided to me. I have not verified the information independently with any other external source.
- I have assumed the genuineness of all signatures, the authenticity of all documents submitted to me as original, and the conformity of the copies or extracts submitted to me with that of the original documents.
- I have assumed that the documents submitted to me by the representatives of Investment Manager in connection with any particular issue are the only documents related to such issue.
- I have reviewed the documents and records from the limited perspective of examining issues noted in the scope of work and I do not express any opinion as to the legal or technical implications of the same.

11.26 **Limitation of Liabilities**

i. It is agreed that, having regard to the RV's interest in limiting the personal liability and exposure to litigation of its personnel, the Sponsor, the Investment Manager and the Trust will not bring any claim in respect of any damage against the RV personally.

ii. In no circumstances RV shall be responsible for any consequential, special, direct, indirect, punitive or incidental loss, damages or expenses (including loss of profits, data, business, opportunity cost, goodwill or indemnification) in connection with the performance of the services whether such damages are based on breach of contract, tort, strict liability, breach of warranty, or otherwise, even if the Investment Manager had contemplated and communicated to RV the likelihood of such damages. Any decision to act upon the deliverables (including this Report) is to be made by the Investment Manager and no communication by RV should be treated as an invitation or inducement to engage the Investment Manager to act upon the deliverable(s).

iii. It is clarified that the Investment Manager will be solely responsible for any delays, additional costs, or other liabilities caused by or associated with any deficiencies in their responsibilities, misrepresentations, incorrect and incomplete information including information provided to determine the assumptions.

iv. RV will not be liable if any loss arises due to the provision of false, misleading or incomplete information or documentation by the Investment Manager.

11.27 Further, this Report is necessarily based on financial, economic, monetary, market and other conditions as in effect on, and the information made available to me or used by me up to, the date hereof. Subsequent developments in the aforementioned conditions may affect this Report and the assumptions made in preparing this Report and I shall not be obliged to update, revise or reaffirm this Report if information provided to me changes.

Yours faithfully,

S. Sundararaman

Justification of Companies used for calculation of Beta for Transmission SPV's:

The following companies are integral players in the Indian infrastructure sector and contributes significantly to the development, operation and maintenance of infrastructure project. Their strong market presence, diversified portfolios and consistent involvement in the key infrastructure projects make them relevant for the computation of beta of Transmission SPV's in the context of transmission business valuation:

1. **PG InvIT**

   PowerGrid InvIT (PG InvIT) primarily owns and operates high-voltage power transmission lines, which form a critical component of India's electricity infrastructure. The trust earns regulated revenues through long-term, fixed-fee contracts with utilities, offering predictable and stable cash flows over extended periods. Accordingly, PG InviT has been included as a comparable for beta calculation in the valuation of transmission company.

2. **PGCIL**

   Power Grid Corporation of India Limited (PGCIL) is mainly engaged in transmitting total electricity generated in the country. PGCIL has been considered as a comparable for beta calculation in the valuation of the Transmission company due to its operational alignment with the transmission business. The company operates capital-Intensive, regulated transmission asset with stable and predictable cashflows—Characteristics that closely align with those of Transmission businesses. Accordingly, PGCIL has been included as a comparable for beta calculation in the valuation of transmission company.

3. **IndiGrid Infrastructure Trust**

   Indigrid Infrastructure Trust owns and operates a diversified portfolio of infrastructure assets, with a significant share in power transmission. The trust earns stable, regulated revenues through long-term availability-based contracts, providing predictable cash flows similar to other transmission-focused entities. While Indigrid was previously excluded from the beta analysis due to low trading frequency, its trading activity has improved significantly and remains stable in the current year. Hence the Beta of IndiGrid is also included for determination of Beta.

Solar Assets

Appendix 2.2 – Calculation of Unlevered and Relevered Beta as on 30th September 2025

a. Calculation of Unlevered Beta

Unlevered Beta = Levered Beta / [1 + (Debt / Equity)*(1-T)]

Source: Information provided by S&P Capital IQ, database sources, market research, other published data and internal workings

Justification of Companies used for calculation of Beta for Solar SPVs:

The following companies are integral players in the Indian infrastructure sector and contributes significantly to the development, operation and maintenance of infrastructure project. Their strong market presence, diversified portfolios and consistent involvement in the key infrastructure projects make them relevant for the computation of beta of Solar SPVs in the context of Solar business valuation:

1. **PG InvIT**

   PowerGrid InvIT (PG InvIT) primarily owns and operates high-voltage power transmission lines, which form a critical component of India's electricity infrastructure. The trust earns regulated revenues through long-term, fixed-fee contracts with utilities, offering predictable and stable cash flows over extended periods. PGInviT has been included as a comparable for beta calculation in the valuation of Solar generation company primarily due to its Structure as an Infrastructure Investment Trust (InviT). Due to lack of directly listed solar generation InviT, PGInviT – being part of broader InviT category—serves as a relevant proxy given the structural and financial similarities shared across InviTs. PGInviT Operated Capital-intensive, regulated infrastructure assets that generates predictable cash flows. This stability in earnings and business model alignment reinforces the rationale for selecting PGInvIT as a comparable entity,particularly when exact matches withing the solar segment are not available.

2. **PGCIL**

   Power Grid Corporation of India Limited (PGCIL) is mainly engaged in transmitting total electricity generated in the country. PGCIL has been considered as a comparable for beta calculation in the valuation of the solar generation company due to its structural and operational alignment with the InviT model. In the absence of a directly listed solar InviT PGCIL serves as a suitable proxy within the broader infrastructure category. The company operates capital-Intensive, regulated transmission asset with stable and predictable cashflows—Characteristics that closely align with those of solar generation businesses. Furthermore, the operational stability and low market volatility associated with PGCIL resonate well with the risk profile of the company being valued, justifying its inclusion as a relevant comparable for beta estimation.

3. **NTPC Ltd.**

   NTPC Ltd is mainly enegaged in power generation and has very limited percentage of its portfolio under construction majority of revenue is through selling of electric units to various distribution companies in India through PPAs. NTPC shares several key characteristics with standalone solar companies including capital intensity, Long – term power purchase agreements (PPAs), regulated returns and government linked policy frameworks. Except for the generation risk on account of its Efficacy, the cashflows of NTPC are predictable based on the long-term PPAs and infrastructure setup of the business which makes it comparable to the solar business of the trust.

4. **IndiGrid Infrastructure Trust**

   Indigrid Infrastructure Trust owns and operates a diversified portfolio of infrastructure assets including transmission and Solar assets. It also acquired operational solar power assets, expanding its presence in the renewable energy sector. These assets operate under long-term power purchase agreements (PPAs), offering visibility of cash flows and moderate risk, in line with other utility-scale solar investments. While IndiGrid was previously excluded from the beta analysis due to low trading frequency, its trading activity has improved significantly and remains stable in the current year. Hence the Beta of IndiGrid is also included for determination of Beta.

Battery Energy Storage System Assets

Appendix 2.3 – Calculation of Unlevered and Relevered Beta as on September-25

a. Calculation of Unlevered Beta

Unlevered Beta = Levered Beta / [1 + (Debt / Equity)*(1-T)]

Ticker	Particulars (Comparable companies)	Raw Beta	Debt to Market Capitalisation	Effective Tax Rate (%)	Unlevered Beta
NSEI:POWERGRID	Power Grid Corporation of India Ltd	0.62	88.17%	17.47%	0.36
NSEI:PGINVIT	Powergrid InVIT (PG InvIT)	0.16	1.59%	17.47%	0.16
NSEI:INDIGRID	Indigrid Infrastructure Trust	0.11	152.10%	17.47%	0.05
Average					**0.19**

b. Calculation of Re-levered Beta

Re-levered Beta = Unlevered Beta * [1 + (Debt/Equity) * (1-T)]

Particulars	KBPL
Unlevered Beta	0.19
Debt Equity Ratio	2.33
Effective Tax Rate of SPV	9.64%
Relevered beta	**0.59**

Source: Information provided by S&P Capital IQ, database sources, market research, other published data and internal workings

Justification of Companies used for calculation of Beta for Battery Energy Storage System SPVs:

The following companies are integral players in the Indian infrastructure sector and contributes significantly to the development, operation and maintenance of infrastructure project. Their strong market presence, diversified portfolios and consistent involvement in the key infrastructure projects make them relevant for the computation of beta of BESS SPVs in the context of valuation:

1. **PG InvIT**

   PowerGrid InvIT (PG InvIT) primarily owns and operates high-voltage power transmission lines, which form a critical component of India's electricity infrastructure. The trust earns regulated revenues through long-term, fixed-fee contracts with utilities, offering predictable and stable cash flows over extended periods. Accordingly, PG InviT has been included as a comparable for beta calculation in the valuation of Transmission and Battery Energy Storage System Assets.

2. **PGCIL**

   Power Grid Corporation of India Limited (PGCIL) is mainly engaged in transmitting total electricity generated in the country. PGCIL has been considered as a comparable for beta calculation in the valuation of the Transmission company due to its operational alignment with the transmission business. The company operates capital-Intensive, regulated transmission asset with stable and predictable cashflows—Characteristics that closely align with those of Transmission businesses. Accordingly, PGCIL has been included as a comparable for beta calculation in the valuation of transmission and Battery Energy Storage System SPVs.

3. **IndiGrid Infrastructure Trust**

   Indigrid Infrastructure Trust owns and operates a diversified portfolio of infrastructure assets, with a significant share in power transmission and Battery Energy Storage System assets. The trust earns stable, regulated revenues through long-term availability-based contracts, providing predictable cash flows. While Indigrid was previously excluded from the beta analysis due to low trading frequency, its trading activity has improved significantly and remains stable in the current year. While IndiGrid was previously excluded from the beta analysis due to low trading frequency, its trading activity has improved significantly and remains stable in the current year. Hence the Beta of IndiGrid is also included for determination of Beta.

Transmission Assets

Particulars	Remarks
Note 1	Risk Free Rate has been considered based on zero coupon yield curve as at 30th September 2025 of Government Securities having maturity period of 10 years, as quoted on CCIL's website
Note 2	Based on historical realized returns on equity investments over a risk free rate represented by 10 years government bonds, a 7% equity risk premium is considered appropriate for India
Note 3	Beta has been considered based on the beta of companies operating in the similar kind of business in India

Appendix 11 – Summary of Approvals and Licenses

Transmission Assets:

11.1. BDTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
1	Company Registration	8-Sep-09	Valid	Ministry of Corporate Affairs
2	Transmission License	12-Oct-11	25	Central Electricity Regulatory Commission
3	**Forest Clearance**			
	Dhule-Dhule Transmission Line in Dhule District - Stage I	15-May-14	Valid	Ministry of Environment and Forests
	Dhule-Dhule Transmission Line in Dhule District - Stage II	25-Jan-17	Valid	Ministry of Environment and Forests
	765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line- 09/DND/POW/2012-114	30-May-14	Valid	Ministry of Environment and Forests
	Dhule- Aurangabad Transmission Line in Aurangabad District - Stage II	25-Jan-17	Valid	Ministry of Environment and Forests
	Bhopal- Indore Transmission Line in Bhopal District - Stage I	24-Jun-14	Valid	Ministry of Environment and Forests
	Bhopal- Indore Transmission Line in Bhopal District - Stage II	21-Sep-15	Valid	Ministry of Environment, Forests & Climate Changes
	Bhopal- Bhopal Transmission Line in Bhopal District - Stage I	20-Jun-14	Valid	Ministry of Environment and Forests
	Bhopal- Bhopal Transmission Line in Bhopal District - Stage II	16-Sep-15	Valid	Ministry of Environment, Forests & Climate Changes
	Dhule - Vadodara Transmission Line in Bharuch & Vadodara Districts (General Manager) -Stage I	27-Aug-14	Valid	Ministry of Environment, Forests & Climate Changes
	Dhule - Vadodara Transmission Line in Bharuch & Vadodara Districts (Assistant General Manager) - Stage I	27-Aug-14	Valid	Ministry of Environment, Forests & Climate Changes
	Dhule-Vadodara Transmission Line in Bharuch & Vadodara Districts- Stage II	4-Mar-15	Valid	Ministry of Environment, Forests & Climate Changes
	Dhule - Vadodara Transmission Line in Dhule District - Stage II	19-Nov-15	Valid	Ministry of Environment, Forests & Climate Changes
	Jabalpur-Bhopal Transmission Line in Bhopal & Raisen Districts - Stage I	31-Dec-14	Valid	Ministry of Environment, Forests & Climate Changes
	Jabalpur-Bhopal Transmission Line in Bhopal & Raisen Districts - Stage II	25-Mar-15	Valid	Ministry of Environment, Forests & Climate Changes
4	Approval under section 68 of Electricity Act, 2003	25-Nov-10	Valid	Ministry of Power
5	Approval from GOI under section 164 of Electricity Act, 2003- Under Gazette of India	29-Jan-13	25	Ministry of Power
6	Approval from CERC under section 17(3)	6-Apr-16	Valid	
7	Environmental Clearance	Not Applicable		

11.1. BDTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
8	**Power & Telecommunication Coordination Committee ("PTCC") Clearance**			
	Bhopal- Bhopal Transmission Line	31-Aug-13	Valid	PTCC, Government of India
	Jabalpur-Bhopal Transmission Line	13-Sep-13	Valid	PTCC, Government of India
	Dhule-Dhule Transmission Line	22-Jul-13	Valid	PTCC, Government of India
	Dhule- Vadodara Transmission Line	7-Mar-14	Valid	PTCC, Government of India
9	**Railway Crossing**			
	765 KV at KM 195/7-10 - Ratlam	13-Mar-14	Valid	Western Railway
	765 KV at KM 37/1-4 - Ratlam	9-May-13	Valid	Western Railway
	Between Diwanganj - Salamatpur at KM 865/2-4	18-Jun-13	35	West Central Railway
	KM 953/4-5 ET- JBP Section	18-Oct-13	Valid	West Central Railway
	Near Galan Railway Station at KM 359/27-28 & 360/1-2	25-Apr-14	Valid	Central Railway
	Between Ranala & Dondicha at KM 172/11 & 172/12 and tower LOC No. 22/0 & 23/0	7-Aug-14	Valid	Western Railway
10	**Road Crossing**			
	KM 569/1 & 569/2 on Dewas City Portion on NH-3	11-Sep-13	Valid	National Highway Authority of India
	KM 333+830 on Bhopal-Bloara NH-12	6-Jul-12	Valid	Madhya Pradesh Road Development Corporation Ltd.
	NH - 86	12-Aug-13	Valid	National Highway Authority of India
	NH-26 (Sagar Narsinghpur Section and Milestone 302-303 respectively)	5-Feb-14	Valid	National Highway Authority of India
	Between KM 148-149 NH-12 Deora- Udaipura Section	21-Jan-13	Valid	Madhya Pradesh Road Development Corporation Ltd.
	Dhule- Aurangabad at KM 240-241 of NH-3	8-May-14	Valid	National Highway Authority of India
	Dhule- Aurangabad at KM 500-501 of NH-6	16-May-14	Valid	National Highway Authority of India
	Dhule-Dhule at 241-242 of NH-3	15-May-14	Valid	National Highway Authority of India

11.1. BDTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
11	River Crossing	No River Crossing		
12	**Power Line Crossing**			
	Bhopal - Bhopal	3-Aug-13	Valid	Madhya Pradesh Power Transmission Co. Ltd.
	Indore Bhopal (Jaitura-Ashta Line)	10-Dec-12	Valid	Madhya Pradesh Power Transmission Co. Ltd.
	Bhopal Indore (Bairagarh- Shyampur Line, Sawania- Ashta Line, Sawania- Suajlpur Line, Bairagarh- Kurawar Line, Ashta-Polai Line, Ashta-Amiyakal Line & Ashta-Bercha Line)	15-Jan-13	Valid	Madhya Pradesh Power Transmission Co. Ltd.
	Bhopal Jabalpur line (Shahpura Line & Sukhanarsinghpur line)	5-Apr-13	Valid	Madhya Pradesh Power Transmission Co. Ltd.
	Bhopal Jabalpur line (Barasia-Vidhisha line, Vidhisha-Raisen Line, Berasla-Vishisha Line, Bhopal-Bina Line & Bhopal-Vidhisha Line)	15-Jan-13	Valid	Madhya Pradesh Power Transmission Co. Ltd.
	Bhopal- Dhule Transmission Line	19-Oct-13	Valid	Maharashtra Electricity Transmission Co. Ltd.
	Dhule- Dhule Transmission Line (Provisional Permission)	30-Oct-14	Valid	Public Works Department - Mumbai
	Dhule Vadodara - I	30-May-13	Valid	Gujarat Energy Transmission Corporation Ltd.
	Dhule Vadodara - II	28-Feb-13	Valid	Gujarat Energy Transmission Corporation Ltd.
	Dhule Vadodara - III	25-Jul-13	Valid	Gujarat Energy Transmission Corporation Ltd.
13	**Aviation Clearance**			
	NOC for Height Clearance - Bhopal	12-Feb-13	Valid	Airport Authority of India
	NOC for Height Clearance between Bhopal & Indore	20-Feb-13	Valid	Airport Authority of India
	NOC for Height Clearance between Jabalpur & Bhopal	20-Feb-13	Valid	Airport Authority of India
	NOC for Height Clearance between Dhule to Aurangabad	1-Feb-14	Valid	Airport Authority of India
	NOC for Height Clearance between Dhule to Vadodara	13-Mar-14	Valid	Airport Authority of India
14	**Defence Clearance**			
	NOC for Construction of Dhule Aurangabad Line	19-Sep-13	Valid	Ministry of Defence
	NOC for Construction of Dhule Dhule Line	19-Sep-13	Valid	Ministry of Defence
	NOC for Construction of Dhule Vododara Line	19-Sep-13	Valid	Ministry of Defence
15	Transmission Service Agreement	7-Dec-10	Valid	
16	Approval for adoption of Tariff	28-Oct-11	35	Central Electricity Regulatory Commission
17	Approval for Energisation	13-Aug-14	Valid	Central Electricity Authority, Chief Electrical Inspectorate Division

11.2. JTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
1	Company Registration	8-Sep-09	Valid	Ministry of Corporate Affairs
2	Transmission License	12-Oct-11	25	Central Electricity Regulatory Commission
3	**Forest Clearance**			
	765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line-09/DND/POW/2012-112	17-Aug-12	Valid	Forest Department
	765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line-09/DND/POW/2012-113	17-Aug-12	Valid	Forest Department
	765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line-09/DND/POW/2012-114	17-Aug-12	Valid	Forest Department
	Forest Registration Letter for Dharamjayagarh to Jabalpur Transmission Line	17-Jul-14	Valid	Collector, Jabalpur, Madhya Pradesh
	In Principle approval for the diversion of forest land for construction of 765 KV D/C Jabalpur Transmission Line	23-Dec-14	Valid	Ministry of Environment & Forests
	Approval for construction of 765 KV D/C Jabalpur Transmission Line in Korba District of Chhattisgarh	10-Jun-15	Valid	Ministry of Environment, Forests & Climate Change
	Dharamjayagarh to Jabalpur Transmission Line Stage I Clearance	31-Dec-14	Valid	Ministry of Environment, Forests & Climate Change
	Dharamjayagarh to Jabalpur Transmission Line Stage II Clearance	10-Mar-15	Valid	Ministry of Environment, Forests & Climate Change
	Jabalpur Bina Transmission Line Stage I	15-Jan-15	Valid	Ministry of Environment, Forests & Climate Change
	Jabalpur Bina Transmission Line Stage II	16-Mar-15	Valid	Ministry of Environment, Forests & Climate Change
4	Approval under section 68 of Electricity Act, 2003	25-Nov-10	Valid	Ministry of Power
5	Approval from GOI under section 164 of Electricity Act, 2003	5-Jun-13	Valid	Ministry of Power
6	Approval from CERC under section 17(3)	Not Found		
7	Environmental Clearance	Not Applicable	Valid	
8	**Power & Telecommunication Coordination Committee ("PTCC") Clearance**			
	PTCC - Chhattisgarh Portion	21-May-15	Valid	PTCC, GOI
	PTCC - Madhya Pradesh Portion	13-Apr-15	Valid	PTCC, GOI
9	**Railway Crossing**			
	Provisional Approval for Erection of power line between Urga & Saragbundia Railway Station at KM 688/C 21-23 & KM 688/C22-24	18-Sep-14	Valid	South East Central Railway
	Provisional Approval for Erection of power line between Gevra Road Railway Station & NTPC Sipat at KM Stone 12 & 13	13-Jun-14	Valid	South East Central Railway
	Provisional Approval for Erection of power line between Guthku & Kalmitar Railway Station at KM 740/20-22 & Km 740/21N-23N	13-Jun-14	Valid	South East Central Railway
	Erection of power line between Bargi - Gowarighat Railway Station at KM 1208/4-5	27-Apr-15	Valid	South East Central Railway
10	**Road Crossing**			
	765 KV D/C OH NH crossing Bilaspur- Ratanpur (NH-130)	28-May-15	Valid	Chhattisgarh Road Development Corporation Ltd.
	765KV Double Circuit Dharamjayagarh	9-Dec-13	Valid	Madhya Pradesh Road Development Corporation Ltd.

11.2. JTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
11	River Crossing	No River Crossing		
12	**Power Line Crossing**			
	Approval order for power line crossings of tower no. 7/0 and 8/0.	27-Jun-15	Valid	Chhattisgarh State Power Transmission Company Ltd.
	Approval order for power line crossings of tower no. 11A/0 and 11B/0.	23-Jan-15	Valid	Chhattisgarh State Power Transmission Company Ltd
	Approval for overhead crossing of existing 132 KV DCDS Korba- Champa Line of CSPTCL By 765 KV D/C Dharmjaygarh- Jabalpur Transmission Line	20-Nov-13	Valid	Chhattisgarh State Power Transmission Company Ltd.
	Approval for overhead crossing of 400KV and 200KV and 132KV lines of CSTPL by 765 KV D/C Dharmjaygarh- Jabalpur Transmission Line	3-Jun-13	Valid	Chhattisgarh State Power Transmission Company Ltd.
	Approval for overhead crossing of Chhuri to S/s Mopka of CSTPCL by 765 KV D/C Dharmjaygarh Jabalpur Transmission Line of JTCL	4-Dec-13	Valid	Chhattisgarh State Power Transmission Company Ltd.
	Approval for overhead crossing Korba to Mopka of CSTPCL by 765 KV D/C Dharmjaygarh Jabalpur Transmission Line of JTCL	4-Dec-13	Valid	Chhattisgarh State Power Transmission Company Ltd.
	Approval for overhead crossing of LILO of one circuit of 400KV DCDS Korba Khedmara line to Marwa under construction of CSPTCL by 765 KV D/C Dharamjaygarh- Jabalpur Transmission Line of M/s JTCL.	5-Nov-14	Valid	Chhattisgarh State Power Transmission Company Ltd.
	Approval for overhead crossing of existing 400 KV DCDS Korba (W)- Khedamara line of CSPTCL by 765 KV D/C Dharmajaygarh- Jabalpur Transmission line of M/s JTCL.	29-Apr-14	Valid	Chhattisgarh State Power Transmission Company Ltd.
	Approval for overhead crossing of existing 132 KV DCDS Belgahna Railway Traction line of CSPTCL by 765 KV D/C Dharmjaygarh Jabalpur Transmission Line of M/s JTCL.	21-Nov-13	Valid	Chhattisgarh State Power Transmission Company Ltd.
	Joint Inspection report of Powerline Crossings_ 02-04/TL/JTCL/765KV/01-03/1031	29-Mar-14	Valid	Chhattisgarh State Power Transmission Company Ltd.
	Approval for overhead crossing of existing 220 KV DCDS Korba- Banari-Suhela Line of CSPTCL by 765KV D/C Dharmajaygarh Jabalpur Transmission Line of M/s JTCL	1-Oct-13	Valid	Chhattisgarh State Power Transmission Company Ltd
	Approval for overhead crossing of 400 KV & 765 KV line of Power Grid by 765 KV D/C Dharamjaygarh Jabalpur T/L of M/s JTCL. Tower No. 64/0 and 65/0	10-Aug-13	Valid	Power Grid Corporation Ltd.
	Approval for Overhead Crossing of 400 KV S/C Korba Bhilai II T/L of Power Grid by 765KV D/C Dharamjaygarh Jabalpur T/L of M/s JTCL.	7-Feb-14	Valid	Power Grid Corporation Ltd.
	Approval for overhead crossing of 765KV D/C Dharamjaygarh Jabalpur Transmission Line of JTCL with upcoming 765 KV D/C Champa PS to Korba & Bilaspur- Korba Transmission Line.	2-Jan-14	Valid	Power Grid Corporation Ltd.
13	Aviation Clearance - NOC for Transmission Line	27-Nov-13	Valid	Airport Authority of India
14	Defence Clearance - NOC from Aviation Angle for Construction	27-May-15	Valid	Ministry of Defence
15	Transmission Service Agreement	1-Dec-10	Valid	
16	Approval for adoption of Tariff	28-Oct-11	35	Central Electricity Regulatory Commission
17	**Approvals issued by the CEA, for energisation of:**			
	(i) the 765 kV S/C Jabalpur to Bina transmission line from the 765/400 kV substation at Jabalpur to the 765/400 kV substation at Bina; and	16-Jun-15	Valid	Central Electricity Authority, Electrical Inspectorate Division
	(ii) the 765 kV D/C Dharamjaygarh to Jabalpur transmission line from the 765/400 kV substation at Jabalpur to the 765/400 kV substation at Dharamjaygarh.	4-Sep-15	Valid	Central Electricity Authority, Electrical Inspectorate Division

11.3. MTL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
1	Company Registration	14-Aug-14	Valid	Ministry of Corporate Affairs
2	**Aviation Clearance**			
	NOC for Height Clearance	9-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	9-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	9-Mar-17	Valid	Airport Authority Of India
	765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line- 09/DND/POW/:	9-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	16-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	9-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	21-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	21-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	9-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	9-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	21-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	9-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	21-Mar-17	Valid	Airport Authority Of India
	NOC for Height Clearance	9-Mar-17	Valid	Airport Authority Of India
3	Approval under section 68(1) of Electricity Act, 2003	27-Jul-15	Valid	Ministry of Power
4	Approval from GOI under section 164 of Electricity Act, 2003 - Under Gazette of India	20-Sep-16	25	Ministry of Power
5	Approval from CERC under section 17(3)	4-Jun-16	Valid	Central Electricity Regulatory Commission
6	Transmission licence - Approval under section 14 of Electricity Act, 2003	23-Nov-15	25	Central Electricity Regulatory Commission
7	Approval for Energisation under regulation 43 of CEA	15-May-17	Valid	Central Electricity Authority
8	**Forest Clearance**			
	Nizamabad- Yeddumailaram Transmission Line at Nizamabad - Stage II (in Principal Approval)	12-Jan-18	Valid	Ministry of Environment, Forests & Climate Change
9	**Power & Telecommunication Coordination Committee ("PTCC") Clearance**			
	Nizamabad- Yeddumailaram Transmission Line	11-Apr-17	Valid	PTCC, Government of India
	Maheshwaram-MahabubNagar Transmission Line	14-Jun-17	Valid	PTCC, Government of India
10	**Road Crossing**			
	Nizamabad-Shankarpali over NH 44 between AP 8/0 and AP 9/0	27-Jan-17	Valid	National Highway Authority of India
	Nizamabad-Shankarpali over NH 9 (Hyderabad to Mumbai)	3-Mar-17	Valid	Ministry of Road Transport & Highways
	Maheshwaram-MahabubNagar Transmission Line	10-Mar-17	Valid	National Highway Authority of India

11.3. MTL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
11	**Defence Clearance**			
	NOC from aviation angle for Construction of Maheshwaram Mahabubnagar Line.	26-May-17	Valid	Ministry of Defence
	NOC from aviation angle for Construction of Nizamabad- Shankarpali Line	29-May-17	Valid	Ministry of Defence
12	**Power Line Crossing Approval**			
	Raichur Line Tower (Provisional Permission)	6-Jul-16	Valid	Power Grid Corporation of India Ltd
	Maheshwaram-MahabubNagar 132 KV & 220 KV	12-Sep-16	Valid	Transmission Corporation of Telangana Limited
	Maheshwaram-MahabubNagar (Provisional Permission)	8-Dec-16	Valid	Power Grid Corporation of India Ltd
	Maheshwaram- Veltoor	26-May-17	Valid	Transmission Corporation of Telangana Limited
	Nizamabad-Sharkarpally Transmission Line crossing 132KV Kandi	3-Mar-17	Valid	Transmission Corporation of Telangana Limited
	Nizamabad-Yeddumaillaram Transmission Line crossing 132KV & 220 KV	9-Aug-16	Valid	Transmission Corporation of Telangana Limited
	Nizamabad-Yeddumaillaram Transmission Line crossing 132KV & 220 KV in Medak Circle	10-Oct-16	Valid	Transmission Corporation of Telangana Limited
	Nizamabad-Sharkarpally 400KV Gajwel-Shankaraplly DC line	19-Oct-16	Valid	Transmission Corporation of Telangana Limited
	Nizamabad-Sharkarpally Transmission Line (Provisional Permission)	23-Jan-17	Valid	Power Grid Corporation of India Ltd
	Nizamabad-Sharkarpally 220 KV Sadasivpet- Shankarpally Line	4-Aug-17	Valid	Transmission Corporation of Telangana Limited
13	**Railway Crossing**			
	400kv D/C Nizamabad-Shankarpali	13-Feb-17	Valid	South Central Railway
14	**Transmission Service Agreement**			
	Transmission Service Agreement between MTL & Long Term Transmission Customers	10-Jun-15	35	
	Transmission Service Agreement between MTL & Power Grid Corporation of India Ltd	27-Apr-17	Valid	
15	**Approval for adoption of Tariff**			
	Approval for adoption of Tariff	24-Nov-15	35	
	Revised approval for adoption of Tariff	12-Jun-17	35	
16	**Trial run certificate**			
	Nizamabad - Shankarapally lines I & II.	20-Oct-17	Valid	Power System Operation Corporation Limited
	Maheshwaram - Mahabubnagar lines I & II.	26-Dec-17	Valid	Power System Operation Corporation Limited

11.4. RTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
1	Company Registration	20-Dec-12	Valid	Ministry of Corporate Affairs
2	Transmission License	27-Oct-11	25	Central Electricity Regulatory Commission
3	**Environment (Forest) Clearance**			
	FRA Certificate and District level Committee Meeting	22-Jun-15	Valid	Office of District Collector, Chittorgarh, Government of Rajasthan
	400 KV/ D/C RAPP to Shujalpur	19-Aug-15	Valid	Ministry of Environment, Forests & Climate Change Regional Office (Central Region)
	765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line-09/DND/POW/2012-114	2-Aug-19	Valid	Ministry of Environment, Forests & Climate Change Regional Office (Central Region)
4	Approval under section 68 of Electricity Act, 2003	16-May-13	Valid	Ministry of Power, Government of India
5	Approval from GOI under section 164 of Electricity Act, 2003- under Gazette of India	7-Jan-15	25	Ministry of Power, Government of India
6	Approval under section 14 of Electricity Act, 2003	26-Sep-13	25	Central Electricity Regulatory Commission
7	Approval under section 17 (3) of Electricity Act, 2003	1-Apr-15	Valid	Central Electricity Regulatory Commission
8	**Power Telecommunication Coordination Committee ("PTCC") Clearance**			
	PTCC route approval for 400KV D/C RAPP (Rawatbhata Atomic power plant) - Shujalpur T/L (For Rajasthan Portion)	14-Dec-15	Valid	PTCC, Government of India
	PTCC route approval for 400KV Double Circuit Transmission line from RAPP-Shujalpur (Length 101 km) (For Madhya Pradesh Portion)	19-Dec-15	Valid	PTCC, Government of India
9	**Railway Clearance**			
	Nagda- Kota section railway	21-Apr-15	Valid	West Central Railway
	RTA-MKC section	12-Jun-15	35	West Central Railway

11.4. RTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
10	**Power Line Clearance**			
	RVPN Transmission Lines: =>132 KV D/C Kota to Gandhisagar =>220 KV D/C Kota - Barod =>132 KV S/C Morak to Bhiwanimandi =>132 KV S/C Bhiwanimandi to Kanwari	30-Apr-15	Valid	Office of The Superintending Engineer (TCC V) Kota
	220 KV Shujalpur-Rajgarh and 132KV Sarangpur-Khilchipur Line of MPPTCL	8-May-15	Valid	Office of The Superintending Engineer Eht(Maint.) Circle Mp Power Transmission Co.Ltd
	Powergrid 400KV D/C Shujalpur- Nagda TL to RTCL	29-Jul-15	Valid	Power Grid Corporation of India Limited
11	Application for Civil Aviation	29-Apr-15	Valid	Airport Authority of India Limited
12	Transmission Service Agreement between RAPP and Power Distribution companies(LTTC - Long Term Transmission Companies)	24-Jul-13	35	
13	Transmission Service Agreement between RAPP and Power Grid Corporation India Limited	17-Dec-15		
14	Transmission license order	31-Jul-14	25	Central Electricity Regulatory Commission
15	Approval for adoption of tariff	23-Jul-14	Valid	Central Electricity Regulatory Commission
16	Energisation of 400KV D/C (Twin Moose) RAPP- Shujalpur transmission line*	18-Dec-15	Valid	Central Electricity Authority (Measures relating to safety and electric supply) Regulations, 2010
17	RAPP Rawatbhata to Shujalpur Transmission line	12-May-15	Valid	National Highway Crossing (Ministry of Road Transport and Highway)
18	Trial Operation of Transmission Element (LINE- RPTL bays and line reactor at RAPP-7&8-NPCIL)	28-Dec-16	Valid	Power System Operation Corporation Limited
19	Civil Defence Clearance for installation of 400KV D/C(TWIN) RAAP to Shujalpur	8-Apr-16	Valid	Directorate of Operations, Air Traffic Services

11.5. PKTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
1	**Aviation Clearance**			
	No Objection Certificate for Height Clearance:			
	JAMS/EAST/P/090716/170575	22-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/2	22-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/3	26-Sep-16	Valid	Airports Authority of India
	765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line- 09/DND/POW/:	26-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/5	26-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/6	22-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/7	22-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/8	22-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/9	22-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/10	26-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/11	22-Sep-16	Valid	Airports Authority of India
	JAMS/EAST/P/090716/170575/12	26-Sep-16	Valid	Airports Authority of India
2	**Energisation of Plants**			
	400 Kv Kharagpur - Chaibasa D/C transmission line of PKTCL	13-May-16	Valid	Central Electricity Authority
	400 Kv Purulia - Ranchi D/C transmission line of PKTCL	27-Dec-16	Valid	Central Electricity Authority
3	**Forest Clearance**			
	Jharkhand - Saraikela and East Singhbhum	24-Sep-15	Valid	Ministry of Environment, Forests & Climate Change
	Kharagpur to Chaibasa	17-Jul-15	Valid	Ministry of Environment, Forests & Climate Change
	Rairangpur Forest Division in Mayurbhanj district of Odisha	4-Sep-15	Valid	Ministry of Environment, Forests & Climate Change
	Ranchi & Khunti district of Jharkhand	24-Sep-15	Valid	Ministry of Environment, Forests & Climate Change
	Purulia - Ranchi	22-Sep-16	Valid	Ministry of Environment, Forests & Climate Change
	Diversion of 2.696 ha of forest land under Rairangpur Forest Division for setting up the 400 kV D/C Kharagpur-Chaibasa transmission line.	4-Feb-22	Valid	Ministry of Environment, Forests & Climate Change
	Diversion of 59.501 ha forest land in Ranchi and Khunti district of Jharkhand for setting up the 400 kV D/C Purulia-Ranchi transmission line.	22-Mar-21	Valid	Ministry of Environment, Forests & Climate Change
4	**Road Crossing**			
	NH-6, Kharagpur to Behragora	5-Nov-15	Valid	National Highway Authority of India
	NH-23, Tengriya Village	27-Feb-16	Valid	National Highway Authority of India
	NOC for NH-75, Ranchi - Chaibasa - Jaintgarh	25-May-16	Valid	National Highway Authority of India
	Overhead crossing of 132 Kv D/C Gola Chandil transmission line	29-Jan-16	Valid	Damodar Valley Corporation Electricity Department
	Overhead crossing of 220 Kv D/C BTPS-Jamshedpur transmission line	29-Jan-16	Valid	Damodar Valley Corporation Electricity Department
	NH-33, Ranchi-Tata, near village Darbul.	9-Dec-15	Valid	National Highway Authority of India

11.5. PKTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
5	**Power Line Crossing**			
	Kharagpur-Chaibasa line over KTPP-Kharagpur line	11-May-16	Valid	West Bengal State Electricity Transmission Company
	Kharagpur-Chaibasa line over Jamshedpur-Joda line	30-Dec-15	Valid	Damodar Valley Corporation Electricity Department
	Kharagpur-Chaibasa line over RCP-Joda line	30-Dec-15	Valid	Jharkhand Urja Sancharan Nigam Limited
	Kharagpur-Chaibasa line over Jamshedpur-Baripada line	4-Dec-15	Valid	Power Grid Corporation of India Limited
	Kharagpur-Chaibasa line over Chaibasa Mini Grid Substation to our Chaliyama Steel Plant	29-Jul-15	Valid	Rungta Mines Limited
	Ranchi-Chandwa line near village-Bero	7-Mar-16	Valid	Power Grid Corporation of India Limited
	Bero-Patratu line near village-Bero	17-Mar-16	Valid	Power Grid Corporation of India Limited
	Purulia-Ranchi line over Chandil line of Power Grid Corporation of India Limited	16-Feb-16	Valid	Power Grid Corporation of India Limited
	Purulia-Ranchi line over Gola-Chandil line	29-Jan-16	Valid	Damodar Valley Corporation Electricity Department
	Purulia-Ranchi line over BTPS-Jamshedpur line	29-Jan-16	Valid	Damodar Valley Corporation Electricity Department
	Purulia-Ranchi line over Hatia-Kamdara line	26-Feb-16	Valid	Jharkhand Urja Sancharan Nigam Limited
	Purulia-Ranchi line over Ranchi Bero line of Power Grid	7-Mar-16	Valid	Power Grid Corporation of India Limited
	Purulia-Ranchi line over Ranchi-Rourkela line	31-Dec-15	Valid	Power Grid Corporation of India Limited
6	**Power Telecommunication Co-ordination Committee ("PTCC") Clearance**			
	Kharagpur to Chaibasa line	10-May-16	Valid	Power Telecommunication Co-ordination Committee
	Purulia to Ranchi line	16-Jun-16	Valid	Power Telecommunication Co-ordination Committee
7	**Railway Crossing**			
	Haludpukur - Bahalda Road Railway Station	17-Feb-16	Valid	South Eastern Railway
	Purulia-Ranchi line over Suisa-Torang stations	8-Jul-16	Valid	South Eastern Railway
	Purulia-Ranchi line over Lodhma-Baisiring stations	8-Jul-16	Valid	South Eastern Railway
8	Transmission License	16-Jun-14	25	Central Electricity Regulatory Commission
9	**Diversion of Forest Land/ Permission for felling of trees**			
	Kharagpur Division	24-Sep-15	Valid	Government of West Bengal - Directorate of Forest
	Rairangpur Division	8-Oct-15	Valid	Office of the Divisional Forest Officer - Rairangpur Di
	Saraikela and Jamshedpur Division	21-Dec-15	Valid	Government of Jharkhand - Directorate of Forest
	Baghmundi Range	28-Oct-16	Valid	Government of West Bengal - Directorate of Forest
	Ranchi and Khunti Division	6-Jan-16	Valid	Government of Jharkhand - Directorate of Forest
10	**Transmission Service Agreement**			
	Power Grid Corporation of India Ltd - Kharagpur-Chaibasa Line	22-Dec-15	Valid	
	Long Term Transmission Customers (Various Parties)	6-Aug-13	35	
11	Approval for Adoption of Tariff	20-Aug-14		Central Electricity Regulatory Commission, New Delh
12	Company Registration	15-Dec-12	Valid	Ministry of Corporate Affairs
13	Approval from GOI under section 164 of Electricity Act, 2003- under Gazette of India	7-May-15	25	Ministry of Power
14	Approval under section 68 of Electricity Act, 2003	29-May-13	Valid	Ministry of Power
15	Approval from CERC under section 17(3)	1-Apr-15	Valid	Central Electricity Regulatory Commission
16	Defence Clearance	Application Made		
17	Trial Operation of Transmission Element (Tower 223 & 224 Chaibasa-Kharagpur)	1-Aug-16	Valid	Power System Operation Corporation Limited
18	Trial Operation of Transmission Element (New Ranchi- New Purulia CKT-I & CKT-II)	10-Feb-17	Valid	Power System Operation Corporation Limited

11.6. PTCL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
1	Company Registration	19-Dec-12	Valid	Ministry of Corporate Affairs
2	Transmission License	14-Jul-14	25	Central Electricity Regulatory Commission
3	**Transmission Service Agreement**			
	Transmission Service Agreement between PTCL & Long Term Transmission Customers	12-May-14	35	
	Transmission Service Agreement between PTCL & Power Grid Corporation of India Ltd	23-May-16	Valid	Central Electricity Regulatory Commission
4	**765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line- 09/DND/POW/2012-114**			
	Approval for Adoption of Tariff	5-Aug-14	Valid	Central Electricity Regulatory Commission
	Corrigendum to the tariff order issued by CERC u/s 63 of the Electricity Act for adoption of transmission charges	19-May-17	Valid	Central Electricity Regulatory Commission
5	Approval under section 68(1) of Electricity Act, 2003	16-May-13	Valid	Ministry of Power
	Approval from GOI under section 164 of Electricity Act, 2003 - under Gazette of India	21-Mar-16	25	Ministry of Power
6	Approval for Energisation under regulation 43 of CEA	27-May-16	Valid	Ministry of Power
7	Permission for change of land use	31-Dec-15	Valid	
8	**Aviation Clearance**			
	NOC for Height Clearance	9-Mar-17	Valid	Airport Authority of India
9	**Power & Telecommunication Coordination Committee ("PTCC") Clearance**			
	Patiala - Kaithlal Transmission Line at Patran	28-Apr-15	Valid	PTCC, Government of India
10	**Trial Run Certificate**			
	Patran-Kakrala, Patran-Patran I & II and Patran-Rajla	20-Oct-17	Valid	Power System Operation Corporation Limited
11	Approvals for the building plans of PTCL from competent authorities in relation to the construction of an electric sub-station in an area measuring 16.1435 acres at village Banwala and Darauli, District Patiala.			

11.7. NRSS: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
1	**Company Related Registrations**			
	Certificate of Incorporation	7/29/2013	Valid	Registrar of Companies
	Certificate for Commencement of Business	10/18/2013	Valid	Registrar of Companies
	Transmission License	11/14/2014	25	Central Electricity Regulatory Commission
	Renewed registration of office of NRSS under the Shops and Establishments Act, 1954.	7/23/2021	31/3/2024	Government of Jammu & Kashmir, Shops & Establishment Act 1966
2	**765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line-09/DND/POW/2012-114**			
	400 KV S/C Jalandhar-Amritsar, 400 KV D/C Jalandhar - Moga LILO, 400 KV D/C Chamera - Jalandhar LILO, 400 KV D/C Chamera - Jalandhar, 800 KV S/C Krishnapur - Moga ckt-11, 400 KV D/C banala - Amritsar Transmission Lines by proposed 400 KV D/C jalandhar - Samba Line.	6/4/2015	Valid	Power Grid Corporation of India Ltd
	Overhead crossing of 800 KV KMTL-I by 400 KV Jalandhar-Samba TL.	7/6/2015	Valid	Power Grid Corporation of India Ltd
	Underneath crossing of 400 KV D/C Jalandhar - Samba Line with existing 400 KV D/C Kurushetra - Jalandhar	7/29/2015	Valid	Power Grid Corporation of India Ltd
	400 KV power line over 132 KV D/C Pattan Magam & 220 KV Zainakote - Amargrah Transmission Line	5/8/2017	Valid	J&K Power Development Department
	400 KV, D/C Transmission Line between location No. 39 & 40 of 132 KV - Barn Jourian Transmission Line	2/17/2016	Valid	Power Development Department (Jammu & Kashmir)
	Electrical clearance between span 179-180 existing line of 220KV D/C Bishnah - Hiranagar Transmission Line	11/3/2016	Valid	Power Development Department (Jammu & Kashmir)
	Kindly confirm whether licenses/ approvals mentioned in Annexure 3 are renewed or not. If not renewed, kindly provide reason for the same.	1/15/2016	Valid	Power Development Department (Jammu & Kashmir)
	400 KV D/C Samba-Amargrah Transmission Line	10/2/2016	Valid	Power Development Department (Jammu & Kashmir)
	Overhead power line crossing of 400 KV S/C Uri-11-Waqoora T/L by 400 KV Samba - Amargarh T/L	4/4/2017	Valid	Power Grid Corporation of India Ltd
3	**Transmission Service Agreement**			
	Transmission Service Agreement between NRSS & Long Term Transmission Customers	1/2/2014	35	Central Electricity Regulatory Commission
	Transmission Service Agreement between NRSS & Power Grid Corporation of India Ltd	12/22/2015	Valid	Central Electricity Regulatory Commission

11.7. NRSS: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
4	**River Crossing**			
	400 KV Double circuit Jalandhar-Samba Transmission Line	11/5/2015	Valid	Executive Engineer, Gurdaspur Division A.B.D.N
5	**Forest Clearance**			
	400 KV D/C Samba-Amargrah Transmission Line passing through Kathau, Jammu, Resai, Nowshera, Rajouri, Poonch, shopian & Pir-panjal Forect Divisions	9/16/2015	Valid	Department of Forest, Environment & Ecology
	400 KV substation Jalandhar to Sambha under Forest division and Districts Gurdaspur, Jalandhar and Pathankot, Punjab.	9/28/2015	Valid	Department of Forest, Environment & Ecology
6	**Railway Clearance**			
	400 KV electric overhead transmission crossing line between Telegraph post No. 58/9 and telegraph post No. 59/0 and between Ghagwal and Sambha Railway station on PKT-JAT section.	2/25/2016	Valid	Northern Railways
	400 KV electric overhead transmission crossing line between Telegraph post No. 76/8-9 and telegraph post No. 76/9 and between Gurdaspur and Dinanagar Railway station on AST-PKT section.	2/25/2016	Valid	Northern Railways
	400 KV electric overhead transmission crossing line between KM No. 60/0 and KM No. 60/1 and between Ghagwal and Sambha Railway station on PKT-JAT section.	6/9/2016	Valid	Northern Railways
7	**Aviation/Defence Clearance**			
	LOC for 400 KV D/C Jalandhar - Samba Transmission Line	2/22/2016	Valid	Airport Authority of India
	400 KV D/C LILO of Uri-Wagoora Transmission Line	8/1/2018	Valid	Airport Authority of India
	NOC for construction of 400KV D/C Jalandhar to Samba and Samba to AmargrahTransmission line	9/28/2017	Valid	Group Captain, Defence
	NOC of height clearance for construction of 400KV D/C Jalandhar to Samba	2/15/2016	Valid	Airport Authority of India

11.7. NRSS: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
8	**Road Crossing**			
	NOC for crossing proposal of NH-15 at Km. 26.108 for laying of 400KV D/C Jalandhar-Samba Transmission Line	2/20/2016	Valid	Ministry of Road Transport and Highways
	NOC for crossing proposal of NH-01 at Km. 394+440 for laying of 400KV D/C Jalandhar-Samba Transmission Line	2/20/2016	Valid	Ministry of Road Transport and Highways
	NOC for crossing proposal of NH-01 at Km. 395+204 for laying of 400KV D/C Jalandhar-Samba Transmission Line	2/20/2016	Valid	Ministry of Road Transport and Highways
	Road crossing proposal 400KV D/C Line near Karhama	11/6/2016	Valid	Office of the Supreintending Engineer, PWD (R&B) Circle Baramulla/ Kupwara.
	NOC for road crossing proposal 400KV D/C line near Karhama.	2/14/2017	Valid	Office of Chief Engineer PW (R&B) Department, KMR
	Crossing of Transmission Line over Jammu - RS Pura Road	5/27/2017	Valid	Office of Chief Engineer PW (R&B) Department, Jammu
9	**Power Telecommunication Coordination Committee ("PTCC") Clearance**			
	400 KV D/C Jallandhar-Sambha Transmission Line	12/2/2016	Valid	PTCC, Government of India
	400 KV D/C LILO- URI-wagoora Line	3/23/2018	Valid	PTCC, Government of India
	400 KV D/C Samba Amargrah Transmission Line	11/3/2016	Valid	PTCC, Government of India
	400 KV D/C Jallandhar-Sambha Transmission Line	2/14/2017	Valid	PTCC, Government of India
	LILO of both circuit of Uri-Wagoora 400 KV D/C Line at Amargarh Substation.	10/4/2018	Valid	PTCC, Government of India
10	**Energisation Clearances**			
	Approval under regulation 43 of CEA Regulations 2010 for energisation 400/220 kv GIS Sub Station.	11/26/2023	2	Central Electricity Authority
	Approval under regulation 43 of CEA Regulations 2010 for energisation 400KV D/C Jalandhar-Samba Line.	11/27/2022	2	Central Electricity Authority
	Approval under regulation 43 of CEA Regulations 2010 for energisation LILO of both circuits of Uri-Wagoora 400 kv D/C line at 400/220 kv GIS at Amargrah, Srinagar.	11/26/2023	2	Central Electricity Authority
	Approval under regulation 43 of CEA Regulations 2010 for energisation 400KV D/C Samba-Amargarh Line.	11/27/2022	2	Central Electricity Authority

11.7. NRSS: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
11	**Approval under Electricity Act, 2003**			
	Approval from GOI under section 164 of Electricity Act, 2003	9/17/2015	25	Central Electricity Authority
	Approval u/s 68 of the Electricity Act, 2003 for laying overhead transmission line.	9/19/2013	Valid	Ministry of Power
	Approval from CERC under section 17(3)	8/1/2018	Valid	Central Electricity Regulatory Commission
12	**Approval for adoption of Tariff**			
	Approval for adoption of Tariff	12/10/2014	Valid	Central Electricity Regulatory Commission
	Revised approval for adoption of Tariff	6/12/2017	Valid	Central Electricity Regulatory Commission
13	**Trial Run Certificate**			
	400 KV Jalandhar-Samba lines I & II	12/28/2016	Valid	Power System Operation Corporation Limited
	400/220 KV, 315 MVA-1 (3X105 MVA) along with associated 400 KV bay 403(main) & 220 KV bay 203 at amargarh, 400/220 KV, 315 MVA-2 (3X105 MVA) along with associated 400 KV bay 406(main) & 220 KV bay 209 at amargarh, 220 KV bay no 202 at Zainkote-Amargarh at Amargarh, 220 KV bay no 206 at Delina-Amargarh at Amargarh.	7/3/2018	Valid	Power System Operation Corporation Limited
	400 KV, 3-Ph MVAR Bus Reactor-1 along with associated 400 KV bay 415(main)& 414(tie) at Amargarh, 400 KV, 3-Ph 63 MVAR Bus Reactor-2 at Amargarh.	7/4/2018	Valid	Power System Operation Corporation Limited
	400 KV Uri1(NHPC)-Amargarh-1 and associated bays 410(main) & 411(tie) at Amargarh,	5/22/2018	Valid	Power System Operation Corporation Limited
	400 KV Amargarh-Samba (PG)-1 along with 50 MVAR Non-switchable line reactors at Amargarh end and associated bays 401(main) & 402(tie) at Amargarh end.	9/20/2018	Valid	Power System Operation Corporation Limited

11.8. OGPTL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
1	**Transmission License**			
	Transmission License	30-Jun-16	25	Central Electricity Regulatory Commission
2	**Forest Clearance**			
	FRA- Jharsuguda: OGPTL Transmission Line in Lakhanpur Tehsil and Jharsuguda Tehsil	13-Oct-16	Valid	District Collector, Jharsuguda (Govt. of Odisha)
	FRA- Sundargarh: NOC against forest diversion proposal	24-Oct-16	Valid	Ministry of Environment and Forests
	765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line- 09/DND/POW/2012-114	21-Dec-21	Valid	Ministry of Environment and Forests
	Diversion of 30.134 hectares of forest land for setting up of the OPGC-Jharsuguda 400 kV D/C transmission line.	19-Sep-22	Valid	Ministry of Environment and Forests
	Diversion of 94.656 hectares of forest land for setting Jharsuguda (Sundargarh) Rajpur 765 kV D/C transmission line.	22-Jun-22	Valid	Ministry of Environment and Forests
	FRA Revised- Jharsuguda: OGPTL Transmission Line in Lakhanpur Tehsil and Jharsuguda Tehsil	2-May-17	Valid	District Collector, Jharsuguda (Govt. of Odisha)
	OGPTL Raipur Transmission Line in Bematra	20-Jan-17	Valid	Ministry of Environment and Forests
	OGPTL Raipur Transmission Line in Bilaspur	4-Feb-17	Valid	Ministry of Environment and Forests
	OGPTL Raipur Transmission Line in Janjgir District	10-Feb-17	Valid	Ministry of Environment, Forests & Climate Changes
	OGPTL Raipur Transmission Line in Kharsia tehsil	27-Apr-17	Valid	Ministry of Environment, Forests & Climate Changes
	NOC against forest diversion proposal, Tangarpali	-	Valid	Tehsildar, Tangarpali
	NOC against forest diversion proposal, Lehripara	20-Mar-17	Valid	Tehsildar, Lehripara
	NOC against forest diversion proposal, Hemgir	3-Mar-17	Valid	Tehsildar, Hemgir
3	**Power & Telecommunication Coordination Committee ("PTCC") Clearance**			
	Approval to the route of Power transmission line of 400 KV D/C Sundargarh - Jharsuguda (OPGC)	16-Jun-17	Valid	Power Telecommunication Co-ordination Committee
	Approval to the route of Power Transmission Line of 765 KV D/C Raipur - Jharsuguda (For Chattisgarh Portion)	18-Apr-18	Valid	Power Telecommunication Co-ordination Committee
	Approval to the route of Power Transmission Line of 765 KV D/C Raipur - Jharsuguda (For Odisha Portion)	5-Sep-17	Valid	Power Telecommunication Co-ordination Committee
4	**Railway Crossing**			
	400 KV Double Circuit over head transmission line of M/s OGPTL/ Jharsuguda crossing over the railway track in between Malidh - Kechobahal Station in Chakradharpur Division (Drg No. OGPTL/400/RLY/28-29-REV-01)	10-Aug-17	Valid	Senior Divisional Electrical Engineer (S.E. Railway)
	400 KV Electrical track crossing at KM 522/7-522/10 in between Jharsuguda & IB Railway Stations (Drg No. OGPTL/400/RLY/38-39).	22-Jun-17	Valid	Senior Divisional Electrical Engineer, SEC Railway

11.8. OGPTL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
	400 KV D/C IBTPS - OPGC Jharsuguda (Sundergarh) Transmission Line - Spotting of dead end tower & railway crossing approval in line of the tower between 59/0 & 60/0	6-Dec-16	Valid	Odisha Power Generation Corporation Limited
	765 KV Cover Over head power line crossing in between Hathbandh and Bhatapara stations (Drg No. OGPTL/RLY/38-39 REV-2)	11-Dec-17	Valid	South East Central Railway
	765 KV Cover Over head power line crossing in between Nipaniya Railway and Lafarge Cement plant (DRG no- OGPTL/RLY/58-59).	11-Dec-17	Valid	South East Central Railway
	765 KV Sundargarh - Raipur D/C transmission line of OGPTL over SEC Railway line crossing in between station Kharsia and Jharidhi at AP 96-97	1-May-17	Valid	South East Central Railway
	765 KV Electrical track at AP 102 & AP103 in between Dharamjaygarh & Kharsia railway stations.	24-Mar-17	Valid	South East Central Railway
	Approval for Erection of the OPGC-Jharsuguda transmission line over the railway line crossing in between Jharsuguda & IB at KM 522/7-522/10	15/01/2024	NA	Railway
	Approval for Erection of Jharsuguda (Sundargarh) – Raipur transmission line at Pole No. 622/17-622/19 & in between Kharsia & Jharidhi at AP 96 – AP 97	13/02/2023	NA	Railway
	Approval for Erection of the Jharsuguda (Sundargarh) – Raipur transmission line electrical track crossing at chainage 24/200 & 24/250 in between Lara & Talaipalli coal mine at AP-118 – AP 119.	17/01/2024	NA	Railway
5	**Road Crossing**			
	Permission of Overhead crossing over NH-49 near village Budipur	20-Jan-17	Valid	Office of Chief Engineer, National Highways
	Permission of Overhead crossing over NH-49 AP-99 AP-99A reg	5-Aug-16	Valid	Public Works Department
	Permission of Overhead crossing over NH-200 AP-100 AP-101 reg	5-Aug-16	Valid	Public Works Department
	Permission of Overhead crossing over NH-200 AP-105 AP-106 reg	5-Aug-16	Valid	Public Works Department
	OGPTL Highway crossing at AP72-AP73	13-Jul-16	Valid	Public Works Department
	Power Line crossing with highway at AP80-AP81	20-Jul-16	Valid	Chattisgarh Road Development Authority
6	**Power Line Crossing**			
	Approval for Power line Crossing of 400 KV - Jharsuguda line of OGPTL over IBEUL 400 KV line between tower Loc no:41 and 42 and between Loc no.4&5 at Sundargarh.	2-Feb-17	Valid	Ind-Barath Energy (Utkal) Limited
	Approval of proposal for underneath crossing of your 400 KV D/C OPGC-Sundargarh transmission line between Loc no.12/2 and 13/0 under 765KV D/C Jharsuguda(Sundergarh)-Darlipalli of PGCIL at Kenapalli village,Thasil-Tangarpalli,Dist-Sundargarh.	25-Jun-17	Valid	Power Grid Corporation of India Limited

11.8. OGPTL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
	Power line crossing proposal - Over crossing by 400 KV D/C OPGC - Sundargarh T/L of 400 KV D/C Rourkela-Raigarh D/C TL -1 and 2.	20-Oct-16	Valid	Power Grid Corporation of India Limited
	Approved profile and detailed survey report of power line crossing over 400 KV OPGC-Jharsuguda D/C of Odisha Generation Phase-II.	24-Oct-16	Valid	Odisha Power Transmission Corporation Litd.
	Approval of Overhead crossing of 400 KV D/C OPGC Jharsuguda line in between loc no. 6 and 7 with existing 220 KV s/c Budhipadar-Korba 3 line.	22-Nov-16	Valid	Power Grid Corporation of India Limited
	EHV Power Line overhead crossing of existing (i) 400 KV DCDS Khedamara -Korba West and Khedamara Marwa PH Circuit (ii) 220 KV DCSS Khedamara - Bemetara line of CSPTCL by under construction 765 KV D/C Sundargarh (Jharsuguda)-Raipur Transmission Line of M/s Odisa Generation Phase II Transmission Ltd.	16-Dec-16	Valid	Chhattisgarh Power Transmission Company Limited
	Overhead Crossing of the following Powergrid's Transmission Lines: 765 KV D/C Durg-Kotra 1&2 765 KV D/C Durg-Champa 1&2 400KV S/c Korba -Bhilai 1 400KV S/c Korba -Bhilai 1 400KV d/c Sipat -Raipur 3	7-Sep-16	Valid	Power Grid Corporation of India Limited
	EHV Power Line overhead crossing of existing (i) 400 KV DCDS Khedamara - Korba West and Khedamara Marwa PH Circuit (ii) 220 KV DCSS Khedamara - Bemetara line of CSPTCL by under construction 765 KV D/C Sundargarh (Jharsuguda)-Raipur Transmission line of M/s	5-Oct-16	Valid	Chhattisgarh State Power Transmission Company Lim
	EHV Power Line overhead crossing of existing (i) 400 KV Korba-Raita and Raita-Khedamara DCDS line of CSPTCL by under construction 765 KV D/C Sundargarh (Jharsuguda)-Raipur Transmission line of M/s Odisa Generation Phase II Transmission Ltd.	6-Jan-17	Valid	Chhattisgarh State Power Transmission Company Lim
	Provisional Approval of overhead crossing of 765 KV TL line of PGCIL by under construction 765 KV D/C Sundergarh-Raipur line of M/s OGPTL	29-Oct-16	Valid	Power Grid Corporation of India Limited
	Approval of overhead crossing of existing 132 KV DCDS Simga-Bhilai line of CSPTCL by under construction 765 KV Raipur-Sundergarh (Jharsuguda) D/C Transmission line of OGPTL	2-Aug-17	Valid	Chhattisgarh State Power Transmission Company Lim
	Approval for overhead crossing of existing 132 KV Simga Century Cement line of CSPTL by under construction 765 KV D/C Sundargarh - Raipur Transmission line of OGPTL.	23-Dec-16	Valid	Chhattisgarh State Power Transmission Company Lim

11.8. OGPTL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
	Approval for overhead crossing of existing 132 KV DCDS Simga-Tulsi line of CSPTL by under construction 765 KV D/C Sundargarh - Raipur Transmission line of OGPTL.	28-Mar-17	Valid	Chhattisgarh State Power Transmission Company Lim
	EHV Power line overhead crossing of existing 400 KV DCDS Marwa-Raita line of CSPTCL by under construction 765 KC D/C Sundargarh - Raipur Transmission line of OGPTL.	5-Jun-17	Valid	Chhattisgarh State Power Transmission Company Lim
	EHV Power Line overhead crossing of existing 220 KV DCDS Suhela-Bemetara line of CSPTCL by under construction 765 KV D/C Sundargarh(Jharsuguda) - Raipur Transmission line.	13-Feb-17	Valid	Chhattisgarh State Power Transmission Company Lim
	EHV Power Line overhead crossing of existing 220 KV DCDS Suhela-Bemetara line of CSPTCL by under construction 765 KV D/C Sundargarh(Jharsuguda) - Raipur Transmission line.	16-Dec-17	Valid	Chhattisgarh State Power Transmission Company Lim
	EHV Power Line overhead crossing of existing 220 KV DCDS Korba-Banari-Suhela line of CSPTCL by under construction 765 KV D/C Sundargarh(Jharsuguda) - Raipur Transmission line.	28-Mar-17	Valid	Chhattisgarh State Power Transmission Company Lim
	Approval of 765KV Over Head Power line crossing at Km AC 9/10 and AC 9/11 in between Bhatapara Railway station and Ambuja cement plant.	11-Dec-17	Valid	South East Central Railway
	Approval of overhead crossing of existing 132 KV DCDS Bhatapara-Balodabazar line and 132 KV S/C Chilhati-Bhatapara line of CSPTCL by under construction 765 KV Raipur -Sundargarh of OGPTL.	28-Mar-17	Valid	Chhattisgarh State Power Transmission Company Lim
	Construction of 765KV D/C Sundargarh-Raipur Transmission Line-Power Line of OGPTL crossing approval reg.	21-Jul-16	Valid	Sai Lilagar Power Limited
	Approval for overhead crossing of existing 132 KV S/C Aresmeta-Bharatpura line of CSPTCL by under construction of 765 KVD/C Sundargarh-Raipur Transmission line of OGPTL.	21-Oct-16	Valid	Chhattisgarh State Power Transmission Company Lim
	Approval for overhead crossing by 765 HV D/C Sundargarh-Raipur Transmission Line of 400 KV KSK LILO Line 1 and 2 Transmission Line .	2-Jul-16	Valid	KSK Mahanadi Power Company Limited
	Approval for overhead crossing of existing 132 KV DCDS Jaijaipur LILO line of CSPTCL by under construction 765 KV D/C Sundargarh-Raipur Transmission line.	5-Oct-16	Valid	Chhattisgarh State Power Transmission Company Lim
	Conditional approval of crossing proposal for CWRTL's KV S/C Raigarh to Champa Transmission Line by OGTPL's 765 KV D/C Sundargarh to Raipur Transmission Line.	4-Nov-16	Valid	Chhattisgarh-WR Transmission Limited
	Approval towards overhead crossing of 765 KV D/C Sundargarh - Raipur TL of M/s OGPTL with 400 KV D/C Lara-Champa TL	11-Jul-17	Valid	Power Grid Corporation of India Limited
	Approval of overhead crossing of 765 Kv D/C Jharsuguda - Raipur Transmission Line in between loc no 141 and 42 with existing 765 Kv Kotra-Champa Line.	5-Jan-17	Valid	Power Grid Corporation of India Limited

11.8. OGPTL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
	Approval of overhead crossing of existing 132 KV DCDS Champa-Chapley line of CSPTL by under construction 765 KV Raipur-Sundargarh D/C Transmission line of OGPTL	10-Jul-17	Valid	Chhattisgarh State Power Transmission Company Lim
	Approval of overhead crossing of 765 KV D/C Jharsuguda - Raipur Transmission Line in between loc no 345 and 346 with 220 KV Korba-Budhipadar Line.	29-Apr-17	Valid	Power Grid Corporation of India Limited
	Approval of overhead crossing of 765 KV D/C Jharsuguda - Raipur Transmission Line in between loc no AP110 and AP111.	12-Jan-17	Valid	Power Grid Corporation of India Limited
	Approval for crossing of proposed 765 KV line over 400 KV DCDS Tamnar-Raipur line of M/s Jindal Power Ltd. Between Loc No. 63 and 64.	6-Oct-16	Valid	Jindal Power
	EHV Power Line overhead crossing of existing 132 KV S/C Gerwani - Gharghoda line of CSPTCL by under construction 765 KV D/C Sundargarh-Raipur Transmission Line.	24-Nov-16	Valid	Chhattisgarh State Power Transmission Company Lim
	Approval of overhead crossing of existing 220 KV DCDS Tamnar-Raigarh line of CSPTCL by under construction 765 KV Raipur-Sundargarh D/C Transmission line	24-Apr-17	Valid	Chhattisgarh State Power Transmission Company Lim
	Approval for crossing of proposed 765 KV line over 220 KV U/C line of M/S JSPL DCPP to Punjipatra line Loc-AP-55 and 55/1 village Parkiphari,Tamnar.	19-Jan-17	Valid	Jindal Power
	Approval of Overhead Line Crossing of JSPL 220 KV d/c DCPP to Punjipatra JSPL Transmission bu OGPTL 765 KV D/C U/C Transmission Line Sundargarh.	12-Jan-17	Valid	Jindal Power
	Provisional Approval of 765 KV Sundargarh - Raipur D/C transmission Line of OGTPL OVER s.e.c Railway line crossing at chainage 24/200 and 24/250 and in between Lara and Talaipalli coal mine at AP 118-AP 119 of OGTPL.	24-Mar-17	Valid	S.E.C. Railway
	Proposal for Power Line under crossing of 765 KV D/C Jharsuguda-Dharamjaygarh Transmission line of POWERGRID BY 765 KV D/C Raipur-Jharsuguda Transmission line of M/s OGPTL.	4-Oct-17	Valid	Power Grid Corporation of India Limited
	Approval for the proposal for crossing of 765KV D/C Sundargarh-Raipur Transmission line of OGPTL over the 400KV D/C Sundargarh-Ind-Barath,Sahajbahal TPS Tr.lines between Loc 3 and Loc 4 at Mahulpali Village,Tahasil-Tangarpali in Dist-Sundargarh at AP-141 and 142 of OGTPL.	25-Aug-16	Valid	Ind-Barath Energy (Utkal) Limited
	Approval for power line crossing of 765 KV Sundargarh-Raipur D/C Transmission Line of Vedanta Ltd.crossing between tower no 1 and 2 in village Mahulpalli of Tehasil:Tangarpalli in District: Sundargarh at AP 141 to AP 142 of OGTPL.	22-Aug-16	Valid	Vedanta

11.8. OGPTL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
7	**Aviation Clearance**

8	**Defence Clearance**			
	NOC from aviation angle for construction of Transmission line from Raipur to Sundergarh	10-Mar-17	Valid	Ministry of Defence
9	**Transmission Licence Order**			
	Transmission Licence Order	30-Jun-16	Valid	Central Electricity Regulatory Commission
10	**Approval for adoption of Tariff**			
	Approval for adoption of Tariff (Approval u/s 63 of Electricity Act, 2003)	31-May-16	Valid	Central Electricity Regulatory Commission
11	**Trial Operation Approval**			
	Trial Operation Approval - 400 KV OPGC - Jharsuguda Line	4-Jan-18	Valid	Power System Operation Corporation Limited
	Trial Operation Approval - 765 KV Raipur - Jharsuguda Line	6-Apr-19	Valid	Power System Operation Corporation Limited

11.8. OGPTL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
12	**Tree Cutting Permission**			
	Diversion of 30.134 ha of forest land for construction of 400 KV D/C OPGC Ltd, Jharsuguda - Sundargarh transmission line in Jharsuguda and Sundargarh district in Odisha.	27-Jun-17	Valid	Office of the Divisional Forest Officer, Jharsuguda Forest Division
	Diversion of 30.134 ha of forest land for construction of 400 KV D/C transmission line from OPGC Banharpali IB Thermal Power plant in Jharsuguda District to 765 KV/400 KV PGCIL switchyard at Kenapali in Sundargarh District	6-Jul-17	Valid	Office of the Divisional Forest Officer, Jharsuguda Forest Division
	Diversion of 71.761 ha of forest land for construction of 765 KV double circuit transmission line from Jharsuguda (Sundargarh) - Raipur Pooling station in Raigarh, Durg, Bilaspur Jangir Champa and Bemetara districts in the State of Chattisgarh.	30-Jan-18	Valid	Office of the Divisional Forest Officer, Chattisgarh
	Diversion of 95.656 ha of forest land Sundargarh forest division for construction of 765 KV D/C Transmission line from 765 KV/400 KV PGCIL switchyard at Kenapali in Sundargarh District, Odisha.	20-Apr-18	Valid	Office of the Divisional Forest Officer, Chattisgarh
13	**Transmission Service Agreement**			
	Transmission service agreement with Power Grid Corporation of India Limited	27-Apr-18	Valid	Central Electricity Regulatory Commision (CERC)
	Transmission Service Agreement with Customers	20-Nov-15	35	Central Electricity Regulatory Commision (CERC)
14	**Energisation Clearance**			
	400 kV D/C OPGC - Jharsuguda Transmission Line (length = 51.35 Km)	23-Aug-17		Central Electricity Authority, Ministry of Power
15	**Approval under Electricity Act, 2003**			
	Approval from GOI under section 164 of Electricity Act, 2003	6-Mar-17	25	Central Electricity Authority
	Approval u/s 68 of the Electricity Act, 2003 for laying overhead transmission line.	3-Jun-15	Valid	Ministry of Power
	Approval u/s 61 of Electricity Act, 2003	NA	NA	Central Electricity Regulatory Commission
16	**Approval for registration of office**			
	Registration of office of OGPTL under the Shops and Establishments Act, 1954	28/03/2023	NA	Municipality Bilaspur

11.9. ENICL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
1	**Company Related Registrations**			
	Transmission License	20/10/2010	25	Central Electricity Regulatory Commission
	Certificate for Commencement of Business	23/05/2007	Valid	Registrar of Companies
2	**Power Line Clearance (Crossing Proposal)**			
	NOC for 400 kV D/C (Quad) Bongaigaon - Siliguri Transmission Line crossing over 132 KV S/C Birpara - Pundibara & Alipurduar - Coochbehar Tr. Lines of WBSETCL.	5/14/2012	Valid	West Bengal State Electricity Transmission Company Limited
	765KV Double Circuit Dharamjayagarh to Jabalpur Transmission Line-09/DND/POW/2012-114	16/08/2012	Valid	Power Grid Corporation of India Limited
	NOC by BSEB on Overhead crossing of BSEB lines by 400 KV D/C Biharshariff - Purnea Transmission Line	21/08/2012	Valid	Bihar State Electricity Board - Patna
	Approval for Power Line Crossing of 400 KV D/C (Quad) Purnea - Biharshariff transmission line over 400 KV D/C (Quad) Purnea - Muzaffarpur Transmission Line of Powerlinks	29/05/2012	Valid	Powerlinks Transmission Limited
	Approval of overhead crossing of Powergrid lines by under construction 400 KV D/C Biharsharif - Purnea Line (Revised)	24/05/2012	Valid	Power Grid Corporation of India Limited
	Power Line Crossings of 400 KV Quad Bongaigaon - Binaguri Transmission Line	25/11/2012	Valid	Power Grid Corporation of India Limited
	Power Line Crossings of 400 KV Quad purnea - Biharsharif transmission line with 400 KV -Kahalgaon-Patna.	8/16/2012	Valid	Power Grid Corporation of India Limited
	Crossing of Powergrid lines by under construction 400kv D/C Biharsharif - Purnea Line.	10/15/2012	Valid	Power Grid Corporation of India Limited
	Power Line Crossings of 400 KV Quad purnea - biharsharif transmission line with 400 KV -Kahalgaon-Patna.	3/23/2012	Valid	Power Grid Corporation of India Limited
	Crossing of Powergrid lines by under construction 400 KV D/C Biharsharif - Purnea Line.	10/15/2012	Valid	Power Grid Corporation of India Limited
	Approval of overhead crossing for construction of 400 Kv D/C Biharshariff - purnea Line.	5/29/2012	Valid	Powerlinks Transmission Limited
	Approval of overhead crossing of powergrid and lines by under construction of 400 KV D/C Biharshariff - Purnea Line.	4/5/2012	Valid	Power Grid Corporation of India Limited
	Power Line Crossings of 400 KV Quad Bongaigaon - Siliguri Transmission Line	8/27/3013	Valid	Assam electricity frid corporation ltd.
	Construction of Purnea -Biharsharif 400 KV dc line by m/s. ENICL	2/21/2012	Valid	Central Electricity Authority
	Power line crossing of 400 KV D/C(Quad) Bongaigaon -New siliguri of M/s ENICL with existing 220 KV and 400 kv Tls of Powergrid	11/15/2012	Valid	Power Grid Corporation of India Limited

11.9. ENICL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
3	**Transmission Service Agreement**			
	Transmission Service Agreement between ENICL & Long Term Transmission	6/8/2009	25	Central Electricity Regulatory Commission
	Transmission Service Agreement between ENICL & CTU	28/01/2013	Valid	Central Electricity Regulatory Commission
4	**River Crossing**			
	Crossing river Ganga between SAMHO and Mahenderpur in Patna - Munger stretch by 400 KV D/C (Quad) transmission line from Purnea - Bihar Sharif	23/09/2011	Valid	Inlands Waterways Authority of India
5	**Forest Clearance**			
	8.4226 ha of forest land for 400 KV D/C transmission line by ENICL from S/S of Power Grid, Salakali to Siliguri in Satbhendi Reserve Forest under Haltugaon	3/11/2014	Valid	Ministry of Environment & Forest (Government of Assam)
	1.564 ha of forest land under Cooch Behar Forest for 400 KV/DC Bongaigaon - Siliguri transmission by M/s ENICL.	6/2/2014	Valid	Ministry of Environment & Forest (Government of West Bengal)
	Simplified procedure for grant of permission for felling of trees standing on forest land to be divided for execution of linear projects	8/8/2014	Valid	Ministry of Envirnoment & Forest and Climate Change
6	**Railway Clearance**			
	OH track crossing at Km 24/2-3 between Belakoha railway station and Raninagar railway station for 400 KV D/C transmission line	25/07/2013	Valid	North-East Frontier Railway
	Permission for stringing 400 KV - DC electrical overhead line crossing across the Rly. Track in between i) Pawapuri & Nalwanda Rly. Stn. At T.P. No. 35/10 - 35/11 & ii) Dumri 'H' & Dhurant 'H' Rly. Stn. At EM No. 429/32 - 429/34 on ML.	14/05/12	Valid	East Central Railway
	400 KV overhead Rail Track between Kasing Manasi and Badlaghat Railway Station	19/02/2013	Valid	East Central Railway
	400 KV overhead Rail Track between Olapur and Khagaria Railway Station	9/12/2012	Valid	East Central Railway
	Railway Track Crossing by Overhead 400 KV D/C (Quad) transmission line between Km 94/6-7 between Falakala - Gumanihat Stations	20/12/2012	Valid	North-East Frontier Railway
	Railway Track Crossing by Overhead 400 KV D/C (Quad) transmission line between Km 7/9 - 8/0 between Maynaguri Road - Bhotpati Stations	20/12/2012	Valid	North-East Frontier Railway
	Railway Track Crossing by Overhead 400 KV D/C (Quad) transmission line between Km 141/1-2 between New Alipurduar - Baneshwar Stations	20/12/2012	Valid	North-East Frontier Railway
	Railway Track Crossing by Overhead 400 KV D/C (Quad) transmission line between Km 166/7-8 between Kamakhayaguri-Jorai Stations	1/9/2013	Valid	North-East Frontier Railway
	Railway Track Crossing by Overhead 400 KV D/C (Quad) transmission line between Km 7/6-7 between New Alipurduar - Baneshwar Stations	20/12/2012	Valid	North-East Frontier Railway
	Railway Track Crossing by Overhead 400 KV D/C (Quad) transmission line between Km 34/9-35/0 between Jalpaiguri Road - New Domohani Stations	20/12/2012	Valid	North-East Frontier Railway

11.9. ENICL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
7	**Aviation Clearance**			
	Aviation clearance for Bongaigaon -Siliguri & Purnea - Biharsharif - 400 KV D/C line of M/S ENCIL	10/1/2012	Valid	Airport Authority of India
	NOC for Construction of 400 KV D/C (quad) Transmission line from Bongaigaon to	11/13/2013	Valid	Airport Authority of India
8	**Road Crossing**			
	NOC for NH-31C crossing near Joimaa, Gossaigaon for 400 KV DC Quad Siliguri - Bongaigaon Transmission Line.	28/11/2013	Valid	National Highway Authority of India
	Permission for crossing NH-31 (Falakata - Pundibari Realignment) near Cooch Behar T.E.(at Km. 945.910) for 400 KV DC Quad Siliguri - Bongaigaon Transmission Line.	30/01/2014	Valid	National Highway Division - X (Govt. of West Bengal)
	NOC for T/L near Dariyapur (AP39/0 and 40/0) for 400KV D/C (Quad) from Purnea - Biharsharif on NH-80 in Bihar	1/7/2014	Valid	National Highway Authority of India
	NOC for T/L near Shabpur Kamal (AP59/0 and 60/0) for 400KV D/C (Quad) from Purnea - Biharsharif on NH-31 in Bihar	10/9/2013	Valid	National Highway Authority of India
	NOC for OH Crossing on NH-107 near Pipra Kaithi Mor (AP80/0 and AP81/0) for 400KV D/C (Quad) Purnea Bihar Sharif T/L	12/12/2013	Valid	National Highway Division
	NOC for NH. 106 near Sapardh (94/0 and 95/0) for 400 KV D/C (Quad) transmission line from Purnea Bihar Sharif .	12/26/2013	Valid	National Highway Division
	NOC for transmission line near Harda (AP126/0 and 127/0) for 400 KV D/C (Quad) from Purnea Bihar Sharif on NH-31 in the state of Bihar.	1/7/2014	Valid	National Highways Authority of India
	NOC for crossing overhead for 400 KV DC Quad Siliguri - Bongaigaon Transmission Line.	1/20/2014	Valid	State Highway Circle IV- (Gov. of West Bengal)
	NOC for crossing overhead electrical line at Cooch Behar Baneswar - Alipurduar & 764th km of Sonapore to Pundibari	1/6/2014	Valid	Coochbear Highway Division (Government of West Bengal)
	NOC in respect to overhead crossing of 400kv DC quad transmission line (over NH 31D in between km.123 and km.124 (SH-12A) near Paharpur in the district of Jalpaiguri EOT Reg.	4/11/2014	Valid	National Highway Division - X (Govt. of West Bengal)
	NOC for crossing 400kv dc quad Siliguri-Bongaigaon Transmission line over Maynaguri - Chengrabandha Road (SH-12A) near 4.5km .	12/18/2013	Valid	Jalpaiguri Highway Division (Government of West Bengal)
	Submission of NH-31C Salsalabari to Barobisha crossing near Telipara for 400 KV DC Quad Siliguri - Bongaigaon Transmission Line.	6/4/2014	Valid	National Highways Authority of India
	Permission for construction of overhead power line across Kokrajhar - Karigaon Road	6/4/2014	Valid	Government of Assam
	NOC Regarding overhead crossing on MDR near Bachauta crossing (7214 & 7215) for 400kv DC Quad Siliguri - Bongaigaon Transmission Line.	12/14/2013	Valid	National Highways Authority of India
	NOC for SH77 near Ratha crossing (AP113 &113/1) for 400 KV DC Quad Siliguri - Biharsharif Transmission Line.	10/31/3013	Valid	Bharat State Road Development Corporation Ltd (Government of Bihar)

11.9. ENICL: Approval & Licenses Summary

Sr. No.	Approvals	Date of Issue	Validity (in years)	Issuing Authority
9	**Power Telecommunication Coordination Committee ("PTCC") Clearance**			
	400 KV D/C (Quad) Bongaigaon-Siliguri Transmission Line	6/12/2012	Valid	PTCC, Government of India
	400 KV D/C (Quad) Purnea-Biharshariff Transmission Line	15/05/2013	Valid	PTCC, Government of India
	400 KV D/C (Quad) Bongaigaon-Siliguri Transmission Line	12/5/2012	Valid	PTCC, Government of India
	PTCC passed for 400 KV D/C (Quad) Bongaigaon-Siliguri Transmission Line	10/17/2011	Valid	PTCC, Government of India
	PTCC Approval for 400 KV D/C (Quad) Bongaigaon-Siliguri Transmission Line	12/4/2012	Valid	Office of Divisional Engineer Telecom
	400 KV D/C (Quad) Bongaigaon-Siliguri Transmission Line	11/24/2012	Valid	Central Electricity Authority
	PTCC Clearance proposal in respect for 400 KV D/C (Quad) Purnea - Biharsharif Transmission Line	2/27/2012	Valid	Central Electricity Authority
	PTCC Approval for 400 KV D/C (Quad) purnea - Biharsharif Transmission Line	12/3/2012	Valid	Central Electricity Authority
	Certificate - 400 KV D/C (Quad) Purnea-Biharshariff Transmission Line	15/05/2013	Valid	PTCC, Government of India
	PTCC Route approval for 400 KV D/C Quad Bongaigaon - Siliguri	11/29/2011	Valid	Central Electricity Authority
	PTCC Route approval for 400 KV D/C Quad Purnea - Biharsharif Trans. Line	11/29/2011	Valid	Central Electricity Authority
	Approval for Power Line Crossing of 400 KV D/C (QUAD) Bongaigoan - New Siliguri	12/5/2012	Valid	Power Grid of India Limited
	PTCC Route approval for 400kv D/C Quad Purnea - Biharsharif Trans. Line	5/13/2013	Valid	Central Electricity Authority
10	**Telecom Clearance**			
	Marking of Telecom Alignment for proposal of PTCC clearance proposed 400 KV D/C (Quad) Purnea - Biharsariff Transmission Line ENCIL.	8/25/2012	Valid	Bharat Sanchar Nigam Limited
