ANNEXURE-A**1. Statement of deviation(s) or variation(s) for the quarter ended on June 30, 2026: Units**

Pursuant to applicable provisions of SEBI (Infrastructure Investment Trusts) Regulations, 2014 read with SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, we hereby confirm the following:

a) Statement indicating deviation(s), if any, in the use of proceeds from the objects stated in the explanatory statement to the notice for the general meeting, as applicable: **Not Applicable as there is no deviation/variation**

b) Statement indicating category wise variation(s) between projected utilization of funds made by it in its explanatory statement to the notice for the general meeting and the actual utilization of funds: **Not Applicable as there is no deviation/variation**

We confirm that the funds are completely utilized as of June 30, 2026, and are as per the objects of the issue and a certificate from the Independent Chartered Accountant in this regard is attached herewith as **Annexure-A1**.

2. Statement of deviation(s) or variation(s) for the quarter ended on June 30, 2026: Debt Securities

Pursuant to applicable provisions of SEBI (Infrastructure Investment Trusts) Regulations, 2014 read with SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, we hereby confirm that the proceeds from the issuance of debt securities were fully utilized in accordance with the objects of the issue as on March 31, 2026 and there were no proceeds received either from new issuance of debt securities or earlier issued debt securities during the current quarter ended on June 30, 2026. Therefore, the requirement to provide the statement of deviation(s) or variation(s) for the quarter ended on June 30, 2026, is not applicable for debt securities.

**INDEPENDENT AUDITOR'S REVIEW REPORT ON REVIEW OF INTERIM UNAUDITED
STANDALONE FINANCIAL RESULTS**

To

The Board of Directors of

IndiGrid Investment Managers Limited (The "Investment Manager") (Acting in capacity as the Investment Manager of IndiGrid Infrastructure Trust)

1. We have reviewed the accompanying Statement of Unaudited Standalone Financial Results of **IndiGrid Infrastructure Trust** (the "InvIT" or "Trust") for the quarter ended June 30, 2026 (the "Statement"), being submitted by IndiGrid Investment Managers Limited (the "Investment Manager") pursuant to the requirement of Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended, including any guidelines, circulars, and master circulars issued thereunder (together referred to as the "InvIT Regulations").
2. The Investment Manager's Board of Directors, is responsible for the preparation of the Statement in accordance with the recognition and measurement principles laid down in the Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013 read with relevant rules issued thereunder, the InvIT Regulations, and other accounting principles generally accepted in India. The Investment Manager's Board of Directors is also responsible for such internal control as it determines is necessary to enable the preparation of the Statement that are free from material misstatement, whether due to fraud or error.
3. Our responsibility is to express a conclusion on the Statement based on our review.

We conducted our review of the Statement in accordance with the Standard on Review Engagements ("SRE") 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India ("ICAI"). This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review of interim financial information is limited primarily to making inquiries, of the personnel of the Investment Manager responsible for financial and accounting matters and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing ("SAs"), issued by the ICAI and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the Statement.

4. Based on our review conducted as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in the context of the InvIT Regulations prevailing over certain Ind AS requirements, as explained in paragraph 5 below in accordance with the recognition and measurement principles laid down in the aforesaid Ind AS and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of the InvIT Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.

**Deloitte
Haskins & Sells
Chartered Accountants LLP**

5. We draw attention to Note 8 of the accompanying Statement, which describes the presentation/ classification of "Unit Capital" as "Equity" rather than as a financial liability or compound financial instrument under the applicable requirements of Ind AS 32 - "Financial Instruments: Presentation", in order to comply with the relevant InvIT Regulations.

Our conclusion on the Statement is not modified in respect of this matter.

6. The Standalone financial results of the Trust for the quarter ended June 30, 2025, quarter ended March 31, 2026 and year ended March 31, 2026, were reviewed/ audited by predecessor auditor, whose reports dated July 24, 2025 and May 14, 2026, respectively, expressed an unmodified conclusion/ opinion on those Statements.

Our conclusion on the Statement is not modified in respect of this matter.

A. NOTES TO UNAUDITED STANDALONE FINANCIAL RESULTS FOR THE QUARTER ENDED 30 JUNE 2026

1 The above unaudited standalone financial results of Indigrid Infrastructure Trust ("IndiGrid" or "the Trust") For The Quarter Ended 30 June 2026 have been reviewed and approved by the Board of Directors and Audit Committee of Indigrid Investment Managers Limited ('Investment Manager') at its meeting held on 12 August 2026 and has approved distribution of Rs. 4.12 per unit for the current quarter to be paid within 5 working days from the record date. The Statutory auditors have carried out a limited review on these unaudited standalone financial results.

2 The unaudited standalone financial results comprise of the Statement of Profit and Loss and explanatory notes thereon and the additional disclosures as required in Chapter 4 of SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025 as amended including any guidelines and circulars issued thereunder ("SEBI Circulars/InvIT Regulations") of Indigrid Infrastructure Trust, for the quarter ended 30 June 2026, ("Unaudited Standalone Financial Results").The Unaudited Standalone Financial Results has been prepared in accordance with the recognition and measurement principles laid down in the Indian Accounting Standard 34 - Interim Financial Reporting (Ind AS 34), as prescribed in Rule 2(1)(a) of the Companies (Indian Accounting Standards) Rules, 2015 (as amended) and other accounting principles generally accepted in India to the extent not inconsistent with the Securities Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended from time to time, read with the guidelines and circulars issued thereunder ("SEBI InvIT Regulations") except presentation of "Unit Capital" as "Equity" instead of compound financial instruments under Ind AS 32 - Financial Instruments: Presentation (Refer note 8). The quarter ended 31 March 2026 standalone financial results are the derived figures between the audited figures in respect of the year ended 31 March 2026 and the published year-to-date figures up to 31 December 2025, being the date of the end of nine months of the previous financial year, which were subject to limited review.

3 Revenue from operations comprise of interest income on loans to subsidiaries and varies on account of new loans disbursed to SPV's for ongoing capital projects / acquisitions undertaken by the Trust / other requirements. Revenue and corresponding expenses included in the standalone financial results for various periods may not be comparable for the reasons as described below:

During the year ended 31 March 2026, the Trust had acquired below mentioned entities:

- Renew Surya Aayan Private Limited ("RSAPL") (from 24 June 2025)
- Koppal Narendra Transmission Limited ("KNLT") (from 24 June 2025)
- Gadag Transmission Limited ("GTL") (from 10 March 2026)

To optimize Group structure 49% of shares of RSAPL and 100% of shares of KNLT and GTL were transferred to Indigrid 2 Private Limited ("IGL2") at carrying value.

8.20% Non-convertible debentures (refer note (a) below)	Secured	-	06-May-26	06-May-31	06-May-27
7.72% Non-convertible debentures (refer note (a) below)	Secured	-	06-May-26	06-May-31	06-Aug-26
7.97% Non-convertible debentures (refer note (a) below)	Secured	-	06-May-26	06-May-31	06-Aug-26

Note :

(a) Non convertible debentures are secured to the extent of:

(i) first pari passu charge on entire current assets including loans and advances, any receivables accrued/realised from those loans and advances extended by the Trust/Hold cos to its subsidiaries (direct or indirect) including loans to all project SPVs and future SPVs; as per financing agreements.

(ii) First pari-passu charge on Escrow account of the Trust;

(iii) Pledge of 99% over the equity share capital of specified SPVs except pledge of 73% over the equity share capital of PrKTCL and 65% over equity share capital of TSESPL

(iv) first and exclusive charge on the ISRA/DSRA accounts created for the issue.

(b) This has been repaid during the current period.

5 The Trust retained its credit ratings of "CRISIL AAA/Stable" from CRISIL on 05 June 2026, "ICRA AAA/Stable" from ICRA on 27 May 2026 and "IND AAA/Stable" from India Ratings on 02 June 2026.

6 Pursuant to the Investment Management Agreement executed on 16 February 2024, Investment Manager is entitled to fees @ 1.75% of difference between revenue from operations and operating expenses (other than fees of the Investment Manager) of each SPV per annum or 0.25% of AUM, whichever is lower and acquisition fees amounting to 0.5% of Enterprise Value of new assets / SPVs / businesses acquired, subject to achieving Distribution Per Unit (DPU) guidance. For this purpose, operating expenses would not include depreciation, finance costs and income tax expense. There have been no changes in the methodology of computation of fees paid to Investment Manager.

7 Provision for impairment / reversal of impairment of investments in subsidiaries is made based on the difference between the carrying amounts and the recoverable amounts. The recoverable amount of the investments in subsidiaries has been computed by external independent valuation expert based on value in use calculation for the underlying projects (based on discounted cash flow model). On a periodic basis, according to the recoverable amounts of individual portfolio assets computed by the valuation experts, the Trust tests impairment on the amounts invested in the respective subsidiary companies. The valuation exercise so carried out considers various factors including cash flow projections, plant load factor, line availability, changes in interest rates, discount rates, risk premium for market conditions etc.

8 Under the provisions of the InvIT Regulations, the Trust is required to distribute to Unitholders not less than 90% of the Net Distributable Cash Flows of the Trust for each financial year. Accordingly, Unit Capital contains a contractual obligation to pay cash to the Unitholders. Thus, in accordance with the requirements of Ind AS 32 - Financial Instruments: Presentation, the Unit Capital contains a liability element which should have been classified and treated accordingly. However, Para 4.2.3(a) of SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025, (as amended from time to time) issued under the InvIT Regulations, require the Unit Capital in entirety to be presented/classified as "Equity", which is at variance from the requirements of Ind AS 32. In order to comply with the aforesaid SEBI requirements, the Trust has considered unit capital as equity.

9 Pursuant to the Share Purchase and Shareholders' Agreement dated 26 May 2026, the Trust transferred entire beneficial ownership of its subsidiary, Terralight Solar Energy Tinwari Private Limited ("TSETPL"), to Enerica Infra 1 Private Limited ("ENR 1") for a consideration of Rs. 814.00 million resulting in a gain of Rs. 424.87 millions.

10 On 01 June 2026, IndiGrid 2 Private Limited ("IGL2") transferred its entire equity stake in Terralight Solar Energy Nangla Private Limited ("TSENPL"), to the Trust at fair value.

11 On 11 November 2025, the Trust raised Rs. 4,385.00 million through the issuance of 25,982,092 additional units on a preferential basis at an issue price of Rs. 168.77 per unit. The issuance was undertaken in accordance with the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014 and SEBI Circular No. SEBI/HQ/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025.

12 On 22 January 2026, the Trust raised Rs. 14999.99 million through the issuance of 9,20,24,539 additional units to institutional investors at an issue price of Rs. 163.00 per unit. The issuance was undertaken in accordance with the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014 and SEBI Circular No. SEBI/HQ/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025.

13 Pursuant to the Scheme of Amalgamation approved by the Hon'ble National Company Law Tribunal ("NCLT") under Sections 230 to 232 of the Companies Act, 2013 vide order dated 22 April 2026, the amalgamation of IndiGrid Solar-I (AP) Private Limited ("ISPL1"), IndiGrid Solar-II (AP) Private Limited ("ISPL2") and Globus Steel And Power Private Limited ("GSPPL") (collectively "Transferor Companies") with Godawari Green Energy Private Limited ("GGEPL") became effective on 10 June 2026 with appointed date being 01 April 2024 upon receipt of the requisite regulatory approvals and fulfillment of the prescribed conditions. Consequently, the Trust was allotted equity shares and compulsorily convertible debentures ("CCDs") of GGEPL in consideration for its investments in ISPL1 and ISPL2, and the Transferor Companies stand dissolved without winding up.

Accordingly, with effect from the effective date of the Scheme, the Trust holds its investment in these assets through GGEPL. Consequently, ISPL1, ISPL2 and GSPPL are no longer presented as separate SPVs in these financial results. Comparative figures have been reclassified accordingly.

14 IndiGrid 2 Private Limited ("IGL2") (wholly-owned subsidiary of IndiGrid Infrastructure Trust) has transferred 74% of the total paid up share capital and 100% interest of Enerica Infra 4 Private Limited ("EIPL4") on July 24, 2026 to Enerica ReGrid Infra Private Limited ("EnerGrid") at a fair valuation conducted by an independent valuer.

15 The activities of Trust comprise of owning and investing in infrastructure special purpose vehicles (SPV) to generate cash flows for distribution to unitholders. Based on guiding principles given in Ind AS 108 "Operating Segments", this activity falls within a single operating segment and accordingly the disclosures of Ind AS 108 have not separately been given. The Trust is operating in India which is considered as a single geographical segment.

16 Previous period figures have been reclassified/ regrouped wherever necessary to confirm to current period classification. The impact of the same is not material on these unaudited standalone financial results.

17 There is no change in the accounting policy of the Trust for the quarter ended 30 June 2026.

B. ADDITIONAL DISCLOSURES AS REQUIRED BY CHAPTER 4 TO THE MASTER CIRCULAR NO. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025 AS AMENDED INCLUDING ANY GUIDELINES AND CIRCULARS ISSUED THEREUNDER ("SEBI CIRCULARS") ("ADDITIONAL DISCLOSURES")

B.1) Statement of Net Distributable Cash Flows (NDCFs) of Indgrid Infrastructure Trust

Description	Quarter Ended			Year Ended
	30 June 2026	31 March 2026	30 June 2025	31 March 2026
	Unaudited	Audited	Unaudited	Audited
Cash flow from operating activities as per Standalone Cash Flow Statement of the Trust	(310.19)	(81.43)	(63.74)	(196.91)
(+) Cash flows received from SPV's / Investment entities which represent distributions of NDCF computed as per relevant framework (refer note 1)	8,705.20	8,142.40	1,845.12	28,981.61
(+) Treasury income / income from investing activities of the Trust (interest income received from FD, any investment entities as defined in Regulation 18(5), tax refund, any other income in the nature of interest, profit on sale of Mutual funds, investments, assets etc., dividend income etc., excluding any Ind AS adjustments on a cash receipt basis)	78.63	159.86	138.15	488.55
(+) Proceeds from sale of infrastructure investments, infrastructure assets or shares of SPVs/Holdcos or Investment Entity adjusted for the following • Applicable capital gains and other taxes • Related debts settled or due to be settled from sale proceeds • Directly attributable transaction costs • Proceeds reinvested or planned to be reinvested as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations (refer note 2 and 3)	-	-	-	-
(+) Proceeds from sale of infrastructure investments, infrastructure assets or sale of shares of SPVs/ Hold cos or Investment Entity not distributed pursuant to an earlier plan to re-invest as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations, if such proceeds are not intended to be invested subsequently	-	-	-	-
(-) Finance cost on Borrowings, excluding amortisation of any transaction costs as per Profit and Loss account of the Trust	(3,886.84)	(3,931.22)	(3,678.49)	(15,589.83)
(-) Debt repayment at Trust level (to include principal repayments as per scheduled EMI's except if refinanced through new debt including overdraft facilities and to exclude any debt repayments / debt refinanced through new debt in any form or funds raised through issuance of units)				
(-) any reserve required to be created under the terms of, or pursuant to the obligations arising in accordance with, any: (i). loan agreement entered with banks / financial institution from whom the Trust or any of its SPVs/ HoldCos have availed debt, or (ii). terms and conditions, covenants or any other stipulations applicable to debt securities issued by the Trust or any of its SPVs/ HoldCos, or (iii). terms and conditions, covenants or any other stipulations applicable to external commercial borrowings availed by the Trust or any of its SPVs/ HoldCos, (iv). agreement pursuant to which the SPV/ HoldCo operates or owns the infrastructure asset, or generates revenue or cashflows from such asset (such as, concession agreement, transmission services agreement, power purchase agreement, lease agreement, and any other agreement of a like nature, by whatever name called); or (v). statutory, judicial, regulatory, or governmental stipulations; or (refer note 4)	-	5.00	42.50	404.95
(-) any capital expenditure on existing assets owned / leased by the InvIT, to the extent not funded by debt / equity or from contractual reserves created in the earlier years	(1.75)	(31.16)	(0.49)	(34.50)
NDCF (refer note 5)	4,585.05	4,263.45	(1,716.95)	14,053.87

Notes:

1. The following amounts has been included / excluded from the above -

A. This includes Rs. 381.41 million (net) received from SPV after the 30 June 2026 but before the board meeting date i.e. 12 August 2026.

B. This excludes Rs. 252.50 million (net) received from the SPV after 31 March 2026 but pertains to previous year.

C. This doesn't include loan given to SPVs that are under construction stage amounting to Rs 3,196.35 million given to fund the capital expenditure in the project.

2. During current period, the Trust transferred entire beneficial ownership of its subsidiary, Terralight Solar Energy Tinwari Private Limited ("TSETPL"), to Enerica Infra 1 Private Limited ("ENR 1"). As the proceeds from this transaction is reinvested / proposed to be reinvested in accordance with InvIT Regulations, no cash inflow is considered as part of NDCF.

3. During the period ended 31 March 2026, the Trust had transferred 49% of paid up equity capital of RSAPL, 100% paid up equity capital of KNTL and 100% paid up equity capital of GTL at the fair value at which it is acquired to IGL2 (within the Group). As the proceeds from this transaction is reinvested / proposed to be reinvested in accordance with InvIT Regulations, no cash inflow is considered as part of NDCF.

4. The amount represents the actual reserve created or released during the period. In accordance with Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, reserves created from debt funds at the time of availing financing shall not be reduced from 01 April 2025 onwards; accordingly, such reserves have been excluded from the current year's reserve movement

5. As per the master circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025, details of NDCF distributable is as below -

Particulars	Quarter Ended			Year Ended
	30 June 2026	31 March 2026	30 June 2025	31 March 2026
	Unaudited	Audited	Unaudited	Audited
NDCF of Trust (A)	4,585.05	4,263.45	(1,716.95)	14,053.87
(+) NDCF of Holdco, SPV's & Project Managers (B)	7,819.07	7,926.28	6,423.63	28,748.78
(-) Amount distributed by Holdco, SPV's & Project Managers (C)	(8,705.20)	(8,142.40)	(1,845.12)	(28,981.61)
Amount Of NDCF Distributable D=(A+B-C) *	3,698.92	4,047.33	2,861.56	13,821.04

*In accordance with the SEBI circular no. Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025, 90% distribution under regulation 18(6) needs to be computed by taking together the 10% retention done at SPV level and Trust level. Accordingly, the Trust has ensured the same. In the period ended 30 June 2026, the Trust has distributed Rs 0.24 per unit (31 March 2026: 0.67 per unit) out of the 10% retention done for the earlier periods at Trust level.

Further, Trust along with its SPVs has ensured that the minimum 90% distribution of NDCF is met on a cumulative periodic basis as specified for mandatory distributions in the InvIT regulations.

B.2) Statement of Earnings per unit (EPU) :

Basic EPU amounts are calculated by dividing the profit for the period/year attributable to Unit holders by the weighted average number of units outstanding during the period/year.

Diluted EPU amounts are calculated by dividing the profit attributable to unit holders by the weighted average number of units outstanding during the year/period plus the weighted average number of units that would be issued on conversion of all the dilutive potential units into unit capital. The Trust does not have any potentially dilutive units which would be added to Unit Capital

The following reflects the profit and unit data used in the basic and diluted EPU computation:

Description	Quarter Ended			Year Ended
	30 June 2026	31 March 2026	30 June 2025	31 March 2026
	Unaudited	Audited	Unaudited	Audited
	Refer Note 2			
Profit after tax for calculating basic and diluted EPU (Rs. in million)	4,643.79	3,858.36	3,377.19	13,921.52
Weighted average number of units in calculating basic and diluted EPU (No. in million)	952.56	931.09	834.56	861.99
Earnings Per Unit (not annualised except for the year ended 31 March 2026)				
Basic (Rs./unit)	4.88	4.14	4.05	16.15
Diluted (Rs./unit)	4.88	4.14	4.05	16.15

B.3) Statement of Related Party Transactions:

I. List of related parties as per the requirements of Ind AS 24 - Related Party Disclosures

(a) Name of related party and nature of its relationship:

- Subsidiaries**
- 1 Indigrid Limited (IGL)
 - 2 Indigrid 1 Limited (IGL1)
 - 3 Indigrid 2 Private Limited (IGL2)
 - 4 Bhopal Dhule Transmission Company Limited (BDTCL)
 - 5 Jabalpur Transmission Company Limited (JTCL)
 - 6 Maheshwaram Transmission Private Limited (MTL)
 - 7 RAPP Transmission Company Limited (RTCL)
 - 8 Purulia & Kharagpur Transmission Company Limited (PKTCL)
 - 9 Patran Transmission Company Private Limited (PTCL)
 - 10 NRSS XXIX Transmission Limited (NRSS)
 - 11 Odisha Generation Phase II Transmission Limited (OGPTL)
 - 12 East-North Interconnection Company Private Limited (formerly known as East-North Interconnection Company Limited) (ENICL)
 - 13 Gurgaon-Palwal Transmission Private Limited (GPTL)
 - 14 Jhajjar KT Transco Private Limited (JKTPL)
 - 15 Parbati Koldam Transmission Company Limited (PrKTCL)
 - 16 NER II Transmission Limited (NER)
 - 17 Kallam Transmission Limited (KTL)
 - 18 Raichur Sholapur Transmission Company Private Limited (RSTCPL)
 - 19 Khargone Transmission Limited (KhTL)
 - 20 TN Solar Power Energy Private Limited (TSPEPL)
 - 21 Universal Mine Developers And Service Providers Private Limited (UMDSPPL)
 - 22 Terralight Kanji Solar Private Limited (TKSPL)
 - 23 Terralight Rajapalayam Solar Private Limited (TRSPL)
 - 24 Solar Edge Power And Energy Private Limited (SEPEPL)
 - 25 PLG Photovoltaic Private Limited (PPPL)
 - 26 Universal Saur Urja Private Limited (USUPL)
 - 27 Terralight Solar Energy Tinwari Private Limited (TSETPL) (till 29 June 2026)
 - 28 Terralight Solar Energy Charanka Private Limited (TSECPL)
 - 29 Terralight Solar Energy Nangla Private Limited (TSENPL)
 - 30 Terralight Solar Energy Patlasi Private Limited (TSEPPL)
 - 31 Terralight Solar Energy Gadna Private Limited (TSEGPV)
 - 32 Godawari Green Energy Private Limited (GGEPL)
 - 33 Terralight Solar Energy Sitamau SS Private Limited (TSESP)
 - 34 Kilokari BESS Private Limited (KBPL)
 - 35 Ishanagar Power Transmission Limited (IPTL)
 - 36 Dhule Power Transmission Limited (DPTL)
 - 37 Jaisalmer Urja VI Private Limited (JUPL)
 - 38 Kallam Transco Limited (KTCO)
 - 39 Gujarat BESS Private Limited (GBPL)
 - 40 Rajasthan BESS Private Limited (RBPL)
 - 41 Ratle Kiru Power Transmission Limited (RKPTL)
 - 42 ReNew Surya Aayan Private Limited (RSAPL) (from 24 June 2025)
 - 43 Koppal-Narendra Transmission Limited (KNTL) (from 24 June 2025)
 - 44 Enerica Infra 1 Private Limited (ENR1) (from 20 May 2025 till 9 February 2026)
 - 45 Enerica Infra 4 Private Limited (ENR4) (from 9 February 2026 till 24 July 2026)
 - 46 Gadag Transmission Limited (GTL) (from 10 March 2026)
 - 47 IndiGrid Solar-I (AP) Private Limited (ISPL1) (Merged with Godawari Green Energy Private Limited w.e.f. 10 June 2026)
 - 48 IndiGrid Solar-II (AP) Private Limited (ISPL2) (Merged with Godawari Green Energy Private Limited w.e.f. 10 June 2026)
 - 49 Globus Steel And Power Private Limited (GSPPL) (Merged with Godawari Green Energy Private Limited w.e.f. 10 June 2026)

(b) Other related parties under Ind AS-24 with whom transactions have taken place during the period

- Entities with significant influence over the Trust**
- 1 Esoteric II Pte. Ltd - Inducted Sponsor
 - 2 Indigrid Investment Managers Limited (IIML) - Investment manager of IndiGrid

II. List of related parties as per Regulation 2(1)(zv) of the InvIT Regulations

(a) Parties to IndiGrid

- 1 Esoteric II Pte. Ltd (EPL) - Inducted Sponsor
- 2 Indigrid Limited (IGL) - Project Manager of IndiGrid
- 3 Indigrid Investment Managers Limited (IIML) - Investment manager of IndiGrid
- 4 Enerica Infra 1 Private Limited - Project Manager of BESS Project appointed wef 16 May 2025 (till 9 February 2026)
- 5 Enerica Infra 4 Private Limited - Project Manager of BESS Project appointed wef 9 February 2026 (till 24 July 2026)
- 6 Axis Trustee Services Limited (ATSL) - Trustee of IndiGrid (Axis Bank Ltd is Promoter)

(b) Promoters of the parties to IndiGrid specified in (a) above

- 1 KKR Ingrid Co-Invest L.P.- Cayman Island - Promoter of EPL
- 2 KKR Asia Pacific Infrastructure Holdings Pte. Ltd.- Singapore - Promoter of EPL
- 3 Esoteric I Pte. Ltd.-Singapore - Promoter of EPL
- 4 Electron IM Pte. Ltd. - Promoter of IIML (Parent with 100% holding of IIML)
- 5 Axis Bank Limited - Promoter of ATSL
- 6 Axis Capital Limited - Subsidiary of Promoter of Trustee

(c) Entities with common director and its subsidiaries

- 1 Enerica Regrid Infra Private Limited (ER IPL)
- 2 Enerica Infra 1 Private Limited (ENR1) (subsidiary of ER IPL)
- 3 Enerica Infra 2 Private Limited (ENR2) (subsidiary of ER IPL)
- 4 Enerica Infra 3 Private Limited (ENR3) (subsidiary of ER IPL)
- 5 Enerica Infra 5 Private Limited (ENR5) (subsidiary of ER IPL)
- 6 Enerica Infra 6 Private Limited (ENR6) (subsidiary of ER IPL)
- 7 Enerica Infra 7 Private Limited (ENR7) (subsidiary of ER IPL)
- 8 Morena I SEZ Transmisison Limited (MSTL) (subsidiary of ER IPL)
- 9 Terralight Solar Energy Tinwari Private Limited (TSETPL) (subsidiary of ER IPL) (from 29 June 2026)

(d) Directors of the parties to IndiGrid specified in (a) above

Directors of IIML:

- 1 Harsh Shah (Managing Director)
- 2 Tarun Kataria
- 3 Ashok Sethi
- 4 Hardik Shah
- 5 Jayashree Vaidhyanathan
- 6 Ami Momaya (till 24 July 2025)
- 7 Vaibhav Vaidya (From 24 July 2025)
- 8 Gautam Mehra (From 14 May 2026)

Key Managerial Personnel of IIML:

- 1 Harsh Shah (Managing director)
- 2 Navin Sharma (CFO) (till 15 May 2025)
- 3 Meghana Pandit (CFO) (from 16 May 2025)
- 4 Urmil Shah (Company Secretary)

Directors of IGL:

- 1 Rahul Asthana
- 2 Prabhakar Singh
- 3 Kundan Kishore
- 4 Sanil Namboodripad
- 5 Giriraj Ajmera

Directors of ATSL:

- 1 Sumit Bali
- 2 Prashant Joshi till 15 April 2026
- 3 Arun Mehta till 11 May 2026
- 4 Pramod Kumar Nagpal
- 5 Bipin Kumar Saraf
- 6 Rahul Choudhary
- 7 Sudipto Nag (from 16 April 2026)
- 8 Vipul Mehrotra (appointed wef 24 June 2026)

Directors of Esoteric II Pte. Ltd.:

- 1 Tang Jin Rong (Dong Jinrong)
- 2 Madhura Narawane (till 04 April 2025)
- 3 Goh Ping Hao

III. Transactions with related parties during the period are as follows:

CONSOLIDATED FINANCIAL RESULTS**

To
The Board of Directors of
IndiGrid Investment Managers Limited (The "Investment Manager") (Acting in
capacity as the Investment Manager of IndiGrid Infrastructure Trust)

1. We have reviewed the accompanying Statement of Unaudited Consolidated Financial Results of **IndiGrid Infrastructure Trust** ("the Parent") and its subsidiaries (the Parent and its subsidiaries together referred to as "the Group"), for the quarter ended June 30, 2026 (the "Statement") being submitted by IndiGrid Investment Managers Limited (the "Investment Manager") pursuant to the requirement of Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended, including any guidelines, circulars, and master circulars issued thereunder (together referred to as the "InvIT Regulations").
2. The Investment Manager's Board of Directors, is responsible for the preparation of the Statement in accordance with the recognition and measurement principles laid down in Indian Accounting Standard 34 "Interim Financial Reporting" ("Ind AS 34"), prescribed under Section 133 of the Companies Act, 2013 read with relevant rules issued thereunder, the InvIT Regulations, and other accounting principles generally accepted in India. The Investment Manager's Board of Directors is also responsible for such internal control as it determines is necessary to enable the preparation of the Statement that are free from material misstatement, whether due to fraud or error.
3. The Statement includes the interim financial information of the entities listed in **Attachment A**.
4. Our responsibility is to express a conclusion on the Statement based on our review.

We conducted our review of the Statement in accordance with the Standard on Review Engagements (SRE) 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity", issued by the Institute of Chartered Accountants of India ("ICAI"). This standard requires that we plan and perform the review to obtain moderate assurance as to whether the Statement is free of material misstatement. A review of interim financial information is limited to primarily making inquiries of personnel of the Investment Manager responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Standards on Auditing ("SAs"), issued by the ICAI, and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on the Statement.

We have also performed procedures in accordance with Regulation 13(2)(e) of the InvIT Regulations, as amended, to the extent applicable.

**Deloitte
Haskins & Sells
Chartered Accountants LLP**

5. Based on our review conducted and procedures performed as stated in paragraph 3 above, nothing has come to our attention that causes us to believe that the accompanying Statement, prepared in the context of the InvIT Regulations prevailing over certain Ind AS requirements, as explained in paragraph 6 below, in accordance with the recognition and measurement principles laid down in the aforesaid Ind AS and other accounting principles generally accepted in India, has not disclosed the information required to be disclosed in terms of InvIT Regulations, including the manner in which it is to be disclosed, or that it contains any material misstatement.
6. We draw attention to Note 7 of the accompanying Statement, which describes the presentation/ classification of "Unit Capital" as "Equity" rather than as a financial liability or compound financial instrument under the applicable requirements of Ind AS 32- Financial Instruments: Presentation, in order to comply with the relevant InvIT Regulations.

Our conclusion on the Statement is not modified in respect of this matter.

7. The Consolidated financial results of the Trust for the quarter ended June 30, 2025, quarter ended March 31, 2026, and year ended March 31, 2026, were reviewed/ audited by predecessor auditor, whose reports dated July 24, 2025 and May 14, 2026, respectively, expressed an unmodified conclusion/ opinion on those statements

Our conclusion on the Statement is not modified in respect of this matter.

A. NOTES TO UNAUDITED CONSOLIDATED FINANCIAL RESULT FOR THE QUARTER ENDED 30 JUNE 2026

- 1 The above unaudited consolidated financial results of Indigrid Infrastructure Trust ("IndiGrid" or "the Trust") for the quarter ended 30 June 2026 have been reviewed and approved by the Audit Committee and Board of Directors of Indigrid Investment Managers Limited ("Investment Manager") at its meeting held on 12 August 2026 and has approved a distribution of Rs. 4.12 per unit for the current quarter to be paid within 5 working days from the record date. The Statutory auditors have carried out a limited review of these unaudited consolidated financial results.
- 2 The unaudited consolidated financial results comprise of the Statement of Profit and Loss and explanatory notes thereon and the additional disclosures as required in Chapter 4 of SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025 as amended including any guidelines and circulars issued thereunder ("SEBI Circulars/InvIT Regulations") of the Trust for the quarter ended 30 June 2026 ("Unaudited Consolidated Financial Results"). The Unaudited Consolidated Financial Results has been prepared in accordance with the recognition and measurement principles laid down in the Indian Accounting Standard 34 - Interim Financial Reporting (Ind AS 34), as prescribed in Rule 2(1)(a) of the Companies (Indian Accounting Standards) Rules, 2015 (as amended) and other accounting principles generally accepted in India to the extent not inconsistent with the Securities Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended from time to time, read with the guidelines and circulars issued thereunder ("SEBI InvIT Regulations") except presentation of "Unit Capital" as "Equity" instead of compound financial instruments under Ind AS 32 - Financial Instruments: Presentation (Refer note 7). The quarter ended 31 March 2026 consolidated financial results are the derived figures between the audited figures in respect of the year ended 31 March 2026 and the published year-to-date figures up to 31 December 2025, being the date of the end of nine months of the current financial year, which were subject to limited review.
- 3 Revenue and corresponding expenses included in the consolidated financial results for various periods may not be comparable on account of reasons as mentioned below -

FY 2027

The Group has recognized revenue for NRSS XXIX Transmission Limited extension project and balance portion of Gujarat BESS Private Limited for which commercial operation date has been achieved during the current period.

FY 2026

- i. The Group has recognized revenue for new transmission project in Gurgaon-Palwal Transmission Private Limited (Formerly known as Gurgaon-Palwal Transmission Limited) for which commercial operation date has been achieved during the year.
- ii. The Group (along with its holding companies) have acquired Renew Surya Aayan Private Limited ("RSAPL") (w.e.f. from 24 June 2025), Koppal Narendra Transmission Limited ("KNLT") (w.e.f. from 24 June 2025) and Gadag Transmission Limited ("GTL") (w.e.f. from 11 March 2026).
- iii. Godawari Green Energy Private Limited ("GGEPL") was non-operational from 21 March 2025 to 21 July 2025 due to generator and transformer failure. Repairs were completed, and operations resumed on 21 July 2025. Management has not recognized the revenue loss and has filed an insurance claim to recover the revenue loss and repair costs.
- 4 During the previous year, Parbati Koldam Transmission Company Limited ("PrKTCL") received true-up order and tariff determination orders from the Central Electricity Regulatory Commission ("CERC") for the periods FY 2014-19 and FY 2019-24 respectively.

Pursuant to the true-up order for FY 2014-19, CERC disallowed certain capital costs, including expenditure towards the corporate building, resulting in a revenue reversal of Rs. 72 million. Further, based on the tariff determination order for FY 2019-24, which specifies the approved revenue for the said period, PrKTCL has recognized a revenue reversal of Rs. 163 million for the period from FY 2019 up to the order date (July 23, 2025). Interest of Rs. 136 million on the above adjustments has also been provided for in the current period.

The Company will be filing the true-up petition for FY 2019-24 along with the tariff petition for FY 2024-29 in due course.
- 5 Pursuant to the Investment Management Agreement dated 16 February 2024 (as amended), Investment Manager is entitled to fees @ 1.75% of difference between revenue from operations and operating expenses (other than fees of the Investment Manager) of each SPV per annum or 0.25% of AUM, whichever is lower and acquisition fees amounting to 0.5% of Enterprise Value of new assets / SPVs / businesses acquired, subject to achieving Distribution Per Unit (DPU) guidance. For this purpose, operating expenses would not include depreciation, finance costs and income tax expense. There are no changes in the methodology of computation of fees paid to Investment Manager.
- 6 Under the Project Implementation and Management Agreement, the Project Manager is responsible for the operation and maintenance of all project SPVs and is entitled to a fee of 7% of the gross expenditure incurred by each SPV, except for Jhajar KT Transco Private Limited ("JKTCL"), for which a fixed annual fee, subject to an annual escalation of 5%, is charged.

Indigrid Limited ("IGL") serves as the Project Manager for all SPVs in the Power Transmission and Power Generation segments, while Enerica Infra 1 Private Limited ("ENR1") (till 08 February 2026) and Enerica Infra 4 Private Limited ("ENR4") (from 09 February 2026) acts as the Project Manager for all SPVs in the BESS segment. The project management fees paid by the respective SPVs to IGL or ENR4 and ENR1 are eliminated upon consolidation. The methodology for computing project management fees remains unchanged.

- 7 Under the provisions of the InvIT Regulations, the Trust is required to distribute to Unitholders not less than 90% of the Net Distributable Cash Flows of the Trust for each financial year. Accordingly, Unit Capital contains a contractual obligation to pay cash to the Unitholders. Thus, in accordance with the requirements of Ind AS 32 - Financial Instruments: Presentation, the Unit Capital contains a liability element which should have been classified and treated accordingly. However, Para 4.2.3(a) of SEBI Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025, (as amended from time to time) issued under the InvIT Regulations, require the Unit Capital in entirety to be presented/classified as "Equity", which is at variance from the requirements of Ind AS 32. In order to comply with the aforesaid SEBI requirements, the Trust has considered unit capital as equity.
- 8 On 11 November 2025, the Trust raised Rs. 4,385.00 million through the issuance of 25,982,092 additional units on a preferential basis to its unitholders at an issue price of Rs. 168.77 per unit. The issuance was undertaken in accordance with the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014 and SEBI Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025.
- 9 On 22 January 2026, the Trust raised Rs.14,999.99 million through the issuance of 9,20,24,539 additional units to institutional investors at an issue price of Rs. 163.00 per unit. The issuance was undertaken in accordance with the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014 and SEBI Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025.
- 10 Pursuant to the Scheme of Amalgamation approved by the Hon'ble National Company Law Tribunal ("NCLT") under Sections 230 to 232 of the Companies Act, 2013 vide order dated 22 April 2026, the amalgamation of IndiGrid Solar-I (AP) Private Limited ("ISPL1"), IndiGrid Solar-II (AP) Private Limited ("ISPL2") and Globus Steel And Power Private Limited ("GSPPL") (collectively "Transferor Companies") with Godawari Green Energy Private Limited ("GGEPL") became effective on 10 June 2026 with appointed date being 01 April 2024 upon receipt of the requisite regulatory approvals and fulfillment of the prescribed conditions. Consequently, the Trust was allotted equity shares and compulsorily convertible debentures ("CCDs") of GGEPL in consideration for its investments in ISPL1 and ISPL2, and the Transferor Companies stand dissolved without winding up.

Accordingly, with effect from the effective date of the Scheme, the Trust holds its investment in these assets through GGEPL. Consequently, ISPL1, ISPL2 and GSPPL are no longer presented as separate SPVs in these financial results. Comparative figures have been reclassified accordingly.
- 11 Pursuant to the Share Purchase and Shareholders' Agreement dated 26 May 2026, the Trust transferred entire beneficial ownership of its subsidiary, Terralight Solar Energy Tinwari Private Limited ("TSETPL"), to Enerica Infra 1 Private Limited ("ENR 1") for a consideration of Rs. 814.00 million resulting in a gain of Rs. 6.30 millions.
- 12 IndiGrid 2 Private Limited ("IGL2") (wholly-owned subsidiary of IndiGrid Infrastructure Trust) has transferred 74% of the total paid up share capital and 100% interest of Enerica Infra 4 Private Limited ("EIPL4") on 24 July 2026 to Enerica ReGrid Infra Private Limited ("EnerGrid") at a fair valuation conducted by an independent valuer.
- 13 Previous period figures have been reclassified/ regrouped wherever necessary to confirm to current period classification. The impact of the same is not material on these unaudited consolidated financial results.
- 14 There is no change in the accounting policy of the Group for the quarter ended 30 June 2026.

B. ADDITIONAL DISCLOSURES AS REQUIRED BY CHAPTER 4 TO THE MASTER CIRCULAR NO. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 DATED 11 JULY 2025 AS AMENDED INCLUDING ANY GUIDELINES AND CIRCULARS ISSUED THEREUNDER ("SEBI CIRCULARS")

Ratios	Quarter Ended			Year Ended
	30 June 2026	31 March 2026	30 June 2025	31 March 2026
Debt equity ratio	3.61	3.51	4.58	3.51
Debt service coverage ratio	2.36	2.18	1.92	1.97
Interest service coverage ratio	2.36	2.18	1.92	1.97
Asset cover available	1.22	1.22	1.09	1.22
Total debt to total assets	0.72	0.72	0.78	0.72
Net worth (excluding Equity attributable to Non-controlling interests) (Rs. Million)	59,314.52	60,724.99	48,929.70	60,724.99
Distribution per Unit	4.12	4.00	4.00	16.00
EBITDA Margin	83.37%	40.89%	83.79%	65.63%
Net Profit Margin	22.63%	8.27%	8.96%	8.37%
Current Ratio	0.80	0.78	1.25	0.78

Formulae for computation of ratios are as follows:

(a) Debt equity ratio = Total borrowings / (Unitholders' Equity+Retained Earnings)

(b) Debt Service Coverage Ratio= Earnings before Interest, tax and depreciation / (Interest Expense + Principal Repayments made during the period/year)*

(c) Interest Service Coverage Ratio= Earnings before Interest, tax and depreciation/ Interest Expense

(d) Asset cover ratio = (Property, plant and equipments + Right of use asset + Capital work in progress + Goodwill + Other intangible assets + Service concession receivable) / Total Borrowings

(e) Total debt to assets ratio = Total borrowings / total assets

(f) Net Worth = Unit Capital + Retained Earnings

(g) Distribution per unit = Total distribution / number of units

(h) EBITDA Margin = (Profit before tax + Interest + Depreciation and amortization - Finance income) / Revenue from contract with customers

(i) Net Profit Margin = Profit for the period / Revenue from contract with customers

(j) Current Ratio = Current Assets / current liabilities

*Debt Repayment made by refinancing of external debt has not been considered.

- B.2** The activities of IndiGrid Group include owning, operating and managing power transmission networks along with integrated battery energy storage systems and solar assets. Pursuant to a review of the internal reporting structure and in accordance with the principles of Ind AS 108 – “Operating Segments,” the management has revised the identification of reportable segments to align with the manner in which operating results are reviewed and resources are allocated by the Chief Operating Decision Maker (CODM). Accordingly, during the year ended 31 March 2026, the Group reclassified its reportable segments into (i) Power Transmission including Storage "Segment" and (ii) Power Generation "Segment". The BESS entities, which were previously disclosed as part of a separate Power Storage "Segment," are now included within the Power Transmission including Storage "Segment", as these assets are operationally integrated with the transmission infrastructure and are reviewed together with the transmission portfolio for performance assessment and decision-making purposes. Consequent to the above change, the segment information for the comparative periods has been restated to conform to the current period presentation, in accordance with Ind AS 108. The revised segmentation reflects the manner in which the CODM evaluates performance and allocates resources across the Group's portfolio.

B.4 Statement of Net Distributable Cash Flows (NDCFs) of IndiGrid Infrastructure Trust

Description	Quarter Ended			Year Ended
	30 June 2026	31 March 2026	30 June 2025	31 March 2026
	Unaudited	Audited	Unaudited	Audited
Cash flow from operating activities as per Cash Flow Statement	(310.19)	(81.43)	(63.74)	(196.91)
(+) Cash flows received from SPV's / Investment entities which represent distributions of NDCF computed as per relevant framework (refer note 1)	8,705.20	8,142.40	1,845.12	28,981.61
(+) Treasury income / income from investing activities of the Trust (interest income received from FD, any investment entities as defined in Regulation 18(5), tax refund, any other income in the nature of interest, profit on sale of Mutual funds, investments, assets etc., dividend income etc., excluding any Ind AS adjustments on a cash receipt basis)	78.63	159.86	138.15	488.55
(+) Proceeds from sale of infrastructure investments, infrastructure assets or shares of SPVs or Investment Entity adjusted for the following • Applicable capital gains and other taxes • Related debts settled or due to be settled from sale proceeds • Directly attributable transaction costs • Proceeds reinvested or planned to be reinvested as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations (refer note 2 and 3)	-	-	-	-
(+) Proceeds from sale of infrastructure investments, infrastructure assets or sale of shares of SPVs or Investment Entity not distributed pursuant to an earlier plan to re-invest as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations, if such proceeds are not intended to be invested subsequently	-	-	-	-
(-) Finance cost on Borrowings, excluding amortisation of any transaction costs as per Profit and Loss account of the Trust	(3,886.84)	(3,931.22)	(3,678.49)	(15,589.83)
(-) Debt repayment at Trust level (to include principal repayments as per scheduled EMI's except if refinanced through new debt including overdraft facilities and to exclude any debt repayments / debt refinanced through new debt in any form or funds raised through issuance of units)	-	-	-	-
(-) Any reserve required to be created under the terms of, or pursuant to the obligations arising in accordance with, any: (i). loan agreement entered with banks / financial institution from whom the Trust or any of its SPVs/ HoldCos have availed debt, or (ii). terms and conditions, covenants or any other stipulations applicable to debt securities issued by the Trust or any of its SPVs/ HoldCos, or (iii). terms and conditions, covenants or any other stipulations applicable to external commercial borrowings availed by the Trust or any of its SPVs/ HoldCos, (iv). agreement pursuant to which the SPV/ HoldCo operates or owns the infrastructure asset, or generates revenue or cashflows from such asset (such as, concession agreement, transmission services agreement, power purchase agreement, lease agreement, and any other agreement of a like nature, by whatever name called); or (v). statutory, judicial, regulatory, or governmental stipulations; or (refer note 4)	-	5.00	42.50	404.95
(-) Any capital expenditure on existing assets owned / leased by the InvIT, to the extent not funded by debt / equity or from contractual reserves created in the earlier years	(1.75)	(31.16)	(0.49)	(34.50)
NDCF (refer note 5)	4,585.05	4,263.45	(1,716.95)	14,053.87

Notes:

1. The following amounts has been included / excluded from the above -

A. This includes Rs. 381.41 million (net) received from SPV after the 30 June 2026 but before the board meeting date i.e. 12 August 2026.

B. This excludes Rs. 252.50 million (net) received from the SPV after 31 March 2026 but pertains to previous year.

C. This doesn't include loan given to SPVs that are under construction stage amounting to Rs 3,196.35 million given to fund the capital expenditure in the project.

2. During current period, the Trust transferred entire beneficial ownership of its subsidiary, Terralight Solar Energy Tinwari Private Limited ("TSETPL"), to Enerica Infra 1 Private Limited ("ENR 1"). As the proceeds from this transaction is reinvested / proposed to be reinvested in accordance with InvIT Regulations, no cash inflow is considered as part of NDCF.

3. During FY 2026, the Trust had transferred 49% of paid up equity capital of RSAPL, 100% paid up equity capital of KNTL and 100% paid up equity capital of GTL at the fair value at which it is acquired to IGL2 (within the Group). As the proceeds from this transaction is reinvested / proposed to be reinvested in accordance with InvIT Regulations, no cash inflow is considered as part of NDCF.

4. The amount represents the actual reserve created or released during the period. In accordance with Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated July 11, 2025, reserves created from debt funds at the time of availing financing shall not be reduced from April 1, 2025 onwards; accordingly, such reserves have been excluded from the current year's reserve movement

5. As per the master circular SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025, details of NDCF distributable is as below -

Description	Quarter Ended			Year Ended
	30 June 2026	31 March 2026	30 June 2025	31 March 2026
	Unaudited	Audited	Unaudited	Audited
NDCF of Trust (A)	4,585.05	4,263.45	(1,716.95)	14,053.87
(+) NDCF of Holdco, SPV's & Project Managers (B)	7,819.08	7,926.28	6,423.63	28,748.78
(-) Amount distributed by Holdco, SPV's & Project Managers (C)	(8,705.20)	(8,142.40)	(1,845.12)	(28,981.61)
Amount Of NDCF Distributable D=(A+B-C)*	3,698.93	4,047.33	2,861.56	13,821.04

*In accordance with the SEBI circular no. Master Circular No. SEBI/HO/DDHS-PoD-2/P/CIR/2025/102 dated 11 July 2025, 90% distribution under regulation 18(6) needs to be computed by taking together the 10% retention done at SPV level and Trust level. Accordingly, the Trust has ensured the same. In the period ended 30 June 2026, the Trust has distributed Rs 0.24 per unit (31 March 2026: 0.67 per unit) out of the 10% retention done for the earlier periods at Trust level.

Further, Trust along with its SPVs has ensured that the minimum 90% distribution of NDCF is met on a cumulative periodic basis as specified for mandatory distributions in the InvIT regulations.

8.4.1 Statement of Net Distributable Cash Flows (NDCF) of underlying Holdcos and SPVs

I IndiGrid Limited ("IGL") (Holdco and Project manager)

Description	Quarter Ended			Year Ended
	30 June 2026	31 March 2026	30 June 2025	31 March 2026
	Unaudited	Audited	Unaudited	Audited
Cash flow from operating activities as per Cash Flow Statement	(65.73)	(66.50)	87.34	(116.31)
Cash Flows received from SPV's which represent distributions of NDCF computed as per relevant framework	-	-	-	-
Treasury income / income from investing activities (interest income received from FD, tax refund, any other income in the nature of interest, profit on sale of Mutual funds, investments, assets etc., dividend income etc., excluding any Ind AS adjustments. (on receipt basis)	0.21	0.50	1.00	5.43
Proceeds from sale of infrastructure investments, infrastructure assets or shares of SPVs or Investment Entity adjusted for the following • Applicable capital gains and other taxes • Related debts settled or due to be settled from sale proceeds • Directly attributable transaction costs • Proceeds reinvested or planned to be reinvested as per Regulation 18(7) of InvIT Regulations or any other relevant provisions of the InvIT Regulations	-	(1.37)	0.01	(1.34)

B.5 Statement of Contingent liabilities

Particulars	As at	As at	As at
	30 June 2026	31 March 2026	30 June 2025
- Entry tax demand	432.59	432.59	432.59
- Goods and service tax demand	10.34	10.34	27.94
- Income tax demand	7.79	7.79	7.79
- Land Dispute Matters*	4.00	4.00	4.00
- Regulatory demand**	138.80	-	-
- Other Demands (including GST demands and ROW Claims)	323.28	323.28	323.28
Total***	916.80	778.00	795.60

*Land dispute related matters pertains to newly acquired entities RSAPL and KNTL.

**Regulatory Demand represents the levy of bilateral transmission charges raised by Central Transmission Utility of India Ltd. on RSAPL. CERC has disposed of the matter and held that RSAPL is liable to bear bilateral transmission charges for the concerned transmission system on a pro rata basis from the COD of the transmission line until the COD of the respective generation project. The Company has further filed an appeal before APTEL against the CERC order and the appeal is currently pending.

***The total contingent liability (except ROW claim of Rs. 110.62 million and GST claim of Rs. 212.66 million against ISPL 1 and ISPL 2, GST claim of Rs. 10.34 million and Income tax claim of Rs. 7.79 million) is recoverable as per share purchase agreement from Selling Shareholders. If GST demand of Rs. 212.66 million becomes payable, it would be eligible for additional tariff as per the PPA with regulatory authorities.

B.6 Statement of Commitments

(a) The Group has entered into transmission services agreement (TSA) with long term transmission customers pursuant to which the Group has to transmit power of contracted capacity and ensure minimum availability of transmission line over the period of the TSA. The TSA contains provision for disincentives and penalties in case of certain defaults.

(b) The Group has entered into Power Purchase Agreement ('PPA') with various DISCOM's for solar entities, where the respective solar entity is required to sell power at a pre-fixed tariff rates agreed as per PPA for an agreed period.

(c) The Group has taken office building on lease which has lease term of 5-9 years with lock-in-period of 3 years. In addition, the Group also holds certain land leases related to solar assets, which have variable lease term and lock in periods.

(d) The consortium of IGL2 and IGL1 has received Letters of Intent (LOIs) dated 29 December 2023, from REC Power Development and Consultancy Limited for the following two transmission projects: "Transmission Scheme for Evacuation of Power from Dhule 2 GW REZ" and "Western Region Expansion Scheme XXXIII (WRES-XXXIII): Part C". These projects are to be constructed over a period of 18 months. Ishanagar Power Transmission Limited and Dhule Power Transmission Limited were acquired on 09 February 2024, for the purpose of executing these projects. The projects are currently under construction and are expected to be completed by August 2026 and December 2026 respectively.

Further, IndiGrid, IGL1, IGL2, IPTL and DPTL have entered into definitive agreements with Techno Electric and Engineering Company Limited ("Techno") to co-develop the projects, with Techno investing as a minority equity partner and undertaking the entire project execution on a lump-sum turnkey (LSTK) basis.

(e) IGL2 has acquired Kallam Transco Limited ("KTCO") from REC Power Development and Consultancy Limited on 05 April 2024. KTCO was incorporated on 15 September 2023 for the construction of i) LLO of both circuits of Parli(M) Karjat(M)/Lonikand-II (M) 400 kV D/c line (twin moose) at Kallam PS ii) 400 kV line bays (AIS) – 4 Nos. (for Kallam PS end) iii) 63 MVAR, 420 kV switchable line reactor including Switching equipment - 2 Nos. (at Kallam end). The project is currently under construction expected to be completed by October 2026.

(f) IGL2 has received the Letter of Intent ("LOI") dated February 28, 2025, from REC Power Development and Consultancy Limited to establish Inter-State transmission system for "Transmission scheme for evacuation of power from Ratle HEP (850 MW) & Kiru HEP (624 MW): Part-A" on Build, Own, Operate and Transfer (BOOT) basis. Ratle Kiru Power Transmission Limited has been acquired from REC on 24 March 2025. The project is currently under construction expected to be completed by March 2027.

(g) IGL2 has received the Letter of Intent (LOI) / Letter of Award (LOA) dated 22 November 2024, from NTPC Vidyut Vyapar Nigam Limited ("NVVNL") for Setting up of a 250 MW / 500 MWh Standalone Battery Energy Storage System in Rajasthan for "on Demand" usage under Tariff-based Competitive under Bidding Build Own Operate ("BOO") model. The project is currently under construction expected to be completed by September 2026. Rajasthan BESS Private Limited has been incorporated on 03 December 2024 for this project.

(h) The Trust has executed the binding agreements with Techno Electric & Engineering Company Limited ("Techno") on 20 August 2025, for the acquisition of NERES XVI Power Transmission Limited ("Project"), in one or more tranches, post the Project achieving Commercial Operation Date ("COD") at an enterprise value not exceeding Rs. 4,600 million, subject to closing adjustments on acquisition date, in accordance with Transmission Service Agreement ("TSA") along with the lock-in restrictions therein.

(i) The Trust has executed a definitive agreement dated 25 August 2025, for the acquisition of a Battery Energy Storage System (BESS) project, i.e., setting up of 187.5 MW / 750 MWh standalone BESS in Uttar Pradesh with viability gap funding under tariff-based competitive bidding ("the Project"). The acquisition shall be undertaken, along with the Special Purpose Vehicle (SPV), i.e., Enerica Infra 3 Private Limited, from Enerica ReGrid Infra Private Limited (EnerGrid), post one year from achieving Commercial Operation Date (COD), at an enterprise value not exceeding INR 7,056 million, subject to closing adjustments on acquisition date, in line with the terms of the definitive agreements and the Battery Energy Storage Purchase Agreement (BESPA), and subject to compliance with InvIT Regulations.

(j) The Trust has executed definitive agreement dated 09 February 2026 for acquisition of Battery Energy Storage System (BESS) project i.e. Setting up of 125 MW / 500 MWh Standalone Battery Energy Storage Systems (BESS) in Uttar Pradesh with Viability Gap Funding under Tariff-Based Competitive Bidding ("the Project") from Enerica ReGrid Infra Private Limited (EnerGrid) and/or its affiliates, in one or more tranches, post one year after the Project achieves the Commercial Operation Date ("COD"), at an enterprise value not exceeding INR 9,570 million, subject to closing adjustments on acquisition date, in line with the terms of the definitive agreements and the Battery Energy Storage Purchase Agreement (BESPA), and subject to compliance with InvIT Regulations.

(k) IndiGrid Infrastructure Trust ("IndiGrid") has executed the definitive agreements on 12 February 2026, with Enerica Infra 1 Private Limited ("EIPL1"), a wholly-owned subsidiary of Enerica ReGrid Infra Private Limited ("EnerGrid"), for the acquisition of Morena I SEZ Transmission Limited ("Project or MSTL"), in one or more tranches, post one year after the Project achieves the Commercial Operation Date ("COD") at an enterprise value not exceeding INR 15,770 million, subject to closing adjustments on acquisition date, in accordance with Transmission Service Agreement ("TSA") along with the lock-in restrictions therein.

B.7 Statement of Earnings per unit:

Basic EPU amounts are calculated by dividing the profit for the period/year attributable to Unit holders by the weighted average number of units outstanding during the period/year.

Diluted EPU amounts are calculated by dividing the profit attributable to unit holders by the weighted average number of units outstanding during the period / year plus the weighted average number of units that would be issued on conversion of all the dilutive potential units into unit capital. The Group does not have any potentially dilutive units which would be added to Unit Capital.

The following reflects the profit and unit data used in the basic and diluted EPU computation:

Particulars	Quarter Ended			Year Ended
	30 June 2026	31 March 2026	30 June 2025	31 March 2026
	Unaudited	Audited	Unaudited	Audited
A. Including Regulatory deferral income/expense				
Profit after tax for calculating basic and diluted EPU attributable to unitholders	2,431.86	1,822.62	723.67	3,942.46
Weighted average number of units in calculating basic and diluted EPU (No. in million)	952.56	931.09	834.56	861.99
Earnings Per Unit (not annualised except for the year ended)				
Basic (Rs./unit)	2.55	1.96	0.87	4.57
Diluted (Rs./unit)	2.55	1.96	0.87	4.57
B. Excluding Regulatory deferral income/expense				
Profit after tax for calculating basic and diluted EPU attributable to unitholders	2,423.36	1,811.74	725.48	3,938.69
Weighted average number of units in calculating basic and diluted EPU (No. in million)	952.56	931.09	834.56	861.99
Earnings Per Unit (not annualised except for the year ended)				
Basic (Rs./unit)	2.54	1.95	0.87	4.57

Independent Auditor's Report on Security cover, Book Value of Assets and Compliance with Respect to Financial Covenants as at June 30, 2026 for submission to IDBI Trusteeship Services Limited (the 'Debenture Trustee')

The Board of Directors,
IndiGrid Investment Managers Limited
(As the Investment Manager of IndiGrid Infrastructure Trust)
Unit No 101, First Floor, Windsor Village,
Kole Kalyan Off CST Road, Vidyanagari Marg,
Santacruz (East),
Mumbai, Maharashtra - 400 098

1. This certificate is issued in accordance with the terms of our engagement letter dated July 22, 2026.
2. We, Deloitte Haskins & Sells Chartered Accountants LLP, Chartered Accountants (Firm's Registration Number 117364W/W-100739), the Statutory Auditors of IndiGrid Infrastructure Trust ("the "Trust"), have been requested by the Management of IndiGrid Investment Managers Limited ("the Investment Manager") to certify the accompanying Statement showing 'Annexure A - Security Cover as per the terms of Debenture Trust Deeds/Debenture Security Trust Deed, Compliance with financial covenants and book value of assets for secured redeemable listed non-convertible debenture securities as at June 30, 2026' (hereinafter referred to as the "Statement" or "Annexure A") in respect of Listed Debt Securities of the Trust as at June 30, 2026 and has been initialed by us for identification purpose only.

The Statement is prepared by the Investment Manager from the unaudited books of accounts and other relevant records and documents maintained by the Trust as at June 30, 2026 pursuant to requirements of Circular no. SEBI/HO/DDHS-PoD-1/P/CIR/2025/117 dated August 13, 2025 issued by Securities and Exchange Board of India in terms of regulation 54 read with regulation 56(1)(d) of Securities and Exchange Board of India (Listing Obligations and Disclosure Requirements) Regulations, 2015 and Regulation 15(1)(t) of Securities and Exchange Board of India (Debenture Trustees) Regulations, 1993 (hereinafter referred together as "the SEBI Regulations"), as amended, for the purpose of submission to IDBI Trusteeship Services Limited, Debenture Trustee of the above mentioned Listed Debt Securities (hereinafter referred to as "the Debenture Trustee") with whom the Trust has entered into agreements ("Debenture Trust Deeds"). The responsibility for compiling the information contained in the Statement is of the Management of the Investment Manager.

Management's Responsibility

3. The preparation of the Statement is the responsibility of the management of the Investment Manager, including the preparation and maintenance of all accounting and other relevant supporting records and documents. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the Statement and applying an appropriate basis of preparation; and making estimates that are reasonable in the circumstances.
4. The management of the Investment Manager is also responsible for ensuring that the Trust complies with all the relevant requirements of the SEBI Regulations and for providing all relevant information to the Debenture Trustees and for complying with all the covenants as prescribed in the terms of Debenture Trust Deed.

Auditor's Responsibility

5. Pursuant to the requirements of Circular no. SEBI/HO/DDHS-PoD-1/P/CIR/2025/117 dated August 13, 2025 issued by Securities and Exchange Board of India, our responsibility for the purpose of this certificate is to provide a limited assurance and to conclude as to whether:
 - a. the Trust has maintained hundred percent security cover as on June 30, 2026 as per the terms of Debenture Trust deeds.
 - b. the Trust is in compliance with the list of financial covenants as on June 30, 2026, as mentioned in respective Debenture Trust Deeds.
 - c. Book values of assets as included in the Statement are in agreement with the books of account underlying the unaudited separate financial statements of the Trust as at June 30, 2026.
6. The standalone and consolidated financial results of the Trust for the quarter ended June 30, 2026, have been reviewed by us on which we have issued an unmodified review report vide our report dated August 12, 2026. Our review of above-mentioned financial results was conducted in accordance with the Standard on Review Engagement (SRE) 2410 "Review Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the Institute of Chartered Accountants of India. This Standard requires that we plan and perform the review to obtain moderate assurance as to whether the results are free from material misstatement.
7. The engagement involves performing procedures to obtain sufficient appropriate evidence to provide limited assurance on the Statement as mentioned in paragraph 5 above. The procedures performed vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had a reasonable assurance engagement been performed.

Accordingly, we have performed the following procedures in relation to the statement:

- a. Obtained the Statement from the management.
- b. Verified that the information contained in the statement have been accurately extracted from the unaudited books of accounts of the Trust as at June 30, 2026 and other relevant records and documents maintained by the Trust deeds, in the normal course of its business.
- c. Verified the arithmetical accuracy of the information included in the statement.
- d. Reviewed the terms of Debenture Trust Deed to understand the nature of charge (viz. exclusive charge or pari-passu charge) on assets of the Trust and the requirement to maintain 100% security cover.
- e. Obtained and read the list of security cover in respect of secured redeemable listed non-convertible debentures outstanding as per Annexure A. The Trust has issued secured redeemable listed non-convertible debentures and have obtained term loans from banks / financial institutions against pledge of shares of its subsidiary companies/ special purpose vehicle entities and other current assets of the Trust on a pari passu basis. As the underlying pledge is made against shares of the subsidiary companies/ special purpose vehicle entities, the Trust has included the value of investments made in subsidiary companies and unsecured loans (including interest accrued) given to such companies as at June 30, 2026 under "ASSETS" in the Annexure A. We have traced the value of assets from the Statement to books of accounts and records of the Trust underlying the unaudited separate financial results for the period ended June 30, 2026.
- f. Obtained the list of security created by the Trust in the form of pari passu pledge of shares held in subsidiary companies / special purpose vehicle entities as specified in note A of Annexure A. Traced the details of % shares pledged by the Trust with the "Custody Letter" issued by IDBI Trusteeship Services Limited vide Ref. No. 3946/IT5L/ OPR/2026-27 dated July 24, 2026.
- g. Obtained Register of Charges maintained by the Trust.

- h. Obtained the copy of the valuation report from the independent valuer as at June 30, 2026 and traced the Enterprise Value appearing in the Statement from the said report.
- i. With respect to compliance with financial covenants included in the attached Statement, we have performed following procedures:
 - I. With respect to compliance with financial covenants for maintenance of debt service coverage ratio, the management has represented that the testing of this compliance is required to be done quarterly. The testing of this compliance was performed by the Trust and certified by P. Somani & Co. Chartered Accountants (FRN no. 130819W) as per certificate dated August 12, 2026 (UDIN 26135567NWFOQY4038) for June 2026 quarter. We have not performed any further procedures in this regard.
 - II. The management has represented that there are no other financial covenants required to be complied as at June 30, 2026 as per the Debenture Trust Deeds.
 - III. Compared the financial covenants referred above with the requirements stipulated in the Debenture Trust Deeds to verify whether such financial covenants are in compliance with the requirement of the Debenture Trust deeds.
 - IV. Obtained the unaudited separate financial results of the Trust for the quarter ended June 30, 2026 dated August 12, 2026 and verified the credit ratings given in the unaudited separate financial results from the websites of the respective rating agencies i.e., CRISIL, ICRA and India Ratings and Research, respectively. The credit ratings assigned to the Trust "CRISIL AAA/Stable" from CRISIL on 05 June 2026, "ICRA AAA/Stable" from ICRA on 27 May 2026 and "IND AAA/Stable" from India Ratings on 02 June 2026.
 - V. With respect to covenants other than those mentioned paragraph 7(i) above, the management has represented and confirmed that the Trust has complied with all other covenants including affirmative, informative, negative, and general covenants, as prescribed in the Debenture Trust Deeds, as at June 30, 2026. We have relied on the same and not performed any independent procedure in this regard.
 - VI. Made necessary inquiries with the management and obtained relevant representations in respect of matters relating to the Statement.
- 8. We conducted our examination and obtained the explanations in accordance with the Guidance Note on Reports or Certificates for Special Purposes issued by the Institute of Chartered Accountants of India (ICAI). This Guidance Note requires that we comply with the ethical requirements of the Code of Ethics issued by the Institute of Chartered Accountants of India.
- 9. We have complied with the relevant applicable requirements of the Standard on Quality Control (SQC) 1, Quality Control for Firms that Perform Audits and Review Historical Financial Information, and Other Assurance and Related Services Engagements.

Conclusion

- 10. Based on the procedures performed, as referred to in paragraph 7 above, and according to the information and explanations provided to us by the Management of the Investment manager read with notes to the Statement, nothing has come to our attention that causes us to believe:
 - a. The Trust has not maintained hundred percent security cover as per the terms of Debenture Trust deeds;
 - b. the Trust is not in compliance with the list of financial covenants as confirmed by the Debenture Trustee and mentioned in respective Debenture Trust Deeds as on June 30, 2026; and
 - c. Book values of assets as included in the Statement are not in agreement with books of accounts and records of the Trust underlying the board approved unaudited separate financial results for the year ended June 30, 2026.

Restriction on Use

11. This certificate is addressed to and provided to the Board of Directors of the Investment Manager solely for the purpose of submission to IDBI Trusteeship Services Limited (the Debenture Trustee) and should not be used by any other person or for any other purposes without our prior consent in writing. Accordingly, we do not accept or assume any liability or any duty of care for any other purpose or to any other person to whom this certificate is shown or into whose hands it may come without our prior consent in writing.

Note A

(i) The Trust has made investment in the following subsidiaries which are Intermediate Holdcos and Special Purpose Vehicle entities (SPV's) through equity shares, preference shares, compulsory-convertible debentures (CCD's), non-convertible debentures (NCD's), optionally convertible debentures and have also provided unsecured loans to all the Holdcos including subsidiaries. For the purpose of the investment in these entities, the Trust has obtained term loans from banks and also issued secured redeemable listed non convertible debentures (NCD's). The loans and NCDs obtained by the Trust have pari-passu charge over all the current assets and unsecured loans extended by the Trust to the subsidiaries. The shares of these subsidiaries have been pledged with the Debenture Trustee as per the respective pledge agreements. Accordingly, the book values of the investments along with the unsecured loans have been disclosed in "Column F" of "Annexure A" in proportion to the percentage of shares of the respective subsidiaries that have been pledged. (Refer table below in point (iii))

(ii) The purchase consideration paid to the Seller to acquire the subsidiaries pertains to the fair value of the transmission Special Purpose Vehicle entities and solar Special Purpose Vehicle entities as all such Special Purpose Vehicle entities are operational assets with tariff revenues agreed under the Transmission Services Agreements (TSAs) / Power Purchase Agreements (PPAs) except, for under construction assets. Accordingly, the amount disclosed in "Column M" of "Annexure A" pertains to the Enterprise values (EV) along with surplus cash and other liquid assets of the Special Purpose Vehicle entities proportionate to the percentage of shares of the respective subsidiaries that have been pledged based on valuation report obtained by the Trust dated August 12, 2026 issued by independent valuer appointed by the Trust, Mr. S Sundararaman (IBBI Registration No-IBBI/RV/06/2018/10238) issued under SEBI (Infrastructure Investment Trusts) Regulations, 2014 (Refer table below in point (iv)).

Notes

(a) Based on the custody letter issued by IDBI Trusteeship Services Limited vide letter Ref. No. 3946/ITSUOPR/2026-27 dated July 24, 2026.

(b) The Trust holds 74% of paid up equity share capital of PKTCL, and the balance 26% equity shares in PKTCL is held by Power Grid Corporation of India Limited ("PGCIL"). As per the pledge agreement and custody letter received from IDBI Trusteeship Services Limited (Debenture Trustee) dated July 24, 2026, 73% of the total paid up equity shares have been pledged by the Trust i.e. 98.65% of the shares held by the Trust have been pledged. Accordingly, for the purpose of calculating book value to be disclosed in Column F of Annexure A, the investment in equity share capital have been considered in proportion to the percentage of equity shares of PKTCL (98.65%) that have been pledged by the Trust. Further enterprise value and cash

Further, for the purpose of calculating market value to be disclosed in "Column M" of "Annexure A", the Enterprise Value and Surplus cash / bank and mutual funds/ fixed deposit as at June 30, 2026 of PKTCL have been considered in proportion to the percentage of equity shares (74%) held by the Trust.

(c) The Trust holds 66.06% of paid up equity share capital of TSESPL, and the balance 33.94% equity shares in TSESPL is held by Focal Photovoltaic India Private Limited and Focal Renewable Energy Two India Private Limited. As per the pledge agreement and custody letter received from IDBI Trusteeship Services Limited (Debenture Trustee) dated July 24, 2026, 65% of the total paid up equity shares have been pledged by the Trust i.e. 98.40% of the shares held by the Trust have been pledged. Accordingly, for the purpose of calculating book value to be disclosed in Column F of Annexure A, the investment in equity share capital have been considered in proportion to the percentage of equity shares of TSESPL (98.40%) that have been pledged by the Trust.

Further, for the purpose of calculating market value to be disclosed in "Column M" of "Annexure A", the Enterprise Value and Surplus cash / bank and mutual funds/ fixed deposit as at June 30, 2026 of TSESPL have been considered in proportion to the percentage of equity shares (66.06%) that have been held by the Trust.

(d) Subsidiaries having no closing book value as of June 30, 2026, are fully impaired in the financial statements.

(e) The Trust has invested in Non-Convertible Debentures (NCDs) of IndiGrid Limited and Optionally Convertible Debentures (OCDs) of KNTL, GTL, and GBPL, against which hypothecation has been created in favour of lenders.

Note B

The amount shown in "Column C" and "Column L" of "Annexure A" refers to fixed deposits kept in Debt Service Reserve Account (DSRA) and Interest Service Reserve Account (ISRA) on which there is an exclusive charge in accordance with the respective Debenture Trust Deeds.

Note C

The amount shown in "Column F" and "Column N" of "Annexure A" refers to current assets of the Trust as at June 30, 2026 on which there is pari-passu charge in accordance with the respective Debenture Trust Deeds.

Note D

The liabilities disclosed in "Annexure A" pertains towards liabilities of secured redeemable listed non convertible debentures, term loan from banks and interest accrued thereon and management has not considered to disclose all other liabilities. Accordingly, liabilities other than secured redeemable listed non convertible debentures, term loan from banks and interest accrued thereon of the Trust as at June 30, 2026 have not been disclosed in "Annexure A".

Sub: Fair Enterprise Valuation of InvIT assets as per SEBI (Infrastructure Investment Trusts) Regulations, 2014, as amended ("the SEBI InvIT Regulations") as at 30th June 2026

Dear Sir(s)/ Madam(s),

I, Mr. S. Sundararaman ("**Registered Valuer**" or "**RV**" or "**I**" or "**My**" or "**Me**") bearing IBBI registration number IBBI/RV/06/2018/10238, have been appointed vide letter dated 16th June 2026 (EL Ref No:RV/SSR/26-27/JN/06), as an independent valuer, as defined as per Regulation 2(zzf) of the SEBI InvIT Regulations, by **IndiGrid Investment Managers Limited** ("**IIML**" or "**the Investment Manager**") acting as the Investment Manager for **IndiGrid Infrastructure Trust** ("**the Trust**" or "**InvIT**") and **Axis Trustee Services Limited** ("**the Trustee**") acting on behalf of the Trust for the purpose of the financial valuation of the projects (defined below and hereinafter together referred as "**the SPVs**") of the Trust as per the requirements of the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended ("**SEBI InvIT Regulations**").

The Trust operates and maintains the following special purpose vehicles which are to be valued as per Regulation 21 read with Chapter V of the SEBI InvIT Regulations:

I. Transmission & BESS Assets:

40	ReNew Surya Aayan Pvt Ltd	RSAPL	43	RSAPL	BOOM

(Herein after all the above 40 SPVs are together referred to as the “**the SPVs**” and all the 43 projects mentioned above are together referred to as “**the Projects**”)

*The Scheme of Amalgamation of Globus, ISPL-1, and ISPL-2 with GGEL, pursuant to the provisions of Sections 230 to 232 of the Companies Act, 2013 and Section 2(1B) of the Income Tax Act 2025, is given effect with effect from 23rd March 2026 as the necessary approvals from the ROC are obtained.

These SPVs were acquired by the Trust and are to be valued as per Regulation 21(5) contained in the Chapter V of the SEBI InvIT Regulations.

As per Regulation 21(5) of Chapter V of the SEBI InvIT Regulations:

“A half yearly valuation of the assets of the InvIT shall be conducted by the valuer for the half-year ending September 30th for a publicly offered InvIT for incorporating any key changes in the previous six months and such half yearly valuation report shall be submitted by the Investment Manager to the designated stock exchange(s) along with the quarterly financial results for quarter ending 30th September.

If the consolidated borrowings and deferred payments of an InvIT, in terms of regulation 20 of these regulations, exceeds forty nine per cent.; a quarterly valuation of the assets of InvIT shall be conducted by the valuer as at the end of the quarters ending June, September and December for incorporating any key changes from the previous quarter and such quarterly valuation report shall be submitted by the investment manager to the designated stock exchange(s) along with the quarterly financial results of the corresponding quarter.”

I understand from the Investment Manager that Debt to AUM of Indigrid Infrastructure Trust as at 31st March 2026 was 57.60%. In this regard, the Investment Manager and the Trustee intends to undertake the fair enterprise valuation of the Projects as on 30th June 2026 (“**Valuation Date**”). I am enclosing the Valuation Report (“**Report**”) providing opinion on the fair enterprise value of the Projects on a going concern basis as at 30th June 2026 (“**Valuation Date**”).

Enterprise Value (“**EV**”) is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash or cash equivalents to meet those liabilities. The attached Report details the valuation methodologies used, calculations performed and the conclusion reached with respect to this valuation.

I have relied on explanations and information provided by the Investment Manager. Although, I have reviewed such data for consistency, those are not independently investigated or otherwise verified. My team and I have no present or planned future interest in the Trust, the SPVs or the Investment Manager except to the extent of this appointment as an independent valuer and the fee for this Report which is not contingent upon the values reported herein. The valuation analysis should not be construed as investment advice, specifically, I do not express any opinion on the suitability or otherwise of entering into any financial or other transaction with the Trust.

The analysis must be considered as a whole. Selecting portions of any analysis or the factors that are considered in this Report, without considering all factors and analysis together could create a misleading view of the process underlying the valuation conclusions. The preparation of a valuation is a complex process and is not necessarily

susceptible to partial analysis or summary description. Any attempt to do so could lead to undue emphasis on any particular factor or analysis.

The information provided to me by the Investment Manager in relation to the SPVs included but not limited to historical financial statements, forecasts/projections, other statements and assumptions about future matters like forward-looking financial information prepared by the Investment Manager. The forecasts and projections as supplied to me are based upon assumptions about events and circumstances which are yet to occur. I have not tested individual assumptions or attempted to substantiate the veracity or integrity of such assumptions in relation to the forward-looking financial information, however, I have made sufficient enquiry to satisfy myself that such information has been prepared on a reasonable basis.

Notwithstanding anything above, I cannot provide any assurance that the forward looking financial information will be representative of the results which will actually be achieved during the cash flow forecast period.

The valuation provided by me and the valuation conclusion are included herein and the Report complies with the SEBI InvIT Regulations and guidelines, circular or notification issued by SEBI thereunder.

Please note that all comments in the Report must be read in conjunction with the caveats to the Report, which are contained in Section 11 of this Report. This letter, the Report and the summary of valuation included herein can be provided to Trust's advisors and may be made available for the inspection to the public and with the SEBI, the stock exchanges and any other regulatory and supervisory authority, as may be required.

I draw your attention to the limitation of liability clauses in Section 11 of this Report.

This letter should be read in conjunction with the attached Report.

Yours faithfully,

S. Sundararaman

1. Executive Summary

Background

1.1. The Trust

IndiGrid Infrastructure Trust ("IndiGrid" or "Trust") was set up on 21st October 2016, as an irrevocable trust pursuant to the trust deed under the provisions of the Indian Trusts Act, 1882 and was registered with SEBI as an InvIT on 28th November 2016, under Regulation 3(1) of the InvIT Regulations.

IndiGrid is India's first infrastructure investment trust ("InvIT") in the power sector. It owns and acquires power transmission assets (overhead transmission lines, substations and battery storage assets) & solar assets. Today, it owns 23 power transmission projects with transmission lines of more than 9,000 kms, 15 substations with 22,550 MVA transformation capacity, along with 3 battery energy storage system projects with 900 MWh battery energy storage capacity and 17 solar generation projects with 1,091 MW DC of solar generation capacity.

The units of the Trust are listed on the National Stock Exchange of India Limited and BSE Limited since 6th June 2017.

Unit holding pattern of the Trust as on 30th June 2026 is as under:

Particulars	No. of Units	%
Sponsor	10,051,932	1.06%
Body Corporate	552,825	0.06%
<i>Institutional investors</i>		
Insurance Companies	129,748,540	13.62%
Financial Institutions/ Banks	9,117,038	0.96%
Mutual Funds	42,891,990	4.50%
Provident or pension funds	34,908,010	3.66%
Alternative Investment Fund	9,542,942	1.00%
Foreign Portfolio Investors	253,500,912	26.61%
<i>Non- institutional investors</i>	462,250,530	48.53%
Total	952,564,719	100.00%

1.2. The Sponsor

The Trust is currently sponsored by Esoteric II Pte. Ltd., an affiliate of KKR & Co. Inc. ("Esoteric"). IndiGrid was originally sponsored by Sterlite Power Grid Venture Limited (now merged with Sterlite Electric Limited) as an irrevocable trust pursuant to the Trust Deed, under the provisions of the Indian Trusts Act, 1882.

SEBI has granted its approval for de-classification of Sterlite Electric Limited ("SEL") (formerly known as Sterlite Power Transmission Limited) as a Sponsor of IndiGrid Infrastructure Trust ("IndiGrid") vide its letter dated July 6, 2023. Accordingly, SEL has been de-classified as a Sponsor of IndiGrid with effect from July 6, 2023.

In the annual meeting of Trust held on 28th September 2020, the unitholders approved induction of Esoteric II Pte. Ltd., an affiliate of KKR & Co. Inc. ("Esoteric"), as a sponsor.

Esoteric is an affiliate of KKR & Co. Inc. KKR & Co. Inc. was founded in 1976 and is a leading global investment firm. KKR & Co. Inc. sponsors investment funds that invest in multiple alternative asset classes, including private equity, credit and real assets, with strategic partners that manage hedge funds.

Shareholding Pattern of Sponsor as on 30th June 2026:

Sr. No.	Name of Shareholder	No of Units	%
1	KKR Ingrid Co-Invest L.P.	2,28,50,459	62.89%
2	KKR PIP Investments L.P	10,59,588	2.92%
3	Esoteric I Pte. Ltd.	1,24,26,836	34.20%
	Total	3,63,36,883	100.00%

Source: Investment Manager

1.3. Investment Manager

IndiGrid Investment Managers Limited (formerly known as Sterlite Investment Managers Limited) (“**the Investment Manager**” or “**IIML**”) has been appointed as the investment manager to the Trust by Axis Trustee Services Limited (“**the Trustee**”) and is responsible to carry out the duties of such a person as mentioned under SEBI InvIT Regulations.

Shareholding of the Investment Manager as on 30th June 2026 is as under:

Sr. No.	Name of Shareholder	%
1	Electron IM Pte. Ltd. (KKR affiliate entity)	100.00%
Total		100.00%

Source: Investment Manager

1.4. Project Manager

The Investment Manager has entered into a Project Implementation and Management Agreement (PIMA) with IndiGrid Limited (IGL), appointing IGL as the Project Manager for all Transmission (excluding BESS Projects) and Solar SPVs on June 30, 2021 and July 13, 2021 respectively.

Shareholding of the Project Manager as on 30th June 2026 is as under:

Sr. No.	Name of Shareholder	%
1	IndiGrid Infrastructure Trust	100.00%
Total		100.00%

Source: Investment Manager

The Investment Manager has executed a separate Project Implementation and Management Agreement (PIMA) on 9th February 2026, with Enerica Infra 4 Private Limited designating it as the Project Manager of BESS Projects.

Shareholding of the Project Manager as on 30th June 2026 is as under:

Sr. No.	Name of Shareholder	%
1	IndiGrid 2 Private Limited	74.00%*
2	Enerica Infra 4 Private Limited	26.00%
Total		100.00%

*IndiGrid 2 Private Limited owns 100% interest in Enerica Infra 4 Private Limited.

* The Scheme of Amalgamation of Globus, ISPL-1, and ISPL-2 with GGEL, pursuant to the provisions of Sections 230 to 232 of the Companies Act, 2013 and Section 2(1B) of the Income Tax Act 2025, is given effect with effect from 23rd March 2026 as the necessary approvals from the ROC are obtained.

1.6. Purpose of Valuation

As per Regulation 21(5) of Chapter V of the SEBI InvIT Regulations:

"A half yearly valuation of the assets of the InvIT shall be conducted by the valuer [as at the end of] the half-year ending September 30th for a publicly offered InvIT for incorporating any key changes in the previous six months and such half yearly valuation report shall be [submitted by the investment manager to the designated stock exchange(s) along with the quarterly financial results for the quarter ending September 30th.]

If the consolidated borrowings and deferred payments of an InvIT, in terms of regulation 20 of these regulations, exceeds forty nine per cent.; a quarterly valuation of the assets of InvIT shall be conducted by the valuer as at the end of the quarters ending June, September and December for incorporating any key changes from the previous quarter and such quarterly valuation report shall be submitted by the investment manager to the designated stock exchange(s) along with the quarterly financial results of the corresponding quarter:

I understand from the Investment Manager that Debt to AUM of IndiGrid as at 31st March 2026 was 57.60%. In this regard, the Investment Manager and the Trustee intends to undertake the fair enterprise valuation of the Projects as on 30th June 2026 for incorporating any key changes from the period ended 31st March 2026 till 30th June 2026.

In this regard, the Investment Manager and the Trustee have appointed Mr. S. Sundararaman ("**Registered Valuer**" or "**RV**" or "**I**" or "**My**" or "**Me**") bearing IBBI registration number IBBI/RV/06/2018/10238 to undertake the fair valuation at the enterprise level of the Projects as per the SEBI InvIT Regulations as on 30th June 2026. Enterprise Value ("**EV**") is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash and cash equivalents to meet those liabilities.

I declare that:

- I am competent to undertake the financial valuation in terms of the SEBI InvIT Regulations;
- I am not an associate of the sponsor(s) or Investment Manager or Trustee and I have not less than five years of experience in valuation of infrastructure assets;
- I am independent and has prepared the Valuation Report ("the Report") on a fair and unbiased basis.
- I have valued the Projects based on the valuation standards as specified / applicable as per SEBI InvIT Regulations.
- This Report covers all the disclosures required as per the SEBI InvIT Regulations and the valuation of the SPVs is impartial, true and fair and in compliance with the SEBI InvIT Regulations.

(Please refer appendix 11 for further information about myself)

Scope of Valuation

i. **Financial Asset to be Valued:**

The RV has been mandated by the Investment Manager to arrive at the Enterprise Value of the Projects. Enterprise Value is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash or cash equivalents to meet those liabilities.

ii. **Valuation Bases:**

Valuation base means the indication of the type of value being used in an engagement. In the present case, I have determined the fair value of the Projects at the enterprise level. Fair Value Bases defined as under:

Fair Value:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the valuation date. It is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. Fair value or Market value is usually synonymous to each other except in certain circumstances where characteristics of an asset translate into a special asset value for the party(ies) involved.

iii. **Valuation Date:**

Valuation Date is the specific date at which the value of the assets to be valued gets estimated or measured. Valuation is time specific and can change with the passage of time due to changes in the condition of the asset to be valued. Accordingly, valuation of an asset as at a particular date can be different from other date(s).

The valuation date considered for the fair enterprise valuation of the Projects is 30th June 2026 (“**Valuation Date**”). The attached Report is drawn up by reference to accounting and financial information as on 30th June 2026. The RV is not aware of any other events having occurred since 30th June 2026 till date of this Report which he deems to be significant for his valuation analysis.

iv. **Premise of Value:**

Premise of Value refers to the conditions and circumstances about how an asset is deployed. In the present case, I have determined the fair enterprise value of the Projects on a Going Concern Value defined as under:

Going Concern Value:

Going concern value is the value of a business enterprise that is expected to continue to operate in the future. The intangible elements of Going Concern Value result from factors such as having a trained work force, an operational plant, the necessary licenses, systems, and procedures in place etc.

<<This space is intentionally left blank>>

1.7. Summary of Valuation

I have assessed the fair enterprise value of each of the Projects on a stand-alone basis by using the Discounted Cash Flow (“DCF”) method under the income approach and Net Assets Value (“NAV”) Method under Cost Approach. Following table summarizes my explanation on the usage or non usage of different valuation methods:

Valuation Approach	Valuation Methodology	Used	Remarks
Cost approach	Net Assets Value method	Yes	Transmission & BESS Assets: KTCO, DPTL, IPTL, RKPTL, and RBPL are currently under construction, with their expected COD after 3 to 24 months. Given this stage of development, the certainty of cash flows is relatively higher only post-COD or when the overall project progress reaches a materially significant level, making revenue generation reasonably certain. Hence in present case the above SPVs that are under construction as at valuation date are valued at NAV Method. The business of TL Sitamau Sub-Station is primarily for captive consumption, as a result the entire revenue is generated from the current SPVs of the InvIT. Hence, in such circumstances, more than the earnings the underlying asset is relatively of higher importance and I have considered NAV method as the primary method for valuation of this SPV.
		No	Solar Assets: NAV does not capture the future earning potential of the business. Since all the Solar assets have achieved COD, NAV method has not been considered for Solar Assets.
Income Approach	Discounted Cash Flows method	Yes	Transmission & BESS Assets: The revenues of the Transmission projects are defined for 35 years under the TSA (for ENICL the TSA period is only for 25 years) and revenue of BESS Projects are defined for 12-15 years under the BESPA. In such scenario, the true worth of its business would be reflected in its future earnings potential and therefore, DCF method under the income approach has been considered as an appropriate method for the present valuation exercise. For Transmission Assets, the terminal value is calculated based on the business potential for further growth beyond the explicit forecast period. The “constant growth model” is applied, which implies an expected constant level of growth for perpetuity in the cash flows over the last year of the forecast period. JKTPPL is based on DBFOT model in which case the asset is to be transferred at the end of 35 years and KBPL is based on BOOT model which is to be transferred at the end of 12 years, hence the terminal period value for JKTPPL and KBPL has been considered based on the value on account of cash flows from realization of working capital at the end of the tenure. GBPL is based on BOO model in which the ownership of the underlying asset (tangible assets) except the leasehold land shall remain with the SPV even after the expiry of BESPA term. The terminal period value (i.e. value on account of cash flows to be generated after the expiry of the period) has been considered based on the salvage value of the batteries, and realization of working capital at the end of the tenure. KTCO, DPTL, IPTL, RKPTL and RBPL are under construction assets and as explained above these SPVs are valued based on NAV method.
		No	Solar Assets: The tariff rates for Solar Assets are defined for 25 years under the PPA. In such scenario, the true worth of its business would be reflected in its future earnings potential and therefore, DCF Method under the income approach has been considered as an appropriate method for the present valuation exercise. The ownership of the underlying assets (tangible assets) except the leasehold land shall remain with the SPVs even after the expiry of PPA term. The terminal period value (i.e. value on account of cash flows to be generated after the expiry of the period) has been considered based on the salvage value of the plant & machinery, sale of freehold land and realization of working capital at the end of the tenure.
Market Approach	Market Price method	No	Currently, the equity shares of SPVs are not listed on any recognized stock exchange of India. Hence, I was unable to apply market price method.
	Comparable Companies multiples method	No	In the absence of any exactly comparable listed companies with characteristics and parameters similar to that of SPVs, I have not considered CCM method in the present case.
	Comparable Transactions multiples method	No	In the absence of adequate details about Comparable Transactions, I was unable to apply the CTM method.

Under the DCF Method, the Free Cash Flow to Firm (“FCFF”) has been used for the purpose of valuation of each of the SPVs. In order to arrive at the fair EV of the individual projects under the DCF Method or NAV Method, I have relied on the Unaudited provisional financial statements as at 30th June 2026 prepared in accordance with the Indian Accounting Standards (Ind AS) and the financial projections of the respective SPVs prepared by the Investment Manager as at the Valuation Date based on their best judgement. The discount rate considered for the respective SPVs for the purpose of this valuation exercise is based on the Weighted Average Cost of Capital (“WACC”) for each of the SPVs.

Based on the methodology and assumptions discussed further, RV has arrived at the fair enterprise value of the Projects as on the Valuation Date:

Total Fair Enterprise Value of Solar Assets (A)						68,479

Total Fair Enterprise Value:		INR Mn
Particulars		Fair EV
Total Fair Enterprise Value of Transmission & BESS Assets (A)		2,71,927
Total Fair Enterprise Value of Solar Assets (B)		68,479
Total Fair Enterprise Value (A+B)		3,40,406

Enterprise Value ("EV") is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash or cash equivalents to meet those liabilities.

¹Since these projects are valued as per Cost approach. Hence WACC is not applicable.

²For ENICL, I have considered separate WACC for explicit period and terminal period. The WACC for explicit period is 7.87% and the WACC for terminal period is 11.06%.

(Refer Appendix 1 & 2 for the detailed workings)

Further to above considering that present valuation exercise is based on the future financial performance and based on opinions on the future credit risk, cost of debt assumptions, etc., which represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, a particular event will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary from these estimates and variations may be material. Accordingly, a quantitative sensitivity analysis is considered on the following unobservable inputs.:

1. Weighted Average Cost of Capital (WACC) by increasing / decreasing it by 0.5%
2. Weighted Average Cost of Capital (WACC) by increasing / decreasing it by 1.0%
3. Total Expenses considered during the projected period by increasing / decreasing it by 20%
4. Terminal period value considered for the SPVs increasing / decreasing it by 20%

1. Fair Enterprise Valuation Range based on WACC parameter (0.5%)

1.8. KEY CHANGES DURING THE QUARTER ENDED 30th JUNE 2026:

Project Name	Observations
Merger Order received for GGEL	With effect from 23 rd March 2026, the SPVs, namely Globus, ISPL-1 and ISPL-2, have been amalgamated with GGEL in accordance with the Scheme of Amalgamation approved under Sections 230 to 232 of the Companies Act, 2013 and Section 2(1B) of the Income-tax Act, 1961. All requisite statutory and regulatory approvals, including those from the Registrar of Companies (RoC), have been duly obtained. The Company has also received the certified copy of the amalgamation order from the Hon'ble National Company Law Tribunal (NCLT), which has been duly filed with the RoC. Accordingly, the Scheme has become effective, and the amalgamation stands completed with effect from the aforesaid date.
TL Tinwari	During the quarter, TL Tinwari was sold to EnerGrid Group on 29 th June 2026 for the consideration of Rs. 814 Millions.
NRSS-II	The construction of NRSS-II was completed in April 2026, which is considered as the COD. This update has been incorporated based on the valuation exercise as of 30 th June 2026, and the asset has accordingly been valued using the DCF approach thereafter.
TL Nangla	During the quarter, the shares in TL Nangla held by IGL 2 were transferred to IndiGrid Infrastructure Trust, for a consideration of Rs. 5.05 Mn on 1 st June 2026.

1.9. Following are the Enterprise Values of the Projects during the previous Valuations:

2. Procedures adopted for current valuation exercise

2.1. I have performed the valuation analysis, to the extent applicable, in accordance with ICAI Valuation Standards 2018 ("IVS") issued by the Institute of Chartered Accountants of India.

2.2. In connection with this analysis, I have adopted the following procedures to carry out the valuation analysis:

- (i) Requested and received financial and qualitative information relating to the SPVs;
- (ii) Obtained and analyzed data available in public domain, as considered relevant by me;
- (iii) Discussions with the Investment Manager on:
 - Understanding of the business of the SPVs - business and fundamental factors that affect its earning-generating capacity including strengths, weaknesses, opportunities and threats analysis and historical and expected financial performance;
- (iv) Undertook industry analysis:
 - Research publicly available market data including economic factors and industry trends that may impact the valuation;
 - Analysis of key trends and valuation multiples of comparable companies/comparable transactions, if any, using proprietary databases subscribed by me;
- (v) Analysis of other publicly available information;
- (vi) Selection of valuation approach and valuation methodology/(ies), in accordance with IVS, as considered appropriate and relevant by me;
- (vii) Conducted Physical Site Visit of the following SPVs:

Solar SPVs: Globus, Solar Edge and TL Patlasi.

Transmission BESS SPVs: RTCL, KTL I, KTL II, KTL III, NRSS I , NRSS II, GPTL, KTCO and TL SitamaUSS.
- (viii) Determination of fair value of the EV of the SPVs on a going concern basis at the Valuation Date.

<<This space is intentionally left blank>>

3. Overview of InvIT and SPVs

3.1. The Trust

- 3.1.1. IndiGrid Infrastructure Trust ("IndiGrid" or "Trust") was set up on 21st October 2016, as an irrevocable trust pursuant to the trust deed under the provisions of the Indian Trusts Act, 1882, and was registered with SEBI as an InvIT on 28th November 2016, under Regulation 3(1) of the InvIT Regulations.
- 3.1.2. The units of the Trust are listed on the National Stock Exchange of India Limited and BSE Limited since 6th June 2017.
- 3.1.3. The InvIT owns 23 power transmission projects with transmission lines of more than 9,000 ckm, 15 substations with 22,550 MVA transformation capacity, and 17 solar generation projects with 1,096 MW DC of solar generation capacity along with 3 battery energy storage system projects.

[illegible]

3.2. Background of the Projects

(A) Transmission & BESS Assets:

1. Bhopal Dhule Transmission Company Limited (“BDTCL”)

- The BDTCL project was awarded to IndiGrid Limited (formerly known as Sterlite Grid 1 Limited) by the Ministry of Power on 31st January 2011 for a 35 year period from the scheduled commercial operation date on a BOOM basis. The expiry date of TSA shall be the date which is 35 years from the Scheduled Commercial Operation Date (“SCOD”) of the project.
- BDTCL operates six extra high voltage overhead transmission lines of 943 Ckms comprising four 765 kV single circuit lines of 890 Ckms and two 400 kV dual circuit lines of 53 Ckms. The single circuit lines comprise a 259 ckms line from Jabalpur to Bhopal in Madhya Pradesh, a 176 Ckms line from Bhopal to Indore in Madhya Pradesh, a 192 Ckms line from Aurangabad to Dhule in Maharashtra and a 263 Ckms line from Dhule (Maharashtra) to Vadodara (Gujarat). The double circuit lines consist of a 36 Ckms line within Dhule and a 17 Ckms line within Bhopal. In addition, the project includes two 3,000 MVA sub-stations, one each in Bhopal and Dhule. BDTCL facilitates the transfer of electricity from coal-fired power generation sources from the states of Odisha and Chhattisgarh to power load centers in India’s western and northern regions.
- Due to various Force Majeure and Change in Law events during the construction period which adversely affected and delayed the commissioning, BDTCL has been granted an increase in Annual Non Escalable Transmission charges by Appellate Tribunal for Electricity through order dated 20th October 2020 at the rate of 2.987%.
- Summary of project details of BDTCL are as follows:

Parameters	Details – BDTCL
Project Cost	INR 21,634 Mn
Total Length	945 ckms
Location of Assets	Madhya Pradesh, Maharashtra, Gujarat
SCOD as per TSA	31 st March 2014
Expiry Date of License	30 th March 2049
Concession period	35 years from SCOD
COD of last element of the SPV	13 th June 2015
Trust’s stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Jabalpur – Bhopal	259	9 Jun 2015	MP
Bhopal – Indore	176	19 Nov 2014	MP
Bhopal - Bhopal (MPPTCL)	17	12 Aug 2014	MP
Aurangabad -Dhule (IPTC)	192	5 Dec 2014	MH
Dhule (IPTC) – Vadodara	263	13 Jun 2015	MH,GJ
Dhule (IPTC) - Dhule (MSETCL)	36	6 Dec 2014	MH
Bhopal Substation	NA	30 Sep 2014	MP
Dhule Substation	NA	6 Dec 2014	MH

Source: Investment Manager

- The equity shareholding of BDTCL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Limited	6,00,000*	100%
	Total	6,00,000	100%

* Including shares held with nominees

Source: Investment Manager

- Operating Efficiency history of BDTCL:**

- My team has conducted physical site visit of the transmission assets of BDTCL on 4th October 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

2. Jabalpur Transmission Company Limited ("JTCL")

- The JTCL project was awarded to IndiGrid Limited (formerly known as Sterlite Grid 1 Limited) by the Ministry of Power on 19th January 2011 for a 35 year period from the scheduled commercial operation date on a BOOM basis. The expiry date of TSA shall be the date which is 35 years from the scheduled COD of the project.
- JTCL operates two extra high voltage overhead transmission lines of 994 Ckms in the states of Chhattisgarh and Madhya Pradesh comprising one 765 kV dual circuit line of 759 Ckms from Dharamjaygarh (Chhattisgarh) to Jabalpur (Madhya Pradesh) and one 765 kV single circuit Line of 235 Ckms from Jabalpur to Bina in Madhya Pradesh.
- JTCL alleviates transmission capacity bottlenecks and expands the reliability and stability of the power grid in western and northern India by providing open access to transmit power from the independent power projects in the east of India.

- Summary of project details of JTCL are as follows:

Parameters	Details – JTCL
Project Cost	INR 19,183 Mn
Total Length	994 ckms
Location of Assets	Chattisgarh, Madhya Pradesh
TSA signing Date	12 th November 2013
SCOD as per TSA	1 st March 2014
Concession period	35 years from SCOD
COD of the last element of the SPV	14 th September 2015
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Jabalpur – Dharamjaygarh	759	14 Sep 2015	CH, MP
Jabalpur-Bina	235	1 Jul 2015	MP

Source: Investment Manager

- The equity shareholding of JTCL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Limited*	5,50,000*	100%
	Total	5,50,000	100%

* Including shares held with nominees

Source: Investment Manager

- Operating Efficiency history of JTCL:

- My team has conducted physical site visit of the transmission assets of JTCL on 3th October 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to **31st March 2027** as part of the valuation exercise.

3. Maheshwaram Transmission Private Limited ("MTL")

- The MTL project was awarded to IndiGrid 2 Private Limited (formerly known as Sterlite Grid 3 Limited) by the Ministry of Power on 10th June 2015 for a 35 year period from the scheduled commercial operation date on BOOM basis. The expiry date of TSA shall be the date which is 35 years from the SCOD of the project. MTL will create a key component to enable Southern region to draw more power from North-East-West Grid and address the issue of power stability in Telangana region.
- The improved grid connectivity shall facilitate power procurement from the ISTS network to the beneficiary state Telangana to meet their electricity demands. The project is envisaged to provide grid connectivity for Maheshwaram 765/400 kV Pooling Substation and Nizamabad 765/400 kV Substation.
- Summary of project details of MTL are as follows:

Parameters	Details –MTL
Project Cost	INR 3,841 Mn
Total Length	474 ckms
Location of Assets	Telangana
TSA signing Date	18 th June 2015
SCOD as per TSA	1 st June 2018
Concession period	35 years from SCOD
COD of the last element of the SPV	14 th December 2017
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Maheshwaram (PG) – Mehboob Nagar	196	14 Dec 2017	TS
2 Nos. of 400 kV line bays at Mehboob Nagar S/S of TSTRANCO	NA	14 Dec 2017	TS
Nizamabad – Yeddumailaram	278	14 Oct 2017	TS
2 Nos. of 400kV line bays at Yeddumailaram (Shankarapali) SS of TSTRANCO	192	14 Oct 2017	TS

Source: Investment Manager

- The equity shareholding of MTL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Limited	2,30,300*	49%
2	IndiGrid 2 Private Limited	2,39,700*	51%
Total		4,70,000	100%

* Including shares held with nominees

Note: While 100% of the economic interest is held by IndiGrid or its affiliated entities, legal ownership (i.e., shareholding) is distributed among various holding entities.

Source: Investment Manager

- Operating Efficiency history of MTL:**

- My team has conducted physical site visit of the transmission assets of MTL on 27th February 2026 and 2nd March 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

4. RAPP Transmission Company Limited ("RTCL")

- The RTCL project was awarded to IndiGrid 1 Limited (formerly known as Sterlite Grid 2 Limited) by the Ministry of Power on 24th July 2013 for a 35 year period from the scheduled commercial operation date on a BOOM basis. The expiry date of TSA shall be the date which is 35 years from the scheduled COD of the project.
- The RTCL project transfers power from the atomic power plant near Kota in Rajasthan to Shujalpur in Madhya Pradesh to provide the path for the evacuation of electricity generated at RAPP-7 and 8. Its route length is 201 Kms. The network will act as an interregional link between the Northern and the Western region.
- RTCL alleviates transmission capacity bottlenecks and expands the reliability and stability of the power grid in western and northern India by providing open access to transmit power from the independent power projects in the west of India.
- Summary of project details of RTCL are as follows:

Parameters	Details –RTCL
Project Cost	INR 2,601 Mn
Total Length	403 ckms
Location of Assets	Rajasthan, Madhya Pradesh
TSA signing Date	24 th July 2013
SCOD as per TSA	1 st March 2016
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
RAPP- Shujalpur	403	1 Mar 2016	RJ, MP

Source: Investment Manager

- The equity shareholding of RTCL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Limited	35,30,621*	74%
2	IndiGrid 1 Limited	12,40,489*	26%
	Total	47,71,110	100%

* Including shares held with nominees

Note: While 100% of the economic interest is held by IndiGrid or its affiliated entities, the legal ownership (i.e., shareholding) is distributed among various holding entities.

Source: Investment Manager

- Operating Efficiency history of RTCL:**

- My team has conducted physical site visit of the transmission assets of RTCL on 31st July 2026. Refer below for the pictures of the plant site.

5. Purulia & Kharagpur Transmission Company Limited ("PKTCL")

- The PKTCL project was awarded to IndiGrid 1 Limited (formerly known as Sterlite Grid 2 Limited) by the Ministry of Power on 6th August 2013 for a 35 year period from the scheduled commercial operation date on BOOM basis. The expiry date of TSA shall be the date which is 35 years from the scheduled COD of the project.
- PKTCL project has been brought into existence, keeping in view the growing generation capacity in the eastern region. It was much needed to strengthen the interconnection of the state grids with regional grids to facilitate exchange of additional power between them. Its route length is 545 Ckms
- Summary of project details of PKTCL are as follows:

Parameters	Details –PKTCL
Project Cost	INR 4,405 Mn
Total Length	545 ckms
Location of Assets	Jharkhand, Odisha
TSA signing Date	24 th July 2013
SCOD as per TSA	11 th March 2016
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Kharagpur-Chaibasa	323	18 Jun 2016	WB, JH
Purulia- Ranchi	223	7 Jan 2017	WB, JH

Source: Investment Manager

- The equity shareholding of PKTCL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Limited	67,54,300*	100%
	Total	67,54,300	100%

* Including shares held with nominees

Source: Investment Manager

- Operating Efficiency history of PKTCL:

- My team has conducted physical site visit of the transmission assets of PKTCL on 2nd May 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

6. Patran Transmission Company Private Limited ("PTCL")

A. PTCL I

- The PTCL project located in Patran Village Nihal, Punjab was awarded to Techno Electric & Engineering Co. Ltd. by the Ministry of Power for a 35 year period from the scheduled commercial operation date on BOOM basis. The expiry date of TSA shall be the date which is 35 years from the scheduled COD of the project.
- The PTCL project's need arose because of the partial grid disturbance in the Patiala – Sangrur district of Punjab in July 2011. There were 5 substations of 220 kV in the vicinity and a need for 400 / 220 kV substation was felt to avoid the unbalanced loading. The 400/220 kV S/s at Patran would be connected to the grid by LILO of Patiala-Kaithal 400 kV D/C.
- Summary of project details of PTCL I are as follows:

Parameters	Details –PTCL I
Project Cost	INR 2,250 Mn
Total Length	10 ckms
Location of Assets	Punjab
TSA signing Date	24 th July 2013
SCOD as per TSA	11 th Nov 2016
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Patiala- Kaithal LILO	10	12 Nov 2016	PB
Patran Substation	NA	12 Nov 2016	PB

Source: Investment Manager

B. PTCL II

- PTCL was awarded a Letter of Award on November 28, 2022, for its extension project, which was commissioned on 29th December 2024. It is a part of the PTCL and is shown separately as it is an extension. The management anticipates that the revenue from this project will be realized on a Cost-Plus basis. Since the project began operations, financial projections have been considered for valuation basis Income Approach.
- Summary of project details of PTCL II are as follows:

Parameters	Details –PTCL II
Project Cost	INR 880 Mn
Location of Assets	Punjab
SCOD as per TSA	29th December, 2024
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Patran Substation	NA	NA	PB

Source: Investment Manager

- The equity shareholding of PTCL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastructure Trust	6,23,71,795*	100%
	Total	6,23,71,795	100%

* Including shares held with nominees

Source: Investment Manager

• **Operating Efficiency history of PTCL:**

- My team has conducted physical site visit of the transmission assets of PTCL-I on 3rd October 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

- My team has conducted physical site visit of the transmission assets of PTCL-II on 3rd October 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

7. NRSS XXIX Transmission Limited ("NRSS")

A. NRSS- I

- The NRSS project was awarded by the Ministry of Power on 2nd January 2014 for a 35 years period from the commercial operation date on a BOOM basis. The NRSS XXIX Transmission Limited project is expected to deliver over 2,000 MW of electricity from Punjab to the Kashmir Valley by strengthening the transmission system in these two states.
- The Jalandar-Samba 400 kV D/C transmission line was commissioned in June 2016. NRSS XXIX Transmission Limited commissioned the other two 400 kV double circuit transmission lines and one 400/220 kV GIS sub- station in September 2018. The SPV would operate and maintain these for a minimum tenure of 35 years.
- Summary of project details of NRSS I are as follows:

Parameters	Details –NRSS I
Project Cost	INR 28,200 Mn
Total Length	830 ckms/415 kms
Location of Assets	Punjab, Jammu & Kashmir
TSA signing Date	2 nd January 2014
SCOD as per TSA	05 th Aug 2018
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Jalandar- Samba	270	24 Jun 2016	PB, JK
Samba- Amargarh	546	2 Sept 2018	JK
Uri- Wagoora	14	2 Sept 2018	JK
Amargarh Substation	NA	2 Sept 2018	JK

Source: Investment Manager

- Operating Efficiency history of NRSS:

In FY 22, a force majeure event occurred in NRSS in Jan and Feb 2022, resulting in shutdown of 400kV Samba Amargarh Transmission line. Hence, I have not considered availability for the months of Jan and Feb 2022.

B. NRSS- II

- NRSS was awarded a Letter of Award on April 21, 2023, for its extension project, which was commissioned on 16th April 2026. It is a part of the NRSS and is shown separately as it is an extension. The management anticipates that the revenue from this project will be realized on a Cost-Plus basis. Since the project began operations, financial projections have been considered for valuation basis Income Approach.

- Summary of project details of NRSS- II are as follows:

Parameters	Details –NRSS II
Location of Assets	Amargarh Station
SCOD as per TSA	21 st January 2025
Expected SCOD*	16 th April 2026
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

	Total	3,35,19,144	100%

* Including shares held with nominees

Source: Investment Manager

- My team has conducted physical site visit of the transmission assets of NRSS on 7th April 2026. Refer below for the pictures of the plant site.

8. Odisha Generation Phase- II Transmission Limited (“OGPTL”)

- The OGPTL project was awarded to IndiGrid 2 Private Limited (formerly known as Sterlite Grid 3 Limited) by the Ministry of Power on 19th January 2011 for a 35 years period from the SCOD date on a BOOM basis.
- The OGPTL project is a part of Common Transmission System for Phase – II Generation Projects and Immediate Evacuation System for OPGC Projects in Odisha. The transmission lines will be part of the interstate transmission network providing additional evacuation up to 5,000 MW of electricity from Odisha-based plants that are seeking better access to power-consuming centers. The OPGC – Jharsuguda 400 kV D/C transmission line was commissioned in August 2017 and Jharsuguda – Raipur 765 kV D/C transmission line in April 2019. The SPV would operate and maintain these for a minimum tenure of 35 years.

- Summary of project details of OGPTL are as follows:

Parameters	Details – OGPTL
Project Cost	INR 12,200 Mn
Total Length	713 ckms /355 kms
Location of Assets	Odisha, Chattisgarh
TSA signing Date	17 th November 2015
SCOD as per TSA	8 th Aug 2019
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Jharsuguda-Raipur	610	6 Apr 2019	OD
OPGC-Jharsuguda	103	30 Aug 2017	OD

Source: Investment Manager

- The equity shareholding of OGPTL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited*	14,03,510*	100%
Total		14,03,510	100%

* Including shares held with nominees

Source: Investment Manager

- Operating Efficiency history of OGPTL:

- My team has conducted physical site visit of the transmission assets of OGPTL on 3rd October 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

9. East-North Interconnection Company Limited ("ENICL")

- The ENICL project was awarded to Sterlite Technologies Limited, by the Ministry of Power on 7th January 2010 for a period of 25 years from the date of issue of Transmission License by Central Electricity Regulatory Commission ("CERC") on a BOOM basis.
- ENICL is engaged in the establishment of two 400 KV Double Circuit transmission lines (with a total line length of 452 Km) that passes through the Indian states at Assam, West Bengal, and Bihar. Bongaigaon Silliguri Line, having the length of 219 kms passing through the states of Assam and West Bengal. Purnea Biharsharif Line with the length of 229 kms passes through the state of Bihar. As per the terms of TSA, ENICL would construct, operate and maintain these for a minimum tenure of 25 years
- Summary of project details of ENICL are as follows:

Parameters	Details – ENICL
Project Cost	INR 12,519 Mn
Total Length	896 ckms
Location of Assets	Assam, West Bengal and Bihar
TSA signing Date	August 2009
SCOD as per TSA	7th Jan 2013
Concession period	25 years from issue of transmission license
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Specifications	ckms	COD	Location	Contribution to Total Revenue
Bongaigaon-Silliguri	400 kV D/C	438	12 Nov 2014	AS,WB,BH	52%
Purnea-Biharsharif	400 kV D/C	458	16 Sep 2013	BH	48%

Source: Investment Manager

- Operating Efficiency history of ENICL:

- My team has conducted physical site visit of the transmission assets of ENICL on 28th March 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

- The equity shareholding of ENICL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastructure Trust	10,50,000*	100%
	Total	10,50,000	100%

**Including shares held with nominees
Source : Investment Manager*

10. Gurgaon Palwal Transmission Private Limited ("GPTL")

A. GPTL- I

- GPTL project was awarded to Sterlite Grid 4 Limited, a wholly owned subsidiary of SPGVL (now merged with SPTL), by the Ministry of Power for a period of 35 years from the Scheduled COD on a BOOM basis. GPTL was granted Transmission License by CERC on 29th September 2016. GPTL consists of three GIS substations, transmission lines and two bays to meet the rising power demand in Gurgaon and Palwal.
- GPTL consists of three gas-insulated substations (GIS) with a total transformation capacity of 3,000 MVA and ~273 circuit kilometers of 400 KV transmission lines, to enhance power transmission in the region. Due to change in law during the construction period, GPTL has been claiming an increase in Non Escalable Transmission charges at the rate of 1.52% from its Long-Term Transmission Customers. I have considered such an increase in Non Escalable Transmission charges based on representation by the Investment Manager
- Summary of project details of GPTL I are as follows:

Parameters	Details –GPTL I
Project Cost	INR 10,520 Mn
Total Length	273 ckms
Location of Assets	Haryana
TSA signing Date	9 th February 2016
SCOD as per TSA	13 th September 2019
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Aligarh-Prithala	99	6 Aug 2019	Haryana
Prithala-Kadarpur	58	7 Dec 2019	Haryana
Kadarpur-Sohna Road	21	21 Mar 2020	Haryana

Source: Investment Manager

Operating Efficiency history of GPTL:

B. GPTL- II

- GPTL was awarded an extension project under Cost plus mechanism as per order of Central Transmission Utility of India on 24th June 2022. It is a part of the GPTL and is shown separately as it is an extension.
- GPTL-II commenced operations on 05th November 2025. The management is yet to file the petition with regards to the revenue determination as per CERC regulations with CERC as on the valuation date. In the current valuation exercise, we have valued this project as per DCF method.

- Summary of project details of GPTL- II are as follows:

Parameters	Details –GPTL II
Location of Assets	Haryana
SCOD as per TSA	5 th November 2025
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following substations:

Sub-Station	Specifications	COD	Location
2*220 Kv Line bays (GIS) at 440/220 Kv Prithla (GPTL) S/s	2*220 kV line bays	1st April 2026	Haryana

Source: Investment Manager

- The equity shareholding of GPTL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastructure Trust	963,064*	84%
2	Sterlite Electric Limited	179,036	16%
Total		1,142,100	100%

* Including shares held with nominees

Note: While 100% of the economic interest is held by IndiGrid or its affiliated entities, the legal ownership (i.e., shareholding) is distributed among various holding entities.

Source: Investment Manager

- My team has conducted physical site visit of the transmission assets of GPTL on 24th July 2026. Refer below for the pictures of the plant site.

11. NER-II Transmission Limited (“NERTL”)

- The NERTL project was awarded to SGL 4, wholly owned subsidiary of SPGVL (now merged with SPTL), by the Ministry of Power for a period of 35 years from SCOD of NERTL on a BOOM basis. NERTL was granted Transmission License by CERC on 23rd May 2017. The project has 11 elements including two substations of ~1,260 MVA capacity and four transmission lines extending over ~898 circuit kilometers. The asset spans across the states of Assam, Arunachal Pradesh and Tripura.
- Due to change in law during the construction period, NERTL has been claiming an increase in Non Escalable Transmission charges through an order dated 19th May 2024 at the rate of 2.39%, from its Long Term Transmission Customers. I have considered such an increase in Non Escalable Transmission charges based on representation by the Investment Manager

- Summary of project details of NERTL are as follows:

Parameters	Details – NERTL
Project Cost	INR 30,649 Mn
Total Length	832 Ckms /449 kms
Location of Assets	Assam, Arunachal Pradesh, Tripura
TSA signing Date	26 th December 2016
SCOD as per TSA	31st March 2020 to 30th November 2020
Revised SCOD	31st August 2020 and 30th April 2021
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
BNC – Itanagar	136	6 Apr 2021	AS, AP
LILO of Biswanath Chariali (PG) – Itanagar	NA	6 Apr 2021	AP

1	IndiGrid Infrastructure Trust	23,22,420	100%
	Total	23,22,420	100%

Source: Investment Manager

- Operating Efficiency history of NERTL:

- My team has conducted physical site visit of the transmission assets of NERTL on 29th August 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

12. Raichur Sholapur Transmission Company Private Limited ("RSTCPL")

- RSTCPL was incorporated on 19th November 2009 to establish transmission system for evacuation of power from Krishnapattanam UMPP and other IPPS in southern region to beneficiaries in the western region of India. The SPV was responsible for the construction of one line of 765 KV between Raichur and Sholapur.
- As informed by the Investment Manager, based on the due diligence done, 3 towers of the transmission line of the SPV collapsed in the month of May 2019 due to heavy storms, due to which the availability for the months of June and July 2019 were affected. The deemed availability was granted to the SPV for the month of June 2019, but not for July 2019. The Investment Manager has informed that it was an exceptional one-time event and that they do not foresee any deficiency in the transmission assets of the SPV.
- Summary of project details of RSTCPL are as follows:

Parameters	Details – RSTCPL
Project Cost	INR 3200 Mn
Total Length	208 ckms
Location of Assets	Karnataka, Maharashtra
SCOD as per TSA	7 th Jan 2014
Concession period	35 years from SCOD
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Raichur-Solapur	208	4 Jul 2014	KN, MH

Source: Investment Manager

- The equity shareholding of RSTCPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastructure Trust	8,00,00,000*	100%
	Total	8,00,00,000	100%

* Including shares held with nominees

Source: Investment Manager

- Operating Efficiency history of RSTCPL:

- My team has conducted physical site visit of the transmission assets of RSTCPL on 4th October 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

13. Khargone Transmission Limited ("KhTL")

- KhTL was incorporated to establish transmission system for Transmission System Strengthening in WR associated with Khargone Thermal Power Plant of 1,320 MW (2×660MW) at Khargone in the state of Madhya Pradesh. The SPV was responsible for the construction of 4 transmission lines between Maharashtra and Southern region. The project will evacuate 1,320 MW of power generated by the Khargone Power Plant to 765 kV Khandwa substation to further distribute it downstream across Madhya Pradesh, Maharashtra, Chhattisgarh, Gujarat, Goa, Daman & Diu, and Dadra & Nagar Haveli.
- KhTL was incorporated on 28th November 2015 by REC Transmission Projects Company Limited. After successful completion of the bidding process for the project, the SPV was transferred to a Sterlite Grid 4 Limited vide share purchase agreement dated 22nd August 2016. Further, during FY 2021-22, Sterlite Grid 4 Limited was merged into its immediate holding company, i.e. Sterlite Power Transmission Limited.
- Due to change in law (GST impact) during the construction period, KhTL has been claiming an increase in Non Escalable Transmission charges at the rate of ~1.57% from its Long-Term Transmission Customers. I have considered such an increase in transmission charges based on the representation by the Investment Manager.

- Summary of project details of KhTL are as follows:

Parameters	Details – khTL
Project Cost	INR 16,630 Mn
Total Length	626 ckms
Location of Assets	Maharashtra
TSA signing Date	14 th March 2016
Line Voltage Class (Kv)	765 Kv / 400 kv
SCOD as per TSA	31st July 2019
Concession period	35 years from SCOD
Actual COD	13th December 2021
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Khandwa – Rajgarh (LILO)	13.57	March 2018	MP
Switchyard – Khandwa (Quad)	50.10	March 2020	MP
Khandwa Pool – Indore	180.08	March 2020	MP
Khandwa Pool – Dhule	382.66	December 2021	MH
Khandwa Substations		March 2020	MP
Khandwa Pool - Dhule Substations		December 2021	MH

Source: Investment Manager

- The equity shareholding of KhTL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastructure Trust	11,54,400*	74%
2	Sterlite Electric Limited	4,05,600	26%
Total		15,60,000	100%

* Including shares held with nominees

Note: While 100% of the economic interest is held by IndiGrid or its affiliated entities, the legal ownership (i.e., shareholding) is distributed among various holding entities.

Source: Investment Manager

- Operating Efficiency history of KhTL:

- My team has conducted physical site visit of the transmission assets of KhTL on 4th October 2025. Refer below for the pictures of the plant. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise

14. Jhajjar KT Transco Private Limited ("JKTPL")

- The JKTPL project was awarded on 28th May 2010 to a joint venture between Kalpataru Power Transmission Ltd and Techno Electric & Engineering Co. Ltd., by the Haryana Vidyut Prasaran Nigam Limited ("HVPNL") for a period of 25 years effective from the appointed date on a DBFOT basis. JKTPL was granted Transmission License by CERC on 26th October 2010. JKTPL consists of ~100 kms 400 KV Jhajjar – Kabalpur - Dipalpur transmission line and two substations with a transformation capacity of 830 MVA each in the state of Haryana. It spans over 205 ckms, while delivering from the 1,320 MW thermal power plant in Jhajjar to enhance power transmission in the region.

- Summary of project details of JKTPL are as follows:

Parameters	Details – JKTPL
Total Length	205 ckms
Location of Assets	Haryana
SCOD as per TSA	12th March 2012
Concession period	25 years from the issue of Transmission License, extendable for 10 years as per TSA
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Jharli (Jhajjar) to Kabulpur (Rohtak)	70	14 Dec 2017	Haryana
Kabulpur (Rohtak) to Dipalpur (Sonapat)	134	14 Dec 2017	Haryana
Abdullapur - Bawana at Dipalpur (Sonapat)	1	14 Oct 2017	Haryana
Kabulpur AIS Substation (Rohtak)	NA	14 Oct 2017	Haryana
Dipalpur AIS Substation (Sonapat)	NA		Haryana

Source: Investment Manager

- The equity shareholding of JKTPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastructure Trust	2,26,57,143*	100%
	Total	2,26,57,143	100%

* Including shares held with nominees

Source: Investment Manager

- Operating Efficiency history of JKTPL:

*The normative availability of JKTPL is 98% in the year 2025. But, as mentioned above in the report about the breakdown of transformer in FY25, the actual availability dropped down to 89.45% in FY25. The incentive loss for the same was reflected in the Financials of FY25.

- My team has conducted physical site visit of the transmission assets of JKTPL on 6th February 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise

Note: During the visit to JKTPL, a technical issue occurred, which resulted in the location not being captured in the one photograph taken by the team.

15. Parbati Koldam Transmission Company Limited ("PrKTCL")

- PrKTCL owns and operate 280 Km (458 circuit kms) of 400 kV transmission lines across Himachal Pradesh and Punjab. PrKTCL evacuate power from power plants situated in Himachal Pradesh, viz. 800MW Parbati – II and 520MW Parbati – III Hydro Electric Plant (HEP) of NHPC, 800 MW Koldam HEP project of NTPC and 100 MW Sainj HEP of HPPCL.
- PrKTCL was incorporated on 2nd September 2002 and promoted to undertake the construction and operation of transmission line in area of Punjab and Haryana on BOO basis. PrKTCL has been granted transmission license under section 14 of the Act. PrKTCL operate 458 ckm of 400 kV lines in the area of Punjab and Himachal Pradesh. The tariff of PrKTCL is determined under section 62 of the Act read with Central Electricity Regulatory Commission (Terms and Conditions of Tariff) Regulations, 2019. The transmission assets have been developed under a cost-plus tariff model which includes construction, maintenance and operation of transmission lines and evacuating power from power plants situated in Himachal Pradesh and Punjab, with total line length of ~458 Ckms.
- PrKTCL was awarded a Letter of Award on 16th February 2023, for its extension project i.e., PrKTCL-2. The revenue from this project will be realized on a Cost-Plus basis.

- Summary of project details of PrKTCL-1 are as follows:

Parameters	Details – PrKTCL 1
Project Cost	INR 9,354 Mn
Total Length	458 ckms
Location of Assets	Himachal Pradesh, Punjab
RSA signing Date	24 th December 2013
SCOD as per TSA	03rd November 2015
Concession period	35 Years
Trust's stake	74% economic ownership (Balance 26% stake held by PGCIL)

Source: Investment Managerz

- Summary of project details of PrKTCL-2 are as follows:

Parameters	Details – PrKTCL 2
Project Cost	INR 82.4 Mn
Total Length	150.642 kms
Location of Assets	Himachal Pradesh
RSA signing Date	24.12.2013
SCOD as per TSA	This is an RTM Project and COD approved by CERC is 07.12.2014
Concession period	The Life of Project as per Tariff Regulations is 35 Years from COD
Trust's stake	74% economic ownership (Balance 26% stake held by PGCIL)

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
Asset 1 – Koldam Ludhiana CKT I	150.64	7 Aug 2014	Punjab
Asset 2 – Koldam Ludhiana CKT II	150.64	14 Aug 2014	Punjab

- The equity shareholding of PrKTCL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastructure Trust	20,18,99,380*	74%
2	PowerGrid Corporation of India Limited	7,09,37,620	26%
Total		27,28,37,000	100%

* Including shares held with nominees

Source: Investment Manager

- Operating Efficiency history of PrKTCL:

- My team has conducted physical site visit of the transmission assets of PrKTCL on 4th April 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

16. Kallam Transmission Limited ("KTL")

A. KTL- I

- KTL-I consists of a LILO multi circuit line of ~18 kms. KTL I commenced its operations on 14th February 2024
- KTL-I consists of a LILO multi circuit line of ~18 kms. KTL I commenced its operations on 14th February 2024. This commencement date was revised in this quarter to 14th August 2024 in accordance with the Central Electricity Regulatory Commission (Sharing of Inter-State Transmission Charges and Losses) Regulations, 2023.
- KTL project will strengthen the transmission system in Maharashtra by improving the grid availability for evacuation & integration of renewable energy in the state. The project is situated in a low-risk plain topography. Its objective is to establish a transmission system for evacuation of power from renewable energy projects in Osmanabad area (1 GW) in Maharashtra.
- The KTL project was awarded to the consortium of IndiGrid 1 Limited and IndiGrid 2 Private Limited (wholly-owned subsidiaries of IndiGrid Infrastructure Trust), by REC Power Development and Consultancy Limited for a period of 35 years from COD of KTL on a BOOM basis through tariff based competitive bidding

- Summary of project details of KTL I are as follows:

Parameters	Details –KTL I
Project Cost	INR 2300 Mn
Total Length	~66 Ckms
Total Capacity (MVA)	1,260
Location of Assets	Maharashtra
TSA signing Date	30th September 2021
SCOD as per TSA	27th June 2023
Concession period	35 years from SCOD
COD	14th August 2024
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
LILO of both circuits of Parli (PG) – Pune (GIS) 400 kV D/c line at Kallam PS	33	30 Sep 2023	Maharashtra

Source: Investment Manager

- My team has conducted physical site visit of the transmission assets of KTL on 30th July 2026. Refer below for the pictures of the plant site.

B. KTL- II

- KTL-II consists of one substation of 2 x 500 MVA, 400/220 kV near Kallam and associated Bays. KTL-II has started operations on 4th January 2025. It is a part of KTL and is shown separately as it is an extension.

- Summary of project details of KTL- II are as follows:

Parameters	Details –KTL II
Project Cost	INR 1,841 Mn
Location of Assets	Maharashtra
SCOD as per TSA	4 th January 2025
Concession period	~35 years
Trust's stake	100% economic ownership

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	COD	Location
Establishment of 2x500 MVA, 400/220 kV substation near Kallam PS	Jan 2025	Maharashtra
1x125 MVAr bus reactor at Kallam PS 400 kV reactor bay – 1	Jan 2025	Maharashtra
New 50 MVAr switchable line reactor with 400 ohms NGR at Kallam PS end of Kallam – Pune (GIS) 400 kV D/c line	Jan 2025	Maharashtra

Source: Investment Manager

- My team has conducted physical site visit of the transmission assets of KTL on 30th July 2026. Refer below for the pictures of the plant site.

C. KTL- III

- KTL-III has commenced operations on 31st March 2025. It is a part of KTL and is shown separately as it is an extension. The management is yet to file the petition with regards to the revenue determination as per CERC regulations with CERC as on the valuation date. In the current valuation exercise, we have valued this project as per DCF method.
- KTL-III consists of 1 No. 400kV bay at Kallam PS interconnection of RE Project of Torrent Solar Power Private Limited (TSPPL)

- Summary of project details of KTL- III are as follows:

Parameters	Details –KTL III
Project Cost	INR 185 Mn
Total Length	NA
Total Capacity	400 kV
Location of Assets	Maharashtra
SCOD as per TSA	31 st March 2025
COD	31 st March 2025
Concession period	~35 years
Trust's stake	100% economic ownership

Source: Investment Manager

17. Kallam Transco Limited ("KTCO")

- The consortium of IndiGrid 2 Private Limited and IndiGrid 1 Limited (wholly-owned subsidiaries of IndiGrid Infrastructure Trust) ("the Consortium") has completed the acquisition of 100% paid-up capital and management control of Kallam Transco Limited from REC Power Development and Consultancy Limited on April 5, 2024. Kallam Transmission Limited was incorporated on 15th September 2023 for the augmentation of Kallam Pooling Station to enable evacuation beyond 2 GW at Kallam PS and a Line In Line Out (LILO) of a 400 kV double circuit line of approximately 20 kilometres.
- This project is under construction as at the time of Valuation Date.

- Summary of project details of KTCO are as follows:

Parameters	Details – KTCO
Project Cost	INR 1404 Mn
Total Length	60 ckms
Location of Assets	Maharashtra
TSA signing Date	05 th April 2024
SCOD as per TSA	05 th October 2025
Expected COD	30 th June 2026
Concession period	35 Years
Trust's stake	100% economic ownership
% of completion on Valuation Date	80-85%

Source: Investment Manager

- The project consists of the following transmission lines and substations:

- My team has conducted physical site visit of the transmission assets of KTCO on 30th July 2026. Refer below for the pictures of the plant site.

18. Dhule Power Transmission Limited ("DPTL")

- The consortium of IndiGrid 2 Private Limited and IndiGrid 1 Limited, wholly-owned subsidiaries of IndiGrid Infrastructure Trust, has completed the acquisition of 100% of the paid-up capital and management control of Ishanagar Power Transmission Limited (IPTL) and Dhule Power Transmission Limited (DPTL) from REC Power Development and Consultancy Limited on February 9, 2024.
- Dhule Power Transmission Limited (DPTL), incorporated on June 8, 2023, for establishment of a 400/220 kV pooling station with a 4x500 MVA capacity and a 400 kV double circuit line extending approximately 70 kilometers.
- This project was under construction as at the time of Valuation Date.

- Summary of project details of DPTL are as follows:

Parameters	Details – DPTL
Project Cost	INR 5,350 Mn
Total Length	140 ckms
Location of Assets	Maharashtra
TSA signing Date	23 rd January 2024
SCOD as per TSA	February, 2026
Expected SCOD	31 st July 2026
Concession period	35 years
Trust's stake	100% economic ownership
% of completion on Valuation Date	75-80%

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location

19. Ishanagar Power Transmission Limited ("IPTL")

- The consortium of IndiGrid 2 Private Limited and IndiGrid 1 Limited, wholly-owned subsidiaries of IndiGrid Infrastructure Trust, has completed the acquisition of 100% of the paid-up capital and management control of Ishanagar Power Transmission Limited (IPTL) and Dhule Power Transmission Limited (DPTL) from REC Power Development and Consultancy Limited on February 9, 2024.
- Ishanagar Power Transmission Limited (IPTL), incorporated on June 9, 2023, was established for development of a substation in Madhya Pradesh. The substation is designed to operate at two voltage levels: 765/400 kV and 400/220 kV. Additionally, the project includes a Loop-In Loop-Out (LILO) of a single circuit of the 765 kV double circuit line, extending approximately 18 kms.
- This project was under construction at the time of Valuation Date.

Summary of project details of IPTL are as follows:

Parameters	Details – IPTL
Project Cost	INR 6,500 Mn
Total Length	36 ckms
Location of Assets	Madhya Pradesh
TSA signing Date	23 rd January 2024
SCOD as per TSA	February, 2026
Expected SCOD	30 th June, 2026
Concession period	35 years
Trust's stake	100% economic ownership
% of completion as on Valuation Date	80-85%

Source: Investment Manager

- My team has conducted physical site visit of the transmission assets of IPTL on 4th May 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

20. Ratle Kiru Power Transmission Limited ("RKPTL")

- IndiGrid 2 Private Limited (wholly owned subsidiary of IndiGrid Infrastructure Trust) has received the Letter of Intent ("LOI") dated February 28, 2025, from REC Power Development and Consultancy Limited to establish Inter-State transmission system for "Transmission scheme for evacuation of power from Ratle HEP (850 MW) & Kiru HEP (624 MW): Part-A" on Build, Own, Operate and Transfer (BOOT) basis.
- The project will be constructed over a period of ~24 months and will have annual transmission charges worth ~INR 1952.32 million post commissioning.
- IndiGrid 2 Private Limited (wholly-owned subsidiary of IndiGrid Infrastructure Trust) has completed the acquisition of 100% paid-up capital and management control of Ratle Kiru Power Transmission Limited ("RKPTL") from REC Power Development and Consultancy Limited ("REC") on March 24, 2025.
- Summary of project details of RKPTL are as follows:

Parameters	Details – RKPTL
Project Cost	INR 14,699 Mn
Total Length	177 ckm
Location of Assets	Jammu and Kashmir
TSA signing Date	24 th March 2025
SCOD as per TSA	31 st March 2027
Expected SCOD	23 rd March 2027
Concession period	35 years
Trust's stake	100% Economic Ownership
% of completion as on Valuation Date	25-30%

Source: Investment Manager

- The project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	ckms	COD	Location
ISTS 850 MW	~177	NA	J&K
ISTS 624 MW			

Source: Investment Manager

- The equity shareholding of RKPTL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	50,000*	100%
Total		50,000	100%

* Including shares held with nominees

Source: Investment Manager

- The outstanding Optionally Convertible Debentures (OCDs) issued by RKPTL as of the Report Date are as follows:
The OCDs have been issued based on the terms and conditions agreed upon between the respective parties, i.e., RKPTL, BII and KNI.

INR Mn			
Sr. No.	OCDs issued to	Coupon Rate	Amount Outstanding
1	BII	37.70%	544.33
2	KNI	37.70%	544.33
			1,088.66

Source: Investment Manager

- My team has conducted physical site visit of the transmission assets of RKPTL on 8th April 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

21. Terralight Solar Energy SitamauSS Private Limited ("TL SitamauSS")

- TL SitamauSS is engaged in the business of providing transmission and step-up services to its shareholder companies. The services provided by TL SitamauSS are essential and integral to the functioning of the solar plants owned by these shareholder companies. TL SitamauSS serves as an interconnection between the electricity delivery point and the electricity generating plant.
- Considering the SPV's nature of being used for captive consumption and functioning solely as a cost center without generating any revenue, the Investment Manager has decided not to value the same as per DCF approach for the current valuation exercise.

- Summary of project details of TL SitamauSS are as follows:

Parameters	Details – TL SitamauSS
Location of Assets	Madhya Pradesh
TSA signing Date	NA
Trust's stake	100% economic ownership

Source: Investment Manager

- The equity shareholding of TL SitamauSS as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastructure Trust	7,62,168	66%
2	Focal Photovoltaic India Private Limited	1,95,851	17%
3	Focal Renewable Energy Two India Private Limited	1,95,851	17%
Total		11,53,870	100%

* Including shares held with nominees

Note: IndiGrid holds both legal and economic ownership of 66% of the shareholding in the asset. The remaining 34% is legally held by two separate focal entities. As these entities are part of the Gentari group, the corresponding 34% economic interest is reflected under Gentari in the corporate structure.

Source: Investment Manager

- My team has conducted physical site visit of the transmission assets of TL SitamauSS on 1st August 2026. Refer below for the pictures of the plant site.

22. Koppal Narendra Transmission Ltd ("KNTL")

- Koppal Narendra Transmission Limited ("KNTL" or the "Target SPV" or the "SPV") is a Special Purpose Vehicle (SPV) incorporated on 18th November, 2019 having its registered office in New Delhi. KNTL consists of two projects – Inter State Transmission System (ISTS) TBCB project (KNTL-1) & regulated Tariff Mechanism (RTM) project (KNTL-2), developed by ReNew Power Limited ('RPL') through its subsidiary RTVPL. KNTL project will evacuate the power generated from renewable sources in Koppal wind energy zone (Karnataka) of ~2,500 MW.
- KNTL was awarded a Letter of Award on 2nd January 2024, for its extension project i.e., KNTL-2. It is a part of KNTL and is shown separately as it is an extension. The revenue from this project will be realized on a Cost-Plus basis.

- Summary of project details of KNTL-1 are as follows

Parameters	Details – KNTL
Project Cost	INR 7,891 Mn
Total Length	276 ckms
Location of the Asset	Karnataka
SCOD as per TSA	26th August, 2023
Actual COD	12th December, 2023
Concession period	35 years from COD

- Summary of project details of KNTL-2 are as follows

Parameters	Details – KNTL
Model	BOOM
Project Cost	INR 608.4 Mn
Total Length	276 ckms
Location of the Asset	Karnataka
SCOD as per TSA	30 th June, 2025
Expected COD	30th June 2026
Concession period	35 years from COD

- The equity shareholding of KNTL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	35,31,835*	100%
	Total	35,31,835	100%

* Including shares held with nominees

Source: Investment Manager

- Operating Efficiency history of KNTL:

- The outstanding Optionally Convertible Debentures (OCDs) issued by KNTL as of the Report Date are as follows:
The OCDs have been issued based on the terms and conditions agreed upon between the respective parties, i.e., KNTL, BII and KNI.

INR Mn			
Sr. No.	OCDs issued to	Coupon Rate	Amount Outstanding
1	BII	9.50%	25.00
2	KNI	9.50%	25.00
			50.00

- My team conducted physical site visit for KNTL on 3rd March 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

23. Gadag Transmission Limited ("GTL")

- GTL is a public unlisted company domiciled in India. GTL was incorporated on 2nd June, 2020 for carrying out business activities relating to transmission of power. GTL previously belonged to the ReNew Power Group ("ReNew Power").
- GTL consists of two projects – Inter State Transmission System (ISTS) TBCB project (GTL-I) & Regulated Tariff Mechanism (RTM) project (GTL-II), developed and owned by ReNew Power through its subsidiary RTVPL. GTL project will evacuate the power generated from renewable sources in Gadag solar energy zone (Karnataka) of ~2,500 MW.
- GTL was awarded a Letter of Award on 2nd January, 2024, for its extension project, i.e., GTL-II which is recently commissioned on 30th June 2026. It is a part of GTL and is shown separately as it is an extension. The revenue from this project will be realized on a Cost-Plus basis.

Summary of project details of **GTL-I** are as follows:

Parameters	Details – GTL 1
Project Cost	INR 3,760 Mn
Total Length	187 ckms
Location of Assets	Gadag District, Karnataka
SCOD as per TSA	16 th September, 2023
Expiry Date of License	17 th July 2047
Concession Period	35 years from Schedule COD
COD of last element of the SPV	31 st August, 2024

Source: Investment Manager

- GTL-I project consists of the following transmission lines and substations:

Transmission Line/Sub-Station	Kms	COD	Location
Establishment of 400/220kV Transmission line,	93.5	31 st August 2024	Gadag District Karnataka
2x500MVA Gadag Pooling Station with 400kV (1x125MVA) Bus Reactor		31 st August 2024	Gadag District Karnataka

Summary of project details of **GTL-II** are as follows:

Parameters	Details – GTL 2
Project Cost	INR 575.9 Mn
Location of Assets	Gadag District, Karnataka
SCOD	30 th June 2025
Actual COD	31 st March 2026
Concession Period	35 years from COD

Source: Investment Manager

- GTL-II project consists of the following substation:

Sub-Station	SCOD	Expected COD	Location
1x500 MVA ICTs of 400/220 kV along with associated ICT bays	30 th June 2025	31 st December 2025	Gadag District Karnataka

The equity shareholding of GTL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	1,96,101*	100%
	Total	1,96,101	100%

- My team conducted physical site visit for GTL on 23rd September 2025. Following are the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

24. Kilokari BESS Private Limited ("KBPL")

- Kilokari BESS Private Limited ("KBPL") is a battery energy storage system project which is located at the 33/11 kV substation of BRPL in Kilokari, Delhi.
- A consortium comprising IndiGrid 2 Private Limited (a wholly owned subsidiary of Trust) and Amperehour Solar Technology Private Limited has been granted the Letter of Intent (LOI) / Letter of Award (LOA) on October 23, 2023, by BSES Rajdhani Power Limited. The LOI/LOA pertains to the Design, Supply, Testing, Installation, Commissioning, Operation and Maintenance of 20 MW / 40 MWh Battery Energy Storage Systems in Delhi under the BOOT framework. The Trust incorporated Kilokari BESS Private Limited on 6th November 2023 for this purpose, wherein IGL 2 holds 95% stake and Amperehour Solar Technology Private Limited holds 5% stake.
- Summary of project details of KBPL are as follows:

Parameters	KBPL
Installed Capacity	20MW/40MWh (Actual installed capacity is 48 MWh)
Plant Location	Kilokari, Delhi
Battery used	Lithium- ion batteries
Actual COD	01-Apr-25
O&M Contractor	In-House
BESSA Counterparty	BSES Rajdhani Power Limited ("BRPL")
BESSA Date	22-Dec-23
BESSA Term	12 Years from Actual COD
BESSA Tariff	INR 5.76 Mn/MW/Year
Trust's Stake	95% economic ownership (Balance 5% stake held by Amperehour Solar Technology Private Limited)

Source: Investment Manager

- The equity shareholding of KBPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	1,14,25,100	99.99%
2	Amperehour Solar Technolgy Pvt Ltd	500	0.01%
Total		1,14,25,600	100%

Source: Investment Manager

- My team has conducted physical site visit of the BESS asset of KBPL on 21st November 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

25. Gujarat BESS Private Limited ("GBPL")

- Gujarat BESS Private Limited ("GBPL" or "BESSD" or "SPV" or the "Company") is a private limited company incorporated under the Companies Act 1956 or Companies Act 2013. The Company has been incorporated as a project company for "Development and supply of 180MW/360MWh BESS at 400 kV Charal (Sanand) GIS Substation.
- Gujarat Urja Vikas Nigam Ltd (here in after referred to as "GUVNL") has issued the Letter of Intent No GUVNL/COM/2024/PT/358 dated 14th March 2024 in favor of IndiGrid 2 Private Limited ("IGL 2") for development and establishment of the 180 MW/ 360 MWh of Standalone Baattery Energy Storage System in "Project" or "BESS" at location(s) provided at 400 kV Charal (Sanand) GIS S/s in the State of Gujarat. The project will be setup under BOO Model. The project shall have an annual revenue of approx. INR 972 Crore with a concession tenure of 12 years post Commercial Operation Date (COD).
- IndiGrid 2 Private Limited has been selected in the Competitive Bidding Process has constituted Gujarat BESS Private Limited (hereinafter referred to as "GBPL" or "BESSD" or "SPV" or the "Company"), for development, and supply of BESS Capacity from the 180 MW/ 360 MWh of the Project / BESS to be established by BESSD in 400 kV Charal (Sanand) GIS S/s, Gujarat and for making available such Battery Energy Storage Capacity to GUVNL. at a tariff of 4,49,996 /MW/Month.

- Summary of project details of GBPL are as follows:

Parameters	GBPL
Installed Capacity	180MW/360MWh
Plant Location	Gujarat
COD	19 th March 2026
BESSA Counterparty	Gujarat Urja Vikas Nigam Limited ("GUVNL")
BESSA Date	20 th June 2024

- My team has conducted physical site visit of the BESS asset of GBPL on 21st March 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

26. Rajasthan BESS Private Limited ("RBPL")

- IndiGrid 2 Private Limited, a fully-owned subsidiary of IndiGrid Infrastructure Trust, has secured a Letter of Intent (LOI) / Letter of Award (LOA) dated November 22, 2024, from NTPC Vidyut Vyapar Nigam Limited (NVNN) for setting up a 250 MW / 500 MWh Battery Energy Storage System (BESS) in Rajasthan for "ondemand" usage under tariff-based competitive bidding framework. The project will be setup under Build Own Operate (BOO) model and is projected to generate annual revenue exceeding INR 71 crore, with a concession term of 12 years starting from the Commercial Operation Date (COD).
- RBPL was set up for development of 500 MWh (250 MW x 2 hrs) Standalone Battery Energy Storage Systems in Rajasthan for "on Demand" usage and will be set-up under BOO model. RBPL, a battery energy storage system project, will be located at Bhadla in Rajasthan and currently non - operational.

- Summary of project details of RBPL are as follows:

Parameters	RBPL
Installed Capacity	250MW/500MWh
Plant Location	Rajasthan
Battery used	Lithium- ion batteries
Actual COD	NA
Expected SCOD	22 nd June 2026
BESSA Counterparty	NTPC Vidyut Vyapar Nigam Limited ("NVVNL")
BESSA Date	21 st December 2024
BESSA Term	12 years from the date of Actual COD
BESSA Tariff	INR 0.27 Mn/MW/Month
Trust's stake	100% Economic Ownership
% of completion as on Valuation Date	50-55%

Source: Investment Manager

- The equity shareholding of RBPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	10,000*	100%
	Total	10,000	100%

* Including shares held with nominees

Source: Investment Manager

- The outstanding Optionally Convertible Debentures (OCDs) issued by RBPL as of the Report Date are as follows: The OCDs have been issued based on the terms and conditions agreed upon between the respective parties, i.e., RBPL, BII and KNI.

INR Mn			
Sr. No.	OCDs issued to	Coupon Rate	Amount Outstanding
1	BII	13.70%	474.7
2	KNI	13.70%	474.7
			949.4

Source: Investment Manager

- My team has conducted physical site visit of the BESS asset of RBPL on 20th March 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

to

(B) Solar Assets:**27 & 28. IndiGrid Solar-I (AP) Private Limited ("ISPL 1") and IndiGrid Solar-II (AP) Private Limited ("ISPL 2")**

- ISPL 1 was incorporated on 14th July 2016 and ISPL 2 was incorporated on 9th July 2016. These Solar Assets have each set up and commissioned a 50 MW (AC) solar photo voltaic power generation system at Annanthapuramu Solar Park in the state of Andhra Pradesh. Power generated from these Solar Assets is sold under long term Power Purchase Agreement ("PPA") to Solar Energy Corporation of India Limited ("SECI").
- SECI has further signed PPA with Eastern and Southern Power Distribution Companies of Andhra Pradesh - APEPDCL & APSPDCL for entire capacity.
- The Solar Assets were selected through competitive reverse bidding under JNNM Phase – II Batch-III, Tranche-IV. SECI is the nodal agency for implementation of Ministry of New & Renewable Energy ("MNRE") schemes for developing grid connected solar power capacity through Viability Gap Funding ("VGF") mode.
- These Solar Assets have entered into a leasehold agreement for the land parcel from APSCPL for a period of 25 years from the COD, which can be extended through mutual agreement.
- Summary of project details of ISPL 1 and ISPL 2 are as follows:

Parameters	ISPL 1	ISPL 2
Project Cost	INR 3,130 Mn	INR 3,149 Mn
Installed Capacity (AC)	50 MW	50 MW
Installed Capacity (DC)	68 MW	70 MW
Plant Location	Ananthapuramu Solar Park, District Kadapa, Andhra Pradesh	Ananthapuramu Solar Park, District Kadapa, Andhra Pradesh
Actual COD	22 nd July 2018	31 st January 2019
Land Area	~250 acres	~250 acres
O&M Contractor	Sterling & Wilson Private Limited	Sterling & Wilson Private Limited
PPA Counterparty	Solar Energy Corporation of India Ltd.	Solar Energy Corporation of India Ltd.
PPA Date	5 th October 2016	5 th October 2016
PPA Term	25 years from COD	25 years from COD
PPA Tariff	INR 4.43 per kWh unit	INR 4.43 per kWh unit
Trust's stake	100% economic ownership	100% economic ownership
Actual commissioning date	22 nd June 2018	08 th October 2018
Scheduled commissioning date (revised)	26 th June 2018	13 th October 2018
Project Model	Build Own Operate (BOO)	Build Own Operate (BOO)

Note: Globus Steel & Power Private Limited, IndiGrid Solar Private Limited – I, and IndiGrid Solar Private Limited – II are merged with Godawari Green Energy Private Limited vide order dated 22nd April, 2026 issued by NCLT, New Delhi.

- PLF history of ISPL 1 & 2 is as follows:

- My team had conducted physical site visit of ISPL 1 & ISPL 2 on 27th March 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

29. Godawari Green Energy Private Limited – Project (“GGEL”)

- GGEL is engaged in carrying on the business of setting up, generating and selling of renewable power from its thermal solar power plant located at Naukh, Rajasthan, India. The Company has entered into a PPA with NTPC Vidhyut Vyapar Nigam Limited for implementation of a 50 MW Concentrated Solar Power Generation Unit in the state of Rajasthan, under which it has a commitment to sell electricity for a period of 25 years.
- The technology of GGEL plant is Parabolic-trough solar concentrating systems. This Concentrating Solar Power (CSP) produces electricity by reflecting sunlight via solar collectors to heat a receiver to high temperatures. This heat is transformed first into mechanical energy, by turbines or Stirling engines, and then to electricity.
- Summary of project details of GGEL are as follows:

Parameters	GGEL
Installed Capacity (AC)	50 MW
Installed Capacity (DC)	50 MW
Plant Location	Naukh, Rajasthan, India
Actual COD	19-Jun-13
Land Area	~609 acres
O&M Contractor	In-house
PPA Counterparty	NTPC Vidhyut Vyapar Nigam Limited
PPA Date	19-Sep-13
PPA Term	25 Years from Actual COD
PPA Tariff	INR 12.20 per unit
Trust's stake	100% economic ownership
Technology of Plant	Parabolic-trough solar concentrating systems

Source: Investment Manager

- The equity shareholding of GGEL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited*	25,248,000	100%
2	IndiGrid Infrastructure Trust	20	0%
Total		25,248,020	100%

* Including shares held with nominees

Note: Globus Steel & Power Private Limited, IndiGrid Solar Private Limited – I, and IndiGrid Solar Private Limited – II are merged with Godawari Green Energy Private Limited vide order dated 22nd April, 2026 issued by NCLT, New Delhi.

Source: Investment Manager

- PLF history of GGEL is as follows:

- My team had conducted physical site visit of GGEL on 20th March 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

30. Globus Steel And Power Private Limited (“Globus”)

- Globus is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Nataram Village, Sitamau Taluka, and Mandsaur District of Madhya Pradesh.
- Power Purchase Agreement (PPA) has been signed between developer and Madhya Pradesh Power Management Company Limited (MPPMCL), at a fixed rate of ₹ 6.969 / kWh for a period of 25 Years on 16th June 2014. The DC capacity of the project is 23.67 MW and AC capacity is 20.00 MW.
- Summary of project details of Globus are as follows:

Parameters	Globus
Installed Capacity (AC)	20.00 MW
Installed Capacity (DC)	23.67 MW
Plant Location	Nataram Village, Sitamau, Mandsaur, Madhya Pradesh, India
Actual COD	29-Jan-16
Land Area	156.28 Acres
O&M Contractor	Mitarsh Energy Private Limited
PPA Counterparty	Madhya Pradesh Power Management Company Limited
PPA Date	16-Jun-14
PPA Term	25 years from Actual COD
PPA Tariff	INR 6.969 per unit
Trust's stake	100% economic ownership

Note: Globus Steel & Power Private Limited, IndiGrid Solar Private Limited – I, and IndiGrid Solar Private Limited – II are merged with Godawari Green Energy Private Limited vide order dated 22nd April, 2026 issued by NCLT, New Delhi.

Source: Investment Manager

- PLF history of Globus is as follows:

- My team had conducted physical site visit of Globus on 31st July 2026. Refer below for the pictures of the plant site,

31. TN Solar Power Energy Private Limited ("TNSEPL")

- TNSEPL is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Thuthookudi (12.00 MW), Virudhunagar (9.60 MW), and Dindigul (6.00 MW) in Tamil Nadu.
- TNSEPL had entered into a PPA with Tamil Nadu Generation and Distribution Corporation Ltd. ("TANGEDCO") on 12th September 2014 for implementation of a 27.60 MW Solar Photovoltaic Power Generation Unit in the State of Tamil Nadu, under which it has a commitment to sell electricity for a period of 25 years.
- Summary of project details of TNSEPL are as follows:

Parameters	TNSEPL
Installed Capacity (AC)	23.00 MW
Installed Capacity (DC)	27.60 MW
Plant Location	Thuthookudi, Tamil Nadu (12.00 MW) Virudhunagar, Tamil Nadu (9.60 MW) Dindigul, Tamil Nadu (6.00 MW)
Actual COD	01-Nov-2015 (Average)
Land Area	116.21 Acres
O&M Contractor	AVI Solar Energy Pvt. Ltd.
PPA Counterparty	Tamil Nadu Generation and Distribution Corporation Ltd.
PPA Date	12th September 2014
PPA Term	25 years from Actual COD
PPA Tariff	INR 7.01 per Unit
Trust's stake	100% economic ownership

Source: Investment Manager

- The equity shareholding of TNSEPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	43,500,000*	100%
	Total	43,500,000	100%

* Including shares held with nominees

Source: Investment Manager

- PLF history of TNSEPL is as follows:

- My team had conducted physical site visit of TNSEPL on 18th and 19th August 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

32. Universal Mine Developers & Service Providers Private Limited ("UMD")

- UMD is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Amathur (14.40 MW) & Kovilpatti (15.60 MW) in Tamil Nadu.
- The Company had entered into a PPA with Tamil Nadu Generation and Distribution Corporation Ltd. ("TANGEDCO") on 12th September 2014 for implementation of a 30 MW Solar Photovoltaic Power Generation Unit in the State of Tamil Nadu, under which it has a commitment to sell electricity for a period of 25 years.
- Summary of project details of UMD are as follows:

Parameters	UMD
Installed Capacity (AC)	25.00 MW
Installed Capacity (DC)	30.00 MW
Plant Location	Amathur, Tamil Nadu (14.40 MW) Kovilpatti, Tamil Nadu (15.60 MW)
Actual COD	20 th Jan 2016
Land Area	147.29 Acres
O&M Contractor	AVI Solar Energy Pvt. Ltd.
PPA Counterparty	Tamil Nadu Generation and Distribution Corporation Ltd.
PPA Date	12 th Sept 2014
PPA Term	25 years from Actual COD
PPA Tariff	INR 7.01 per Unit
Trust's stake	100% economic ownership

Source: Investment Manager

- The equity shareholding of UMD as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	46,901,000*	100%
	Total	46,901,000	100%

* Including shares held with nominees

Source: Investment Manager

- PLF history of UMD is as follows:

- My team had conducted physical site visit of UMD on 20th August 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

33. Terralight Kanji Solar Private Limited ("TL Kanji")

- TKSPL (earlier known as Shapoorji Pallonji Solar PV Private Limited) is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Tiruvannamalai, Tamil Nadu.
- TKSPL had entered into a PPA with Tamil Nadu Generation and Distribution Corporation Ltd. ("TANGEDCO") on 12th September 2014 for implementation of a 36 MW Solar Photovoltaic Power Generation Unit in the State of Tamil Nadu, under which it has a commitment to sell electricity for a period of 25 years.
- TL Kanji acquired 12.42 MW (10.00 MW AC) solar project from Jakson Power Private Limited in Aug '22. Lalitpur Project is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Lalitpur, Uttar Pradesh.
- TL Kanji had entered into a PPA with Uttar Pradesh Power Corporation Limited ("UUPCL") on 12th September 2014 for implementation of a 12.42 MW Solar Photovoltaic Power Generation Unit in the State of Uttar Pradesh, under which it has a commitment to sell electricity for a period of 12 years. As per the PPA the term can be extended to further 13 years on willingness of the developer.

Project I - TKSPL

- Summary of project details of TKSPL are as follows:

Parameters	TKSPL
Installed Capacity (AC)	30.00 MW
Installed Capacity (DC)	36.00 MW
Plant Location	Tiruvannamalai, Tamil Nadu (36.00 MW)
Actual COD	26 th Mar 2016
Land Area	160.03 Acres
O&M Contractor	AVI Solar Energy Pvt. Ltd.
PPA Counterparty	Tamil Nadu Generation and Distribution Corporation Ltd.
PPA Date	12 th Sept 2014
PPA Term	25 years from Actual COD
PPA Tariff	INR 7.01 per Unit
Trust's stake	100% economic ownership

Source: Investment Manager

Project II – Lalitpur Project

- Summary of project details of Lalitpur Project are as follows:

Parameters	Lalitpur Project
Installed Capacity (AC)	10.00 MW
Installed Capacity (DC)	12.42 MW
Plant Location	Lalitpur, Uttar Pradesh
Actual COD	19 th Mar 2015
Land Area	48.1 Acres
O&M Contractor	AVI Solar Energy Pvt. Ltd.
PPA Counterparty	Uttar Pradesh Power Corporation Limited
PPA Date	27 th Dec 2013
PPA Term	12 Years from Actual COD, extendable by 13 years
PPA Tariff	INR 8.44 per Unit for 12 years, APPC tariff post PPA
Trust's stake	100% economic ownership

Source: Investment Manager

- The equity shareholding of TKSPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	40,500,800*	100%
	Total	40,500,800	100%

* Including shares held with nominees

- PLF history of TL Kanji is as follows:

- My team had conducted physical site visit of TL Kanji on 26th August 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

34. Terralight Rajapalayam Solar Private Limited ("TL Raj")

- Terralight Rajapalayam Solar Private Limited (earlier known as Shapoorji Pallonji Suryaprakash Private Limited) is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Rajapalayam, Tamil Nadu.
- TL Raj had entered into a PPA with TANGEDCO on 27th September 2017 for implementation of a 54.00 MW Solar Photovoltaic Power Generation Unit in the State of Tamil Nadu, under which it has a commitment to sell electricity for a period of 25 years.
- Summary of project details of TL Raj are as follows:

Parameters	TL Raj
Installed Capacity (AC)	50.00 MW
Installed Capacity (DC)	54.00 MW
Plant Location	Rajapalayam, Tamil Nadu
Actual COD	26 th Sep 2018
Land Area	224.48 Acres
O&M Contractor	AVI Solar Energy Pvt. Ltd.
PPA Counterparty	Tamil Nadu Generation and Distribution Corporation Ltd. (TANGEDCO)
PPA Date	27 th Sep 2017
PPA Term	25 years from Actual COD
PPA Tariff	INR 3.47 per unit
Trust's stake	100% economic ownership
Scheduled Commercial Operation Date (SCOD)	26 th Sep 2018

Source: Investment Manager

- The equity shareholding of TL Raj as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	110,000*	100%
	Total	110,000	100%

* Including shares held with nominees

Source: Investment Manager

- PLF history of TL Raj is as follows:

- My team had conducted physical site visit of TL Raj on 20th August 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

35. Solar Edge Power and Energy Private Limited ("Solar Edge")

- Solar Edge is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Beed (104 MW) & Jalgaon (65 MW) in Maharashtra.
- It had entered into a Power Purchase Agreement ("PPA") with Solar Energy Corporation of India Ltd. ("SECI") on 10th February 2017 for implementation of a 169.00 MW Solar Photovoltaic Power Generation Unit in the State of Maharashtra, under which it has a commitment to sell electricity for a period of 25 years.
- Summary of project details of Solar Edge are as follows:

Parameters	Solar Edge
Installed Capacity (AC)	130 MW
Installed Capacity (DC)	169 MW
Plant Location	Beed, Maharashtra (104 MW) Jalgaon, Maharashtra (65 MW)
Actual COD	18 th April 2018
Land Area	718.99 Acres
O&M Contractor	Param Renewable Energy Pvt. Ltd.
PPA Counterparty	Solar Energy Corporation of India Ltd. (SECI)
PPA Date	10 th Feb 2017
PPA Term	25 years from Actual COD
PPA Tariff	INR 4.43 per unit
Trust's stake	100% economic ownership
Scheduled Commercial Operation Date (SCOD)	23 th Dec 2017

Source: Investment Manager

- The equity shareholding of Solar Edge as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	149,000,000*	100%

- PLF history of Solar Edge is as follows:

- My team had conducted physical site visit of Solar Edge on 30th July 2026. Refer below for the pictures of the plant site.

36. Terralight Solar Energy Charanka Private Limited ("TL Charanka")

- Terralight Solar Energy Charanka Private Limited (earlier known as Sindicatum Solar Energy Gujarat Private Limited) is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Patan, Gujarat.
- TL Charanka had entered into a PPA with Gujarat Urja Vikas Nigam Limited ("GUVNL") on 29th May 2010 for implementation of a 15.00 MW Solar Photovoltaic Power Generation Unit in the State of Gujarat, under which it has a commitment to sell electricity for a period of 25 years.
- Summary of project details of TL Charanka are as follows:

Parameters	TL Charanka
Installed Capacity (AC)	13.00 MW
Installed Capacity (DC)	15.00 MW
Plant Location	Patan, Gujarat
Actual COD	28 th Mar 2012
Land Area	78.52 Acres
O&M Contractor	Mitarsh Energy Private Limited
PPA Counterparty	Gujarat Urja Vikas Nigam Limited
PPA Date	29 th May 2010
PPA Term	25 years from Actual COD
PPA Tariff	INR 11.32 till FY 23 INR 11.11 during FY 24 INR 6.99 during FY 25 INR 6.47 from FY 26 till FY 37
Trust's stake	100% economic ownership
Scheduled Commercial Operation Date (SCOD)	30 th Jun 2011 for 3.00 MW 31 st Dec 2011 for 12.00 MW

Source: Investment Manager

- The equity shareholding of TL Charanka as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	98,322,741*	100%
	Total	98,322,741	100%

* Including shares held with nominees

- My team had conducted physical site visit of PLG on 6th April 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

38. Universal Saur Urja Private Limited (“USUPL”)

- USUPL is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Mahoba District, Uttar Pradesh. The Company had entered into a PPA with Uttar Pradesh Power Corporation Ltd. on 6th April 2015 for implementation of a 35.24 MW (capacity now augmented to 36.98 MW) Solar Photovoltaic Power Generation Unit in the State of Uttar Pradesh, under which it has a commitment to sell electricity for a period of 25 years.
- USUPL acquired Jodhpur Project 25.88 MW (20.00 MW AC) solar project from Jakson Power Private Limited during FY 23. Jodhpur Project is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Jodhpur, Rajasthan. The Company had entered into a PPA with NTPC Vidyut Vyapar Nigam Ltd. on 25th January 2012 for implementation of a 25.88 MW Solar Photovoltaic Power Generation Unit in the State of Jodhpur, under which it has a commitment to sell electricity for a period of 25 years.

Location I - USUPL

- Summary of project details of USUPL are as follows:

Parameters	USUPL
Installed Capacity (AC)	30.00 MW
Installed Capacity (DC)	36.98 MW
Plant Location	Mahoba District, Uttar Pradesh
Actual COD	15-Sept-16
Land Area	37.06 Acres
O&M Contractor	Meera Corporation
PPA Counterparty	Uttar Pradesh Power Corporation Ltd.
PPA Date	06-April-15
PPA Term	25 years from Actual COD
PPA Tariff	INR 9.33 per unit for first 12 years Est. INR 3.25 per unit from 13th year (Fixed Tariff till for first 12 years, then RoE based tariff will be as determined by the state commission in the 11th year)
Trust's stake	100% economic ownership

Source: Investment Manager

Location II – Jodhpur

- Summary of project details of Jodhpur Project are as follows:

Parameters	Jodhpur Project
Installed Capacity (AC)	20.00 MW
Installed Capacity (DC)	25.88 MW
Plant Location	Rajasthan
Actual COD	26-Feb-13
Land Area	106.68 acres
O&M Contractor	Mahindra Teqo Private Limited
PPA Counterparty	NTPC Vidyut Vyapar Nigam Ltd.
PPA Date	25-Jan-12

- My team had conducted physical site visit of TL Patlasi on 31st July 2026. Refer below for the pictures of the plant site.

40. Terralight Solar Energy Nangla Private Limited ("TL Nangla")

- TL Nangla (earlier known as Focal Energy Solar India Private Limited) is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Nangla, Talwandi Saboo, Bhatinda, and Punjab.
- TL Nangla has entered into a PPA for implementation of a 4.2 MW Solar Photovoltaic Power Generation Unit in the state of Punjab, under which it has a commitment to sell electricity for a period of 25 years at the rate of INR 8.30/kWh.
- Summary of project details of TL Nangla are as follows:

Parameters	TL Nangla
Installed Capacity (AC)	4.0 MW
Installed Capacity (DC)	4.2 MW
Plant Location	Nangla, Talwandi Saboo, Bhatinda, Punjab
Actual COD	24-Mar-15
Land Area	18.75 Acres
O&M Contractor	Mitarsh Energy Private Limited
PPA Counterparty	Punjab State Power Corporation Ltd
PPA Date	31-Dec-13
PPA Term	25 Years
PPA Tariff	INR 8.30 per unit
Trust's stake	100% economic ownership

Source: Investment Manager

- The equity shareholding of TL Nangla as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid Infrastructure Trust	1,841,356	100%
	Total	1,841,356	100%

Source: Investment Manager

- PLF history of TL Nangla is as follows:

- My team had conducted physical site visit of TL Nangla on 20th March 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

41. Terralight Solar Energy Gadna Private Limited ("TL Gadna")

- TL Gadna (earlier known as Sunborne Energy Rajasthan Solar Private Limited) is engaged in carrying on the business of setting up, generating and selling of renewable power from its ground mounted solar power plants located at Gadna, Bap, Jodhpur, and Rajasthan.
- The Company has entered into a PPA with NTPC Vidhyut Vyapar Nigam Limited for implementation of a 5.50 MW Solar Photovoltaic Power Generation Unit in the state of Rajasthan, under which it has a commitment to sell electricity for a period of 25 years.
- Summary of project details of TL Gadna are as follows:

Parameters	TL Gadna
Installed Capacity (AC)	5.00 MW
Installed Capacity (DC)	5.50 MW
Plant Location	Gadna, Bap, Jodhpur, Rajasthan
Actual COD	26-Mar-13
Land Area	33.05 acres
O&M Contractor	Mitarsh Energy Private Limited
PPA Counterparty	NTPC Vidhyut Vyapar Nigam Limited (NVVN)
PPA Date	27-Jan-12
PPA Term	25 Years
PPA Tariff	INR 8.99 per unit
Trust's stake	100% economic ownership

Source: Investment Manager

- The equity shareholding of TL Gadna as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	43,780*	100%
	Total	43,780	100%

* Including shares held with nominees

Source: Investment Manager

- PLF history of TL Gadna is as follows:

- My team had conducted physical site visit of TL Gadna on 6th March 2026. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

42. Jaisalmer Urja VI Private Limited ("JUPL")

- Jaisalmer Urja VI Private Limited (hereinafter referred as "JUPL" or the "Company") is a private limited company domiciled in India. JUPL was incorporated on 19th November 2019 for carrying out business activities relating to generation of power through non-conventional and renewable energy sources. JUPL belongs to the ReNew Power Group ("ReNew Power").
- ReNew Power participated in tender floated by SECI dated June 28, 2019. Subsequently in the e-Reverse Auction held in October 2019, it won 300 MW capacity at tariff of 2.71 INR / kWh. ReNew Power successfully setup a 300 MW/420 MW ground mounted solar power project and the project was commissioned on December 2021 and official offtake from SECI started from May 2022.
- The project is located in Fatehgarh Tehsil of Jaisalmer District in Rajasthan spread across around 980 acres of land. Out of 980 acres, around 810 acres land is privately leased and remaining 170 acres is self-owned. The power from the project is evacuated through Fatehgarh-II Pooling station and around 25 km of transmission lines majorly owned and utilized by ReNew Power for evacuation of different solar and wind projects in its portfolio.
- ReNew Power develops, builds, owns and operates utility scale wind and solar energy projects as well as distributed solar energy projects that generate energy for commercial and industrial customers.
- Summary of project details of JUPL are as follows:

Parameters	JUPL
Installed Capacity (AC)	300 MW
Installed Capacity (DC)	420 MW
Plant Location	Village Mandhopura, Fatehgarh Tehsil, Jaisalmer District, Rajasthan
Actual COD	11th May 2022
Land Area	980 acres (810 acres land privately leased)
O&M Contractor	ReNew Services Private Limited
PPA Counterparty	Solar Energy Corporation of India Limited (SECI)
PPA Date	10th August 2020
PPA Term	25 Years from Actual COD
PPA Tariff	INR 2.71/ Unit
Trust's stake	100% economic ownership

Source: Investment Manager

- The equity shareholding of JUPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	9,200,100*	100%
	Total	9,200,100	100%

* Including shares held with nominees

Source: Investment Manager

- The outstanding Optionally Convertible Debentures (OCDs) issued by JUPL as of the Report Date are as follows: The OCDs have been issued based on the terms and conditions agreed upon between the respective parties, i.e., JUPL and Renew Solar Power Private Limited.

Sr. No.	OCDs issued to	Coupon Rate	INR Mn
			Amount Outstanding
1	ReNew Solar Power Private Limited	8.00%	105.88
			105.88

Source: Investment Manager

- PLF history of JUPL is as follows:

- My team had conducted physical site visit of JUPL on 8th August 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

43. ReNew Surya Aayan Private Limited ("RSAPL")

- ReNew Surya Aayan Private Limited ("RSAPL" or "the Target" or the "SPV") is a Special Purpose Vehicle (SPV) incorporated on 22nd June 2020 having its registered office in New Delhi and is a wholly owned subsidiary of ReNew Solar Power Private Limited.
- Solar power plant operated by RSAPL is located at Kalijal and Nagarda villages in Shiv Tehsil, Barmer District, Rajasthan. In July 2020, Renew Power was selected in the competitive bidding process for setting up of 300 MW capacity solar power plant at PPA tariff rate of INR 2.37 / kWh.
- Renew Power successfully set up a 300 MW (AC) /410 MW (DC) ground mounted solar power project. 290MW of the project was commissioned in March 2024 with balance 10MW commissioned in June 2024 and official offtake under PPA by SECI started from January 2025. However, project sold power to SECI from March 2024.
- Summary of project details of RSAPL are as follows:

Parameters	RSAPL
Installed Capacity (AC)	300 MW
Installed Capacity (DC)	410 MW
Plant Location	Village Mandhopura, Fatehgarh Tehsil, Jaisalmer District, Rajasthan
Actual COD	290 MW- 31 st March 2024, 10 MW- 8 th June 2024
Land Area	959 acres (954 acres land privately leased)
O&M Contractor	ReNew Services Private Limited
PPA Counterparty	Solar Energy Corporation of India Limited (SECI)
PPA Date	14 th June 2022
PPA Term	25 Years from Actual COD
PPA Tariff	INR 2.37/ Unit

Source: Investment Manager

- The equity shareholding of RSAPL as on Report Date is as follows:

Sr. No.	Particulars	No. of shares	%
1	IndiGrid 2 Private Limited	18,620,049*	49%
2	Renew Solar Power Pvt Ltd	19,380,051	51%
Total		38,000,100	100%

* Including shares held with nominees

Note: While 100% of the economic interest is held by IndiGrid or its affiliated entities, the legal ownership (i.e., shareholding) is distributed among various holding entities.

Source: Investment Manager

- PLF history of RSAPL is as follows:

- The outstanding Optionally Convertible Debentures (OCDs) issued by RSAPL as of the Report Date are as follows:
The OCDs have been issued based on the terms and conditions agreed upon between the respective parties, i.e., RSAPL, BII and KNI.

INR Mn			
Sr. No.	OCDs issued to	Coupon Rate	Amount Outstanding
1	BII	9.50%	80.00
2	KNI	9.50%	80.00
			160.00

- My team had conducted physical site visit of RSAPL on 8th August 2025. Refer below for the pictures of the plant site. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

4. Structure of the Trust

Following is the structure of the Trust as on 30th June 2026:

Corporate Structure (1/2)

Corporate Structure (2/2)

IGL = IndiGrid Ltd. IGL 1 = IndiGrid 1 Ltd. IGL 2 = IndiGrid 2 Private Ltd. BDCTL = Bhopal District Transmission Company Ltd. JTCL = Jabalpur Transmission Company Ltd. RTCL = Raipur Transmission Company Ltd. PKTCL = Patna Transmission Company Ltd. MTL = Madhya Pradesh Transmission Company Ltd. IPTL = Indraprastha Transmission Company Ltd. DPTL = Delhi Power Transmission Company Ltd. KTCO = Karnataka Transmission Company Ltd. OGPTL = Odisha Gas Pipeline Transmission Company Ltd. RKPTL = Rajasthan Power Transmission Company Ltd. KNTL = Karnataka Transmission Company Ltd. GTL = Gujarat Transmission Company Ltd. UMD = Uttar Pradesh Transmission Company Ltd. JUPL = Jharkhand Transmission Company Ltd. SolarEdge = SolarEdge Energy Storage Pvt. Ltd. TSEC = TeraLight Solar Energy Sitemaurs Pvt. Ltd. TKSPL = TeraLight Solar Energy Sitemaurs Pvt. Ltd. TNSEPL = TeraLight Solar Energy Sitemaurs Pvt. Ltd. TLGadna = TeraLight Solar Energy Sitemaurs Pvt. Ltd. TRSPL = TeraLight Solar Energy Sitemaurs Pvt. Ltd. GBPL = Globus Steel & Power Private Limited. RBPL = Rajahmundry BESS Private Limited. ENICL = Enrica Infra Private Limited. GPTL = Gujarat Power Transmission Company Ltd. JKPTL = Jammu & Kashmir Power Transmission Company Ltd. NER-II = Northeast India Private Limited. RSTCPL = Rajasthan State Transmission Company Ltd. PTCL = Punjab Transmission Company Ltd. KhTL = Khanna Transmission Company Ltd. TLPatiasi = TeraLight Solar Energy Sitemaurs Pvt. Ltd.

IndiGrid Infrastructure Trust operates a layered InvIT structure wherein economic ownership resides primarily with public unitholders, while assets are owned through intermediate holding companies such as IndiGrid Limited, IndiGrid 1 Limited, and IndiGrid 2 Private Limited. These holding companies aggregate transmission, solar, and BESS project SPVs organised into three cohorts, enabling efficient capital management, regulatory compliance, and long-term portfolio scalability.

5. Overview of the Industry

Part A: Transmission Sector

5.1. Introduction:

- 5.1.1 Transmission system plays an important role in supply of power to the consumers through the vital link between the generating stations and the distribution system. The energy resources like coal, hydro and renewable are unevenly distributed in India. Coal reserves are mainly available in Central and Eastern part of the country, whereas hydro energy resources are primarily available in Himalayan Range in the Northern and North-Eastern parts.
(Source: Ministry of Power)
- 5.1.2 Renewable resources like wind and solar potential are also mainly concentrated in states like Tamil Nadu, Andhra Pradesh, Karnataka, Rajasthan, Maharashtra, Gujarat & Ladakh etc. The major load centres of the country are located in central part including Northern, Western and Southern regions. This skewed distribution of resources necessitated development of robust transmission system including establishment of inter-regional corridors for seamless transfer of power from surplus to deficit regions/areas.
- 5.1.3 The transmission system has expanded over the years for evacuation of power for evacuation of power from generating stations to load centre through Intra State and Inter State Transmission System. The progressive integration of regional grids started in 1992, and on 31st December 2013, our country achieved 'ONE NATION'- 'ONE GRID'- 'ONE FREQUENCY' with synchronous interconnection of Southern Region Grid with rest of the Indian Grid with the commissioning of 765kV Raichur-Solapur Transmission line.
- 5.1.4 However, there were constraints in market operation due to transmission congestion resulting into market splitting and different market prices in different regions. During 2013-14, about 16% of electricity transacted through power exchanges was constrained due to transmission congestion. Further, strategically important Ladakh region was not interconnected with national electricity grid.
- 5.1.5 The present Government after assuming power in 2014, has given emphasis to have congestion free transmission network, so that there is no constraint in flow of power from surplus region to deficit region. Accordingly, transmission system in the country has been continuously strengthened with addition of transmission lines and inter-regional capacity as under:

- 5.1.6 The Central Electricity Authority in its report on "Optimal Generation Mix 2030" has estimated that the required energy storage capacity by 2029-30 is 60.63 GW with 18.98 GW from Pumped Storage Projects (PSP) and 41.65 GW from Battery Energy Storage Systems (BESS). CEA has since superseded the Optimal Generation Mix 2030 report with the Long-Term National Resource Adequacy Plan (LT-NRAP) 2026-27 to 2035-36, released in April 2026. The new plan estimates a substantially larger and longer-horizon storage requirement of 174 GW / 888 GWh by 2035-36, comprising 94 GW / 567 GWh from Pumped Storage Projects (PSP) and 80 GW / 321 GWh from Battery Energy Storage Systems (BESS). The plan also projects non-fossil fuel-based installed capacity reaching approximately 786 GW, or 70% of total installed capacity, by 2035-36, compared to about 52% as of January 2026.
- 5.1.7 The same CEA plan also projects that under the base-case scenario, India's peak electricity demand will rise from 289 GW in 2026-27 to 459 GW by 2035-36 (a 5.58% CAGR), while annual energy requirement will grow from 1,929 billion units (BU) to 3,365 BU (a 6.41% CAGR). To meet this, total installed capacity is planned to expand from around 520 GW (January 2026) to approximately 1,121 GW by 2035-36, with solar capacity rising from about 141 GW to approximately 509 GW (45% of total capacity) and coal capacity rising to 315 GW (28% of capacity, but still the largest generation source at 51% of gross generation). Separately, CEA has reported that India is currently constructing about 235 GW of generation capacity across resources, including 40,865 MW thermal, 13,120 MW Pumped Storage Projects and 10,658 MW of BESS.
- 5.1.8 The Indian government's emphasis on increasing renewable energy capacity, especially solar and wind, has significantly boosted the demand for battery energy storage solutions. Additionally, advancements in battery technology, such as the declining cost of lithium-ion batteries, have contributed to the increasing adoption of BESS.

Battery storage is out-building gas at its peak

108 GW of battery storage capacity was added globally in 2025 – more than any annual capacity addition ever achieved by gas fired (~107 GW, in 2002)

Figure: Global battery storage capacity additions by region and year. Source: IEA, Global Energy Review 2026 (April 2026); H1 2026 (Jan-Jun actual) figure from Benchmark Mineral Intelligence / Rho Motion, via Energy-Storage.News (15 July 2026).

- 5.1.9 In March 2024, government has approved a Viability Gap Funding (VGF) Scheme for the development of large-scale BESS, with an outlay of ₹3,760 crore for development of 13,220 MWh at VGF of Rs 27 lakhs/MWh.
- 5.1.10 In June 2025 the Government has approved another VGF scheme of 30 GWh, funded through ₹5,400 crore from the power system development fund (PSDF) at VGF of Rs 18 lakhs/MWh.
- 5.1.11 The BESS Scheme is a crucial part of India's broader goal to achieve 500 GW of renewable energy capacity by 2030. This target is a significant step towards reducing India's emission intensity by 33-35% from 2005 levels by 2030 and achieving 40% electricity generation from non-fossil fuels.
- 5.1.12 Key cities and regions leading in battery energy storage systems include Mumbai, Bangalore, Delhi, and states like Tamil Nadu and Gujarat. These regions dominate the market due to their rapid industrialization, urbanization, and large-scale renewable energy projects. Mumbai and Bangalore are home to several technology companies and energy innovators, while Tamil Nadu and Gujarat have extensive solar and wind power generation capacities, necessitating efficient energy storage systems for grid stability. There are several energy storage technologies available, broadly – mechanical, thermal, electrochemical, electrical and chemical storage systems, as shown below:

Source: Ministry of New and Renewable Energy
Market research.com

5.2. Global Transmission Sector Outlook:

- 5.2.1 Over the past decade, approximately 1.5 million km of transmission lines have been constructed worldwide, of which EMDE account for nearly 90%. This rapid expansion is driven by rising electricity demand, accompanied by efforts to improve energy access.
- 5.2.2 More than one-third of the global transmission grid expansion over the last decade took place in China. China constructed more than 62,000 km of lines by FY 26, including ultra-high-voltage (UHV) connections that link renewable energy-rich northern and western provinces to eastern demand centres. Over the same period, India added nearly 180 000 km of transmission lines, a 70% increase, and Brazil expanded its grid by more than 100 000 km, a 50% expansion.
- 5.2.3 Advanced economies have seen a more gradual expansion of their transmission networks, with a 9% increase in the past decade, about 130,000 km of new lines. This reflects the relative maturity of electricity markets and infrastructure in these economies, along with higher population densities in countries such as Japan and Korea that reduce the need for extensive grid expansion.
- 5.2.4 Among the advanced economies, many governments have introduced policies to accelerate transmission investment, with some extending their planning horizons and setting clear renewable energy targets. Examples include the European Union's Grid Action Plan, aims to double cross-border transmission capacity. In the United States, the Department of Energy has developed a USD 2.5 billion Transmission Facilitation Program to help projects in their final stages of approval, as part of the Infrastructure Investment and Jobs Act.
- 5.2.5 In 2023, China invested around USD 40 billion in high-voltage transmission and remains committed to expanding its ultra-high-voltage (UHV) network under the 14th Five-Year Plan, with 38 UHV lines already operational in 2024.
- 5.2.6 The global length of high-voltage direct current (HVDC) lines nearly tripled between 2010 and 2021, exceeding 100 000 km. This reflects an expansion of long-distance overhead lines in China and Brazil, as well as underground and subsea cables in Europe.
- 5.2.7 In Europe, the North Sea is home to several key DC subsea cables for electricity transmission, including the 525 kV Viking Link and the 515 kV North Sea Link, each spanning over 700 km. Recently, TenneT, a European electricity transmission system operator, opened a 2 GW programme for 525 kV DC offshore cable.
- 5.2.8 Global electricity demand to grow at an average 3.6% per year between 2026 and 2030, adding roughly 1,100 TWh annually, around 50% more than the average annual addition over the past decade, led by data centres, electrification of industry and transport, and rising cooling demand. For India specifically, the report notes that renewable electricity generation grew 20% in 2025, its strongest absolute annual increase on record (+82 TWh), led by solar PV generation, which rose 24% year-on-year. India's electricity demand is forecast to grow at 6.4% annually through 2030, among the fastest of any major economy, with around 50% of incremental demand met by solar PV
- 5.2.9 Battery storage is the fastest growing power technology, averaging 90% market growth over the past five years: around 135 GW of new battery capacity is added per year to 2035 in the CPS, 75% above the level of deployment in 2024. Globally, annual energy storage deployment (excluding pumped hydropower plants) hit another all-time high at 92 gigawatts (247 gigawatt-hours) in 2025 – 23% higher than in 2024. China accounts for over 60% of the annual build in gigawatts, followed by the US at 14%.
- 5.2.10 Energy storage additions in these two markets remain strong for now although recent policy changes slow new solar and wind in both markets.

Power Transmission network in India:

- 5.2.11.** The government's focus on providing electricity to rural areas has led to the T&D system being extended to remote villages. Total Transformation Capacity addition during FY 2025-26 is 113,013 MVA and the Total Transformation Capacity is 14.51 Lakh MVA. The total transmission network has increased from ~3.68 Lakhs Ckms in FY 17 to around ~5.07 Lakhs Ckms in FY26.
- 5.2.12.** Inter-state transmission has seen considerable growth in the past decade, which led to the creation of a synchronous National Grid, achievement of 'One Nation-One Grid-One Frequency', which has been an enabler for power markets in the country. The total inter-regional transmission capacity of the National Grid was 1,20,340 MW as on March,2026.
- 5.2.13.** As per the National Electricity Plan (Volume-II Transmission), the transmission network is planned to expand from about 5.04 lakh circuit km (as of February 2026) to 6.48 lakh circuit km by 2032, with transformation capacity rising from about 1,429 GVA to 2,345 GVA over the same period. Inter-regional transmission capacity is planned to increase from 120 GW (February 2026) to 143 GW by 2027 and further to 168 GW by 2032, to support integration of over 500 GW of renewable energy capacity by 2030.
- 5.2.14.** The inter-state transmission system (ISTS) segment will incur capex of about ₹1 lakh crore over fiscals 2026 and 2027 to support renewable evacuation, twice the ~₹50,000 crore spent cumulatively over fiscals 2024-25, driven by an expected 65-75 GW of solar and wind capacity addition over the two fiscals. Because execution of transmission projects (2-4 years) takes roughly twice as long as renewable generation projects, and average commissioning delays of about ten months have been observed, CRISIL estimates transmission connectivity will be enabled for only up to 60 GW of this potential renewable capacity by fiscal 2027. Separately, CRISIL Ratings has flagged that more than 35-37 GW of India's renewable capacity could face grid curtailment risk in fiscal 2027 due to renewable capacity additions outpacing transmission build-out, particularly for projects operating under temporary general network access.
- 5.2.15.** PGCIL has remained the single largest player in inter regional power transmission capacity addition contributing to 45%-50% of the total investment in the sector with a vast transmission network covering over 1,77,699 Ckm (circuit kilometers) of lines and 278 substations boasting a transformation capacity exceeding 5,27,446 MVA.
- 5.2.16.** Of the total capacity-addition projects in transmission during the 12th FYP, about 42% can be attributed to the state sector. The share of private sector in transmission line and substation additions since the beginning of 12th FYP is 14% and 7%, respectively, as the majority of high-capacity, long-distance transmission projects were executed by PGCIL and state transmission utilities during this period.
- 5.2.17.** The Government is implementing two Viability Gap Funding (VGF) schemes to support development of approximately 43 GWh of Battery Energy Storage Systems, launched in March 2024 and June 2025, to accelerate early-stage deployment.
- 5.2.18.** The Ministry of Heavy Industries is implementing a Production-Linked Incentive (PLI) Scheme with an outlay of ₹18,100 crore for establishing 50 GWh of Advanced Chemistry Cell manufacturing capacity, of which 10 GWh is earmarked for grid-scale storage.
- 5.2.19.** In February 2025, CEA issued an advisory on co-location of ESS with solar power projects, recommending storage capacity of at least 10% of installed solar capacity for a minimum duration of two hours, to improve dispatchability of solar power. (Source: PIB)
- 5.2.20.** As of March 2026, India's operational BESS capacity above 1 MWh stood at approximately 798 MWh, with an additional 9,653.94 MW / 26,729.32 MWh under construction and 19,797.65 MW / 61,013.40 MWh at the tendering stage, per Ministry of Power responses in Parliament. Separately, as per CEA, India needs an estimated 37 GWh of BESS capacity by 2027 and 236 GWh by 2031-32 to support renewable integration.
- 5.2.21.** Under the Green Energy Corridor (GEC) programme, seven states have completed GEC Phase-I, and the government released about ₹787 crore during 2025-26 for transmission infrastructure under the scheme. The Ministry has additionally declared about 345 GW of Renewable Energy Potential Zones beyond the existing 500 GW transmission plan, to provide advance visibility to developers, with planning for the next GEC phase currently underway. transmission bottlenecks and storage gaps remain key constraints in India's power transition, and identifies pumped hydro storage as the intended backbone of large-scale, long-duration balancing capacity alongside BESS and thermal energy storage.

(Source: PIB, Ministry of New and Renewable Energy, April 2026; CRISIL-FICCI, "Energy Storage for India's Energy Transition," February 2026)

5.3. **Factors Encouraging Investments in Power Transmission in India:**

5.5.1. **Operational power transmission projects have minimal risks:**

In the project construction phase, transmission assets face execution risks including right of way, forest and environment clearances, increase in raw material prices etc. However, post commissioning, with the implementation of the Point of Connection (PoC) mechanism, there is limited offtake and price risk. Thus, operational transmission projects have annuity like cash flows and steady project returns.

5.5.2. **Availability based regime:**

As per the TSA, the transmission line developer is entitled to get an incentive amount in the ratio of the transmission charge paid or actually payable at the end of the contract year. Maintaining availability in excess of the targeted availability gives the relevant asset the right to claim incentives at pre-determined rates, ensuring an adequate upside to maintaining availability.

5.5.3. **Counter-party risk diversified:**

Given PAN-India aggregation of revenue among all TSPs and not asset specific billing, the counter party risk is diversified. If a particular beneficiary delays or defaults, the delay or shortfall is prorated amongst all the licensees. Thus, delays or defaults by a particular beneficiary will have limited impact, which will be proportionate to its share in overall ISTS.

5.5.4. **Payment security:**

The TSA includes an arrangement for payment security, which reduces under recovery of revenues. Payment security is available in terms of a revolving letter of credit of required amount that can be utilized to meet the revenue requirement in case of a shortfall.

5.5.5. **Collection risk offset owing to the presence of CTU:**

According to CERC (sharing of inter-state transmission charges and losses) regulations, 2010, CTU has been assigned the responsibility of carrying out activities including raising of transmission charge bills on behalf of all ISTS licensees, collecting the amount and disbursing the same to ISTS licenses. Thus, a private transmission licensee no longer needs to collect transmission charges from multiple DISCOMs for each transmission project. Instead, the transmission revenue payable to the licensee is disbursed by the CTU on a monthly basis.

5.5.6. **Increase in Pace of Awarding Projects under TBCB :**

Between 2010-11 and 2014-15, the pace of award of project was slow with only Rs. 180-190 billion (~USD 2.48-2.62 billion) of projects being awarded. However, the pace of award of project has significantly increased. In fact, in 2015-16, projects aggregating to ~Rs. 260 billion (~USD 3.58 billion) were awarded. Awarding of projects through TBCB picked up from fiscal 2017 onwards. In fact, between fiscals 2017 and 2020, projects worth ~312 billion have been awarded by BPCs (REC, PFC). A cumulative 45 ISTS-TBCB schemes (approx. Rs 1.54 lakh crore in capital expenditure) were awarded in FY25, highlighting an unprecedented push for transmission infrastructure. (T&D India) As per CEA data, a total of 84 transmission projects had been awarded through the Tariff-Based Competitive Bidding (TBCB) mechanism as of December 2025. Of these, 43 projects, comprising a transmission line length of 21,634 ckt km and transformation capacity of 180,600 MVA, were secured by Power Grid Corporation of India Limited (PGCIL), while the remaining 41 projects were secured by private transmission service providers.

5.5.7. **Power Transmission infrastructure has better risk return profile as compared to other infrastructure projects:**

Returns from various infrastructure projects (other than transmission line projects) like roads, ports and power generation rely mostly on the operational performance of the assets, which in turn is dependent on factors where developers have limited control. For instance, in the roads sector (non-annuity based project) the company's profits are dependent on collection of toll revenues, the port sector bears risk of cargo traffic, while in the case of power generation, it depends on availability of fuel and offtake by distribution companies while in the case of ISTS transmission projects the charges are independent of the total power transmitted through the transmission lines and hence factors such as volume, traffic do not fluctuate the revenues.

(Sources: CRISIL Infrastructure Yearbook 2025, CEA Executive Summary on Power Sector: March 2025, Installed capacity report FY 2025, PGCIL Annual Report, Growth Summary of Transformation Capacity, All India Installed Capacity of Power Stations March 2025-Central Electricity Authority of India, Press Information Bureau)

6.6 Understanding key terms used in Transmission Industry:

5.4.1. Available Transfer Capability (ATC):

Available Transfer Capability (ATC) represents the amount of power that can be reliably transferred through a transmission network or substation after accounting for existing commitments like current loads and scheduled energy transfers. This metric ensures grid flexibility and reliability, supporting the integration of renewable energy sources into the power system.

$$ATC = TTC - ETC - TRM - CBM$$

where, TTC (Total Transfer Capability): The maximum amount of electric power that can be reliably transferred over the interconnected network under a specific set of system conditions, limited by the most restrictive of the thermal, voltage, or stability limits..

ETC (Existing Transmission Commitments): The amount of transmission capacity already committed for existing contracts and scheduled energy transfers.

TRM (Transmission Reliability Margin): A margin of transmission capacity reserved to ensure secure operation of the network and to account for uncertainties in system conditions, such as load forecast errors, sudden equipment outages, or cascading failures.

CBM (Capacity Benefit Margin): A margin reserved by utilities to ensure access to generation from interconnected systems in the event of generation outages to meet reliability requirements.

5.4.2. Load Shedding:

Load shedding is the intentional, planned shutdown of electricity in certain areas to prevent a total grid collapse when power demand exceeds supply, acting as a controlled measure to balance the system, avoid overloads, and protect infrastructure, often done in stages (rolling blackouts) or targeted areas, as a last resort during peak demand or supply issues. It differs from random power cuts because it's managed by utility companies, usually with schedules, to maintain grid stability.

5.4.3. Grid Stability:

Grid Stability means the power grid can balance electricity supply with demand, maintaining steady voltage and frequency (like 50Hz or 60Hz) despite disturbances (faults, demand shifts, renewables intermittency) to prevent outages, equipment damage, and blackouts, ensuring reliable, uninterrupted power flow for consumers. It's about the grid's ability to return to a steady state after disruptions, a crucial but complex task with growing renewable energy sources.

5.4.4. Transformer:

A transformer is an electrical device that transfers electrical energy between two or more circuits through electromagnetic induction, typically changing AC voltage levels to either increase (step-up) or decrease (step-down) them. It works on the principle of mutual induction, using two coils wrapped around a soft iron core to create a changing magnetic field, which then induces a voltage in the secondary coil. This process allows for efficient power distribution by adjusting voltage without changing the frequency of the alternating current (AC)

5.4.5. Substation:

An electrical substation is a crucial part of the power grid, acting as a central hub to transform voltage levels (step-up for transmission, step-down for distribution), switch circuits, and control power flow, using key components like transformers, circuit breakers, and busbars to ensure safe, efficient delivery of electricity from power plants to homes and businesses

5.4.6. Round Trip Efficiency:

The Round Trip Efficiency (RTE) of Battery Energy Storage Systems (BESS) is typically 80-95%, showing how much energy is recovered from a full-discharge cycle, with modern Lithium-ion systems often exceeding 90%. It's the ratio of energy out to energy in, with losses from battery chemistry, power electronics (inverters), and thermal management reducing it from 100%, with higher RTE meaning less wasted energy.

$$RTE = (\text{Total Energy Output} / \text{Total Energy Input}) * 100$$

5.4.7. Depth of Discharge:

Depth of Discharge (DoD) for a Battery Energy Storage System (BESS) is the percentage of total capacity used, crucial for system sizing and lifespan, with typical ranges like 80-90% for Lithium-ion (extending life with lower DoD) and 50-60% for Lead-acid, though modern lithium systems might claim 100% DoD, optimal use often stays within 80-90% usable range to balance energy access and battery longevity. DoD is the opposite of State of Charge (SoC), so 20% SoC means 80% DoD, and maximizing DoD shortens cycles, while limiting it extends battery life.

5.4.8. Cycle Life:

A Battery Energy Storage System (BESS) cycle life typically ranges from 3,000 to over 10,000 cycles, depending heavily on battery chemistry (LFP lasts longer), operating conditions like Depth of Discharge (DoD) and C-rate, and temperature, with modern Lithium Iron Phosphate (LFP) cells often exceeding 6,000-10,000 cycles before reaching 70-80% capacity (State of Health, or SoH) over 15-20 years. Factors like daily usage (once vs. multiple times daily) and system integration (cell vs. module vs. BESS level) affect real-world longevity, but longer life is achieved with lower C-rates and moderate DoD.

5.4.9. Capacity Degradation:

Battery Energy Storage System (BESS) capacity degradation is the natural, gradual loss of storage ability over time due to chemical/physical changes from cycling (charging/discharging), environmental factors (heat), and calendar aging (inactivity), reducing energy output and system efficiency, often measured as capacity falling below 80% of original. Key drivers are Depth of Discharge (DoD), high/low State of Charge (SoC), temperature, and charge/discharge rates, impacting grid integration and costs.

5.4.10. C-rate:

The C-rate of a Battery Energy Storage System (BESS) is a measure of charge/discharge speed relative to its capacity; a 1C rate means full charge/discharge in 1 hour, a 0.5C rate (or C/2) means 2 hours, and a 2C rate means 30 minutes, with different rates chosen for applications like frequency regulation (higher C-rate) or energy arbitrage (lower C-rate for longer duration). It's crucial for BESS performance, but very high rates can reduce battery life.

Part B: Renewable Sector

5.5 Introduction:

- 5.5.1.** India is the most populous democracy in the world with a population of more than 1.4 billion. India's estimated real GDP growth for Financial Year 2026 stands at 7.4%, higher than the 6.5% growth recorded in FY25. Nominal GDP growth for FY26 is estimated at 8.0%, as per the First Advance Estimates released by the Ministry of Statistics and Programme Implementation (MoSPI). An efficient, resilient, and financially robust power sector is essential for the growth of the Indian economy. A series of reforms in the 1990s and the Electricity Act 2003 as amended from time to time have moved the Indian power sector towards being a competitive market with multiple buyers and sellers supported by regulatory and oversight bodies. (Source: PIB, Feb 2026)

- 5.5.2.** India is the 3rd largest energy consuming country in the world. It stands 3rd globally in renewable energy installed capacity, 4th wind power capacity and 3rd in solar Power capacity (as per PIB, citing IRENA RE Statistics 2025 data; the renewable energy capacity rank has since been updated to 3rd globally per a more recent PIB release dated April 2026). The country has set an enhanced target at COP26 of 500 GW of non-fossil fuel based energy by 2030. This has been a key pledge under the Panchamrit Scheme. This is the world's largest expansion plan in renewable energy. India made 1,08,494 GWh of solar power, more than Japan's 96,459 GWh, and became the world's third-biggest solar energy producer. (PIB, August 2025)
- 5.5.3.** India ranks 3rd globally in renewable energy installed capacity per IRENA's Renewable Energy Statistics 2026, having moved ahead of Brazil. India added a record non-fossil capacity of 55.3 GW during FY 2025-26 (including the highest-ever annual solar addition of around 45 GW, nearly double the ~23 GW added in FY 2024-25), taking total non-fossil capacity to 283.46 GW as on 31 March 2026. This comprises 274.68 GW of renewable energy (150.26 GW solar, 56.09 GW wind, 11.75 GW bio-energy and 5.17 GW small hydro) plus 51.41 GW of large hydro and nuclear capacity. India's total power generation during FY 2025-26 (up to March 2026) reached 1,845.921 BU, of which non-fossil sources contributed 29.2% (538.97 BU). India had earlier achieved 50% non-fossil installed capacity in June 2025, five years ahead of its 2030 NDC target. (Source: PIB, Ministry of New and Renewable Energy, "India Ranks third globally in Renewable Energy Installed Capacity," April 2026)
- 5.5.4.** India's cumulative solar power capacity stood at 150.26 GW as of March 2026. This includes 114.87 GW from ground-mounted solar plants, 25.73 GW from grid-connected rooftop systems, 3.86 GW from hybrid projects, and 5.80 GW from off-grid solar installations, reflecting the country's diverse approach to expanding renewable energy. India generated approximately 144,150 GWh of solar electricity during FY 2024-25, maintaining its position as the world's third-largest producer of solar power. India's domestic solar manufacturing ecosystem has expanded rapidly, with solar PV module manufacturing capacity reaching around 172 GW and solar cell manufacturing capacity approximately 27 GW as of March 2026, reflecting the country's continued push towards self-reliance in renewable energy manufacturing.
- 5.5.5.** Electricity security has improved through the creation of one national power system and major investments in clean energy. India is now working on integrating higher shares of variable renewable energy into the energy mix.
- 5.5.6.** India's progress in the renewable energy sector reflects the country's focused policies and strategic planning under national leadership. As part of the pledge made at COP26, efforts are being directed towards reaching the target of 500 GW of non-fossil fuel electricity capacity by 2030. This commitment is seen as a key step in India's clean energy transition and its broader climate goals.

5.6 Global Renewable Energy Outlook

- 5.6.1.** Renewable energy continued to dominate global capacity additions in 2024, with 585 GW of renewable power capacity added worldwide, accounting for over 90% of total power capacity additions. Solar PV led the expansion with 452 GW of new capacity, representing over three-quarters of global renewable additions, while wind power contributed approximately 113 GW. Solar PV remained the fastest-growing renewable technology globally, surpassing all other power generation technologies in annual capacity additions.

- 5.6.2. The IEA's Electricity 2026 report (published February 2026) provides a more current outlook: global electricity demand is forecast to grow at an average 3.6% per year between 2026 and 2030, adding around 1,100 TWh annually, roughly 50% more than the average annual addition over the past decade. Renewables are set to contribute the largest share of this growth, with solar PV alone forecast to add over 600 TWh per year, pushing the combined solar-and-wind share of global generation from 17% today to 27% by 2030. Nuclear generation also set a new record in 2025 and is expected to keep rising through 2030, supported by reactor restarts and new capacity additions, including in India. Renewables and nuclear together are expected to account for around half of global electricity generation by 2030, even as coal remains the single largest fuel source for power generation through the period. (Source: *International Energy Agency, Electricity 2026, February 2026*)
- 5.6.3. Global energy demand grew by 3.7% in 2026. Demand for all fuels and technologies expanded in 2024. The increase was led by the power sector as electricity demand surged by 4.3%, well above the 3.2% growth in global GDP, driven by record temperatures, electrification and digitalization. Renewables accounted for the largest share of the growth in global energy supply (38%), followed by natural gas (28%), coal (15%), oil (11%) and nuclear (8%).
- 5.6.4. Global electricity consumption rose by nearly 1100 terawatt-hours (TWh) in 2024, more than twice the annual average increase over the past decade.
- 5.6.5. Under existing policies and market conditions, global renewable capacity is forecast to reach 7,300 GW by 2028. This growth trajectory would see global capacity increase to 2.5 times its current level by 2030, falling short of the tripling goal.
- 5.6.6. The driving forces behind growth in renewable energy capacity includes robust policy support, energy security priorities and improved competitiveness against fossil fuels, outweighing challenges like higher costs and supply chain issues
- 5.6.7. Escalating electricity prices from the energy crisis prompted policymakers, particularly in Europe, to prioritize energy security and seek alternatives to imported fossil fuels. This shift favors solar PV, especially for quick installation of residential and commercial systems to meet surging requirement for renewable energy.
- 5.6.8. Renewable energy sector is expected to focus on various areas, including advanced solar photovoltaic (PV) technology, robotics, artificial intelligence (AI), large-scale data analysis (big data), decentralized energy storage systems, integration with power grids, blockchain technology, the production of green hydrogen, bioenergy, hydropower and wind power.
- 5.6.9. In advanced economies, low-emissions power generation rises 50% faster than electricity demand to 2035, with wind and solar PV outpacing total demand growth on their own. While fossil fuel generation declines significantly – coal use falls 60% by 2035 and natural gas use by 5% – natural gas remains the single largest electricity source through to 2035. Nuclear energy meets almost 10% of demand growth to 2035, with its role expanding as a result of uprates at existing reactors, new construction and reactor restarts, particularly in the United States, France and Japan.
- 5.6.10. Solar PV meets 60% of demand growth in emerging market and developing economies. Wind, hydropower and nuclear also contribute, with nuclear generation in emerging market and developing economies doubling by 2035. Gas-fired power also increases significantly, and coal remains the largest source of electricity across emerging market and developing economies in 2035, although it declines over the period.
- 5.6.11. Fossil fuels accounted for nearly 60% of global electricity generation in 2024, compared with 66% in 2015. In the CPS, fossil fuel generation increases by 5% to 2035, but its share of total generation continues to decline, falling to around 40% in 2035 and 30% by 2050. The share of coal-fired power declines steadily over time, and the share of oil continues to fall; the share of natural gas remains close to 20% through 2035.

5.7 India's Renewable Energy Outlook:

- 5.7.1. India's installed power capacity reached 520.51 GW as of January 2026, with the power shortage declining from 4.2% in FY14 to 0.03% till December 2025.
- 5.7.2. An investment of ₹1.85 lakh crore enabled the electrification of 18,374 villages and the connection of 2.86 crore households.
- 5.7.3. Outstanding dues reduced from ₹1.4 lakh crore (June 2022) to ₹3,330 crore (legacy dues as of 27 March 2026), while DISCOMs recorded a ₹2,701 crore profit in FY25. (Source: PIB)

- 5.7.4. India added a record 33.1 GW of renewable energy in FY 2025–26, boosting total clean power capacity to 250 GW. This progress brings India closer to its goal of 500 GW non-fossil capacity by 2030, in line with the “Panchamrit” climate targets set by the Prime Minister
- 5.7.5. The 33.1 GW / 250 GW figures above reflect an in-year (part-FY) data point. Final, full-year PIB figures for FY 2025-26 show non-fossil capacity addition of 55.3 GW (a record), taking total non-fossil capacity to 283.46 GW and total renewable energy capacity to 274.68 GW as on 31 March 2026. (Source: PIB, Ministry of New and Renewable Energy, April 2026)
- 5.7.6. Investments in Renewable Energy Sector has increased from US\$ 3,733 Mn to US\$ 9,840 Mn.
- 5.7.7. India's installed power capacity will reach 700-710 GW by fiscal 2030, up from 475 GW in March 2025, requiring net capacity addition of about 230 GW. Renewable energy (excluding large hydro) is expected to be the dominant contributor, adding approximately 190 GW and accounting for over 80% of total capacity addition between fiscals 2026 and 2030, lifting RE's share of total installed capacity to roughly 50% by fiscal 2030. (Source: CRISIL Intelligence; CRISIL Ratings, "C&I renewable capacity to surge ~40% in the two fiscals through 2028," February 2026)

-
- | State | Potential (MW) |
|----------------|----------------|
| Tennessee | 137 |
| Ark. | 64 |
| Mississippi | 62 |
| West Virginia | 56 |
| North Carolina | 50 |
| Virginia | 34 |
| Kentucky | 26 |
| Ohio | 25 |
| Kentucky | 23 |
| Tennessee | 20 |
| Mississippi | 10 |
| Alabama | 18 |
| South Carolina | 13 |
| Florida | 114 |

- 5.7.9. Recently, India stands 3rd in solar PV deployment across the globe as on end of FY26. Solar power installed capacity has reached around 162 GW as on 30th June, 2026 (Source: Central Electricity Authority). Presently, solar tariff in India is very competitive and has achieved grid parity.
- 5.7.10. As per the Central Electricity Authority (CEA) estimates, by 2029-30, the share of renewable energy generation would increase from 18% to 44%, while that of thermal is expected to reduce from 78% to 52%.
- 5.7.11. On the related but distinct metric of installed capacity, CEA's newer Long-Term National Resource Adequacy Plan (LT-NRAP) 2026-27 to 2035-36 (April 2026) projects non-fossil fuel-based installed capacity rising from about 52% in January 2026 to approximately 70% (around 786 GW) by 2035-36, with total installed capacity reaching approximately 1,121 GW by that year. (Source: Central Electricity Authority, Long-Term National Resource Adequacy Plan 2026-27 to 2035-36, April 2026)
- 5.7.12. CEA's National Generation Adequacy Plan further details the projected 2035-36 generation mix: of total gross generation of 3,596 BU, coal is still expected to be the largest contributor at 51% (1,819 BU), followed by solar at 27% (984 BU), wind at 9% (320 BU), hydroelectricity at 7% (256 BU), nuclear at 4% (147 BU) and gas at 2% (56 BU). Energy storage capacity is projected to reach 174 GW / 888 GWh by 2035-36 (94 GW PSP and 80 GW BESS). In a lower-demand scenario, the plan estimates peak demand could be 446 GW (versus 459 GW in the base case) and total installed capacity correspondingly lower.

5.8.1	The Union Budget 2026 has seen a 30% increase in the allocation for the renewable energy sector, reaching a record high of ₹32,914 crore. This allocation includes a significant portion for the Pradhan Mantri Surya Ghar: Muft Bijli Yojana, which is a key initiative aimed at expanding solar adoption and reducing electricity costs for consumers. Viability gap funding will be provided for harnessing offshore wind energy potential for initial capacity of one gigawatt.
5.8.2	Coal gasification and liquefaction capacity of 100 MT will be set up by 2030. This will also help in reducing imports of natural gas, methanol, and ammonia.
5.8.3	Phased mandatory blending of compressed biogas (CBG) in compressed natural gas (CNG) for transport and piped natural gas (PNG) for domestic purposes will be mandated.
5.8.4	Financial assistance will be provided for procurement of biomass aggregation machinery to support collection.

5.9 Understanding key terms used in Solar Industry:

5.9.1 Plant Load Factor (PLF)

- The Central Electricity Regulatory Commission defines Plant Load Factor as a percentage of energy sent out by the power plant corresponding to installed capacity in that period. In the context of solar power plants, it reflects how efficiently the plant is utilizing its installed solar panel capacity to generate electricity over a specific period, often a year. In India, the Ministry of Power has, since the early 90s, used the Plant Load Factor as a metric to check the efficiency of a plant. A PLF norm has been set, and incentives are being given to those producers who produce power in excess of the norm.

$$PLF = (\text{Actual Energy Output} / (\text{Installed Capacity} * \text{Total Time})) * 100$$

where, Actual Energy Output: The total amount of energy generated by the solar power plant over the chosen time period.

Installed Capacity: The maximum power output the solar panels are designed to produce under ideal conditions (rated capacity).

Total Time: The duration for which the plant has been operating (usually measured in hours).

- A low PLF is bad for the power plant as it indicates that the plant is not being used to its optimal capacity. This will increase the per-unit cost of the power thus produced, making it unattractive for purchase by DISCOMs. A higher PLF, on the other hand, will generate a greater total output which will reduce the cost per unit of energy generated. The higher the output, the lesser will be cost per unit. The additional energy produced would also result in an increase in revenue of the plant.
- The average Plant Load Factor (PLF) for solar power plants can vary significantly depending on factors such as location, technology, weather conditions, maintenance practices, and the design of the solar plant. Generally, PLF for solar power plants is influenced by the availability of sunlight, which can vary based on the geographical location and weather patterns
- On average, well-designed and efficiently operated solar power plants can achieve PLFs in the range of 15% to 25%. However, some high-performing solar installations can achieve even higher PLFs, exceeding 25%.

5.9.2 Solar Irradiation

- Solar irradiance is the output of light energy from the sun that reaches the earth. It is measured in terms of the amount of sunlight that hits a square meter of a surface in one second.
- Solar irradiance is a key factor in determining the energy output of solar power plants. By understanding the local solar irradiance conditions, engineers can design solar installations to capture the maximum amount of available sunlight. It also plays a crucial role in sizing solar panels, predicting energy production, and optimizing the orientation and tilt angles of panels to achieve higher energy yields.
- Solar irradiance is influenced by various factors, including:

Time of Day: Irradiance is highest when the sun is directly overhead (solar noon) and decreases in the morning and evening.

Season: Irradiance varies with the sun's angle in the sky, which changes with the seasons.

Geographical Location: Solar irradiance is generally higher near the equator and lower toward the poles.

Weather Conditions: Cloud cover, air pollution, and atmospheric conditions can attenuate or scatter sunlight, affecting irradiance levels

5.9.3 Degradation

Solar panels convert solar radiation into electrical energy. The ability to do so declines steadily and irreversibly over time. The degradation may be in a cell or parts of a module or both. The ability to accurately predict power delivery over time is vital to assess the credit risk profile of a project. The thumb rule in the industry is 0.50% system degradation per annum. Anything higher is considered a risk to cash generating ability and, by extension, to debt servicing ability. Degradation depends on many factors such as technology, panel quality.

5.9.4 Global Horizontal Irradiance (GHI)

Global Horizontal Irradiance (GHI) is the amount of terrestrial irradiance falling on a surface horizontal to the surface of the earth. GHI can be measured with a variety of instruments. The most common instrument used to measure GHI is called a pyranometer which has a hemispherical (180°) view angle.

5.9.5 Performance Ratio (PR)

The performance ratio (PR) is a metric used in the PV industry to measure the relationship between a plant's actual and theoretical energy outputs. It's calculated by dividing the energy generated by the plant (kWh), by the irradiance (kWh/m²), then multiplying by the active area of the PV module (m²), and finally multiplying by the PV module efficiency. The PR is stated as a percentage and is independent of location.

5.9.6 Plant Availability Factor (PAF)

Plant Availability Factor (PAF) is the ratio of a power plant's actual operating hours to its scheduled operating hours during a given period. In a solar PV power plant, PAF is an important factor that depends on the functioning of its components and grid regulation. A high PAF indicates that the plant is operating efficiently and reliably, while a low PAF can lead to higher downtime and revenue loss. Deviation Settlement Mechanism Charges (DSM Charges)

Any demand-supply imbalance of electricity leads to a fluctuation in the grid frequency from the standard value, which is set at 50 Hertz (Hz) in India. A significant drop or rise in frequency could lead to a power system blackout. Therefore, the Indian Electricity Grid Code (IEGC) 2010 restricts the operational frequency between 49.90 to 50.05 Hz. To maintain the frequency within the band, the power distribution companies must predict demand accurately and schedule supply accordingly. Deviation Settlement Mechanism (DSM) is a regulatory mechanism by which grid stability is achieved by imposing penalty and incentives for over draw/injection or under draw/injection from the schedule. DSM is a frequency linked mechanism. It is not related to any market conditions.

- 5.9.7 With the Approved List of Cell Manufacturers (ALCM) mandate for solar cells effective from June 2026, CRISIL Ratings estimates India's domestic solar cell manufacturers will meet about half of the roughly 60-65 GW of cell demand this fiscal year, up from about a quarter a year earlier, with imports continuing to serve older utility-scale projects bid before the 31 August 2025 cut-off. CRISIL notes that manufacturers pursuing deeper backward integration into ingot and wafer production are likely to see better returns, as these materials are still largely imported. (Source: CRISIL Ratings, June 2026)

According to India Ratings, the decline in solar tariffs is being driven by (a) Advancement in panel designs enabling a higher capacity utilisation factor (CUF); (b) Lower financing costs due to declining interest rates and (c) Lower capital cost/MW of around ₹29–35 million/MW due to declining panel costs MW can be seen in the below chart:

6. Valuation Methodology and Approach

- 6.1** The present valuation exercise is being undertaken in order to derive the fair EV of the projects.
- 6.2** The valuation exercise involves selecting a method suitable for the purpose of valuation, by exercise of judgment by the valuers, based on the facts and circumstances as applicable to the business of the company to be valued.
- 6.3** There are three generally accepted approaches to valuation:
- (a) "Cost" approach
 - (b) "Market" approach
 - (c) "Income" approach

6.4 Cost Approach

The cost approach values the underlying assets of the business to determine the business value. This valuation method carries more weight with respect to holding companies than operating companies. Also, cost value approaches are more relevant to the extent that a significant portion of the assets are of a nature that could be liquidated readily if desired.

Net Asset Value ("NAV") Method

The NAV Method under Cost Approach considers the assets and liabilities, including intangible assets and contingent liabilities. The Net Assets, after reducing the dues to the preference shareholders, if any, represent the value of a company.

The NAV Method is appropriate in a case where the main strength of the business is its asset backing rather than its capacity or potential to earn profits. This valuation approach is also used in cases where the firm is to be liquidated, i.e. it does not meet the "Going Concern" criteria.

As an indicator of the total value of the entity, the NAV method has the disadvantage of only considering the status of the business at one point in time.

Additionally, NAV does not properly take into account the earning capacity of the business or any intangible assets that have no historical cost. In many aspects, NAV represents the minimum benchmark value of an operating business.

6.5 Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies, and comparable companies trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors perception about the true worth of the company.

Comparable Companies Multiples ("CCM") Method

The value is determined on the basis of multiples derived from valuations of comparable companies, as manifest in the stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Comparable Transactions Multiples ("CTM") Method

Under the CTM Method, the value is determined on the basis of multiples derived from valuations of similar transactions in the industry. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances. Few of such multiples are EV/Earnings before Interest, Taxes, Depreciation & Amortization ("EBITDA") multiple and EV/Revenue multiple.

Market Price Method

Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded. The market value generally reflects the investors perception about the true worth of the company.

6.6 Income Approach

The income approach is widely used for valuation under "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

DCF Method

Under DCF Method value of a company can be assessed using the Free Cash Flow to Firm Method ("**FCFF**") or Free Cash Flow to Equity Method ("**FCFE**"). Under the DCF method, the business is valued by discounting its free cash flows for the explicit forecast period and the perpetuity value thereafter. The free cash flow represents the cash available for distribution to both the owners and creditors of the business. The free cash flows in the explicit period and those in perpetuity are discounted by the WACC. The WACC, based on an optimal vis-à-vis actual capital structure, is an appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk by incorporating debt-equity ratio of the firm.

The perpetuity (terminal) value is calculated based on the business' potential for further growth beyond the explicit forecast period. The "Constant Growth Model" is applied, which implies an expected constant level of growth for perpetuity in cash flows over the last year of forecast period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business' future operations. The EV (aggregate of the present value of explicit period and terminal period cash flows) so derived, is further reduced by the value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of the business.

Conclusion on Valuation Approach

- 6.7** It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond my control. In performing my analysis, I have made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of SPVs. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the SPVs, and other factors which generally influence the valuation of companies and their assets.
- 6.8** The goal in selection of valuation approaches and methods for any business is to find out the most appropriate method under particular circumstances on the basis of available information. No one method is suitable in every possible situation. Before selecting the appropriate valuation approach and method, I have considered various factors, inter-alia, the basis and premise of current valuation exercise, purpose of valuation exercise, respective strengths and weaknesses of the possible valuation approach and methods, availability of adequate inputs or information and its reliability and valuation approach and methods considered by the market participants.

6.9 Cost Approach

In the present case, since the SPVs have entered into TSA/PPA/BESPA, the revenue of the SPVs are pre-determined for the life of the projects. In such scenario, the true worth of the business is reflected in its future earning capacity rather than the cost of the project. Considering that DPTL, IPTL, KTCO, RKPTL and RBPL projects are currently under-construction and TL SitamauSS is currently being utilised for captive consumption and in absence of any specific projections, I have considered NAV method for the purpose of valuation of these SPVs.

6.10 Market Approach

The present valuation exercise is to arrive at the Fair EV of the SPVs engaged in the power transmission business for a specific tenure. Further, the tariff revenue expenses are very specific to the SPVs depending on the nature of their geographical location, stage of project, terms of profitability. In the absence of any exactly comparable listed companies with characteristics and parameters similar to that of the SPVs, I have not considered CCM method in the present case. In the absence of adequate details about the Comparable transactions, I was unable to apply the CTM method. Currently, the equity shares of the SPVs are not listed on any recognized stock exchange of India. Hence, I was unable to apply market price method.

6.11 Income Approach

Currently, each of the SPVs except DPTL, IPTL, KTCO, RKPTL and RBPL are completed and are revenue generating SPVs. The cash flows of the SPVs for the projected period are driven by the contracts entered by the SPVs as on date like the TSA, O&M Agreements, etc. The revenues of the projects are defined for 35 years under the TSA. Hence, the growth potential of the SPVs and the true worth of its business would be reflected in its future earnings potential and therefore, DCF method under the income approach has been considered as an appropriate method for the present valuation exercise for all the SPVs except DPTL, IPTL, KTCO, RKPTL, RBPL and TL SitamauSS as explained above in the Cost approach.

In the present exercise, my objective is to determine the Fair Enterprise Value of the Project as per the DCF Method. EV is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash and cash equivalents to meet those liabilities. Accordingly, in the present case, I have considered it appropriate to consider cash flows at FCFF (Free Cash Flow to Firm) level, i.e., cash flows that are available to all the providers of capital (equity shareholders, preference shareholders and lenders). Therefore, cash flows required to service lenders and preference shareholders such as interest, dividend, repayment of principal amount and even additional fund raising are not considered in the calculation of FCFF.

While carrying out this engagement, I have relied extensively on the information made available to me by the Investment Manager. I have considered projected financial statement of the SPV as provided by the Investment Manager. I have not tested individual assumptions or attempted to substantiate the veracity or integrity of such assumptions in relation to the forward-looking financial information. However, I have made sufficient enquiries to satisfy myself that such information has been prepared on a reasonable basis. Notwithstanding anything above, I cannot provide any assurance that the forward-looking financial information will be representative of the results which will actually be achieved during the cash flow forecast period.

The following are the major steps I have considered in order to arrive at the EV of the Project as per the DCF Method:

1. Determination of Free Cash Flows to Firm which included:
 - a) Obtaining the financial projections to determine the cash flows expected to be generated by the SPV from the Investment Manager;
 - b) Analyzed the projections and its underlying assumptions to assess the reasonableness of the cash flow.
2. Determination of the discount rate; and
3. Applying the discount rate to arrive at the present value of the cash flows.

7 Valuation of the SPVs

7.1 The key assumptions for Transmission & BESS assets revenue, incentives and penalty of the SPVs, are as follows:

7.1.1 Transmission projects Revenue:

Power transmission projects, including the SPVs, earn revenue from electricity transmission tariffs pursuant to TSAs read with the Tariff Adoption Order ("TAO") passed by CERC in accordance with the Electricity Act. These SPVs receive availability-based tariffs under the TSAs irrespective of the actual quantum of power transmitted through the line. The tariff for the SPVs is contracted for the period of the relevant TSA, which is up to 35 years from the scheduled commissioning date, other than ENICL and JKTP, which is for 25 years.

The majority of the SPVs have entered into TSAs with long-term transmission customers to set up projects on a BOOM or BOO basis and to provide transmission services on a long-term basis to such customers on the terms and conditions contained in the TSAs. The term of each TSA is 35 years from the scheduled commercial date of operation of the applicable project, (other than for ENICL and JKTP, which are for 25 years each) unless terminated earlier in accordance with the terms of the TSA. The TSAs provide for, among other things, details and procedures for project execution, development and construction, operation and maintenance.

Tariffs under these TSAs are billed and collected pursuant to the 'Point of Connection' (PoC) mechanism, a regulatory payment pooling system offered to interstate transmission system (ISTS) such as the systems operated by majority of the SPVs. Under the PoC mechanism, payments are made to a central payment pool and the proceeds are distributed proportionately to all transmission services providers, such as the SPVs. While the ultimate obligators are usually the state distribution utilities, the pooling mechanism mitigates single counter party risk.

The tariff rates are comprised of a fixed non-escalable charge, a variable escalable charge, and incentives for maintaining targeted availability.

- **Non Escalable Transmission Revenue:** The projects under long term TSA mainly derive revenue that is fixed as per the TSA and TAO based on the following key principles:
 - i. Project revenues are availability-based, with full tariff entitlement achieved upon meeting normative availability of over 98%. Such availability is certified by the CERC based on grid performance.
 - ii. There are deductions in the revenue if the availability is less than 98%
 - iii. The revenue is not linked to demand risk or grid fluctuations or any other generation or tariff risks.
- I have corroborated the revenue considered in the financial projections with the respective TSA read with TAO and documents provided to us by the Investment Manager.
- In case of certain SPVs, the transmission lines could not be commissioned on their scheduled commissioning dates due to change in law and force majeure events, including the amendment of Forest Guidelines, delay in grant of forest clearance, delay in receiving authorisation under Section 164 of the Electricity Act, delay in allotment of land for the construction, change in applicable rates of taxes, etc. These delays when acknowledged by CERC, the scheduled commercial operation date gets revised accordingly. Further to compensate for the loss in revenue, the SPVs file a tariff revision petition with CERC, pursuant to which the CERC once satisfied may agree to the claim in respect of cost escalation.

In the present case, as represented us by the Investment Manager following SPVs have filed for incremental revenue (increase in tariff amount)

SPVs	CERC Order	Description
MTL and BDTCL	Received	Incremental Revenue is considered in MTL and BDTCL due to change in law and/ or force majeure, mainly due to introduction of GST in FY 2017, the additional expenditure incurred due to such change in law shall be reimbursed as per the CERC order dated 11 th March 2019 and 20 th October 2020 respectively.
ENICL	Received	To compensate for the damages sustained by ENICL, an increase in revenue charges was approved as per various CERC orders detailed below: Purnea-Biharsharif Line: Due to obstruction at Mahenderpur village and flooding in Bihar, CERC, through its order dated 24th August 2016, granted compensation by allowing an increase in both Non-Escalable and Escalable revenue by approximately 6.18%. Bongaigaon-Siliguri Line: In light of delays caused by the pending forest clearance, riots in Kokrajhar, and bandh in Assam, CERC, through its order dated 13th September 2017, approved a compensation by increasing the Non-Escalable revenue by approximately 3.73%.

		Change in Law During Construction: Further, due to a Change in Law event during the construction phase, CERC, via its order dated 19 th September 2018, allowed an increase in Non-Escalable Transmission Charges by approximately 1.09%.
JTCL, KhTL, OGPTL, NRSS, PKTCL, GPTL and NERTL	Not Required	According to the Investment Manager, the claim for incremental revenue by the respective SPVs arises from the additional tax liability due to the introduction of the Goods and Services Tax (GST) compensation cess. This claim does not require a separate CERC order, as it is covered under the scope of the CERC order dated 17 th December 2018. Additionally, due to significant changes in law during the construction period, CERC, through its order dated 19 th May 2024, approved an increase in Non-Escalable Transmission Charges for NERTL at a rate of approximately 2.39%. Furthermore, NERTL and NRSS have been granted increases in Non-Escalable Transmission Charges on account of force majeure events, at rates of approximately 4.76% and 0.26%, respectively.

Accordingly, I have received computation of such incremental revenue from the investment manager based on CERC orders received and we relied on the same to consider in the current valuation.

- **Escalable Transmission Revenue:**

Escalable Transmission Revenue is the revenue component where the revenue is duly escalated based on the rationale as provided in the respective TSA read with TAO and documents provided to me by the Investment Manager. The escalation, as presented to us by the investment manager, is to mainly compensate for the inflation factor.

- **Transmission Revenue for JKTP:**

The revenues generated by intra-state transmission assets (being, JKTP) are not dependent on a regulatory order and are dependent on tariffs as determined in terms of the relevant TSA, and such intra -state transmission assets recover tariffs equivalent to a base unitary charge which is subject to annual revisions. The transmission revenue of JKTP comprises of Unitary Charges ("UC") as provided in the TSA. Unitary Charges ("UC"): Unitary Charges is the monthly fee for transmission services as per the TSA, which is duly escalated based on the Wholesale Price Index series 2011-12 (restated with 2004-05 series) to arrive at the indexed UC rationale as provided in the respective TSA read with TAO and documents provided to me by the Investment Manager.

- **Transmission Revenue for PrKTCL, PTCL-II, KTL-II, KTL-II and NRSS-II:**

7.1.2 The transmission revenue of PrKTCL, PTCL-II, KTL-II, KTL-II and NRSS-II are calculated on cost plus basis as per the extant provisions of the CERC Tariff Regulations, 2024 and it comprises of depreciation, interest on loan, return on equity, interest on working capital and O&M expenses. The same has been determined on the basis of the mechanism provided under the extant provisions.

7.1.3 Incentives:

For Transmission Projects, As provided in the respective TSA, if the annual availability exceeds 98%, the SPVs shall be entitled to an annual incentive as provided in TSA. Provided no incentives shall be payable above the availability of 99.75%. Based on the past track record of the asset and the general industry standard, the annual availability shall be above 98% where the SPVs shall be entitled to the incentives as provided in the respective TSA.

For KTCO, if the annual availability exceeds 98.5%, the SPVs shall be entitled to an annual incentive as provided in TSA. Provided no incentives shall be payable above the availability of 99.75%.

For JKTP, when the availability exceeds the Normative Availability of 98%, incentive is received based on pro rata basis in same proportion as UC bears to Normative Availability. Further, for JKTP, as per its TSA, if the transmission loss for any month is less than the normative loss, then the SPV will receive an incentive. As provided in the TSA, if the annual availability exceeds 98%, the SPV shall be entitled to an annual incentive as provided in TSA. Provided no incentives shall be payable above the availability of 99.96%.

For PrKTCL and PTCL-II when the actual availability exceeds Normative Availability of 98.5%, incentive is received by PrKTCL and PTCL-II. Incentive is computed on pro rata basis in same proportion as Transmission Revenue bears to Normative Availability. No incentive in case of availability beyond 99.75%. As represented to us by the Investment Manager, the annual availability of PrKTCL shall be above 98.5% where it shall be entitled to the incentives as provided in the CERC Tariff Regulations, 2024.

Project / SPV	Normative Availability	Incentive Eligibility Trigger	Incentive Method	Maximum Availability for Incentive
Projects (TBCB)	98.00%	Availability > 98.0%	As per respective TSA	99.75%
KTCO	98.50%	Availability > 98.5%	As per TSA	99.75%
JKTP	98.00%	Availability > 98.0%	Pro-rata based on UC vs Normative Availability	99.96%
PrKTCL & PTCL-II	98.50%	Availability > 98.5%	Pro-rata based on Transmission Revenue vs Normative Availability (CERC Tariff Regulations, 2019)	99.75%

7.1.4 Penalty:

For TBCB Transmission Projects, if the annual availability in a contract year falls below 95%, the SPVs shall be liable for an annual penalty as provided in the TSA. Based on my analysis, in the present case, it is assumed that the annual availability will not fall below 95% and hence, penalty is not considered in the financial projections.

For JKTPL, when the Availability in any month is less than the 98%, the UC for such month shall be proportionately reduced and such reduction shall be multiplied by a factor of 1.5 by way of penalty. If the transmission loss of JKTPL for any month is more than the normative loss, penalty will be payable by JKTPL as per the computations provided in the TSA. The reliability of the system capacity in an accounting year shall be measured in terms of the number of forced Outages occurring on the individual elements of the System Capacity in successive Reliability Measurement Units ("RMU"). The cumulative incentive or penalty shall be determined with reference to normative availability within 30 days from close of every year.

In case of Battery Energy Projects, if monthly system availability falls below 95%, the monthly capacity charges are proportionally reduced as per the BESPAs. Based on my analysis, in the present case, it is assumed that the monthly availability will not fall below 95% and hence, penalty is not considered in the financial projections.

7.1.5 Battery Energy Storage System Projects:

Battery Energy Storage System Projects SPVs, earn revenue from the sale of BESS Capacity pursuant to BESPAs as approved by the appropriate commission, which will be fixed for entire term of agreement at delivery point. As a capacity-based contract, the SPV receives availability-based tariff under the BESPAs irrespective of the actual utilization of BESS by the buying utility. The tariff for the SPV is contracted for the period of the relevant BESPAs, which is up to 12 years from the scheduled commissioning date.

Where long-term BESPAs are in place, BESS SPVs receive fixed availability-based payments, independent of actual dispatch, provided the system remains operational and available as per the agreed technical performance standards.

7.1.6 Expenses:

Expenses are estimated by the Investment Manager for the projected period based on the inflation rate as determined for the SPVs. I have relied on the projections provided by the Investment Manager.

- **Operations & Maintenance ("O&M"):** O&M expenditure is estimated by the Investment Manager for the projected period based on the inflation rate as determined for the SPVs. The Investment Manager has projected expenses to be incurred for the O&M of the SPVs including, but not limited to, transmission line maintenance expenses or BESS Maintenance Expenses for the respective SPVs, rates and taxes, legal and professional fees and other general and administration expenses. I have relied on the projections provided by Investment Manager on the O&M expenses for the projected period.
- **Insurance Expenses:** I understand from the Investment Manager that the insurance expenses of the SPVs are not reasonably expected to inflate for the projected period. I have relied on the projections provided by the Investment Manager on the insurance expenses for the projected period.

O&M expenses are projected to escalate ~2.5% to 5% year on year basis. PM fees is observed to be escalating on the same basis ~2.5% to 5% p.a. in line with operating expenses (excluding Insurance and any expense which is statutory in nature).

(Refer Appendix 6, 7 and 9 for detailed working)

7.1.7 Depreciation:

For calculating depreciation as per Income Tax Act for the projected period, I have considered depreciation rate as specified in the Income Tax Act and WDV as provided by the Investment Manager. The book depreciation has been provided by the Investment Manager till the life of the SPVs for all the projects except RTBP projects. The book depreciation for RTBP projects has been calculated using the rates and methodology notified vide CERC Tariff regulations, 2024.

7.1.8 Capex:

As represented by the Investment Manager, regarding the maintenance capex, the same has already been considered in the Operations & Maintenance expenditure for the projected period and regarding the expansion capex, the SPVs are not expected to incur any Capex in the projected period except for BDTCL, PTCL, PrKTCL and GBPL.

(Refer Appendix 8)

7.1.9 Tax and Tax Incentive:

As per the discussions with the Investment Manager, Section 200 of Income Tax Act, 2025 has been considered for the projected period of the SPVs (except PrKTCL) for the current valuation exercise, which inter alia does not provide benefits of additional depreciation and section 138 and Sec 206. Accordingly, the base corporate tax rate of 22% (with applicable surcharge and cess) is considered. As per the discussions with the Investment Manager,

PrKTCL will continue with old tax regime and avail the benefits of additional depreciation, section 206 and section 138. Post complete utilization of 138, PrKTCL will shift to the new tax regime as per the Income Tax Act 2025.

7.1.10 Working Capital:

The Investment Manager has represented the working capital requirement of the SPVs for the projected period. The operating working capital assumptions for the projections provided by the Investment Manager comprises of prepaid expense, security deposit, trade receivables, unbilled revenue, trade payables and others.

7.1.11 Terminal Period Cash Flows:

Terminal value represents the present value at the end of explicit forecast period of all subsequent cash flows to the end of the life of the asset or into perpetuity if the asset has an indefinite life.

I understand, based on the representation of the Investment Manager, that all the transmission project SPVs except JKTPL are expected to generate cash flow even after the expiry of concession period as the projects are either on BOOM or BOO model and the ownership will remain with the respective SPVs even after the expiry of concession period. The value of SPVs at the end of the concession period may be dependent on the expected renewal/extension of concession period with limited capital expenditure or the estimated salvage value the assets of the SPVs can fetch.

Considering the estimation uncertainty involved in determining the salvage value and basis my discussion with the Investment Manager on the cash flow estimates for the period after the concession period, I found it appropriate to derive terminal period value, which represents the present value at the end of explicit forecast period/concession period of all subsequent cash flows to the end of the life of the asset or into perpetuity if the asset has an indefinite life, based on the perpetuity value derivation / Gordon growth model with 0% terminal growth rate. Accordingly, for the terminal period (i.e. after the expiry of 35 years), a terminal growth rate of 0% has been applied on cash flows based on Investment Manager's estimate for all the SPVs, other than ENICL.

ENICL was one of the earlier projects awarded to the Sponsor through the process of Tariff Based Competitive Bidding ("TBCB") on 7th January 2010. The terms of tariff for ENICL are governed by the CERC Order ("Tariff Adoption Order") dated 28th October 2010, read with the TSA. As per the Tariff Adoption Order, the tariff adopted for the transmission system is valid for a period of 25 years. The tariff of the transmission assets beyond the period of 25 years will be governed by the provisions of clause (4) of Regulation 13 of CERC (Procedure, Terms and Conditions for grant of Transmission Licence and other related matters) Regulations ("CERC Licence Regulations") dated 26th May 2009 as amended from time to time. Hence, in case of ENICL, based on the extant provisions of the CERC Regulations, in case of transmission assets that have been awarded on the basis of competitive bidding under Section 63 of the Electricity Act, as in the case of the ENICL, the tariff beyond the initial period of TSA shall be determined based on various factors, inter-alia, basis of norms prevalent during the period in which the TSA is due to expire. Considering the extant provisions of CERC Regulations, the Investment Manager has represented me a post-tax return on equity of 15% on estimated equity can be considered as a cash flow for period after end of TSA period. Accordingly, the Investment Manager has provided me an estimated terminal cash flow to be expected after the end of TSA period in case of ENICL. I have considered the same for my valuation analysis.

I understand from the representation of the Investment Manager that JKTPL will generate cash flow even after the expiry of concession period of 25 years, as the project has an extension clause stating a further increase in the license tenure for years. Since the project is based on DBOFT model the ownership will not remain with the SPV after the expiry of the extended period. Based on my discussions with the Investment Manager, I understand it is a highly probable that JKTPL will receive an extension of 10 years as per terms of TSA. Hence, I have considered an extension of 10 years for the JKTPL project without assigning any value to the Terminal period. Accordingly, I have projected the revenue and thus the Valuation working till FY 46, considering the impact of extension of 10 years in the TSA post the end the Concession Period.

Further, in case of battery energy storage system projects, KBPL is as per BOOT model in which case the asset is to be transferred at the end of 12 years and hence the terminal period value for KBPL has been considered based on the value on account of cash flows from realization of working capital at the end of the tenure.

In case of GBPL the respective asset is as per BOO in which case the ownership of the underlying assets (tangible assets) shall remain with the SPV even after the expiry of the BESPA term and as the cash flows beyond the end of tenure i.e. In case of GBPL the respective asset is as per BOO model in which case the ownership of the underlying assets (tangible assets) shall remain with the SPV even after the expiry of the BESPA term and as the cash flows beyond the end of tenure i.e. 12 years are relatively uncertain, the terminal period value (i.e. value on account of cash flows to be generated after the expiry of the period) has been considered based on the salvage value of the batteries and realization of working capital at the end of the tenure.

7.1.12 True up petition for PrKTCL:

I understand that PrKTCL had filed petition with CERC for Approval of Truing up of Transmission Tariff for 2014-19 Tariff Block and Determination of Transmission Tariff for 2019-24 Tariff Block for transmission line elements. CERC has issued its final order in the petition vide order dated 23.07.2025. Based on the same Tariff of PrKTCL has been determined till 2023-24. As provided under the 2024 CERC Tariff Regulations the PrKTCL Truing up of Transmission Tariff for 2019-24 Tariff Block and determination of Transmission Tariff for 2024-29 Tariff Block has to be filed within 6 months from the date of receipt of order i.e. 23.07.2025 i.e. by 22.01.2026. The Investment Manager has informed

me that the projections for PrKTCL are based on the above-mentioned petition. Thus, as per the CERC Tariff Regulations, 2019-24, revenue components, i.e. interest rate (impacting Interest on loan component), and IOWC alongwith additional capital expenditure (if any) will be trued up before CERC for 2019-24 tariff block. This truing up may have a bearing on the transmission revenue of PrKTCL for the given period.

The key assumptions for Solar and CER Revenue of the SPVs are as follows:

I have estimated the fair EV of the SPVs using the DCF Method. While carrying out this engagement, I have relied extensively on the information made available to me by the Investment Manager. I have considered projected financial statements of the SPVs as provided by the Investment Manager.

Valuation

The key assumptions of the projections provided to us by the Investment Manager are divided into two parts:

- A. Key Assumptions for cash flows dependent on the terms of the respective PPAs of the SPVs.
- B. Key Assumptions for cash flows pertaining to Certified Emission Reduction ("CER") Units.

(A) Key assumptions for Cash Flows dependent on terms of PPA are as follows:

Cash Flows falling under this category are driven by the revenue and operations required as per the terms of the respective SPVs PPAs, O&M Agreements, etc.

7.2.1. Revenue from sale of electricity units:

The revenues generated by the SPV are correlated mainly to the amount of electricity generated, which in turn is dependent upon available irradiance and weather conditions. Irradiance and weather conditions have natural variations from season to season and from year to year and may also change permanently because of climate change or other factors. The total kilowatt hour units expected to be generated annually during the tenure of PPA are estimated using budgeted plant load factors based on inter-alia the forecasted irradiance and weather conditions.

The contractual tariff rates are applied to this annual estimate to determine the total estimated revenue over the term of the PPA. The Plant Load Factor ("PLF") is the ratio of the actual output of a solar power plant over the reporting period to their potential output if it were possible for them to operate at full rated capacity. I have relied on the same.

Sr. No.	Project	Tariff rate as per PPA (INR)	Balance PPA Period	Customer
1	ISPL 1	4.43	~ 17 Years 1 Months	SECI
2	ISPL 2	4.43	~ 17 Years 7 Months	SECI
3	TNSEPL	7.01	~ 14 Years 4 Months	TANGEDCO
4	UMD	7.01	~ 14 Years 7 Months	TANGEDCO
5	TL Kanji	8.44	~ 14 Years 9 Months	UPPCL
6	TL Raj	3.47	~ 17 Years 3 Months	TANGEDCO
7	Solar Edge	4.43	~ 16 Years 10 Months	SECI
8	TL Charanka	6.47 from FY 26 to FY 37	~ 10 Years 9 Months	GUVN
9	PLG	15 per unit for first 12 years 5 per unit from 13 th Year	~ 10 Years 7 Months	GUVN
10	USUPL	9.33 per unit for first 12 years 3.25 per unit from 13 th year	~ 15 Years 3 Months	UPPCL
11	Globus	6.97	~ 14 Years 7 Months	MPPMCL
12	TL Patlasi	5.45	~ 13 Years 10 Months	SECI
13	TL Nangla	8.3	~ 13 Years 9 Months	PSPCL
14	TL Gadna	8.99	~ 11 Years 9 Months	NVVN
15	GGEL	12.2	~ 12 Years	NVVN
16	JUPL	2.71	~ 23 Years 11 Months	SECI
17	RSAPL	2.37	~ 23 Years 7 Months	SECI

(Refer Annexure 10 for detailed PLF working)

7.2.2. GST Annuity

If there is any additional increase in BCD, SGD and/or IGST which increases the Project Cost during execution of the Project, then Project developer can claim the additional expenditure under PPA provision of 'Change in Law - CIL'.

As informed by the Investment Manager, Solar Edge, ISPL 1 and ISPL 2 shall receive monthly GST Annuity for an increase in capital expenditure due to the introduction of GST, claimed as Change in Law in terms of the PPA(s) by Solar Edge, ISPL 1 and ISPL 2. The CERC order, entitled Solar Edge, ISPL 1 and ISPL 2 to receive monthly annuity payments until Mar'29, Mar'33 and Mar'33 respectively is relied upon for this revenue.

7.2.3. Tariff Upside in relation to GGEL:

In its order dated 26th July, 2022, APTEL directed CERC to devise a mechanism for an upward revision of the tariff in the case of GGEL, in light of the lower actual DNI compared to the projected DNI. Pursuant to this order, the Investment Manager has submitted a request to CERC and NVVN for an incremental tariff increase of INR 4.15 per unit, applicable from COD through the end of the project's life. The Investment Manager anticipates receiving the revised tariff (with retrospective effect) starting from FY 2027. As per the transaction documents between GGEL and the erstwhile sellers, 75% of the incremental tariff cash flows (net of tax) actually received shall be paid to the erstwhile sellers. Additionally, the documents stipulate that GGEL is also obligated to pay 75% of the net present value (NPV) of future incremental tariff-related cash flows (net of tax), calculated using a 12% discount rate.

7.2.4. Expenses:

I have relied on the projections provided by the Investment Manager for expenses and have checked the reasonableness of the same, by analyzing the past trend in expenses and the expenses projected by the SPVs.

1. **Operations & Maintenance ("O&M"):** O&M expenditure is estimated by the Investment Manager for the projected period on the basis of the O&M Agreement entered by the SPV with an adequate escalation considered by the Investment Manager. The Investment Manager has escalated these costs by approximately ~2-4% p.a. The Investment Manager has provided the estimated O&M costs for the projected period and I have corroborated the said expenses with O&M Contract signed.
2. **Lease Charge:** The amount of lease charges is corroborated with the lease agreements entered into by the SPV. I have relied on the projected lease expenses working and Lease agreements provided by the Investment Manager.
3. **Insurance Expenses:** I understand from the Investment Manager that the insurance expenses of the SPVs are not reasonably expected to inflate for the projected period. I have relied on the projections provided by the Investment Manager on insurance expenses for the projected period, which are based on the existing insurance costs of the SPVs.
4. **Other Expenses:** Other Expenses represented by the Investment Manager includes Statutory fees, Rajasthan Renewable Energy Development Fund Charges (RREDC), Spares, Inverter Charges/ Replacements costs, Overheads which include expenses related to IT, HR, Admin, Compliance, Audit fees, etc. I have relied on the estimate of these expenses as provided by the Investment Manager.

O&M expenses are projected to escalate ~2-4% year on year basis. PM fees is observed to be escalating at 2-4% p.a in line with operating expenses (excluding Insurance and any expense which is statutory in nature). Other costs are escalated at ~2.5% p.a.

(Refer Appendix 6, 7 and 9 for detailed working)

7.2.5. Capital Expenditure ("Capex"):

I understand that Solar SPVs has sourced majority of its components such as solar panels and inverters directly from multiple manufacturers with industry standard warranty and guarantee terms. I understand that some of the SPVs are expected to incur Capex in the projected period.

(Refer Appendix 8 for detailed working)

7.2.6. Tax and Tax Incentive:

As per the discussions with the Investment Manager, the new provisions of Income Tax Act 2025 has been considered for the projected period of the Solar SPVs except for UMD and TL Nangla wherein new provisions of Income tax act have been considered after lapse of benefits as per Section 138 of the act..

7.2.7. Working Capital:

The Investment Manager has represented the working capital requirement of the SPV for the projected period in terms of trade payables days and trade receivables (Debtors & Unbilled revenue) days.

The trade payables days are considered to be 45 days (of annual expenses) based on historical trend, and trade receivables days are considered to be 45 days (of annual revenue), based on the historical collection trends, terms of the respective PPAs and applicable Electricity Rules (like Electricity Rules, 2022).

7.2.8. RREDC Charges:

REDC are state-imposed levies applicable to renewable energy projects, primarily solar and wind, in select Indian states. These charges are collected by the respective State Nodal Agencies or State Load Despatch Centres (SLDCs) to fund regulatory activities, facilitate infrastructure development, and promote the growth of renewable energy within the state.

7.2.9. Terminal Value:

Terminal value represents the present value at the end of explicit forecast period of all subsequent cash flows till the end of the life of the asset or into perpetuity if the asset has an indefinite life. As the ownership of the underlying assets (tangible assets) shall remain with the SPV even after the expiry of PPA term and as the cash flows beyond the end of tenure i.e. 30 years are relatively uncertain, the terminal period value (i.e. value on account of cash flows to be generated after the expiry of the period) has been considered based on the salvage value of the plant & machinery, sale of freehold land and realization of working capital as represented by the Investment Manager at the end of the tenure.

(B) The key assumptions for Cash Flows pertaining to Certified Emission Reduction (“CER”) are as follows:

The SPVs are also engaged in selling CER units to carbon credit traders/ end users. I understand from the Investment Manager that the SPVs have received the necessary registrations / certifications. Hence revenue generated from this activity has been estimated by the Investment Manager during the projected period for all the projects except ISPL 1, ISPL 2 and RSAPL. The Cash Flows under this category are driven by market forces of demand and supply.

7.2.10. Sale of units for Certified Emission Reductions (CERs):

The Investment Manager has estimated the revenue from sale of CER units based on projected units generated by the SPVs from their respective Solar Plant(s), whereas the estimated selling price of CER is based on a market information. The Investment Manager expects to sell the CER units from FY29.

Further, while the earlier valuation assumed the commencement of sale of CER units from Q1 of FY27, the Investment Manager now expects the sale of CER units to commence from Q1 of FY29.

7.2.11. Expenses / Capital Expenditure:

I have been informed by the Investment Manager that no material separate expenses or capital expenditure is expected to be incurred by the SPVs for selling the CER units earning. The general admin expenses are already considered while projecting the expenses in Para 7.2.4 above.

7.2.12. Taxes and Tax Incentive:

As per discussions with the Investment Manager, income generated from the sale of carbon credits is subject to effective tax under the Income Tax Act 2025.

7.2.13. Working Capital:

The Investment Manager has represented the working capital requirement of the SPVs will be negligible. Based on the past trend, the Investment Manager has represented that income generated from the sale of CER units is typically received concurrent with the sales themselves. Therefore, for the forecasted period concerning CER Income, the Investment Manager has projected a trade receivable period of 0 days.

7.3 Calculation of Weighted Average Cost of Capital for the SPVs:

7.3.1 Cost of Equity:

Cost of Equity (CoE) is a discounting factor to calculate the returns expected by the equity holders depending on the perceived level of risk associated with the business and the industry in which the business operates.

For this purpose, I have used the Capital Asset Pricing Model (CAPM), which is a commonly used model to determine the appropriate cost of equity for the SPVs.

$$K(e) = R_f + (ERP \times \text{Beta}) + \text{CSRP}$$

Wherein:

K(e) = cost of equity

R_f = risk free rate

ERP = Equity Risk Premium

Beta = a measure of the sensitivity of assets to returns of the overall market

CSRP = Company Specific Risk Premium (In general, an additional company-specific risk premium will be added to the cost of equity calculated pursuant to CAPM).

For valuation exercise, I have arrived at adjusted cost of equity of the SPVs based on the above calculation (Refer Appendix 3 for detailed working).

7.3.2 Risk Free Rate:

Conventionally, the Risk-Free Rate is the yield derived from the Zero Coupon Yield Curve ("ZCYC") as on the valuation date. As is evident from the chart, the ZCYC rates during January, February, and June 2026 remained relatively stable, reflecting a lower degree of geopolitical risk during these periods. In contrast, the months of March, April, and May 2026 exhibited comparatively higher volatility, coinciding with heightened geopolitical uncertainty during that period.

Hence, as of 31 March 2026, this volatility was observed, and in the report as on 31 March 2026, since the difference between the daily average yield for the quarter ended 31 March 2026 and the valuation-date rate was considered significant, the quarterly average rate was adopted.

The chart below sets out the daily movement of the 10-year ZCYC rate over the period January 2026 to June 2026:

For the current valuation as of 30 June 2026, the primary basis for determining the risk-free rate remains the valuation-date ZCYC yield, consistent with prevailing valuation practice. As a reasonableness check, we compared the valuation-date yield with the average ZCYC yields observed during periods considered representative of normal market conditions following the easing of the temporary geopolitical disruptions experienced during March to May 2026. The daily average of the ZCYC yields for January, February, and June 2026 works out to 6.92%, as against the valuation-date rate of 6.81%. In our view, this appropriately reflects the underlying risk-free rate as of the valuation date, having regard to the long-term nature of the projected cash flows. The valuation-date yield also reflects prevailing market conditions, including the effect of regulatory and tax changes impacting the Government securities market that had become effective prior to the valuation date; accordingly, no further adjustment has been considered necessary.

For comparison, the previous valuation as of 31 March 2026 considered a risk-free rate of 6.90%, being the daily average yield for the quarter ended 31 March 2026, whereas the corresponding valuation-date ZCYC yield was 7.16%.

7.3.3 Equity Risk Premium (“ERP”):

The Equity Risk Premium (ERP) is a measure of the additional return that investors require for investing in equity markets over risk-free assets, such as government bonds. It is typically estimated by comparing historical realised returns on equity with the risk-free rate, often represented by 10-year government securities. For my estimation of the ERP for India, I have analysed rolling historical returns of the Nifty 50 Index over 10-year, 15-year, and 20-year periods, covering data from 2005 to 2026. As of 30th June 2026, the calculated ERP based on these rolling return periods stands at 6.24%, 6.49% and 7.90% for the 10-year, 15-year and 20-year periods respectively. These figures indicate variability in ERP over different investment horizons, but collectively they suggest a range around 6% to 8%. Considering the historical trends, variability across periods, and long-term expectations, an equity risk premium of 7% for India continues to be an appropriate and reasonable assumption. For comparison, the previous valuation as of March 2026 used an Equity Risk Premium of 7.00%.

7.3.4 Beta:

Beta is a measure of the sensitivity of a company's stock price to the movements of the overall market index. In the present case, I find it appropriate to consider the beta of companies in similar business/ industry to that of the SPVs for an appropriate period.

Transmission & BESS Assets:

Based on my analysis of the listed InvITs and other companies in power and infrastructure sectors, I find it appropriate to consider the beta of Power Grid Corporation of India Limited (“PGCIL”), Powergrid Infrastructure Investment Trust and IndiGrid Infrastructure Trust for the current valuation exercise.

Solar Assets:

(A) Beta for cash flows dependent on the terms of PPA:

For the valuation of the SPVs, I find it appropriate to consider the beta of NTPC Limited, Powergrid Infrastructure Investment Trust, Power Grid Corporation of India Ltd. and IndiGrid Infrastructure Trust for an appropriate period. The beta so arrived, is further adjusted based on the factors of mentioned SPVs like completion of projects, revenue certainty, past collection trend, lack of execution uncertainty, etc. to arrive at the adjusted unlevered beta appropriate to the SPVs.

(B) Beta for cash flows pertaining to Certified Emission Reduction (“CER”):

For the purpose of determination of K_e for discounting CER Cash Flows, I find it appropriate to consider the beta of one (1) considering the risk in the absence of any comparable companies for this business activity. I have considered debt-equity at 0:100 for the cash flows pertaining to CER. Accordingly, the re-levered beta of 1 has been considered for all the SPVs for the cash flows pertaining to CER.

I have further unlevered the beta of such companies based on market debt-equity of the respective company using the following formula:

$$\text{Unlevered Beta} = \text{Levered Beta} / [1 + (\text{Debt} / \text{Equity}) * (1-T)]$$

Further I have re-levered it based on debt-equity at 70:30 based on the industry Debt: Equity ratio using the following formula:

$$\text{Re-levered Beta} = \text{Unlevered Beta} * [1 + (\text{Debt} / \text{Equity}) * (1-T)]$$

Accordingly, as per above, I have arrived at re-levered betas of the SPVs.

(Refer Appendix 2 for relevered beta)

7.3.5 Company Specific Risk Premium (“CSRP”):

Discount Rate is the return expected by a market participant from a particular investment and shall reflect not only the time value of money but also the risk inherent in the asset being valued as well as the risk inherent in achieving the future cash flows.

Transmission Assets:

While determining the WACC or $K(e)$ of ENICL for the terminal period, I have considered CSRP of 3% on account of uncertainty attached to the determination of cash flows of ENICL for the terminal period.

The tariff of GPTL-II, PrKTCL, KTL-II, KTL-III, PTCL-II, KNTL-II and NRSS-II is determined under Section 62 of the Act by CERC which is subject to changes on a regular interval. Certain components that subject to changes are the expected rate of return on equity, operation and maintenance expenses, interest expenses, etc. that may have a bearing on the estimated tariff and consequently on the cash flows of the SPVS during the projected period. Hence, for GPTL-II, PrKTCL, KTL, PTCL, KNTL and NRSS-II considering the nature of regulatory risk and its likely impact on the cash flows of the SPVs during the projected period due to review of tariff determination (such tariff determination review is carried out every five years) norms during the useful life of the SPV and later, approval of the true up petition by CERC and basis my discussion with Investment Manager, I found it appropriate to consider 1% CSRP.

In other case, considering the length of the explicit period, the basis of deriving the underlying cash flows and basis my discussion with Investment Manager, I found it appropriate to consider 0% CSRP.

For comparison, the CSRP remains consistent with the previous valuation exercise as of March 2026 for transmission assets except NRSS-II. NRSS-II was valued using NAV in the previous valuation.

Solar Assets:

A CSRP of 1% has been applied to account for the variance exceeding 10% between the actual PLF and the PLF assumptions provided by management. Accordingly, the CSRP has been considered in the valuation of solar projects namely GGEL, Solar Edge, Globus, and TL Patlasi.

For comparison, the CSRP remains consistent with the previous valuation exercise as of March 2026.

7.3.6 Cost of Debt:

The calculation of Cost of Debt post-tax can be defined as follows:

$$K(d) = K(d) \text{ pre-tax} * (1 - T)$$

Wherein:

K(d) = Cost of debt

T = tax rate as applicable

For the current valuation exercise, pre-tax cost of debt has been considered as 7.42%, as represented by the Investment Manager. For comparison, the previous valuation as of March 2026 used a Cost of Debt of 7.40%.

(Refer Appendix 4 for detailed working)

7.3.7 Debt : Equity Ratio:

In the present valuation exercise, I have considered debt : equity ratio of 70:30 based on industry standards and as per the guidance provided by various statutes governing the industry. I have considered the industry benchmark since the cost of capital is a forward-looking measure and captures the cost of raising new funds to buy the asset at any valuation date (not the current actually deployed). Specifically, such benchmark is required to consider the nature of the asset class, and the comparative facts from the industry to arrive at the correct assumption.

Moreover, Regulation 20 of Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014 permits an InvIT to raise debt upto 70 percent of the value of assets subject to the fulfillment of specific conditions including:

- (i) obtaining a credit rating of "AAA" or equivalent for its consolidated borrowing and the proposed borrowing, from a credit rating agency registered with the Board;
- (ii) have a track record of at least six distributions, in terms of sub-regulation (6) of regulation 18, on a continuous basis, post listing, as at the end of the quarter preceding the date on which the enhanced borrowings are proposed to be made.
- (iii) utilize the funds only for acquisition or development of infrastructure projects.
- (iv) obtain the approval of unitholders in the manner specified in sub-regulation (5A) of regulation 22.]

Given the risk profile of Solar, Transmission & Battery Energy Storage System projects and considering the leverage at 70% of the total project cost based on rating agencies reports available in public domain, and further considering the InvIT Regulations allowing in general upto 70% leverage in assets where the AAA rating has been obtained, a debt-to-equity ratio of 70% for Solar asset was found to be appropriate.

Accordingly, I have considered the same weightage to arrive at the WACC of the SPVs. For comparison, the previous valuation of March 2026 used a Debt Equity Ratio of 70:30.

7.3.8 Weighted Average Cost of Capital (WACC):

The discount rate, or the WACC, is the weighted average of the expected return on equity and the cost of debt. The weight of each factor is determined based on the company's optimal capital structure.

Formula for calculation of WACC:

$$WACC = [K(d) * \text{Debt} / (\text{Debt} + \text{Equity})] + [K(e) * (1 - \text{Debt} / (\text{Debt} + \text{Equity}))]$$

Accordingly, as per above, I have arrived the WACC for the explicit period of the SPVs. For comparison, WACC for previous valuation as of March 2026 is shown in the table below.

(Refer Appendix 3 for detailed workings).

(A) Transmission & BESS Assets:

Project Sr No.	Projects	30-Jun-26	31-Mar-26

43	RSAPL	8.00%	7.86%

7.3.9 Cash Accrual Factor (CAF) and Discounting Factor

Discounted cash flow require to forecast cash flows in future and discount them to the present in order to arrive at present value of the asset as on Valuation Date.

To discount back the projections we use the Cash Accrual Factor ("CAF"). The Cash Accrual Factor refers to the duration between the Valuation date and the point at which each cash flow is expected to accrue. Discounted cash flow is equal to sum of the cash flow in each period divided by discounting factor, where the discounting factor is determined by raising one plus discount rate (WACC) to the power of the CAF.

$$DCF = [CF1 / (1+r)^{CAF1}] + [CF2 / (1+r)^{CAF2}] + \dots + [CFn / (1+r)^{CAFn}]$$

Where,

CF = Cash Flows,

CAF = Cash accrual factor for particular period, R = Discount Rate (i.e. WACC)

<<This space is left intentionally blank>>

8 Valuation Conclusion

- 8.1** The current valuation has been carried out based on the discussed valuation methodology explained herein earlier. Further, various qualitative factors, the business dynamics and growth potential of the business, having regard to information base, management perceptions, key underlying assumptions and limitations were given due consideration.
- 8.2** I have been represented by the Investment Manager that there is no potential devolvement on account of the contingent liability as of valuation date; hence no impact has been factored in to arrive at fair EV of the SPVs.
- 8.3** Based on the above analysis, the fair EV as on the Valuation Date of the SPVs is as mentioned below:

<<This space is left intentionally blank>>

(A) Transmission & BESS Assets:

Total Fair Enterprise Value of Solar Assets (B)						68,479

*The EV of INR 14,497 Mn has been arrived based on tariff rate of INR 2.49/kWh, which includes the Change in law (CIL) claim of INR 0.12/kWh for which a petition has been filed and is awaiting final order from approving authority. In the event, the CIL claim is not approved, and the relief of INR 0.12/kWh is not awarded, the tariff rate will remain at 2.37/kWh leading to a decline in EV by INR 756 Mn to INR 13,741 Mn. (Refer Appendix 1 for detailed workings)

Total Fair Enterprise Value

Particulars	INR Mn Fair EV
Total Fair Enterprise Value of Transmission & BESS Assets (A)	2,71,927
Total Fair Enterprise Value of Solar Assets (B)	68,479
Total Fair Enterprise Value (A+B)	3,40,406

- 8.4** EV is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash or cash equivalents to meet those liabilities.
- 8.5** The EV as described above is not inclusive of cash and cash equivalents of the SPVs as on the Valuation Date.
- 8.6** The fair EV of the SPVs is estimated using DCF method. The valuation requires the Investment Manager to make certain assumptions about the model inputs including forecast cash flows, discount rate, and credit risk.
- 8.7** Valuation is based on estimates of future financial performance or opinions, which represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, a particular event will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary from these estimates and the variations may be material.

Accordingly, a quantitative sensitivity analysis is considered on the following unobservable inputs:

- 1. Weighted Average Cost of Capital (WACC) by increasing / decreasing it by 0.5%
- 2. Weighted Average Cost of Capital (WACC) by increasing / decreasing it by 1.0%
- 3. Total Expenses considered during the projected period by increasing / decreasing it by 20%
- 4. Terminal period value considered for the SPVs increasing / decreasing it by 20%

The detailed results of the above sensitivity analysis are presented in **Section 1.8 – Summary of Valuation**, for reference and further consideration.

9. Minimum Disclosures mandated under Schedule V of SEBI InvIT Regulations for Full Valuation Reports

9.1 Scope of Work:

The Schedule V of the SEBI InvIT Regulations prescribes the minimum set of mandatory disclosures to be made in the Full Valuation Report. Being a quarterly valuation report, all disclosures where there were material updates, during the quarter, are being disclosed. In this reference, the minimum disclosures in valuation report may include following information as well, so as to provide the investors with the adequate information about the valuation and other aspects of the underlying assets of the InvIT.

The additional set of disclosures, as prescribed under Schedule V of InvIT Regulations, to be made in the valuation report of the SPVs are as follows:

	Schedule V of the SEBI InvIT Regulations	Reference In Report
i.	Details of the project including whether the transaction is a related party transaction	Section 9.2 (A)
ii.	Latest pictures of the project	Section 9.2 (B) & Section 3.2 – Background of the SPVs
iii.	the existing use of the project	Section 3.2 – Background of the SPVs
iv.	the nature of the interest the InvIT holds or proposes to hold in the project, percentage of interest of the InvIT in the project	Section 4 – Structure of the Trust Appendix 5 - Summary of Amount of Outstanding debt payable by SPVs to InvIT
v.	Date of inspection and date of valuation	Same as Point (ii) as mentioned above and Refer Section 1.7 (iii)
vi.	Qualifications and assumptions	Section 7 – Valuation of the SPVs (Key Assumptions)
vii.	Methods used for valuation	Section 6 – Valuation Methodology
viii.	Valuation standards adopted	Section 2 – Procedures adopted for Valuation
ix.	Extent of valuer's investigations and nature and source of data to be relied upon	Section 10 – Sources of information
x.	Purchase price of the project by the InvIT (for existing projects of the InvIT)	Section 9.2 (A)
xi.	Valuation of the project in the previous 3 years; (for existing projects of the InvIT)	Section 1.9- Executive Summary
xii.	Detailed valuation of the project as calculated by the valuer;	Appendix 1,2,3
xiii.	List of one-time sanctions/approvals which are obtained or pending;	Section 9.2 (C)
xiv.	List of up to date/overdue periodic clearances;	Section 9.2 (D)
xv.	Statement of assets	Section 9.2 (E)
xvi.	Estimates of already carried as well as proposed major repairs and improvements along with estimated time of completion;	Section 9.2 (F)
xvii.	Revenue pendencies including local authority taxes associated with InvIT asset and compounding charges, if any;	Section 9.2 (G)
xviii.	On-going material litigations including tax disputes in relation to the assets, if any;	Section 9.2 (H)
xix.	Vulnerability to natural or induced hazards that may not have been covered in town planning/ building control.	Section 9.2 (I)

9.2 Analysis of Additional Set of Disclosures for the SPVs

* Purchase price considered is the Enterprise value as on the acquisition date of the respective SPVs subject to cash, working capital adjustments and liabilities outstanding.

Not applicable since these are awarded SPVs

** IGT has acquired control of VRET via Acquisition resulting in addition of 16 operating solar projects (14 cts) and 1 Transmission asset i.e TL SitamausS held by 15 SPVs with a capacity of 538 MW w.e.f 25th August 2023 (hereinafter referred to as the VRET Assets).

KNTL and RSAPL were jointly acquired for a total purchase consideration of INR 21,079 million on 24th June 2025.

¹SGL1 alongwith its subsidiaries (BDTCL & JTCL) were acquired from SPGVL

²SGL2 alongwith its subsidiaries (NRSS) were acquired from SPGVL

³SGL3 along with its subsidiaries (OGPTL) were acquired from SPGVL

NOTE:

- Sterlite Power Grid Ventures Limited & Sterlite Grid 4 Limited merged with Sterlite Power Transmission Limited
- Name of SPTL changed to Sterlite Electric Limited
- SPTL de-classified as sponsor of IGT w.e.f July 06, 2023

B. Latest Pictures of the Project:

My team and I visited following sites during this quarter: Globus, Solar Edge, TL Patlasi, RTCL, KTL, NRSS, GPTL and TL SitamauSS, the site visit pictures of which are disclosed in Section 3.2 - Background of the SPVs. Additional site visits for the remaining SPVs are planned in the forthcoming months, and details relating to the respective projects, along with relevant photographs, will be updated and disclosed in the forthcoming reports.

C. List of one-time sanctions/approvals which are obtained or pending:

The list of one-time sanctions/approvals will form a part of the detailed valuation report that will be issued during the FY 2026-27.

D. List of up to date/ overdue periodic clearances:

The list of up to date/overdue periodic clearances will form a part of the detailed valuation report that will be issued during the FY 2026-27.

E. Statement of assets included:

The Statement of assets will form a part of the detailed valuation report that will be issued during the FY 2026-27.

F. Estimates of already carried as well as proposed major repairs and improvements along with estimated time of completion:

I have been informed that maintenance is regularly carried out by the SPVs in order to maintain the working condition of the assets and there are no material maintenance charges which has been deferred to the upcoming year, as the maintenance activities are carried out regularly.
(Refer Appendix 8 for detailed working)

G. Revenue pendencies including local authority taxes associated with InvIT asset and compounding charges, if any:

Investment Manager has informed me that there are no material dues including local authority taxes (such as Municipal Tax, Property Tax, etc.) pending to be payable to the government authorities with respect to the SPVs (proposed InvIT assets).

H. On-going material litigations including tax disputes in relation to the assets, if any:

As informed by the Investment Manager, there have been no additional On-going material litigations including tax disputes in relation to assets between the period 1st April 2026 to 30th June 2026. Investment Manager has informed us that it expects majority of the cases to be settled in favour of SPVs. Further, Investment Manager has informed us that majority of the cases are low to medium risk and accordingly no material outflow is expected against the litigations.

I. Vulnerability to natural or induced hazards that may not have been covered in town planning/ building control:

The Investment Manager has confirmed to me that there are no natural or induced hazards which have not been considered in town planning/ building control.

Other Matters:

There are no other material matters to report except those specifically disclosed above in this Valuation Report.

10. Sources of Information

For the purpose of undertaking this valuation exercise, I have relied on the following sources of information provided by the Investment Manager:

- 10.1 Audited financial statements of the SPVs for the Financial Year ("FY") ended 31st March 2022, 31st March 2023, 31st March 2024, 31st March 2025, and 31st March 2026.
- 10.2 Provisional financial statements of the SPVs for the Financial Year ("FY") ended 30th June 2026.
- 10.3 Projected incremental tariff revenue workings (including change in law claims in MTL, NRSS, OGPTL, BDTCL, JTCL, ENICL, GPTL, NERTL, PKTCL and KhTL)
- 10.4 Projected financial information for the remaining project life for each of the SPVs;
- 10.5 Details of projected Major Repairs & Capital Expenditure (Capex);
- 10.6 Details of brought forward losses and MAT credit (as per Income Tax Act) of the SPVs as at 30th June 2026;
- 10.7 Details of Written Down Value (WDV) (as per Income Tax Act) of SPVs as at 30th June 2026;
- 10.8 Shareholding pattern of the equity shares of the SPVs and other entities mentioned in this Report as at 30th June 2026 and as at the date of this report;
- 10.9 Power Purchase Agreements (PPA) entered into by the solar SPVs with their respective customers.
- 10.10 Technical Report issued in the month of May 2020 by Mahindra Teqo (For ISPL 1 & ISPL 2)
- 10.11 Transmission Service Agreement of the SPVs with Long Term Transmission Customers and Tariff Adoption Order issued by CERC;
- 10.12 Battery Energy Storage Purchase Agreements of the BESS SPVs
- 10.13 List of licenses / approvals, details of tax litigations, civil proceedings and arbitrations of the SPVs;
- 10.14 Management Representation Letter by the Investment Manager dated 7th August 2026;
- 10.15 Relevant data and information about the SPVs provided to us by the Investment Manager either in written or oral form or in the form of soft copy;
- 10.16 Information provided by leading database sources, market research reports and other published data.

The information provided to me by the Investment Manager in relation to the SPVs included but not limited to historical financial statements, forecasts/projections, other statements and assumptions about future matters like forward-looking financial information prepared by the Investment Manager. The forecasts and projections as supplied to me are based upon assumptions about events and circumstances which are yet to occur.

For the purpose of Calculation of Raw beta, we have sourced the data from S&P Capital IQ.

I have not tested individual assumptions or attempted to substantiate the veracity or integrity of such assumptions in relation to the forward-looking financial information, however, I have made sufficient enquiries to satisfy myself that such information has been prepared on a reasonable basis.

Notwithstanding anything above, I cannot provide any assurance that the forward-looking financial information will be representative of the results which will actually be achieved during the cash flow forecast period.

11. Exclusions and Limitations

- 11.1 My Report is subject to the limitations detailed hereinafter. This Report is to be read in totality, and not in parts, in conjunction with the relevant documents referred to herein.
- 11.2 Valuation analysis and results are specific to the purpose of valuation and is not intended to represent value at any time other than the valuation date of 30th June 2026 ("Valuation Date") mentioned in the Report and as per agreed terms of my engagement. It may not be valid for any other purpose or as at any other date. Also, it may not be valid if done on behalf of any other entity.
- 11.3 This Report, its contents and the results are specific to (i) the purpose of valuation agreed as per the terms of my engagements; (ii) the Valuation Date; and (iii) are based on the financial information of the SPVs till 30th June 2026. The Investment Manager has represented that the business activities of the SPVs have been carried out in normal and ordinary course between 30th June 2026 and the Report Date and that no material changes have occurred in the operations and financial position between 30th June 2026 and the Report date.
- 11.4 The scope of my assignment did not involve me performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of any financial or analytical information that was provided and used by me during the course of my work. The assignment did not involve me to conduct the financial or technical feasibility study. I have not done any independent technical valuation or appraisal or due diligence of the assets or liabilities of the SPVs or any of other entity mentioned in this Report and have considered them at the value as disclosed by the SPVs in their regulatory filings or in submissions, oral or written, made to me.
- 11.5 In addition, I do not take any responsibility for any changes in the information used by me to arrive at my conclusion as set out herein which may occur subsequent to the date of my Report or by virtue of fact that the details provided to me are incorrect or inaccurate.
- 11.6 I have assumed and relied upon the truth, accuracy and completeness of the information, data and financial terms provided to me or used by me; I have assumed that the same are not misleading and do not assume or accept any liability or responsibility for any independent verification of such information or any independent technical valuation or appraisal of any of the assets, operations or liabilities of the SPVs or any other entity mentioned in the Report. Nothing has come to my knowledge to indicate that the material provided to me was misstated or incorrect or would not afford reasonable grounds upon which to base my Report.
- 11.7 This Report is intended for the sole use in connection with the purpose as set out above. It can however be relied upon and disclosed in connection with any statutory and regulatory filing in connection with the provision of SEBI InvIT Regulations. However, I will not accept any responsibility to any other party to whom this Report may be shown or who may acquire a copy of the Report, without my written consent.
- 11.8 It is clarified that this Report is not a fairness opinion under any of the stock exchange/ listing regulations. In case of any third party having access to this Report, please note this Report is not a substitute for the third party's own due diligence/ appraisal/ enquiries/ independent advice that the third party should undertake for his purpose.
- 11.9 Further, this Report is necessarily based on financial, economic, monetary, market and other conditions as in effect on, and the information made available to me or used by me up to, the date hereof. Subsequent developments in the aforementioned conditions may affect this Report and the assumptions made in preparing this Report and I shall not be obliged to update, revise or reaffirm this Report if information provided to me changes.
- 11.10 This Report is based on the information received from the sources as mentioned in Section 9 of this Report and discussions with the Investment Manager. I have assumed that no information has been withheld that could have influenced the purpose of my Report.
- 11.11 Valuation is not a precise science and the conclusions arrived at in many cases may be subjective and dependent on the exercise of individual judgment. There is, therefore, no indisputable single value. I have arrived at an indicative EV based on my analysis. While I have provided an assessment of the value based on an analysis of information available to me and within the scope of my engagement, others may place a different value on this business.
- 11.12 Any discrepancies in any table / appendix between the total and the sums of the amounts listed are due to rounding-off.
- 11.13 Valuation is based on estimates of future financial performance or opinions, which represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, a particular event will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary from these estimates and the variations may be material.
- 11.14 I do not carry out any validation procedures or due diligence with respect to the information provided/extracted or carry out any verification of the assets or comment on the achievability and reasonableness of the assumptions underlying the financial forecasts, save for satisfying ourselves to the extent possible that they are consistent with other information provided to me in the course of this engagement.
- 11.15 My conclusion assumes that the assets and liabilities of the SPVs, reflected in their respective latest balance sheets remain intact as of the Report date, except for changes occurring due to ordinary course of business.
- 11.16 Whilst all reasonable care has been taken to ensure that the factual statements in the Report are accurate, neither myself, nor any of my associates, officers or employees shall in any way be liable or responsible either directly or indirectly for the contents stated herein. Accordingly, I make no representation or warranty, express or implied, in respect of the completeness, authenticity or accuracy of such factual statements. I expressly disclaim any and all liabilities, which may arise based upon the information used in this Report. I am not liable to any third party in relation to the issue of this Report.

- 11.17 The scope of my work has been limited both in terms of the areas of the business & operations which I have reviewed and the extent to which I have reviewed them. There may be matters, other than those noted in this Report, which might be relevant in the context of the transaction and which a wider scope might uncover.
- 11.18 For the present valuation exercise, I have also relied on information available in public domain; however the accuracy and timelines of the same has not been independently verified by me.
- 11.19 In the particular circumstances of this case, my liability (in contract or under any statute or otherwise) for any economic loss or damage arising out of or in connection with this engagement, however the loss or damage caused, shall be limited to the amount of fees actually received by me from the Investment Manager, as laid out in the engagement letter for such valuation work. However, such cap shall not be applicable to damages arising from fraud or willful default or gross negligence as established in civil or criminal proceedings.
- 11.20 In rendering this Report, I have not provided any legal, regulatory, tax, accounting or actuarial advice and accordingly I do not assume any responsibility or liability in respect thereof.
- 11.21 This Report does not address the relative merits of investing in InvIT as compared with any other alternative business transaction, or other alternatives, or whether or not such alternatives could be achieved or are available.
- 11.22 I am not an advisor with respect to legal, tax and regulatory matters for the proposed transaction. No investigation of the SPVs' claim to title of assets has been made for the purpose of this Report and the SPVs' claim to such rights have been assumed to be valid. No consideration has been given to liens or encumbrances against the assets, beyond the loans disclosed in the accounts. Therefore, no responsibility is assumed for matters of a legal nature.
- 11.23 I have no present or planned future interest in the Trustee, Investment Manager or the SPVs and the fee for this Report is not contingent upon the values reported herein. My valuation analysis should not be construed as investment advice; specifically, I do not express any opinion on the suitability or otherwise of entering into any financial or other transaction with the Investment Manager or SPVs.
- 11.24 I have submitted the draft valuation report to the Trust & Investment Manager for confirmation of accuracy of factual data used in my analysis and to prevent any error or inaccuracy in this Report.
- 11.25 Other Limitations:
- This Report is based on the information provided by the representatives of the Investment Manager. The exercise has been restricted and kept limited to and based entirely on the documents, records, files, registers and information provided to me. I have not verified the information independently with any other external source.
 - I have assumed the genuineness of all signatures, the authenticity of all documents submitted to me as original, and the conformity of the copies or extracts submitted to me with that of the original documents.
 - I have assumed that the documents submitted to me by the representatives of Investment Manager in connection with any particular issue are the only documents related to such issue.
 - I have reviewed the documents and records from the limited perspective of examining issues noted in the scope of work and I do not express any opinion as to the legal or technical implications of the same.
- 11.26 **Limitation of Liabilities**
- i. It is agreed that, having regard to the RV's interest in limiting the personal liability and exposure to litigation of its personnel, the Sponsor, the Investment Manager and the Trust will not bring any claim in respect of any damage against the RV personally.
 - ii. In no circumstances RV shall be responsible for any consequential, special, direct, indirect, punitive or incidental loss, damages or expenses (including loss of profits, data, business, opportunity cost, goodwill or indemnification) in connection with the performance of the services whether such damages are based on breach of contract, tort, strict liability, breach of warranty, or otherwise, even if the Investment Manager had contemplated and communicated to RV the likelihood of such damages. Any decision to act upon the deliverables (including this Report) is to be made by the Investment Manager and no communication by RV should be treated as an invitation or inducement to engage the Investment Manager to act upon the deliverable(s).
 - iii. It is clarified that the Investment Manager will be solely responsible for any delays, additional costs, or other liabilities caused by or associated with any deficiencies in their responsibilities, misrepresentations, incorrect and incomplete information including information provided to determine the assumptions.
 - iv. RV will not be liable if any loss arises due to the provision of false, misleading or incomplete information or documentation by the Investment Manager.

- 11.27 Further, this Report is necessarily based on financial, economic, monetary, market and other conditions as in effect on, and the information made available to me or used by me up to, the date hereof. Subsequent developments in the aforementioned conditions may affect this Report and the assumptions made in preparing this Report and I shall not be obliged to update, revise or reaffirm this Report if information provided to me changes.

Source: Information provided by S&P Capital IQ, database sources, market research, other published data and internal workings

Justification of Companies used for calculation of Beta for Transmission & BESS SPV's:

The following companies are integral players in the Indian infrastructure sector and contributes significantly to the development, operation and maintenance of infrastructure project. Their strong market presence, diversified portfolios and consistent involvement in the key infrastructure projects make them relevant for the computation of beta of Transmission & BESS SPV's in the context of business valuation:

1. PG InvIT

PowerGrid InvIT (PG InvIT) primarily owns and operates high-voltage power transmission lines, which form a critical component of India's electricity infrastructure. The trust earns regulated revenues through long-term, fixed-fee contracts with utilities, offering predictable and stable cash flows over extended periods. Accordingly, PG InvIT has been included as a comparable for beta calculation in the valuation of Transmission & BESS SPVs.

2. PGCIL

Power Grid Corporation of India Limited (PGCIL) is mainly engaged in transmitting total electricity generated in the country. PGCIL has been considered as a comparable for beta calculation in the valuation of the Transmission company due to its operational alignment with the transmission business. The company operates capital-intensive, regulated transmission asset with stable and predictable cashflows-Characteristics that closely align with those of Transmission businesses. Accordingly, PGCIL has been included as a comparable for beta calculation in the valuation of Transmission & BESS SPVs.

3. IndiGrid Infrastructure Trust

IndiGrid Infrastructure Trust owns and operates a diversified portfolio of infrastructure assets, with a significant share in power transmission and battery energy storage system assets. The trust earns stable, regulated revenues through long-term availability-based contracts, providing predictable cash flows. While IndiGrid was previously excluded from the beta analysis due to low trading frequency, its trading activity has improved significantly and remains stable in the current year. Hence the Beta of IndiGrid is also included for determination of Beta.

(B) Solar Assets

Appendix 2.2 – Calculation of Unlevered and Relevered Beta as on 30th June 2026

a. Calculation of Unlevered Beta

$$\text{Unlevered Beta} = \text{Levered Beta} / [1 + (\text{Debt} / \text{Equity}) * (1 - T)]$$

Ticker	Particulars (Comparable companies)	Raw Beta	Debt to Market Capitalisation	Effective Tax Rate (%)	Unlevered Beta
NSEI:NTPC	NTPC Ltd	0.76	113%	25.17%	0.41
NSEI:POWERGRID	Power Grid Corporation of India Ltd	0.56	80%	17.47%	0.34
NSEI:PGINVT	Powergrid InVT (PG InVT)	0.14	2%	17.47%	0.14
NSEI:INDIGRID	Indigrid Infrastructure Trust	0.13	141%	17.47%	0.06
Average					0.24

b. Calculation of Re-levered Beta

$$\text{Re-levered Beta} = \text{Unlevered Beta} * [1 + (\text{Debt/Equity}) * (1 - T)]$$

Justification of Companies used for calculation of Beta for Solar SPVs:

The following companies are integral players in the Indian infrastructure sector and contributes significantly to the development, operation and maintenance of infrastructure project. Their strong market presence, diversified portfolios and consistent involvement in the key infrastructure projects make them relevant for the computation of beta of Solar SPVs in the context of Solar business valuation:

1. PG InvIT

PowerGrid InvIT (PG InvIT) primarily owns and operates high-voltage power transmission lines, which form a critical component of India's electricity infrastructure. The trust earns regulated revenues through long-term, fixed-fee contracts with utilities, offering predictable and stable cash flows over extended periods. PGInvIT has been included as a comparable for beta calculation in the valuation of Solar generation company primarily due to its Structure as an Infrastructure Investment Trust (InvIT). Due to lack of directly listed solar generation InvIT, PGInvIT – being part of broader InvIT category-serves as a relevant proxy given the structural and financial similarities shared across InvITs. PGInvIT Operated Capital-intensive, regulated infrastructure assets that generates predictable cash flows. This stability in earnings and business model alignment reinforces the rationale for selecting PGInvIT as a comparable entity, particularly when exact matches within the solar segment are not available.

2. PGCIL

Power Grid Corporation of India Limited (PGCIL) is mainly engaged in transmitting total electricity generated in the country. PGCIL has been considered as a comparable for beta calculation in the valuation of the solar generation company due to its structural and operational alignment with the InvIT model. In the absence of a directly listed solar InvIT PGCIL serves as a suitable proxy within the broader infrastructure category. The company operates capital-intensive, regulated transmission asset with stable and predictable cashflows-Characteristics that closely align with those of solar generation businesses. Furthermore, the operational stability and low market volatility associated with PGCIL resonate well with the risk profile of the company being valued, justifying its inclusion as a relevant comparable for beta estimation.

3. NTPC Ltd.

NTPC Ltd is mainly engaged in power generation and has very limited percentage of its portfolio under construction majority of revenue is through selling of electric units to various distribution companies in India through PPAs. NTPC shares several key characteristics with standalone solar companies including capital intensity, Long – term power purchase agreements (PPAs), regulated returns and government linked policy frameworks. Except for the generation risk on account of its Efficacy, the cashflows of NTPC are predictable based on the long-term PPAs and infrastructure setup of the business which makes it comparable to the solar business of the trust.

4. IndiGrid Infrastructure Trust

IndiGrid Infrastructure Trust owns and operates a diversified portfolio of infrastructure assets including transmission and Solar assets. It also acquired operational solar power assets, expanding its presence in the renewable energy sector. These assets operate under long-term power purchase agreements (PPAs), offering visibility of cash flows and moderate risk, in line with other utility-scale solar investments. While IndiGrid was previously excluded from the beta analysis due to low trading frequency, its trading activity has improved significantly and remains stable in the current year. Hence the Beta of IndiGrid is also included for determination of Beta.

Note No	Remarks
Note 1	Risk Free Rate has been considered based on zero coupon yield curve as at 30 th June 2026 of Government Securities having maturity period of 10 years, as quoted on CCIL's website (Refer Section 7.3.2 – Valuation of the SPVs)
Note 2	Based on historical realized returns on equity investments over a risk-free rate represented by 10 years government bonds, a 7% equity risk premium is considered appropriate for India. (Refer Section 7.3.3– Valuation of the SPVs)
Note 3	Beta has been considered based on the beta of companies operating in the similar kind of business in India
Note 4	Base Ke = Rf + (β x ERP)
Note 5	Risk Premium/ Discount Specific to the SPVs
Note 6	Adjusted Ke = Rf + (β x ERP) + CSR
Note 7	As per Management Representation Letter (Refer Section 7.3.6 – Valuation of the SPVs)
Note 8	Average tax rate for the life of the SPVs have been considered
Note 9	Effective cost of debt, Kd = Pre tax Kd * (1-Effective Tax Rate)
Note 10	The debt – equity ratio computed as [D/(D+E)] is considered as 70% as per industry standard.
Note 11	WACC = [Ke*(1-D/(D+E))]+[Kd*(1-D/(D+E))]

Note No **Remarks**

Note 1	Risk Free Rate has been considered based on zero coupon yield curve as at 30 th June 2026 of Government Securities having maturity period of 10 years, as quoted on CCIL's website (Refer Section 7.3.2 – Valuation of the SPVs)
Note 2	Based on historical realized returns on equity investments over a risk free rate represented by 10 years government bonds, a 7% equity risk premium is considered appropriate for India. (Refer Section 7.3.3– Valuation of the SPVs)
Note 3	Beta has been considered based on the beta of companies operating in the similar kind of business in India
Note 4	Base Ke = Rf + (β x ERP)
Note 5	Risk Premium/ Discount Specific to the SPVs
Note 6	Adjusted Ke = Rf + (β x ERP) + CSR
Note 7	As per Management Representation Letter (Refer Section 7.3.6 – Valuation of the SPVs)
Note 8	Average tax rate for the life of the SPVs have been considered
Note 9	Effective cost of debt, Kd = Pre tax Kd * (1-Effective Tax Rate)
Note 10	The debt - equity ratio computed as [D/(D+E)] is considered as 70% as per industry standard.
Note 11	WACC = [Ke*(1-D/(D+E))]+[Kd*(1-τ)*D/(D+E)]

17	RSAPL	20.34%

The Plant Load Factor ("PLF") is the ratio of the actual output of a solar power plant over the reporting period to their potential output if it were possible for them to operate at full rated capacity.

In the present valuation, the technical team of the Investment Manager has prepared the PLF estimates for the projected period basis historical performance of six years after considering the variance on account of seasonal factors and any one-time instances or events. I have relied on the projections provided by the Investment Manager for the projected PLF of the SPVs. I have corroborated the assumptions made by the Investment Manager in relation to the projected PLF of the SPVs with an independent technical report.

Appendix 11 – Brief Details about the Valuer

Professional Experience

Sundaraman is a fellow member from the Institute of Chartered Accountants of India, Graduate member of the Institute of Cost and Works Accountants of India, Information Systems Auditor (DISA of ICAI) and has completed the Post Qualification Certification courses of ICAI on IFRS, Valuation. He is a registered Insolvency Professional and a Registered Valuer for Securities or Financial Assets, having been enrolled with the Insolvency and Bankruptcy Board of India (IBBI) after passing the respective Examinations. He possesses more than 30 years of experience in servicing large and medium-sized clients in the areas of Corporate Advisory including Strategic Restructuring, Governance, Acquisitions and related Valuations and Tax Implications apart from Audit and Assurance Services.

His areas of specialization include valuation for various Infrastructure Companies including valuation for Investment Infrastructure Trusts (InvITs)

Professional Qualifications & Certifications

- FCA
- Grad CWA
- Certificate Courses on Valuation
- Certificate Course on IFRS
- Information Systems Audit (DISA of ICAI)
- Registered Insolvency Professional
- IBBI Registered Valuer

You must make your own assessment of the relevance, accuracy and adequacy of the information contained in this presentation and must make such independent investigation as you may consider necessary or appropriate for such purpose. Moreover, no express or implied representation or warranty is made as to, and no reliance should be placed on, the accuracy, fairness or completeness of the information presented or contained in this presentation. Further, past performance is not necessarily indicative of future results. Any opinions expressed in this presentation or the contents of this presentation are subject to change without notice.

None of the IndiGrid Group or the Sponsor Group or the Investment Manager or the Axis Trustee Services Limited or any of their respective affiliates, advisers or representatives accept any liability whatsoever for any loss howsoever arising from any information presented or contained in this presentation. Furthermore, no person is authorized to give any information or make any representation which is not contained in, or is inconsistent with, this presentation. Any such extraneous or inconsistent information or representation, if given or made, should not be relied upon as having been authorized by or on behalf of the IndiGrid Group or the Sponsor Group.

The distribution of this presentation in certain jurisdictions may be restricted by law. Accordingly, any persons in possession of this presentation should inform themselves about and observe any such restrictions. This presentation contains certain statements of future expectations and other forward-looking statements, including those relating to IndiGrid Group’s general business plans and strategy, its future financial condition and growth prospects, and future developments in its sectors and its competitive and regulatory environment. In addition to statements which are forward looking by reason of context, the words ‘may’, ‘will’, ‘should’, ‘expects’, ‘plans’, ‘intends’, ‘anticipates’, ‘believes’, ‘estimates’, ‘predicts’, ‘potential’ or ‘continue’ and similar expressions identify forward-looking statements.

By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. Forward-looking statements are not guarantees of future performance including those relating to general business plans and strategy, future outlook and growth prospects, and future developments in its businesses and its competitive and regulatory environment. No representation, warranty or undertaking, express or implied, is made or assurance given that such statements, views, projections or forecasts, if any, are correct or that any objectives specified herein will be achieved. All forward-looking statements are subject to risks, uncertainties and assumptions that could cause actual results, performances or events to differ materially from the results contemplated by the relevant forward-looking statement. The factors which may affect the results contemplated by the forward-looking statements could include, among others, future changes or developments in (i) the IndiGrid Group’s business, (ii) the IndiGrid Group’s regulatory and competitive environment, (iii) the power sector, and (iv) political, economic, legal and social conditions. Given the risks, uncertainties and other factors, viewers of this presentation are cautioned not to place undue reliance on these forward-looking statements.

Focused Business Model	Value Accretive Growth	Predictable Distribution	Optimal Capital Structure
• Long term contracts • Low operating risks • Stable cash flows	• DPU accretive acquisitions Y-o-Y • Creating growth pipeline for future	• Quarterly distribution • Minimum 90% of Net cash flow distributed • Sustainable distributions	• Cap on leverage at 70% • AAA rating; prudent liability management • Well capitalized

To become the most admired yield vehicle in Asia

Q1 FY27 QUARTERLY UPDATE

Q1 FY27 Highlights

IndiGrid & EnerGrid Update

- ❑ EnerGrid received LOIs for two transmission projects:
 - Shongtong–Tidong Transmission Scheme, awarded through the TBCB mechanism, comprising ~450 ckms of transmission lines and a 400/220 kV, 630 MVA substation, to be developed on BOOT-basis.
 - Transmission System for evacuation of power from Sunni Dam HEP and Luhri Stage-I HEP, awarded through the TBCB mechanism, comprising ~104 ckms of transmission lines and 1,050 MVA of substation capacity, to be developed on Boot-basis.
- ❑ Together, these projects entail a cumulative capex of ~INR 5,800 crore and further strengthen IndiGrid's future growth pipeline through EnerGrid.

Financial Performance

- ❑ **Q1 FY27 Financial Performance:** Operational Revenue at ₹930 crore, up 18.9% YoY, growth driven primarily by the addition of new projects in the portfolio through the year. The revenue growth translated into operational EBITDA growing by 23.6% YoY and was at ₹860 crore, a margin of 89.1%.
- ❑ AUM and Net Debt/AUM at the end of the fiscal stood at ₹34,041 crore and 58.5% respectively.
- ❑ Q1 FY27 collections at 95% for transmission assets and 100% for solar assets.

Distribution Performance

- ❑ Q1 FY27 DPU declared at ₹4.12; in-line with the full year guidance of ₹16.48 per unit.

Operational Performance

- ❑ Weighted average quarterly transmission availability based on asset revenue at 99.64%.
- ❑ Solar Capacity Utilization Factor (CUF) at 26.5%.
- ❑ BESS Round Trip Efficiency (RTE) at 88.44%.

Operations

Q1 FY27 Industry Update

Power Demand and Capacity Trend

- The all-time high peak power demand touched 270.82 GW on May 21, 2026, driven by intense summer heat and higher cooling loads. Demand remained elevated into Q2, crossing the 270 GW mark in July 2026 as well.
- Overall electricity peak demand in Q1 FY27 registered a ~12% YoY growth compared to Q1 FY26, met seamlessly with zero shortage across all regional grids.
- Total installed capacity reached ~548.9 GW as of June 2026, with non-fossil/RES sources accounting for >52.5% (~275 GW),

Key Developments in Transmission and Renewables in the quarter

CEA 900 GW Master Plan (2035-36)

- **7.93 Lakh** Crore outlay to add 1,37,500 ckm transmission lines & 828 GVA transformation capacity.
- Designed to evacuate **>900 GW non-fossil capacity** by 2035-36.
- Storage plan scaled to **174 GW** (80 GW BESS + 94 GW PSP) for grid balancing.

NMP 2.0 & Capital Recycling

- NITI Aayog Phase 2 target set at **₹16.72 Lakh Crore** (FY26–FY30).
- Power sector allocation at **₹2.77 Lakh Crore** for brownfield asset monetisation.
- Accelerating BOOT structures and InvIT-led recycling for fast-track evacuation corridors.

Grid Scale & VRE Records

- All-time high Variable Renewable Energy (VRE) peak reached **103.7 GW** in July 2026 (Solar: 75 GW).
- Inter-regional grid capacity expanded past **120,340 MW** as of June 2026.
- Added over 2.18 lakh ckm lines and 9.47 lakh MVA transformation capacity since 2014.

- ❑ **Scale of Opportunity:** India's energy transition continues to drive a multi-decade transmission opportunity, specifically driven by rising renewable integration, grid expansion requirements and increasing need for evacuation infrastructure across both RE and storage ecosystems.
- ❑ **Rising need of Energy Storage:** Battery Energy Storage Systems (BESS) and pumped storage are increasingly emerging as critical enablers for renewable integration, grid stability, evening peak management and improved utilisation of transmission infrastructure.
- ❑ **RE ambitions will drive growth, albeit with challenges:** While renewable energy additions remain structurally strong and economically competitive, near-term sector execution continues to face bottlenecks including transmission congestion, curtailment, unsigned PPAs and evolving DSM regulations.
- ❑ **NMP 2.0:** Asset monetisation, BOOT structures and InvIT-led capital recycling are expected to play an increasingly important role in funding India's next phase of transmission and energy transition infrastructure growth.

High bidding activity in the transmission & BESS sector

Transmission Bids

Q1 FY27 Operational Performance

• HSE Update

- Zero Medical Treatment Case, First Aid Case and One Loss Time Incident.

• Performance for Q1 FY27

- Solar Generation: 669.4 MU at 26.5% CUF
- Transmission Weighted average (revenue basis) availability: ~99.64%
- BESS (KBPL & GBPL) –
 - Weighted average availability: 98.39% (much above the 95% contractual availability requirement)
 - Weighted average Round Trip Efficiency (RTE): 88.44% (much above the 85% contractual RTE requirement)

• Reliability for Q1 FY27

- Trips/Line: 0.27
 - Majority of the trips occurred due to lightning, thunderstorm, stubble burning and foreign materials
- Substation Trips/Element: 0.03
- Solar Avg. Availability / Plant Availability: ~98.1%
 - Availability impacted due to inverter IGBT & string failures in SolarEdge 80 & 50 and strings down due communication failure in IGS-I.

Q1 FY27 Availability (%)

Notes:

GPTL – Prithla SS bus reactor failure. Covered under insurance.

Key Indicators	Q1 FY26	Q1 FY27
No. of Trips / Line	0.41	0.27
Training Man hours (Hours)	~19,679	~11,180
Lost Time Incident (Nos)	0	1
Unsafe conditions reporting (Nos)	2,946	3257
Near Miss Reporting (Nos)	79	5
Utility Solar		
Generation (MU) ¹	434.5	669.4
CUF/Plant Availability (%)	22.6% ² / 94.1%	26.5% / 98.1%

Consistent track record of maintaining superior availability and yield performance

1. RSAPL was acquired in July-2026. Hence Q1 FY26 solar generation is lower compared to Q1 FY27.

2. The CUF of 17.7% previously reported for Q1 FY26 was inadvertently calculated based on DC capacity. The figure has been corrected to reflect CUF based on AC capacity.

Superior Risk-Adjusted Total Returns to Investors

Source: Bloomberg

(1) Total return is sum of all distributions since listing (Jun'17) and change in price till Jun 30, 2026

(2) InvITs listed after IndiGrid and with trading history of less than 5 years

(3) Beta refers to Historical Beta calculated on a weekly basis since listing of IndiGrid to Jun 30, 2026

(4) 10Y GSec Bond refers to IGB 6.79 15/05/2027 ; 30Y to IGB 7.06 10/10/46 Corp

Consistently outperforming on a risk-adjusted basis

Portfolio Strategy

- ❑ Focus on maintaining stable operations for predictable and sustainable distribution while looking for value accretive acquisitions
- ❑ Greenfield Development
 - ✓ Execution of augmentation work in existing assets as well as all the greenfield under-construction projects.
 - ✓ Add assets worth ~INR 2,000 crore during the fiscal from EnerGrid's identified pipeline.
- ❑ Proactively participate in synergistic greenfield opportunities, along with EnerGrid, across power transmission and BESS; and effectively build phased acquisition pipeline for IndiGrid.
- ❑ Deliver on the DPU guidance of ₹16.48 for FY27, supported by disciplined capital deployment

Improving Balance Sheet Strength

- ❑ Optimize interest costs and tenor profile for upcoming acquisitions
- ❑ Maintain prudent leverage with sufficient headroom to enable organic and inorganic growth

Resilient Asset Management

- ❑ Sustain 99.5%+ availability across the operational portfolio
- ❑ Strengthen self-reliant O&M capabilities, underpinned by digital and predictive analytics
 - ✓ DigiGrid inclusion of all assets plus implementation of Asset Health Indexing
 - ✓ Implementation of AI powered image analyser to strengthen asset monitoring practices
 - ✓ Solar assets configuration on an analytics platform which will enable identify anomalies reinforcing preventive maintenance
- ❑ Uphold world-class EHS and ESG practices, reinforcing long-term portfolio sustainability

Industry Stewardship

- ❑ Actively participate in policy-shaping and industry dialogues to deepen private sector role in infrastructure
- ❑ Build broader visibility for IndiGrid and InvITs as platforms for stable infrastructure returns

ANNEXURES

Diversified Investor Base

Supported by marquee long term investor base

~41% owned by DIIs including insurance companies, mutual funds, pension fund and corporates

Retail Holding at ~31% ; multifold increase since IPO

~19 Insurance companies and ~6 pension funds hold ~16% stake

FII holding (incl. KKR and GIC) at ~27.7%

30th June 2026

*as on 12th August 2026, GIC holds 4.3% in IndiGrid

Experienced Board of Directors

Tarun Kataria
Independent Director

- Over 30 years of rich experience, currently independent non-executive director of Mapletree Logistics Trust Ltd. He is an independent director of Westlife Development Ltd., Jubilant Pharma Ltd. and Global Moats Fund (Mauritius)
- Ex-CEO Religare Capital Markets Limited, Independent Director of Global Moats Fund (Mauritius), Westlife Foodworld Limited, and Hardcastle Restaurants Private Limited.
- MBA in Finance from Wharton School, University of Pennsylvania and is a Chartered Accountant

Gautam Mehra
Independent Director

- Mr. Gautam Mehra brings four decades of experience spanning entrepreneurship, professional services, taxation, regulation and asset management.
- He spent over two decades as Partner at PwC, where he led the India Tax and Regulatory practice and the Asset Management sector.
- He has advised global funds, corporates and Indian business families, and has actively contributed to regulatory and tax advocacy in India. Mr. Mehra currently serves on two SEBI Committees.

Ashok Sethi
Independent Director

- Over 3 decades of experience in power sector with significant knowledge in project execution, operations, commercial, regulatory, advocacy & policymaking
- Currently serves as Director in Power Exchange India Limited. Previously, served as the Chief Operating Officer and Executive Director of Tata Power
- Advance Management at Ashridge, UK and Bachelor's degree from IIT Kharagpur

Hardik Shah
Non-Executive Director

- Member of the Asia-Pacific Infrastructure team of KKR since 2018 responsible for Infrastructure investments in India
- 10+ years at Macquarie Group across their Sydney and Mumbai offices and was involved in building their India Infrastructure business. More recently, led Brookfield's India business
- Post graduate degree from S.P. Jain Institute of Management & Research (Mumbai) and he is also a CFA Charter holder

Jayashree Vaidhyathan
Independent Director

- Decades of experience in driving product strategy in Digital Transformation space, product innovation, risk management, M&A, technology delivery and execution
- CEO of BCT Digital and Independent Director on Board of UTI Asset Management Company as the Chairwoman of the Digital Transformation Committee and member of the risk and stakeholder management committees
- MBA from Cornell University and a Bachelor's degree in Computer Science from Madras University. She is also a CFA Charter Holder

Vaibhav Vaidya
Non-Executive Director

- Vaibhav Vaidya is a Director with KKR India Advisors Private Limited
- He holds a Bachelors in Engineering from Mumbai University and a post graduate degree from the S.P. Jain Institute of Management & Research (Mumbai)
- He has worked previously with Motilal Oswal and JM Financial

Harsh Shah
Managing Director

- Extensive experience in Private Equity financing. M&A, infrastructure financing, regulatory and macro economic policy
- Previously worked with Sterlite Power Transmission Limited, L&T, L&T Infrastructure Finance, P&G
- MBA from the National University of Singapore

THANK YOU

Annexure C2

For Immediate Release

IndiGrid delivers another quarter of strong financial performance. EnerGrid wins two transmission projects.

Key Highlights:

- Q1 FY27 Operational Revenue and EBITDA grew by 18.9% and 23.6% respectively year-on-year.
- EnerGrid won and received LOI for two ISTS projects in Himachal Pradesh with a cumulative capacity of ~550 ckms and ~1,680 MVA and a cumulative capex of ~INR 5,800 crore.
- Q1 FY27 DPU declared at ₹4.12 – in line with the full year guidance of ₹16.48 per unit.

Mumbai, Wednesday, 12th August 2026: IndiGrid [BSE: 540565 | NSE: INDIGRID], India's first and largest publicly listed power sector infrastructure investment trust (InvIT), today announced its financial results for the quarter ended June 30, 2026, along with key business updates.

Financial Update:

Operational revenue for the quarter stood at ₹930 crore, representing a 18.9% year-on-year increase, driven primarily by the addition of new projects in the portfolio during the last fiscal – through acquisitions as well as commissioning of under-construction projects. This growth translated into EBITDA of ₹860 crore, a margin of 89.1% and year-on-year growth of 23.6%.

Reported revenue includes service concession revenue from BOOT (Build-Own-Operate-Transfer) under-construction assets as per the accounting standards. Accordingly, reported revenue for the quarter stood at ₹1,087 crore, a growth of 29.4%, and reported EBITDA was at ₹906 crore, a margin of 80.7% and growth of 28.7%.

Net Distributable Cash Flow (NDCF) for the quarter was ₹370 crore, reflecting a year-on-year growth of 29.4% on the back of asset additions over the last one year. As of June 30, 2026, IndiGrid had Assets Under Management (AUM) of ₹34,041 crore, with a Net Debt to AUM ratio of 58.5%. The collections profile across both segments remained healthy, with collections of 95% and 38 receivable days for transmission assets, and 100% and 34 receivable days for solar assets.

EnerGrid Update:

During the quarter, EnerGrid won and received the LOIs for two Inter-State Transmission projects. These include the Shongtong–Tidong Transmission Scheme, comprising ~450 ckm of transmission lines and a 400/220 kV, 630 MVA substation, and the Transmission System for evacuation of power from Sunni Dam HEP and Luhri Stage-I HEP, comprising ~104 ckm of transmission lines and 1,050 MVA of substation capacity. Both projects were awarded through the TCB mechanism, are to be developed on BOOT-basis, and will entail a cumulative capex of ~INR 5,800 crore.

DPU Update:

For the quarter, the Board of the Investment Manager approved a Distribution Per Unit (DPU) guidance of ₹4.12 – in-line with the full year guidance of ₹16.48.

The record date for the distribution is August 17, 2026, and the distribution shall be paid as ₹2.6909 per unit as interest, ₹0.0224 per unit as (taxable) dividend, and ₹1.4067 per unit as capital repayment, in accordance with Section 223 of the Income Tax Act, 2025.

Commenting on the quarter, **Harsh Shah, Managing Director of IndiGrid**, said, “We delivered a strong financial performance during the quarter, supported by the resilient nature of our portfolio and disciplined asset management. We also continued to build visibility for future growth, with EnerGrid winning two new inter-state transmission projects and taking its identified project pipeline to over ~₹13,500 crore, providing a clear pathway for deployment of its committed investor capital.

India’s peak power demand again crossed 270 GW in July, reinforcing the need to continuously strengthen the country’s power infrastructure. As demand grows and the generation mix evolves, investments in transmission, energy storage and grid flexibility will be critical to building a resilient and sustainable energy system. Through IndiGrid and EnerGrid, we remain focused on contributing meaningfully to this transformation while creating sustainable long-term value for our stakeholders,”

Financial Highlights – Consolidated Financials (in ₹ crore):

₹ Crore	Q1 FY26	Q1 FY27	% change
Reported Revenue	840	1,087	29.4%
EBITDA	704	906	28.7%
NDCF Generated	286	370	29.4%
DPU (₹ per unit)	4.00	4.12	3.0%

Note: Reported Financial performance higher than Operational Financial performance due to Service Concession Accounting Revenue

**About IndiGrid:**

IndiGrid [BSE: 540565 | NSE: INDIGRID] is the first Infrastructure Investment Trust ("InvIT") in the Indian power sector. It owns projects consisting of 59 transmission lines with ~10,237 ckms length, 20 substations with ~33,335 MVA transformation capacity, ~1.5 GWp of solar generation capacity, and ~2.5 GWh of Battery Energy Storage Systems. IndiGrid has assets under management (AUM) of over ~₹34,041 crore (~USD 3.5 billion). The investment manager of IndiGrid is wholly owned by KKR.
